

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE TO THE AMERICAN EDITION.

THE reputation of Dr. William Smith's "Dictionary of the Bible" is now too well established to need any special commendation. It contains, by universal consent, the fruit of the ripest Biblical scholarship of England, and constitutes a library of itself (superseding the use of many books otherwise necessary) for the study and illustration of the Scriptures. As a whole, it is unquestionably superior to any similar Lexicon in our language, and cannot fail to maintain this rank for a long period to come. In this American edition, the Publishers reprint the entire work, *without abridgment or change*, except the correction of typographical errors, or an occasional verbal inaccuracy, and of mistakes in quotation and reference.

At the same time, the reprinting of this Dictionary, after the lapse of several years since its first publication, and of a still longer time since the preparation of many of the articles, affords an opportunity to give to it some new features, required by the progressive nature of Biblical science, and adapting it more perfectly to the wants of students of the Bible in our own country. Among the characteristics in which the American edition differs from the English, are the following: —

1. The contents of the Appendix, embracing one hundred and sixteen pages, and treating of subjects overlooked or imperfectly handled in the first volume, have been inserted in their proper places in the body of the work.

2. The numerous Scripture references, on the accuracy of which the value of a Bible Dictionary so much depends, have all been verified anew. The corrections found necessary in these references, and silently made, amount to more than a thousand. Many other mistakes in quotation and reference have been corrected during the revision of the work.

3. The system of cross-references from one article to another, so indispensable for enabling us to know what the Dictionary contains on related but separated subjects, has been carried much further in this edition than in the English.

4. The signification of the Hebrew and, to some extent, of the Greek names of persons and places has been given in English, according to the best authorities (Simonis, Gesenius, Dietrich, Fürst, Pape) on this intricate subject. We have such definitions occasionally in the original work, but on no consistent plan. The Scripture names reveal to us a striking peculiarity of the oriental mind, and often throw light on the personal history and the geography of the Bible.

5. The accentuation of proper names has required adjustment. Dr. Smith's "Concise Dictionary of the Bible" differs here widely from the larger work; and in both, forms perfectly analogous are differently accented, in many instances, without apparent reason. In the present edition, this subject has received careful attention; and in respect to that large class of names whose pronunciation cannot be regarded as settled by usage, an attempt has been made to secure greater consistency by the application of fixed principles.

6. The English edition, at the beginning of each article devoted to a proper name, professes to give "the corresponding forms in the Hebrew, Greek, and Vulgate, together with the variations in the two great manuscripts of the Septuagint, which are often curious and worthy of notice." But this plan has been very imperfectly carried out so far as relates to the forms in the Septuagint and Vulgate especially in the first volume. The readings of the Vatican manuscript are very

Digitized by Google

rarely given where they differ from those of the Roman edition of 1587, — a case which frequently occurs, though this edition is, to a great extent, founded on that manuscript; and those of the Alexandrine manuscript are often ignored. The present edition of the Dictionary seeks to supply these defects; and not only have the readings of the Roman text (as given by Tischendorf) been carefully noted, with the variations of the Vatican and Alexandrine manuscripts as edited by Mai and Baber, but also those of the two other leading editions of the Septuagint, the Complutensian and the Aldine, and of the *Codex Sinaiticus*, whenever the forms given in them accord more nearly with the Hebrew, or on other accounts seem worthy of notice. To these last two editions, in the Apocrypha especially, we must often look for the explanation of the peculiar spelling of many proper names in the common English version. Many deviations of the later editions of this version from the first edition (1611), important as affecting the orthography of Hebrew proper names, have also been detected and pointed out.

7. The amount of Scripture illustration derived from a knowledge of Eastern customs and traditions, as made known to us so much more fully at the present day by missionaries and travellers in the lands of the Bible, has been largely increased. More frequent remarks also have been made on difficult texts of Scripture, for the most part in connection with some leading word in them, with which the texts are naturally associated.

8. The obsolete words and phrases in the language of the English Bible, or those which, though not obsolete, have changed their meaning, have been explained, so as to supply, to some extent, the place of a glossary on that subject. Such explanations will be found under the head of such words, or in connection with the subjects to which they relate.

9. On various topics omitted in the English work, but required by Dr. Smith's plan, new articles have been inserted in the American edition, with additions to others which seem not fully to represent our present knowledge or the state of critical opinion on the subjects discussed. The bibliographical references have been greatly increased, and care has been taken to mention the new works of value, or new editions of works in geography, philology, history, and exegesis, in our own or other languages, which have appeared since the original articles were written. Further, all the new wood-cuts in the Abridged English edition, illustrating some of the most important subjects in geography and archæology, but not contained in the Unabridged edition, are inserted in the present work. Many additional views of Scripture scenes and places have been introduced from other more recent publications, or engraved from photographs.

10. Fuller recognition has been made of the names and works of American scholars, both as an act of justice to them as co-workers with those of other lands in this department of study, and still more as due to American readers. It must be useful certainly to our own students to be referred to books within their reach, as well as to those which they are unable to consult, and to books also which more justly represent our own tendencies of thought and modes of statement, than can be true of those prepared for other and foreign communities. References are made not only to books of American writers, but to valuable articles in our Periodicals, which discuss questions of theological and Biblical interest.

In addition to the aid of Mr. Abbot (who has had special charge of the proof-reading, the orthoëpy, and the verification of references to the original texts and ancient versions of the Bible, and has also given particular attention to the bibliography), the editor has had the coöperation of eminent American scholars, as will be seen by the list of names subjoined to that of the writers in the English edition It is proper to add that the Arabic words in the Dictionary have been revised by the Rev. Dr. Van Dyck, one of the translators of the modern Arabic Bible, or by Professor Salisbury, of Yale College.

H. B. HACKETT.

NEWTON CENTRE, *December* 20, 1861.

PREFACE TO THE ENGLISH EDITION.

THE present work is designed to render the same service in the study of the Bible as the Dictionaries of Greek and Roman Antiquities, Biography, and Geography have done in the study of the classical writers of antiquity. Within the last few years Biblical studies have received a fresh impulse; and the researches of modern scholars, as well as the discoveries of modern travellers, have thrown new and unexpected light upon the history and geography of the East. It has, therefore, been thought that a new Dictionary of the Bible, founded on a fresh examination of the original documents, and embodying the results of the most recent researches and discoveries, would prove a valuable addition to the literature of the country. It has been the aim of the Editor and Contributors to present the information in such a form as to meet the wants, not only of theological students, but also of that larger class of persons who, without pursuing theology as a profession, are anxious to study the Bible with the aid of the latest investigations of the best scholars. Accordingly, while the requirements of the learned have always been kept in view, quotations from the ancient languages have been sparingly introduced, and generally in parentheses, so as not to interrupt the continuous perusal of the work. It is confidently believed that the articles will be found both intelligible and interesting even to those who have no knowledge of the learned languages; and that such persons will experience no difficulty in reading the book through from beginning to end.

The scope and object of the work may be briefly defined. It is a Dictionary of the *Bible*, and not of *Theology*. It is intended to elucidate the antiquities, biography, geography, and natural history of the Old Testament, New Testament, and Apocrypha; but not to explain systems of theology, or discuss points of controversial divinity. It has seemed, however, necessary in a "Dictionary of the Bible," to give a full account of the Book, both as a whole and in its separate parts. Accordingly, articles are inserted not only upon the general subject, such as "Bible," "Apocrypha," and "Canon," and upon the chief ancient versions, as "Septuagint" and "Vulgate," but also upon each of the separate books. These articles are naturally some of the most important in the work, and occupy considerable space, as will be seen by referring to "Genesis," "Isaiah," and "Job."

The Editor believes that the work will be found, upon examination, to be far more complete in the subjects which it professes to treat than any of its predecessors. No other dictionary has yet attempted to give a complete list of the proper names occurring in the Old and New Testaments, to say nothing of those in the Apocrypha. The present work is intended to contain *every name*, and, in the case of minor names, references to every passage in the Bible in which each occurs. It is true that many of the names are those of comparatively obscure persons and places; but this is no reason for their omission. On the contrary, it is precisely for such articles that a dictionary is most needed. An account of the more important persons and places occupies a prominent position in historical and geographical works; but of the less conspicuous names no information can be obtained in ordinary books of reference. Accordingly many names, which have been either entirely omitted or cursorily treated in other dictionaries, have had considerable space devoted to them; the result being that much curious and sometimes important knowl-

Digitized by Google

edge has been elicited respecting subjects of which little or nothing was previously known. Instances may be seen by referring to the articles "Ishmael, son of Nethaniah," "Jareb," "Jedidiah," "Jehosheba."

In the alphabetical arrangement the orthography of the Authorized Version has been invariably followed. Indeed the work might be described as a Dictionary of the Bible, *according to the Authorized Version*. But at the commencement of each article devoted to a proper name, the corresponding forms in the Hebrew, Greek, and Vulgate are given, together with the variations in the two great manuscripts of the Septuagint, which are often curious and well worthy of notice. All inaccuracies in the Authorized Version are likewise carefully noted.

In the composition and distribution of the articles three points have been especially kept in view — the insertion of copious references to the ancient writers and to the best modern authorities, as much brevity as was consistent with the proper elucidation of the subjects, and facility of reference. To attain the latter object an explanation is given, even at the risk of some repetition, under every word to which a reader is likely to refer, since it is one of the great drawbacks in the use of a dictionary to be referred constantly from one heading to another, and frequently not to find at last the information that is wanted.

Many names in the Bible occur also in the classical writers, and are therefore included in the Classical Dictionaries already published. But they have in all cases been written anew for this work, and from a Biblical point of view. No one would expect in a Dictionary of the Bible a complete history of Alexandria, or a detailed life of Alexander the Great, simply because they are mentioned in a few passages of the Sacred Writers. Such subjects properly belong to Dictionaries of Classical Geography and Biography, and are only introduced here so far as they throw light upon Jewish history, and the Jewish character and faith. The same remark applies to all similar articles, which, far from being a repetition of those contained in the preceding dictionaries, are supplementary to them, affording the Biblical information which they did not profess to give. In like manner it would obviously be out of place to present such an account of the plants and animals mentioned in the Scriptures, as would be appropriate in systematic treatises on Botany or Zoology. All that can be reasonably required, or indeed is of any real service, is to identify the plants and animals with known species or varieties, to discuss the difficulties which occur in each subject, and to explain all allusions to it by the aid of modern science.

In a work written by various persons, each responsible for his own contributions, differences of opinion must naturally occur. Such differences, however, are both fewer and of less importance than might have been expected from the nature of the subject; and in some difficult questions — such, for instance, as that of the "Brethren of our Lord" — the Editor, instead of endeavoring to obtain uniformity, has considered it an advantage to the reader to have the arguments stated from different points of view.

An attempt has been made to insure, as far as practicable, uniformity of reference to the most important books. In the case of two works of constant occurrence in the geographical articles, it may be convenient to mention that all references to Dr. Robinson's "Biblical Researches" and to Professor Stanley's "Sinai and Palestine," have been uniformly made to the second edition of the former work (London, 1856, 3 vols.), and to the fourth edition of the latter (London, 1857).

The Editor cannot conclude this brief explanation without expressing his obligations to the writers of the various articles. Their names are a sufficient guarantee for the value of their contributions; but the warm interest they have taken in the book, and the unwearied pains they have bestowed upon their separate departments, demand from the Editor his grateful thanks. There is, however, one writer to whom he owes a more special acknowledgment. Mr. George Grove of Sydenham, besides contributing the articles to which his initial is attached, has rendered the Editor important assistance in writing the majority of the articles on the more ob

Digitized by Google

scure names in the first volume, in the correction of the proofs, and in the revision of the whole book. The Editor has also to express his obligations to Mr. William Aldis Wright, Librarian of Trinity College, Cambridge, and to the Rev. Charles P. Phinn of Chichester, for their valuable assistance in the correction of the proofs, as well as to Mr. E. Stanley Poole, for the revision of the Arabic words. Mr. Aldis Wright has likewise written in the second and third volumes the more obscure names to which no initials are attached.

It is intended to publish shortly an Atlas of Biblical Geography, which, it is believed, will form a valuable supplement to the Dictionary.

WILLIAM SMITH

LONDON, *November*, 1863.

*** The new portions in the present edition are indicated by a *star* (*), the editorial additions being distinguished by the initials H. and A. Whatever is enclosed in *brackets* is also, with unimportant exceptions, editorial. This remark, however, does not apply to the *cross-references* in brackets, most of which belong to the original work, though a large number have been added to this edition.

ABBREVIATIONS.

Ald. The Aldine edition of the Septuagint, 1518.

Alex. The Codex Alexandrinus (5th cent.), edited by Baber, 1816–28.

A. V. The authorized (common) English version of the Bible.

Comp. The Septuagint as printed in the Complutensian Polyglott, 1514–17, published 1522.

FA. The Codex Friderico-Augustanus (4th cent.), published by Tischendorf in 1846.

Rom. The Roman edition of the Septuagint, 1587. The readings of the Septuagint for which no authority is specified are also from this source.

Sin. The Codex Sinaiticus (4th cent.), published by Tischendorf in 1862. This and FA. are parts of the same manuscript.

Vat. The Codex Vaticanus 1209 (4th cent.), according to Mai's edition, published by Vercellone in 1857. "Vat. H." denotes readings of the MS. (differing from Mai), given in Holmes and Parsons's edition of the Septuagint, 1798-1827. "Vat.^{1}" distinguishes the primary reading of the MS. from "Vat.^{2} or "2. m.," the alteration of a later reviser.

DICTIONARY

OF

BIBLICAL ANTIQUITIES, BIOGRAPHY, GEOGRAPHY, AND NATURAL HISTORY.

A

A'ALAR. [ADDAN.]

AARON (אַהֲרֹן [perh. = הָרוֹן, *mountaineer*, Ges.; or from אָהַר, *enlightened*, Fürst]:[a] Ἀαρών: *Aaron*), the son of Amram (עַמְרָם, *kindred of the Highest*) and Jochebed (יוֹכֶבֶד, *whose glory is Jehovah*), and the elder brother of Moses and Miriam (Num. xxvi. 59, xxxiii. 39). He was a Levite, and, as the first-born, would naturally be the priest of the household, even before any special appointment by God. Of his early history we know nothing, although, by the way in which he is first mentioned in Ex. iv. 14, as "Aaron the Levite," it would seem as if he had been already to some extent a leader in his tribe. All that is definitely recorded of him at this time is, that, in the same passage, he is described as one "who could speak well." Judging from the acts of his life, we should suppose him to have been, like many eloquent men, a man of impulsive and comparatively unstable character, leaning almost wholly on his brother; incapable of that endurance of loneliness and temptation, which is an element of real greatness; but at the same time earnest in his devotion to God and man, and therefore capable of sacrifice and of discipline by trial.

His first office was to be the "Prophet," *i. e.* (according to the proper meaning of the word), the interpreter and "Mouth" (Ex. iv. 16) of his brother, who was "slow of speech;" and accordingly he was not only the organ of communication with the Israelites and with Pharaoh (Ex. iv. 30, vii. 2), but also the actual instrument of working most of the miracles of the Exodus. (See Ex. vii. 19, &c.) Thus also on the way to Mount Sinai, during the battle with Amalek, Aaron is mentioned with Hur, as staying up the weary hands of Moses, when they were lifted up for the victory of Israel (not in prayer, as is sometimes explained, but) to bear the rod of God (see Ex xvii. 9). Through all this period, he is only mentioned as dependent upon his brother, and deriving all his authority from him. The contrast between them is even more strongly marked on the arrival at Sinai. Moses at once acts as the mediator (Gal. iii. 19) for the people, to come near to God for them, and to speak His words to them. Aaron only approaches with Nadab, and Abihu, and the seventy elders of Israel, by special command, near enough to see God's glory, but not so as to enter His immediate presence. Left then, on Moses' departure, to guide the people, he is tried for a moment on his own responsibility and he fails, not from any direct unbelief on his own part, but from a weak inability to withstand the demand of the people for visible "gods to go before them." Possibly it seemed to him prudent to make an image of Jehovah, in the well-known form of Egyptian idolatry (Apis or Mnevis), rather than to risk the total alienation of the people to false gods; and his weakness was rewarded by seeing a "feast of the Lord" (Ex. xxxii. 5) degraded to the lowest form of heathenish sensuality, and knowing, from Moses' words and deeds, that the covenant with the Lord was utterly broken. There can hardly be a stronger contrast with this weakness, and the self-convicted shame of his excuse, than the burning indignation of Moses, and his stern decisive measures of vengeance; although beneath these there lay an ardent affection, which went almost to the verge of presumption in prayer for the people (Ex. xxxii. 19–34), and gained forgiveness for Aaron himself (Deut. ix. 20).

It is not a little remarkable, that immediately after this great sin, and almost as though it had not occurred, God's fore-ordained purposes were carried out in Aaron's consecration to the new office of the high-priesthood. Probably the fall and the repentance from it may have made him one "who could have compassion on the ignorant, and them who are out of the way, as being himself also compassed with infirmity." The order of God for the consecration is found in Ex. xxix., and the record of its execution in Lev. viii.; and the delegated character of the Aaronic priesthood is clearly seen by the fact, that, in this its inauguration, the priestly office is borne by Moses, as God's truer representative (see Heb. vii.).

The form of consecration resembled other sacrificial ceremonies in containing, first, a sin-offering, the form of cleansing from sin and reconciliation [SIN-OFFERING]; a burnt-offering, the symbol of entire devotion to God of the nature so purified [BURNT-OFFERING]; and a meat-offering, the thankful acknowledgment and sanctifying of God's natural blessings [MEAT-OFFERING]. It had, however, besides these, the solemn assumption of the

[a] * Dietrich suggests (Ges. *Heb. Handwb.* 6te Aufl.) אוֹרֵר, *teacher*, or *fluent*, like אוֹמֵר. H.

sacred robes (the garb of righteousness), the anointing (the symbol of God's grace), and the offering of the ram of consecration, the blood of which was sprinkled on Aaron and his sons, as upon the altar and vessels of the ministry, in order to sanctify them for the service of God. The former ceremonies represented the blessings and duties of the man, the latter the special consecration of the priest.[a]

The solemnity of the office, and its entire dependence for sanctity on the ordinances of God, were vindicated by the death of Nadab and Abihu, for "offering strange fire" on the altar, and apparently (see Lev. x. 9, 10) for doing so in drunken recklessness. Aaron's checking his sorrow, so as at least to refrain from all outward signs of it, would be a severe trial to an impulsive and weak character, and a proof of his being lifted above himself by the office which he held.

From this time the history of Aaron is almost entirely that of the priesthood, and its chief feature is the great rebellion of Korah and the Levites against his sacerdotal dignity, united with that of Dathan and Abiram and the Reubenites against the temporal authority of Moses [KORAH]. The true vindication of the reality of Aaron's priesthood was not so much the death of Korah by the fire of the Lord, as the efficacy of his offering of incense to stay the plague, by which he was seen to be accepted as an intercessor for the people. The blooming of his rod, which followed, was a miraculous sign, visible to all and capable of preservation, of God's choice of him and his house.

The only occasion on which his individual character is seen, is one of presumption, prompted, as before, chiefly by another, and, as before, speedily repented of. The murmuring of Aaron and Miriam against Moses clearly proceeded from their trust, the one in his priesthood, the other in her prophetic inspiration, as equal commissions from God (Num. xii. 2). It seems to have vanished at once before the declaration of Moses' exaltation above all prophecy and priesthood, except that of One who was to come; and, if we may judge from the direction of the punishment, to have originated mainly with Miriam. On all other occasions he is spoken of as acting with Moses in the guidance of the people. Leaning as he seems to have done wholly on him, it is not strange that he should have shared his sin at Meribah, and its punishment [MOSES] (Num. xx. 10-12). As that punishment seems to have purged out from Moses the tendency to self-confidence, which tainted his character, so in Aaron it may have destroyed that idolatry of a stronger mind, into which a weaker one, once conquered, is apt to fall. Aaron's death seems to have followed very speedily. It took place on Mount Hor, after the transference of his robes and office to Eleazar, who alone with Moses was present at his death, and performed his burial (Num. xx. 28). This mount is still called the "Mountain of Aaron." [HOR.]

The wife of Aaron was Elisheba (Ex. vi. 23); and the two sons who survived him, Eleazar and Ithamar. The high priesthood descended to the former, and to his descendants until the time of Eli, who, although of the house of Ithamar, received the high priesthood (see Joseph. *Ant.* v. 11, § 5, viii. 1, § 3), and transmitted it to his children; with them it continued until the accession of Solomon, who took it from Abiathar, and restored it to Zadok (of the house of Eleazar), so fulfilling the prophecy of 1 Sam. ii. 30. A. B.

N. B. In 1 Chr. xxvii. 17, "Aaron" (אַהֲרֹן) is counted as one of the "*tribes of Israel.*"

AA'RONITES, THE (אַהֲרֹן: ὁ Ἀαρών *stirps Aaron, Aaronita*). Descendants of Aaron, and therefore priests, who, to the number of 3700 fighting men, with Jehoiada the father of Benaiah at their head, joined David at Hebron (1 Chr. xii. 27). Later on in the history (1 Chr. xxvii. 17, we find their chief was Zadok, who in the earlier narrative was distinguished as "a young man mighty of valor." They must have been an important family in the reign of David to be reckoned among the tribes of Israel. W. A. W.

AB (אָב, *father*), an element in the composition of many proper names, of which Abba is a Chaldaic form, the syllable affixed giving the emphatic force of the definite article. Applied to God by Jesus Christ (Mark xiv. 36), and by St. Paul (Rom. viii. 15; Gal. iv. 6.) [ABBA.] R. W. B.

AB. [MONTHS.]

AB'ACUC, 2 Esdr. i. 40. [HABAKKUK.]

ABAD'DON, Rev. ix. 11. [APOLLYON.]

ABADI'AS (Ἀβαδίας; [Ald. Βαδίας:] *Abdias*). OBADIAH, the son of Jehiel (1 Esdr. viii. 35). W. A. W.

ABAG'THA (אֲבַגְתָא: [Ζαβολθά; Alex. FA. Ζηβαβαθα; Comp. Ἀβαγαθά:] *Abgatha*), one of the seven eunuchs in the Persian court of Ahasuerus (Esth. i. 10). In the LXX the names of these eunuchs are different. The word contains the same root which we find in the Persian names *Bigtha* (Esth. i. 10), *Bigthan* (Esth. ii. 21), *Bigthana* (Esth. vi. 2), and *Bagoas*. Bohlen explains it from the Sanscrit *bagadâta*, "given by fortune," from *baga*, fortune, the sun.

AB'ANA (אֲבָנָה: [b] Ἀβανά; [Vat. H. (Vat.[2] Mai) Αρβανα; Alex. Ναεβανα; Comp. Ἀμανά:] *Abana*), one of the "rivers (נְהָרוֹת) of Damascus" (2 K. v. 12). The *Barada* (Χρυσορρόας of the Greeks) and the *Awaj* are now the chief streams of Damascus, and there can be little doubt that the former of these represents the Abana and the latter the Pharpar of the text. As far back as the days of Pliny and Strabo the *Barada* was, as it now is, the chief river of the city (Rob. iii. 446), flowing through it, and supplying most of its dwellings with water. The *Awaj* is further from Damascus, and a native of the place, if speaking of the two together, would certainly, with Naaman, name the *Barada* first (Porter, i. 276). To this may be added the fact that in the Arabic version of the passage — the date of which has been fixed by Rödiger as the 11th century — Abana is rendered by *Barda*, בַּרְדָא. Further, it seems to have escaped notice that one branch of the *Awaj* — if Kiepert's map (in Rob. 1856) is to be trusted — now bears the name of *Wady Barbar*. There is however no reference to this in Robinson or Porter.

The *Barada* rises in the Antilibanus near *Zebdâny*, at about 23 miles from the city, and 1149

[a] It is noticeable that the ceremonies of the restoration of the leper to his place, as one of God's people, bear a strong resemblance to those of consecration. Lev. xiv. 10-32.

[b] The Keri, with the Targum Jonathan and the Syriac version, has Amanah. See margin of A. V.

Digitized by Google

feet above it. In its course it passes the site of the ancient Abila, and receives the waters of *Ain-Fijeh*, one of the largest springs in Syria. This was long believed to be the real source of the Barada, according to the popular usage of the country, which regards the most copious fountain, not the most distant head, as the origin of a river. We meet with other instances of the same mistake in the case of the Jordan and the Orontes [AIN]; it is to Dr. Robinson that we are indebted for its discovery in the present case (Rob. iii. 477). After flowing through Damascus the Barada runs across the plain, leaving the remarkable Assyrian ruin *Tell es-Salihiyeh* on its left bank, till it loses itself in the lake or marsh *Bahret el-Kibliyeh*. Mr. Porter calculates that 14 villages and 150,000 souls are dependent on this important river. For the course of the *Barada* see Porter, vol. i. chap. v., Journ. of S. Lit. N. S. viii., Rob. iii. 446, 7. Lightfoot (*Cent. Chor.* iv.) and Gesenius (*Thes.* 116) quote the name קרמיון as applied in the Lexicon *Arûch* to the Amana. G.

* Gesenius (*Thes.* p. 116) supposes Abana to be a commutation for AMANA by an interchange of the labials ב and מ: it may be a dialectic or a provincial difference. See also Keil's *BB. der Könige*, p 368. Amana or Abana means "perennial" (comp. נֶאֱמָן as said of water in Is. xxxiii. 16 and Jer. xv. 18) and is especially appropriate to this ever-flowing stream. The only biblical allusion to the name is that in Naaman's scornful interrogation in 2 Kings v. 12: "Are not Abana and Pharpar, rivers of Damascus, better than all the waters of Israel?" There may be something more than pride of country in this; for the waters of Abana (*Barada*), especially after the confluence of the stream from *Fijeh*, its most copious fountain, are remarkably fresh and sparkling, and at the present day proverbially salubrious, while those of the Jordan are mixed with clay and tepid, though not unfit for drinking (Richter's *Wallfahrten*, p. 157; Rob. *Phys. Geog.* p. 165). H.

AB'ARIM (so Milton accents the word), the "mount," or "mountains of" (always with the def. article, הַר הָעֲבָרִים, or הָהָרֵי, τὸ ὄρος τὸ Ἀβαρείμ, [etc] or ἐν τῷ πέραν τοῦ Ἰορδάνου, = *the mountains of the further parts*, or possibly *of the fords*), a mountain or range of highlands on the east of the Jordan, in the land of Moab (Deut. xxxii. 49), facing Jericho, and forming the eastern wall of the Jordan valley at that part. Its most elevated spot was "the Mount Nebo, 'head' of 'the' Pisgah," from which Moses viewed the Promised Land before his death. There is nothing to prove that the Abarim were a range or tract of any length, unless the Ije-Abarim ("heaps of A.") named in Num. xxxiii. 44, and which were on the south frontier of Moab, are to be taken as belonging to them. But it must be remembered that a word derived from the same root as Abarim, namely, עֵבֶר, is the term commonly applied to the whole of the country on the east of the Jordan.

These mountains are mentioned in Num. xxvii. 12, xxxiii. 47, 48, and Deut. xxxii. 49; also probably in Jer. xxii. 20, where the word is rendered in the A. V. "passages."

In the absence of research on the east of the Jordan and of the Dead Sea, the topography of those regions must remain to a great degree obscure.[a] G.

***ABBA.** The Chaldee or Aramaic appends the article instead of prefixing it as in Hebrew; and hence when Abba (אַבָּא) occurs the exact ὁ πατήρ follows for the sake of Greek readers. See Winer's *Epist. ad Galat.* p. 96. Abba, as the vernacular term (a *vox solennis* from childhood), was of course more expressive than any foreign word could be, and came, as it were, first to the lips as the writer or speaker thought of God in the filial relation, which the word designated with such fullness of meaning. See Usteri's *Com. über d. Brief an die Galat.* p. 148. Tholuck (on Rom. viii. 15) reminds us that Luther preferred to translate πατήρ *lieber Vater* rather than *Vater* merely, as the more natural dictate of his childlike feeling toward God. Some others think that Abba passed over from the Aramæan Christians to the Greek-speaking Christians as a sort of proper name, and had merely that force as combined with ὁ πατήρ. To maintain this view, Meyer has to say (on Gal. iv. 6) that in Mark xiv. 36 the Evangelist puts "Abba" into the mouth of Jesus as he prayed in the garden in anticipation of a usage which began to exist at a later period. H.

AB'DA (עַבְדָּא [*servant*, a Chaldee form]: Ἀὐδών; [Vat. Εφρα; Alex. Αβδω; Comp. Ἀβδά:] *Abda*). 1. Father of Adoniram (1 K. iv. 6.)

2. [Ἰωβήβ; Comp. Ἀβδίας.] Son of Shammua (Neh. xi. 17), called Obadiah in 1 Chr. ix. 16.

AB'DEEL (עַבְדְּאֵל: [*om.* Ald. Rom. Alex. FA.; Comp. Ἀβδεήλ:] *Abdeel*), father of Shelemiah (Jer. xxxvi. 26). [A. V. ed. 1611 reads Abdiel.]

AB'DI (עַבְדִּי [*my servant*]: Ἀβαΐ; [Vat. Αβδει;] Alex. Αβδι: *Abdi*). 1. A Merarite [MERARI], and ancestor of Ethan the singer (1 Chr. vi. 44).

2. (Ἀβδί.) The father of Kish, a Merarite Levite in the reign of Hezekiah (2 Chr. xxix. 12). From a comparison of this passage with 1 Chr. vi. 44 it would appear either that ancestral names were repeated in Levitical families, or that they became themselves the names of families, and not of individuals.

3. (Ἀβδία; FA. Αβδεια.) One of the Bene-Elam [sons of Elam] in the time of Ezra, who had married a foreign wife (Ezr. x. 26). W. A. W.

ABDI'AS (*Abdias*). The prophet OBADIAH (2 Esdr. i. 39). W. A. W.

AB'DIEL (עַבְדִּיאֵל [*servant of God*]: Ἀβδιήλ; [Vat. Αβδεηλ:] *Abdiel*), son of Guni (1 Chr. v. 15).

* The casual notice here is all that is known to us of this Abdiel from the Bible. The celebrity which the name has acquired arises chiefly from Milton's use of it as applied to that only one among the hosts of Satan, of whom he could say:—

"Among the faithless, faithful only he;"

[a] *For a concise statement of the somewhat perplexed relation of Abarim, Nebo, and Pisgah to each other, the reader may consult Dr. Robinson's *Physical Geography of Palestine*, p. 62. Kurtz (*Gesch. des A B.*) has a section (ii. § 88) on the "Gebirge Abarim." See also Raumer's *Palastina*, and Ritter's *Erdkunde* on *Abarim*. Additional information, the result of later discoveries, will be found under *Nebo*. H

and whom (referring to the etymology) he represents as receiving the lofty praise —

"Servant of God, well done; well hast thou fought."

The name corresponds to the Arabic Abdallah. See Wilkinson's *Personal Names in the Bible* (London, 1865), p. 297. H.

AB'DON (עַבְדּוֹן [*servile*]: Ἀβδών; [in Judg., Alex. Λαβδωμ, Λαβδων:] *Abdon*). 1. A judge of Israel (Judg. xii. 13, 15), perhaps the same person as Bedan in 1 Sam. xii. 11.

2. [Vat. Αβαδων.] Son of Shashak (1 Chr. viii. 23).

3. First-born son of Jehiel, son of Gibeon [rather, *father* of Gibeon, *i. e.* the city or people of Gibeon] (1 Chr. viii. 30, ix. 35, 36).

4. [Ἀβδού; Vat. Αβδοδομ; Alex. Αβδων.] Son of Micah, a contemporary of Josiah (2 Chr. xxxiv. 20), called Achbor in 2 Kings xxii. 12.

AB'DON (עַבְדּוֹן [*servile*]: Ἀβδών, Δαββών, Ῥαβώθ), a city in the tribe of Asher, given to the Gershonites (Josh. xxi. 30; 1 Chr. vi. 74). No place of this name appears in the list of the towns of Asher (Josh. xix. 24–31); but instead we find (28) עֶבְרֹן, "Hebron,"[a] which is the same word, with the change frequent in Hebrew of ר for ד. Indeed many MSS. have Abdon in Josh. xix. 28 (Ges. p. 980; Winer, *s. v.*); but, on the other hand, all the ancient versions retain the R, except the Vatican LXX. which has Ελβών (Alex. Αχράν [and so Comp.; 17 MSS. have Εβρων]).

ABED'NEGO (עֲבֵד־נְגוֹ: Αβδεναγώ: *Abdenago*), i. e. *servant of Nego*,[b] perhaps the same as *Nebo*, which was the Chaldæan name of the planet Mercury, worshipped as the scribe and interpreter of the gods (Gesen.). Abednego was the Chaldæan name given to Azariah, one of the three friends of Daniel, miraculously saved from the burning fiery furnace (Dan. iii.). [AZARIAH, No. 24.] R. W. B.

A'BEL (אָבֵל = *meadow*,[c] according to Gesenius, who derives it from a root signifying moisture like that of grass: see, however, in favor of a different meaning [*lamentation*], the arguments of Lengerke, *Kenaan*, i. 358, and Hengstenberg, *Pent.* ii. 319); the name of several places in Palestine: —

1. A'BEL-BETH-MA'ACHAH (אָבֵל בֵּית מַעֲכָה [*house of oppression*: 2 S. Ἀβὲλ καὶ Βεθμαχά or Φερμαχά (Alex. Βηθμαχα): *Abela et Bethmaacha*: 1 K. ἡ Ἀβὲλ οἴκου Μααχά: *Abel domus Maacha*: 2 K. ἡ Ἀβὲλ καὶ ἡ Θαμααχά; Alex. η Καβελ· Βερμααχα: *Abel domus M.*]), a town of some importance (πόλις καὶ μητρόπολις, "a city and a mother in Israel," 2 Sam. xx. 19), in the extreme north of Palestine; named with Dan, Cinneroth, Kedesh; and as such falling an early prey to the invading kings of Syria (1 K. xv. 20) and Assyria (2 K. xv 29). In the parallel passage, 2 Chr. xvi. 4, the name is changed to Abel Maim, אָבֵל מַיִם = *Abel on the waters*. Here Sheba was overtaken and besieged by Joab (2 Sam. xx. 14, 15); and the city was saved by the exercise on the part of one of its inhabitants of that sagacity for which it was proverbial (18). In verses 14 and 18 it is simply Abel, and in 14 Abel is apparently distinguished from Beth-maachah.[d] If the derivation of Gesenius be the correct one, the situation of Abel was probably in the *Ard el-Huleh*, the marshy meadow country which drains into the Sea of Merom, whether at *Abil* (Robinson, iii. 372), or more to the south (Stanley, *S. and P.* p. 390, *note*). Eusebius and Jerome place it between Paneas and Damascus; but this has not been identified.

2. A'BEL-MA'IM (אָבֵל מַיִם: Ἀβελμαΐν *Abelmaim*), 2 Chr. xvi. 4. [ABEL, 1.]

3. A'BEL-MIZRA'IM (Mitzraim), אָבֵל מִצְרַיִם, according to the etymology of the text, *the mourning of Egypt*, πένθος Αἰγύπτου [*Planctus Ægypti*], (this meaning, however, requires a different pointing, אֵבֶל for אָבֵל): the name given by the Canaanites to the floor of Atad, at which Joseph, his brothers, and the Egyptians made their mourning for Jacob (Gen. l. 11). It was beyond (עֵבֶר = on the east of) Jordan, though placed by Jerome at Beth-Hogla (now *Ain-Hajla*), near the river, on its *west* bank.[e] [ATAD.]

4. A'BEL-SHIT'TIM (with the article אָבֵל הַשִּׁטִּים: [Βελσαῶ; Alex. Βελσαττιμ; Comp. Αβελσατίμ: *Abelsatim*]), *the meadow of the acacias*, in the "plains" (עַרְבוֹת = the deserts) of Moab: on the low level of the Jordan valley, as contradistinguished from the cultivated "fields" on the upper level of the table-land. Here — their last resting-place before crossing the Jordan — Israel "pitched from Bethjesimoth unto A. Shittim," Num. xxxiii. 49. The place is most frequently mentioned by its shorter name of Shittim. [SHITTIM.] In the days of Josephus it was still known as Abila, — the town embosomed in palms,[f] (ὅπου νῦν πόλις ἐστὶν Ἀβιλὴ, φοινικόφυτον δ' ἐστὶ τὸ χωρίον, *Ant.* iv. 8, § 1), 60 stadia from the river (v. 1, § 1). The town and the palms have disappeared; but the acacia-groves, denoted by the name Shittim, still remain, "marking with a line of verdure

[a] The *Ain* is here rendered by H. The H in the well-known Hebron represents Ch. Elsewhere (as Gaza, Gomorrah) *Ain* is rendered by G in the Authorized Version.

[b] • A "dragon" was worshipped with Bel at Babylon, and Dietrich (Ges. *Heb. Handwb.* 1863) thinks well of Rödiger's comparison of *Nego* with the Sanskr. *naga*, "serpent." H.

[c] It is in favor of Gesenius' interpretation that the Chaldee Targum always renders Abel by *Mishor*, which in later Hebrew lost its special significance, and was used for a level spot or plain generally.

[d] • It is certain from 2 Sam. xx. 14, that they *were* different, and no doubt the fuller name signified Abel near Beth-Maachah (Hengstenberg, *Pent.* ii. 319; Robinson, iii. 372). See Ges. *Heb. Gr.* § 116, 5 a, for this mode of expressing local proximity. See Thomson's *Land and Book*, i. 327, for a description of Abel. H.

[e] • The Biblical text knows nothing of any connection between Abel-Mizraim and Beth-Hogla. Whether "beyond the Jordan" denotes the east or the west side, depends on the position of the speaker, like our Trans-atlantic, whether used on one side of the water or the other. Against the supposition of Ritto and others, that Joseph's funeral escort, with the body of Jacob, travelled through the Great Desert, by the way of the Dead Sea and Moab, in going to Canaan, instead of the direct course through Philistia, see Thomson's *Land and Book*, ii. 385. H.

[f] It was amongst these palms, according to Josephus, that Deuteronomy was delivered by Moses. See the passage above cited.

Digitized by Google

the upper terraces of the Jordan valley" (Stanley, *S. and P.* p. 298).

5. A'BEL-MEHO'LAH (*Meholah*, אָבֵל מְחוֹלָה, *meadow of the dance:* [Ἀβελμεουλά; Alex. Βασελμεουλα: *Abelmehula*]), named with Beth-shean (Scythopolis) and Jokneam (1 K. iv. 12), and therefore in the northern part of the Jordan valley (Eus. ἐν τῷ αὐλῶνι). The routed Bedouin host fled from Gideon (Judg. vii. 22) to "the border (the 'lip' or 'brink') of Abel-meholah," and to Beth-shittah (the "house of the acacia"), both places being evidently down in the Jordan valley. Here Elisha was found at his plough by Elijah returning up the valley from Horeb (1 K. xix. 16–19). In Jerome's time the name had dwindled to Ἀβελμέα.

6. A'BEL-CERA'MIM (אָבֵל כְּרָמִים: [Ἐβελχαρμίμ; Alex. Αβελ αμπελωνων: *Abel quæ est vineis consita*]), in the A. V. rendered "the plain [*marg.* 'Abel'] of the vineyards," a place eastward of Jordan, beyond Aroer; named as the point to which Jephthah's pursuit of the Bene-Ammon [sons of A.] extended (Judg. xi. 33). A κώμη ἀμπελοφόρος Ἄβελ is mentioned by Eusebius at 6 (Jerome, 7) miles beyond Philadelphia (Rabbah); and another, οἰνοφόρος καλουμένη, more to the north, 12 miles east from Gadara, below the Hieromax. Ruins bearing the name of Abila are still found in the same position (Ritter, *Syria*, 1058). There were at least three places with the name of Aroer on the further side of the Jordan. [AROER.]

7. "The GREAT 'ABEL' [*marg.* 'or stone,'] in the field of Joshua the Bethshemite" (1 Sam. vi. 18). By comparison with 14 and 15, it would seem that ב has been here exchanged for ר, and that for אבל should be read אבן = stone. So the LXX. and the Chaldee Targum. Our translators, by the insertion of "stone of," take a middle course. See, however, Lengerke (358) and Herxheimer (1 Sam. vi. 18), who hold by Abel as being the name subsequently given to the spot in reference to the "mourning" (יְרֹאבֵל) there, ver. 19. In this case compare Gen. l. 11. G.

A'BEL, in Hebr. HEBEL (הֶבֶל: Ἄβελ: *Abel;* i. e. *breath, vapor, transitoriness*, probably so called from the shortness of his life),[a] the second son of Adam, murdered by his brother Cain (Gen. iv. 1–16). Jehovah showed respect for Abel's offering, but not for that of Cain, because, according to the Epistle to the Hebrews (xi. 4), Abel "by faith offered a more excellent sacrifice than Cain." The expression "sin," *i. e.* a sin-offering, "lieth at the door" (Gen. iv. 7), seems to imply that the need of sacrifices of blood to obtain forgiveness was already revealed. On account of Abel's faith, St. Augustine makes Abel the type of the new regenerate man; Cain that of the natural man (*de Civ. Dei*, xv. 1). St. Chrysostom observes that Abel offered the *best* of his flock — Cain that which was most readily procured (*Hom. in Gen.* xviii. 5). Jesus Christ spoke of him as the first martyr (Matt. xxiii. 35); so did the early church subsequently. For Christian traditions see Iren. v. 67; Chrysost. *Hom. in Gen.* xix.; Cedren. *Hist.* 8. For those of the Rabbins and Mohammedans, Eisenmenger, *Entdeckt. Jud.* i. 462, 832; Hottinger, *Hist. Or.* 24: Ersch & Gruber, *Encyklop. s. v.;* and the *Kur-án* V. The place of his murder and his grave are pointed out near Damascus (Pococke, b. ii. 168); and the neighboring peasants tell a curious tradition respecting his burial (Stanley, *S. and P.* p. 413).

The Oriental Gnosticism of the Sabæans made Abel an incarnate Æon, and the Gnostic or Manichæan sect of the Abelitæ in North Africa in the time of Augustine (*de Hæres.* 86, 87), so called themselves from a tradition that Abel, though married, lived in continence. In order to avoid perpetuating original sin, they followed his example, but in order to keep up their sect, each married pair adopted a male and female child, who in their turn vowed to marry under the same conditions.

R. W. B.

A'BEZ (אָבֵץ, in pause אָבֶץ: Ῥεβές; [Ald. Alex. Ἀεμέ; Comp. Ἀεβής:] *Abes*), a town in the possession of Issachar, named between Kishion and Remeth, in Josh. xix. 20, only. Gesenius mentions as a possible derivation of the name, that the Chaldee for tin is אבצה: [but Fürst thinks it may be from אָבֵץ, and hence *height.*] Possibly, however, the word is a corruption of תֵּבֶץ, Thebez [which see], now *Túbâs*, a town situated not far from Engannim and Shunem, (both towns of Issachar), and which otherwise has entirely escaped mention in the list in Joshua.[b] G.

A'BI (אֲבִי [*father* = progenitor]: Ἄβου; [Ald. Ἀβουθά; Comp. Ἀβί]: *Abi*), mother of king Hezekiah (2 K. xviii. 2). The name is written Abijah (אֲבִיָּה) in 2 Chr. xxix. 1. Her father's name was Zechariah, who was, perhaps, the Zechariah mentioned by Isaiah (viii. 2). R. W. B.

ABI'A, ABI'AH, or ABI'JAH (אֲבִיָּה = יְבִיָּהוּ [*whose father is Jehovah*]: Ἀβιά; [in 1 Chr. vii. 8, Rom. Ἀβιούδ, Alex. Αβιου; Comp Ald. Ἀβιά:] *Abia*). 1. Son of Becher, the son of Benjamin (1 Chr. vii. 8).

2. Wife of Hezron (1 Chr. ii. 24).

3. Second son of Samuel, whom, together with his eldest son Joel, he made judges in Beersheba (1 Sam. viii. 2; 1 Chr. vi. 28). The corruptness of their administration was the reason alleged by the Israelites for their demanding a king.

4. Mother of king Hezekiah. [ABI.]

R. W. B.

5. (אֲבִיָּה: Ἀβιά: *Abia*, [*Abias.*]) ABIJAH or ABIJAM, the son of Rehoboam (1 Chr. iii. 10; Matt. i. 7).

6. Descendant of Eleazar, and chief of the eighth of the twenty-four courses of priests (Luke i. 5). He is the same as ABIJAH 4. W. A. W.

For other persons of this name see ABIJAH.

ABI-AL'BON. [ABIEL.]

ABI'ASAPH, otherwise written EBI'ASAPH (אֲבִיאָסָף, Ex. vi. 24, and אֶבְיָסָף, 1 Chr. vi. 8, 22 [(Heb.), 23, 37 (E. V.)], ix. 19: Ἀβιάσαρ, Ἀβιασάφ, Ἀβιασαφ: *Abiasaph;* according to Simonis, "*cujus patrem abstulit Deus,*"

a *Or, it may be from the mother's impression of the brevity and frailty of human life, which she had now begun to understand; and in that case the child must have been so named at his birth. H.

b *Mr. Porter (*Handbook*, ii. 647) puts Abez in his list of Scripture places not yet identified. Knobel and Keil also regard the name as now lost. H.

Digitized by Google

with reference to the death of Korah, as related in Num. xvi.; but according to Fürst and Gesenius, *father of gathering*, i. e. *the gatherer*; compare אָסָף, Asaph, 1 Chr. vi. 39). He was the head of one of the families of the Korhites (a house of the Kohathites), but his precise genealogy is somewhat uncertain. In Ex. vi. 24, he appears at first sight to be represented as one of the sons of Korah, and as the brother of Assir and Elkanah. But in 1 Chr. vi. he appears as the son of Elkanah, the son of Assir, the son of Korah. The natural inference from this would be that in Ex. vi. 24 the expression "the sons of Korah" merely means the families into which the house of the Korhites was subdivided. But if so, the verse in Exodus must be a later insertion than the time of Moses, as in Moses' lifetime the great-grandson of Korah could not have been the head of a family. And it is remarkable that the verse is quite out of its place, and appears improperly to separate ver. 25 and ver. 23, which both relate to the house of Aaron. If, however, this inference is not correct, then the Ebiasaph of 1 Chr. vi. is a different person from the Abiasaph of Ex. vi., namely, his great-nephew. But this does not seem probable. It appears from 1 Chr. ix. 19, that that branch of the descendants of Abiasaph of which Shallum was chief were porters, "keepers of the gates of the tabernacle"; and from ver. 31 that Mattithiah, "the first-born of Shallum the Korahite, had the set office over the things that were made in the pans," apparently in the time of David. From Neh. xii. 25 we learn that Abiasaph's family was not extinct in the days of Nehemiah; for the family of Meshullam (which is the same as Shallum), with Talmon and Akkub, still filled the office of porters, "keeping the ward at the threshold of the gate." Other remarkable descendants of Abiasaph, according to the text of 1 Chr. vi. 33–37, were Samuel the prophet and Elkanah his father (1 Sam. i. 1), and Heman the singer; but Ebiasaph seems to be improperly inserted in ver. 37.[a] The possessions of those Kohathites who were not descended from Aaron, consisting of ten cities, lay in the tribe of Ephraim, the half-tribe of Manasseh, and the tribe of Dan (Josh. xxi. 20–26; 1 Chr. vi. 61). The family of Elkanah the Kohathite resided in Mount Ephraim (1 Sam. i. 1). A. C. H.

ABI'ATHAR (אֲבִיתָר: Ἀβιάθαρ: *Abiathar*; but the version of Santes Pagninus has *Ebiathar*, according to the Hebrew points. In Mark ii. 26, it is Ἀβιάθαρ. According to Simonis, the name means "(cujus) *pater superstes mansit*, mortuâ scil. matre;" but according to Fürst and Gesenius, *father of excellence*, or *abundance*). Abiathar was that one of all the sons of Ahimelech the high-priest who escaped the slaughter inflicted upon his father's house by Saul, at the instigation of Doeg the Edomite (see title to Ps. lii., and the psalm itself), in revenge for his having inquired of the Lord for David, and given him the shew-bread to eat, and the sword of Goliath the Philistine, as is related in 1 Sam. xxii. We are there told that when Doeg slew in Nob on that day fourscore and five persons that did wear a linen ephod, "one of the sons of Ahimelech the son of Ahitub, named Abiathar, escaped and fled after David;" and it is added in xxiii. 6, that when he did so "he came down with an ephod in his hand," and was thus enabled to inquire of the Lord for David (1 Sam. xxiii. 9, xxx. 7; 2 Sam. ii. 1, v. 19, &c.). The fact of David having been the unwilling cause of the death of all Abiathar's kindred, coupled with his gratitude to his father Ahimelech for his kindness to him, made him a firm and steadfast friend to Abiathar all his life. Abiathar on his part was firmly attached to David. He adhered to him in his wanderings while pursued by Saul; he was with him while he reigned in Hebron (2 Sam. ii. 1–3), the city of the house of Aaron (Josh. xxi. 10–13); he carried the ark before him when David brought it up to Jerusalem (1 Chr. xv. 11; 1 K. ii. 26); he continued faithful to him in Absalom's rebellion (2 Sam. xv. 24, 29, 35, 36, xvii. 15–17, xix. 11); and "was afflicted in all wherein David was afflicted." He was also one of David's chief counsellors (1 Chr. xxvii. 34). When, however, Adonijah set himself up for David's successor on the throne in opposition to Solomon, Abiathar, either persuaded by Joab, or in rivalry to Zadok, or under some influence which cannot now be discovered, sided with him, and was one of his chief partisans, while Zadok was on Solomon's side. For this Abiathar was banished to his native village, Anathoth, in the tribe of Benjamin (Josh. xxi. 18), and narrowly escaped with his life, which was spared by Solomon only on the strength of his long and faithful service to David his father. He was no longer permitted to perform the functions or enjoy the prerogatives of the high-priesthood. For we are distinctly told that "Solomon thrust out Abiathar from being priest to the Lord;" and that "Zadok the priest did the king put in the room of Abiathar" (1 K. ii. 27, 35). So that it is difficult to understand the assertion in 1 K. iv. 4, that in Solomon's reign "Zadok and Abiathar were the priests;" and still more difficult in connection with ver. 2, which tells us that "Azariah the son of Zadok" was "the priest:" a declaration confirmed by 1 Chr. vi. 10. It is probable that Abiathar did not long survive David. He is not mentioned again, and he must have been far advanced in years at Solomon's accession to the throne.

There are one or two other difficulties connected with Abiathar, to which a brief reference must be made before we conclude this article. (1.) In 2 Sam. viii. 17, and in the duplicate passage 1 Chr. xviii. 16, and in 1 Chr. xxiv. 3, 6, 31, we have *Ahimelech* substituted for *Abiathar*, and *Ahimelech the son of Abiathar*, instead of *Abiathar the son of Ahimelech*. Whereas in 2 Sam. xx. 25, and in every other passage in the O. T., we are uniformly told that it was Abiathar who was priest with Zadok in David's reign, and that he was the son of Ahimelech, and that Ahimelech was the son of Ahitub. The difficulty is increased by finding Abiathar spoken of as the high-priest in whose time David ate the shew-bread, in Mark ii. 26. (See Alford, *ad loc.*) However, the evidence in favor of David's friend being *Abiathar the son of Ahimelech* preponderates so strongly, and the impossibility of any rational reconciliation is so clear, that one can only suppose, with Procopius of Gaza, that the error was a clerical one originally, and was propagated from one passage to another.[b] The mention of *Abiathar* by our Lord, in Mark ii. 26, might perhaps be accounted for, if Abiathar was the person who

[a] See *The Genealogies of our Lord and Saviour Jesus Christ*, by Lord Arthur Hovey, p. 210, and p. 114, note.

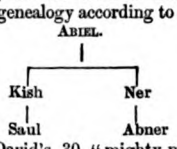
[b] * See addition, *infra* H.

persuaded his father to allow David to have the bread, and if, as is probable, the loaves were Abiathar's (Lev. xxiv. 9), and given by him with his own hand to David. It may also be remarked that our Lord doubtless spoke of Abiathar as הַכֹּהֵן, "the priest," the designation applied to Ahimelech throughout 1 Sam. xxi., and equally applicable to Abiathar. The expression ἀρχιερεύς is the Greek translation of our Lord's words.

(2.) Another difficulty concerning Abiathar is to determine his position relatively to Zadok, and to account for the double high-priesthood, and for the advancement of the line of Ithamar over that of Eleazar. A theory has been invented that Abiathar was David's, and Zadok Saul's high-priest, but it seems to rest on no solid ground. The facts of the case are these: — Ahimelech, the son of Ahitub, the son of Phinehas, the son of Eli, was high-priest in the reign of Saul. On his death his son Abiathar became high-priest. The first mention of Zadok is in 1 Chr. xii. 28, where he is described as "a young man mighty of valor," and is said to have joined David while he reigned in Hebron, in company with Jehoiada, "the leader of the Aaronites." From this time we read, both in the books of Samuel and Chronicles, of "Zadok and Abiathar the priests," Zadok being always named first. And yet we are told that Solomon on his accession put Zadok in the room of Abiathar. Perhaps the true state of the case was, that Abiathar was the first, and Zadok the second priest; but that from the superior strength of the house of Eleazar (of which Zadok was head), which enabled it to furnish 16 out of the 24 courses (1 Chr. xxiv.), Zadok acquired considerable influence with David; and that this, added to his being the heir of the elder line, and perhaps also to some of the passages being written after the line of Zadok were established in the high-priesthood, led to the precedence given him over Abiathar. We have already suggested the possibility of jealousy of Zadok being one of the motives which inclined Abiathar to join Adonijah's faction. It is most remarkable how, first, Saul's cruel slaughter of the priests at Nob, and then the political error of the wise Abiathar, led to the fulfillment of God's denunciation against the house of Eli, as the writer of 1 K. ii. 27 leads us to observe when he says that "Solomon thrust out Abiathar from being priest unto the Lord, that he might fulfill the word of the Lord which He spake concerning the house of Eli in Shiloh." See also Joseph. *Ant.* viii. 1, §§ 3, 4.

A. C. H.

* Some adhere to the text, without resorting to the supposition of a clerical error. It is deemed possible that Ahimelech and Abiathar were hereditary names in the family, and hence, that the father and the son could have borne these names respectively. It would thus be accounted for that Abiathar is called the son of Ahimelech in 1 Sam. xxii. 20, and that Ahimelech is called the son of Abiathar in 2 Sam. viii. 17. The same person consequently could be meant in Mark ii. 26, whether the one name was applied to him or the other; and the reason why the father is mentioned by his name Abiathar, and not that of Ahimelech may be that the former had become, historically, more familiar in consequence of the subsequent friendship between Abiathar, the son, and David. Another explanation is, that Abiathar was for some unknown reason acting as the father's vicar at the time of this transaction with David, and that the citation in Mark follows a tradition of that fact, not transmitted in the O. T. history. We have other instances of a similar recognition of events or opinions not recorded in the O. T., to which the N. T. writers refer as apparently well known among the Jews; such as *e. g.* Abraham's first call in Ur of the Chaldees (Acts vii. 3, compared with Gen. xii. 1); the tomb of the patriarchs at Sychem, (Acts vii. 16); the giving of the law by the agency of angels (Gal. iii. 19, Heb. ii. 2), and others Lange's note on Mark ii. 26 (*Bibelwerk*, ii. 28), deserves to be read. For some very just and thoughtful remarks on the proper mode of dealing with such apparent contradictions of Scripture, see *Commentary on Mark* (p. 53), by Dr. J. A. Alexander. H.



A'BIB. [MONTHS.]

ABI'DAH and ABI'DA[a] (אֲבִידָע [*father of knowledge*, i. e. *wise*]: Ἀβειδά, [Ἀβιδά; Alex Ἀβιρα, Ἀβιδα:] *Abida*), a son of Midian [and grandson of Abraham through his wife or concubine Keturah] (Gen. xxv. 4; 1 Chr. i. 33).

E. S. P.

AB'IDAN (אֲבִידָן [*father of the judge*, Ges.; or *Ab*, i. e. God, *is judge*, Fürst]: Ἀβιδάν, [Alex. twice Ἀβειδαν:] *Abidan*), chief of the tribe of Benjamin at the time of the Exodus (Num. i. 11, ii. 22, vii. 60, 65, x. 24).

A'BIEL [as a Christian name in English commonly pronounced Abi'el] (אֲבִיאֵל [*father of strength*, i. e. *strong*]: Ἀβιήλ: *Abiel*). 1. The father of Kish, and consequently grandfather of Saul (1 Sam. ix. 1), as well as of Abner, Saul's commander-in-chief (1 Sam. xiv. 51). In the genealogy in 1 Chr. viii. 33, ix. 39, Ner is made the father of Kish, and the name of Abiel is omitted, but the correct genealogy according to Samuel is: —

2. One of David's 30 "mighty men" (1 Chr. xi. 32); called in 2 Sam. xxiii. 31, Abi-albon, a name which has the same meaning R. W. B.

ABIE'ZER (אֲבִי עֶזֶר, *father of help*: Ἀβιεζερ, Ἰεζί, [Alex. in Josh., Αχιεζερ: *Abiezer*,] *domus Abiezer*). 1. Eldest son of Gilead, and descendant of Machir and Manasseh, and apparently at one time the leading family of the tribe (Josh. xvii. 2, Num. xxvi. 30, where the name is given in the contracted form of אִיעֶזֶר, *Jeezer*). In the genealogies of Chronicles, Abiezer is, in the present state of the text, said to have sprung from the sister of Gilead (1 Chr. vii. 18). Originally, therefore, the family was with the rest of the house of Gilead on the east of Jordan; but when first met with in the history, some part at least of it had crossed the Jordan and established itself at Ophrah, a place which, though not yet identified, must have been on the hills which overlook from the south the wide plain of Esdraelon, the field of so many of the battles of Palestine (Stanley, pp. 246–7; Judg. vi. 34). Here, when the fortunes of his family

[a] * A. V., ed. 1611, and in other early editions, reads Abida in both passages. A

Digitized by Google

were at the lowest — "my 'thousand' is 'the poor one' in Manasseh" (vi. 15) — was born the great judge Gideon, destined to raise his own house to almost royal dignity (Stanley, p. 229) and to achieve for his country one of the most signal deliverances recorded in their whole history. [GIDEON; OPHRAH.] The name occurs, in addition to the passages above quoted, in Judg. vi. 34, viii. 2.

2. One of David's "mighty men" (2 Sam. xxiii. 27; 1 Chr. xi. 28, xxvii. 12). G.

ABIEZ'RITE (אֲבִי הָעֶזְרִי) [*the father of help*]: πατὴρ τοῦ Ἐσδρί in Judg. vi.; Ἀβὶ Ἐσδρί in Judg. viii.; Alex. πατὴρ Ἀβιεζρι, π. του Ιεζρι, π. Ἀβιεζρει: *pater familiæ Ezri, familia Ezri*). [Joash, the father of Gibeon, is so termed], a descendant of Abiezer, or Jeezer, the son of Gilead (Judg. vi. 11, 24, viii. 32), and thence also called JEEZERITE (Num. xxvi. 30). The Peshito-Syriac and Targum both regard the first part of the word "Abi" as an appellative, "father of," as also the LXX. and Vulgate. W. A. W.

* "Abiezrites" (A. V.) in Judg. vi. 24, and viii. 32, stands for the collective "Abiezrite," which does not occur as plural in the Hebrew. H.

AB'IGAIL [3 syl., *Heb.* Abiga'il], (אֲבִיגַיִל, or אֲבִיגָל [*father of exultation*, or, *whose father rejoices*]: Ἀβιγαία: *Abigail*). 1. The beautiful wife of Nabal, a wealthy owner of goats and sheep in Carmel. When David's messengers were slighted by Nabal, Abigail took the blame upon herself, supplied David and his followers with provisions, and succeeded in appeasing his anger. Ten days after this Nabal died, and David sent for Abigail and made her his wife (1 Sam. xxv. 14, *seq.*). By her he had a son, called Chileab in 2 Sam. iii. 3; but Daniel, in 1 Chr. iii. 1. For Daniel Thenius proposes to read דָּוִד, suggested to him by the LXX. Δαλουΐα (Then. *Exeg. Handb. ad loc.*).

2. A sister of David, married to Jether the *Ishmaelite*, and mother, by him, of Amasa (1 Chr. ii. 17). In 2 Sam. xvii. 25. she is described as the daughter of Nahash, sister to Zeruiah, Joab's mother, and as marrying Ithra (another form of Jether) an *Israelite*.

The statement in Samuel that the mother of Amasa [a] was an *Israelite* is doubtless a transcriber's error. There could be no reason for recording this circumstance; but the circumstance of David's sister marrying a heathen Ishmaelite deserved mention (Thenius, *Exeg. Handb. Sam.* l. c.).

R. W. B.

ABIHA'IL (אֲבִיחַיִל [*father of might*, i. e. *mighty*]: Ἀβιχαιλ: [*Abihail*; in Num.,] *Abihaiel*). 1. Father of Zuriel, chief of the Levitical family of Merari, a contemporary of Moses (Num. iii. 35).

2. Wife of Abishur (1 Chr. ii. 29).

3. [Ἀβιχαία: Ald. Ἀβιχαήλ; Comp. Ἀβιήλ.] Son of Huri, of the tribe of Gad (1 Chr. v. 14).

4. Wife of Rehoboam (2 Chr. xi. 18). She is called the daughter, *i. e.* a descendant, of Eliab, the elder brother of David.

5. [Ἀμιναδάβ; Comp. Ἀβιχαΐλ.] Father of Esther and uncle of Mordecai (Esth. ii. 15, ix. 29).

[a] * "Mother" must be an inadvertence here for 'father of Amasa.' The correction *Ishmaelite* for *Israelite* is suggested in the margin in later editions of the A. V. H.

The names of No. 2 and 4 are written in some MSS. אֲבִיחַיִל (Ἀβιχαία, [Ald. Alex. Ἀβιγαία Comp. Ἀβιήλ,] 1 Chr. ii. 29; Ἀβιγαία, [Alex. Ἀβιαιαλ, Comp. Ἀβιχαΐλ,] 2 Chr. xi. 18), which Gesenius conjectures to be a corruption of אֲבִי חַיִל, but which Simonis derives from a root דוּל, and interprets "father of light, or splendor." R. W. B.

ABI'HU (אֲבִיהוּא [*He* (i. e. God) *is father*]: [b] Ἀβιούδ; [Comp. in Num. iii. and 1 Chr. xxiv. Ἀβιού:] *Abiu*), the second son (Num. iii. 2) of Aaron by Elisheba (Ex. vi. 23), who with his father and his elder brother Nadab and 70 elders of Israel accompanied Moses to the summit of Sinai (Ex. xxiv. 1). Being together with Nadab guilty of offering strange fire (Lev. x. 1) to the Lord, *i. e.* not the holy fire which burnt continually upon the altar of burnt-offering (Lev. vi. 9, 12); they were both consumed by fire from heaven, and Aaron and his surviving sons were forbidden to mourn for them. [Occurs also Ex. xxiv. 9, xxviii. 1; Num. iii. 4, xxvi. 60, 61; 1 Chr. vi. 3, xxiv. 1, 2.] R. W. B.

ABI'HUD (אֲבִיהוּד [*whose father is Judah*; or, *is renown*]: Ἀβιούδ: *Abiud*), son of Bela and grandson of Benjamin (1 Chr. viii. 3).

ABI'JAH or **ABI'JAM**. 1. (אֲבִיָּה, אֲבִיָּם, אֲבִיָּהוּ, *will of Jehovah*: Ἀβιά, Ἀβιού, LXX.; Ἀβίας, Joseph.: *Abiam, Abia*), the son and successor of Rehoboam on the throne of Judah (1 K. xiv. 31; 2 Chr. xii. 16). He is called *Abijah* in Chronicles, *Abijam* in Kings; the latter name being probably an error in the MSS., since the LXX. have nothing corresponding to it, and their form, Ἀβιού, seems taken from *Abijahu*, which occurs 2 Chr. xiii. 20, 21. Indeed Gesenius says that some MSS. read *Abijah* in 1 K. xiv. 31. The supposition, therefore, of Lightfoot (*Harm. O. T.* p. 209, Pitman's edition), that the writer in Kings, who takes a much worse view of Abijah's character than we find in Chronicles, altered the last syllable to avoid introducing the holy JAH into the name of a bad man, is unnecessary. But it is not fanciful or absurd, for changes of the kind were not unusual: for example, after the Samaritan schism, the Jews altered the name of Shechem into Sychar (*drunken*), as we have it in John iv. 5; and Hosea (iv. 15) changes Bethel, *house of God*, into Bethaven, *house of naught*. (See Stanley, *S. & P.* p. 222.)

From the first book of Kings we learn that Abijah endeavored to recover the kingdom of the Ten Tribes, and made war on Jeroboam. No details are given, but we are also informed that he walked in all the sins of Rehoboam (idolatry and its attendant immoralities, 1 K. xiv. 23, 24), and that his heart "was not perfect before God, as the heart of David his father." In the second book of Chronicles his war against Jeroboam is more minutely described, and he makes a speech to the men of Israel, reproaching them for breaking their allegiance to the house of David, for worshipping the

[b] * In such combinations, says Fürst (*Handwb.* i. 319), הוּא, *he himself*, refers to God, as expressive of the utmost reverence, like αὐτός among the Persians and αὐτός, ἐκεῖνος, among the Greeks. H

Digitized by Google

golden calves, and substituting unauthorized priests for the sons of Aaron and the Levites. He was successful in battle against Jeroboam, and took the cities of Bethel, Jeshanah, and Ephrain, with their dependent villages It is also said that his army consisted of 400,000 men, and Jeroboam's of 800,000, of whom 500,000 fell in the action : but Kennicott (*The Hebrew Text of the Old Testament Considered*, p. 532) shows that our MSS. are frequently incorrect as to numbers, and gives reasons for reducing these to 40,000, 80,000, and 50,000, as we actually find in the Vulgate printed at Venice in 1486, and in the old Latin version of Josephus; while there is perhaps some reason to think that the smaller numbers were in his original Greek text also. Nothing is said by the writer in Chronicles of the sins of Abijah, but we are told that after his victory he "waxed mighty, and married fourteen wives," whence we may well infer that he was elated with prosperity, and like his grandfather Solomon, fell, during the last two years of his life, into wickedness, as described in Kings. Both records inform us that he reigned three years. His mother was called either Maachah or Michaiah, which are mere variations of the same name, and in some places (1 K. xv. 2; 2 Chr. xi. 20) she is said to be the daughter of Absalom or Abishalom (again the same name); in one (2 Chr. xiii. 2) of Uriel of Gibeah. But it is so common for the word בַּת, *daughter*, to be used in the sense of *granddaughter* or *descendant*, that we need not hesitate to assume that Uriel married Absalom's daughter, and that thus Maachah was daughter of Uriel and granddaughter of Absalom. Abijah therefore was descended from David, both on his father's and mother's side. According to Ewald's chronology the date of Abijah's accession was B. C. 968; Clinton places it in B. C. 959. The 18th year of Jeroboam coincides with the 1st and 2d of Abijah.

2. The second son of Samuel, called ABIAH in our version (Ἀβιά, LXX.). [ABIA, ABIAH, No. 3.]

3. The son of Jeroboam I. king of Israel, in whom alone, of all the house of Jeroboam, was found "some good thing toward the Lord God of Israel," and who was therefore the only one of his family who was suffered to go down to the grave in peace. He died in his childhood, just after Jeroboam's wife had been sent in disguise to seek help for him in his sickness from the prophet Ahijah, who gave her the above answer. (1 K. xiv.)

4. A descendant of Eleazar, who gave his name to the eighth of the twenty-four *courses* into which the priests were divided by David (1 Chr. xxiv. 10; 2 Chr. viii. 14). To the course of Abijah or Abia, belonged Zacharias the father of John the Baptist (Luke i. 5).

5. A contemporary of Nehemiah (Neh. x. 7).
G. E. L. C.

* 6. A priest who returned with Zerubbabel from Babylon (Neh. xii. 4, 17). A.

ABI'JAM. [ABIJAH, No. 1.]

AB'ILA. [ABILENE.]

ABILE'NE (Ἀβιληνή, Luke iii. 1), a tetrarchy of which Abila was the capital. This Abila must not be confounded with Abila in Peræa, and other Syrian cities of the same name, but was situated on the eastern slope of Antilibanus, in a district fertilized by the river Barada. It is distinctly associated with Lebanon by Josephus (*Ant.* xviii. 6, § 10, xix 5, § 1, xx. 7, § 1; *B. J.* ii. 11, § 5). Its name probably arose from the green luxuriance of its situation, "Abel" perhaps denoting "a grassy meadow." [See p. 4, a.] The name thus derived is quite sufficient to account for the traditions of the death of Abel, which are associated with the spot, and which are localized by the tomb called *Nebi Habil*, on a height above the ruins of the city. The position of the city is very clearly designated by the Itineraries as 18 miles from Damascus, and 38 (or 32) miles from Heliopolis or Baalbec (*Itin. Ant.* and *Tab. Peut.*).

It is impossible to fix the limits of the Abilene which is mentioned by St. Luke as the tetrarchy of Lysanias. [LYSANIAS.] Like other districts of the East, it doubtless underwent many changes both of masters and of extent, before it was finally absorbed in the province of Syria. Josephus associates this neighborhood with the name of Lysanias both before and after the time referred to by the evangelist. For the later notices see the passages just cited. We there find "Abila of Lysanias," and "the tetrarchy of Lysanias," distinctly mentioned in the reigns of Claudius and Caligula. We find also the phrase Ἄβιλα Λυσανίου in Ptolemy (v. 15, § 22). The natural conclusion appears to be that this was the Lysanias of St. Luke. It is true that a chieftain bearing the same name is mentioned by Josephus in the time of Antony and Cleopatra, as ruling in the same neighborhood (*Ant.* xiv. 3, § 3, xv. 4, § 1; *B. J.* 1, 13, § 1; also Dion Cass. xlix. 32): and from the close connection of this man's father with Lebanon and Damascus (*Ant.* xiii. 16, § 3, xiv. 7, § 4; *B. J.* i. 9, § 2) it is probable that Abilene was part of his territory, and that the Lysanias of St. Luke was the son or grandson of the former. Even if we assume (as many writers too readily assume) that the tetrarch mentioned in the time of Claudius and Caligula is to be identified, not with the Lysanias of St. Luke but with the earlier Lysanias (never called tetrarch and never positively connected with Abila) in the times of Antony and Cleopatra, there is no difficulty in believing that a prince bearing this name ruled over a tetrarchy having Abila for its capital, in the 15th year of Tiberius. (See Wieseler, *Chronologische Synopse der vier Evangelien*, pp. 174–183.)

The site of the chief city of Abilene has been undoubtedly identified where the Itineraries place it; and its remains have been described of late years by many travellers. It stood in a remarkable gorge called the *Sûk Wady Barada*, where the river breaks down through the mountain towards the plain of Damascus. Among the remains the inscriptions are most to our purpose. One containing the words Λυσανίου Τετράρχου is cited by Pococke, but has not been seen by any subsequent traveller. Two Latin inscriptions on the face of a rock above a fragment of Roman road (first noticed in the *Quarterly Review* for 1822, No. 52) were first published by Letronne (*Journal des Savans*, 1827), and afterwards by Orelli (*Inscr. Lat.* 4997, 4998). One relates to some repairs of the road at the expense of the *Abileni*; the other associates the 16th Legion with the place. (See Hogg in the *Trans. of the Royal Geog. Soc.* for 1851; Porter, in the *Journal of Sacred Literature* for July, 1853, and especially his *Damascus*, i. 261–273; and Robinson, *Later Bib. Res.* p. 478–484.)

ABIM'AEL (אֲבִימָאֵל [*father of Mael*]: Αβιμαέλ; [Alex. Αβιμεηλ:] *Abimael*), a descendant of Joktan (Gen. x. 28; 1 Chr. i. 22), and probably [as the name implies] the progenitor of an Arab tribe. Bochart (*Phaleg*, ii. 24) conjectures that his name is preserved in that of Μδλι, a place in Arabia Aromatifera, mentioned by Theophrastus (*Hist. Plant.* ix. 4), and thinks that the Malitæ are the same as Ptolemy's Manitæ (vi. 7, p. 154), and that they were a people of the Minæans (for whom see ARABIA). The name in Arabic would probably be written أَبُو مَائِل. E. S. P.

ABIM'ELECH [*Hebrew* Abime'lech] (אֲבִימֶלֶךְ, *father of the king*, or *father-king*: Αβιμέλεχ: *Abimelech*), the name of several Philistine kings. It is supposed by many to have been a common title of their kings, like that of Pharaoh among the Egyptians, and that of Cæsar and Augustus among the Romans. The name Father of the King, or Father King, corresponds to *Padishah* (Father King), the title of the Persian kings, and Atâlih (Father, pr. paternity), the title of the Khans of Bucharia (Gesen. *Thes.*). An argument to the same effect is drawn from the title of Ps. xxxiv., in which the name of Abimelech is given to the king, who is called Achish in 1 Sam. xxi. 11; but perhaps we ought not to attribute much historical value to the inscription of the Psalm.

1. A Philistine, king of Gerar (Gen. xx., xxi.), who, exercising the right claimed by Eastern princes, of collecting all the beautiful women of their dominions into their harem (Gen. xii. 15; Esth. ii. 3), sent for and took Sarah. A similar account is given of Abraham's conduct on this occasion, to that of his behavior towards Pharaoh [ABRAHAM].

2. Another king of Gerar in the time of Isaac, of whom a similar narrative is recorded in relation to Rebekah (Gen. xxvi. 1, *seq.*).

3. Son of the judge Gideon by his Shechemite concubine (Judg. viii. 31). After his father's death he murdered all his brethren, 70 in number, with the exception of Jotham, the youngest, who concealed himself; and he then persuaded the Shechemites, through the influence of his mother's brethren, to elect him king. It is evident from this narrative that Shechem now became an independent state, and threw off the yoke of the conquering Israelites (Ewald, *Gesch.* ii. 444). When Jotham heard that Abimelech was made king, he addressed to the Shechemites his fable of the trees choosing a king (Judg. ix. 1, *seq.*; cf. Joseph. *Ant.* v. 7, § 2), which may be compared with the well-known fable of Menenius Agrippa (Liv. ii. 32). After he had reigned three years, the citizens of Shechem rebelled. He was absent at the time, but he returned and quelled the insurrection. Shortly after he stormed and took Thebez, but was struck on the head by a woman with the fragment of a mill-stone[a] (comp. 2 Sam. xi. 21); and lest he should be said to have died by a woman, he bid his armor-bearer slay him. Thus God avenged the murder of his brethren, and fulfilled the curse of Jotham.

4. [Αχιμέλεχ; FA. Αχειμελεχ; Ald. Αβιμέλεχ: *Achimelech.*] Son of Abiathar the high-priest in the time of David (1 Chr. xviii. 16) called Ahimelech in 2 Sam. viii. 17. [AHIMELECH.] R. W. B.

* The reading Ahimelech in 1 Chr. is supported by about 12 MSS., and by the principal ancient versions, including the Syriac and Chaldee as well as the Sept. and Vulgate. See De Rossi, *Var. Lect.* iv. 182. A.

* 5. Ps. xxxiv. title. [AHIMELECH 2.] A.

ABIN'ADAB (אֲבִינָדָב [*a father noble* or *princely*]: Αμιναδάβ; [Comp. often Αβιναδάβ:] *Abinadab*). 1. A Levite, a native of Kirjathjearim, in whose house the ark remained 20 years (1 Sam. vii. 1, 2; [2 Sam. vi. 3, 4;] 1 Chr. xiii. 7).

2. Second son of Jesse, who followed Saul to his war against the Philistines (1 Sam. xvi. 8, xvii. 13; [1 Chr. ii. 13]).

3. A son of Saul, who was slain with his brothers at the fatal battle on Mount Gilboa (1 Sam. xxxi. 2; [1 Chr. viii. 33, ix. 39, x. 2]).

4. Father of one of the 12 chief officers of Solomon (1 K. iv. 11). R. W. B.

ABI'NER (אַבְנֵר: Αβενηρ; Alex. Αβαυηρ [rather, Αβενηρ]: *Abner*). This form of the name ABNER is given in the margin of 1 Sam. xiv. 50. It corresponds with the Hebrew. W. A. W.

ABIN'OAM [*Heb.* Abino'am] (אֲבִינֹעַם [*a father gracious*]: Αβινεέμ; [Ald. Comp. sometimes Αβινοέμ:] *Abinoem*), the father of Barak (Judg. iv. 6, 12; v. 1, 12). R. W. B.

ABI'RAM (אֲבִירָם [*father exalted*]: Αβειρών: *Abiron*). 1. A Reubenite, son of Eliab, who with Dathan and On, men of the same tribe, and Korah a Levite, organized a conspiracy against Moses and Aaron (Num. xvi.). [For details, see KORAH.]

2. [Αβιρών; Alex. Αβειρων: *Abiram.*] Eldest son of Hiel, the Bethelite, who died when his father laid the foundations of Jericho (1 K. xvi. 34), and thus accomplished the first part of the curse of Joshua (Josh. vi 26). R. W. B.

ABI'RON (Αβειρών: *Abiron*). ABIRAM (Ecclus. xlv. 18). W. A. W.

ABISE'I (*Abisei*). ABISHUA, the son of Phinehas (2 Esdr. i. 2). W. A. W.

a * The expression used in relation to this in A. V. (ed. 1611), as in the Bishops' Bible, is "*all to brake* his scull," i. e. "broke completely," or "all to pieces." In many later editions "brake" has been changed to "break," giving the false meaning "and all this in order to break." "All to" has been explained and written by some as a compound adverb, "all-to" = "altogether" (see Robinson in *Bibl. Sacra*, vi. 606), but this view is now regarded by the best scholars as erroneous. In early English, as in Anglo-Saxon, *to* was in common use as an intensive prefix to verbs and verbal nouns, somewhat like *be* in modern English, but stronger. Thus,

"He *to-brac* the ston, and ther flowiden watris."
Wycliffe, *Ps.* civ. 41.

"Mote thi wicked necke be *to broke!*"
Chaucer, *Cant. Tales*, 5859.

We have it in Shakespeare's "*to-pinch* the unclean knight" (*Merry Wives*, iv. 4), and perhaps the latest example in Milton's "all *to-ruffled*" (*Comus*, 880). "All" is often used to strengthen the expression, but is not essential. See Boucher's *Glossary*, art ALL and Taylor's note; the Glossary to Forshall and Madden's ed. of Wycliffe's Bible; Eastwood and Wright's *Bible Word-Book*, pp. 21, 22; and especially Corson's *Thesaurus of Archaic English*, art. ABI'SHAG (אֲבִישַׁג [*father* i. e. author *of error, misdeed*, and hence said of man or woman; [a]] 'Αβισάγ: *Abisag*), a beautiful Shunammite, taken into David's harem to comfort him in his extreme old age (1 K. i. 1–4). After David's death Adonijah induced Bathsheba, the queen-mother, to ask Solomon to give him Abishag in marriage; but this imprudent petition cost Adonijah his life (1 K. ii. 13, *seq.*). [ADONIJAH.]

R. W. B.

ABI'SHAI [b] [3 syl.] (אֲבִישַׁי [and אֲבִשַׁי, *father of a gift*, Ges.; or *Father*, i. e. God, *who exists*, Fürst]: 'Αβεσσά [also 'Αβεσά, 'Αβισά, etc.] and 'Αβισαί: *Abisai*), the eldest of the three sons of Zeruiah, David's sister, and brother to Joab and Asahel (1 Chr. ii. 16). It may be owing to his seniority of birth that Abishai, first of the three brothers, appears as the devoted follower of David. Long before Joab appears on the stage Abishai had attached himself to the fortunes of David. He was his companion in the desperate night expedition to the camp of Saul, and would at once have avenged and terminated his uncle's quarrel by stabbing the sleeping king with his own spear. But David indignantly restrained him, and the adventurous warriors left the camp as stealthily as they had come, carrying with them Saul's spear and the cruse of water which stood at his head (1 Sam. xxvi. 6–9). During David's outlaw life among the Philistines, Abishai was probably by his side, though nothing more is heard of him till he appears with Joab and Asahel in hot pursuit of Abner, who was beaten in the bloody fight by the pool of Gibeon. Asahel fell by Abner's hand: at sunset the survivors returned, buried their brother by night in the sepulchre of their father at Bethlehem, and with revenge in their hearts marched on to Hebron by break of day (2 Sam. ii. 18, 24, 32). In the prosecution of their vengeance, though Joab's hand struck the deadly blow, Abishai was associated with him in the treachery, and "Joab and Abishai killed Abner" (2 Sam. iii. 30). [ABNER.] In the war against Hanun, undertaken by David as a punishment for the insult to his messengers, Abishai, as second in command, was opposed to the army of the Ammonites before the gates of Rabbah, and drove them headlong before him into the city, while Joab defeated the Syrians who attempted to raise the siege (2 Sam. x. 10, 14; 1 Chr. xix. 11, 15). The defeat of the Edomites in the valley of salt (1 Chr. xviii. 12), which brought them to a state of vassalage, was due to Abishai, acting perhaps under the immediate orders of the king (see 2 Sam. viii. 13), or of Joab (Ps. lx. title). On the outbreak of Absalom's rebellion and the consequent flight of David, Abishai remained true to the king; and the old warrior showed a gleam of his ancient spirit, as fierce and relentless as in the camp of Saul, when he offered to avenge the taunts of Shimei, and urged his subsequent execution (2 Sam. xvi. 9; xix. 21). — In the battle in the wood of Ephraim Abishai commanded a third part of the army (2 Sam. xviii. 2, 5, 12), and in the absence of Amasa was summoned to assemble the troops in Jerusalem and pursue after the rebel Sheba, Joab being apparently in disgrace for the slaughter of Absalom (2 Sam. xx. 6, 10). — The last act of service which is recorded of Abishai is his timely rescue of David from the hands of a gigantic Philistine, Ishbi-benob (2 Sam. xxi. 17). His personal prowess on this, as on another occasion, when he fought single-handed against three hundred, won for him a place as captain of the second three of David's mighty men (2 Sam. xxiii. 18; 1 Chr. xi. 20). But in all probability this act of daring was achieved while he was the companion of David's wanderings as an outlaw among the Philistines. Of the end of his chequered life we have no record.

ABISH'ALOM (אֲבִישָׁלוֹם [*father of peace*]: 'Αβεσσαλώμ: *Abessalom*), father of Maachah, who was the wife of Rehoboam, and mother of Abijah (1 K. xv. 2, 10). He is called Absalom (אבישלום) in 2 Chr. xi. 20, 21. This person must be David's son (see LXX., 2 Sam. xiv. 27). The daughter of Absalom was doubtless called Maachah after her grandmother (2 Sam. iii. 3).

ABISHU'A (אֲבִישׁוּעַ: ['Αβεσσουέ, 'Αβισουέ,] 'Αβισού: *Abisue*. According to Simonis, *patris salus*; i. q. Σωσίπατρος, and Σώπατρος. According to Fürst, *father* or *lord of happiness*. *Pater salutis*, Gesen.). 1. Son of Bela, of the tribe of Benjamin (1 Chr. viii. 4).

2. Son of Phinehas, the son of Eleazar, and the father of Bukki, in the genealogy of the high priests (1 Chr. vi. 4, 5, 50, 51; Ezr. vii. 4, 5). According to Josephus (*Ant.* viii. 1, § 3) he executed the office of high-priest after his father Phinehas, and was succeeded by Eli; his descendants, till Zadok, falling into the rank of private persons (ἰδιωτεύσαντες). His name is corrupted into 'Ιώσηπος. Nothing is known of him.

A. C. H.

AB'ISHUR (אֲבִישׁוּר [*father of the wall* or *upright*] 'Αβισούρ: *Abisur*), son of Shammai (1 Chr. ii. 28).

AB'ISUM ('Αβισαί; Alex. Αβισουαι; [Ald. 'Αβισούμ]: *Abisue*). ABISHUA, the son of Phinehas (1 Esdr. viii. 2). Called also ABISEI.

W. A. W.

AB'ITAL (אֲבִיטַל [*whose father is dew* or *protection*]: 'Αβιτάλ; *Abital*), one of David's wives (2 Sam. iii. 4; 1 Chr. iii. 3).

ABI'TUB (אֲבִיטוּב [*father of goodness*]: 'Αβιτώλ; [Alex. Αβιτωβ]: *Abitub*), son of Shaharaim by Hushim (1 Chr. viii. 11).

ABI'UD ('Αβιούδ: *Abiud*). Descendant of Zorobabel, in the genealogy of Jesus Christ (Matt. i. 13). Lord A. Hervey identifies him with HODAIAH (1 Chr. iii. 24) and JUDA (Luke iii. 26), and supposes him to have been the grandson of Zerubbabel through his daughter Shelomith.

W. A. W.

ABLUTION. [PURIFICATION.]

AB'NER (אַבְנֵר, once אֲבִינֵר, *father of light*. Αβεννήρ; [Alex. often Αβεννηρ or Αβαννηρ]. *Abner*). 1. Son of Ner, who was the brother of Kish (1 Chr. ix. 36) the father of Saul. Abner therefore, was Saul's first cousin, and was made by him commander-in-chief of his army (1 Sam. xiv. 51). He was the person who conducted David into Saul's presence after the death of Goliath (xvii. 57), and afterwards accompanied his master when he

sought David's life at Hachilah (xxvi. 3–14). From this time we hear no more of him till after the death of Saul, when he rises into importance as the main-stay of his family. It would seem that, immediately after the disastrous battle of Mount Gilboa, David was proclaimed king of Judah in Hebron, the old capital of that tribe, but that the rest of the country was altogether in the hands of the Philistines, and that five years passed before any native prince ventured to oppose his claims to their power. During that time the Israelites were gradually recovering their territory, and at length Abner proclaimed the weak and unfortunate Ishbosheth, Saul's son, as king of Israel in Mahanaim, beyond Jordan — at first no doubt as a place of security against the Philistines, though all serious apprehension of danger from them must have soon passed away — and Ishbosheth was generally recognized except by Judah. This view of the order of events is necessary to reconcile 2 Sam. ii. 10, where Ishbosheth is said to have reigned over Israel for two years, with ver. 11, in which we read that David was king of Judah for seven; and it is confirmed by vers. 5, 6, 7, in which David's message of thanks to the men of Jabesh-gilead for burying Saul and his sons implies that no prince of Saul's house had as yet claimed the throne, but that David hoped that his title would be soon acknowledged by all Israel; while the exhortation "to be valiant" probably refers to the struggle with the Philistines, who placed the only apparent impediment in the way of his recognition. War soon broke out between the two rival kings, and a "very sore battle" was fought at Gibeon between the men of Israel under Abner, and the men of Judah under Joab, son of Zeruiah, David's sister (1 Chr. ii. 16). When the army of Ishbosheth was defeated, Joab's youngest brother Asahel, who is said to have been "as light of foot as a wild roe," pursued Abner, and in spite of warning refused to leave him, so that Abner in self-defence was forced to kill him. After this the war continued, success inclining more and more to the side of David, till at last the imprudence of Ishbosheth deprived him of the counsels and generalship of the hero, who was in truth the only support of his tottering throne. Abner had married Rizpah, Saul's concubine, and this, according to the views of Oriental courts, might be so interpreted as to imply a design upon the throne. Thus we read of a certain Armais, who, while left viceroy of Egypt in the absence of the king his brother, "used violence to the queen and concubines, and put on the diadem, and set up to oppose his brother" (Manetho, quoted by Joseph. *c. Apion.* i. 15). Cf. also 2 Sam. xvi. 21, xx. 3, 1 K. ii. 13–25, and the case of the Pseudo-Smerdis, Herod. iii. 68. [ABSALOM; ADONIJAH.] Rightly or wrongly, Ishbosheth so understood it, though Abner might seem to have given sufficient proof of his loyalty, and to even ventured to reproach him with it. Abner, incensed at his ingratitude, after an indignant reply, opened negotiations with David, by whom he was most favorably received at Hebron. He then undertook to procure his recognition throughout Israel; but after leaving his court for the purpose was enticed back by Joab, and treacherously murdered by him and his brother Abishai, at the gate of the city, partly no doubt, as Joab showed afterwards in the case of AMASA, from fear lest so distinguished a convert to their cause should gain too high a place in David's favor (Joseph. *Ant.* vii. 1, § 5), but ostensibly in retaliation for the death of Asahel. For this there was indeed some pretext, inasmuch as it was thought dishonorable even in battle to kill a mere stripling like Asahel, and Joab and Abishai were in this case the *revengers of blood* (Num. xxxv. 19), but it is also plain that Abner only killed the youth to save his own life. This murder caused the greatest sorrow and indignation to David; but as the assassins were too powerful to be punished, he contented himself with showing every public token of respect to Abner's memory, by following the bier and pouring forth a simple dirge over the slain, which is thus translated by Ewald (*Dichter des Alten Bundes*, i. 99:—

> As a villain dies, ought Abner to die?
> Thy hands, not fettered;
> Thy feet, not bound with chains;
> As one falls before the malicious, fellest thou!

— *i. e.* "Thou didst not fall as a prisoner taken in battle, with hands and feet fettered, but by secret assassination, such as a villain meets at the hands of villains" (2 Sam. iii. 33, 34). See also Lowth, *Lectures on Hebrew Poetry*, xxii. G. E. L. C.

2. Father of Jaasiel, chief of the Benjamites in David's reign (1 Chr. xxvii. 21): probably the same as ABNER 1. W. A. W.

ABOMINATION OF DESOLATION (τὸ βδέλυγμα τῆς ἐρημώσεως, Matt. xxiv. 15), mentioned by our Saviour as a sign of the approaching destruction of Jerusalem, with reference to Dan. ix. 27, xi. 31, xii. 11. The Hebrew words in these passages are respectively, שִׁקּוּצִים, שִׁקּוּץ מְשֹׁמֵם, הַשִּׁקּוּץ מְשֹׁמֵם, and שִׁקֻּוץ שֹׁמֵם. the LXX. translate the first word uniformly βδέλυγμα, and the second ἐρημώσεων (ix. 27) and ἐρημώσεως (xi. 31, xii. 11): many MSS. however have ἠφανισμένον in xi. 31. The meaning of the first of these words is clear: שִׁקּוּץ expresses any religious *impurity*, and in the plural number especially *idols*. Suidas defines βδέλυγμα as used by the Jews πᾶν εἴδωλον καὶ πᾶν ἐκτύπωμα ἀνθρώπου. It is important to observe that the expression is not used of idolatry in the abstract, but of idolatry adopted by the Jews themselves (2 K xxi. 2–7, xxiii. 13). Hence we must look for the fulfillment of the prophecy in some act of apostasy on *their* part; and so the Jews themselves appear to have understood it, according to the traditional feeling referred to by Josephus (*B. J.* iv. 6, § 3), that the temple would be destroyed ἐὰν χεῖρες οἰκεῖαι προμιάνωσι τὸ τέμενος. With regard to the second word שֹׁמֵם, which has been variously translated *of desolation*, *of the desolator*, *that astonisheth* (Marginal transl. xi. 31, xii. 11), it is a participle used substantively and placed in immediate apposition with the previous noun, qualifying it with an adjective sense *astonishing*, *horrible* (Gesen. *s. v.* שָׁמֵם), and thus the whole expression signifies a *horrible abomination*. What the object referred to was, is a matter of doubt; it should be observed, however, that in the passages in Daniel the setting up of the abomination was to be consequent upon the cessation of the sacrifice. The Jews considered the prophecy as fulfilled in the profanation of the Temple under Antiochus Epiphanes, when the Israelites themselves erected an idolatrous altar (βωμός, Joseph. *Ant.* xii. 5, § 4 upon the sacred altar, and offered sacrifice thereon this altar is described as βδέλυγμα τῆς ἐρημώσεως

Digitized by Google

(1 Macc. i. 54, vi. 7). The prophecy, however, referred ultimately (as Josephus himself perceived, *Ant.* x. 11, § 7) to the destruction of Jerusalem by the Romans, and consequently the βδέλυγμα must describe some occurrence connected with that event. But it is not easy to find one which meets all the requirements of the case: the introduction of the Roman standards into the Temple would not be a βδέλυγμα, properly speaking, unless it could be shown that the Jews themselves participated in the worship of them; moreover, this event, as well as several others which have been proposed, such as the erection of the statue of Hadrian, fail in regard to the time of their occurrence, being *subsequent to* the destruction of the city. It appears most probable that the profanities of the Zealots constituted the abomination which was the sign of impending ruin.[a] (Joseph. *B. J.* iv. 3, § 7.) W. L. B.

A'BRAHAM (אַבְרָהָם, *father of a multitude*: Ἀβραάμ: *Abraham*: originally **ABRAM**, אַבְרָם, *father of elevation*: Ἄβραμ: *Abram*), the son of Terah, and brother of Nahor and Haran; and the progenitor, not only of the Hebrew nation, but of several cognate tribes. His history is recorded to us with much detail in Scripture, as the very type of a true patriarchal life; a life, that is, in which all authority is paternal, derived ultimately from God the Father of all, and religion, imperfect as yet in revelation and ritual, is based entirely on that same Fatherly relation of God to man. The natural tendency of such a religion is to the worship of tutelary gods of the family or of the tribe; traces of such a tendency on the part of the patriarchs are found in the Scriptural History itself; and the declaration of God to Moses (in Ex. vi. 3) plainly teaches that the full sense of the unity and eternity of Jehovah was not yet unfolded to them. But yet the revelation of the Lord, as the "Almighty God" (Gen. xvii. 1, xxviii. 3, xxxv. 11), and "the Judge of all the earth" (Gen. xviii. 25), the knowledge of His intercourse with kings of other tribes (Gen. xx. 3–7), and His judgment on Sodom and Gomorrah (to say nothing of the promise which extended to "all nations") must have raised the patriarchal religion far above this narrow idea of God, and given it the germs, at least, of future exaltation. The character of Abraham is that which is formed by such a religion, and by the influence of a nomad pastoral life; free, simple, and manly; full of hospitality and family affection; truthful to all such as were bound to him by their ties, though not untainted with Eastern craft to those considered as aliens; ready for war, but not a professed warrior, or one who lived by plunder; free and childlike in religion, and gradually educated by God's hand to a continually deepening sense of its all-absorbing claims. It stands remarkably contrasted with those of Isaac and Jacob.

The Scriptural history of Abraham is mainly limited, as usual, to the evolution of the Great Covenant in his life; it is the history of the man himself rather than of the external events of his life; and, except in one or two instances (Gen. xii. 10–20, xiv., xx., xxi. 22–34) it does not refer to his relation with the rest of the world. To them he may only have appeared as a chief of the hardier Chaldæan race, disdaining the settled life of the more luxurious Canaanites, and fit to be hired by plunder as a protector against the invaders of the North (see Gen. xiv. 21–23). Nor is it unlikely, though we have no historical evidence of it, that his passage into Canaan may have been a sign or a cause of a greater migration from Haran, and that he may have been looked upon (*e. g.* by Abimelech, Gen. xxi. 22–32) as one who, from his position as well as his high character, would be able to guide such a migration for evil or for good (Ewald, *Gesch.* i. 409–413).

The traditions which Josephus adds to the Scriptural narrative, are merely such as, after his manner and in accordance with the aim of his writings, exalt the knowledge and wisdom of Abraham, making him the teacher of monotheism to the Chaldæans, and of astronomy and mathematics to the Egyptians. He quotes however Nicolaus of Damascus,[b] as ascribing to him the conquest and government of Damascus on his way to Canaan, and stating that the tradition of his habitation was still preserved there (Joseph. *Ant.* i. c. 7. § 2; see Gen. xv. 2).

The Arab traditions are partly ante-Mohammedan, relating mainly to the Kaabah (or sacred house) of Mecca, which Abraham and his son "Ismail" are said to have rebuilt for the fourth time over the sacred black stone. But in great measure they are taken from the Koran, which has itself borrowed from the O. T. and from the Rabbinical traditions. Of the latter the most remarkable is the story of his having destroyed the idols (see Jud. v. 6–8) which Terah not only worshipped (as declared in Josh. xxiv. 2), but also manufactured, and having been cast by Nimrod into a fiery furnace, which turned into a pleasant meadow. The legend is generally traced to the word *Ur* (אוּר), Abraham's birth-place, which has also the sense of "light" or "fire." But the name of Abraham appears to be commonly remembered in tradition through a very large portion of Asia, and the title "el-Khalil," "the Friend" (of God) (see 2 Chr. xx. 7; Is. xli. 8; Jam. ii. 23) is that by which he is usually spoken of by the Arabs.

The Scriptural history of Abraham is divided into various periods, by the various and progressive revelations of God, which he received —

(1.) With his father Terah, his wife Sarai, and nephew Lot, Abram left Ur for Haran (Charran), in obedience to a call of God (alluded to in Acts vii. 2–4). Haran, apparently the eldest brother — since Nahor, and probably also Abram,[c] married his daughter — was dead already; and Nahor remained behind (Gen. xi. 31). In Haran Terah died; and Abram, now the head of the family, received a second call, and with it the promise.[d] His promise

[a] * Lange's note (*Bibelwerk*, i. 342), especially as enlarged by Dr. Schaff (*Com. on Matt.* p. 424), enumerates the principal explanations of this difficult expression H.

[b] Nicolaus was a contemporary and favorite of Herod the Great and Augustus. The quotation is probably from an Universal History, said to have contained 144 books.

[c] "Iscah" (in Gen. xi. 29) is generally supposed to be the same person as Sarai. That Abram calls her his "sister" is not conclusive against it; for see xiv. 16. where Lot is called his "brother."

[d] It is expressly stated in the Acts (vii. 4) that Abram quitted Haran after his father's death. This is supposed to be inconsistent with the statements that Terah was 70 years old at the birth of Abram (Gen. xi. 26); that he died at the age of 205 (Gen. xi. 32; and that Abram was 75 years old when he left Haran hence it would seem to follow that Abram migrated

Digitized by Google

was two-fold, containing both a temporal and spiritual blessing, the one of which was the type and earnest of the other. The temporal promise was, that he should become a great and prosperous nation; the spiritual, that in him "should all families of the earth be blessed" (Gen. xii. 2).

Abram appears to have entered Canaan, as Jacob afterwards did, along the valley of the Jabbok; for he crossed at once into the rich plain of Moreh, near Sichem, and under Ebal and Gerizim. There, in one of the most fertile spots of the land, he received the first distinct promise of his future inheritance (Gen. xii. 7), and built his first altar to God. "The Canaanite" (it is noticed) "was then in the land," and probably would view the strangers of the warlike north with no friendly eyes. Accordingly Abram made his second resting-place in the strong mountain country, the key of the various passes, between Bethel and Ai. There he would dwell securely, till famine drove him into the richer and more cultivated land of Egypt.

That his history is no ideal or heroic legend, is very clearly shown, not merely by the record of his deceit as to Sarai, practiced in Egypt and repeated afterwards, but much more by the clear description of its utter failure, and the humiliating position in which it placed him in comparison with Pharaoh, and still more with Abimelech. That he should have felt afraid of such a civilized and imposing power as Egypt even at that time evidently was, is consistent enough with the Arab nature as it is now; that he should have sought to guard himself by deceit, especially of that kind which is true in word and false in effect, is unfortunately not at all incompatible with a generally religious character; but that such a story should have been framed in an ideal description of a saint or hero is inconceivable.

The period of his stay in Egypt is not recorded, but it is from this time that his wealth and power appear to have begun (Gen. xiii. 2). If the dominion of the Hyksos in Memphis is to be referred to this epoch, as seems not improbable [EGYPT], then, since they were akin to the Hebrews, it is not impossible that Abram may have taken part in their war of conquest, and so have had another recommendation to the favor of Pharaoh.

On his return, the very fact of this growing wealth and importance caused the separation of Lot and his portion of the tribe from Abram. Lot's departure to the rich country of Sodom implied a wish to quit the nomadic life and settle at once; Abram, on the contrary, was content still to "dwell in tents" and wait for the promised time (Heb. xi. 9). Probably till now he had looked on Lot as his heir, and his separation from him was a Providential preparation for the future. From this time he took up his third resting-place at Mamre, or Hebron, the future capital of Judah, situated in the direct line of communication with Egypt, and opening down to the wilderness and pasture land of Beersheba. This very position, so different from the mountain-fastness of Ai, marks the change in the numbers and powers of his tribe.

The history of his attack on Chedorlaomer, which follows, gives us a specimen of the view which would be taken of him by the external world. By the way in which it speaks of him as "Abram the Hebrew," [a] it would seem to be an older document, a fragment of Canaanitish history (as Ewald calls it), preserved and sanctioned by Moses. The invasion was clearly another northern immigration or foray, for the chiefs or kings were of Shinar (Babylonia), Ellasar (Assyria?), Elam (Persia), &c.; that it was not the first, is evident from the vassalage of the kings of the cities of the plain; and it extended (see Gen. xiv. 5–7) far to the south over a wide tract of country. Abram appears here as the head of a small confederacy of chiefs, powerful enough to venture on a long pursuit to the head of the valley of the Jordan, to attack with success a large force, and not only to rescue Lot, but to roll back for a time the stream of northern immigration. His high position is seen in the gratitude of the people, and the dignity with which he refuses the character of a hireling; that it did not elate him above measure, is evident from his reverence to Melchizedek, in whom he recognized one whose call was equal and consecrated rank superior to his own [MELCHIZEDEK].

(II.) The second period of Abram's life is marked by the fresh revelation, which, without further unfolding the spiritual promise, completes the temporal one, already in course of fulfillment. It first announced to him that a child of his own should inherit the promise, and that his seed should be as the "stars of heaven." This promise, unlike the other, appeared at his age contrary to nature, and therefore it is on this occasion that his faith is specially noted, as accepted and "counted for righteousness." Accordingly, he now passed into a new position, for not only is a fuller revelation given as to the captivity of his seed in Egypt, the time of their deliverance, and their conquest of the land, "when the iniquity of the Amorites was full," but after his solemn burnt-offering the visible appearance of God in fire is vouchsafed to him as a sign, and he *enters into covenant* with the Lord (Gen. xv. 18). This covenant, like the earlier one with Noah (Gen. ix. 9–17), is one of free promise from God, faith only in that promise being required from man.

The immediate consequence was the taking of Hagar, Sarai's maid, to be a concubine of Abram (as a means for the fulfillment of the promise of seed), and the conception of Ishmael.

(III.) For fourteen years after, no more is recorded of Abram, who seems during all that period to have dwelt at Mamre. After that time, in Abram's 99th year, the last step in the revelation of the promise is made, by the declaration that it should be given to a son of Sarai; and at the same time the temporal and spiritual elements are distinguished; Ishmael can share only the one, Isaac is to enjoy the other. The covenant, which before was only for temporal inheritance (Gen. xv. 18), is now made "everlasting," and sealed by circumcision. This new state is marked by the change of Abram's name to "Abraham," and Sarai's to "Sarah," [b] and it was one of far greater acquaint-

from Haran in his father's lifetime. Various explanations have been given of this difficulty; the most probable is, that the statement in Gen. xi. 26, that Terah was 70 years old when he begat his three children, applies only to the oldest, Haran, and that the births of his two younger children belonged to a subsequent period [CHRONOLOGY].

[a] Ὁ περάτης, LXX. If this sense of the word be taken, it strengthens the supposition noticed. In any case, the name is that applied to the Israelites by foreigners, or used by them of themselves only in speaking to foreigners: see HEBREW.

[b] The original name אַבְרָם is uncertain in deriva

ance and intercourse with God. For, immediately after, we read of the Lord's appearance to Abraham in human form, attended by two angels, the ministers of His wrath against Sodom, of His announcement of the coming judgment to Abraham, and acceptance of his intercession for the condemned cities.[a] The whole record stands alone in Scripture for the simple and familiar intercourse of God with him, contrasting strongly with the vaguer and more awful descriptions of previous appearances (see *e. g.* xv. 12), and with those of later times (Gen. xxviii. 17, xxxii. 30; Ex. iii. 6, &c.). And corresponding with this there is a perfect absence of all fear on Abraham's part, and a cordial and reverent joy, which, more than anything else, recalls the time past when "the voice of the Lord God was heard, walking in the garden in the cool of the day."

Strangely unworthy of this exalted position as the "Friend" and intercessor with God, is the repetition of the falsehood as to Sarah in the land of the Philistines (Gen. xx.). It was the first time he had come in contact with that tribe or collection of tribes, which stretched along the coast almost to the borders of Egypt; a race apparently of lords ruling over a conquered population, and another example of that series of immigrations which appear to have taken place at this time. It seems, from Abraham's excuse for his deceit on this occasion, as if there had been the idea in his mind that all arms may be used against unbelievers, who, it is assumed, have no "fear of God," or sense of right. If so, the rebuke of Abimelech, by its dignity and its clear recognition of a God of justice, must have put him to manifest shame, and taught him that others also were servants of the Lord.

This period again, like that of the sojourn in Egypt, was one of growth in power and wealth, as the respect of Abimelech and his alarm for the future, so natural in the chief of a race of conquering invaders, very clearly shows. Abram's settlement at Beersheba, on the borders of the desert, near the Amalekite plunderers, shows both that he needed room, and was able to protect himself and his flocks.

The birth of Isaac crowns his happiness, and fulfills the first great promise of God; and the expulsion of Ishmael, painful as it was to him, and vindictive as it seems to have been on Sarah's part, was yet a step in the education which was to teach him to give up all for the one great object. The symbolical meaning of the act (drawn out in Gal. iv. 21–31) could not have been wholly unfelt by the patriarch himself, so far as it involved the sense of the spiritual nature of the promise, and carried out the fore-ordained will of God.

(IV.) Again for a long period (25 years, Joseph *Ant.* i. 13, § 2) the history is silent: then comes the final trial and perfection of his faith in the command to offer up the child of his affections and of God's promise. The trial lay, first in the preciousness of the sacrifice, and the perplexity in which the command involved the fulfillment of the promise; secondly, in the strangeness of the command to violate the human life, of which the sacredness had been enforced by God's special command (Gen. ix. 5, 6), as well as by the feelings of a father. To these trials he rose superior by faith, that "God was able to raise Isaac even from the dead" (Heb. xi. 19), probably through the same faith to which our Lord refers, that God had promised to be the "God of Isaac" (Gen. xvii. 19), and that he was not "a God of the dead, but of the living."[b]

It is remarkable that, in the blessing given to him now, the original spiritual promise is repeated for the first time since his earliest call, and in the same words then used. But the promise that "in his seed all nations should be blessed" would be now understood very differently, and felt to be far above the temporal promise, in which, perhaps, at first it seemed to be absorbed. It can hardly be wrong to refer preëminently to this epoch the declaration, that Abraham "saw the day of Christ and was glad" (John viii. 56).

The history of Abraham is now all but over, though his life was prolonged for nearly 50 years. The only other incidents are the death and burial of Sarah, the marriage of Isaac with Rebekah, and that of Abraham with Keturah.

The death of Sarah took place at Kirjath Arba, *i. e.* Hebron, so that Abraham must have returned from Beersheba to his old and more peaceful home. In the history of her burial, the most notable points are the respect paid to the power and character of Abraham, as a mighty prince, and the exceeding modesty and courtesy of his demeanor. It is sufficiently striking that the only inheritance of his family in the land of promise should be a tomb. The sepulchral cave of Machpelah is now said to be concealed under the Mosque of Hebron (see Stanley, *S. & P.* p. 101). [HEBRON.]

The marriage of Isaac, so far as Abraham is concerned, marks his utter refusal to ally his son with the polluted and condemned blood of the Canaanites.

The marriage with Keturah is the strangest and most unexpected event recorded in his life, Abraham having long ago been spoken of as an old man; but his youth having been restored before the birth of Isaac, must have remained to him, and Isaac's

tion and meaning. Gesenius renders it "nobility," from the same root as "Sarah"; Ewald by "quarrelsome" (from the root שָׂרָה in sense of "to fight"). The name Sarah, שָׂרָה, is certainly "princess."

[a] Tradition still points out the supposed site of this appearance of the Lord to Abraham. About a mile from Hebron is a beautiful and massive oak, which still bears Abraham's name. The residence of the patriarch was called "the oaks of Mamre," erroneously translated in A. V. "the plain" of Mamre (Gen. xiii. 18, xviii. 1); but it is doubtful whether this is the exact spot, since the tradition in the time of Josephus (*B. J.* iv. 9, § 7) was attached to a terebinth. This tree no longer remains; but there is no doubt that it stood within the ancient enclosure, which is still called "Abraham's House." A fair was held beneath it in the time of Constantine, and it remained to the time of Theodosius. (Robinson, ii. 81 ed. 1856; Stanley, *S. & P.* p. 143.)

[b] The scene of the sacrifice is, according to our present text, and to Josephus, the land of "Moriah," or מוֹרִיָּה, *chosen by Jehovah*, Ges. (comp. the name "Jehovah-Jireh"). The Samaritan Pentateuch has "Moreh," מוֹרֶה; the LXX. render the word here by τὴν ὑψηλήν, the phrase used for what is undoubtedly "Moreh" in xii. 6, whereas in 2 Chr. iii. they render "Moriah" by Ἀμωρία: they therefore probably read "Moreh" also. The fact of the three days' journey from Beersheba suits Moreh better (see Stanley's *S. & P.* p. 251); other considerations seem in favor of Moriah. [MORIAH.]

marriage having taken his son comparatively away, may have induced him to seek a wife to be the support of his old age. Keturah held a lower rank than Sarah, and her children were sent away, lest they should dispute the inheritance of Isaac, Abraham having learnt to do voluntarily in their case what had been forced upon him in the case of Ishmael.

Abraham died at the age of 175 years, and his sons, the heir Isaac, and the outcast Ishmael, united to lay him in the cave of Machpelah by the side of Sarah.

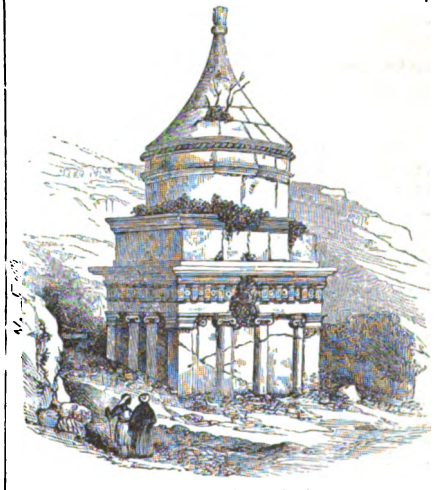
His descendants were (1) the Israelites; (2) a branch of the Arab tribes through Ishmael; (3) the "children of the East," of whom the Midianites were the chief; (4) perhaps (as cognate tribes), the nations of Ammon and Moab (see these names); and through their various branches his name is known all over Asia. A. B.

* On Abraham, see particularly Ewald, *Gesch.* i. 409–439, 2e Aufl.; Kurtz, *Gesch. des A. Bundes*, 2e Aufl., i. 160–215; and Stanley, *Lect. on the Hist. of the Jewish Church*, Part I., Lect. i., ii. The Jewish legends respecting him have been collected by Beer, *Leben Abrahams nach Auffassung der jüdischen Sage*, Leipz. 1859; see also Eisenmenger's *Entdeckites Judenthum*. A.

ABRAHAM'S BOSOM. During the Roman occupation of Judæa, at least, the practice of reclining on couches at meals was customary among the Jews. As each guest leaned upon his left arm, his neighbor next below him would naturally be described as lying in his bosom; and such a position with respect to the master of the house was one of especial honor, and only occupied by his nearest friends (John i. 18, xiii. 23). To lie in Abraham's bosom, then, was a metaphor in use among the Jews to denote a condition after death of perfect happiness and rest, and a position of friendship and nearness to the great founder of their race, when they shall lie down on his right hand at the banquet of Paradise, "with Abraham, and Isaac, and Jacob, in the kingdom of heaven" (Matt. viii. 11). That the expression was in use among the Jews is shown by Lightfoot (*Hor. Heb. in Luc.* xvi. 22), who quotes a passage from the Talmud (*Kiddushin*, fol. 72), which, according to his interpretation, represents Levi as saying in reference to the death of Rabbi Judah, "to-day he dwelleth in Abraham's bosom." The future blessedness of the just was represented under the figure of a banquet, "the banquet of the garden of Eden or Paradise." See Schoettgen, *Hor. Heb. in Matt.* viii. 11. [LAZARUS.] W. A. W.

A'BRAM. [ABRAHAM.]

ABRO'NAH (עַבְרֹנָה [*passage*], from עָבַר, to cross over), one of the halting-places of the Israelites in the desert, immediately preceding Ezion-geber, and therefore, looking to the root, the name may possibly retain the trace of a ford across the head of the Elanitic Gulf. In the A. V. it is given as Ebronah ('Εβρωνά; [Vat. Σεβρωνα:] *Hebrona*) (Num. xxxiii. 34, 35). G.



ABRO'NAS ('Αβρωνᾶς; [Comp. 'Αρβωναῖ; Ald. 'Αρβοναῖ: *Mambre*]), a torrent (χείμαρρος), apparently near Cilicia [Jud. ii. 24 compared with 25]: if so, it may possibly be the *Nahr Abraim*, or *Ibrahim*, the ancient Adonis, which rises in the Lebanon at *Afka*, and falls into the sea at *Jebeil* (Byblos). It has, however, been conjectured (Movers, *Bonner Zeits.* xiii. 38) that the word is a corruption of עֵבֶר הַנָּהָר = beyond the river (Euphrates), which has just before been mentioned; a corruption not more inconceivable than many which actually exist in the LXX. The A. V. has ARBONAI (Jud. ii. 24). G.

AB'SALOM (אַבְשָׁלוֹם, *father of peace* 'Αβεσσαλώμ: *Absalom*), third son of David by Maachah, daughter of Talmai king of Geshur, a Syrian district adjoining the north-eastern frontier of the Holy Land near the Lake of Merom. He is scarcely mentioned till after David had committed the great crime which by its consequences embittered his old age, and then appears as the instrument by whom was fulfilled God's threat against the sinful king, that "evil should be raised up against him out of his own house, and that his neighbor should lie with his wives in the sight of the sun." In the latter part of David's reign, polygamy bore its ordinary fruits. Not only is his sin in the case of Bathsheba traceable to it, since it naturally suggests the unlimited indulgence of the passions, but it also brought about the punishment of that sin, by raising up jealousies and conflicting claims between the sons of different mothers, each apparently living with a separate house and establishment (2 Sam. xiii. 8, xiv. 24; cf. 1 K. vii. 8, &c.). Absalom had a sister Tamar, who was violated by her half-brother Amnon, David's eldest son by Ahinoam, the Jezreelitess. The king, though indignant at so great a crime, would not punish Amnon because he was his first-born, as we learn from the words καὶ οὐκ ἐλύπησε τὸ πνεῦμα 'Αμνὼν τοῦ υἱοῦ αὐτοῦ, ὅτι ἠγάπα αὐτόν, ὅτι πρωτότοκος αὐτοῦ ἦν, which are found in the LXX. (2 Sam. xiii. 21), though wanting in the Hebrew. The natural avenger of such an outrage would be Tamar's full brother Absalom, just as the sons of Jacob took bloody vengeance for their sister Dinah (Gen. xxxiv.). He brooded over the wrong for two years, and then invited all the princes to a sheep-shearing feast at his estate in Baal-hazor, possibly an old Canaanitish sanctuary (as we infer from the prefix Baal), on the borders of Ephraim and Benjamin. Here he ordered his servants to murder Amnon, and then fled for safety to his father-in-law's court at Geshur, where he remained for three years. David was overwhelmed by this accumulation of family sorrows, thus completed by separation from his favorite son, whom he thought it impossible to pardon or recall. But he was brought back by an artifice of Joab, who sent a woman of Tekoah (afterwards known as the birthplace of the prophet Amos) to entreat the king's interference in a supposititious case similar to Absalom's. Having persuaded David to prevent the avenger of blood from pursuing a young man, who, she said, had slain his brother, she adroitly applied his assent to the recall of Absalom, and urged him, as he had thus yielded the general principle, to "fetch home his banished." David did so, but would not see Absalom for two more years, though he allowed him to live in Jerusalem. At last wearied with delay, perceiving that his triumph was only half complete, and that his exclusion from court interfered with the ambitious schemes which he was forming, fancying too that sufficient exertions were not made in his favor, the impetuous young man sent his servants to burn a field of corn near his own, belonging to Joab, thus doing as Samson had done (Judg. xv. 4). There

upon Joab, probably dreading some further outrage from his violence, brought him to his father, from whom he received the kiss of reconciliation. Absalom now began at once to prepare for rebellion, urged to it partly by his own restless wickedness, partly perhaps by the fear lest Bathsheba's child should supplant him in the succession, to which he would feel himself entitled as of royal birth on his mother's side as well as his father's, and as being now David's eldest surviving son, since we may infer that the second son Chileab was dead, from no mention being made of him after 2 Sam. iii. 3. It is harder to account for his temporary success, and the imminent danger which befell so powerful a government as his father's. The sin with Bathsheba had probably weakened David's moral and religious hold upon the people; and as he grew older he may have become less attentive to individual complaints, and that personal administration of justice which was one of an eastern king's chief duties. For Absalom tried to supplant his father by courting popularity, standing in the gate, conversing with every suitor, lamenting the difficulty which he would find in getting a hearing, "putting forth his hand and kissing any man who came nigh to do him obeisance." He also maintained a splendid retinue (xv 1), and was admired for his personal beauty and the luxuriant growth of his hair, on grounds similar to those which had made Saul acceptable (1 Sam. x. 23). It is probable, too, that the great tribe of Judah had taken some offense at David's government, perhaps from finding themselves completely merged in one united Israel; and that they hoped secretly for preëminence under the less wise and liberal rule of his son. Thus Absalom selects Hebron, the old capital of Judah (now supplanted by Jerusalem), as the scene of the outbreak; Amasa his chief captain, and Ahithophel of Giloh his principal counsellor, are both of Judah, and after the rebellion was crushed we see signs of ill-feeling between Judah and the other tribes (xix. 41). But whatever the causes may have been, Absalom raised the standard of revolt at Hebron after *forty* years, as we now read in 2 Sam. xv. 7, which it seems better to consider a false reading for *four* (the number actually given by Josephus), than to interpret of the fortieth year of David's reign (see Gerlach, *in loco*, and Ewald, *Geschichte*, iii. 217). The revolt was at first completely successful; David fled from his capital over the Jordan to Mahanaim in Gilead, where Jacob had seen the "Two Hosts" of the angelic vision, and where Abner had rallied the Israelites round Saul's dynasty in the person of the unfortunate Ishbosheth. Absalom occupied Jerusalem, and by the advice of Ahithophel, who saw that for such an unnatural rebellion war to the knife was the best security, took possession of David's harem, in which he had left ten concubines. This was considered to imply a formal assumption of all his father's royal rights (cf. the conduct of Adonijah, 1 K. ii. 13 ff., and of Smerdis the Magian, Herod. iii. 68), and was also a fulfillment of Nathan's prophecy (2 Sam. xii. 11). But David had left friends who watched over his interests. The vigorous counsels of Ahithophel were afterwards rejected through the crafty advice of Hushai, who insinuated himself into Absalom's confidence to work his ruin, and Ahithophel himself, seeing his ambitious hopes frustrated, and another preferred by the man for whose sake he had turned traitor, went home to Giloh and committed suicide. At last, after being solemnly anointed king at Jerusalem (xix. 10), and lingering there far longer than was expedient, Absalom crossed the Jordan to attack his father, who by this time had rallied round him a considerable force, whereas had Ahithophel's advice been followed, he would probably have been crushed at once. A decisive battle was fought in Gilead, in the wood of Ephraim, so called, according to Gerlach (*Comm. in loco*), from the great defeat of the Ephraimites (Judg. xii. 4), or perhaps from the connection of Ephraim with the trans-Jordanic half-tribe of Manasseh (Stanley, *S. and P.* p. 323). Here Absalom's forces were totally defeated, and as he himself was escaping, his long hair was entangled in the branches of a terebinth, where he was left hanging while the mule on which he was riding ran away from under him. Here he was dispatched by Joab, in spite of the prohibition of David, who, loving him to the last, had desired that his life might be spared, and when he heard of his death, lamented over him in the pathetic words, *O my son Absalom! would God I had died for thee! O Absalom, my son, my son!* He was buried in a great pit in the forest, and the conquerors threw stones over his grave, an old proof of bitter hostility (Josh. vii. 26).[a] The sacred historian contrasts this dishonored burial with the tomb which Absalom had raised in the *King's dale* (comp. Gen. xiv. 17) for the three sons whom he had lost (comp. 2 Sam. xviii. 18, with xiv. 27), and where he probably had intended that his own remains should be laid. Josephus (*Ant.* vii. 10, § 3) mentions the pillar of Absalom as situate 2 stadia from Jerusalem. An existing monument in the valley of Jehoshaphat just outside Jerusalem bears the name of the Tomb of Absalom; but the Ionic pillars which surround its base show that it belongs to a much later period, even if it be a tomb at all.

G. E. L. C.

The so-called Tomb of Absalom.

AB'SALOM ('Αβεσσάλωμος; [Comp. Alex. 'Αψάλωμος, and so Sin. 1 M. xiii.:] *Absolomus*,

[a] * The same custom of heaping up stones as a mark of detestation and ignominy over the graves of perpetrators of crimes, is still observed in the lands of the Bible. For illustrations of this, see Thomson's *Land and Book*, ii. 234, and Bonar's *Mission of Inquiry to the Jews*, p. 318.

AC'CAD (אַכַּד [*fortress* according to Fürst]: Ἀρχάδ: *Achad*), one of the cities in the land of Shinar — the others being Babel, Erech, and Calneh — which were the beginning of Nimrod's kingdom (Gen. x. 10). A great many conjectures have been formed as to its identification: — 1. Following the reading of the oldest version (the LXX.), the river Argades, mentioned by Ælian as in the Persian part of Sittacene beyond the Tigris, has been put forward (Bochart, *Phal.* iv. 17). But this is too far east. 2. Sacada, a town stated by Ptolemy to have stood at the junction of the Lycus (Great Zab) with the Tigris, below Nineveh (Leclerc, in Winer). 3. A district "north of Babylon" called Ἀκκήτη (Knobel, *Genesis*, p. 108). 4. And perhaps in the absence of any remains of the name this has the greatest show of evidence in its favor, Nisibis, a city on the *Khabour* river still retaining its name (*Nisibin*), and situated at the N. E. part of Mesopotamia, about 150 miles east of *Orfa*, and midway between it and Nineveh. We have the testimony of Jerome (*Onomasticon*, *Achad*), that it was the belief of the Jews of his day (*Hebræi dicunt*) that Nisibis was Accad; a belief confirmed by the renderings of the Targums of Jerusalem and Pseudo-jonathan (נְצִיבִין), and of Ephraem Syrus; and also by the fact that the ancient name of Nisibis was Acar (Rosenmüller, ii. 29), which is the word given in the early Peshito version ܐܟܪ, and also occurring in three MSS. of the *Onomasticon* of Jerome. (See the note to "Achad" in the edition of Jerome, Ven. 1767, vol. iii. p. 127.)

The theory deduced by Rawlinson from the latest Assyrian researches is, that "Akkad" was the name of the "great primitive Hamite race who inhabited Babylonia from the earliest time," who originated the arts and sciences, and whose language was "the great parent stock from which the trunk stream of the Semitic tongues sprang." "In the inscriptions of Sargon the name of Akkad is applied to the Armenian mountains instead of the vernacular title of Ararat." (Rawlinson, in *Herodotus*, i. 319, note.) The name of the city is believed to have been discovered in the inscriptions under the form *Kinzi Akkad* (*ibid.* p. 447). G.

AC'CARON. [EKRON.]

AC'CHO (עַכּוֹ, *hot sand* (?): Ἄκχω, Ἄκη, Strabo; the PTOLEMAIS of the Maccabees and N. T.), now called *Acca*, or more usually by Europeans, *Saint Jean d'Acre*, the most important sea-port town on the Syrian coast, about 30 miles S. of Tyre. It was situated on a slightly projecting headland, at the northern extremity of that spacious bay — the only inlet of any importance along the whole sea-board of Palestine — which is formed by the bold promontory of Carmel on the opposite side. This bay, though spacious (the distance from Accho to Carmel being about 8 miles), is shallow and exposed, and hence Accho itself does not at all times offer safe harborage; on the opposite side of the bay, however, the roadstead of *Haifa*, immediately under Carmel, supplies this deficiency. Inland the hills, which from Tyre southwards press close upon the sea-shore, gradually recede, leaving in the immediate neighborhood of Accho a plain of remarkable fertility about six miles broad, and watered by the small river Belus (*Nahr Namân*), which discharges itself into the sea close under the walls of the town. To the S. E. the still receding heights afford access to the interior in the direction of Sephoris. Accho, thus favorably placed in command of the approaches from the north, both by sea and land, has been justly termed the "key of Palestine."

In the division of Canaan among the tribes, Accho fell to the lot of Asher, but was never wrested from its original inhabitants (Judg. i. 31): and hence it is reckoned among the cities of Phœnicia (Strab. ii. 134; Plin. v. 17; Ptol. v. 15). No further mention is made of it in the O. T. history, nor does it appear to have risen to much importance until after the dismemberment of the Macedonian empire, when its proximity to the frontier of Syria made it an object of frequent contention. Along with the rest of Phœnicia it fell to the lot of Egypt, and was named Ptolemais, after one of the Ptolemies, probably Soter, who could not have failed to see its importance to his dominions in a military point of view. In the wars that ensued between Syria and Egypt, it was taken by Antiochus the Great (Ptol. v. 62), and attached to his kingdom. When the Maccabees established themselves in Judæa, it became the base of operations against them. Simon drove his enemies back within its walls, but did not take it (1 Macc. v. 22). Subsequently, when Alexander Balas set up his claim to the Syrian throne, he could offer no more tempting bait to secure the cooperation of Jonathan than the possession of Ptolemais and its district (1 Macc. x. 39). On the decay of the Syrian power it was one of the few cities of Judæa which established its independence. Alexander Jannæus attacked it without success. Cleopatra, whom he had summoned to his assistance, took it, and transferred it, with her daughter Selene, to the Syrian monarchy: under her rule it was besieged and taken by Tigranes (Joseph. *Ant.* xiii. 12, § 2; 13, § 2; 16, § 4). Ultimately it passed into the hands of the Romans, who constructed a military road along the coast, from Berytus to Sepphoris, passing through it, and elevated it to the rank of a colony, with the title Colonia Claudii Cæsaris (Plin. v. 17). The only notice of it in the N. T. is in connection with St. Paul's passage from Tyre to Cæsarea (Acts xxi. 7). Few remains of antiquity are to be found in the modern town. The original name has alone survived all the changes to which the place has been exposed. W. L. B.

AC'COS (Ἀκκώς: [Alex. Ἀκχώς, Field:] *Jacob*), father of John and grandfather of Eupolemus the ambassador from Judas Maccabæus to Rome (1 Macc. viii. 17).

AC'COZ. [KOZ.]

ACEL'DAMA (Ἀκελδαμά; Aram [and

Digitized by Google

Rsch.] ([Sin.] B) Ἀκελδαμάχ: *Haceldama*); **χωρίον αἵματος,** "the field of blood;" (Chald. דְּבַל דְּמָא), the name given by the Jews of Jerusalem to a "field" (χωρίον) near Jerusalem purchased by Judas with the money which he received for the betrayal of Christ, and so called from his violent death therein (Acts i. 19). This is at variance with the account of St. Matthew (xxvii. 8), according to which the "field of blood" (ἀγρὸς αἵματος) was purchased by the Priests with the 30 pieces of silver after they had been cast down by Judas, as a burial-place for strangers, the locality being well known at the time as "the field of the Potter," [a] (τὸν ἀγρὸν τοῦ κεραμέως). See Alford's notes to Acts i. 19. And accordingly ecclesiastical tradition appears from the earliest times to have pointed out two distinct (though not unvarying) spots as referred to in the two accounts. In Jerome's time (*Onom. Acheldama*) the "ager sanguinis" was shown "ad australem [b] plagam montis Sion." Arculfus (p. 4) saw the "large *fig*-tree where Judas hanged himself," certainly in a different place from that of the "small field (Aceldama) where the bodies of pilgrims were buried" (p. 5). Saewulf (p. 42) was shown Aceldama "next" to Gethsemane, "at the foot of Olivet, near the sepulchres of Simeon and Joseph" (Jacob and Zacharias). In the "Citez de Jherusalem" (Rob. ii. 560) the place of the suicide of Judas was shown as a stone arch, apparently inside the city, and giving its name to a street. Sir John Maundeville (p. 175) found the "*elder*-tree" of Judas "fast by" the "image of Absalom;" but the Aceldama "on the other side of Mount Sion towards the south." Maundrell's account (p. 468–9) agrees with this, and so does the large map of Schultz, on which both sites are marked. The Aceldama still retains its ancient position, but the tree of Judas has been transferred to the "Hill of Evil Counsel" (Stanley, *S. & P.* pp. 105, 186; and Barclay's *Map*, 1857, and "*City*," &c. pp. 75, 208).

The "field of blood" is now shown on the steep southern face of the valley or ravine of Hinnom, near its eastern end; on a narrow plateau (Salzmann, *Etude*, p. 22), more than half way up the hill-side. Its modern name is *Hak ed-damm*. It is separated by no enclosure; a few venerable olive-trees (see Salzmann's photograph, "*Champ du sang*") occupy part of it, and the rest is covered by a ruined square edifice — half built, half excavated — which, perhaps originally a church (Pauli, in Ritter, *Pal.* p. 464), was in Maundrell's time (p. 468) in use as a charnel-house, and which the latest conjectures (Schultz, Williams, and Barclay, p. 207) propose to identify with the tomb of Ananus (Joseph. *B. J.* v. 12, § 2). It was believed in the middle ages that the soil of this place had the power of very rapidly consuming bodies buried in it (Sandys, p. 187), and in consequence either of this or of the sanctity of the spot, great quantities of the earth were taken away; amongst others by the Pisan Crusaders in 1218 for their *Campo Santo* at Pisa, and by the Empress Helena for that at Rome (Rob. i. 355; Raumer, p. 270). Besides the charnel-house above mentioned, there are several large hollows in the ground in this immediate neighborhood which may have been caused by such excavations. The formation of the hill is cretaceous, and it is well known that chalk is always favorable to the rapid decay of animal matter. The assertion (Krafft, p. 193; Ritter, *Pal.* p. 463) that a pottery still exists near this spot does not seem to be borne out by other testimony.[c] G.

* There are other views on some of the points embraced in this article, which deserve to be mentioned. The contradiction said to exist between Matt. xxvii. 8 and Acts i. 19 is justly qualified in the *Concise Dictionary* as "apparent," and hence not necessarily actual. The difficulty turns wholly upon a single word, namely, **ἐκτήσατο,** in Acts i. 18; and that being susceptible of a two-fold sense, we are at liberty certainly to choose the one which agrees with Matthew's statement, instead of the one conflicting with it. Many understand ἐκτήσατο in Acts as having a Hiphil or causative sense, as Greek verbs, especially in the middle voice, often have (Win. *N. T. Gr.* § 38, 3; Scheuerl. *Syntax*, p. 298). With this meaning, Luke in the Acts (or Peter, since it may be the latter's remark,) states that Judas by his treachery gave occasion for the purchase of "the potter's field"; and that is precisely what Matthew states in saying that the priests purchased the field, since they did it with the money furnished to them by the traitor. In like manner we read in the Gospels that Jesus when crucified was put to death by the Roman soldiers; but in Acts v. 30, Peter says to the members of the Jewish Council: — "Whom (Jesus) ye slew, hanging on a tree": [d] which all accept as meaning that the Jewish rulers were the means of procuring the Saviour's death. For other examples of this causative sense of verbs, comp. Matt. ii. 16, xxvii. 60; John iv. 1; Acts vii. 21, xvi. 23; 1 Cor. vii. 16; 1 Tim. iv. 16, etc. As explaining, perhaps, why Peter chose this concise mode of expression, Fritzsche's remark may be quoted: — The man (a sort of *acerba irrisio*) thought to enrich himself by his crime, but only got by it a field where blood was paid for blood (*Evang. Matt.* p. 799). Many of the best critics, as Kuinoel, Olshausen, Tholuck (*MS. notes*), Ebrard (*Wissensch. Kritik*, p. 543), Baumgarten, (*Apostelgesch.* p. 31), Lange (*Bibelwerk*, i. 409), Lechler (*Der Apost. Gesch.* p. 14), Robinson (*Harmony*, p. 227), Andrews (*Life of our Lord*, p. 511), and others, adopt this explanation.

It does not affect the accuracy of Matthew or Luke whether "the field of blood" which they mention was the present Aceldama or not; for they affirm nothing as to its position beyond implying that it was a "potter's field" near Jerusalem.

[a] The prophecy referred to by St. Matthew, Zechariah (not Jeremiah) xi. 12, 13, does not in the present state of the Hebrew text agree with the quotation of the Evangelist. The Syriac Version omits the name altogether.

[b] Eusebius, from whom Jerome translated, has here **ν βορείου.** This may be a clerical error, or it may add another to the many instances existing of the change of a traditional site to meet circumstances.

[c] * Krafft's statement is (*Topographie Jerusalems*, p. 193) that he saw people cutting or digging up clay there (*Erde stechen*), and not that they worked it up on the ground. Schultz, the Prussian consul (*Jerusalem, eine Vorlesung*, p. 39), and Porter (*Giant Cities*, p. 147), speak of a bed of clay in that place. See, also, Williams's *Holy City*, ii. 495. There is a pottery at Jerusalem at present, for which the clay is obtained from the hill over the valley of Hinnom. H.

[d] * The A. V. strangely misrepresents the Greek here, as if the putting to death of Jesus was prior to the crucifixion. H

Nor does the existence of traditions which point out different spots as "the field," prove that the first Christians recognized two different accounts, *i. e.* a contradiction in the statements of Matthew and Luke; for the variant traditions are not old enough (that of Arculf A.D. 700) to be traced to any such source. Yet it is not impossible that the potter's field which the Jews purchased may actually be the present Aceldama, which overlooks the valley of Hinnom. The receptacles for the dead which appear in the rocks in that quarter show that the ancient Jews were accustomed to bury there.

It is usually assumed that Judas came to his miserable end on the very field which had been bought with his 30 pieces of silver. It was for a twofold reason, says Lightfoot (*Hor. Hebr.* p. 690), that the field was called Aceldama; first, because, as stated in Matt. xxvii. 7, it had been bought with the price of blood; and, secondly, because it was sprinkled with the man's blood who took that price. Such congruities often mark the retributions of guilt. Yet it should be noted that Luke does not say in so many words that Judas "fell headlong and burst asunder" on the field purchased with his "reward of iniquity"; but may mean that the field was called Aceldama because the *fact* of the traitor's bloody end, whether it occurred in one place or another, was so notorious (*γνωστὸν ἐγένετο ... ὥστε κληθῆναι*). In either case there is no inconsistency between the two reasons assigned by Matthew and Luke for the appellation: the field could be called Aceldama with a double emphasis, both because it was "the price of blood," and because the guilty man's blood was shed there by his own hand.

Further, the giving of the 30 pieces of silver, "the price of him that was valued," for the "potter's field," fulfilled an O. T. prophecy. But why the evangelist (Matt. xxvii. 9) should refer this prophecy to Jeremiah, and not Zechariah (Zech. xi. 12, 13), in whom the words are found, is a question not easy to answer. Possibly as the Jews (according to the Talmudic order) placed Jeremiah at the head of the prophets, his name is cited merely as a general title of the prophetic writings. See Davidson's *Bibl. Criticism*, i. 330. Dr. E. Robinson (*Harmony*, p. 227) agrees with those who think *διὰ τοῦ προφήτου* may be the true reading, but certainly against the external testimony. The view of Hengstenberg is that though Zechariah's prophecy was directly Messianic and that of Jeremiah ante-Messianic and national, yet they both really prophesy one truth (namely, that the people who spurn God's mercies, be they his prophets and their warnings or Christ and his Gospel, shall be themselves spurned); and hence Matthew in effect quotes them both, but names Jeremiah only because he was better known, and because Zechariah incorporates the older prophecy with his own so as to give to the latter the effect of a previous fulfillment as a pledge for the future: the common truth taught in the two passages, and the part of "the potter" so conspicuous in them, being supposed sufficient to admonish the reader of this relation of the prophecies to each other. See his *Christology of the O. T.* ii. 187 ff., § 9 (Keith's trans.). So free a critic as Grotius (*Annott. ad loc.*) takes nearly the same view: — "Cum autem hoc dictum Jeremiæ per Zach. repetitum hic recitat Matt., simul ostendit tacite, eas pœnas imminere Judæis, quas iidem prophetæ olim sui temporis hominibus prædixerant." For other opinions, which may be thought, however, to illustrate rather than solve the difficulty, see Dr. Schaff's edition of Lange's *Commentary*, i. 505. H.

ACHAIA (Ἀχαΐα) signifies in the N. T. a Roman province, which included the whole of the Peloponnesus and the greater part of Hellas proper with the adjacent islands. This province, with that of Macedonia, comprehended the whole of Greece: hence Achaia and Macedonia are frequently mentioned together in the N. T. to indicate all Greece (Acts xviii. 12, 27, xix. 21; Rom. xv. 26, xvi. 5 [T. R., but here Ἀσίας is the true reading]; 1 Cor. xvi. 15; 2 Cor. i. 1, ix. 2, xi. 10; 1 Thess. i. 7, 8). A narrow slip of country upon the northern coast of Peloponnesus was originally called Achaia, the cities of which were confederated in an ancient League, which was renewed in B.C. 280 for the purpose of resisting the Macedonians. This League subsequently included several of the other Grecian states, and became the most powerful political body in Greece; and hence it was natural for the Romans to apply the name of Achaia to the Peloponnesus and the south of Greece, when they took Corinth and destroyed the League in B.C. 146. (*Καλοῦσι δὲ οὐκ Ἑλλάδος ἀλλ' Ἀχαΐας ἡγεμόνα οἱ Ῥωμαῖοι, διότι ἐχειρώσαντο Ἕλληνας δι' Ἀχαιῶν τότε τοῦ Ἑλληνικοῦ προεστηκότων*, Paus. vii. 16, § 10). Whether the Roman province of Achaia was established immediately after the conquest of the League, or not till a later period, need not be discussed here (see *Dict. of Geogr.* i. 17). In the division of the provinces by Augustus between the emperor and the senate in B.C. 27, Achaia was one of the provinces assigned to the senate, and was governed by a proconsul (Strab. xvii. p. 840; Dion. Cass. liii. 12). Tiberius in the second year of his reign (A.D. 16) took it away from the senate, and made it an imperial province governed by a procurator (Tac. *Ann.* i. 76); but Claudius restored it to the senate (Suet. *Claud.* 25). This was its condition when Paul was brought before Gallio, who is therefore (Acts xviii. 12) correctly called the "proconsul" (*ἀνθύπατος*) of Achaia, which is translated in the A. V. "deputy" of Achaia. [For the relation of Achaia to Hellas see GREECE, *ad fin.*]

ACHAICUS (Ἀχαϊκός), name of a Christian (1 Cor. xvi. 17, subscription No. 25).

ACHAN (עָכָן, *troubler*; written עָכָר in 1 Chr. ii. 7: Ἄχαν or Ἄχαρ: *Achan* or *Achar*), an Israelite of the tribe of Judah, who, when Jericho and all that it contained were accursed and devoted to destruction, secreted a portion of the spoil in his tent. For this sin Jehovah punished Israel by their defeat in their attack upon Ai. When Achan confessed his guilt, and the booty was discovered, he was stoned to death with his whole family by the people, in a valley situated between Ai and Jericho, and their remains, together with his property, were burnt. From this event the valley received the name of Achor (*i. e. trouble*) [ACHOR]. From the similarity of the name Achan to Achar, Joshua said to Achan, "Why hast thou troubled us? the Lord shall trouble thee this day" (Josh. vii.). In order to account for the terrible vengeance executed upon the family of Achan, it is quite unnecessary to resort to the hypothesis that they were accomplices in his act of military insubordination. The sanguinary severity of Oriental nations, from which the Jewish people were by no

Digitized by Google

means free, has in all ages involved the children in the punishment of the father. R. W. B.

* The name occurs Josh. vii. 1, 18, 19, 20, 24, xxii. 20. A.

A'CHAR (עָכָר: Ἀχάρ: *Achar*). A variation of the name of Achan which seems to have arisen from the play upon it given in 1 Chr. ii. 7, "Achar, the *troubler* (עוֹכֵר *'ócér*) of Israel." W. A. W.

ACH'BOR (עַכְבּוֹר [*mouse*]: Ἀχοβώρ [also Ἀχωβώρ, Ἀκχοβώρ]: *Achobor*). 1. Father of Baal-hanan, king of Edom (Gen. xxxvi. 38, 39; 1 Chr. i. 49).

2. Son of Michaiah, a contemporary of Josiah (2 K. xxii. 12, 14; Jer. xxvi. 22, xxxvi. 12), called Abdon in 2 Chr. xxxiv. 20.

A'CHAZ (Ἄχαζ: *Achaz*). AHAZ, king of Judah (Matt. i. 9). W. A. W.

ACHIACH'ARUS (Ἀχιάχαρος, [FA. and Sin.] Ἀχειχαρος, [Ἀχειαχαρος, Ἀχεικαρ, etc.]), *i. e.* אֲחִיאֲחִירוֹן = Postumus: *Achicharus*). Chief minister, "cupbearer, and keeper of the signet, and steward, and overseer of the accounts" at the court of Sarchedonus or Esarhaddon, king of Nineveh, in the Apocryphal story of Tobit (Tob. i. 21, 22, ii. 10, xiv. 10). He was nephew to Tobit, being the son of his brother Anael, and supported him in his blindness till he left Nineveh. From the occurrence of the name of Aman in xiv. 10, it has been conjectured that Achiacharus is but the Jewish name for Mordecai, whose history suggested some points which the author of the book of Tobit worked up into his narrative; but there is no reason to have recourse to such a supposition, as the discrepancies are much more strongly marked than the resemblances. W. A. W.

ACHI'AS (*Achias*). Son of Phinees; high-priest and progenitor of Esdras (2 Esdr. i. 2), but omitted both in the genealogies of Ezra and 1 Esdras. He is probably confounded with Ahijah, the son of Ahitub and grandson of Eli. W. A. W.

A'CHIM (Ἀχείμ, Matt. i. 14), son of Sadoc, and father of Eliud, in our Lord's genealogy; the fifth in succession before Joseph the husband of Mary. The Hebrew form of the name would be יָכִין, Jachin (Gen. xlvi. 10; 1 Chr. xxiv. 17), which in the latter place the LXX. render Ἀχίμ, [Rom. ed.], or Ἀχείμ [Vat.; Alex. Ιαχειν, Comp. Ἰαχείμ, Ald. Ἀχίν]. It is a short form of Jehoiachin, *the Lord will establish*. The name, perhaps, indicates him as successor to Jehoiachin's throne, and expresses his parents' faith that God would, in due time, *establish* the kingdom of David, according to the promise in Is. ix. 7 (6 in the Heb. Bib.) and elsewhere. A. C. H.

A'CHIOR (Ἀχιώρ, *i. e.* אֲחִיאוֹר, *the brother of light*; comp. Num. xxxiv. 27: *Achior*: confounded with Ἀχιάχαρος, Tob. xi. 18), a general of the Ammonites in the army of Holofernes, who is afterwards represented as becoming a proselyte to Judaism (Jud. v., vi., xiv.). B. F. W.

A'CHISH (אָכִישׁ: Ἀγχοῦς; [Alex. in 1 K. Ἀγχις; Comp. Ἀκχίς, in 1 K. Ἀχίς:] *Achis*), a Philistine king at Gath, son of Maoch, who in the title to the 34th Psalm is called Abimelech possibly corrupted from אבימלך). David twice found a refuge with him when he fled from Saul. On the first occasion, being recognized by the servants of Achish as one celebrated for his victories over the Philistines, he was alarmed for his safety, and feigned madness (1 Sam. xxi. 10–13). [DAVID.] From Achish he fled to the cave of Adullam. On the second occasion, David fled to Achish with 600 men (1 Sam. xxvii. 2), and remained at Gath a year and four months.

Whether the Achish [son of Maachah] to whom Shimei went in disobedience to the commands of Solomon (1 K. ii. [39,] 40), be the same person is uncertain. R. W. B.

* In the title of the 34th Psalm, Abimelech (which see) may be the royal title, and Achish in the history the personal name, as Hengstenberg De Wette, Lengerke remark. Fürst (*Handwb.* s. v.) regards Achish as Philistian and probably = *serpent-charmer*. The name occurs also 1 Sam. xxvii. 3–12, xxviii. 1, 2, xxix. 2–9. H.

ACHI'TOB (Ἀχιτώβ [Vat. -χει-]: *Achitob*). AHITUB, the high-priest (1 Esdr. viii. 2; 2 Esdr. i. 1), in the genealogy of Esdras. W. A. W.

ACH'METHA. [ECBATANA.]

A'CHOR, VALLEY OF, (עֵמֶק עָכוֹר: [φάραγξ Ἀχώρ,] Ἐμεκαχώρ; [Hos. κοιλὰς Ἀχώρ: *vallis*] *Achor*) = *valley of trouble*, according to the etymology of the text; the spot at which Achan, the "troubler of Israel," was stoned (Josh. vii. 24, 26). On the N. boundary of Judah (xv. 7; also Is. lxv. 10; Hos. ii. 15). It was known in the time of Jerome (*Onom.* s. v.), who describes it as north of Jericho; but this is at variance with the course of the boundary in Joshua (Keil's *Joshua*, p. 131). G.

* No trace of the name is found any longer. Yet Achor "was situated at all events near Gilgal and the West-Jordan heights" (Knobel, *Josua*, p. 116). It is a valley "that runs up from Gilgal toward Bethel" (Thomson's *Land and Book*, ii. 185). The prophet's allusion in Hos. ii. 15 is not so much to the place as to the meaning of the name. "And I will give her the valley of Achor for a door of hope," *i. e.* through "trouble," through affliction and discipline, God will prepare His people for greater blessings than they would otherwise be fitted to have bestowed on them. H.

ACH'SA (עַכְסָה: Ἀσχά; Alex. Αχσα; [Comp. Ὀξά:] *Achsa*). Daughter of Caleb, or Chelubai, the son of Hezron (1 Chr. ii. 49).[a] [CALEB.] W. A. W

ACH'SAH (עַכְסָה [*anklet*]: Ἀσχά; [Alex Comp. in Josh., Αχσα: *Axa*), daughter of Caleb the son of Jephunneh, the Kenezite. Her father promised her in marriage to whoever should take Debir, the ancient name of which (according to the analogy of KIRJATH-ARBA, the ancient name of Hebron) was Kirjath-Sepher (or as in Josh. xv. 49, KIRJATH-SANNA), *the city of the book*. Othniel, her father's younger brother, took the city, and accordingly received the hand of Achsah as his reward. Caleb at his daughter's request added to her dowry the upper and lower springs, which she had pleaded for as peculiarly suitable to her inheritance in a south country (Josh. xv. 15–19. See

[a] * Achsa is merely an incorrect form which in modern editions of A. V. has been substituted for Achsah, the reading of the first and other early editions. A.

Digitized by Google

Stanley's *S. & P.* p. 161). [GULLOTH.] The story is repeated in Judg. i. 11–15. Achsah is mentioned again, as being the daughter of Caleb, in 1 Chr. ii. 49. But there is much confusion in the genealogy of Caleb there given. [ACHSA; CALEB.] A. C. H.

ACH'SHAPH (אַכְשָׁף [*fascination*, or *magic rites*]: Αζιφ [Vat. Αζειφ], Καιάψ [?] and Κεδφ; [Alex. Αχιφ, Αχσαφ; Comp. Χασδφ, Αχασδφ; Ald. Αχιάφ, Αχσάφ:] *Achsaph*, *Axaph*), a city within the territory of Asher, named between Beten and Alammelech (Josh. xix. 25); originally the seat of a Canaanite king (xi. 1, xii. 20). It is possibly the modern *Kesaf*, ruins bearing which name were found by Robinson (iii. 55) on the N. W. edge of the *Hûleh*. But more probably the name has survived in *Chaifa* [on the sea, at the foot of the north side of Mount Carmel], a town which, from its situation, must always have been too important to have escaped mention in the history, as it otherwise would have done. If this suggestion is correct, the LXX. rendering, Κεδφ, exhibits the name in the process of change from the ancient to the modern form. G.

ACH'ZIB (אַכְזִיב [*falsehood*]: Κεζιβ, [Vat. Κεζειβ; Alex. Αχζεκ, *a prima manu*] 'Αχζίβ; [Comp. 'Αχζίβ:] *Achzib*). 1. A city of Judah, in the Shefelah (SEPHELA), named with Keilah and Mareshah (Josh. xv. 44, Micah i. 14). The latter passage contains a play on the name: "The houses of Achzib (אַכְזִיב) shall be a lie (לְאַכְזָב)." It is probably the same with CHEZIB and CHOZEBA, which see.

2. [In Josh., 'Εχοζόβ; Alex. Αζειφ, **Αχζειφ (so Ald.); Comp. 'Αχαζίβ; — in Judg. 'Ασχαζί [Vat. -ζει]; Alex. Ασχενδει; Ald. 'Αχαζείβ; Comp. 'Ασχαζίβ.] A town belonging to Asher (Josh. xix. 29), from which the Canaanites were not expelled (Judg. i. 31); afterwards Ecdippa (Jos. *B. J.* i. 13, § 4, 'Εκδίππων). Josephus also (*Ant.* v. 1, § 22) gives the name as 'Αρκὴ ἡ καὶ 'Εκδίππους. Here was the *Casale Huberti* of the Crusaders (Schulz; Ritter, *Pal.* p. 782); and it is now *es-Zib*, on the sea-shore at the mouth of the *Nahr Herdawil*, 2 h. 20 m. N. of Akka (Robinson, iii. 628; and comp. Maundrell, p. 427). After the return from Babylon, Achzib was considered by the Jews as the northernmost limit of the Holy Land. See the quotations from the Gemara in Reland (p. 544). G.

ACI'PHA ('Αχιβά [Vat. -χει-]; Alex. Αχιφα; Ald. 'Ακιφά:] *Agista*). HAKUPHA (1 Esdr. v. 31). W. A. W.

ACRABATTI'NE. [ARABATTINE.]

ACTS OF THE APOSTLES (πράξεις ἀποστόλων, *Acta Apostolorum*), a second treatise (δεύτερος λόγος) by the author of the third Gospel, traditionally known as Lucas or Luke (which see). The identity of the writer of both books is strongly shown by their great similarity in style and idiom, and the usage of particular words and compound forms. The theories which assign the book to other authors, or divide it among several, will not stand the test of searching inquiry. They will be found enumerated in Davidson's Introd. to the N. T. vol. ii., and Alford's prolegomena to vol ii. of his edition of the Greek Testament. It must be confessed to be, at first sight, somewhat surprising that notices of the author are so entirely wanting, not only in the book itself, but also, generally in the Epistles of St. Paul, whom he must have accompanied for some years on his travels. But our surprise is removed when we notice the habit of the Apostle with regard to mentioning his companions to have been very various and uncertain, and remember that no Epistles were, strictly speaking, written by him while our writer was in his company, before his Roman imprisonment; for he does not seem to have joined him at Corinth (Acts xviii.), where the two Epp. to the Thess. were written, nor to have been with him at Ephesus, ch. xix., whence, perhaps, the Ep. to the Gal. was written; nor again to have wintered with him at Corinth, ch. xx. 3, at the time of his writing the Ep. to the Rom. and, perhaps, that to the Gal.

The book commences with an inscription to one Theophilus, who, from bearing the appellation κράτιστος, was probably a man of birth and station. But its design must not be supposed to be limited to the edification of Theophilus, whose name is prefixed only, as was customary then as now, by way of dedication. The readers were evidently intended to be the members of the Christian Church, whether Jews or Gentiles; for its contents are such as are of the utmost consequence to the whole church. They are *The fulfillment of the promise of the Father by the descent of the Holy Spirit and the results of that outpouring, by the dispersion of the Gospel among Jews and Gentiles.* Under these leading heads all the personal and subordinate details may be ranged. Immediately after the Ascension, St. Peter, the first of the Twelve, designated by our Lord as the Rock on whom the Church was to be built, the holder of the keys of the kingdom, becomes the prime actor under God in the founding of the Church. He is the centre of the first great group of sayings and doings. The opening of the door to Jews (ch. ii.) and Gentiles (ch. x.) is his office, and by him, in good time, is accomplished. But none of the existing twelve Apostles were, humanly speaking, fitted to preach the Gospel to the cultivated Gentile world. To be by divine grace the spiritual conqueror of Asia and Europe, God raised up another instrument, from among the highly-educated and zealous Pharisees. The preparation of Saul of Tarsus for the work to be done, the progress, in his hand, of that work, his journeyings, preachings, and perils, his stripes and imprisonments, his testifying in Jerusalem and being brought to testify in Rome, — these are the subjects of the latter half of the book, of which the great central figure is the Apostle Paul.

Any view which attributes to the writer as his chief design some collateral purpose which is served by the book as it stands, or, indeed, any purpose beyond that of writing a faithful history of such facts as seemed important in the spread of the Gospel, is now generally and very properly treated as erroneous. Such a view has become celebrated in modern times, as held by Baur; — that the purpose of the writer was to compare the two great Apostles, to show that St. Paul did not depart from the principles which regulated St. Peter, and to exalt him at every opportunity by comparison with St. Peter

Digitized by Google

The reader need hardly be reminded how little any such purpose is borne out by the contents of the book itself; nay, how naturally they would follow their present sequence, without any such thought having been in the writer's mind. Doubtless many ends are answered and many results brought out by the book as its narrative proceeds: as *e. g.* the rejection of the Gospel by the Jewish people everywhere, and its gradual transference to the Gentiles; and others which might be easily gathered up, and made by ingenious hypothesizers, such as Baur, to appear as if the writer were bent on each one in its turn as the chief object of his work.

As to the time when and place at which the book was written, we are left to gather them entirely from indirect notices. It seems most probable that the place of writing was Rome, and the time about two years from the date of St. Paul's arrival there, as related in ch. xxviii., *sub fin.* Had any considerable alteration in the Apostle's circumstances taken place before the publication, there can be no reason why it should not have been noticed. And on other accounts also, this time was by far the most likely for the publication of the book. The arrival in Rome was an important period in the Apostle's life: the quiet which succeeded it seemed to promise no immediate determination of his cause. A large amount of historic material had been collected in Judæa, and during the various missionary journeys; or, taking another and not less probable view, Nero was beginning to undergo that change for the worse which disgraced the latter portion of his reign: none could tell how soon the whole outward repose of Roman society might be shaken, and the tacit toleration which the Christians enjoyed be exchanged for bitter persecution. If such terrors were imminent, there would surely be in the Roman Church prophets and teachers who might tell them of the storm which was gathering, and warn them that the records lying ready for publication must be given to the faithful before its outbreak or event.

Such *à priori* considerations would, it is true, weigh but little against presumptive evidence furnished by the book itself; but arrayed, as they are, in aid of such evidence, they carry some weight, when we find that the time naturally and fairly indicated in the book itself for its publication is that one of all others when we should conceive that publication most likely.

This would give us for the publication the year 63 A. D., according to the most probable assignment of the date of the arrival of St. Paul at Rome.

The genuineness of the Acts of the Apostles has ever been recognized in the Church. It is mentioned by Eusebius (*H. E.* iii. 25) among the ὡλογούμεναι θεῖαι γραφαί. It is first directly quoted in the epistle of the churches of Lyons and Vienne to those of Asia and Phrygia (A. D. 177); then repeatedly and expressly by Irenæus, Clement of Alexandria, Tertullian, and so onwards. It was rejected by the Marcionites (cent. iii.) and Manichæans (cent. iv.) as contradicting some of their notions. In modern Germany, Baur and some others have attempted to throw discredit on it, and fix its publication in the second century, mainly by assuming the hypothesis impugned above, that it is an apology for St. Paul. But the view has found no favor, and would, ere this, have been forgotten, had it not been for the ability and subtlety of its chief supporter.

The text of the Acts of the Apostles is very full of various readings; more so than any other book of the N. T. To this several reasons may have contributed. In the many backward references to Gospel history, and the many anticipations of statements and expressions occurring in the Epistles, temptations abounded for a corrector to try his hand at assimilating, and, as he thought, reconciling the various accounts. In places where ecclesiastical order or usage was in question, insertions or omissions were made to suit the habits and views of the Church in aftertimes. Where the narrative simply related facts, any act or word apparently unworthy of the apostolic agent was modified for the sake of decorum. Where St. Paul repeats to different audiences, or the writer himself narrates the details of his miraculous conversion, the one passage was pieced from the other, so as to produce verbal accordance. There are in this book an unusual number of those remarkable interpolations of considerable length, which are found in the Codex Bezæ (D) and its cognates. A critic of some eminence, Bornemann, believes that the text of the Acts originally contained them all, and has been abbreviated by correctors; and he has published an edition in which they are inserted in full. But, while some of them bear an appearance of genuineness (as *e. g.* that in ch. xii. 10, where, after ἐξελθόντες, is added κατέβησαν τοὺς ἑπτὰ βαθμούς, καὶ) the greater part are unmeaning and absurd (*e. g.* that in ch. xvi. 39, where we read after ἐξελθεῖν, — εἰπόντες, Ἠγνοήσαμεν τὰ καθ' ὑμᾶς ὅτι ἐστὲ ἄνδρες δίκαιοι· καὶ ἐξαγαγόντες παρεκάλεσαν αὐτοὺς λέγοντες Ἐκ τῆς πόλεως ταύτης ἐξέλθατε μήποτε πάλιν συνστράφωσιν ἡμῖν ἐπικράζοντες καθ' ὑμῶν).

The most remarkable exegetical works and monographs on the Acts, beside commentaries on the whole N. T. [Alford, Wordsworth, DeWette, Meyer, Lechler in Lange's *Bibelwerk*], are Baumgarten, *Apostelgeschichte, oder der Entwickelungsgang der Kirche von Jerusalem bis Rom*, Halle, 1852 [2d ed. 1859, Eng. trans. Edinb. 1854; Zeller, *Die Apostelgeschichte nach ihrem Inhalt u. Ursprung krit. untersucht*, Stuttg. 1854, first publ. in the *Theol. Jahrb.* 1849–51; and] Lekebusch, *Die Composition und Entstehung der Apostelgeschichte von Neuem untersucht*, Gotha, 1854.

The former of these work is a very complete treatise on the Christian-historical development of the Church as related in the book: the latter is of more value as a critical examination of the various theories as to its composition and authorship. [Zeller's is the ablest attack on its genuineness and authenticity.]

Valuable running historical comments on the Acts are also found in Neander's *Pflanzung u. Leitung der Christlichen Kirche durch die Apostel*, 4th ed., Hamburg, 1847 [Eng. trans. by Ryland in Bohn's Stand. Library, 1851, revised and corrected by E. G. Robinson, N. Y. 1865]; Conybeare and Howson's *Life and Epistles of St. Paul*, 2d ed, Lond. 1856. Professed commentaries have been published by Mr. Humphry, Lond. 1847, [2d ed. 1854], and Professor Hackett, Boston, U. S. 1852 [enlarged ed. 1858, and Dr. J. A. Alexander, New York, 1857]. H. A.

* Some additional remarks will here be made upon the theory of the Tübingen school respecting the authorship of the book of Acts. This theory proceeds upon the assumption that Peter and the rest of the original disciples of Christ were Judaizers; *i. e.*, that they insisted upon the circumcision of the Gentile converts to Christianity, as an indispensable condition of fellowship. Consequently, according to Dr. Baur, Peter and Paul and the two branches of the church of which they were respectively the leaders were placed in a relation of hostility to one another. After the death of these Apostles, various attempts were made to produce a reconciliation between the opposing parties. The book of Acts, it is claimed, is the product of one of these irenical or compromising efforts. A Pauline Christian in the earlier part of the second century composes a half-fictitious history, with the design to present Paul in a favorable light to the Judaizers, and Peter in an equally favorable light to the adherents of Paul. Paul is represented as having circumcised Timothy, and as having in other points conformed to the Judaizing principles; whilst Peter, on the other hand, in the affair of Cornelius and on other occasions, and the Jerusalem Church (in the narrative of Apostolic convention, for example), are made out to agree almost with the tenets of Paul. One feature of Dr. Baur's system was the rejection of the genuineness of all the Pauline Epistles, save the two Epistles to the Corinthians, the Epistle to the Romans and that to the Galatians. The following remarks form the heads of a conclusive argument against the Tübingen theory.

1. Paul's general style of reference to the other Apostles, in the Epistles acknowledged to be genuine, is inconsistent with that theory. He and they form one company, and are partakers of common afflictions. See 1 Cor. iv. 9 *seq.*, 1 Cor. xv. *seq.* In the last passage (ver. 9) he styles himself "the least of the Apostles." When both Epistles were written, he was engaged in collecting contribution for "the saints" at Jerusalem. The last two chapters of the Epistle to the Romans, which show the friendship of Paul for the Jewish Christians, are, on quite insufficient grounds, denied to be genuine by Baur. There is no reasonable doubt of their genuineness.

2. Paul's account of his conference with the Apostles at Jerusalem (Gal. ii. 1 *seq.*) — the passage on which Baur chiefly relies for the establishment of his thesis — really overthrows it. The "false brethren" (ver. 4) were not Apostles, but the faction of Judaizers. Of the Apostles Peter, James, and John, he says (ver. 9) when they "perceived *the grace that was given unto me*, they gave to me and Barnabas *the right hand of fellowship*." The sincerity of this act of fellowship is proved, if proof were needed, by the arrangement made for the contribution for the poor, to be gathered by Paul from the Gentile Churches (ver. 10). The controversy with Peter (ver. 11 *seq.*) was not about a principle, but was occasioned by the circumstance that the latter did "not walk *uprightly*," or was false to his convictions. The circumcision of Timothy, as recorded in Acts, is not rendered improbable by the refusal of Paul (Gal. ii. 3) to circumcise Titus, since Titus was a heathen by birth, and Timothy was circumcised, not to comply with a demand of Judaizers, but to conciliate Jews. In the latter case, no principle was sacrificed; see 1 Cor. ix. 20. The right interpretation of Gal. ii. removes the objections brought to the credibility of the narrative, in Acts xv., of the Apostolic convention. In the light of this interpretation, the principal objections of the Tübingen school to the credibility of the book of Acts, as a whole, vanish. But some of the positive proofs of the genuineness of this book may be here briefly stated.

1. The testimony of the author, especially when we consider the form in which it is given. It is generally conceded that the third Gospel and Acts are by the same author. This author declares (Luke i. 2) that he derived his information from eye-witnesses and contemporaries. The passages in Acts (xvi. 11, xx. 5–15, xxi. 1–18, xxvii. 1, xxviii. 17) in which the writer speaks in the first person plural — the so-called "we" passages — prove him to have been a companion of Paul. The theory that Acts is a compilation of documents being untenable, we are obliged to suppose either that the writer was a participant in the events recorded, or that he has introduced a document, retaining the pronominal peculiarity *on purpose to deceive the reader*. This last hypothesis is advocated by Zeller. Bleek's theory that a document from Timothy is artlessly introduced without any notice to the reader, is refuted by the circumstance that, in language and style, the passages in question correspond with the rest of the book.

2. The moral spirit of the book is inconsistent with the ascription of it to forgery and intentional deception. See, for example, the narrative of Ananias and Sapphira.

3. The relation of Acts to the Pauline Epistles proves the genuineness and credibility of the former. Both the coincidences and diversities make up this proof. It is exhibited in part in Paley's *Horæ Paulinæ*. The Acts is seen to be an independent narrative.

4. An examination of the contents of the Acts will show the untenable character of the Tübingen hypothesis. See, for example, Acts i. 21, 22, where another Apostle is chosen *to fill up the number of the twelve*, — a passage which an author such as Baur describes would never have written. See also Acts xxi. 15 *seq.*, especially vers. 20, 21 where the believing Jews who are zealous for the

Digitized by Google

aw are declared to be "many thousands" (μυριάδες). See also Paul's denunciation of the Jews, Acts xxviii. 25 *seq.*

The historical discrepancies which the critics find in Acts are such as, if they were made out to exist, prove no "tendency" or partisan purpose in the work, but only show that the author, like other credible historians, is not free from inaccuracies. The speeches are doubtless given or reproduced in the language of Luke himself. Their historical credibility is shown by Tholuck (*Theol. Studien u. Kritiken*, 1839, II.).

In the defence of the Tübingen hypothesis, see Baur, *Das Christenthum u. die christliche Kirche der drei ersten Jahrhunderten*, 2e Ausg., 1860; also, his *Paulus;* and Zeller, *Die Apostelgeschichte.* In the refutation of this hypothesis, see Eduard Lekebusch, *Die Composition u. Entstehung der Apostelgeschichte*, 1854; Professor Hackett, *Commentary on the Acts*, revised ed. 1858 (both in the introduction and in the exegesis of the passages pertaining to the controversy); Meyer, *Apostelgeschichte;* Lightfoot, *Ep. to the Galatians*, Camb. 1865, Diss. iii. *St. Paul and the Three*, pp. 276–346; and Fisher's *Essays on the Supernatural Origin of Christianity*, New York, 1865.

ACU'A ('Ακούδ; [Ald. 'Ακουά:] *Accub*). AKKUB (1 Esdr. v. 30); comp. Ezr. ii. 45.

W. A. W.

A'CUB ('Ακούφ; Alex. Ακουμ; [Ald. 'Ακούβ:] *Accusu*). BAKBUK (1 Esdr. v. 31; comp. Ezr. ii. 15). W. A. W.

AD'ADAH (עֲדָעָדָה [*festival*]: 'Αρουήλ; [Alex. Comp. Ald. 'Αδαδά:] *Adada*), one of the cities in the extreme south of Judah named with Dimonah and Kedesh (Josh. xv. 22). It is not mentioned in the *Onomasticon* of Eusebius, nor has any trace of it been yet discovered.

A'DAH (עָדָה, *ornament, beauty:* 'Αδά: *Ada*). 1. The first of the two wives of Lamech, fifth in descent from Cain, by whom were born to him Jabal and Jubal (Gen. iv. 19, [20, 23]).

2. A Hittitess, daughter of Elon, one (probably the first) of the three wives of Esau, mother of his first-born son Eliphaz, and so the ancestress of six (or seven) of the tribes of the Edomites (Gen. xxxvi. 2, [4,] 10 ff. 15 ff.). In Gen. xxvi. 34, she is called BASHEMATH. F. W. G.

ADA'IAH [3 syl.] (עֲדָיָה [*whom Jehovah adorns*]: 'Εδεϊά; [Vat. Εδεινα;] Alex. Ιεδιδα: *Hadaïa*). 1. The maternal grandfather of King Josiah, and native of Boscath in the lowlands of Judah (2 K. xxii. 1).

2. ('Αδαΐ; [Vat. Αζεια;] Alex. Αδαια: *Adaïa.*) A Levite, of the Gershonite branch, and ancestor of Asaph (1 Chr. vi. 41). In ver. 21 he is called IDDO.

3. ('Αδαΐα; [Vat. Αβια;] Alex. Αλαια: *Adaïa.*) A Benjaminite, son of Shimhi (1 Chr. viii. 21), who is apparently the same as Shema in ver. 13.

4. (Alex. Σαδιας, Αδαια: *Adaïus, Adaïa.*) A priest, son of Jeroham (1 Chr. ix. 12; Neh. xi. 12), who returned with 242 of his brethren from Babylon.

5. ('Αδαΐας: *Adaïa.*) One of the descendants of Bani, who had married a foreign wife after the return from Babylon (Ezr. x. 29). He is called IKDEUS in 1 Esdr. ix. 30.

6. ('Αδαΐα; Alex. Αδαιας; FA. Αδειαμ: *Adaïas.* The descendant of another Bani, who had also taken a foreign wife (Ezr. x. 39.)

7. (Alex. Αχαια; [Vat.] FA. Δαλεα: *Adaïa.*) A man of Judah of the line of Pharez (Neh. xi. 5)

8. (עֲדָיָהוּ: 'Αδία; [Vat. 'Αζεια, 2. m. Αδεια;] Alex. Αδαια: *Adaïas.*) Ancestor of Maaseiah one of the captains who supported Jehoiada (2 Chr. xxiii. 1). W. A. W.

ADA'LIA (אַדַלְיָא: Βαρεά; [Vat. M. Βαρσα; Alex. FA. Βαρελ; Comp. 'Αδαλιά:] *Adalia*), a son of Haman (Esth. ix. 8).

* He was massacred by the Jews, together with nine other sons of Haman, in the palace of the Persian king at Shushan, on Haman's downfall and the elevation of Mordecai to his place as chief minister of state (Esth. ix. 6–10). The name is Persian, though the father was probably an Amalekite. H.

AD'AM (אָדָם: 'Αδάμ: *Adam*), the name which is given in Scripture to the first man. The term apparently has reference to the ground from which he was formed, which is called *Adamah* (אֲדָמָה, Gen. ii. 7). The idea of *redness of color* seems to be inherent in either word. (Cf. אָדֹם, Lam. iv. 7; אָדֹם, *red,* אֱדֹם *Edom*, Gen. xxv. 30; אֹדֶם, *a ruby:* Arab. ادم, *colore fusco præditus fuit, rubrum tinxit,* &c.) The generic term Adam, *man*, becomes, in the case of the first man, a denominative. Supposing the Hebrew language to represent accurately the primary ideas connected with the formation of man, it would seem that the appellation bestowed by God was given to keep alive in Adam the memory of his earthly and mortal nature; whereas the name by which he preferred to designate himself was *Ish* (אִישׁ, *a man of substance* or *worth*, Gen. ii. 23). The creation of man was the work of the sixth day. His formation was the ultimate object of the Creator. It was with reference to him that all things were designed. He was to be the "roof and crown" of the whole fabric of the world. In the first nine chapters of Genesis there appear to be three distinct histories relating more or less to the life of Adam. The first extends from Gen. i. 1 to ii. 3, the second from ii. 4 to iv. 26, the third from v. 1 to the end of ix. The word at the commencement of the two latter narratives, which is rendered there and elsewhere *generations*, may also be rendered *history.* The style of the second of these records differs very considerably from that of the first. In the first the Deity is designated by the word *Elohim;* in the second He is generally spoken of as *Jehovah Elohim.* The object of the first of these narratives is to record the creation; that of the second to give an account of paradise, the original sin of man and the immediate posterity of Adam; the third contains mainly the history of Noah, referring, it would seem, to Adam and his descendants, principally in relation to that patriarch.

The Mosaic accounts furnish us with very few materials from which to form any adequate conception of the first man. He is said to have been created in the image and likeness of God, and this

Digitized by Google

is commonly interpreted to mean some super-excellent and divine condition which was lost at the Fall· apparently, however, without sufficient reason, as the continuance of this condition is implied in the time of Noah, subsequent to the flood (Gen. ix. 6), and is asserted as a fact by St. James (iii. 9), and by St. Paul (1 Cor. xi. 7). It more probably points to the Divine pattern and archetype after which man's intelligent nature was fashioned; reason, understanding, imagination, volition, &c. being attributes of God; and man alone of the animals of the earth being possessed of a spiritual nature which resembled God's nature. Man, in short, was a spirit created to reflect God's righteousness and truth and love, and capable of holding direct intercourse and communion with Him. As long as his will moved in harmony with God's will, he fulfilled the purpose of his Creator. When he refused submission to God, he broke the law of his existence and fell, introducing confusion and disorder into the economy of his nature. As much as this we may learn from what St. Paul says of "the new man being renewed in knowledge after the image of Him that created him" (Col. iii. 10), the restoration to such a condition being the very work of the Holy Spirit of God. The name Adam was not confined to the father of the human race, but like *homo* was applicable to *woman* as well as *man*, so that we find it is said in Gen. v. 1, 2, "This is the book of the 'History' of Adam in the day that God created 'Adam,' in the likeness of God made He him, male and female created He them, and called *their* name Adam in the day when they were created."

The man Adam was placed in a garden which the Lord God had planted "eastward in Eden," for the purpose of dressing it and keeping it. It is of course hopeless to attempt to identify the situation of Eden with that of any district familiar to modern geography. There seems good ground for supposing it to have been an actual locality. It was probably near the source of a river which subsequently divided into four streams. These are mentioned by name: Pison is supposed by some to be the Indus, Gihon is taken for the Nile, Hiddekel is called by the LXX. here, and at Dan. x. 4, Tigris, and the fourth is Euphrates; but how they should have been originally united is unintelligible. Adam was permitted to eat of the fruit of every tree in the garden but one, which was called the "tree of the knowledge of good and evil." What this was it is also impossible to say. Its name would seem to indicate that it had the power of bestowing the consciousness of the difference between good and evil; in the ignorance of which man's innocence and happiness consisted. The prohibition to taste the fruit of this tree was enforced by the menace of death. There was also another tree which was called "the tree of life." Some suppose it to have acted as a kind of medicine, and that by the continual use of it our first parents, not created immortal, were preserved from death. (Abp. Whately.) While Adam was in the garden of Eden the beasts of the field and the fowls of the air were brought to him to be named, and whatsoever he called every living creature that was the name thereof. Thus the power of aptly designating objects of sense was possessed by the first man, a faculty which is generally considered as indicating mature and extensive intellectual resources. Upon the failure of a companion suitable for Adam among the creatures thus brought to him to be named, the Lord God caused a deep sleep to fall upon him, and took one of his ribs from him, which He fashioned into a woman and brought her to the man. Prof. S. Lee supposed the narrative of the creation of Eve to have been revealed to Adam in his deep sleep (Lee's *Job*, *Introd.* p. 16). This is agreeable with the analogy of similar passages, as Acts x. 10, xi. 5, xxii. 17. At this time they are both described as being naked without the consciousness of shame.

Such is the Scripture account of Adam prior to the Fall. There is no narrative of any condition superhuman or contrary to the ordinary laws of humanity. The first man is a true man, with the powers of a man and the innocence of a child. He is moreover spoken of by St. Paul as being "the figure, τύπος, of Him that was to come," the second Adam, Christ Jesus (Rom. v. 14). His human excellence, therefore, cannot have been superior to that of the Son of Mary, who was Himself the Pattern and Perfect Man. By the subtlety of the serpent, the woman who was given to be with Adam, was beguiled into a violation of the one command which had been imposed upon them. She took of the fruit of the forbidden tree and gave it to her husband. The propriety of its name was immediately shown in the results which followed: self-consciousness was the first fruits of sin; their eyes were opened and they knew that they were naked.[a] The subsequent conduct of Adam would seem to militate against the notion that he was in himself the perfection of moral excellence. His cowardly attempt to clear himself by the inculpation of his helpless wife bears no marks of a high moral nature even though fallen; it was conduct unworthy of his sons, and such as many of them would have scorned to adopt.[b] Though the curse of Adam's rebellion of necessity fell upon him, yet the very prohibition to eat of the tree of life after his transgression, was probably a manifestation of Divine mercy, because the greatest malediction of all would have been to have the gift of indestructible life superadded to a state of wretchedness and sin. When moreover we find in Prov iii. 18, that wisdom is declared to be a tree of life to them that lay hold upon her, and in Rev. ii. 7, xxii. 2, 14, that the same expression is applied to the grace of Christ, we are led to conclude that this was merely a temporary prohibition imposed till the Gospel dispensation should be brought in. Upon this supposition the condition of Christians now is as favorable as that of Adam before the Fall, and their spiritual state the same, with the

a * For an analysis of this first sin of the race, the nature of the temptation, and its effects on the mind of Adam, the reader will find Auberlen's remarks instructive (*Die göttliche Offenbarung*, i. 154 ff., translated in the *Bibl. Sacra*, xxii. 430 ff.). H.

b * The better view of interpreters is that Adam meant to cast the blame of his sin not so much on Eve as on his Maker for having given to him a woman whose example had led him into transgression. And in that disposition certainly he manifested only a trait of human character that has ever distinguished his descendants, namely, a proneness to find the cause of sin not in their own hearts, but in God's relations to them as having ordained the circumstances in which they act, and given to them the moral nature which they possess. In that remonstrance of the Apostle James (i. 13-15) against this self-exculpatory spirit "Let no man say when he is tempted, I am tempted of God," &c., we simply hear again the echo of Adam's defense in the garden, "The woman whom thou gavest to be with me" (Gen. iii. 12). H

Digitized by Google

single exception of the consciousness of sin and the knowledge of good and evil.

Till a recent period it has been generally believed that the Scriptural narrative supposes the whole human race to have sprung from one pair. It is maintained that the O. T. assumes it in the reason assigned for the name which Adam gave his wife after the Fall, namely, Eve, or Chavvah, *i. e. a living* woman, "because she was the mother of all living;" and that St. Paul assumes it in his sermon at Athens when he declares that God hath made of *one* blood *all* nations of men; and in the Epistle to the Romans, and first Epistle to the Corinthians, when he opposes Christ as the representative of redeemed humanity, to Adam as the representative of natural, fallen, and sinful humanity. But the full consideration of this important subject will come more appropriately under the article MAN.

In the middle ages discussions were raised as to the period which Adam remained in Paradise in a sinless state. To these Dante refers in the Paradiso, xxvi. 139–142: —

> "Nel monte, che si leva più dall' onda,
> Fu' io, con vita pura e disonesta,
> Dalla prim' ora a quella ch' è seconda,
> Come il Sol muta quadra, all' ora sesta."

Dante therefore did not suppose Adam to have been *more* than seven hours in the earthly paradise. Adam is stated to have lived 930 years: so it would seem that the death which resulted from his sin was the spiritual death of alienation from God. "In the *day* that thou eatest thereof thou shalt surely die:" and accordingly we find that this spiritual death began to work immediately. The sons of Adam mentioned in Scripture are Cain, Abel and Seth. It is implied, however, that he had others. S. L.

AD'AM (אָדָם = *earth*:[a] [Comp. Ald. Ἀδαμί:] *Adom*), a city on the Jordan "beside (מִצַּד) 'Zarthan,'" in the time of Joshua (Josh. iii. 16). It is not elsewhere mentioned, nor is there any reference to it in Josephus. The LXX. (both MSS.) [both in the Rom. ed. and the Alex. MS.] has ἕως μέρους Καριαθιαρίμ [Vat. Καθιαιρειν], a curious variation, in which it has been suggested (Stanley, *S. & P.* App. § 80, note) that a trace of Adam appears in αριμ, D being changed to R according to the frequent custom of the LXX.

Note. — The A. V. here follows the *Keri*, which, for תְּאָדָם = "by Adam," the reading in the Hebrew text or Chetib, has מֵאָדָם = "from Adam," an alteration which is a questionable improvement (Keil, p. 51). The accurate rendering of the text is "rose up upon a heap, very far off, by Adam, the city that is beside Zarthan" (Stanley, *S. & P.* p. 304, note). G.

AD'AMAH (אֲדָמָה [*earth*]: Ἀρμαλθ; [Alex. Comp. Ald. Ἀδαμί:] *Edema*), one of the "fenced cities" of Naphtali, named between Chinnereth and ha-Ramah (Josh. xix. 36). It was probably situated to the N. W. of the Sea of Galilee, but no trace of it has yet been discovered.

ADAMANT (יָהֲלֹם, *shâmîr*: ἀδαμάντινος: *adamas*[b]). The word *Shâmîr* occurs as a common noun eleven times in the O. T. In eight of these passages it evidently stands for some prickly plant, and accordingly it is rendered "briers"[c] by the A. V. In the three remaining passages (Jer. xvii. 1; Ez. iii. 9; Zech. vii. 12) it is the representative of some stone of excessive hardness, and is used in each of these last instances metaphorically. In Jer. xvii. 1, *Shâmîr* = "diamond" in the text of the A. V. "The sin of Judah is written with a pen of iron and with the point of a diamond," *i. e.* the people's idolatry is indelibly fixed in their affections, *engraved* as it were on the tablets of their hearts. In Ez. iii. 9, *Shâmîr* = "adamant." "As an adamant harder than flint have I made thy forehead, fear them not." Here the word is intended to signify that firmness of purpose with which the prophet should resist the sin of the rebellious house of Israel. In Zech. vii. 12, the Hebrew word = "adamant-stone" — "Yea, they made their hearts as an adamant-stone, lest they should hear the law," — and is used to express the hardness of the hearts of the Jews in resisting truth.

The LXX. afford us but little clue whereby to identify the mineral here spoken of, for in Ez. iii. 9 and in Zech. vii. 12 they have not rendered the Hebrew word at all, while the whole passage in Jer. xvii. 1–5 is altogether omitted in the Vatican MS.; the Alexandrine MS., however has the passage, and reads, with the versions of Aquila, Theodotion, and Symmachus, "with a nail of adamant."[d] "Adamant" occurs in the Apocrypha, in Ecclus. xvi. 16.

Our English "Adamant" is derived from the Greek,[e] and signifies "the unconquerable," in allusion, perhaps, to the hard nature of the substance, or, according to Pliny (xxxvii. 15), because it was supposed to be indestructible by fire.[f] The Greek writers[g] generally apply the word to some very hard metal, perhaps *steel*, though they do also use it for a mineral. Pliny, in the chapter referred to above, enumerates six varieties of *Adamas*. Dana (*Syst. Mineral.* art. *Diamond*) says that the word "Adamas was applied by the ancients to several minerals differing much in their physical properties. A few of these are *quartz*, *specular iron ore*, *emery*, and other substances of rather high degrees of hardness, which cannot now be identified." Nor does the English language attach any one definite meaning to *Adamant;* sometimes indeed we understand the *diamond*[h] by it, but it is often used vaguely to express any substance of im-

[a] Can the place have derived its name from the flat ground" (הָאֲדָמָה) which was in this very neighborhood — "between Succoth and Zartnan" (1 K. vii. 46)?

[b] Arab. الماس et شمور سامور, *i. q.* שְׁמִירָא, *adamas*. The Chaldee

[c] The word is then frequently associated with שַׁיִת, "thorns."

[d] ἐν ὄνυχι ἀδαμαντίνῳ, LXX. Alex.; "in ungue adamantino," Vulg.

[e] ἀ, δαμάω.

[f] It is incorrect to suppose that even the *diamond*, which is only pure carbon crystallized, is "invincible" by fire. It will burn, and at a temperature of 14° Wedgewood will be wholly consumed, producing carbonic acid gas.

[g] Comp. also Senec. *Hercul. Fur.* 807: "Adamante texto vincire."

[h] Our English *diamond* is merely a corruption of *adamant*. Comp. the French *diamante*.

Digitized by Google

penetrable hardness. Chaucer, Bacon, Shakespeare, use it in some instances for the *lodestone*.[a] In modern mineralogy the simple term *Adamant* has no technical signification, but *Adamantine Spar* is a mineral well known, and is closely allied to that which we have good reason for identifying with the *Shâmîr* or *Adamant* of the Bible.

That some hard cutting stone is intended can be shown from the passage in Jeremiah quoted above. Moreover the Hebrew root[b] (*Shâmar*, "to cut," "to pierce"), from which the word is derived, reveals the nature of the stone, the sharpness of which, moreover, is proved by the identity of the original word with a *brier* or *thorn*. Now since, in the opinion of those who have given much attention to the subject, the Hebrews appear to have been unacquainted with the true diamond,[c] it is very probable, from the expression in Ez. iii. 9, of "adamant *harder than flint*,"[d] that by *Shâmîr* is intended some variety of *Corundum*, a mineral inferior only to the diamond in hardness. Of this mineral there are two principal groups; one is crystalline, the other granular; to the crystalline varieties belong the indigo-blue sapphire, the red oriental ruby, the yellow oriental topaz, the green oriental emerald, the violet oriental amethyst, the brown adamantine spar. But it is to the granular or massive variety that the *Shâmîr* may with most probability be assigned. This is the modern *Emery*, extensively used in the arts for polishing and cutting gems and other hard substances; it is found in Saxony, Italy, Asia Minor, the East Indies, &c., and "occurs in boulders or nodules in mica slate, in talcose rock, or in granular limestone, associated with oxide of iron; the color is smoke-gray or bluish-gray; fracture imperfect. The best kinds are those which have a blue tint; but many substances now sold under the name of emery contain no corundum."[e] The Greek name for the emery is *Smyris* or *Smiris*,[f] and the Hebrew lexicographers derive this word from the Hebrew *Shâmîr*. There seems to be no doubt whatever that the two words are identical, and that by *Adamant* we are to understand the *emery-stone*,[g] or the uncrystalline variety of the *Corundum*.

The word SHAMIR occurs in the O. T. three times as a proper name — once as the name of a man[h] (1 Chr. xxiv. 24), and twice as the name of a town. The name of the town may have reference to the rocky nature of the situation, or to *briers* and thorns abundant in the neighborhood.[i]

W. H.

AD'AMI (אֲדָמִי ["humanus," *human*, or *Adamite*:] Ἀρμέ; [Alex. Ald. Ἀρμαί; Comp. Ἀδεμμί:] *Adami*), a place on the border of Naphtali, named after Allon bezaananim (Josh. xix. 33). By some it is taken in connection with the next name, han-Nekeb, but see Reland, p. 545. In the post-biblical times Adami bore the name of Damin.

A'DAR (accurately Addar, אַדָּר [*height*]: Ἀδράδα; [Alex. Ald. Comp. Ἀδδαράθ:] *Addar*), a place on the south boundary of Palestine and of Judah (Josh. xv. 3) which in the parallel list is called HAZAR-ADDAR.

A'DAR. [MONTHS.]

AD'ASA (Ἀδασά, LXX.; τὰ Ἀδασά, Jos.: *Adarsa*, *Adazer*), a place in Judæa, a day's journey from Gazera, and 30 stadia from Bethhoron (Jos. *Ant.* xii. 10, § 5). Here Judas Maccabæus encamped before the battle in which Nicanor was killed, Nicanor having pitched at Bethhoron (1 Macc. vii. 40, 45). In the Onomasticon it is mentioned as near Guphna [the Roman Gophna and present *Jufna*, 2½ miles north-west of Bethel. See OPHNI.]

AD'BEEL (אַדְבְּאֵל: Ναβδεήλ; [in 1 Chr., Vat. Ναβδαιηλ; Comp. Ἀβδηήλ; Ald. Αὐβδιήλ:] *Adbeel*; Ἀβδέηλος, Joseph.; "perhaps '*miracle of God*,' from אֵל, *miracle*," Gesen. *s. v.*) a son of Ishmael (Gen. xxv. 13; 1 Chr. i. 29), and probably the progenitor of an Arab tribe. No satisfactory identification of this name with that of any people or place mentioned by the Greek geographers, or by the Arabs themselves, has yet been discovered. The latter have lost most of the names of Ishmael's descendants between that patriarch and 'Adnán (who is said to be of the 21st generation before Mohammed), and this could scarcely have been the case if tribes, or places named after them, existed in the times of Arabian historians or relaters of traditions: it is therefore unlikely that

[a] Chaucer, *Romaunt of the Rose*, 1182; Shakespeare, *Mid. Night Dr.* Act ii. sc. 2, and *Troil. and Cress.* Act iii. sc. 2; Bacon's *Essay on Travel*.

[b] Fürst's *Concordantiæ*, שָׁמַר, *incidere, impingere*. But Gesenius, *Thes.* sub voc. שָׁמַר, *i. q.* סמר, שׁמם, *horruit, riguit*. Whence Arab. سمر, *Samur*, "an Egyptian thorn" (see Forskål, *Fl. Æg. Ar.* cxxiii. 176), and سامور, *adamas*. See Freytag, *Lex. Arab.* s. v.

[c] Dana says that the method of polishing diamonds was first discovered in 1456 by Louis Bergnen, a citizen of Bruges, previous to which time the diamond was only known in its native uncut state. It is quite clear that *Shâmîr* cannot mean *diamond*, for if it did the word would be mentioned with precious stones; but this is not the case.

[d] דָּיָמָן מְצֹר. That צֹר, though it may sometimes be applied to "rock" generally, yet sometimes = *flint*, or some other variety of *quartz*, seems clear from Ex. iv. 25: — "Then Zipporah took a sharp *stone*" (צֹר), *Tsôr*. That flint knives were in common use amongst Eastern nations is well known. Compare that very interesting verse of the LXX., Josh. xxiv. 31.

[e] Austed's *Mineralogy*, § 394.

[f] σμύρις, or σμίρις, σμίρις est ἄμμου εἶδος (Hesychius): σμίρις λίθος ἐστί (Dioscor. v. 165). Both statements are correct; the one refers to the *powder*, the other to the *stone*. The German *Smirgel*, or *Schmirgel*, is evidently allied to the Hebrew or Greek words. Bohlen considers the Hebrew word to be of Indian origin, comparing *asmira*, a stone which eats away iron. Doubtless all these words have a common origin.

[g] This is probably the same stone which Herodotus (vii. 69) says the Æthiopians in the army of Xerxes used instead of iron to point their arrows with, and by means of which they engraved seals.

[h] In the Keri. The Chethîb has יִמְרָה, *Shâmûr*

[i] It will be enough merely to allude to the Rabbinical fable about Solomon, the Hoopoe, and the *worm Shâmir*. See Bochart's *Hierozoicon*, vol. iii. p. 842 ed. Rosenmüller, and Buxtorf, *Lex. Talmud.* col. 2455

these names are to be recovered from the works of native authors. But some they have taken, and apparently corrupted, from the Bible; and among these is Adbeel, written (in the *Mir-át ez-Zemán*) ازبل. E. S. P.

ADDAN (אַדָּן [*strong*]: Ἀδδαν, LXX.; Ἀαλδρ [Vat. Αλλαρ, Alex. Αλαρ], Apocr. 1 Esdr.: *Adon*, Vulg.), one of the places from which some of the captivity returned with Zerubbabel to Judæa who could not show their pedigree as Israelites (Ezr. ii. 59). In the parallel lists of Nehemiah (vii. 61) and Esdras the name is ADDON and AALAR. G.

* Perhaps the name Aalar in 1 Esdr. v. 36 corresponds to IMMER in Ezra and Nehemiah. It appears in Esdras as the name of a man. See CHARAATHALAR. A.

ADDAR (אַדָּר: Ἀδδάρ; [Vat. Αλει; Alex. Αρεδ; Comp. Ἀδδρ:] *Addar*), son of Bela (1 Chr. viii. 3), called ARD in Num. xxvi. 40.

ADDER. This word in the text of the A. V. is the representative of four distinct Hebrew names, mentioned below. It occurs in Gen. xlix. 17 (margin, *arrow-snake*); Ps. lviii. 4 (margin, *asp*); xci. 13 (margin, *asp*); Prov. xxiii. 32 (margin, *cockatrice*); and in Is. xi. 8, xiv. 29, lix. 5, the margin has *adder*, where the text has *cockatrice*. Our English word *adder* is used for any poisonous snake, and is applied in this general sense by the translators of the A. V.[a] They use in a similar way the synonymous term *asp*.

1. *Acshûb* (עַכְשׁוּב: ἀσπίς: *aspis*) is found only in Ps. cxl. 3: "They have sharpened their tongues like a serpent, adder's poison is under their lips." The latter half of this verse is quoted by St. Paul from the LXX. in Rom. iii. 13. The poison of venomous serpents is often employed by the sacred writers in a figurative sense to express the evil tempers of ungodly men — that malignity which, as Bishop Horne says, is "the venom and poison of the intellectual world" (comp. Deut. xxxii. 33; Job xx. 14, 16).

It is not possible to say with any degree of certainty what particular species of serpent is intended by the Hebrew word; the ancient versions do not help us at all, although nearly all agree in some kind of serpent, with the exception of the Chaldee paraphrase, which understands a *spider* by *Acshûb*, interpreting this Hebrew word by one of somewhat similar form.[b] The etymology of the term is not ascertained with sufficient precision to enable us to refer the animal to any determinate species. Gesenius derives it from two Hebrew roots,[c] the combined meaning of which is "rolled in a spire and lying in ambush;" a description which would apply to almost any kind of serpent.

The number of poisonous serpents with which the Jews were acquainted was in all probability limited to some five or six species [SERPENT], and as there are reasonable grounds for identifying *Pethen* and *Shephiphôn* with two well known species, viz. the Egyptian Cobra and the Horned Viper, it is not improbable that the *Acshûb* may be represented by the *Toxicoa* of Egypt and North Africa. At any rate it is unlikely that the Jews were unacquainted with this kind, which is common in Egypt and probably in Syria: the *Echis arenicola* therefore, for such is this adder's scientific name may be identical in name and reality with the animal signified by the Hebrew *Acshûb*.

Toxicoa, of Egypt.

Colonel Hamilton Smith suggests that the *Acshûb* may be the puff or spooch-adder of the Dutch colonists at the Cape of Good Hope, or that of Western Africa; but it has never been shown that the Cape species (*Clotho arietans*) or the W. African species (*Clotho lateristriga*), the only two hitherto known, are either of them inhabitants of a district so far north and east as Egypt.

2. *Pethen* (פֶּתֶן). [ASP.]

3. *Tsepha*, or *Tsiphôni* (צֶפַע, צִפְעֹנִי: ἔκγονα ἀσπίδων, κερδστης: *regulus*) occurs five times in the Hebrew Bible. In Prov. xxiii. 32 it is translated *adder*, and in the three passages of Isaiah quoted above, as well as in Jer. viii. 17, it is rendered *cockatrice*. The derivation of the word from a root which means "to hiss" does not help us at all to identify the animal. From Jeremiah we learn that it was of a hostile nature, and from the parallelism of Is. xi. 8, it appears that the *Tsiphôni* was considered even more dreadful than the *Pethen*. Bochart, in his *Hierozoicon* (iii. 182, ed. Rosenmüller), has endeavored to prove that the *Tsiphôni* is the *Basilisk* of the Greeks (whence Jerome in Vulg. reads *Regulus*), which was then supposed to destroy life, burn up grass, and break stones by the pernicious influence of its breath (comp. Plin. *H. N.* viii. c. 33); but this is explaining an "ignotum per ignotius."

The whole story of the Basilisk is involved in fable, and it is in vain to attempt to discover the animal to which the ancients attributed such terrible power. It is curious to observe, however, that Forskål (*Descr. Animal.* p. 15) speaks of a kind of serpent (*Coluber Hölleik* is the name he gives it) which he says produces irritation on the spot touched by its breath; he is quoting, no doubt, the

[a] *Adder*, in systematic soölogy, is generally appused to those genera which form the family *Viperidæ*; — *Asp*, to the *Vipera Aspis* of the Alps.

[b] עַכְבִישׁ, *Acchibish*.

[c] *Thes* sub voc.: — עָכַשׁ, *retrorsum se flexit*, and עָקַב, *insidiatus est*. Alii Arab. *kathaba* (impetum facere), vel etiam *gashab* (venenum) comferunt. (Fürst.)

Digitized by Google

opinion of the Arabs. Is this a relic of the *Basilikan* fable? This creature was so called from a mark on its head, supposed to resemble a kingly crown. Several serpents, however, have peculiar markings on the head — the varieties of the Spectacle-Cobras of India, for example — so that identification is impossible. As the LXX. make use of the word Basilisk (Ps. xc. 13; xci. 13, A. V.) it was thought desirable to say this much on the subject.[a]

It is possible that the *Tsiphóni* may be represented by the Algerine adder (*Clotho mauritanica*) but it must be confessed that this is mere conjecture. Dr. Harris, in his *Natural History of the Bible*, erroneously supposes it to be identical with the *Rajah zephen* of Forskâl, which, however, is a fish (*Trigon zephen*, Cuv.), and not a serpent.

Algerine Adder. (British Museum.)

4. *Shephiphôn* (שְׁפִיפֹן: ἐγκαθήμενος: *cerastes*) occurs only in Gen. xlix. 17, where it is used to characterize the tribe of Dan: "Dan shall be a serpent by the way, an adder in the path, that biteth the horse's heels, so that his rider shall fall backward." Various are the readings of the old versions in this passage: the Samaritan interprets *Shephiphôn* by "lying in wait;" the Targums of Jonathan, of Onkelos, and of Jerusalem, with the Syriac, "a basilisk."[b] The Arabic interpreters Erpenius [i. e. the anonymous version edited by Erpenius] and Saadias have "the horned snake;"[c] and so the Vulg. *Cerastes*. The LXX., like the Samaritan, must have connected the Hebrew term with a word which expresses the idea of "sitting in ambush." The original word comes from a root which signifies "to prick," "pierce," or "bite."[d]

The habit of the *Shephiphôn*, alluded to in Jacob's prophecy, namely, that of lurking in the sand and biting at the horse's heels,[e] suits the character of a well-known species of venomous snake, the celebrated horned viper, the asp of Cleopatra (*Cerastes Hasselquistii*), which is found abundantly in the sandy deserts of Egypt, Syria, and Arabia. The Hebrew word *Shephiphôn* is no doubt identical with the Arabic *Siffon*. if the translation of this Arabic word by Golius be compared with the description of the Cerastes in the British Museum, there will appear good reason for identifying the *Shephiphôn* of Genesis with the *Cerastes* of naturalists. "*Siffon*, serpentis genus leve, punctis maculisque distinctum" — "a small kind of serpent marked with dots and spots" (Golius, *Arab. Lex.* s. v.). "The *Cerastes* (*Cerastes Hasselquistii*), brownish white with pale brown irregular unequal spots" (*Cat. of Snakes in Brit. M.* pt. i. 29). It is not pretended that the mere fact of these two animals being *spotted* affords sufficient ground, when taken alone, for asserting that they are identical, for many serpents have this character in common; but, when taken in connection with what has been adduced above, coupled with the fact that this spotted character belongs only to a very few kinds common in the localities in question, it does at least form strong presumptive evidence in favor of the identity of the *Shephiphôn* with the *Cerastes*. The name of *Cerastes* is derived from a curious hornlike process above each eye in the male,[f] which gives it a formidable appearance. Bruce, in his *Travels in Abyssinia*, has given a very accurate and detailed account of these animals. He observes that he found them in greatest numbers in those parts which were frequented by the jerboa, and that in the stomach of a Cerastes he discovered the remains of a jerboa. He kept two of these snakes in a glass vessel for two years without any food. Another circumstance mentioned by Bruce throws some light on the assertions of ancient authors as to the movement of this snake. Ælian,[g] Isidorus,

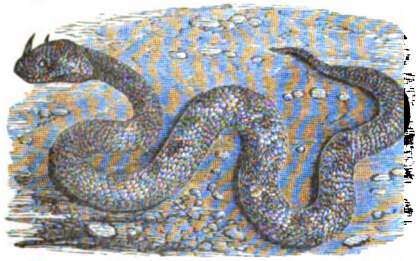
[a] The *Basilisk* of naturalists is a most forbidding-looking yet harmless *lizard* of the family *Iguanidæ*, order *Sauria*. In using the term, therefore, care must be taken not to confound the mythical serpent with the veritable Saurian.

[b] חורמן (*Hûrman*), *perniciosus*, from חרם, "to destroy." "Ita R. Salom. Chaldæum explicat, Onkelos autem reddit, *Sicut serpens Hurman, quod est nomen serpentis cujusdam, cujus morsus est insanabilis; is autem est basiliscus* יְקַטְּלוּנִי." (*Crit. Sacri*, i. 1114.)

[c] حية قرناء. [This is not the rendering of the versions referred to, which have معرون. A.]

[d] From שָׁפַף, *pungere, mordere*, according to Fürst and A. Schultens; but Gesenius denies this meaning, and compares the Syr. ܫܦܦ, "to glide," "to creep."

[e] ἐν δ' ἀμάθοισιν
Ἕρπει καὶ ἁμαρυχίῃσι κατὰ στίβον ἐνδυκὲς αὔει.
Nicander, *Theriac.* 268.



[f] The female, however, is supposed sometimes to possess these horns. Hasselquist (*Itiner.* pp. 241, 365) has thus described them: — "Tentacula duo, utrinque unum ad latera verticis, in margine superiori orbitæ oculi, erecta, parte aversa parum arcuata, eademque parte parum canaliculata, sub-dura, membrana tenaci vestita, basi squamis minimis, una serie erectis, cincta, brevia, orbitæ oculorum dimidia longitudine."

With this description that of Geoffroy St. Hilaire may be compared: — "Au dessus des yeux naît de chaque côté une petite éminence, ou comme on a coutume de la dire une petite corne, longue de deux ou trois lignes, présentant dans le sens de sa longueur des sillons et dirigée en haut et un peu en arrière, d'où le nom de *Céraste*. La nature des cornes du Céraste est très peu connue, et leurs usages, si toutefois elles peuvent être de quelque utilité pour l'animal, sont entièrement ignorés."

[g] Λεξὸν δὲ οἶμαι πρότερον Ælian, *De Anim.* xv 13)

Digitized by Google

Aëtius, have all recorded of the Cerastes that, whereas other serpents creep along in a straight direction, this one and the *Hæmorrhous*[a] (no doubt the same animal under another name) move sideways, stumbling as it were on either side (and comp. Bochart).[b] Let this be compared with what Bruce says: "The Cerastes moves with great rapidity and in all directions, forwards, backwards, *sideways;* when he inclines to surprise any one who is too far from him, he *creeps with his side towards the person*," &c., &c. The words of Ibn Sina, or Avicenna, are to the same effect. It is right, however, to state that nothing unusual has been observed in the mode of progression of the Cerastes now in the gardens of the Zoological Society; but of course negative evidence in the instance of a specimen not in a state of nature does not invalidate the statement of so accurate an observer as Bruce.

The Horned Cerastes. (From specimen in British Museum.)

The Cerastes is extremely venomous; Bruce compelled one to scratch eighteen pigeons upon the thigh as quickly as possible, and they all died nearly in the same interval of time. It averages 12 to 15 inches in length, but is occasionally found larger. It belongs to the family *Viperidæ*, order *Ophidia*.[c] [SERPENT.]

From the root *Shaphaph* are possibly derived the proper names of SHUPHAM, whence the family of the SHUPHAMITES, SHEPHUPHAN, and SHUPPIM. W. H.

ADDI ('Αδδί [Tisch. Treg. 'Αδδεί]). 1. Son of Cosam, and father of Melchi, in our Lord's genealogy (Luke iii. 28); the third above Salathiel. The etymology and Hebrew form of the name are doubtful, as it does not occur in the LXX., but it probably represents the Hebrew עֲדִי, an *ornament*, and is a short form of Adiel, or Adaiah. The latter name in 1 Chr. vi. 41 (26 in Heb. Bib.) is rendered in the [Roman edition of the] Septuagint 'Αδαΐ, which is very close to Addi. A. C. H.

2. ('Αδδί; [Vat. Αδδειν:] *Addin.*) This name occurs in a very corrupt verse (1 Esdr. ix. 31), apparently for ADNA (Ezra x. 30). W. A. W.

ADDO ('Αδδώ; [Vat. Εδδειν:] *Addin*). IDDO, the grandfather of the prophet Zechariah (1 Esdr. vi. 1). W. A. W.

[a] Δοχμὰ δ' ἐπισπάζων ὀλίγον δέμας, οἷα κεράστης (Nicander, *Theriac.* 294).

[b] Bochart (*Hieroz.* iii. 209, Rosenm.) says that the Rabbins derive שְׁפִיפֹן from שׁפף, *claudicare*, wherefore שִׁפּוּר is *claudus*.

[c] The celebrated John Ellis seems to have been the first Englishman who gave an accurate description of the Cerastes (see *Philosoph. Transact.* 1766).

ADDON. [ADDAN.]

* This varied orthography, says Fürst (*Handwb* p. 17) is owing to a dialectic difference which pronounced ־ as *o*. H.

ADDUS ('Αδδούς: *Addus*). 1. The sons of Addus are enumerated among the children of Solomon's servants who returned with Zorobabel (1 Esdr. v. 34); but the name does not occur in the parallel lists of Ezra or Nehemiah.

2. ('Ιαδδού; [Vat. Ιαδδους;] Alex. Ιοδδους; [Ald. 'Αδδούς:] *Addin.*) A priest whose descendants, according to 1 Esdr., were unable to establish their genealogy in the time of Ezra, and were removed from their priesthood (1 Esdr. v. 38). He is said to have married Augia, the daughter of Berzelus or Barzillai. In Ezra and Nehemiah he is called by his adopted name Barzillai, and it is not clear whether Addus represents his original name or is a mere corruption. W. A. W.

ADER (עֶדֶר [*in pause* עָדֶר, *a flock*]: Εδερ; [Vat. Ωδηδ;] Alex. Ωδερ: *Heder*). A Benjamite, son of Beriah, chief of the inhabitants of Aijalon (1 Chr. viii. 15). The name is, more correctly, EDER. W. A. W.

ADIDA ('Αδιδά; [Sin. Αδειδα, Αδειντα or -νοι;] Joseph. Ἄδιδα: *Addus, Adiada*), a town on an eminence (*Ant.* xiii. 6, § 4) overlooking the low country of Judah ('A. ἐν τῇ Σεφήλᾳ), fortified by Simon Maccabæus in his wars with Tryphon (1 Macc. xii. 38, xiii. 13). Alexander was here defeated by Aretas (*Ant.* xiii. 15, § 2); and Vespasian used it as one of his outposts in the siege of Jerusalem (*B. J.* iv. 9, § 1). Probably identical with HADID and ADITHAIM (which see) G.

ADIEL (עֲדִיאֵל [*ornament of God*]: Ιεδιήλ; [Vat. corrupt;] Alex. Εδιηλ; [Comp. 'Αδιήλ:] *Adiel*). 1. A prince of the tribe of Simeon, descended from the prosperous family of Shimei (1 Chr. iv. 36). He took part in the murderous raid made by his tribe upon the peaceable Hamite shepherds in the valley of Gedor, in the reign of Hezekiah.

2. ('Αδιήλ.) A priest, ancestor of Maasiai (1 Chr. ix. 12).

3. ('Οδιήλ; [Vat. Comp.] Alex. 'Ωδιήλ.) Ancestor of Azmaveth, David's treasurer (1 Chr. xxvii. 25). W. A. W.

ADIN (עָדִין [*delicate*]: 'Αδδίν, 'Αδίν [Vat. Αδιν, Αδειν] in Ezr., ['Αδινού, Αδίν in 1 Esdr.;] 'Ηδίν [Vat. Ηδειν] in Neh.: *Adin, Adan* in Ezr. viii. 6). Ancestor of a family who returned with Zerubbabel to the number of 454 (Ezr. ii. 15 [1 Esdr. v. 12]), or 655, according to the parallel list in Neh. vii. 20. Fifty-one more [251 according to 1 Esdr. viii. 32] accompanied Ezra in the second caravan from Babylon (Ezr. viii. 6). They joined with Nehemiah in a covenant to separate themselves from the heathen (Neh. x. 16). W. A. W.

ADINA (עֲדִינָא [*pliant*]: 'Αδινά; [Comp. Vat. FA. 'Αδεινά:] *Adina*). The son of Shiza, one of David's captains beyond the Jordan, and chief of the Reubenites (1 Chr. xi. 42). According to the A. V. and the Syriac, he had the command of thirty men; but the passage should be rendered "and over him were thirty," that is, the thirty before enumerated were his superiors, just as Benaiah was "above the thirty" (1 Chr. xxvii. 6). W. A. W

Digitized by Google

ADI'NO, THE EZNITE, 2 Sam. xxviii. 8. See JASHOBEAM.

ADI'NUS ('Ιαδινός; [Vat. Ιαδεινος; Ald. 'Αδινός:] *Jaddimus*). JAMIN the Levite (1 Esdr. ix. 48; comp. Neh. viii. 7). W. A. W.

ADITHA'IM (with the article, הַעֲדִיתַיִם [*the double booty*]: Comp. 'Αγεθθαΐμ; Ald. 'Αδιαγεθθαΐμ: *Adithaim*]), a town belonging to Judah, lying in the low country (*Shefelah*), and named, between Sharaim and Gederah (with the article), in Josh. xv. 36 only. It is entirely omitted by the [Vat. and Alex. MSS. of the] LXX. At a later time the name appears to have been changed to Hadid [a] (Chadid) and Adida. For the dual termination, comp. the two names occurring in the same verse; also Eglaim, Horonaim, etc. G.

ADJURATION [EXORCISM.]

ADLAI [dissyl.] (עַדְלָי [= עַדְלָיָהוּ, *justice of Jah*]: 'Αδλαί; [Vat.] Alex. Αδαι; [Comp. 'Αδλαΐ:] *Adli*). Ancestor of Shaphat, the overseer of David's herds that fed in the broad valleys (1 Chr. xxvii. 29). W. A. W.

ADMAH (אַדְמָה [*fortress*, Fürst]: 'Αδαμά: *Adama*), one of the "cities of the plain," always coupled with Zeboim (Gen. x. 19, xiv. 2 8; Deut. xxix. 23; Hos. xi. 8). It had a king of its own.

ADMATHA (אַדְמָתָא: [Μαλισεδρ; Vat. Alex. FA. Μαλησεαρ; Comp. 'Αδμαθά:] *Admatha*), one of the seven princes of Persia (Esth. i. 14).

ADNA (עַדְנָא [*pleasure*]: 'Εδνέ; [Vat. H. Εδαιε, Mai Αιδαιε:] *Edna*). 1. One of the family of Pahath-Moab who returned with Ezra, and married a foreign wife (Ezr. x. 30).

2. (Μαννάς; [Vat. Alex. om.; Comp. 'Εδνάς.]) A priest, descendant of Harim, in the days of Joiakim, the son of Jeshua (Neh. xii. 15). W. A. W.

ADNAH (עַדְנָה [*pleasure*]: 'Εδνά: *Ednas*). 1. A Manassite who deserted from Saul and joined the fortunes of David on his road to Ziklag from the camp of the Philistines (1 Chr. xii. 20).

2. ('Εδναε; [Vat.] Alex. Εδναας.) The commander-in-chief of 300,000 men of Judah, who were in Jehoshaphat's army (2 Chr. xvii. 14). W. A. W.

ADO'NI-BE'ZEK (אֲדֹנִי־בֶזֶק, *lord of Bezek*: 'Αδωνιβεζέκ: *Adonibesec*), king of Bezek, a city of the Canaanites. [BEZEK.] This chieftain was vanquished by the tribe of Judah (Judg. i. 3–7), who cut off his thumbs and great toes, and brought him prisoner to Jerusalem, where he died. He confessed that he had inflicted the same cruelty upon 70 petty kings whom he had conquered. R. W. B.

* Cassel in his note on Judg. i. 6 (*Richter u. Ruth*, p. 6), mentions some parallels to this barbarty, which show that it was not uncommon in ancient times. The form of the mutilation was not arbitrary, but chosen in order to render those who suffered it unfit for warlike service: henceforth they could neither wield the bow, nor stand firm in battle, or escape by flight. When the inhabitants of Ægina were conquered B. C. 456, the Athenians ordered their right thumbs to be cut off so that they might not be able to handle the spear, though as slaves they might pull the oar (Ælian, *Var. Hist.* ii. 9). The confession of the savage chief (Judg. i. 7) testifies to the natural sentiment that the wicked deserve to experience the sufferings which they themselves have inflicted on others (comp. Ps. vii. 15, 16). Adoni-bezek had humiliated as well as maimed his victims: "they had gathered their meat under his table" (Judg. i. 7, and comp. Matt. xv. 27). It is said of some of the Parthian kings that at table they threw food to their famished vassals, who would catch it up like dogs, and like dogs were beaten till blood flowed from them (Athen. *Deipn.* lib. iv. p. 152 d). Adoni-bezek is obviously not so much a proper name as a title. H.

* **ADON'ICAM, ADON'ICAN.** [ADONIKAM.]

ADONI'JAH (אֲדֹנִיָּהוּ, אֲדֹנִיָּה, *my Lord is Jehovah*: 'Αδωνίας: *Adonias*). 1. The fourth son of David by Haggith, born at Hebron, while his father was king of Judah (2 Sam. iii. 4). After the death of his three brothers, Amnon, Chileab, and Absalom, he became eldest son; and, when his father's strength was visibly declining, put forward his pretensions to the crown, by equipping himself in royal state, with chariots and horsemen, and fifty men to run before him, in imitation of Absalom (2 Sam. xv. 1) whom he also resembled in personal beauty, and apparently also in character, as indeed Josephus says (*Ant.* vii. 14, § 4). For this reason he was plainly unfit to be king, and David promised Bathsheba that her son Solomon should inherit the crown (1 K. i. 30), for there was no absolute claim of primogeniture in these Eastern monarchies. Solomon's cause was espoused by the best of David's counsellors, the illustrious prophet Nathan; Zadok, the descendant of Eleazar, and representative of the elder line of priesthood; Benaiah, the captain of the king's body-guard; together with Shimei and Rei, whom Ewald (*Geschichte*, iii. 266) conjectures to be David's two surviving brothers, comparing 1 Chr. ii. 13, and identifying שִׁמְעִי with שִׁמְעָה (*Shimmah* in our version), and רֵעִי with רַדַּי (our *Raddai*). From 1 K. ii. 8, it is unlikely that the Shimei of 2 Sam. xvi. 5 could have actively espoused Solomon's cause. On the side of Adonijah, who when he made his attempt on the kingdom was about 35 years old (2 Sam. v. 5), were Abiathar, the representative of Eli's, *i. e.* the junior line of the priesthood (descended from Ithamar, Aaron's fourth son), and Joab, the famous commander of David's army; the latter of whom, always audacious and self-willed, probably expected to find more congenial elements in Adonijah's court than in Solomon's. His name and influence secured a large number of followers among the captains of the royal army belonging to the tribe of Judah (comp. 1 K. i. 9 and 25); and these, together with all the princes except Solomon were entertained by Adonijah at a great sacrificial feast held "by the stone ZOHELETH, which is by Enrogel." The meaning of the stone Zoheleth is very doubtful, being translated *rock of the watch-tower* in the Chaldee; *great rock*, Syr. and Arab. and explained "*rock of the stream of water*" by R. Kimchi. En-rogel is mentioned in Josh. xv. 7 as a spring on the border of Judah and Benjamin

[a] If so, it is an instance of *Ain* changing to *Cheth* (see Ges. p. 426).

Digitized by Google

S. of Jerusalem, and may be the same as that afterwards called the Well of Job or Joab (*Ain Ayûb*). It is explained *spring of the fuller* by the Chaldee Paraphrast, perhaps because he treads his clothes with his feet (רָגַל, see Gesen. *s. v.*); but comp. Deut. xi. 10, where "watering with the feet" refers to machines trodden with the foot, and such possibly the spring of Rogel supplied. [EN-ROGEL.] A meeting for a religious purpose would be held near a spring, just as in later times sites for προσευχαί were chosen by the waterside (Acts xvi. 13).

Nathan and Bathsheba, now thoroughly alarmed, apprised David of these proceedings, who immediately gave orders that Solomon should be conducted on the royal mule in solemn procession to Gihon, a spring on the west of Jerusalem (2 Chr. xxxii. 30). [GIHON.] Here he was anointed and proclaimed king by Zadok, and joyfully recognized by the people. This decisive measure struck terror into the opposite party, and Adonijah fled to the sanctuary, but was pardoned by Solomon on condition that he should "shew himself a worthy man," with the threat that "if wickedness were found in him he should die" (i. 52).

The death of David quickly followed on these events; and Adonijah begged Bathsheba, who as "king's mother" would now have special dignity and influence [ASA], to procure Solomon's consent to his marriage with Abishag, who had been the wife of David in his old age (1 K. i. 3). This was regarded as equivalent to a fresh attempt on the throne [ABSALOM; ABNER]; and therefore Solomon ordered him to be put to death by Benaiah, in accordance with the terms of his previous pardon. Far from looking upon this as "the most flagrant act of despotism since Doeg massacred the priests at Saul's command" (Newman, *Hebrew Monarchy*, ch. iv.), we must consider that the clemency of Solomon in sparing Adonijah till he thus again revealed a treasonable purpose, stands in remarkable contrast with the almost universal practice of Eastern sovereigns. Any one of these, situated like Solomon, would probably have secured his throne by putting all his brothers to death, whereas we have no reason to think that any of David's sons suffered except the open pretender Adonijah, though all seem to have opposed Solomon's claims; and if his execution be thought an act of severity, we must remember that we cannot expect to find the principles of the Gospel acted upon a thousand years before Christ came, and that it is hard for us, in this nineteenth century, altogether to realize the position of an Oriental king in that remote age.

2. [Ald. Vat. Alex. Αδωνίαν.] A Levite in the reign of Jehoshaphat (2 Chr. xvii. 8).

3. [Αδανία; Alex. Αανα; Vat. FA. Εδανια; Ald. Ααvία: Comp. Αδονίας: *Adonia.*] One of the Jewish chiefs in the time of Nehemiah (x. 16). He is called Adonikam (אַדֹנִיקָם: Αδωνικάμ: *Adonicam*) in Ezr. ii. 13. Comp. Ezr. viii. 13; Neh. vii. 18. G. E. L. C.

ADONI'KAM (אַדֹנִיקָם [*lord of the enemy*, Ges.; or *lord who assists*, Fürst]. Αδωνικάμ [or -κάν; Vat. varies in each place]: *Adonicam*). The sons of Adonikam, 666 in number, were among those who returned from Babylon with Zerubbabel (Ezr. ii. 13; Neh. vii. 18; 1 Esdr. v. 14). In the last two passages the number is 667. The remainder of the family returned with Ezra (Ezr. viii. 13 1 Esdr. viii. 39). The name is given as ADONIJAH in Neh. x. 16. [In 1 Esdr. v. 14, A. V. ed. 1611, etc. reads Adonic*an*, and viii. 39, Adonic*am* — A.] W. A. W.

ADONI'RAM (אֲדֹנִירָם [*lord of exaltation*], 1 K. iv. 6; by an unusual contraction ADORAM, אֲדֹרָם, 2 Sam. xx. 24, and 1 K. xii. 18 also HADORAM, הֲדֹרָם, 2 Chr. x. 18: Αδωνιράμ; [Vat. -νει-, in 1 K. xii. Αραμ:] *Adoniram*, *Aduram*). Chief receiver of the tribute during the reigns of David (2 Sam. xx. 24), Solomon (1 K. iv. 6) and Rehoboam (1 K. xii. 18). This last monarch sent him to collect the tribute from the rebellious Israelites, by whom he was stoned to death. [See also 1 K. v. 14.] R. W. B.

ADO'NI-ZE'DEC (אֲדֹנִי־צֶדֶק, *lord of justice*: Αδωνιβεζέκ; [Comp. Αδωνισεδέκ:] *Adonisedec*), the Amorite king of Jerusalem who organized a league with four other Amorite princes against Joshua. The confederate kings having laid siege to Gibeon, Joshua marched to the relief of his new allies and put the besiegers to flight. The five kings took refuge in a cave at MAKKEDAH, whence they were taken and slain, their bodies hung on trees and then buried in the place of their concealment (Josh. x. 1–27). [JOSHUA.] R. W. B.

* Adoni-zedec (note the meaning) was no doubt the official name of the Jebusite kings at Jerusalem, as Pharaoh was that of the Egyptian kings, Agag that of the Amalekites, Jabin that of the Hazorites, and the like. See Hengstenberg's *Beiträge*, iii. 306, and Keil's *Buch Josua*, p. 171. H.

ADOPTION (υἱοθεσία), an expression metaphorically used by St. Paul in reference to the present and prospective privileges of Christians (Rom. viii. 15, 23; Gal. iv. 5; Eph. i. 5). He probably alludes to the Roman custom of adoption, by which a person not having children of his own might adopt as his son one born of other parents. It was a formal act, effected either by the process named *adrogatio*, when the person to be adopted was independent of his parent, or by *adoptio*, specifically so called, when in the power of his parent. (See *Dict. of Gr. and Rom. Ant.* art. ADOPTIO.) The effect of it was that the adopted child was entitled to the name and *sacra privata* of his new father, and ranked as his heir-at-law; while the father on his part was entitled to the property of the son, and exercised towards him all the rights and privileges of a father. In short the relationship was to all intents and purposes the same as existed between a natural father and son. The selection of a person to be adopted implied a decided preference and love on the part of the adopter; and St. Paul aptly transfers the well-known feelings and customs connected with the act to illustrate the position of the Christianized Jew or Gentile. The Jews themselves were unacquainted with the process of adoption: indeed it would have been inconsistent with the regulations of the Mosaic law affecting the inheritance of property. The instances occasionally adduced as referring to the custom (Gen. xv. 3, xvi. 2, xxx. 5–9) are evidently not cases of adoption proper. W. L. B.

ADO'RA or **A'DOR.** [ADORAIM.]

ADORA'IM (אֲדֹרַיִם: Αδωραί; [Alex. Αδ-

Digitized by Google

σοαΐμ:] *Adoraim*), a fortified city built by Rehoboam (2 Chr. xi. 9), in Judah [a] (Jos. *Ant.* viii. 10, § 1), apparently in or near the *Shefelah*, since, although omitted from the lists in Josh. xv. it is by Josephus (*Ant.* xiii. 9, § 1, 15, § 4; *B. J.* i. 2. § 6, i. 8, § 4) almost uniformly coupled with Mareshah, which was certainly situated there. For the dual termination compare Adithaim, Gederothaim, etc. By Josephus it is given as Ἄδωρα, Ἀδώρεος; and in *Ant.* xiii. 6, § 5, he calls it a "city of Idumæa," under which name were included, in the later times of Jewish history, the southern parts of Judæa itself (Reland, p. 48; Robinson, ii. 69). Adoraim is probably the same place with Ἄδωρα (1 Macc. xiii. 20), unless that be Dor, on the sea-coast below Carmel. Robinson identifies it with *Dûra*, a "large village" on a rising ground west of Hebron (ii. 215).

G.

* *Dûra* "is one of the largest villages in the district of Hebron, and is properly the chief place" (Rob. ii. 214). The name (from אָדַר, *to be great*) intimates that Adoraim had a similar importance: and the dual (Fürst, i. 22) implies that there was an upper and lower town, as there might so easily be, since the top of the hill overlooks the present *Dûra* on its slope. H.

ADO'RAM. [ADONIRAM.]

ADORATION. The acts and postures by which the Hebrews expressed adoration bear a great similarity to those still in use among Oriental nations. To rise up and suddenly prostrate the body, was the most simple method; but generally speaking, the prostration was conducted in a more formal manner, the person falling upon the knee and then gradually inclining the body until the forehead touched the ground. The various expressions in

Adoration. Modern Egyptian. (Lane.)

Hebrew referring to this custom appear to have their specific meaning: thus נָפַל (πίπτω, LXX.) describes the sudden fall; כָּרַע (κάμπτω, LXX.) bending the knee; חָדַד (κύπτω, LXX.) the inclination of the head and body; and lastly שָׁחָה (προσκυνεῖν, LXX.) complete prostration. The term בָּרַךְ (Is. xliv. 15, 17, 19, xlvi. 6) was introduced at a late period as appropriate to the worship paid to idols by the Babylonians and other eastern nations (Dan. iii. 5, 6). Such prostration was usual in the worship of Jehovah (Gen. xvii. 3; Ps. xcv. 6), but it was by no means exclusively used for that purpose; it was the formal mode of receiving visitors (Gen. xviii. 2), of doing obeisance to one of superior station (2 Sam. xiv. 4), and of showing respect to equals (1 K. ii. 19). Occasionally it was repeated three times (1 Sam. xx. 41), and even seven times (Gen. xxxiii. 3). It was accompanied by such acts as a kiss (Ex. xviii. 7), laying hold of the knees or feet of the person to whom the adoration was paid (Matt. xxviii. 9), and kissing the ground on which he stood (Ps. lxxii. 9: Mic. vii. 17). Similar adoration was paid to idols (1 K. xix. 18; sometimes, however, prostration was omitted, and the act consisted simply in kissing the hand to the object of reverence (Job xxxi. 27) in the manner practiced by the Romans (Pliny xxviii. 5: see *Dict. of Ant.* art. ADORATIO), in kissing the statue itself (Hos. xiii. 2). The same customs prevailed at the time of our Saviour's ministry, as appears not only from the numerous occasions on which they were put in practice towards Himself, but also from the parable of the unmerciful servant (Matt. xviii. 26), and from Cornelius's reverence to St. Peter (Acts x. 25), in which case it was objected to by the Apostle, as implying a higher degree of superiority than he was entitled to, especially as coming from a Roman to whom prostration was not usual. W. L. B.

ADRAM'MELECH [*Heb.* Adrammelech] (אַדְרַמֶּלֶךְ: Ἀδραμελέχ; [Alex. Ἀδραμελεκ:] *Adramelech*]. 1. The name of an idol worshipped by the colonists introduced into Samaria from Sepharvaim (2 K. xvii. 31). He was worshipped with rites resembling those of Molech, children being burned in his honor. In Gesenius (*sub voce*) the word is explained to mean *splendor of the king*, being a contraction of אֲדַר הַמֶּלֶךְ. But Winer, quoting Reland, *De rel. linguâ Pers.* ix. interprets the first part of the word to mean *fire*, and so regards this deity as the Sun-god, in accordance with the astronomical character of the Chaldæan and Persian worship. Sir H. Rawlinson also regards Adrammelech as the male power of the sun, and ANAMMELECH, who is mentioned with Adrammelech, as a companion-god, as the female power of the sun. (Rawlinson's *Herodotus*, i. 611.)

2. [Alex. in 2 K. Ἀδρεμελεχ.] Son of the Assyrian king Sennacherib, whom he murdered in conjunction with his brother Sharezer in the temple of Nisroch at Nineveh, after the failure of the Assyrian attack upon Jerusalem. The parricides escaped into Armenia (2 K. xix. 37; 2 Chr. xxxii. 21; Is. xxxvii. 38). The date of this event was B. C. 680. G. E. L. C.

ADRAMYT'TIUM (occasionally ATRAMYTTIUM: and some cursive MSS. have Ἀτραμυτηνῷ, instead of Ἀδραμυττηνῷ in Acts xxvii. 2), a seaport in the province of Asia [ASIA], situated in the district anciently called Æolis, and also Mysia (see Acts xvi. 7). Adramyttium gave, and still gives its name to a deep gulf on this coast, opposite to the opening of which is the island of Lesbos [MITYLENE]. St. Paul was never at Adramyttium, except, perhaps, during his second missionary journey, on his way from Galatia to Troas (Acts xvi.), and it has no Biblical interest, except as illustrating his voyage from Cæsarea in a ship belonging to

[a] Even without this statement of Josephus, it is plain that "Judah and Benjamin," in 2 Chr. xi. 10, is a form of expression for the new kingdom, and that none of the towns named are necessarily in the limits of Benjamin proper.

Digitized by Google

his place (Acts xxvii. 2). The reason is given in what follows, namely, that the centurion and his prisoners would thus be brought to the coasts of Asia, and therefore some distance on their way towards Rome, to places where some other ship bound for the west would probably be found. Ships of Adramyttium must have been frequent on this coast, for it was a place of considerable traffic. It lay on the great Roman road between Assos, Troas, and the Hellespont on one side, and Pergamus, Ephesus, and Miletus on the other, and was connected by similar roads with the interior of the country. According to tradition, Adramyttium was a settlement of the Lydians in the time of Crœsus. It was afterwards an Athenian colony. Under the kingdom of Pergamus it became a seaport of some consequence; and in the time of St. Paul Pliny mentions it as a Roman assize-town. The modern *Adramyti* is a poor village. but it is still a place of some trade and shipbuilding. It is described in the travels of Pococke, Turner, and Fellows. It is hardly worth while to notice the mistaken opinion of Grotius, Hammond, and others, that Hadrumetum on the coast of Africa is meant in this passage of the Acts. J. S. H.

A'DRIA, more properly **A'DRIAS** (ὁ Ἀδρίας: [*Adria*]). It is important to fix the meaning of this word as used in Acts xxvii. 27. The word seems to have been derived from the town of Adria, near the Po; and at first it denoted that part of the gulf of Venice which is in that neighborhood. Afterwards the signification of the name was extended so as to embrace the whole of that gulf. Subsequently it obtained a much wider extension, and in the apostolic age denoted that natural division of the Mediterranean, which Humboldt names the Syrtic basin (see Acts xxvii. 17), and which had the coasts of Sicily, Italy, Greece, and Africa for its boundaries. This definition is explicitly given by almost a contemporary of St. Paul, the geographer Ptolemy, who also says that Crete is bounded on the west by Adrias. Later writers state that Malta divides the Adriatic sea from the Tyrrhenian sea, and the isthmus of Corinth the Ægean from the Adriatic. Thus the ship in which Josephus started for Italy about the time of St. Paul's voyage, foundered in Adrias (*Life*, 3), and here he was picked up by a ship from Cyrene and taken to Puteoli (see Acts xxviii. 13). It is through ignorance of these facts, or through the want of attending to them, that writers have drawn an argument from this geographical term in favor of the false view which places the Apostle's shipwreck in the Gulf of Venice. [MELITA.] (Smith's *Voy. and Shipwreck of St. Paul. Diss. on the Island Melita.*) J. S. H.

A'DRIEL (עַדְרִיאֵל [*flock of God*]: [Comp.] Ἀδριήλ; [Rom. Ἐσδριήλ, Vat. Σερει (om. in 1 Sam.); Alex. Ισραηλ, Εσδρι; Ald. Ἐσδριήλ, Ἐσδρί:] *Hadriel*), a son of Barzillai the Meholathite, to whom Saul gave his daughter Merab, although he had previously promised her to David (1 Sam. xviii. 19). His five sons were amongst the seven descendants of Saul whom David surrendered to the Gibeonites (2 Sam. xxi. 8, 9) in satisfaction for the endeavors of Saul to extirpate the latter, although the Israelites had originally made a league with them (Josh. ix. 15). In 2 Sam. xxi. they are called the sons of Michal [the daughter of Saul and wife of David]; but as Michal had no children (2 Sam. vi. 23), the A. V., in order to surmount the difficulty, erroneously translates יָלְדָה "brought up," instead of "bare." This accords with the opinion of the Targum and Jewish authorities. The margin also gives "Michal's sister" for "Michal." Probably the error is due to some early transcriber.[a]

ADU'EL (Ἀδουήλ [Alex. FA. Ναυη], *i. e.* עַדִיאֵל, 1 Chr. iv. 36 (Ἰεδιήλ); ix. 12 (Ἀδιήλ), *the ornament of God*). A Naphtalite, ancestor of Tobit (Tob. i. 1).

B. F. W. and W. A. W.

ADULLAM (Apocr. ODOLLAM, עֲדֻלָּם [*justice of the people*, Ges.; but according to Simonis from עָדָה and עָלַם, hence *hiding-place*]: Ὀδολλάμ: [*Odollam, Odullam, Adullam*]), a city of Judah in the lowland of the *Shefelah*, Josh. xv. 35 (comp. Gen. xxxviii. 1, "Judah *went down*," and Micah i. 15, where it is named with Mareshah and Achzib); the seat of a Canaanite king (Josh. xii. 15), and evidently a place of great antiquity (Gen. xxxviii. 1, 12, 20). Fortified by Rehoboam (2 Chr. xi. 7), one of the towns reoccupied by the Jews after their return from Babylon (Neh. xi. 30), and still a city (Ὁ. πόλις) in the times of the Maccabees (2 Macc. xii. 38).

The site of Adullam has not yet been identified, but from the mention of it in the passages quoted above in proximity with other known towns of the *Shefelah*, it is likely that it was near *Deir Dubbân*, 5 or 6 miles N. of Eleutheropolis. (By Eusebius and Jerome, and apparently by the LXX. it is confounded with EGLON: see that name.) The limestone cliffs of the whole of that locality are pierced with extensive excavations (Robinson, ii. 23, 51–53), some one of which is possibly the "cave of Adullam," the refuge of David (1 Sam. xxii. 1; 2 Sam. xxiii. 13; 1 Chr. xi. 15; Stanley, *S. & P.* p. 259) Monastic tradition places the cave at *Khŭreitûn*, at the south end of the *Wady Urtâs*, between Bethlehem and the Dead Sea (Robinson, i. 481). G.

* No one who has seen the cave at *Khŭreitûn* can have any doubt of its fitness to be such a place of refuge as the cave of Adullam evidently was to David and his followers. For a description of this cavern see TEKOA. Dr. Thomson (*Land and Book*, ii. 424 f.) pleads still for the correctness of the popular opinion. David, who lived in the neighboring Bethlehem and had often driven his flocks over those hills, must have known of the existence of the cave and been familiar with the entrances to it. It was in a desert remote from the haunts of Saul, or if approached by him was incapable of any effectual assault. It was in the direction of Moab whither David, shortly before betaking himself to this retreat, had sent his parents and the women of his train. Stanley decides (*S. & P.* p. 254, *note*) that the cave *must* have been in the *Shefelah*, because the family of David "went down" to him there from Bethlehem (1 Sam. xxii. 1); but the expression may be used also of *Khŭreitûn*, which is nearly 2 hours S. E. of Bethlehem and over a path which *descends* rapidly almost the entire distance. That the town and the cave of Adullam are not near each other would be only an instance of the fact that the same name is often applied to different localities.

a * So also Thenius (*Die Bücher Samuels*, p. 230), accounts for the inconsistency. See further under MERAB.

Digitized by Google

David was certainly in the cave of Adullam when the "three chiefs" brought water to him from Bethlehem; and as it is said that the Philistines, through whom they forced their way for that purpose, were encamped at the time near Bethlehem (2 Sam. xxiii. 13, 14), we must infer that the cave itself was near Bethlehem, and not so far off as the border of the plain of Philistia.[a] H.

ADULLAMITE (עֲדֻלָּמִי [see ADULLAM]: Ὀδολλαμίτης; Alex. Οδολλαμειτης: *Odollamites*). A native of Adullam: applied to Hirah, the friend (or "shepherd" as the Vulgate has it, reading רֹעֵהוּ for רֵעֵהוּ) of Judah (Gen. xxxviii. 1, 12, 20). W. A. W.

ADULTERY. The parties to this crime were a married woman and a man who was not her husband. The toleration of polygamy, indeed, renders it nearly impossible to make criminal a similar offence committed by a married man with a woman not his wife. In the patriarchal period the sanctity of marriage is noticeable from the history of Abraham, who fears, not that his wife will be seduced from him, but that he may be killed for her sake, and especially from the scruples ascribed to Pharaoh and Abimelech (Gen. xii., xx.). The woman's punishment was, as commonly amongst eastern nations, no doubt capital, and probably, as in the case of Tamar's unchastity, death by fire (xxxviii. 24). The Mosaic penalty was that both the guilty parties should be stoned, and it applied as well to the betrothed as to the married woman, provided she were free (Deut. xxii. 22–24). A bondwoman so offending was to be scourged, and the man was to make a trespass offering (Lev. xix. 20–22).

The system of inheritances, on which the polity of Moses was based, was threatened with confusion by the doubtful offspring caused by this crime, and this secured popular sympathy on the side of morality until a far advanced stage of corruption was reached. Yet from stoning being made the penalty we may suppose that the exclusion of private revenge was intended. It is probable that, when that territorial basis of polity passed away — as it did, after the captivity — and when, owing to Gentile example, the marriage tie became a looser bond of union, public feeling in regard to adultery changed, and the penalty of death was seldom or never inflicted. Thus in the case of the woman brought under our Lord's notice (John viii.), it is likely that no one then thought of stoning her in fact, but there remained the written law ready for the purpose of the caviller. It is likely, also, that a divorce in which the adulteress lost her dower and rights of maintenance, &c. (*Gemara Chethuboth*, cap. vii. 6), was the usual remedy suggested by a wish to avoid scandal and the excitement of commiseration for crime. The word παραδειγματίσαι [δειγματίσαι Lachm., Tisch., Treg.] (Matt. i. 19), probably means to bring the case before the local Sanhedrim, which was the usual course, but which Joseph did *not* propose to take, preferring repudiation (Buxtorf, *de Spons. et Divort.* iii. 1–4), because that could be managed privately (λάθρα).

Concerning the famous trial by the waters of jealousy (Num. v. 11–29), it has been questioned whether a husband was, in case of certain facts bound to adopt it. The more likely view is, that it was meant as a relief to the vehemence of implacable jealousy to which Orientals appear prone, but which was not consistent with the laxity of the nuptial tie prevalent in the period of the New Testament. The ancient strictness of that tie gave room for a more intense feeling, and in that intensity probably arose this strange custom, which no doubt Moses found prevailing and deeply seated; and which is said to be paralleled by a form of ordeal called the "red water" in Western Africa (Kitto, *Cyclop.* s. v.). The forms of Hebrew justice all tended to limit the application of this test. 1. By prescribing certain facts presumptive of guilt, to be established on oath by two witnesses, or a preponderating but not conclusive testimony to the fact of the woman's adultery. 2. By technical rules of evidence which made proof of those presumptive facts difficult (*Sotah*, vi. 2–5). 3. By exempting certain large classes of women (all indeed, except a pure Israelitess married to a pure Israelite, and some even of them) from the liability. 4. By providing that the trial could only be before the great Sanhedrim (*Sotah*, i. 4). 5. By investing it with a ceremonial at once humiliating and intimidating, yet which still harmonized with the spirit of the whole ordeal as recorded in Num. v.; but 6. Above all, by the conventional and even mercenary light in which the nuptial contract was latterly regarded.

When adultery ceased to be capital, as no doubt it did, and divorce became a matter of mere convenience, it would be absurd to suppose that this trial was continued. And when adultery became common, as the Jews themselves confess, it would have been impious to expect the miracle which it supposed. If ever the Sanhedrim were driven by force of circumstances to adopt this trial, no doubt every effort was used, nay, was prescribed (*Sotah* i. 5, 6) to overawe the culprit and induce confession. Nay, even if she submitted to the trial and was really guilty, some rabbis held that the effect on her might be suspended for years through the merit of some good deed (*Sotah*, iii. 4–6). Besides, however, the intimidation of the woman, the man was likely to feel the public exposure of his suspicions odious and repulsive. Divorce was a ready and quiet remedy; and the only question was, whether the divorce should carry the dowry, and the property which she had brought; which was decided by the slight or grave character of the suspicions against her (*Sotah*, vi. 1; *Gemara Chethuboth*, vii. 6; Ugol. *Uxor Heb.* c. vii.). If the husband were incapable through derangement, imprisonment, &c., of acting on his own behalf in the matter, the Sanhedrim proceeded in his name as concerned the dowry, but not as concerned the trial by the water of jealousy (*Sotah*, iv. 6). H. H.

ADUM'MIM, "THE GOING UP TO" or "OF" (מַעֲלֵה אֲדֻמִּים: πρόσβασις Ἀδαμείν, [ἀνάβασις Αἰθαμείν; Alex. προσαναβασις Αδομμι, αναβ. Εδωμιν:] *ascensio* or *ascensus Adummim*) = the "pass of the red;" one of the landmarks of the boundary of Benjamin, a rising ground or pass "over against Gilgal," and "on the south side of the 'torrent'" (Josh. xv. 7, xviii. 17), which is

[a] * Since writing the above note, we find that Dr. Stanley is either not consistent with himself or has changed his opinion. In his article on DAVID in this *Dictionary* (§ ii. 3), and in his *Lectures on the Jewish Church* (ii. 69), he speaks without hesitation of the cave near *Khüreitún* as David's of Adullam. H

the position still occupied by the road leading up from Jericho and the Jordan valley to Jerusalem (Rob. i. 558 [a]), on the south face of the gorge of the *Wady Kelt*. Jerome (*Onom. Adommin*) ascribes the name to the blood shed there by the robbers who infested the pass in his day, as they still (Stanley, pp. 314, 424; Martineau, p. 481, Stewart) continue to infest it, as they did in the middle ages, when the order of Knights Templars arose out of an association for the guarding of this road, and as they did in the days of our Lord, of whose parable of the Good Samaritan this is the scene. But the name is doubtless of a date and significance far more remote, and is probably derived from some tribe of "red men' of the earliest inhabitants of the country (Stanley, p. 424, note). The suggestion of Keil that it refers to the "röthlichen Farbe des Felsen," is the conjecture of a man who has never been on the spot, the whole pass being of the whitest limestone. [Fürst derives the name in the first instance from the color (*red-brown*) of the earth in the hills.] G.

AËDI'AS ('Αϊδίας; [Vat. Αηδειας; Ald. Alex. 'Αηδίας:] *Helias*). 1 Esdr. ix. 27. Probably a corruption of ELIAH.

Æ'GYPT. [EGYPT.]

Æ'NEAS [so, correctly, A. V. ed. 1611, etc.; Eneas, later eds.] (Αἰνέας: *Æneas*), a paralytic at Lydda, healed by St. Peter (Acts ix. 33, 34).

* The name shows that he was either a Greek or a Hellenistic Jew. It is uncertain whether he was a believer or not (*ἄνθρωπόν τινα*); but it was usual to require faith of those who received such benefits. H.

Æ'NON (Αἰνών: *Ænnon*), a place "near to Salim," at which John baptized (John iii. 23). It was evidently west of the Jordan (comp. iii. 22 with 26, and with i. 28), and abounded in water. This is indicated by the name, which is merely a Greek version of the Chaldee עֵינוֹן = "springs." Ænon is given in the *Onomasticon* as 8 miles south of Scythopolis, "juxta Salem et Jordanem." Dr. Robinson's most careful search, on his second visit, however, failed to discover any trace of either name or remains in that locality (iii. 333). But a *Sâlim* has been found by him to the east of and close to *Nâbulus*, where there are two very copious springs (ii. 279; iii. 298). This position agrees with the requirements of Gen. xxxiii. 18. [SALEM.] In favor of its distance from the Jordan is the consideration that, if close by the river, the Evangelist would hardly have drawn attention to the "much water" there.

The latest writer on Jerusalem, Dr. Barclay (1858), reports the discovery of Ænon at *Wady Farah*, a secluded valley about 5 miles to the N. E. of Jerusalem, running into the great *Wady Fowar* immediately above Jericho. The grounds of this novel identification are the very copious springs and pools in which *W. Farah* abounds, and also the presence of the name *Selam* or *Seleim*, the appellation of another *Wady* close by. But it requires more examination than it has yet received. (Barclay, *City of the Great King*, pp. 558–570.) See the curious speculations of Lightfoot (*Chorog. Inquiry*, ch. iii. §§ 1, 2, 3, 4). G.

[a] Robinson's words, "On the south side above," are the more remarkable, because the identity of the place with the Maaleh-Adummim does not seem to have occurred to him.

* The later observations tend to narrow the limits of the question: they indicate at least the region if they do not fix the site of Ænon. Jerome's testimony (Reland's *Palæstina*, p. 480) that it was 8 miles south of Scythopolis (still shown there in his day, "ostenditur usque nunc") agrees with the ascertained condition of that neighborhood. Dr. Thomson (*Land and Book*, ii. 176), who visited *Beisân* (Scythopolis) and the neighborhood, represents the valley there as abounding in fountains and brooks, which make it one of the most fertile places in Palestine. Though finding no traces of the names still current, he says that Ænon and Salim were no doubt in this *Ghor Beisân*. Dr. Robinson's Salim lies too far inward to agree with the "juxta Jordanem" of Eusebius and Jerome; indeed, he gives up that position and fixes on a different one. The name merely of Salim would not be decisive, as it seems to have been, and is still, not uncommon in Palestine. [SALIM.] We have the more reason for adhering to the traditionary site, that Mr. Van de Velde reports his finding a Mussulman oratory (*Wely*) called *Sheykh Salim* near a heap of ruins, about six English miles south of *Beisân*, and two west of the Jordan (*Syr. and Pal.* ii. 346). Bleek (*Brief an die Hebr.* vol. ii. pt. 2. p. 285 ff.) maintains that this Salim was not only the one where John baptized, but of which Melchizedek was king (Gen. xiv. 18). As to Ænon, which is descriptive rather than local, the existence itself of fountains, "deep waters" (*ὕδατα πολλά*), is all the identification that the term requires. H

AFFINITY. [MARRIAGE.]

AG'ABA ('Ακκαβά; [Vat. marg. Αγγαβα; Alex. Γαβα; Ald. 'Αγαβά:] *Aggab*), 1 Esdr. v. 30. [HAGAB.]

AG'ABUS [b] ('Αγαβος: *Agabus*), a Christian prophet in the apostolic age, mentioned in Acts xi. 28 and xxi. 10. The same person must be meant in both places; for not only the name, but the office (*προφήτης*) and residence (*ἀπὸ Ἱεροσολύμων, ἀπὸ τῆς Ἰουδαίας*), are the same in both instances. He predicted (Acts xi. 28) that a famine would take place in the reign of Claudius "throughout all the world" (*ἐφ' ὅλην τὴν οἰκουμένην*). This expression may take a narrower or a wider sense, either of which confirms the prediction. As Greek and Roman writers used *ἡ οἰκουμένη* of the Greek and the Roman world, so a Jewish writer could use it naturally of the Jewish world or Palestine. Josephus certainly so uses it (*Ant.* viii. 13, § 4) when speaking of the efforts of Ahab to discover the prophet Elijah, he says that the king sought him *κατὰ πᾶσαν τὴν οἰκουμένην*, *i. e.* throughout Palestine and its borders. (See Anger, *De Temporum in Actis App. ratione*, p. 42.) Ancient writers give no account of any universal famine in the reign of Claudius, but they speak of several local famines which were severe in particular countries. Josephus (*Ant.* xx. 2, § 6 ib. 5, § 2) mentions one which prevailed at that time in Judæa, and swept away many of the inhabitants. Helena, queen of Adiabene, a Jewish proselyte who was then at Je-

[b] * This article (not accredited in the English edition) has been re-written here by the author. H

usalem, imported provisions from Egypt and Cyprus, which she distributed among the people to save them from starvation. This, in all probability, is the famine to which Agabus refers in Acts xi. 28. The chronology admits of this supposition. According to Josephus, the famine which he describes took place when Cuspius Fadus and Tiberius Alexander were procurators; *i. e.* as Lardner computes the time (*Credibility*, P. I. b. i. ch. xi.), it may have begun about the close of A. D. 44, and lasted three or four years. Fadus was sent into Judæa on the death of Agrippa, which occurred in August of the year A.D. 44; and it was about the time of the death of Agrippa (Acts xii. 1) that Paul and Barnabas carried the alms of the Christians at Antioch to Jerusalem. If we attach the wider sense to οἰκουμένην, the prediction may import that a famine should take place throughout the Roman empire during the reign of Claudius (the year is not specified), and not that it should prevail in all parts at the same time. We find mention of three other famines during the reign of Claudius: one in Greece (Euseb. *Chron.* i. 79), and two in Rome (Dion Cass. lx. 11; Tac. *Ann.* xii. 43). For the facts concerning these famines, see Walch, *De Agabo vate* (*Dissertt. ad Acta Apost.* ii. 131 ff.).

At Cæsarea, Agabus foretold to Paul, who was then going up to Jerusalem for the last time, that the Jews there would cast him into prison and bind him hand and foot. The prophet accompanied this prediction with a symbolic act (that of binding his own hands and feet with Paul's girdle), which served to place the event foretold more vividly before them. The scene, being thus acted out before their eyes, was rendered present, real, beyond what any mere verbal declaration could possibly have made it.

"Segnius irritant animos demissa per aurem
Quam quæ sunt oculis subjecta fidelibus, et quæ
Ipse sibi tradit spectator."

Instances of such symbolism, though rare in the N. T., are frequent in the Old. See 1 K. xxii. 11; Is. xx. 1 ff.; Jer. xiii. 1 ff.; Ezek. iv. 1 ff., etc.

The name Agabus is variously derived: by Drusius, from חָגָב, *a locust*; by Grotius, Witsius, and Wolf, from אָגַב, *he loved*. See Wolf's *Curæ Philologicæ*, ii. 1167. Walch (*ut supra*) adopts the latter derivation, and compares the name with the Greek Agape, Agapetus, Agapius, and the like. Walch, in his *Dissertatio*, treats (*a*) of the name of Agabus; (*b*) of his office as prophet; (*c*) of his prophecies; and (*d*) of their fulfillment. He illustrates these topics fully, but adds nothing important to the results stated in this article. The incidents in which Agabus appears are noticed at length in Baumgarten's *Apostelgeschichte*, i. 270 ff. and ii. 113 ff. H. B. H.

A'GAG (אֲגָג, from an Arabic root "to burn," Gesen.: Ἀγάγ and Γάγ: *Agag*), possibly the title of the kings of Amalek, like Pharaoh of Egypt. One king of this name is mentioned in Num. xxiv. 7, and another in 1 Sam. xv. 8, 9, 20, 32. The latter was the king of the Amalekites, whom Saul spared together with the best of the spoil, although it was the well-known will of Jehovah that the Amalekites should be extirpated (Ex. xvii. 14; Deut. xxv. 17). For this act of disobedience Samuel was commissioned to declare to Saul his rejection, and he himself sent for Agag and cut him in pieces. [SAMUEL.]

Haman is called the AGAGITE in Esther (Βουγαῖος, iii. 1, 10, viii. 3, 5, [Μακεδών, ix. 24]). The Jews consider Haman a descendant of Agag, the Amalekite, and hence account for the hatred with which he pursued their race (Joseph. *Ant.* xi. 6, § 5; Targ. Esth.). R. W. B.

A'GAGITE. [AGAG.]

A'GAR. [HAGAR.]

AGARE'NES (υἱοὶ Ἀγαρ: *filii Agar*), Bar. iii. 23. [HAGARENES.]

AGATE (שְׁבוֹ, *shebó*; כַּדְכֹּד, *cadcód*: ἀχάτης: *achates*) is mentioned four times in the text of the A. V.; viz. in Ex. xxviii. 19, xxxix. 12; Is. liv. 12; Ez. xxvii. 16. In the two former passages, where it is represented by the Hebrew word *shebó*, it is spoken of as forming the second stone in the third row of the high-priest's breastplate: in each of the two latter places the original word is *cadcód*, by which no doubt is intended a different stone. [RUBY.] In Ez. xxvii. 16, where the text has *agate*, the margin has *chrysoprase*, whereas in the very next chapter, Ez. xxviii. 13, *chrysoprase* occurs in the margin instead of *emerald*, which is in the text, as the translation of an entirely different Hebrew word, *nóphec*;[a] this will show how much our translators were perplexed as to the meanings of the minerals and precious stones mentioned in the sacred volume;[b] and this uncertainty which belongs to the mineralogy of the Bible, and indeed in numerous instances to its botany and zoölogy, is by no means a matter of surprise when we consider how often there is no collateral evidence of any kind that might possibly help us, and that the derivations of the Hebrew words have generally and necessarily a very extensive signification; identification, therefore, in many cases becomes a difficult and uncertain matter.

Various definitions of the Hebrew word *shebó* have been given by the learned, but nothing definite can be deduced from any one of them. Gesenius places the word under the root *shâbâh*,[c] "to take prisoner," but allows that nothing at all can be learned from such an etymology. Fürst[d] with more probability assigns to the name an Arabic origin, *shâba*, "to glitter."

Again, we find curiously enough an interpretation which derives it from another Arabic root, which has precisely the opposite meaning, viz. "to be dull and obscure."[e] Another derivation traces the word to the proper name *Sheba*, whence precious stones were exported for the Tyrian merchants. Of these derivations, it is difficult to see any meaning at all in the first,[f] while a contrary

ane to what we should expect is given to the third, for a dull-looking stone is surely out of place amongst the glittering gems which adorned the sacerdotal breastplate. The derivation adopted by Fürst is perhaps the most probable, yet there is nothing even in it which will indicate the stone intended. That *shebô*, however, does stand for some variety of *agate* seems generally agreed upon by commentators, for, as Rosenmüller[a] has observed (*Schol. in Exod.* xxxviii. 19), there is a wonderful agreement amongst interpreters, who all understand an *agate* by the term.

Our English *agate*, or *achat*, derives its name from the Achates, the modern Dirillo, in the Val di Noto, in Sicily, on the banks of which, according to Theophrastus and Pliny, it was first found;[b] but as *agates* are met with in almost every country, this stone was doubtless from the earliest times known to the Orientals. It is a silicious stone of the quartz family, and is met with generally in rounded nodules, or in veins in trap-rocks; specimens are often found on the sea-shore, and in the beds of streams, the rocks in which they had been imbedded having been decomposed by the elements, when the agates have dropped out. Some of the principal varieties are called *chalcedony*, from Chalcedon in Asia Minor, where it is found, *carnelian*, *chrysoprase*, an apple-green variety colored by oxide of nickel, *Mocha-stones*, or *moss agate*, which owe their dendritic or tree-like markings to the imperfect crystallization of the coloring salts of manganese or iron, *onyx-stones*, *blood-stones*, &c., &c. Beautiful specimens of the art of engraving on *cnaicedony* are still found among the tombs of Egypt, Assyria, Etruria, &c.[c] W. H.

AGE, OLD. In early stages of civilization, when experience is the only source of practical knowledge, old age has its special value, and consequently its special honors. The Spartans, the Athenians, and the Romans were particular in showing respect to the aged, and the Egyptians had a regulation which has its exact parallel in the Bible (Herod. ii. 80; Lev. xix. 32). Under a patriarchal form of government such a feeling was still more deeply implanted. A further motive was superadded in the case of the Jew, who was taught to consider old age as a reward for piety, and a signal token of God's favor. For these reasons the aged occupied a prominent place in the social and political system of the Jews. In *private* life they were looked up to as the depositaries of knowledge (Job xv. 10); the young were ordered to rise up in their presence (Lev. xix. 32); they allowed them to give their opinion first (Job xxxii. 4); they were taught to regard grey hairs as a "crown of glory" and as the "beauty of old men" (Prov. xvi. 31, xx. 29). The attainment of old age was regarded as a special blessing (Job v. 26) not only on account of the prolonged enjoyment of life to the individual, but also because it indicated peaceful and prosperous times (Zech. viii. 4; 1 Macc. xiv. 9; Is. xv. 20). In *public* affairs age carried weight with it, especially in the infancy of the state: it formed under Moses the main qualification of those who acted as the representatives of the people in all matters of difficulty and deliberation. The old men or Elders thus became a class, and the title gradually ceased to convey the notion of age, and was used in an official sense, like Patres, Senatores, and other similar terms. [ELDERS.] Still it would be but natural that such an office was generally held by men of advanced age (1 K. xii. 8).

W. L. B.

* The distinction between πρεσβύτης and πρεσβύτερος should be remarked. Though the former refers always to age, the latter refers occasionally to age (Acts ii. 17; 1 Tim. v. 1; 1 Pet. v. 5), but usually to rank or office. The point is of some interest as regards the age of Paul at the time of his Roman captivity. In Philem. ver. 9 the apostle alludes to himself "as an old man" (ὡς πρεσβύτης) for the purpose of giving effect by that reminiscence to his entreaty in behalf of Onesimus. Paul is supposed to have been, at the time of writing to Philemon (converted about 36 A. D., at the age of 30, and at Rome 62–4 A. D.), about 60 years old. According to Hippocrates, a man was called πρεσβύτης from 49 to 56, and after that was called γέρων. But there was another estimate among the Greeks which fixed the later period (γῆρας) at 69. Coray treats of this question in his Συνέκδημος Ἱερατικός, p. 167 (Paris, 1831).[d] Our most impressive image of old age in the N. T., as represented by its appropriate word, is that which occurs in the Saviour's touching description of what was to befall the energetic Peter in his last days (ὅταν γηράσῃς). See John xxi. 18. The term applied to Zacharias (Luke i. 18) is πρεσβύτης. The patriarch Jacob's characterization of a long life, as he looked back upon it from the verge of the grave, has hardly its parallel for truthfulness and pathos in all extant literature. See Gen. xlvii. 8, 9. H.

A'GEE [dissyl.] (אַגֵא [*fugitive*]: Ἄσα; Alex. Αγσα; [Comp. Ἀγά:] *Age*). A Hararite, father of Shammah, one of David's three mightiest heroes (2 Sam. xxiii. 11). In the Peshito-Syriac he is called "Ago of the king's mountain."

AGGE'US (Ἀγγαῖος: *Aggæus*), [1 Esdr. vi. 1, vii. 3; 2 Esdr. i. 40.] [HAGGAI.]

AGRICULTURE. This, though prominent in the Scriptural narrative concerning Adam, Cain and Noah, was little cared for by the patriarchs more so, however, by Isaac and Jacob than by Abraham (Gen. xxvi. 12, xxxvii. 7), in whose time, probably, if we except the lower Jordan valley (xiii. 10), there was little regular culture in Canaan. Thus Gerar and Shechem seem to have been cities where pastoral wealth predominated. The herdsmen strove with Isaac about his wells; about his crop there was no contention (xx. 14, xxxiv. 28). In Joshua's time, as shown by the story of the "Eshcol" (Num. xiii. 23–4), Canaan was found in

a much more advanced agricultural state than Jacob had left it in (Deut. viii. 8), resulting probably from the severe experience of famines, and the example of Egypt, to which its people were thus led. The pastoral life was the means of keeping the sacred race, whilst yet a family, distinct from mixture and locally unattached, especially whilst in Egypt. When, grown into a nation, they conquered their future seats, agriculture supplied a similar check on the foreign intercourse and speedy demoralization, especially as regards idolatry, which commerce would have caused. Thus agriculture became the basis of the Mosaic commonwealth (Michaelis, xxxvii.–xli.). It tended to check also the freebooting and nomad life, and made a numerous offspring profitable, as it was already honorable by natural sentiment and by law. Thus, too, it indirectly discouraged slavery, or, where it existed, made the slave somewhat like a son, though it made the son also somewhat of a slave. Taken in connection with the inalienable character of inheritances, it gave each man and each family a stake in the soil and nurtured a hardy patriotism. "The land is Mine" (Lev. xxv. 23) was a dictum which made agriculture likewise the basis of the theocratic relation. Thus every family felt its own life with intense keenness, and had its divine tenure which it was to guard from alienation. The prohibition of culture in the sabbatical year formed, under this aspect, a kind of rent reserved by the Divine Owner. Landmarks were deemed sacred (Deut. xix. 14), and the inalienability of the heritage was ensured by its reversion to the owner in the year of jubilee; so that only so many years of occupancy could be sold (Lev. xxv. 8–16, 23–35). The prophet Isaiah (v. 8) denounces the contempt of such restrictions by wealthy grandees who sought to "add field to field," erasing families and depopulating districts.

A change in the climate of Palestine, caused by increase of population and the clearance of trees, must have taken place before the period of the N. T. A further change caused by the decrease of skilled agricultural labor, *e. g.*, in irrigation and terrace-making, has since ensued. Not only this, but the great variety of elevation and local character in so small a compass of country necessitates a partial and guarded application of general remarks (Robinson, i. 507, 553, 554, iii. 595; Stanley, *S. & P.* pp. 119, 124–6). Yet wherever industry is secure, the soil still asserts its old fertility. The *Haurán* (Peræa) is as fertile as Damascus, and its bread enjoys the highest reputation. The black and fat, but light, soil about Gaza is said to hold so much moisture as to be very fertile with little rain. Here, as in the neighborhood of *Beyrút*, is a vast olive-ground, and the very sand of the shore is said to be fertile if watered. The Israelites probably found in Canaan a fair proportion of woodland, which their necessities, owing to the discouragement of commerce, must have led them to reduce (Josh. xvii. 18). But even in early times timber seems to have been far less used for building material than among western nations; the Israelites were not skillful hewers, and imported both the timber and the workmen (1 K. v. 6, 8). No store of wood-fuel seems to have been kept; ovens were heated with such things as dung and hay (Ez. iv. 12, 15; Mal. iv. 1); and, in any case of sacrifice on an emergency, some, as we should think, unusual source of supply is constantly mentioned for the wood (1 Sam. vi. 14; 2 Sam. xxiv. 22; 1 K. xix. 21; comp. Gen. xxii. 3, 6, 7). All this indicates a non-abundance of timber.

Its plenty of water from natural sources made Canaan a contrast to rainless Egypt (Deut. viii. 7 xi. 8–12). Nor was the peculiar Egyptian method alluded to in Deut. xi. 10 unknown, though less prevalent in Palestine. That peculiarity seems to have consisted in making in the fields square shallow beds, like our salt-pans, surrounded by a raised border of earth to keep in the water, which was then turned from one square to another by pushing aside the mud to open one and close the next with the foot. A very similar method is apparently described by Robinson as used, especially for garden vegetables, in Palestine. There irrigation (including under the term all appliances for making the water available) was as essential as drainage in our region; and for this the large extent of rocky surface, easily excavated for cisterns and ducts, was most useful. Even the plain of Jericho is watered not by canals from the Jordan, since the river lies below the land, but by rills converging from the mountains. In these features of the country lay its expansive resources to meet the wants of a multiplying population. The lightness of agricultural labor in the plains set free an abundance of hands for the task of terracing and watering; and the result gave the highest stimulus to industry.

The cereal crops of constant mention are wheat and barley, and more rarely rye and millet (?). Of the two former, together with the vine, olive, and fig, the use of irrigation, the plough and the harrow, mention is found in the book of Job (xxxi. 40, xv. 33, xxiv. 6, xxix. 9, xxxix. 10). Two kinds of cummin (the black variety called "fitches," Is. xxviii. 27), and such podded plants as beans and lentiles, may be named among the staple produce. To these later writers add a great variety of garden plants, *e. g.*, kidney-beans, peas, lettuce, endive, leek, garlic, onion, melon, cucumber, cabbage, &c. (*Mishna*, *Celaim*, l. 1, 2). The produce which formed Jacob's present was of such kinds as would keep, and had kept during the famine (Gen. xliii. 11).

The Jewish calendar, as fixed by the three great festivals, turned on the seasons of green, ripe, and fully-gathered produce. Hence, if the season was backward, or, owing to the imperfections of a non-astronomical reckoning, seemed to be so, a month was intercalated. This rude system was fondly retained long after mental progress and foreign intercourse placed a correct calendar within their power; so that notice of a *Veadar*, *i. e.*, second or intercalated Adar, on account of the lambs being not yet of paschal size, and the barley not forward enough for the *Abib* (green sheaf), was sent to the Jews of Babylon and Egypt (Ugol. *de Re Rust.* v. 22) early in the season.

The year ordinarily consisting of 12 months was divided into 6 agricultural periods as follows (*To saphta Taanith*, ch. 1): —

I. Sowing Time.

Tisri, latter half	beginning about autumnal equinox	Early rain due
Marchesvan		
Kasleu, former half		

II. Ingrip Time.

Kasleu, latter half.
Tebeth.
Shebath, former half.

Digitized by Google

III. Cold Season.

Shebath, latter half . . .	Latter rain due.
Adar	
[Veadar]	
Nisan, former half	

IV. Harvest Time.

Nisan, latter half	Beginning about vernal equinox. Barley green. Passover.
Ijar	
Sivan, former half . . .	Wheat ripe. Pentecost.

V. Summer.

Sivan, latter half.
Tamuz
Ab, former half.

VI. Sultry Season.

Ab, latter half.
Elul.
Tisri, former half Ingathering of fruits.

Thus the 6 months from mid Tisri to mid Nisan were mainly occupied with the process of cultivation, and the rest with the gathering of the fruits. Rain was commonly expected soon after the autumnal equinox or mid Tisri; and if by the first of Kasleu none had fallen, a fast was proclaimed (*Mishna, Taanith*, ch. i.). The common scriptural expressions of the "early" and the "latter rain" (Deut. xi. 14; Jer. v. 24; Hos. vi. 3; Zech. x. 1; Jam. v. 7) are scarcely confirmed by modern experience, the season of rains being unbroken (Robinson, i. 41, 429, iii. 96), though perhaps the fall is more strongly marked at the beginning and the end of it. The consternation caused by the failure of the former rain is depicted in Joel i., ii.; and that prophet seems to promise that and the latter rain together "in the first month," *i. e.* Nisan (ii. 23). The ancient Hebrews had little notion of green or root-crops grown for fodder, nor was the long summer drought suitable for them. Barley supplied food both to man and beast, and the plant, called in Ez. iv. 9, "Millet," דֹּחַן, *holcus dochna*, Linn. (Gesenius), was grazed while green, and its ripe grain made into bread. In the later period of more advanced irrigation the רִגְלָה, "Fenugreek," occurs, also the שַׂחֲלָה, a clover, apparently, given cut (*Peah*, v. 5). Mowing (גָּז, Am. vii. 1; Ps. lxxii. 6) and haymaking were familiar processes, but the latter had no express word, חָצִיר standing both for grass and hay, a token of a hot climate, where the grass may become hay as it stands.

The produce of the land besides fruit from trees, was technically distinguished as תְּבוּאָה, including apparently all cereal plants, קְטָנִיּוֹת (*quicquid in siliquis nascitur*, Buxt. *Lex.*), nearly equivalent to the Latin *legumen*, and זְרוֹעוֹת or זְרוֹעֵי גִנָּה, *semina hortensia*, (since the former word alone was used also generically for all seed, including all else which was liable to tithe, for which purpose the distinction seems to have existed. The plough probably was like the Egyptian, and the process of ploughing mostly very light, like that called *scarificatio* by the Romans ("Syria tenui sulco arat," Plin. xviii. 47), one yoke of oxen mostly sufficing to draw it. Such is still used in Asia Minor, and its parts are shown in the accompanying drawing: *a* is the pole to which the cross beam with yokes, *b*, is attached; *c*, the share; *d*, the handle; *e* represents three modes of arming the share, and *f* is a goad with a scraper at the other

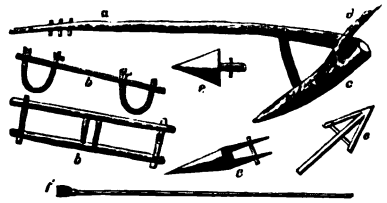

Fig. 1. — Plough, &c., as still used in Asia Minor. — (From Fellows's *Asia Minor*.)

end, probably for cleansing the share. Mountains and steep places were hoed (Is. vii. 25; Maimon. *ad Mishn.* vi. 2; Robinson, iii. 595, 602–3). The breaking up of new land was performed as with the Romans *vere novo*. Such new ground and fallows, the use of which latter was familiar to the Jews (Jer. iv. 3; Hos. x. 12), were cleared of stones and of thorns (Is. v. 2; *Gemara Hierosol. ad loc.*) early in the year, sowing or gathering from "among thorns" being a proverb for slovenly husbandry (Job v. 5; Prov. xxiv. 30, 31; Robinson, ii. 127) Virgin land was ploughed a second time. The proper words are פָּרַח, *proscindere*, and יָזַד, *offringere*, *i. e.*, *iterare ut frangantur glebæ* (by cross ploughing), Varr. *de R. R.* i. 32; both are distinctively used Is. xxviii. 24. Land already tilled was ploughed before the rains, that the moisture might the better penetrate (Maimon. ap. Ugol. *de Re Rust.* v. 11). Rain, however, or irrigation (Is. xxxii. 20) prepared the soil for the sowing, as may be inferred from the prohibition to irrigate till

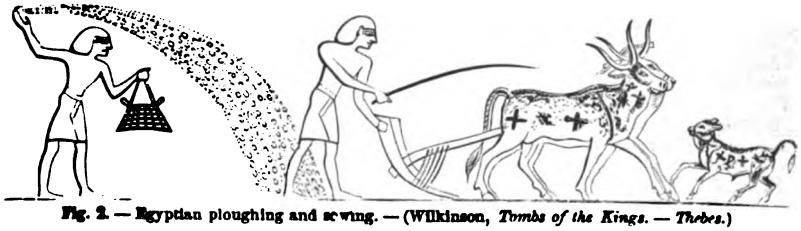

Fig. 2. — Egyptian ploughing and sowing. — (Wilkinson, *Tombs of the Kings. — Thebes.*)

the gleaning was over, lest the poor should suffer (*Peah*, v. 3); and such sowing often took place *without* previous ploughing, the seed, as it. the pa.-

able of the sower, being scattered broadcast, and ploughed in *afterwards*, the roots of the late crop being so far decayed as to serve for manure (Fel-

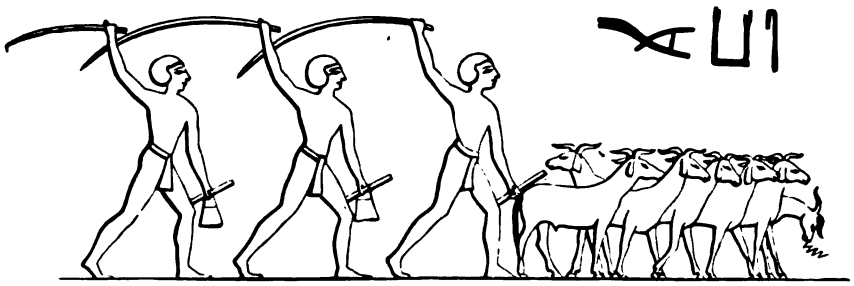

Fig. 3. — Goats treading in the grain, when sown in the field, after the water has subsided. — (Wilkinson, *Tombs*, near the Pyramids.)

lows, *Asia Minor*, p. 72). The soil was then brushed over with a light harrow, often of thorn bushes. In highly irrigated spots the seed was trampled in by cattle (Is. xxxii. 20), as in Egypt by goats (Wilkinson, i. 39, 2d Ser.). Sometimes, however, the sowing was by patches only in well manured spots, a process called מִנְמֹר, der. נָמַר, *pardus*, from its spotted appearance, as represented in the accompanying drawing by Surenhusius to illustrate the Mishna. Where the soil was heavier,

Fig. 4. — Corn growing in patches. — (Surenhusius.)

the ploughing was best done dry ("dum sicca tellure licet," Virg. *Georg.* i. 214); and there, though not generally, the *sarritio* (עִדּוּר, der. עָדַר, to cleanse), and even the *liratio* of Roman husbandry, performed with *tabulæ* affixed to the sides of the share, might be useful. But the more formal routine of heavy western soils must not be made the standard of such a naturally fine tilth as that of Palestine generally. "Sunt enim regionum propria munera, sicut Ægypti et Africæ, in quibus agricola post sementem ante messem segetem non attingit in iis autem locis ubi *desideratur sarritio*," &c., Columella, ii. 12. During the rains, if not too heavy, or between their two periods, would be the best time for these operations; thus 70 days before the passover was the time prescribed for sowing for the "wave-sheaf," and, probably, therefore, for that of barley generally. The oxen were urged on by a goad like a spear (Judg. iii. 31). The custom of watching ripening crops and threshing floors against theft or damage (Robinson, i. 490, ii. 18, 83, 99) is probably ancient. Thus Boaz slept on the floor (Ruth iii. 4. 7.)[a] Barley ripened a week or two before wheat, and as fine harvest weather was certain (Prov. xxvi. 1; 1 Sam. xii. 17; Am. iv. 7), the crop chiefly varied with the quantity of timely rain. The period of harvest must always have differed according to elevation, aspect, &c. (Robinson, i. 430, 551.) The proportion of harvest gathered to seed sown was often vast; a hundredfold is mentioned, but in such a way as to signify that it was a limit rarely attained (Gen. xxvi. 12 Matt. xiii. 8).

The rotation of crops, familiar to the Egyptians

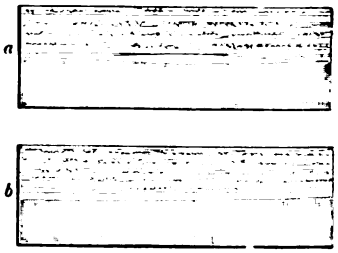

Fig. 5. — Sowing. — (Surenhusius.)

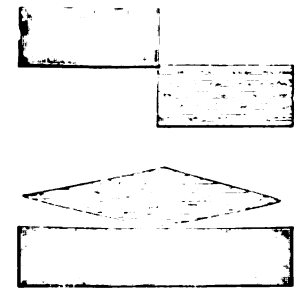

Fig. 6. — Sowing. — (Surenhusius.)

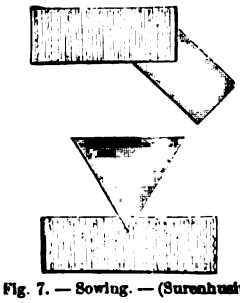

Fig. 7. — Sowing. — (Surenhusius.)

[a] This practice continues to the present day. Speaking of a night spent near Hebron, Robinson (ii. 446, ed. 1841) says: "The owners of the crops came every night and slept upon their threshing floors to guard them; and this we had found to be universal in all the region of Gaza." Thomson (*Land and Book* ii. 548) refers to the same custom. See RUTH, BOOK OF. H.

(Wilkinson, ii. p. 4), can hardly have been unknown to the Hebrews. Sowing a field with divers seeds was forbidden (Deut. xxii. 9), and minute directions are given by the rabbis for arranging a seeded surface with great variety, yet avoiding juxtaposition of *heterogenea* Such arrangements are shown in the annexed drawings. Three furrows'

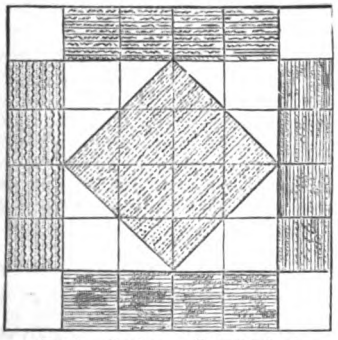

Fig. 8. — Sowing. — (Surenhusius.)

interval was the prescribed margin (*Celaim*, ii. 6). The blank spaces in fig. 5, *a* and *b*, represent such margins, tapering to save ground. In a vineyard wide spaces were often left between the vines, for

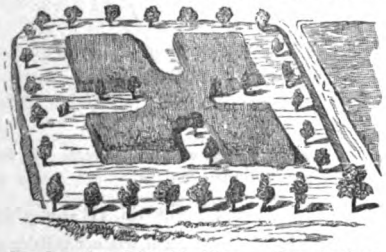

Fig. 9. — Corn-field with Olives. — (Surenhusius.)

whose roots a radius of 4 cubits was allowed, and the rest of the space cropped: so herb-gardens stood in the midst of vineyards (*Peah*, v. 5.) Fig. 9 shows a corn-field with olives about and amidst it.

Fig 10 — Reaping wheat. — (Wilkinson, *Tombs of the Kings — Thebes*.)

The wheat, &c., was reaped by the sickle (the word for which is חֶרְמֵשׁ in Deut., and מַגָּל

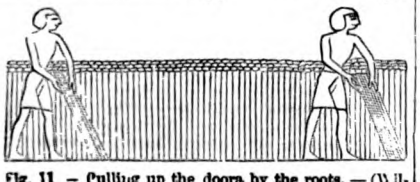

Fig. 11 — Pulling up the doora by the roots. — (Wilkinson *ut supra*.)

in Jer. and Joel), either the ears merely in the "Picenian" method (Varr. *de Re Rust.* i. 50), or stalk and all, or it was pulled by the roots (*Peah*, v. 10). It was bound in sheaves — a process prominent in Scripture, and described by a peculiar word, עֹמֶר — or heaped, לקובעות, in the form of a helmet, לכומכאות of a turban (of which, however, see another explanation, Buxt. *Lex.* s. v. פּוּמָסוֹת), or לחררה of a cake. The

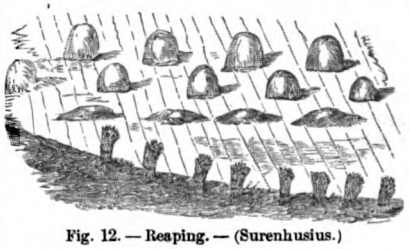

Fig. 12. — Reaping. — (Surenhusius.)

sheaves or heaps were carted (Am. ii. 13) to the floor — a circular spot of hard ground, probably, as now, from 50 to 80 or 100 feet in diameter. Such floors were probably permanent, and became well known spots (Gen. l. 10, 11; 2 Sam. xxiv. 16, 18). On these the oxen, &c., forbidden to be muzzled (Deut. xxv. 4), trampled out the grain, as we

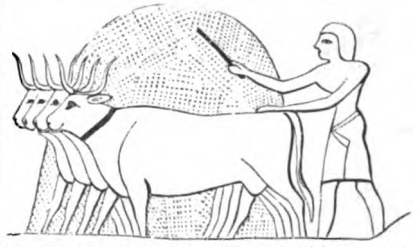

Fig. 13. — Threshing-floor. The oxen driven round the heap; contrary to the usual custom. — (Wilkinson, *Thebes*.)

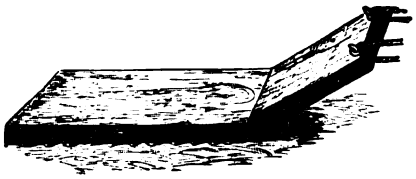
find represented in the Egyptian monuments. At a later time the Jews used a threshing sledge called *Môrag* (Is. xli. 15; 2 Sam. xxiv. 22; 1 Chr. xxi. 23), probably resembling the *nôreg*, still employed

Fig 14. — The *Nórec* a machine used by the modern Egyptians for threshing corn.

Digitized by Google

in Egypt (Wilkinson, ii. 190) — a stage with three rollers ridged with iron, which, aided by the driver's weight, crushed out, often injuring, the grain. as



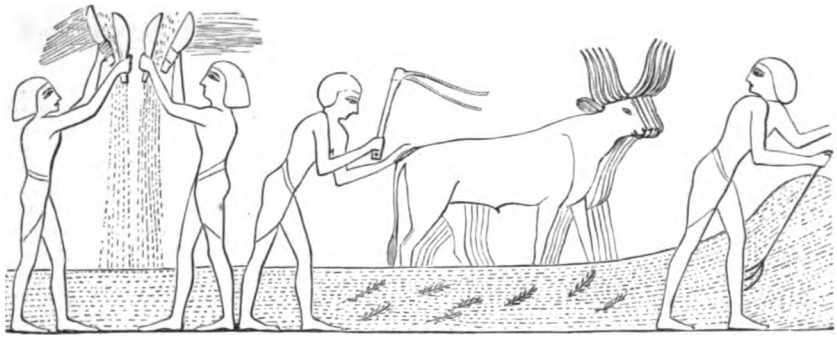


Fig. 15. — Threshing instrument. — (From Fellows's *Asia Minor*.)

well as cut or tore the straw, which thus became fit for fodder. It appears to have been similar to the Roman *tribulum* and the *plostellum Pœnicum* (Varr. *de R. R.* i. 52). Lighter grains were beaten out with a stick (Is. xxviii. 27). Barley was sometimes soaked and then parched before treading out which got rid of the pellicle of the grain. See further the *Antiquitates Triturœ*, Ugolini, vol. 29

The use of animal manure is proved frequent by such recurring expressions as "dung on the face of the earth, field," &c. (Ps. lxxxiii. 10; 2 K. ix. 37; Jer. viii. 2, &c.). A rabbi limits the quantity to three heaps of ten half-cors, or about 380 gallons, to each סְאָה (=$\frac{1}{3}$ of ephah of grain, Gesen.), and wishes the quantity in each heap, rather than their number, to be increased if the field be large (*Shevüth*, cap. iii. 2). Nor was the great usefulness of sheep to the soil unrecognized (*ibid.* 4), though, owing to the general distinctness of the pastoral life, there was less scope for it. Vegetable ashes, burnt stubble, &c. were also used.

3. 2. 1.

Fig. 16. — Treading out the grain by oxen, and winnowing. 1. Raking up the ears to the centre. 2. The driver. 3. Winnowing, with wooden shovels. — (Wilkinson, *Thebes*.)

The "shovel" and "fan" (רַחַת and מִזְרֶה, Is. xxx. 24, but their precise difference is very doubtful) indicate the process of winnowing — a conspicuous part of ancient husbandry (Ps. xxxv. 5; Job. xxi. 18; Is. xvii. 13), and important owing to the slovenly threshing. Evening was the favorite time (Ruth iii. 2) when there was mostly a breeze. The מִזְרֶה (זָרָה, *to scatter* = πτύον? (Matt. iii. 12; Hom. *Iliad.* xiii. 588), was perhaps a broad shovel which threw the grain up against the wind; while the רַחַת (akin to רוּחַ?) may have been a fork (still used in Palestine for the same purpose), or a broad basket in which it was tossed. The heap of produce rendered in rent was sometimes customarily so large as to cover the רַחַת (*Bava Metzia*, ix. 2). This favors the latter view. So the πτύον was a corn-measure in Cyprus, and the δίπτυον = $\frac{1}{2}$ a μέδιμνος (Liddell and Scott, *Lex.* s. v. πτύον). The last process was the shaking in a sieve, נְפָה, *cribrum*, to separate dirt and refuse (Am. ix. 9). [See Luke xxii. 31.]

Fields and floors were not commonly enclosed; vineyards mostly were, with a tower and other buildings (Num. xxii. 24; Ps. lxxx. 13; Is. v. 5; Matt. xxi. 33; comp. Judg. vi. 11). Banks of mud from ditches were also used.

With regard to occupancy a tenant might pay a fixed moneyed rent (Cant. viii. 11) — in which case he was called שׂוֹכֵר, and was compellable to keep the ground in good order for a stipulated share of the fruits (2 Sam. ix. 10; Matt. xxi. 34), often a half or a third; but local custom was the only rule: in this case he was called מֹהֵב, and was more protected, the owner sharing the loss of a short or spoilt crop; so, in case of locusts, blight, &c., the year's rent was to be abated; or he might receive such share as a salary — an inferior position — when the term which described him was חוֹכֵר. It was forbidden to sow flax during a short occupancy (hence leases for terms of years would seem to have been common), lest the soil should be unduly exhausted (comp. *Georg.* i. 77). A passer-by might eat any quantity of corn or grapes, but not reap or carry off fruit (Deut. xxiii. 24–5; Matt. xii. 1).

The rights of the corner to be left, and of gleaning [CORNER; GLEANING], formed the poor man's claim on the soil for support. For his benefit, too a sheaf forgotten in carrying to the floor was to be left; so also with regard to the vineyard and the olive-grove (Lev. xix. 9, 10; Deut. xxiv. 19).[a]

a * The beautiful custom has survived to the present time (Thomson's *Land and Book*, ii. 323, 511). On several topics in this article (as climate, seasons, fertility, productions) further information will be found under: PALESTINE. H.

Digitized by Google

Besides there seems a probability that every third year a second tithe, besides the priests', was paid for the poor (Deut. xiv. 28, xxvi. 12; Am. iv. 4; Tob. i. 7; Joseph. *Ant.* iv. 8). On this doubtful point of the poor man's tithe (מעשר עני) see a learned note by Surenhusius, *ad Peah*, viii. 2. These rights, in case two poor men were partners in occupancy, might be conveyed by each to the other for half the field, and thus retained between them (Maimon. *ad Peah*, v. 5). Sometimes a charitable owner declared his ground common, when its fruits, as those of the sabbatical year, went to the poor. For three years the fruit of newly-planted trees was deemed uncircumcised and forbidden; in the 4th it was holy, as first-fruits; in the 5th it might be ordinarily eaten (*Mishna, Orlah, passim*). For the various classical analogies, see *Dict. of Gr. and Rom. Antiq.* s. v. H. H.

AGRIP'PA. [HEROD.]

A'GUR (אָגוּר [*collector*]: *Congregans*). The son of Jakeh, an unknown Hebrew sage, who uttered or collected the sayings of wisdom recorded in Prov. xxx. Ewald attributes to him the authorship of Prov. xxx. 1–xxxi. 9, in consequence of the similarity of style exhibited in the three sections therein contained; and assigns as his date a period not earlier than the end of the 7th or beginning of the 6th cent. B. C. The Rabbins, according to Rashi, and Jerome after them, interpreted the name symbolically of Solomon, who "collected understanding" (from אָגַר *âgar*, he gathered), and is elsewhere called "Koheleth." Bunsen (*Bibelwerk*, i. p. clxxviii.) contends that Agur was an inhabitant of Massa, and probably a descendant of one of the 500 Simeonites, who, in the reign of Hezekiah, drove out the Amalekites from Mount Seir. Hitzig goes further, and makes him the son of the queen of Massa and brother of Lemuel (*Die Sprüche Sal.* p. 311, ed. 1858). [MASSA.] In Castell's *Lex. Heptag.* we find the Syriac word ܐܓܐܪܐ, *âgârâ*, defined as signifying "one who applies himself to the studies of wisdom." There is no authority given for this but the Lexicon of Bar Bahlul, and it may have been derived from some traditional interpretation of the proper name Agur.

W. A. W.

A'HAB (אַחְאָב [*father's brother*]: Ἀχαάβ; *Achab*), son of Omri, seventh king of the separate kingdom of Israel, and second of his dynasty. The great lesson which we learn from his life is the depth of wickedness into which a weak man may fall, even though not devoid of good feelings and amiable impulses, when he abandons himself to the guidance of another person, resolute, unscrupulous and depraved. The cause of his ruin was his marriage with Jezebel, daughter of Ethbaal, or Eithobal, king of Tyre, who had been priest of Astarte, but had usurped the throne of his brother Phalles (compare Joseph. *Ant.* viii. 13, 2, with *c. Apion.* i. 18). If she resembles the Lady Macbeth of our great dramatist, Ahab has hardly Macbeth's energy and determination, though he was probably by nature a better man. We have a comparatively full account of Ahab's reign, because it was distinguished by the ministry of the great prophet Elijah, who was brought into direct collision with Jezebel, when she ventured to introduce into Israel the impure worship of Baal and her father's goddess Astarte. In obedience to her wishes, Ahab caused a temple to be built to Baal in Samaria itself, and an oracular grove to be consecrated to Astarte. With a fixed determination to extirpate the true religion, Jezebel hunted down and put to death God's prophets, some of whom were concealed in caves by Obadiah, the governor of Ahab's house; while the Phœnician rites were carried on with such splendor that we read of 450 prophets of Baal, and 400 of Asherah. (See 1 K. xviii. 19, where our version follows the LXX. in erroneously substituting "the groves" for the proper name Asherah, as again in 2 K. xxi. 7, xxiii. 6.) [ASHERAH.] How the worship of God was restored, and the idolatrous priests slain, in consequence of "a sore famine in Samaria," will be more properly related under the article ELIJAH. But heathenism and persecution were not the only crimes into which Jezebel led her yielding husband. One of his chief tastes was for splendid architecture, which he showed by building an ivory house and several cities, and also by ordering the restoration and fortification of Jericho, which seems to have belonged to Israel, and not to Judah, as it is said to have been rebuilt in the days of *Ahab*, rather than in those of the contemporary king of Judah, Jehoshaphat (1 K. xvi. 34). But the place in which he chiefly indulged this passion was the beautiful city of Jezreel (now *Zerin*), in the plain of Esdraelon, which he adorned with a palace and park for his own residence, though Samaria remained the capital of his kingdom, Jezreel standing in the same relation to it as the Versailles of the old French monarchy to Paris (Stanley, *S. & P.* p. 244). Desiring to add to his pleasure-grounds there the vineyard of his neighbor Naboth, he proposed to buy it or give land in exchange for it; and when this was refused by Naboth, in accordance with the Mosaic law, on the ground that the vineyard was "the inheritance of his fathers" (Lev. xxv. 23), a false accusation of blasphemy was brought against him, and not only was he himself stoned to death, but his sons also, as we learn from 2 K. ix 26. Elijah, already the great vindicator of religion, now appeared as the assertor of morality, and declared that the entire extirpation of Ahab's house was the penalty appointed for his long course of wickedness, now crowned by this atrocious crime. The execution, however, of this sentence was delayed in consequence of Ahab's deep repentance. The remaining part of the first book of Kings is occupied by an account of the Syrian wars, which originally seems to have been contained in the last two chapters. It is much more natural to place the 20th chapter after the 21st, and so bring the whole history of these wars together, than to interrupt the narrative by interposing the story of Naboth between the 20th and 22d, especially as the beginning of the 22d seems to follow naturally from the end of the 20th. And this arrangement is actually found in the LXX. and confirmed by the narrative of Josephus. We read of three campaigns which Ahab undertook against Benhadad II. king of Damascus, two defensive and one offensive. In the first, Benhadad laid siege to Samaria, and Ahab, encouraged by the patriotic counsels of God's prophets, who, next to the true religion, valued most deeply the independence of His chosen people, made a sudden attack on him whilst in the plentitude of arrogant confidence he was banqueting in his tent with his 32 vassal kings. The Syrians were totally routed, and fled to Damascus.

Digitized by Google

Next year Benhadad, believing that his failure was owing to some peculiar power which the God of Israel exercised over the hills, invaded Israel by way of Aphek, on the E. of Jordan (Stanley, *S. & P.* App. § 6). Yet Ahab's victory was so complete that Benhadad himself fell into his hands; but was released (contrary to the will of God as announced by a prophet) on condition of restoring all the cities of Israel which he held, and making "streets" for Ahab in Damascus; that is, admitting into his capital permanent Hebrew commissioners, in an independent position, with special dwellings for themselves and their retinues, to watch over the commercial and political interests of Ahab and his subjects. This was apparently in retaliation for a similar privilege exacted by Benhadad's predecessor from Omri in respect to Samaria. After this great success Ahab enjoyed peace for three years, and it is difficult to account exactly for the third outbreak of hostilities, which in Kings is briefly attributed to an attack made by Ahab on Ramoth in Gilead on the east of Jordan, in conjunction with Jehoshaphat king of Judah, which town he claimed as belonging to Israel. But if Ramoth was one of the cities which Benhadad agreed to restore, why did Ahab wait for three years to enforce the fulfillment of the treaty? From this difficulty, and the extreme bitterness shown by Benhadad against Ahab personally (1 K. xxii. 31), it seems probable that this was not the case (or at all events that the Syrians did not so understand the treaty), but that Ahab, now strengthened by Jehoshaphat, who must have felt keenly the paramount importance of crippling the power of Syria, originated the war by assaulting Ramoth without any immediate provocation. In any case, God's blessing did not rest on the expedition, and Ahab was told by the prophet Micaiah that it would fail, and that the prophets who advised it were hurrying him to his ruin. For giving this warning Micaiah was imprisoned; but Ahab was so far roused by it as to take the precaution of disguising himself, so as not to offer a conspicuous mark to the archers of Benhadad. But he was slain by a "certain man who drew a bow at a venture;" and though staid up in his chariot for a time, yet he died towards evening, and his army dispersed. When he was brought to be buried in Samaria, the dogs licked up his blood as a servant was washing his chariot; a partial fulfillment of Elijah's prediction (1 K. xxi. 19), which was more literally accomplished in the case of his son (2 K. ix. 26). Josephus, however, substitutes Jezreel for Samaria in the former passage (*Ant.* viii. 15, 6). The date of Ahab's accession is 919 B. C.; of his death, B. C. 897.

2. [Ἀχιάβ: Heb. in Jer. xxix. 22, אַחְאָב]. A lying prophet, who deceived the captive Israelites in Babylon, and was burned to death by Nebuchadnezzar, Jer. xxix. 21, 22. G. E. L. C.

AHAR'AH (אַחַרַח [*after the brother*, but uncertain]: Ἀαρά; [Vat. Ιαφαηλ:] *Ahara*). The third son of Benjamin (1 Chr. viii. 1). See AHER, AHIRAM. W. A. W.

AHAR'HEL (אַחַרְחֵל [as above]: ἀδελφὸς Ῥηχάβ; [Comp. ἀδ. Ῥηχάλ:] *Aharehel*). A name occurring in an obscure fragment of the genealogies of Judah. "The families of Aharhel" apparently traced their descent through Coz to Ashur, the posthumous son of Hezron. The Targum of R. Joseph on Chronicles identifies him with "Hur the firstborn of Miriam" (1 Chr. ii. 8) The LXX. appear to have read אחי רחב "brother of Rechab," or according to the Complutensian edition אחי רחל, "brother of Rachel.'

W. A. W.

AHA'SAI [3 syl.] (אֲחַזַי [=*Ahaziah*]: om in LXX. [but Comp. Ἀαχίας]: *Ahasi*). A priest, ancestor of Maasiai or Amashai (Neh. xi. 13). He is called JAHZERAH in 1 Chr. ix. 12.

W. A. W.

AHASBAI [3 syl.] (אֲחַסְבַי: ὁ Ἀσβίτης [Vat. -βει-]; Alex. ὁ Αιτους; [Comp. Ἀχασβαΐ:] *Aasbai*). The father of Eliphelet, one of David's thirty-seven captains (2 Sam. xxiii. 34). In the corrupt list in 1 Chr. xi. 35, Eliphelet appears as "Eliphal the son of Ur." The LXX. regarded the name Ahasbai as denoting not the father but the family of Eliphelet. [According to Gesenius the name signifies *I have taken refuge in Jehovah.*]

W. A. W.

* **AHASHVE'ROSH.** Noted in Ezra iv. 6 in the margin of the A. V. as the Hebrew form of AHASUERUS. A.

AHASUE'RUS[a] (אֲחַשְׁוֵרוֹשׁ: Ἀσσούηρος, [Vat. Ἀσθηρος,] LXX. [in Ezra iv. 6]; but Ἀσύηρος, [Alex. Ἀσουηρος, Comp. Ald. Ἀσσούηρος,] Tob. xiv. 15: *Assuerus*, A. V. [in Tob.], Vulg.), the name of one Median and two Persian kings mentioned in the Old Testament. It may be desirable to prefix to this article a chronological table of the Medo-Persian kings from Cyaxares to Artaxerxes Longimanus, according to their ordinary classical names. The Scriptural names conjectured to correspond to them in this article and ARTAXERXES are added in italics.

1. Cyaxares, king of Media, son of Phraortes, grandson of Deioces and conqueror of Nineveh, began to reign B. C. 634. *Ahasuerus.*

2. Astyages his son, last king of Media, B. C. 594. *Darius the Mede.*

3. Cyrus, son of his daughter Mandane and Cambyses, a Persian noble, first king of Persia, 559. *Cyrus.*

4. Cambyses his son, 529. *Ahasuerus.*

5. A Magian usurper, who personates Smerdis, the younger son of Cyrus, 521. *Artaxerxes.*

6. Darius Hystaspis, raised to the throne on the overthrow of the Magi, 521. *Darius.*

7. Xerxes, his son, 485. *Ahasuerus.*

8. Artaxerxes Longimanus (Macrocheir), his son, 465–495. *Artaxerxes.*

The name Ahasuerus or Achashveroh is the same as the Sanscrit *kshatra*, a king, which appears as *kshérshé* in the arrow-headed inscriptions of Persepolis, and to this in its Hebrew form א prosthetic is prefixed (see Gibbs's Gesenius, אֲ). This name in one of its Greek forms is Xerxes, explained by Herod. (vi. 98) to mean ἀρήϊος, a signification sufficiently near that of *king*.

1. In Dan. ix. 1, Ahasuerus [LXX. Χέρξης, Theodot. Ἀσσούηρος] is said to be the father of Darius the Mede. Now it is almost certain that Cyaxares is a form of Ahasuerus, grecized into

[a] * This form in A. V. ed. 1611 may have been intended to be read Ahasverus, u being used for v, as elsewhere. A.

Digitized by Google

Axares with the prefix Cy- or Kai-, common to the Kaianian dynasty of kings (Malcolm's *Persia*, ch. lii.), with which may be compared Kai Khosroo, the Persian name of Cyrus. The son of this Cyaxares was Astyages, and it is no improbable conjecture that Darius the Mede was Astyages, set over Babylon as viceroy by his grandson Cyrus, and allowed to live there in royal state. (See Rawlinson's *Herodotus*, vol. i. Essay iii. § 11.) [DARIUS.] This first Ahasuerus, then, is Cyaxares, the conqueror of Nineveh. And in accordance with this view, we read in Tobit, xiv. 15, that Nineveh was taken by Nabuchodonosor and Assuerus, *i. e.* Cyaxares.

2. In Ezra iv. 6, the enemies of the Jews, after the death of Cyrus, desirous to frustrate the building of Jerusalem, send accusations against them to Ahasuerus, king of Persia. This must be Cambyses. For we read (v. 5) that their opposition continued from the time of Cyrus to that of Darius, and Ahasuerus and Artaxerxes, *i. e.* Cambyses and the Pseudo-Smerdis, are mentioned as reigning between them. [ARTAXERXES.] Xenophon (Cyr. viii.) calls the brother of Cambyses, Tanyoxares, *i. e.* the younger Oxares, whence we infer that the elder Oxares or Axares, or Ahasuerus, was Cambyses. His constant wars probably prevented him from interfering in the concerns of the Jews. He was plainly called after his grandfather, who was not of royal race, and therefore it is very likely that he also assumed the kingly name or title of Axares or Cyaxares which had been borne by his most illustrious ancestor.

3. The third is the Ahasuerus of the book of Esther. It is needless to give more than the heads of the well-known story. Having divorced his queen Vashti for refusing to appear in public at a banquet, he married four years afterward the Jewess Esther, cousin and ward of Mordecai. Five years after this, Haman, one of his counsellors, having been slighted by Mordecai, prevailed upon him to order the destruction of all the Jews in the empire. But before the day appointed for the massacre, Esther and Mordecai overthrew the influence which Haman had exercised, and so completely changed his feelings in the matter, that they induced him to put Haman to death, and to give the Jews the right of self-defense. This they used so vigorously that they killed several thousands of their opponents. Now from the extent assigned to the Persian empire (Esth. i. 1), "from India even unto Ethiopia," it is proved that Darius Hystaspis is the earliest possible king to whom this history can apply, and it is hardly worth while to consider the claims of any after Artaxerxes Longimanus. But Ahasuerus cannot be identical with Darius, whose wives were the daughters of Cyrus and Otanes, and who in name and character equally differs from that foolish tyrant. Neither can he be Artaxerxes Longimanus, although as Artaxerxes is a compound of Xerxes, there is less difficulty here as to the name. But in the first place the character of Artaxerxes, as given by Plutarch and by Diodorus (xi. 71), is also very unlike that of Ahasuerus. Besides this, in Ezra vii. 1–7, 11–26, Artaxerxes, in the *seventh* year of his reign, issues a decree very favorable to the Jews and it is unlikely, therefore, that in the *twelfth* (Esth. iii. 7) Haman could speak to him of them as if he knew nothing about them, and persuade him to sentence them to an indiscriminate massacre. We are therefore reduced to the belief that Ahasuerus is Xerxes (the names being, as we have seen, identical); and this conclusion is fortified by the resemblance of character, and by certain chronological indications. As Xerxes scourged the sea, and put to death the engineers of his bridge because their work was injured by a storm, so Ahasuerus repudiated his queen Vashti because she would not violate the decorum of her sex, and ordered the massacre of the whole Jewish people to gratify the malice of Haman. In the third year of the reign of Xerxes was held an assembly to arrange the Grecian war (Herod. vii. 7 ff.). In the third year of Ahasuerus was held a great feast and assembly in Shushan the palace (Esth. i. 3). In the seventh year of his reign Xerxes returned defeated from Greece, and consoled himself by the pleasures of the harem (Herod. ix. 108). In the seventh year of his reign "fair young virgins were sought" for Ahasuerus, and he replaced Vashti by marrying Esther. The tribute he "laid upon the land and upon the isles of the sea (Esth. x. 1) may well have been the result of the expenditure and ruin of the Grecian expedition. Throughout the book of Esther in the LXX. Ἀρταξέρξης is written for Ahasuerus, but on this no argument of any weight can be founded. G. E. L. C.

AHA'VA (אַהֲוָא [*water*, Ges.]: ὁ Εὐί [Vat. Ευειμ, Alex. Ευει], [in Ezr. viii. 21, 31] ὁ Ἀουέ [Vat. Θουε, Αουε]: *Ahava*), a place (Ezr. viii. 15), or a river (נְהַר) (viii. 21, 31), on the banks of which Ezra collected the second expedition which returned with him from Babylon to Jerusalem. Various have been the conjectures as to its locality; *e. g.* Adiaba (Le Clerc and Mannert); Abeh or Aveh (Hävernick, see Winer); the Great Zab (Rosenmüller, *Bib. Geogr.*). But the latest researches are in favor of its being the modern *Hit*, on the Euphrates, due east of Damascus, the name of which is known to have been in the post-biblical times Ihi, or Ihi da-kira (Talm. יהיא דקירא), "the spring of bitumen." See Rawlinson's *Herodotus*, i. 316, note.

In the apocryphal Esdras [1 Esdr. viii. 41, 61] the name is given Θεράς. Josephus (*Ant.* xi. 5, § 2) merely says εἰς τὸ πέραν τοῦ Εὐφράτου. G.

A'HAZ (אָחָז, *possessor*: Ἄχαζ; Joseph. Ἀχάζης: *Achaz*). 1. Ahaz, eleventh [twelfth?] king of Judah, son of Jotham, ascended the throne in the 20th year of his age, according to 2 K. xvi. 2. But this must be a transcriber's error for the 25th, which number is found in one Hebrew MS., the LXX., the Peshito, and Arabic version of 2 Chr. xxviii. 1; for otherwise, his son Hezekiah was born when he was eleven years old (so Clinton, *Fasti Hell.*, vol. i. p. 318). At the time of his accession, Rezin king of Damascus and Pekah king of Israel had recently formed a league against Judah, and they proceeded to lay siege to Jerusalem, intending to place on the throne Ben Tabeal, who was not a prince of the royal family of Judah, but probably a Syrian noble. Upon this the great prophet Isaiah, full of zeal for God and patriotic loyalty to the house of David, hastened to give advice and encouragement to Ahaz, and it was probably owing to the spirit of energy and religious devotion which he poured into his counsels, that the allies failed in their attack on Jerusalem. Thus much, together with anticipations of danger from the Assyrians, and a general picture of weakness and unfaithfulness both in the king and the people, we find in

Digitized by Google

the famous prophecies of the 7th, 8th, and 9th chapters of Isaiah, in which he seeks to animate and support them by the promise of the Messiah. From 2 K. xvi. and 2 Chr. xxviii. we learn that the allies took a vast number of captives, who, however, were restored in virtue of the remonstrances of the prophet Oded; and that they also inflicted a most severe injury on Judah by the capture of Elath, a flourishing port on the Red Sea, in which, after expelling the Jews, they reëstablished the Edomites (according to the true reading of 2 K. xvi. 6, אֲרוֹמִים for אֲרָמִים), who attacked and wasted the E. part of Judah, while the Philistines invaded the W. and S. The weak-minded and helpless Ahaz sought deliverance from these numerous troubles by appealing to Tiglath-pileser king of Assyria, who freed him from his most formidable enemies by invading Syria, taking Damascus, killing Rezin, and depriving Israel of its Northern and Transjordanic districts. But Ahaz had to purchase this help at a costly price. He became tributary to Tiglath-pileser, sent him all the treasures of the Temple and his own palace, and even appeared before him in Damascus as a vassal. He also ventured to seek for safety in heathen ceremonies; making his son pass through the fire to Moloch, consulting wizards and necromancers (Is. viii. 19), sacrificing to the Syrian gods, introducing a foreign altar from Damascus, and probably the worship of the heavenly bodies from Assyria and Babylon, as he would seem to have set up the horses of the sun mentioned in 2 K. xxiii. 11 (cf. Tac. Ann. xii. 13); and "the altars on the top (or roof) of the upper chamber of Ahaz" (2 K. xxiii. 12) were connected with the adoration of the stars. We see another and blameless result of this intercourse with an astronomical people in the "sundial of Ahaz," Is. xxxviii. 8.[a] He died after a reign of 16 years, lasting B. C. 740–724. G. E. L. C.

2. (*Ahaz.*) A son of Micah, the grandson of Jonathan through Meribbaal or Mephibosheth (1 Chr. viii. 35, 36. ix. 42). W. A. W.

AHAZI'AH (אֲחַזְיָה, אֲחַזְיָהוּ, *whom Jehovah sustains:* Ὀχοζίας [Vat. -ζει-]: *Ochozias.*) 1. Son of Ahab and Jezebel, and eighth king of Israel. After the battle of Ramoth in Gilead [AHAB] the Syrians had the command of the country along the east of Jordan, and they cut off all communication between the Israelites and Moabites, so that the vassal king of Moab refused his yearly tribute of 100,000 lambs and 100,000 rams with their wool (comp. Is. xvi. 1). Before Ahaziah could take measures for enforcing his claim, he was seriously injured by a fall through a lattice in his palace at Samaria. In his health he had worshipped his mother's gods, and now he sent to inquire of the oracle of Baalzebub in the Philistine city of Ekron whether he should recover his health. But Elijah, who now for the last time exercised the prophetic office, rebuked him for this impiety, and announced to him his approaching death. He reigned two years (B. C. 896, 895). The only other recorded transaction of his reign, his endeavor to join the king of Judah in trading to Ophir, is more fitly related under JEHOSHAPHAT (1 K. xxii. 50 ff.; 2 K. i.; 2 Chr. xx. 35 ff.).

2. Fifth [sixth] king of Judah, son of Jehoram and Athaliah, daughter of Ahab, and therefore nephew of the preceding Ahaziah. He is called Azariah, 2 Chr. xxii. 6, probably by a copyist's error and Jehoahaz, 2 Chr. xxi. 17. Ewald (*Geschichte des Volkes Israel*, iii. 525) thinks that his name was changed to Ahaziah on his accession, but the LXX. read Ὀχοζίας for Jehoahaz, and with this agree the Peshito, Chald., and Arab. So too, while in 2 K. viii. 26 we read that he was 22 years old at his accession, we find in 2 Chr. xxii. 2, that his age at that time was 42. The former number is certainly right, as in 2 Chr. xxi. 5, 20, we see that his father Jehoram was 40 when he died, which would make him younger than his own son, so that a transcriber must have confounded כב (22) and מב (42). Ahaziah was an idolater, "walking in all the ways of the house of Ahab," and he allied himself with his uncle Jehoram king of Israel, brother and successor of the preceding Ahaziah, against Hazael, the new king of Syria. The two kings were, however, defeated at Ramoth, where Jehoram was so severely wounded that he retired to his mother's palace at Jezreel to be healed. The union between the uncle and nephew was so close that there was great danger lest heathenism should entirely overspread both the Hebrew kingdoms, but this was prevented by the great revolution carried out in Israel by Jehu under the guidance of Elisha, which involved the house of David in calamities only less severe than those which exterminated the house of Omri. It broke out while Ahaziah was visiting his uncle at Jezreel. As Jehu approached the town, Jehoram and Ahaziah went out to meet him, either from not suspecting his designs, or to prevent them. The former was shot through the heart by Jehu; Ahaziah was pursued as far as the pass of Gur, near the city of Ibleam, and there mortally wounded. He died when he reached Megiddo. But in 2 Chr. xxii. 9, it is said that Ahaziah was found hidden in Samaria after the death of Jehoram, brought to Jehu, and killed by his orders. Attempts to reconcile these accounts may be found in Pole's *Synopsis*, in Lightfoot's *Harm. of Old Test.* (in loc.), and in Davidson's *Text of the Old Testament*, part ii. book ii. ch. xiv. Ahaziah reigned one year, B. C. 884, called the 12th of Jehoram, king of Israel, 2 K. viii. 25, the 11th, 2 K. ix. 29. His father therefore must have died before the 11th [year] of Jehoram was concluded (Clinton, *Fasti Hell.* i. 324). G. E. L. C.

* It being possible that the two accounts, taken singly, are fragmentary, they may supplement each other. Ahaziah escaping "by the way of the garden house," Jehu ordered his men to pursue and slay him in his chariot (2 K. ix. 27); but being too swift for his pursuers, he reached Samaria and there concealed himself for a time, till Jehu, "executing judgment upon the house of Ahab," sought him out, and had him put to death (2 Chr. xxii. 8, 9). For the fuller circumstances of the death we turn again to 2 K. ix. 27. Jehu ordered his captive to be taken (perhaps under some pretense of a friendly object) to "the going up (ascent) to Gur near Ibleam," and there he was slain in his chariot (i. e. received the deadly blow there, though he escaped and actually died at Megiddo). According to another slightly varied combination, Ahaziah may have managed, after being brought before Jehu from his place of concealment, to escape again, and instead of being decoyed to Gur for execution, may have been overtaken there as he fled in his chariot and put to death as before stated. It is worth

noticing (see the Hebrew text and the italics in the A. V.: "And *they did so*") that the slaying of Ahaziah at Gur (2 K. ix. 27) stands loosely related to what precedes, as if his being slain there was the *final* execution of Jehu's order after various delays had intervened. See Keil, *Comm üb. die Bücher der Könige*, p. 402; and Zeller's *Bibl. Wörterb.* p. 42. [AZARIAH 12.] H.

AHI'BAN (אֲחִבָּן [*brother of the wise*, or *brotherly*]: Ἀχαβάρ; Alex. Ὀζά; [Ald. Ὀζβᾶ; Comp. Ἀβάν:] *Ahobban*). Son of Abishur, by his wife Abihail (1 Chr. ii. 29). He was of the tribe of Judah. W. A. W.

A'HER (אַחֵר [*another*]: Ἀόρ; [Vat. M. Αερ, H. Δερ; Comp. Ἀχέρ:] *Aher*). Ancestor of Hushim, or rather "the Hushim," as the plural form seems to indicate a family rather than an individual. The name occurs in an obscure passage in the genealogy of Benjamin (1 Chr. vii. 12). Some translators consider it as not a proper name at all, and render it literally "another," because, as Rashi says, Ezra, who compiled the genealogy, was uncertain whether the families belonged to the tribe of Benjamin or not. It is not improbable that Aher and Ahiram (Num. xxvi. 38) are the same; unless the former belonged to the tribe of Dan, whose genealogy is omitted in 1 Chr. vii.; Hushim being a Danite as well as a Benjamite name. W. A. W.

A'HI (אָחִי, *brother*: ἀδελφοῦ: *fratres*). 1. A Gadite, chief of a family who lived in Gilead in Bashan (1 Chr. v. 15), in the days of Jotham, king of Judah. By the LXX. and Vulgate the word was not considered a proper name. [But for Βοὺζ ἀδελφοῦ of the Roman edition, Vat. M. has Ζαβουχαμ (H. Ζαβουλαμ), and Alex. with 7 other MSS. Αχιβουζ. — A.]

2. (Ἀχί; [Vat. M. Αχιουια, H. Αχιουιλ:] *Ahi*.) A descendant of Shamer, of the tribe of Asher (1 Chr. vii. 34). The name, according to Gesenius, is a contraction of AHIJAH.

AHI'AH. [AHIJAH.]

AHI'AM (אֲחִיאָם, for אֲחִיאָב [*father's brother*], Gesen.: [in 2 S.] Ἀμνάν; [Ald. Ἀχιάν; Comp. Ἀχιάμ; in 1 Chr. Ἀχίμ; Vat. Αχειμ; Comp. Alex. Ἀχιάμ:] *Ahiam*), son of Sharar the Hararite (or of Sacar, 1 Chr. xi. 35), one of David's 30 mighty men (2 Sam. xxiii. 33).

AHI'AN (אֲחִיָן: Ἀχίμ; [Vat. Ιααιμ; Alex. Αειμ:] *Ahin*). A Manassite of the family of Shemida (1 Chr. vii. 19). W. A. W.

AHIE'ZER (אֲחִיעֶזֶר: [*brother of help*, or *God is help*]: Ἀχιέζερ: *Ahiezer*). 1. Son of Ammishaddai, hereditary chieftain of the tribe of Dan under the administration of Moses (Num. i. 12, ii. 25, vii. 66, [71, x. 25]).

2. The Benjamite chief of a body of archers at the time of David (1 Chr. xii. 3). R. W. B.

AHI'HUD (אֲחִיהוּד [*brother* = friend, *of the Jews*, or *of renown*]: Ἀχιώρ; [Alex. Αχιωβ:] *Ahiud*.) 1. The son of Shelomi, and prince of the tribe of Asher, selected to assist Joshua and Eleazar in the division of the Promised Land (Num. xxxiv. 27).

2. (אֲחִיחוּד [*brother* = friend *of union*]: Ἰαχιχώδ; [Vat. Ιαχειχωλ; Alex. Αχιχωδ; Comp. Ἀχιούδ:] *Ahiud*), chieftain of the tribe of Benjamin (1 Chr. viii. 7). R. W. B.

AHI'JAH, or **AHI'AH** (אֲחִיָּה and אֲחִיָּהוּ [*friend of Jehovah*]: Ἀχιά [Vat. -χει-]: *Achias*). 1. Son of Ahitub, Ichabod's brother, the son of Phinehas, the son of Eli (1 Sam. xiv. 3, 18). He is described as being the Lord's priest in Shiloh, wearing an ephod. And it appears that the ark of God was under his care, and that he inquired of the Lord by means of it and the ephod (comp. 1 Chr. xiii. 3). There is, however, great difficulty in reconciling the statement in 1 Sam. xiv. 18, concerning the ark being used for inquiring by Ahijah at Saul's bidding, and the statement that they inquired not at the ark in the days of Saul, if we understand the latter expression in the strictest sense.

This difficulty seems to have led to the reading in the Vatican copy of the LXX., of τὸ ἐφούδ, in 1 Sam. xiv. 18, instead of τὴν κιβωτόν, or rather perhaps of אֲרוֹן, instead of אָרוֹן, in the Hebrew codex from which that version was made. Others avoid the difficulty by interpreting אָרוֹן to mean a chest for carrying about the ephod in. But all difficulty will disappear if we apply the expression only to all the latter years of the reign of Saul, when we know that the priestly establishment was at Nob, and not at Kirjath-jearim, or Baale of Judah, where the ark was. But the narrative in 1 Sam. xiv. is entirely favorable to the mention of the ark. For it appears that Saul was at the time in Gibeah of Benjamin, and Gibeah of Benjamin seems to have been the place where the house of Abinadab was situated (2 Sam. vi. 3), being probably the Benjamite quarter of Kirjath-jearim, which lay on the very borders of Judah and Benjamin. (See Josh. xviii. 14, 28.) Whether it was the encroachments of the Philistines, or an incipient schism between the tribes of Benjamin and Judah, or any other cause, which led to the disuse of the ark during the latter years of Saul's reign, is difficult to say. But probably the last time that Ahijah inquired of the Lord before the ark was on the occasion related 1 Sam. xiv. 36, when Saul marred his victory over the Philistines by his rash oath, which nearly cost Jonathan his life. For we there read that when Saul proposed a night-pursuit of the Philistines, the priest, Ahijah, said, "Let us draw near hither unto God," for the purpose, namely, of asking counsel of God. But God returned no answer, in consequence, as it seems, of Saul's rash curse. If, as is commonly thought, and as seems most likely, Ahijah is the same person as Ahimelech the son of Ahitub, this failure to obtain an answer from the priest, followed as it was by a rising of the people to save Jonathan out of Saul's hands, may have led to an estrangement between the king and the high-priest, and predisposed him to suspect Ahimelech's loyalty, and to take that terrible revenge upon him for his favor to David. Such changes of name as Ahi-melech and Ahi-jah are not uncommon. (See *Genealogies*, p. 115–118.)[a] However, it is not impossible that, as Gesenius supposes, Ahimelech may have been brother to Ahijah.

2. [*Achia.*] Son of Bela (1 Chr. viii. 7) [Probably the same as Ahoah, 1 Chr. viii. 4. —A.]

[a] Where we have the further article of *Ahimelech* in *Ahimelech*.

Digitized by Google

3. [LXX. ἀδελφὸς αὐτοῦ: *Achia.*] Son of Jerahmeel (1 Chr. ii. 25).

4. [*Ahia.*] One of David's mighty men, a Pelonite (1 Chr. xi. 36).

5. [LXX. ἀδελφοὶ αὐτῶν: *Ahias.*] A Levite in David's reign, who was over the treasures of the house of God, and over the treasures of the dedicated things (1 Chr. xxvi. 20).

6. [*Ahia.*] One of Solomon's princes, brother of Elihoreph, and son of Shisha (1 K. iv. 3).

7. [*Ahias.*] A prophet of Shiloh (1 K. xiv. 2), hence called the Shilonite (xi. 29) in the days of Solomon and of Jeroboam king of Israel, of whom we have two remarkable prophecies extant: the one in 1 K. xi. 31–39, addressed to Jeroboam, announcing the rending of the ten tribes from Solomon, in punishment of his idolatries, and the transfer of the kingdom to Jeroboam: a prophecy which, though delivered privately, became known to Solomon, and excited his wrath against Jeroboam, who fled for his life into Egypt, to Shishak, and remained there till Solomon's death. The other prophecy, in 1 K. xiv. 6–16, was delivered in the prophet's extreme old age to Jeroboam's wife, in which he foretold the death of Abijah, the king's son, who was sick, and to inquire concerning whom the queen was come in disguise, and then went on to denounce the destruction of Jeroboam's house on account of the images which he had set up, and to foretell the captivity of Israel "beyond the river" Euphrates. These prophecies give us a high idea of the faithfulness and boldness of Ahijah, and of the eminent rank which he attained as a prophet. Jeroboam's speech concerning him (1 K. xiv. 2, 3) shows the estimation in which he held his truth and prophetic powers. In 2 Chr. ix. 29 reference is made to a record of the events of Solomon's reign contained in the "prophecy of Ahijah the Shilonite." If there were a larger work of Ahijah's, the passage in 1 K. xi. is doubtless an extract from it.

8. [*Ahias.*] Father of Baasha, king of Israel, the contemporary of Asa, king of Judah. He was of the tribe of Issachar (1 K. xv. 27, 33). [Occurs also 1 K. xxi. 22; 2 K. ix. 9.] A. C. H.

9. ('Αία; [Vat. Αρα:] *Echaïa.*) One of the heads of the people who sealed the covenant with Nehemiah (Neh. x. 26). W. A. W.

AHI'KAM (אֲחִיקָם [*brother of the enemy*]: Αχικάμ [Vat. -χει-]: *Ahicam*), a son of Shaphan the scribe, an influential officer at the court of Josiah (2 K. xxii. 12), and of Jehoiakim his son (Jer. xxvi. 24). When Shaphan brought the book of the law to Josiah, which Hilkiah the high priest had found in the temple, Ahikam was sent by the king, together with four other delegates, to consult Huldah the prophetess on the subject. In the reign of Jehoiakim, when the priests and prophets arraigned Jeremiah before the princes of Judah on account of his bold denunciations of the national sins, Ahikam successfully used his influence to protect the prophet. His son Gedaliah was made governor of Judah by Nebuchadnezzar, the Chaldæan king, and to his charge Jeremiah was entrusted when released from prison (Jer. xxxix. 14, xl. 5). R. W. B.

AHI'LUD (אֲחִילוּד [*brother of one born*, Jes.; or *Ach*, i. e. *God, who originates*, Fürst: Rom.] 'Αχιλούδ; 'Αχιλούθ [Vat. -χει-] in 2 Sam. xx. 24; [Vat. Αχεια in 2 Sam. viii. 16 and 1 Chr.; in 1 K. iv. 3, Vat. M. Αχειλιαδ, H. Αχειλαδ:] Alex. Αχιμελεχ 2 Sam. viii. 16, Αχμα 1 K. iv. 3: *Ahilud*). 1. Father of Jehoshaphat, the recorder or chronicler of the kingdom in the reigns of David and Solomon (2 Sam. viii. 16, xx. 24; 1 K. iv. 3; 1 Chr. xviii. 15).

2. ('Αχιλούθ; [Vat. Αχειμαχ;] Alex. Ελουδ.) The father of Baana, one of Solomon's twelve commissariat officers (1 K. iv. 12). It is uncertain whether he is the same as the foregoing. W. A. W.

AHIM'AAZ [*Heb.* Ahima'az] (אֲחִימַעַץ [*brother of anger*, i. e. *irascible*]: 'Αχιμάας; [Vat. Αχειναας:] *Achimaas*). 1. Father of Saul's wife, Ahinoam (1 Sam. xiv. 50).

2. [Vat. Αχειμαας, etc.] Son of Zadok, the priest in David's reign. When David fled from Jerusalem on account of Absalom's rebellion, Zadok and Abiathar, accompanied by their sons Ahimaaz and Jonathan, and the Levites, carried the ark of God forth, intending to accompany the king. But at his bidding they returned to the city, as did likewise Hushai the Archite. It was then arranged that Hushai should feign himself to be a friend of Absalom, and should tell Zadok and Abiathar whatever intelligence he could obtain in the palace. They, on their parts, were to forward the intelligence through Ahimaaz and Jonathan. Accordingly Jonathan and Ahimaaz stayed outside the walls of the city at En-Rogel, on the road towards the plain. A message soon came to them from Zadok and Abiathar through the maid-servant, to say that Ahithophel had counselled an immediate attack against David and his followers, and that, consequently, the king must cross the Jordan without the least delay. They started at once on their errand, but not without being suspected, for a lad seeing the wench speak to them, and seeing them immediately run off quickly — and Ahimaaz, we know, was a practiced runner — went and told Absalom, who ordered a hot pursuit. In the mean time, however, they had got as far as Bahurim, the very place where Shimei cursed David (2 Sam. xvi. 5), to the house of a steadfast partizan of David's. Here the woman of the house effectually hid them in a well in the court-yard, and covered the well's mouth with ground or bruised corn. Absalom's servants coming up searched for them in vain; and as soon as they were gone, and returned on the road to Jerusalem, Ahimaaz and Jonathan hasted on to David, and told him Ahithophel's counsel, and David with his whole company crossed the Jordan that very night. Ahithophel was so mortified at seeing the failure of his scheme, through the unwise delay in executing it, that he went home and hanged himself. This signal service rendered to David, at the hazard of his life, by Ahimaaz, must have tended to ingratiate him with the king. We have a proof how highly he was esteemed by him, as well as an honorable testimony to his character, in the saying of David recorded 2 Sam. xviii. 27. For when the watchman announced the approach of a messenger, and added, that his running was like the running of Ahimaaz, the son of Zadok, the king said, "He is a good man, and cometh with good tidings."

The same transaction gives us a very curious specimen of the manners of the times, and a singular instance of oriental or Jewish craft in Ahimaaz. For we learn, first, that Ahimaaz was a professed runner — and a very swift one too — which one would hardly have expected in the son of the high priest. It belongs, however, to a simple state of

Digitized by Google

society that bodily powers of any kind should be highly valued, and exercised by the possessor of them in the most natural way Ahimaas was probably naturally swift, and so became famous for his running (2 Sam. xviii. 27). So we are told of Asahel, Joab's brother, that "he was as light of foot as a wild roe" (2 Sam. ii. 18). And that quick running was not deemed inconsistent with the utmost dignity and gravity of character appears from what we read of Elijah the Tishbite, that "he girded up his loins and ran before Ahab (who was in his chariot) to the entrance of Jezreel" (1 K. xviii. 46). The kings of Israel had running footmen to precede them when they went in their chariots (2 Sam. xv. 1; 1 K. i. 5), and their guards were called רָצִים, runners. It appears by 2 Chr. xxx. 6, 10, that in Hezekiah's reign there was an establishment of running messengers, who were also called רָצִים. The same name is given to the Persian posts in Esth. iii. 13, 15, viii. 14; though it appears from the latter passage that in the time of Xerxes the service was performed with mules and camels. The Greek name, borrowed from the Persian, was ἄγγαροι. As regards Ahimaaz's craftiness we read that when Absalom was killed by Joab and his armor-bearers Ahimaaz was very urgent with Joab to be employed as the messenger to run and carry the tidings to David. The politic Joab, well knowing the king's fond partiality for Absalom, and that the news of his death would be anything but good news to him, and, apparently, having a friendly feeling towards Ahimaaz, would not allow him to be the bearer of such tidings, but employed Cushi instead. But after Cushi had started, Ahimaaz was so urgent with Joab to be allowed to run too that at length he extorted his consent. Taking a shorter or an easier way by the plain he managed to outrun Cushi before he got in sight of the watch-tower, and, arriving first, he reported to the king the good news of the victory, suppressing his knowledge of Absalom's death, and leaving to Cushi the task of announcing it. He had thus the merit of bringing good tidings without the alloy of the disaster of the death of the king's son. This is the last we hear of Ahimaaz, for the Ahimaaz of 1 K. iv. 15, who was Solomon's captain in Naphtali, was certainly a different person. There is no evidence, beyond the assertion of Josephus, that he ever filled the office of high-priest; and Josephus may have concluded that he did, merely because, in the genealogy of the high-priests (1 Chr. vi. 8, 9), he intervenes between Zadok and Azariah. Judging only from 1 K. iv. 2, compared with 1 Chr. vi. 10, we should conclude that Ahimaaz died before his father Zadok, and that Zadok was succeeded by his grandson Azariah. Josephus's statement that Zadok was the first high-priest of Solomon's temple, seeing the temple was not finished till the eleventh year of his reign, is a highly improbable one in itself. The statement of the *Seder Olam*, which makes Ahimaaz high-priest in Rehoboam's reign, is still more so. It is safer, therefore, to follow the indications of the Scripture narative, though somewhat obscured by the apparently corrupted passages, 1 K. iv. 4, and 1 Chr. vi. 9, 10, and conclude that Ahimaaz died before he attained the high-priesthood, leaving as his heir his son Azarias.

3. Solomon's officer in Naphtali, charged with providing victuals for the king and his household for one month in the year. He was probably of the tribe of Naphtali, and was the king's son in law, having married his daughter Basmath (1 K iv. 7, 15). A. C. H.

AHI'MAN (אֲחִימָן) [*brother of a gift*, Ges.] 'Αχιμάν, ['Αχμᾶ, Vat. -χει-; in Judg., Vat.] Αχιναάν; Alex. Αχιαμ, Αχιμααμ:] *Achiman*, [*Ahiman*]). 1. One of the three giant Anakim who inhabited Mount Hebron (Num. xiii. 22, 33; [Josh. xv. 14]), seen by Caleb and the spies. The whole race were cut off by Joshua (Josh. xi. 21), and the three brothers were slain by the tribe of Judah (Judg. i. 10). R. W. B.

2. (Διμάν; [Vat. M. Αιμαμ, H. Διμαμ; Ald.] Alex. Αἰμάν, [Comp. 'Αχιμάν:] *Ahimm.*) One of the porters or gatekeepers, who had charge of the king's gate for the "camps" of the sons of Levi (1 Chr. ix. 17). W. A. W.

AHIM'ELECH [*Heb.* -me'lech] (אֲחִימֶלֶךְ) [*brother of the king*]: 'Αχιμέλεχ and 'Αβιμέλεχ; [Vat. -χει- and -βει-; Alex. Αμιμ-, Αβιμ-, Αχιμελεχ, Αχιμελεκ:] *Achimelech*, [*Ahimelech*]). 1. Son of Ahitub (1 Sam. xxii. 11), and high-priest at NOB in the days of Saul. He gave David the showbread to eat, and the sword of Goliath; and for so doing was, upon the accusation of Doeg the Edomite, put to death with his whole house by Saul's order. Eighty-five priests wearing an ephod were thus cruelly slaughtered; Abiathar alone escaped. [ABIATHAR.] The LXX. read *three hundred and five men*, thus affording another instance of the frequent clerical errors in transcribing numbers, of which Ezr. ii. compared with Neh. vii. is a remarkable example. The interchange of שְׁמֹנִים, or שְׁמֹנָה, with שְׁלֹשִׁים and שָׁלֹשׁ, is very common. For the question of Ahimelech's identity with Ahijah, see AHIJAH. For the singular confusion [or apparent confusion] between *Ahimelech* and *Abiathar* in the 1st Book of Chronicles see ABIATHAR. [The name occurs 1 Sam. xxi. 1, 2, 8, xxii. 9, 11, 14, 16, 20, xxiii. 6, xxx. 7; 2 Sam. viii. 17; 1 Chr. xxiv. 3, 6, 31; Ps. lii. title.]

2. ['Αβιμέλεχ; Vat.[1] Αβειμελεχ, 2. m. Αχειμελεχ: *Achimelech.*] One of David's companions while he was persecuted by Saul, a Hittite; called in the LXX. *Abimelech*; which is perhaps the right reading, after the analogy of Abimelech, king of Gerar (1 Sam. xxvi. 6). In the title of Ps xxxiv. אֲבִימֶלֶךְ [ABIMELECH, ACHISH] seems to be a corrupt reading for אָכִישׁ מֶלֶךְ גַּת. See 1 Sam. xxi. 13 (12, in A. V.). A. C. H.

AHI'MOTH (אֲחִימוֹת) [*brother of death*]: 'Αχιμάθ; [Vat. Αλειμαθ:] *Achimoth*), a Levite of the house of the Korhites, of the family of the Kohathites, apparently in the time of David (1 Chr. vi. 25). In ver. 35, for *Ahimoth* we find *Mahath* (מַחַת), *Maáθ*, as in Luke iii. 26. For a correction of these genealogies, see *Genealogies of our Lord and Saviour Jesus Christ*, p. 214, note. A. C. H.

AHIN'ADAB (אֲחִינָדָב) [*noble brother*]: 'Αχιναδάβ; [Vat. Αχεινααβ; Alex. Αἰναβαβ:] *Ahinadab*), son of Iddo, one of Solomon's twelve commissaries who supplied provisions for the royal household. The district entrusted to Ahinadab

Digitized by Google

was that of Mahanaim, situated on the east of the Jordan (1 K. iv. 14). R. W. B.

AHIN'OAM [*Heb.* -no'am] (אֲחִינֹעַם [*brother of grace* or *beauty*; according to Fürst's theory, *Ach*, i. e. God, *is grace*]: Ἀχινοόμ; Alex. Ἀχεινοομ; [Comp. Ἀχιναάμ:] *Achinoam*). 1. Daughter of Ahimaaz and wife of Saul (1 Sam. xiv. 50.) W. A. W.

2. [Ἀχιναάμ, Ἀχινόομ, Vat. Ἀχεινοομ, etc.] A woman of Jezreel, whose masculine name may be compared with that of Abigail, *father of joy*. It was not uncommon to give women names compounded with אָב (*father*) and אָח (*brother*). Ahinoam was married to David during his wandering life (1 Sam. xxv. 43), lived with him and his other wife Abigail at the court of Achish (xxvii. 3), was taken prisoner with her by the Amalekites when they plundered Ziklag (xxx. 5), but was rescued by David (18). She is again mentioned as living with him when he was king of Judah in Hebron (2 Sam. ii. 2); and was the mother of his eldest son Amnon (iii. 2 [also 1 Chr. iii. 1]). G. E. L. C.

AHI'O (אַחְיוֹ [*brotherly*]: οἱ ἀδελφοὶ αὐτοῦ: *Ahio*, 2 Sam. vi. 3, 4; *frater ejus*, 1 Chr. xiii. 7). 1. Son of Abinadab who accompanied the ark when it was brought out of his father's house (2 Sam. vi. 3, 4; 1 Chr. xiii. 7).

2. (אֲחִיו [*brotherly*]: ἀδελφὸς αὐτοῦ; Alex. οἱ ἀδελφοι αυτου: *Ahio*.) A Benjamite, one of the sons of Beriah, who drove out the inhabitants of Gath (1 Chr. viii. 14). According to the Vat. MS. the LXX. must have read אֲחִיו, according to the Alex. MS. אֲחִיוֹ.

3. A Benjamite, son of Jehiel, father or founder of Gibeon (1 Chr. viii. 31, ix. 37). In the last quoted passage the Vatican MS. [as also Sin.] has ἀδελφός and the Alex. ἀδελφοί. W. A. W.

AHI'RA (אֲחִירַע [*brother of evil*]: Ἀχιρέ [Vat. generally -χει-]: *Ahira*), chief of the tribe of Naphtali when Moses took the census in the year after the Exodus (Num. i. 15, ii. 29, vii. 78, 83, x. 27). R. W. B.

AHI'RAM (אֲחִירָם [*brother exalted*]: Ἰαχιράμ [Vat. -χει-]; [Alex. Ἀχιραμ:] *Ahiram*), son of Benjamin (Num. xxvi. 38), called Ehi in Gen. xlvi. 21, [and perhaps the same as AHER, which see.]

AHI'RAMITES, THE (הָאֲחִירָמִי: ὁ Ἰαχιραμί; [Vat. ο Ιαχειραμει:] Alex. ο Ἀχιραμ; [Ald. ὁ Ἀχειραμί:] *Ahiramitæ*). One of the branches of the tribe of Benjamin, descendants of Ahiram (Num. xxvi. 38). W. A. W.

AHIS'AMACH [*Heb.* -sa'mash] (אֲחִיסָמָךְ [*brother of support*]: Ἀχισαμάχ: *Achisamech*). A Danite, father of Aholiab, one of the architects of the tabernacle (Ex. xxxi. 6, xxxv. 34, xxxviii. 23). W. A. W.

AHISH'AHAR [*Heb.* -sha'har] (אֲחִישַׁחַר [*brother of the dawn*]: Ἀχισαδάρ; [Vat. Αχεισαδαρ:] *Ahisahar*). One of the sons of Bilhan, the grandson of Benjamin (1 Chr. vii. 10). W. A. W.

AHI'SHAR (אֲחִישָׁר [*brother of the singer* or *upright*]: Ἀχισάρ; [Vat. Αχει:] *Ahisar*), the controller of Solomon's household (1 K. iv. 6).

AHITH'OPHEL [*Hebrew* Ahitho'phel] (אֲחִיתֹפֶל [*brother of foolishness*]: Ἀχιτόφελ [Vat. -χει-]; Joseph. Ἀχιτόφελος: *Achitophel*) a native of Giloh, in the hill country of Judah (Josh. xv. 51), and privy councillor of David, whose wisdom was so highly esteemed, that his advice had the authority of a divine oracle, though his name had an exactly opposite signification (2 Sam. xvi. 23). He was the grandfather of Bathsheba (comp. 2 Sam. xi. 3 with xxiii. 34). She is called daughter of Ammiel in 1 Chr. iii. 5; but עַמִּיאֵל is only the anagram of אֱלִיעָם. Absalom immediately [as soon as] he had revolted sent for him, and when David heard that Ahithophel had joined the conspiracy, he prayed Jehovah to turn his counsel to foolishness (xv. 31), alluding possibly to the signification of his name. David's grief at the treachery of his confidential friend found expression in the Messianic prophecies (Ps. xli. 9, lv. 12–14).

In order to show to the people that the breach between Absalom and his father was irreparable, Ahithophel persuaded him to take possession of the royal harem (2 Sam. xvi. 21). David, in order to counteract his counsel, sent Hushai to Absalom. Ahithophel had recommended an immediate pursuit of David; but Hushai advised delay, his object being to send intelligence to David, and give to him time to collect his forces for a decisive engagement. When Ahithophel saw that Hushai's advice prevailed, he despaired of success, and returning to his own home "put his household in order and hung himself" (xvii. 1–23). (See Joseph. *Ant.* vii. 9, § 8; Niemeyer, *Charakt.* iv. 454; Ewald, *Geschich.* ii. 652.) R. W.B.

* Ahithophel is certainly a very singular name for a man who had such a reputation for sagacity; and it is very possible it was derisively applied to him after his death in memory of his infamous advice to Absalom, which the result showed to be so foolish, while it was utterly disastrous to himself. For other conjectures on this point see Wilkinson's *Personal Names of the Bible*, p. 384 (London, 1865). This case of Ahithophel is the only instance of suicide mentioned in the Old Testament (except in war) as that of Judas is the only one in the New Testament. H.

AHI'TUB (אֲחִיטוּב [*brother of goodness*; or, *God is good*, Fürst]: Ἀχιτώβ: *Achitob*). 1. Father of Ahimelech, or Ahijah, the son of Phinehas, and the elder brother of Ichabod (1 Sam. xiv. 3, xxii. 9, 11), and therefore of the house of Eli and the family of Ithamar. There is no record of his high-priesthood, which, if he ever was high-priest, must have coincided with the early days of Samuel's judgeship.

2. [Vat. Αχειτωβ; in Neh. xi. 11, Rom. Αἰτώθ, Vat. Απωβωχ, FA. Αποβωχ, Ald. Alex Αἰτώβ, Comp. Ἀχιτώβ.] Son of Amariah and father of Zadok the high-priest (1 Chr. vi. 7, 8, 52, xviii. 16; 2 Sam. viii. 17), of the house of Eleazar. From 1 Chr. ix. 11, where the genealogy of Azarian, the head of one of the priestly families that returned from Babylon with Zerubbabel, is traced, through Zadok, to "Ahitub, the ruler of the house of God," it appears tolerably certain that Ahitub was high priest. And so the LXX. version unequivocally renders it υἱοῦ Ἀχιτὼβ ἡγουμένου οἴκου τοῦ Θεοῦ

The expression נָגִיד בֵּית הָאֱ is applied to Azariah the high-priest in Hezekiah's reign in 2 Chr. xxxi. 13. The passage is repeated in Neh. xi. 11, but the LXX. have spoilt the sense by rendering נָגִיד ἀνέστησε, as if it were נָגַד. If the line is correctly given in these two passages, Ahitub was not the father, but the grandfather of Zadok, his father being Meraioth. But in 1 Chr. vi. 8, and in Ezr vii. 2, Ahitub is represented as Zadok's father. This uncertainty makes it difficult to determine the exact time of Ahitub's high-priesthood. If he was father to Zadok he must have been high-priest with Ahimelech. But if he was grandfather, his age would have coincided exactly with the other Ahitub, the son of Phinehas. Certainly a singular coincidence.

3. [Vat. Αχειτωβ.] The genealogy of the high-priests in 1 Chr. vi. 11, 12, introduces another AHITUB, son of another Amariah, and father of another Zadok. At p. 287 of the *Genealogies* will be found reasons for believing that the second Ahitub and Zadok are spurious. A. C. H.

AHLAB (אַחְלָב [*fertility*]: Αλαφ; [Comp. Αχλαβ:] *Achlab*), a city of Asher from which the Canaanites were not driven out (Judg. i. 31). Its omission from the list of the towns of Asher, in Josh. xix., has led to the suggestion (Bertheau on Judg.) that the name is but a corruption of Achshaph; but this appears extravagant. It is more probable that Achlab reappears in later history as Gush Chaleb, גּוּשׁ חֲלָב, or Giscala, (Reland, pp. 813, 817), a place lately identified by Robinson under the abbreviated name of *el-Jish*, near *Safed*, in the hilly country to the N. W. of the Sea of Galilee (Rob. ii. 446, iii. 73). Gush Chaleb was in Rabbinical times famous for its oil (see the citations in Reland, p. 817), and the old olive-trees still remain in the neighborhood (Rob. iii. 72). From it came the famous John, son of Levi, the leader in the siege of Jerusalem (Jos. *Vit.* § 10; *B. J.* ii. 21, § 1), and it had a legendary celebrity as the birthplace of the parents of no less a person than the Apostle Paul (Jerome, quoted by Reland, p. 813). [GISCHALA.] G.

AHLAI [2 syl.] (אַחְלַי [*O that*, a wish]: Αβαλ [Vat. Αχαι], Αχαϊδ; Alex. Αβαι, Ολι; [Comp. Οιλαι, Αλαι; Ald. Αβαλ, Οολι:] *Oholai*, *Oholi*). Daughter of Sheshan, whom he gave in marriage to his Egyptian slave Jarha (1 Chr. ii. 31, 35). In consequence of the failure of male issue, Ahlai became the foundress of an important branch of the family of the Jerahmeelites, and from her were descended Zabad, one of David's mighty men (1 Chr. xi. 41), and Azariah, one of the captains of hundreds in the reign of Joash (2 Chr. xxiii. 1; comp. 1 Chr. ii. 38). W. A. W.

AHO'AH (אֲחֹחִ, probably another form of אֲחִיָּה [*friend of Jehovah*]: Αχιδ; [Comp. Αδδ:] *Ahoe*), son of Bela, the son of Benjamin (1 Chr. viii. 4). The patronymic Aahite (אֲחֹחִי) is found in 2 Sam. xxiii. 9, 28; 1 Chr. xi. 12, 29, xxvii. 4). [EHI.]

AHO'HITE. [AHOAH.]

AHO'LAH (אָהֳלָה [*her tent*]: Ωολα; Vat. Οολλα, Οολα; Alex. Ολλα:] *Oolla*), a harlot, used by Ezekiel as the symbol of Samaria (Ez. xxiii. 4, 5, 36, 44).

AHO'LIAB (אָהֳלִיאָב [*tent of his father*]: Ελιαβ: *Ooliab*), a Danite of great skill as a weaver and embroiderer, whom Moses appointed with Bezaleel to erect the tabernacle (Ex. xxxv. 30–35 [xxxi. 6, xxxvi. 1, 2, xxxviii. 2]).

AHOLI'BAH (אָהֳלִיבָה [*my tabernacle in her*]: Οολιβα; [Alex. Ολιβα:] *Ooliba*), a harlot, used by Ezekiel as the symbol of Judah (Ez. xxiii. 4, 11, 22, 36, 44).

AHOLIBA'MAH (אָהֳלִיבָמָה [*tent of the height*: or *lofty tent*]: Ολιβεμα [etc.; Alex. Ελιβεμα, etc.:] *Oolibama*), one (probably the second) of the three wives of Esau. She was the daughter of ANAH, a descendant of Seir the Horite (Gen. xxxvi. 2, 25). It is doubtless through this connection of Esau with the original inhabitants of Mount Seir that we are to trace the subsequent occupation of that territory by him and his descendants, and it is remarkable that each of his three sons by this wife is himself the head of a tribe, whilst all the tribes of the Edomites sprung from his other two wives are founded by his grandsons (Gen. xxxvi. 15–19). In the earlier narrative (Gen. xxvi. 34) Aholibamah is called Judith, daughter of Beeri, the Hittite. The explanation of the change in the name of the woman seems to be that her proper personal name was Judith, and that Aholibamah was the name which she received as the wife of Esau and foundress of three tribes of his descendants; she is therefore in the narrative called by the first name, whilst in the genealogical table of the Edomites she appears under the second. This explanation is confirmed by the recurrence of the name Aholibamah in the concluding list of the genealogical table (Gen. xxxvi. 40–43 [comp. 1 Chr. i. 52]) which, with Hengstenberg (*Die Authentie d. Pent.* ii. 279, Eng. transl. ii. 228), Tuch (*Komm. üb. d. Gen.* p. 493), Knobel (*Genes.* p. 258), and others, we must regard as a list of names of places and not of persons, as indeed is expressly said at the close of it: "These are the chiefs (heads of tribes) of Esau, according to their settlements in the land of their possession." The district which received the name of Esau's wife, or perhaps rather from which she received her married name, was no doubt (as the name itself indicates) situated in the heights of the mountains of Edom, probably therefore in the neighborhood of Mount Hor and Petra, though Knobel places it south of Petra, having been misled by Burckhardt's name *Hesma*, which, however, according to Robinson (ii. 155), is "a sandy tract with mountains around it but not itself a mountain, as reported by Burckhardt." It seems not unlikely that the three tribes descended from Aholibamah, or at least two of them, possessed this district, since there are enumerated only eleven districts, whereas the number of tribes is thirteen, exclusive of that of Korah, whose name occurs twice, and which we may further conjecture emigrated (in part at least) from the district of Aholibamah, and became associated with the tribes descended from Eliphaz, Esau's first-born son.

It is to be observed that each of the wives of Esau is mentioned by a different name in the genealogical table from that which occurs in the history. This is noticed under BASHEMATH. With respect

Digitized by Google

to the name and race of the father of Aholibamah, see ANAH and BEERI. F. W. G.

AHU'MAI [3 syl.] (אֲחוּמַי: Ἀχιμαΐ; [Vat. Αχειμει:] *Ahumai*). Son of Jahath, a descendant of Judah, and head of one of the families of the Zorathites (1 Chr. iv. 2). W. A. W.

AHU'ZAM (אֲחֻזָּם [*their possession*]: Ὠχαΐα; Alex. Ὠχαζαμ; [Ald. Ἀχάζ; Comp. Ὀζάμ:] *Oozam*). Properly AHUZZAM, son of Ashur, the father or founder of Tekoa, by his wife Naarah (1 Chr. iv. 6). W. A. W.

AHUZ'ZATH (אֲחֻזַּת [*possession*:] Ὀχοζάθ: *Ochozath*), one of the friends of the Philistine king Abimelech who accompanied him at his interview with Isaac (Gen. xxvi. 26). In LXX. he is called ὁ νυμφαγωγὸς αὐτοῦ = *pronubus*, or bridesman, and his name is inserted in xxi. 22, 23. St. Jerome renders the word "a company of friends," as does also the Targum.

For the termination "-ath" to Philistine names comp. Gath, Goliath, Timnath. R. W. B.

AI [monosyl.] (עַי = *heap of ruins*, Ges.). 1. (Always with the def. article, הָעַי (see Gen. xii. 8, in A. V.), Γαΐ, ἡ Γαΐ, Αἴδ, Αἴ; Jos. Ἄννα; *Hai*), a royal city (comp. Josh. viii. 23, 29, x. 1, xii. 9) of Canaan, already existing in the time of Abraham (Gen. xii. 8) [HAI], and lying east of Bethel (comp. Josh. xii. 9), and "beside Bethaven" (Josh. vii. 2, viii. 9). It was the second city taken by Israel after their passage of the Jordan, and was "utterly destroyed" (Josh. vii. 3, 4, 5; viii. 1, 2, 3, 10, 11, 12, 14, 16, 17, 18, 20, 21, 23, 24, 25, 26, 28, 29; ix. 3; x. 1, 2; xii. 9). (See Stanley, *S. & P.* p. 202.) However, if Aiath be Ai — and from its mention with Migron and Michmash it is at least probable that it was so — the name was still attached to the locality at the time of Sennacherib's march on Jerusalem (Is. x. 28). [AIATH.] At any rate, the "men of Bethel and Ai," to the number of two hundred and twenty-three, returned from the captivity with Zerubbabel (Ezr. ii. 28; Neh. vii. 32, "*one* hundred and twenty-three" only); and when the Benjaminites again took possession of their towns, "Michmash, Aija and Bethel, with their 'daughters,'" are among the places named (Neh. xi. 31). [AIJA.]

Eusebius remarks (*Onom.* Ἀγγαΐ) that though Bethel remained, Ai was a τόπος ἔρημος, αὐτὸς μόνον δείκνυται: but even that cannot now be said, and no attempt has yet succeeded in fixing the site of the city which Joshua doomed to be a "heap and a desolation forever." Stanley (*S. & P.* p. 202) places it at the head of the *Wady Harith*; Williams and Van de Velde (*S. & P.* p. 204, note) apparently at the same spot as Robinson (i. 443, 575; and Kiepert's map, 1856), north of *Mûkhmâs*, and between it and *Deir Duwân*. For Krafft's identification with *Kirbet el-Haiyeh*, see Rob. iii. 288. It is the opinion of some that the words Avim (עַוִּים) in Josh. xviii. 23, and Gaza (עַזָּה) in 1 Chr. vii. 28, are corruptions of Ai [AVIM; AZZAH.]

2. (עַי: Γαΐ and [Alex. FA.] Και [Vat. omits:] *Hai*), a city of the Ammonites, apparently attached to Heshbon (Jer. xlix. 3). G.

AIAH [2 syl.] (אַיָּה [*cry, clamor*]: Αἰά Alex. Αια; [in Gen. Αἰέ:] *Aia*). 1. Son of Zibeon, a descendant of Seir, and ancestor of one of the wives of Esau (1 Chr. i. 40), called in Gen. xxxvi. 24 AJAH. He probably died before his father, as the succession fell to his brother ANAH.

2. ([In 2 Sam. iii.,] Ἰαώλ, [Vat. M. Ιοδ, Alex.[1] Ιολ, Comp. Αἰά; in 2 Sam. xxi.,] Αἰᾶ.) Father of Rizpah, the concubine of Saul (2 Sam. iii. 7, xxi. 8, 10, 11). W. A. W.

AIATH [2 syl.] (עַיָּת [fem. of עַי, *Ai*]: εἰς τὴν πόλιν Ἀγγαΐ: *Aiath*), a place named by Isaiah (x. 28) in connection with Migron and Michmash. Probably the same as Ai. [AI; AIJA.]

AI'JA [2 syl.] (עַיָּא: [om. Ald. Rom. Alex. FA.; Comp. γε *i. e.* Γέ for Γαΐ; FA.[2] Αιω:] *Hai*), like Aiath, probably a variation of the name Ai. The name is mentioned with Michmash and Bethel (Neh. xi. 31). [AI.]

AI'JALON [3 syl.] (אַיָּלוֹן, *place of deer*[a] or *gazelles*, Gesen. p. 46, Stanley, p. 208, *note*; Αἰαλών [? Αἰλών], and Αἰλώμ, [etc.:] *Ajalon*). 1. A city of the Kohathites (Josh. xxi. 24; 1 Chr. vi. 69), originally allotted to the tribe of Dan (Josh. xix. 42; A. V. "Ajalon"), which tribe, however, was unable to dispossess the Amorites of the place (Judg. i. 35). Ajalon was one of the towns fortified by Rehoboam (2 Chr. xi. 10) during his conflicts with the new kingdom of Ephraim (1 K. xiv. 30), and the last we hear of it is as being in the hands of the Philistines (2 Chr. xxviii. 18, A. V. "Ajalon").

Being on the very frontier of the two kingdoms, we can understand how Aijalon should be spoken of sometimes (1 Chr. vi. 69, comp. with 66) as in Ephraim,[b] and sometimes (2 Chr. xi. 10; 1 Sam. xiv. 31) as in Judah and Benjamin.

The name is most familiar to us from its mention in the celebrated speech of Joshua during his pursuit of the Canaanites (Josh. x. 12, "valley (עֵמֶק) of Aijalon;" see Stanley, p. 210). There is no doubt that the town has been discovered by Dr. Robinson in the modern *Yâlo*,[c] a little to the N. of the Jaffa road, about 14 miles out of Jerusalem. It stands on the side of a long hill which forms the southern boundary of a fine valley of corn-fields, which valley now bears the name of the *Merj Ibn Omeir*, but which there seems no reason for doubting was the valley of Aijalon which witnessed the defeat of the Canaanites (Rob. ii. 253, iii. 145).

2. [Αἰλώμ; Ald. Alex. Αἰλείμ.] A place in Zebulun, mentioned as the burial-place of Elon (אַיָּלוֹן),[d] one of the Judges (Judg. xii. 12). G.

[a] The part of the country in which Aijalon was situated — the western slopes of the main central tableland leading down to the plain of Sharon — must, if the derivation of the names of its towns is to be trusted, have abounded in animals. Besides Aijalon (deer), here lay Shaalbim (foxes or jackals), and not far off the valley of Zeboim (hyænas). See Stanley, p. 168, note.

[b] Perhaps this may suggest an explanation of the allusion to the "house of Joseph" in the difficult passage, Judg. i. 34, 35.

[c] Ἰαλώ, in Epiphanius; see Reland, p. 553.

[d] It will be observed that the two words differ only in their vowel-points

* It may have been also his birth-place, and possibly took its name from him. [ELON.] Van de Velde (*Mem.* p. 283) reports his finding a *Jalôn*, a place of ruins, in northern Galilee, inland from *Akka*, which (if this be reliable) might answer well enough to the Aijalon in Zebulun.

The Aijalon mentioned as lying in the tribe of Benjamin (2 Chr. xi. 10), one of "the fenced cities" fortified by Rehoboam, some regard as a third town of this name. But it was probably the Danite Aijalon (Josh. xix. 42), which, after the Danites had extended their territory further north (Judg. xviii. 1 ff.), was assigned to Benjamin, and hence at different times was held by different tribes. See Bertheau's note on 2 Chr. xi. 10 (*Exeg. Handbuch*, xv. 308). H.

AI'JELETH [3 syl.] SHA'HAR, more correctly AYELETH HAS-SHACHAR (אַיֶּלֶת הַשַּׁחַר, *the hind of the morning dawn*), found once only in the Bible, in connection with Ps. xxii., of which it forms part of the introductory verse or title. This term has been variously interpreted. Rashi, Kimchi and Aben-Ezra attest that it was taken for the name of a musical instrument. Many of the modern versions have adopted this interpretation; and it also seems to have been that of the translators from whom we have the *Authorized Version*, although they have left the term itself untranslated. Some critics speak of this instrument as a "flute;" and J. D. Michaelis, Mendelssohn, Knapp, and others, render the Hebrew words by "morning flute." Michaelis admits the difficulty of describing the instrument thus named, but he conjectures that it might mean a "flute" to be played on at the time of the "morning" sacrifice. No account is rendered, however, by Michaelis, or by those critics who adopt his view, of the etymological voucher for this translation. Mendelssohn quotes from the *Shilte Haggeborim* a very fanciful description of the "Ayeleth Hasshachar" (see Prolegomena to Mendelssohn's Psalms); but he does not approve it: he rather seeks to justify his own translation by connecting the name of the "flute" with אַיֶּלֶת אֲהָבִים, *Ayeleth Ahabim* (Prov. v. 19), and by endeavoring to make it appear that the instrument derived its appellation from the sweetness of its tones.

The Chaldee Paraphrast, a very ancient authority, renders אַיֶּלֶת הַשַּׁחַר "the power of the continual morning sacrifice," implying that this term conveyed to the chief musician a direction respecting *the time* when the 22d psalm was to be chanted. In adopting such a translation, אַיֶּלֶת must be received as synonymous with אַיָּלוּת (*strength, force*) in the 20th ver. (A. V. 19th ver.) of the same psalm.

According to a third opinion, the "hind of the morning" expresses allegorically the argument of the 22d psalm. That this was by no means an uncommon view is evident from the commentaries of Rashi and Kimchi; for the latter regards the "Hind of the Morning" as an allegorical appellation of the house of Judah, whose captivity in Babylon is, agreeably to his exegesis, the general burden of the psalm. Tholuck, who imagines the 22d psalm to treat primarily of David, and of the Messiah secondarily, makes David allude to himself under the figure of "the hind of the morning." He speaks of himself as of a hind pursued even from the first dawn of the morning (Tholuck on the Ps. *in loco*).

The weight of authority predominates, however, in favor of the interpretation which assigns to אַיֶּלֶת הַשַּׁחַר the sole purpose of describing to the musician the melody to which the psalm was to be played, and which does not in any way connect "Ayeleth Hasshachar" with the arguments of the psalm itself. To Aben-Ezra this interpretation evidently owes its origin, and his view has been received by the majority of grammarians and lexicographers, as well as by those commentators whose object has been to arrive at a grammatical exposition of the text. Amongst the number, Buxtorf, Bochart, Gesenius, Rosenmüller, and M. Sachs (in Zunz's Bible), deserve especial mention. According to the opinion, then, of this trustworthy band of scholars, אַיֶּלֶת הַשַּׁחַר described a lyrical composition no longer extant; but in the age of David, and during the existence of the Temple of Solomon, when the Psalms were chanted for public and private service, it was so well known as to convey readily to the director of the sacred music what it was needful for him to know. That this was not an unusual method of describing a melody may be satisfactorily proved from a variety of analogous instances. Ample evidence is found in the Talmud (*Jerushal. Berach.*) that the expression "hind of the morning" was used figuratively for "the rising sun;" and a similar use of the Arabic "Gezalath" may be adduced. (See Rosenmüller's *Scholia, in loco*, and Fürst's *Concordance*.) Aben-Ezra is censured by Bochart (*Hierozoicon*, book iii. ch. 17) for describing the poem אַיֶּלֶת הַשַּׁחַר as an amorous song (הוא תחלת פיוט נעשה על דרך דבר חשק כמו אילה אהבים), a term considered too profane to be employed in reference to a composition used for public worship. But if for the obnoxious epithet "amorous" the word "elegiac" be substituted (and the expression used by the rabbi will readily admit of this change in the translation) the objection is removed.

Calmet understands אַיֶּלֶת הַשַּׁחַר to mean a "band of music"; and he accordingly translates the introductory verse, "A Psalm of David, addressed to the music master who presides over the Band called the Morning Hind." D. W. M.

AIN (עַיִן), "an eye," and also, in the simple but vivid imagery of the East, a spring or natural burst of living water, always contradistinguished from the well or tank of artificial formation, which latter is designated by the words Beer (בְּאֵר), Bor (בּוֹר and יְאוֹר). Ain still retains its ancient and double meaning in Arabic, عين. Such living springs abound in Palestine even more than in other mountainous districts, and apart from their natural value in a hot climate, form one of the most remarkable features of the country. Professor Stanley (*S. & P.* pp. 147, 509) has called attention to the accurate and persistent use of the word in the original text of the Bible, and has well expressed the inconvenience arising from the confusion

Digitized by Google

in the A. V. of words and things so radically distinct as *Ain* and *Beer*. "The importance of distinguishing between the two is illustrated by Ex. xv. 27, in which the word *Ainoth* (translated 'wells') is used for the springs of fresh water at Elim, although the rocky soil of that place excludes the supposition of dug wells." [FOUNTAIN.]

Ain oftenest occurs in combination with other words, forming the names of definite localities. These will be found under En, as En-gedi, En-gannim, &c. It occurs alone in two cases:—

1. (With the def. article, הָעַיִן.) One of the landmarks on the eastern boundary of Palestine as described by Moses (Num. xxxiv. 11), and apparently mentioned, if the rendering of the A. V. is accurate, to define the position of Riblah, namely, "on the east side of 'the spring'" (LXX. ἐπὶ πηγάς). By Jerome, in the Vulgate, it is rendered *contra fontem Daphnin*, meaning the spring which rose in the celebrated grove of Daphne dedicated to Apollo and Diana at Antioch.[a] But Riblah having been lately, with much probability, identified (Rob. iii. 542–6; Porter, ii. 335) with a place of the same name on the N. E. slopes of the Hermon range, "the spring" of the text must in the present state of our knowledge be taken to be *'Ain el-'Azy*, the main source of the Orontes, a spring remarkable, even among the springs of Palestine, for its force and magnitude. The objections to this identification are the distance from *Ribleh* — about 9 miles; and the direction — nearer N. E. than E. (see Rob. iii. 534; Porter, ii. 335–6, 358). [RIBLAH; HAMATH.]

2. [Ἀσά, etc.; Alex. Αἶν, etc.: *Aën*, *Ain*.] One of the southernmost cities of Judah (Josh. xv. 32), afterwards allotted to Simeon (Josh. xix. 7; 1 Chr. iv. 32[b]) and given to the priests (Josh. xxi. 16). In the list of priests' cities in 1 Chr. vi. Ashan (עָשָׁן) takes the place of Ain. [ASHAN.]

In Neh. xi. 29, Ain is joined to the name which in the other passages usually follows it, and appears as En-rimmon. So the LXX., in the two earliest of the passages in Joshua, give the name as Ἐρωμώθ and Ἐρεμμών. [EN-RIMMON.] (See Rob. ii. 204.) G.

* The reader should not overlook, under this head, Dr. Robinson's admirable account of the Ayins or Fountains of Palestine in his *Physical Geography* (pp. 238–264). He enumerates and describes the principal of them under the classes of (*a*), those of the western plain along the Mediterranean; (*b*) those of the hill-country west of the Jordan; (*c*) those in the *Ghôr* or valley of the Jordan; (*d*) those of the hill-country east of the Jordan; and (*e*) the warm and mineral fountains. In the comparative frequency of such living springs of water, he finds the characteristic difference between Palestine and Egypt, and a perfect justification of the language of Moses in his description of the Promised Land to the children of Israel: "For the Lord thy God bringeth thee into a good land, a land of brooks of water, of fountains and depths that spring out of valleys and hills" (Deut. viii. 7). The English explorer, Mr. Tristram, in his *Land of Israel*, has given special attention to this important branch of sacred geography; and Dr. Sepp has done the same in his two volumes (*Jerusalem u. das Heilige Land*, 1863). The subject recurs again under FOUNTAINS. H.

* **AIR** (in the N. T. ἀήρ, also οὐρανός). The Greeks generally used the word ἀήρ to denote the lower portion of the atmosphere, the region of vapors, clouds and mist, in opposition to *αἰθήρ*, the pure upper air or ether, though the former term also included the whole space between the earth and the nearest of the heavenly bodies. The Romans borrowed the words and adopted the conceptions connected with them. It appears to have been a common opinion, both among the Jews and heathens, that the air was filled with spiritual beings, good and evil, the region nearest the earth being regarded as, in particular, the abode of the latter class. Thus Pythagoras taught, according to Diogenes Laërtius (viii. 32), "that the whole air was full of souls," namely, dæmons and heroes; Plutarch says that "the air beneath the ether and the heaven, τὸν ὑπαίθριον ἀέρα καὶ τὸν ὑπουράνιον, is full of gods and dæmons" (*Quæst. Rom.* c. 40, p. 274 b); and he ascribes to Xenocrates the doctrine "that there are beings in the region surrounding us, great and powerful indeed, but evil-disposed and malignant" (*De Is. et Osir.* c. 26, p. 361 b). Varro, in a curious passage preserved by Augustine (*De Civ. Dei*, vii. 6), represents the space between the moon and the lower part of our atmosphere as full of "heroes, lares, and genii," *aeria animæ*, that is, souls inhabiting the *aer* in distinction from the *æther*. Philo says that "angels, which the philosophers call dæmons, are souls flying about in the air," ψυχαὶ κατὰ τὸν ἀέρα πετόμεναι (*De Gigant.* c. 2. Opp. i. 263 ed. Mang.); and similar passages repeatedly occur in his writings (*De Plant. Noe*, c. 4, p. 331; *De Conf. Ling.* c. 34, p. 431; *De Somn.* i. 22, p. 641). In a Rabbinical commentary on *Pirke Avoth*, fol. 83, 2, it is said that "from the earth upward the whole space is filled with beings divided into bands with rulers; and that below [*i. e.* in the lower region of the air] there are many creatures employed in injuring and accusing." (See Drusius on Eph. vi. 12, or Koppe on Eph. ii. 2.) The *Test. XII. Patriarch., Benj.* c. 3, speaks of Beliar or Belial as ἀέριον πνεῦμα, a "spirit of the air." (Fabric. *Cod. pseudep. V. T.* p. 729.) These passages may serve to illustrate Eph. ii. 2, where Satan is designated as ὁ ἄρχων τῆς ἐξουσίας τοῦ ἀέρος, *i. e.* "the ruler of the powers of the air," ἐξουσία being used in a collective sense for ἐξουσίαι (comp. Eph. vi. 12, Col. ii. 15), as we say "force" for "forces," and denoting the evil spirits which make the air

[a] That this, and not the spring lately identified at *Difneh*, near the source of the Jordan at *Tel el-Kady* (Rob. iii. 398; Ritter, *Jordan*, p. 215), is the Daphne referred to in the Vulgate, is clear from the quotations from Jerome given in Reland (*Pal.*, cap. xxv. p. 120). In the Targums of Jonathan and Jerusalem, Riblah is rendered by Daphne, and Ain by 'Invatha (עינוותא) [or 'Ayenutha, עינותא, Jerus.]. Schwarz (29) would place Ain at "Ein-al-Malcha" (doubtless *Ain Mellahah*); to be consistent with which he is driven to assume that the Daphne near Paneas had also the name of Riblah.

[b] There is a curious expression in this verse which has not yet been explained. After enumerating the "cities" (עָרִים) of Simeon, the text proceeds, "and their villages (חַצְרֵיהֶם) were Etam, Ain five cities" (עָרִי). Considering the strict distinction so generally observed in the use of these two words, the above is at least worthy of note. [HAZOR.]

Digitized by Google

their habitation. So, substantially, Robinson, Bretschneider, and Grimm in their Lexicons, with De Wette, Meyer, Bleek, Alford, Ellicott, and other eminent commentators. For further quotations illustrating the opinion referred to, see Drusius (in the *Crit. Sacri*), Grotius. Wetstein, and Meyer *in loc.*; Elsner, *Obss. Sacr.* ii. 205–7, and Windet, *De Vita functorum Statu*, sect. xiii. pp. 261–266, 3d ed., Lond. 1677. The elaborate note of Harless also deserves to be compared.

Prof. Stuart, in his *Sketches of Angelology* (*Bibl. Sacra* for 1843, p. 139), translates the expression in Eph. ii. 2, "prince of the aërial host," and remarks that "no other exegesis which has been given of this text seems capable of abiding the test of philological examination." But he understands the language used here and elsewhere in reference to the locality of evil spirits as *symbolical*. "Their airy nature (to speak as the ancients did), their invisibility, their quick and easy access to men, are all shadowed forth in assigning them an aërial abode" (p. 144).

The Greek *οὐρανός*, "heaven," is the word rendered "air" in the expression "the birds" or "fowls of the air," Matt. vi. 26, viii. 20, etc., and "sky" in Matt. xvi. 2, 3, "the sky is red and lowering," and not unfrequently denotes the lower heaven, the region of clouds and storms. (See the N. T. Lexicons.) In accordance with this use of the primitive word, *τὰ ἐπουράνια* in Eph. vi. 12 may be understood as essentially synonymous with *ὁ ἀήρ* in Eph. ii. 2, or at least as including it. The expression *τὰ πνευματικὰ τῆς πονηρίας ἐν τοῖς ἐπουρανίοις* in the passage referred to (A. V. "spiritual wickedness in high places," but see the margin) is accordingly translated by Stuart "evil spirits in the aërial regions" (*Bibl. Sacra*, 1843, pp. 123, 139), and by Ellicott "the spiritual hosts of wickedness in the heavenly regions." Substantially the same view is taken of the passage by the best commentators, as De Wette, Meyer, Bleek, Alford. In illustration of the use of *ἐπουράνιος*, see the account of the seven heavens in the *Test. XII. Patriarch., Levi*, c. 3, and the *Ascension of Isaiah*, vii. 9–13, and x. 29, cited by Stuart, *ut supra*, p. 139. So, where the so-called Epistle of Ignatius to the Ephesians in the shorter form (c. 13) reads *ἐν ᾗ* (sc. *εἰρήνῃ*) *πᾶς πόλεμος καταργεῖται ἐπουρανίων καὶ ἐπιγείων*, the longer recension has *ἀερίων καὶ ἐπιγείων πνευμάτων*.

The superstitious notion, widely prevalent in later times, that evil spirits have the power of raising storms and tempests, appears to have been connected with this conception of their place of abode. The sorcerer Ismeno is represented by Tasso as thus invoking the dæmons, "roving inhabitants of the air": —

> "Voi che le tempeste e le procelle
> Movete, *abitator dell' aria erranti.*"
> *Gerus. Lib.* xiii. 7.

The proverbial phrases *εἰς ἀέρα λαλεῖν*, 1 Cor. xiv. 9, "to talk to the winds" (*ventis verba profundere*, Lucret. iv. 929), and *ἀέρα δέρειν*, 1 Cor. x. 26, "to beat the air" (*verberare ictibus auras*, Virg. *Æn.* v. 377), hardly need illustration. A.

AI'RUS ('Ιαΐρος; [Vat. Ιαειρος; Ald. 'Αΐρος:] *An*). One of the "servants of the Temple," or Nethinim, whose descendants returned with Zorobabel (1 Esdr. v. 31). Perhaps the same as REAIAH. W. A. W.

A'JAH, Gen. xxxvi. 24. [AIAH.]

AJ'ALON (Josh. x. 12, xix. 42; 2 Chr. xxviii. 18). The same place as AIJALON (1) which see. The Hebrew being the same in both, there is no reason for the inconsistency in the spelling of the name in the A. V. G.

A'KAN (עָקָן [perh. *sharp-sighted*, Fürst] 'Ιουκάμ; [Alex. Ιωυκαμ; Ald. 'Ιουκάν:] *Acan*), descendant of Esau (Gen. xxxvi. 27, called JAKAN in 1 Chr. i. 42. [BENE-JAAKAN.]

AK'KUB (עַקּוּב [*insidious*]: 'Ακούβ; [Vat. Ιακουν:] Alex. Ακκουβ: *Accub*). **1.** A descendant of Zerubbabel, and one of the seven sons of Elioenai (1 Chr. iii. 24).

2. ('Ακούμ in 1 Chr., 'Ακούβ; Alex. Ακουβ in 1 Chr., Ακουμ in Ezr. and Neh.; [Vat. Ακουμ in 1 Chr. and Ezr., Ακου in Neh. vii.]) One of the porters or doorkeepers at the east gate of the Temple. His descendants succeeded to his office, and appear among those who returned from Babylon (1 Chr. ix. 17; Ezr. ii. 42; Neh. vii. 45, xi. 19, xii. 25) Also called DACOBI (1 Esdr. v. 28).

3. ('Ακούβ; [Vat. Ακαβωθ.]) One of the Nethinim, whose family returned with Zerubbabel (Ezr. ii. 45). The name is omitted in Neh. vii., but occurs in the form ACUB in 1 Esdr. v. 31.

* It rather corresponds to ACUA ('Ακούδ) in 1 Esdr. v. 30. Acub in 1 Esdr. v. 31 answers to BAKBUK, Ezr. ii. 51. A.

4. (om. in LXX. [but Comp. 'Ακούβ].) A Levite who assisted Ezra in expounding the Law to the people (Neh. viii. 7). Called JACUBUS in 1 Esdr. ix. 48. W. A. W.

AKRAB'BIM [*scorpions*], "THE ASCENT OF," and "THE GOING UP TO"; also "MAALEH-ACRABBIM" (מַעֲלֵה עַקְרַבִּים = *the scorpion-pass*; *ἀνάβασις* 'Ακραβίν [Alex. -βειν] *Ascensus scorpionum*). A pass between the south end of the Dead Sea and Zin, forming one of the landmarks on the south boundary at once of Judah (Josh. xv. 3) and of the Holy Land (Num. xxxiv. 4). Also the north (?) boundary of the Amorites (Judg. i. 36).

Judas Maccabæus had here a great victory over the Edomites (1 Macc. v. 3,[a] "Arabattine," which see; Jos. *Ant.* xii. 8, § 1).

De Saulcy (i. 77) would identify it with the long and steep pass of the *Wady es-Zuweirah*. Scorpions he certainly found there in plenty, but this wady is too much to the north to have been Akrabbim, as the boundary went from thence to Zin and Kadesh-barnea, which, wherever situated, were certainly many miles further south. Robinson's conjecture is, that it is the line of cliffs which cross the Ghor at right angles, 11 miles south of the Dead Sea, and form the ascent of separation between the Ghor and the Arabah (ii. 120). But this would be a descent and not an ascent to those who were entering the Holy Land from the south.[b] Perhaps the most feasible supposition is that Akrabbim is

[a] The Alex. MS. in this place reads 'Ιουδαίᾳ for Ἰδουμαίᾳ, and Ewald (*Gesch.* iv. 91, 358) endeavors to show therefrom that the Acrabattine there mentioned was that between Samaria and Judæa, in support of his opinion that a large part of Southern Palestine was then in possession of the Edomites. But this reading does not agree with the context, and it is at least certain that Josephus had the text as it now stands.

[b] * In his *Phys. Geogr.* p. 58, Dr. Robinson says the

the steep pass *es-Sufah*, by which the final step is made from the desert to the level of the actual land of Palestine. As to the name, scorpions abound in the whole of this district.

This place must not be confounded with Acrabattene, north of Jerusalem. [ARBATTIS.] G.

ALABASTER (ἀλάβαστρος: *alabastrum*) occurs in the N. T. only, in the notice of the *alabaster box* of ointment which a woman brought to our Lord when He sat at meat in the house of Simon the leper at Bethany, the contents of which she poured on the head of the Saviour. (See Matt. xxvi. 7; Mark xiv. 3; Luke vii. 37.) By the English word *alabaster* is to be understood both that kind which is also known by the name of *gypsum*, and the *oriental alabaster* which is so much valued on account of its translucency, and for its variety of colored streakings, red, yellow, gray, &c., which it owes for the most part to the admixture of oxides of iron. The latter is a fibrous carbonate of lime, of which there are many varieties, *satin spar* being one of the most common. The former is a hydrous sulphate of lime, and forms when calcined and ground the well-known substance called *plaster of Paris*. Both these kinds of alabaster, but especially the latter, are and have been long used for various ornamental purposes, such as the fabrication of vases, boxes, &c. The ancients considered alabaster (carbonate of lime) to be the best material in which to preserve their ointments (Pliny, *H. N.* xiii. 3). Herodotus (iii. 20) mentions an alabaster vessel of ointment which Cambyses sent, amongst other things, as a present to the Æthiopians. Hammond (*Annotat. ad Matt.* xxvi. 7) quotes Plutarch, Julius Pollux, and Athenæus, to show that alabaster was the material in which ointments were wont to be kept.

In 2 K. xxi. 13, "I will wipe Jerusalem as a man wipeth a *dish*" (Heb. *tsallachath*), the Vat. and Alex. versions of the LXX. use *alabastron* in the rendering of the Hebrew words.[a] The reading of the LXX. in this passage is thus literally translated by Harmer (*Observations*, iv. 473): — "I will unanoint Jerusalem as an alabaster unanointed box is unanointed, and is turned down on its face." Pliny[b] tells us that the usual form of these alabaster vessels was long and slender at the top, and round and full at the bottom. He likens them to the long pearls, called *elenchi*, which the Roman ladies suspended from their fingers or dangled from their ears. He compares also the green pointed cone of a rose-bud to the form of an alabaster ointment-vessel (*H. N.* xxi. 4). The *onyx* — (cf. Hor. *Od.* iv. 12, 17), "Nardi parvus onyx" — which Pliny says is another name for *alabastrites*, must not be confounded with the precious stone of that name, which is a sub-species of the *quartz* family of minerals, being a variety of agate. Perhaps the name of onyx was given to the pink-colored variety of the calcareous alabaster, in allusion to its resembling the finger-nail (*onyx*) in color or else because the calcareous alabaster bears some resemblance to the agate-onyx in the characteristic lunar-shaped mark of the last-named stone, which mark reminded the ancients of the whitish semicircular spot at the base of the finger-nail.

Alabaster Vessels. From the British Museum. The inscription on the centre vessel denotes the quantity it holds.

The term *alabastra*, however, was by no means exclusively applied to vessels made from this material. Theocritus[c] speaks of *golden alabasters*. That the passage in Theocritus implies that the alabasters were made of gold, and not simply gilt, as some have understood it, seems clear from the words of Plutarch (in *Alexandro*, p. 676), cited by Kypke on Mark xiv. 3, where he speaks of alabasters "all skillfully *wrought of gold*."[d] Alabasters, then, may have been made of any material suitable for keeping ointment in, glass, silver, gold, &c. Precisely similar is the use of the English word *box*; and perhaps the Greek πύξος and the Latin *buxus* are additional illustrations. *Box* is doubtless derived from the name of the shrub, the wood of which is so well adapted for *turning* boxes and such like objects. The term, which originally was limited to boxes made of the box-wood, eventually extended to boxes generally; as we say, an *iron box*, a *gold box*, &c.

In Mark xiv. 3, the woman who brought "the alabaster box of ointment of spikenard" is said to *break* the box before pouring out the ointment. This passage has been variously understood; but Harmer's interpretation is probably correct, that *breaking the box* implies merely *breaking the seal* which kept the essence of the perfume from evaporating.

The town of Alabastron in Middle Egypt received its name from the alabaster quarries of the adjacent hill, the modern Mount St. Anthony. In this town

this line of cliffs crosses the *Ghôr* 6 or 8 miles south of the Dead Sea. The Akrabbim (*scorpion cliffs*) would be an "ascent" (מַעֲלֵה) justly so called, without any reference to the direction in which the traveller might approach them in a given instance. We need not suppose them to have received their name from the fact that the Hebrews crossed them from the south in coming out of Egypt. H.

[a] ἀπαλείψω τὴν Ἰερουσαλὴμ καθὼς ἀπαλείφεται ὁ ἀλάβαστρος ἀπαλειφόμενος, καὶ καταστρέφεται ἐπὶ τοσσωπον αὐτοῦ, LXX. The Complutensian version and the Vulgate understand the passage in a very different way.

[b] "Et procerioribus sua gratia est: elenchos appellant fastigata longitudine, *alabastrorum* figura in plenum orbem desinentes" (*H. N.* ix. 56).

[c] Συρίῳ δὲ μύρῳ χρύσει' ἀλάβαστρα (*Id.* xv. 114) "Μύρου χρύσεια ἀλάβαστρα non sunt vasa unguentaria ex alabastrite lapide eaque auro ornata, sed simpliciter vasa unguentaria ex auro facta. Cf. Schleusn. *Lex. N. T.* s. v. ἀλάβαστρον." (Kiessling, 2 *l. Theoc.* l. c.)

[d] χρυσοῦ ἠσκημένα περιττῶς.

Digitized by Google

was a manufactory of vases and vessels for holding perfumes, &c. W. H.

* Layard found vases of white alabaster among the ruins at Nineveh, which were used for holding ointments or cosmetics (*Babylon and Nineveh*, p. 197). The alabasters often had a long, narrow neck, and it not only accords best with the Greek (*συντρίψασα*) to suppose that the woman broke this in two, but makes the act more expressive. She would reserve nothing for herself, but devote the whole to her Lord. See Meyer and Lange on Mark xiv. 3. H.

ALA'METH (עַלֶמֶת [*covering*]: Ἐλησάθ; [Vat. Γεμεεθ; Ald.] Alex. Ἐλμεθέμ; [Comp. Ἀλαμώθ:] *Almath*). Properly ALEMETH; one of the sons of Becher, the son of Benjamin (1 Chr. vii. 8). W. A. W.

ALAM'MELECH [*Hebrew* Alamme'lech] (אַלַּמֶּלֶךְ = *king's oak*; Ἐλιμελέχ; [Vat. -λει-; Ald. Ἀλιμελέχ:] *Elmelech*), a place within the limits of Asher, named between Achshaph and Amad (Josh. xix. 26, only). It has not yet been identified; but Schwarz (191) suggests a connection with the *Nahr el-Melik*, which falls into the Kishon near *Haifa*. G.

AL'AMOTH (עַלָמוֹת: Ps. xlvi., title; 1 Chr. xv. 20), a word of exceedingly doubtful meaning, and with respect to which various conjectures prevail. Some critics are of opinion that it is a kind of lute brought originally from *Elam* (Persia); others regard it as an instrument on which young girls (עלמות) used to play (comp. the old English instrument "the Virginal"): whilst some again consider the word to denote a species of lyre, with a *sourdine* (mute) attached to it for the purpose of subduing or deadening the sound, and that on this account it was called עֶלְמוּת, from עָלַם, *to conceal*. Lafage speaks of עַלָמוֹת as "chant supérieur ou chant à l'octave." Some German commentators, having discovered that the lays of the mediæval minstrels were chanted to a melody called "die Jungfrauenweise," have transferred that notion to the Psalms; and Tholuck, for instance, translates עַלָמוֹת by the above German term. According to this notion עַלָמוֹת would not be a musical instrument, but a melody. (See Mendelssohn's *Introduction to his Version of the Psalms*; Forkel, *Geschichte der Musik*; Lafage, *Hist. Gén. de la Musique*; and Gesenius on עַלָמָה.) D. W. M.

AL'CIMUS (Ἀλκιμος, *valiant*, a Greek name, assumed, according to the prevailing fashion, as representing אֶלְיָקִים, Ἐλιακείμ, *God hath set up*), called also JACIMUS (ὁ καὶ Ἰάκειμος all. Ἰωάκειμος, Joseph. *Ant.* xii. 9, 5, *i. e.* יָקִים, cf. ud. iv. 6, *varr. lectt.*), a Jewish priest (1 Macc. vii. 12) who was attached to the Hellenizing party (2 Macc. xiv. 3).[a] On the death of Menelaus he was appointed to the high-priesthood by the influence of Lysias, though not of the pontifical family (Joseph. l. c.; xx. 9; 1 Macc. vii. 14), to the exclusion of Onias, the nephew of Menelaus. When Demetrius Soter obtained the kingdom of Syria he paid court to that monarch, who confirmed him in his office, and through his general Bacchides [BACCHIDES] established him at Jerusalem. His cruelty, however, was so great that, in spite of the force left in his command, he was unable to withstand the opposition which he provoked, and he again fled to Demetrius, who immediately took measures for his restoration. The first expedition under Nicanor proved unsuccessful; but upon this Bacchides marched a second time against Jerusalem with a large army, routed Judas, who fell in the battle (161 B. C.), and reinstated Alcimus. After his restoration, Alcimus seems to have attempted to modify the ancient worship, and as he was engaged in pulling down "the wall of the inner court of the sanctuary" (*i. e.*, which separated the court of the Gentiles from it; yet see Grimm, 1 Macc. ix. 54) he was "plagued" (by paralysis), and "died at that time," 160 B. C. (Joseph. *Ant.* xii. 9, 5, xii. 10; 1 Macc. vii., ix.; cf. 2 Macc. xiv., xv. Ewald, *Gesch. des Volkes Isr.* iv. 365 ff.) B. F. W.

[a] According to a Jewish tradition (*Bereshith R.* 65), he was "sister's son of Jose ben Joezer," chief of the Sanhedrim, whom he afterwards put to death. Raphall, *Hist. of Jews*, i. 245, 308.

AL'EMA (ἐν Ἀλέμοις; [Alex. ἐν Αλαμοις:] *in Alimis*), a large and strong city in Gilead in the time of the Maccabees (1 Macc. v. 26). Its name does not occur again, nor have we yet any means of identifying it. [Grimm (*in loc.*) conjectures that it may represent Beer-elim (Is. xv. 8, comp. Num. xxi. 16). — A.] G.

ALE'METH (עַלֶמֶת [*covering*]: Σαλαμάθ, Γαλεμέθ; Alex. Γαλεμαθ, [-μεθ; Ald. Γαλεμέθ, Ἀλέφ; Comp. Ἀλεμέθ:] *Alamath*). A Benjamite, son of Jehoadah, or Jarah, and descended from Jonathan the son of Saul (1 Chr. viii. 36, ix. 42). The form of the name in Hebrew is different from that of the town Alemeth with which it has been compared. W. A. W.

ALE'METH (accurately, Allemeth; עַלְמֶת: Γαλεμάθ; [Alex. Γαλημεθ:] *Abnath*), the form under which Almon, the name of a city of the priests in Benjamin, appears in 1 Chr. vi. 60 [45]. Under the very similar form of *'Almit* or *Almuth*, it has been apparently identified in the present day at about a mile N. E. of *Anata*, the site of Anathoth; first by Schwarz (128) and then by Mr. Finn (Rob. iii. 287). Among the genealogies of Benjamin the name occurs in connection with Asmaveth, also the name of a town of that tribe (1 Chr. viii. 36, ix. 42; compared with Ezr. ii. 24). [ALMON.] In the Targum of Jonathan on 2 Sam xvi. 5, Bahurim is rendered Alemath. G

ALEXAN'DER III., king of Macedon, surnamed THE GREAT (Ἀλέξανδρος, *the helper of men: Alexander*: Arab. *the two-horned*, Golii *Lex Arab.* 1896), "the son of Philip" (1 Macc. vi. 2) and Olympias, was born at Pella B. C. 356. On his mother's side he claimed descent from Achilles; and the Homeric legends were not without influence upon his life. At an early age he was placed under the care of Aristotle; and while still a youth he turned the fortune of the day at Chæroneia (338 B. C.). On the murder of Philip (B. C. 336) Alexander put down with resolute energy the disaffection and hostility by which his throne was menaced; and in two years he crossed the Hellespont (B. C. 334) to carry out the plans of his father, and execute the mission of Greece to the civilized world.

The battle of the Granicus was followed by the subjugation of western Asia; and in the following year the fate of the East was decided at Issus (B. C. 333). Tyre and Gaza were the only cities in Western Syria which offered Alexander any resistance, and these were reduced and treated with unusual severity (B. C. 332). Egypt next submitted to him; and in B. C. 331 he founded Alexandria, which remains to the present day the most characteristic monument of his life and work. In the same year he finally defeated Darius at Gaugamela; and in B. C. 330 his unhappy rival was murdered by Bessus, satrap of Bactria. The next two years were occupied by Alexander in the consolidation of his Persian conquests, and the reduction of Bactria. In B. C. 327 he crossed the Indus, penetrated to the Hydaspes, and was there forced by the discontent of his army to turn westward. He reached Susa B. C. 325, and proceeded to Babylon B. C. 324, which he chose as the capital of his empire. In the next year he died there (B. C. 323) in the midst of his gigantic plans; and those who inherited his conquests left his designs unachieved and unattempted (cf. Dan. vii. 6, viii. 5, xi. 3).

The famous tradition of the visit of Alexander to Jerusalem during his Phœnician campaign (Joseph. *Ant.* xi. 8, 1 ff.) has been a fruitful source of controversy. The Jews, it is said, had provoked his anger by refusing to transfer their allegiance to him when summoned to do so during the siege of Tyre, and after the reduction of Tyre and Gaza (Joseph. l. c.) he turned towards Jerusalem. Jaddua (Jaddus) the high-priest (Neh. xii. 11, 22), who had been warned in a dream how to avert the king's anger, calmly awaited his approach; and when he drew near went out to Sapha (צָפָה, *he watched*), within sight of the city and temple, clad in his robes of hyacinth and gold, and accompanied by a train of priests and citizens arrayed in white. Alexander was so moved by the solemn spectacle that he did reverence to the holy name inscribed upon the tiara of the high-priest; and when Parmenio expressed surprise, he replied that "he had seen the god whom Jaddua represented in a dream at Dium, encouraging him to cross over into Asia, and promising him success." After this, it is said that he visited Jerusalem, offered sacrifice there, heard the prophecies of Daniel which foretold his victory, and conferred important privileges upon the Jews, not only in Judæa but in Babylonia and Media, which they enjoyed during the supremacy of his successors. The narrative is repeated in the Talmud (Joma f. 69; ap. Otho, *Lex. Rabb.* s. v. *Alexander;* the high-priest is there said to have been Simon the Just), in later Jewish writers Vajikra R. 13; Joseph ben Gorion, ap. Ste. Croix, 553), and in the chronicles of Abulfeda (Ste. Croix, p. 555). The event was adapted by the Samaritans to suit their own history, with a corresponding change of places and persons, and various embellishments (Aboul'fatah, quoted by Ste. Croix, pp. 209–12); and in due time Alexander was enrolled among the proselytes of Judaism. On the other hand no mention of the event occurs in Arrian, Plutarch, Diodorus, or Curtius; and the connection in which it is placed by Josephus is alike inconsistent with Jewish history (Ewald, *Gesch. d. Volkes Isr.* iv. 124 ff.) and with the narrative of Arrian (iii. 1 ἑβδόμῃ ἡμέρᾳ ἀπὸ τῆς Γάζης ἐλαύνων ἦκεν ἐς Πηλούσιον).

But admitting the incorrectness of the details of the tradition as given by Josephus, there are several points which confirm the truth of the main fact. Justin says that "many kings of the East came to meet Alexander wearing fillets" (lib. xi. 10); and after the capture of Tyre "Alexander himself visited some of the cities which still refused to submit to him" (Curt. iv. 5, 13). Even at a later time, according to Curtius, he executed vengeance personally on the Samaritans for the murder of his governor Andromachus (Curt. iv. 8, 10). Besides this, Jewish soldiers were enlisted in his army (Hecat. *ap.* Joseph. *c. Apion.* i. 22); and Jews formed an important element in the population of the city which he founded shortly after the supposed visit. Above all, the privileges which he is said to have conferred upon the Jews, including the remission of tribute every sabbatical year, existed in later times, and imply some such relation between the Jews and the great conqueror as Josephus describes. Internal evidence is decidedly in favor of the story, even in its picturesque fullness. From policy or conviction Alexander delighted to represent himself as chosen by destiny for the great act which he achieved. The siege of Tyre arose professedly from a religious motive. The battle of Issus was preceded by the visit to Gordium; the invasion of Persia by the pilgrimage to the temple of Ammon. And if it be impossible to determine the exact circumstances of the meeting of Alexander and the Jewish envoys, the silence of the classical historians, who notoriously disregarded (*e. g.* the Maccabees) and misrepresented (Tac. *Hist.* v. 8) the fortunes of the Jews, cannot be held to be conclusive against the occurrence of an event which must have appeared to them trivial or unintelligible (Jahn, *Archæol.* iii. 300 ff.; Ste. Croix, *Examen critique*, &c., Paris, 1810; Thirlwall, *Hist. of Greece*, vi. 206 f.; and on the other side Ant. van Dale, *Dissert. super Aristeâ*, Amstel. 1705, pp. 69 ff.)

The tradition, whether true or false, presents an aspect of Alexander's character which has been frequently lost sight of by his recent biographers. He was not simply a Greek, nor must he be judged by a Greek standard. The Orientalism, which was a scandal to his followers, was a necessary deduction from his principles, and not the result of caprice or vanity (comp. Arr. vii. 29). He approached the idea of a universal monarchy from the side of Greece, but his final object was to establish something higher than the paramount supremacy of one people. His purpose was to combine and equalize, not to annihilate: to wed the East and West in a just union — not to enslave Asia to Greece (Plut. *de Alex. Or.* 1, § 6). The time indeed, was not yet come when this was possible, but if he could not accomplish the great issue, he prepared the way for its accomplishment.

The first and most direct consequence of the policy of Alexander was the weakening of nationalities, the first condition necessary for the dissolution of the old religions. The swift course of his victories, the constant incorporation of foreign elements in his armies, the fierce wars and changing fortunes of his successors, broke down the barriers by which kingdom had been separated from kingdom, and opened the road for larger conceptions of life and faith than had hitherto been possible (cf. Polyb. iii. 59). The contact of the East and West brought out into practical forms, thoughts and feelings which had been confined to the schools. Paganism was deprived of life as soon as it was transplanted beyond the narrow limits in which

Digitized by Google

took its shape. The spread of commerce followed the progress of arms; and the Greek language and literature vindicated their claim to be considered the most perfect expression of human thought by becoming practically universal.

The Jews were at once most exposed to the powerful influences thus brought to bear upon the East, and most able to support them. In the arrangement of the Greek conquests which followed the battle of Ipsus, B. C. 301, Judæa was made the frontier land of the rival empires of Syria and Egypt, and though it was necessarily subjected to the constant vicissitudes of war, it was able to make advantageous terms with the state to which it owed allegiance, from the important advantages which it offered for attack or defense [ANTIOCHUS, ii.–vii.]. Internally also the people were prepared to withstand the effects of the revolution which the Greek dominion effected. The constitution of Ezra had obtained its full development. A powerful hierarchy had succeeded in substituting the idea of a church for that of a state; and the Jew was now able to wander over the world and yet remain faithful to the God of his fathers [THE DISPERSION]. The same constitutional change had strengthened the intellectual and religious position of the people. A rigid "fence" of ritualism protected the course of common life from the license of Greek manners; and the great doctrine of the unity of God, which was now seen to be the divine centre of their system, counteracted the attractions of a philosophic pantheism [SIMON THE JUST]. Through a long course of discipline in which they had been left unguided by prophetic teaching, the Jews had realized the nature of their mission to the world, and were waiting for the means of fulfilling it. The conquest of Alexander furnished them with the occasion and the power. But at the same time the example of Greece fostered personal as well as popular independence. Judaism was

Tetradrachm (Attic talent) of Lysimachus, King of Thrace.

speedily divided into sects, analogous to the typical forms of Greek philosophy. But even the rude analysis of the old faith was productive of good. The freedom of Greece was no less instrumental in forming the Jews for their final work than the contemplative spirit of Persia, or the civil organization of Rome; for if the career of Alexander was rapid, its effects were lasting. The city which he chose to bear his name perpetuated in after ages the office which he providentially discharged for Judaism and mankind; and the historian of Christianity must confirm the judgment of Arrian, that Alexander, "who was like no other man, could not have been given to the world without the special design of Providence" (ἔξω τοῦ θείου, Arr. vii. 30). And Alexander himself appreciated this design better even than his great teacher; for it is said (Plut. *de Alex. Or.* 1, § 6) that when Aristotle urged him to treat the Greeks as freemen and the Orientals as slaves, he found the true answer to this counsel in the recognition of his "divine mission to unite and reconcile the world" (κοινὸς ἥκειν θεόθεν ἁρμοστὴς καὶ διαλλακτὴς τῶν ὅλων νομίζων).

In the prophetic visions of Daniel the influence of Alexander is necessarily combined with that of his successors.[a] They represented with partial exaggeration the several phases of his character; and to the Jews nationally the policy of the Syrian kings was of greater importance than the original conquest of Asia. But some traits of "the first mighty king" (Dan. viii. 21, xi. 3) are given with vigorous distinctness. The emblem by which he is typified (עָתִיד, *a he-goat*, fr. עָתַד *he leapt*, Ges. *Thes.* s. v.) suggests the notions of strength and speed;[b] and the universal extent (Dan. viii. 5, . . . *from the west on the face of the whole earth*), and marvellous rapidity of his conquests (Dan. l. c. *he touched not the ground*) are brought forward as the characteristics of his power, which was directed by the strongest personal impetuosity (Dan. viii. 6, *in the fury of his power*). He ruled with great dominion, and did according to his will (xi. 3); "and there was none that could deliver . . . out of his hand (viii. 7)." B. F. W.

ALEXANDER BA'LAS (Joseph. *Ant.* xiii. 4, § 8, Ἀλέξανδρος ὁ Βάλας λεγόμενος; Strab. xiv. p. 751, τὸν Βάλαν Ἀλέξανδρον; Just. xxxv. 1, Subornant pro eo *Balam* quendam . . . et . . . nomen ei Alexandri inditur. Balas possibly represents the Aram. בַּעְלָא, *lord*: he likewise assumed the titles ἐπιφανὴς and εὐεργετής, 1 Macc. x. 1). He was, according to some, a (natural) son of Antiochus IV. Epiphanes (Strab. xiii Joseph. *Ant.* xiii. 2, 1), but he was more generally regarded as an impostor who falsely assumed the connection (App. *Syr.* 67; Justin l. c. cf. Polyb. xxxiii. 16). He claimed the throne of Syria in 152 B. C. in opposition to Demetrius Soter, who had provoked the hostility of the neighboring kings and alienated the affections of his subjects (Joseph. l. c.). His pretensions were put forward by Heraclides, formerly treasurer of Antiochus Epiphanes, who obtained the recognition of his title at Rome by scandalous intrigues (Polyb. xxxiii. 14, 16) After landing at Ptolemais (1 Macc. x. 1) Alexander gained the warm support of Jonathan, who was now the leader of the Jews (1 Macc. ix. 73); and though his first efforts were unsuccessful (Just. xxxv. 1, 10), in 150 B. C. he completely routed the forces of Demetrius, who himself fell in the retreat (1 Macc. x. 48–50; Joseph. *Ant.* xiii. 2, 4; Str. xvi. p. 751). After this Alexander married Cleopatra, the daughter of Ptolemæus VI. Philometor; and in the arrangement of his kingdom appointed Jonathan governor (περιδρόχης; 1 Macc. x. 65) of a province (Judæa: cf. 1 Macc. xi. 57). But his

[a] The attempt of Bertholdt to apply the description of the third monarchy to that of Alexander has little to recommend it [DANIEL].

[b] There may be also some allusion in the word to the legend of Caranus, the founder of the Argive dynasty in Macedonia, who was guided to victory by "a flock of goats" (Justin. l. 7).

Digitized by Google

triumph was of short duration. After obtaining power he gave himself up to a life of indulgence (Liv. *Ep.* 50; cf. Athen. v. 211); and when Demetrius Nicator, the son of Demetrius Soter, landed in Syria in 147 B. C., the new pretender found powerful support (1 Macc. x. 67 ff.). At first Jonathan defeated and slew Apollonius the governor of Cœle-Syria, who had joined the party of Demetrius, for which exploit he received fresh favors from Alexander (1 Macc. x. 69–89); but shortly afterwards (B. C. 146) Ptolemy entered Syria with a large force, and after he had placed garrisons in the chief cities on the coast, which received him according to the commands of Alexander, suddenly pronounced himself in favor of Demetrius (1 Macc. xi. 1–11; Joseph. *Ant.* xiii. 4, 5 ff.), alleging, probably with truth, the existence of a conspiracy against his life (Joseph. l. c. cf. Diod. ap. Muller. *Fragm.* ii. 16). Alexander, who had been forced to leave Antioch (Joseph. l. c.), was in Cilicia when he heard of Ptolemy's defection (1 Macc. xi. 14). He hastened to meet him, but was defeated (1 Macc. xi. 15; Just. xxxv. 2), and fled to Abæ in Arabia (Diod. l. c.), where he was murdered B. C. 146 (Diod. l. c.; 1 Macc. xi. 17 differs as to the manner; and Euseb. Chron. Arm. i. 349 represents him to have been slain in the battle). The narrative in 1 Macc. and Josephus shows clearly the partiality which the Jews entertained for Alexander "as the first that entreated of true peace with them" (1 Macc. x. 47); and the same feeling was exhibited afterwards in the zeal with which they supported the claims of his son Antiochus. [ANTIOCHUS VI.] B. F. W.

Tetradrachm (Ptolemaic talent) of Alexander Balas.

Obv. Bust of King to right. Rev. ΒΑΣΙΛΕΩΣ ΑΛΕΞΑΝΔΡΟΥ. Eagle, upon rudder, to left, and palm-branch. In field, the monogram and symbol of Tyre; date ΓΞΡ (163 Ær. Seleucid), &c.

ALEXAN'DER (Ἀλέξανδρος), in N. T. 1. Son of Simon the Cyrenian, who was compelled to bear the cross for our Lord (Mark xv. 21). From the manner in which he is there mentioned, together with his brother Rufus, they were probably persons well known in the early Christian church. [Comp. Rom. xvi. 13.]

2. One of the kindred of Annas the high-priest (Acts iv. 6), apparently in some high office, as he is among three who are mentioned by name. Some suppose him identical with Alexander the Alabarch at Alexandria, the brother of Philo Judæus, mentioned by Josephus (*Ant.* xviii. 8, § 1, xix. 5, § 1) in the latter passage as a φίλος ἀρχαῖος of the Emperor Claudius: so that the time is not inconsistent with such an idea.

3. A Jew at Ephesus, whom his countrymen put forward during the tumult raised by Demetrius the silversmith (Acts xix. 33), to plead their cause with the mob, as being unconnected with the attempt to overthrow the worship of Artemis. Or he may have been, as imagined by Calvin and others, a Jewish convert to Christianity, whom the Jews were willing to expose as a victim to the frenzy of the mob.

4. An Ephesian Christian, reprobated by St. Paul in 1 Tim. i. 20, as having, together with one Hymenæus, put from him faith and a good conscience, and so made shipwreck concerning the faith. This may be the same with

5. ALEXANDER the coppersmith (Ἀλ. ὁ χαλκεύς), mentioned by the same apostle, 2 Tim. iv. 14, as having done him many mischiefs. It is quite uncertain where this person resided; but from the caution to Timotheus to beware of him, probably at Ephesus. H. A.

ALEXAN'DRIA [*Gr.* -dri'a] (ἡ Ἀλεξάνδρεια, 3 Macc. iii. 1; Mod., *El-Iskendereeyeh*; Ethn., Ἀλεξανδρεύς, 3 Macc. ii. 30, iii. 21; Acts xviii. 24, vi. 9), the Hellenic Roman and Christian capital of Egypt, was founded by Alexander the Great B. C. 332, who traced himself the ground-plan of the city which he designed to make the metropolis of his western empire (Plut. *Alex.* 26). The work thus begun was continued after the death of Alexander by the Ptolemies; and the beauty (Athen. i. p. 3) of Alexandria became proverbial. Every natural advantage contributed to its prosperity. The climate and site were singularly healthy (Strab. p. 793). The harbors formed by the island of Pharos and the headland Lochias, were safe and commodious, alike for commerce and for war; and the lake Mareotis was an inland haven for the merchandise of Egypt and India (Strab. p. 798). Under the despotism of the later Ptolemies the trade of Alexandria declined, but its population (300,000 freemen, Diod. xvii. 52: the free population of *Attica* was about 130,000) and wealth (Strab. p. 798) were enormous. After the victory of Augustus it suffered for its attachment to the cause of Antony (Strab. p. 792); but its importance as one of the chief corn-ports of Rome[a] secured for it the general favor of the first emperors. In later times the seditious tumults for which the Alexandrians had always been notorious, desolated the city (A. D. 260 ff. Gibbon, *Decline and Fall*, c. x.), and religious feuds aggravated the popular distress (Dionys. Alex. *Ep.* iii., xii.; Euseb. *H. E.*, vi. 41 ff.; vii. 22). Yet even thus, though Alexandria suffered greatly from constant dissensions and the weakness of the Byzantine court, the splendor of "the great city of the West" amazed Amrou, its Arab conqueror (A. D. 640; Gibbon, c. li.); and after centuries of Mohammedan misrule it promises once again to justify the wisdom of its founder (Strab. xvii. pp. 791–9; *Frag.* ap. Joseph. *Ant.* xiv. 7, 2; Plut. *Alex.* 26; Arr. iii. 1; Joseph. *B. J.* iv. 5. Comp. ALEXANDER the Great.)

The population of Alexandria was mixed from the first (comp. Curt. iv. 8, 5); and this fact formed the groundwork of the Alexandrine character. The three regions into which the city was divided (*Regio Judæorum*, *Bucheium*, *Rhacotis*) corre-

[a] The Alexandrine corn-vessels (Acts xxvii. 6, xxviii. 11) were large (Acts xxvii. 37) and handsome (Luc. *Navig.* p. 668, ed Bened.); and even Vespasian made a voyage in one (Joseph. *B. J.* vii. 2). They generally sailed direct to Puteoli (*Dicæarchia*, Strab. p. 798); Senec. *Ep.* 77, 1; cf. Suet. *Aug.* 98, Acts xxviii. 13); but, from stress of weather, often sailed under the Asiatic coast (Acts xxvii.; cf. Luc. l. c. p. 670 f.; Smith, *Voyage of St Paul*, pp. 70 ff.

Digitized by Google

ponded to the three chief classes of its inhabitants, Jews, Greeks, Egyptians;[a] but in addition to these principal races, representatives of almost every nation were found there (Dion Chrys. *Orat.* xxxii.). According to Josephus, Alexander himself assigned to the Jews a place in his new city; "and they obtained," he adds, "equal privileges with the Macedonians" (*c. Ap.* ii. 4) in consideration "of their services against the Egyptians" (*B. J.* ii. 18, 7). Ptolemy I. imitated the policy of Alexander, and, after the capture of Jerusalem, he removed a considerable number of its citizens to Alexandria. Many others followed of their own accord; and all received the full Macedonian franchise (Joseph. *Ant.* xii. 1; cf. *c. Ap.* i. 22), as men of known and tried fidelity (Joseph. *c. Ap.* ii. 4). Already on a former occasion the Jews had sought a home in the land of their bondage. More than two centuries and a half before the foundation of Alexandria a large body of them had taken refuge in Egypt, after the murder of Gedaliah; but these, after a general apostasy, were carried captive to Babylon by Nebuchadnezzar (2 K. xxv. 26; Jer. xliv.; Joseph. *Ant.* x. 9, 7).

The fate of the later colony was far different. The numbers and importance of the Egyptian Jews were rapidly increased under the Ptolemies by fresh immigrations and untiring industry. Philo estimates them in his time at little less than 1,000,000 (*In Flacc.* § 6, p. 971); and adds that two of the five districts of Alexandria were called "Jewish districts;" and that many Jews lived scattered in the remaining three (*id.* § 8, p. 973). Julius Cæsar (Joseph. *Ant.* xiv. 10, § 1) and Augustus confirmed to them the privileges which they had enjoyed before, and they retained them with various interruptions, of which the most important, A. D. 39, is described by Philo (*l. c.*), during the tumults and persecutions of later reigns (Joseph. *c. Ap.* ii. 4; *B. J.* xii. 3, 2). They were represented, at least for some time (from the time of Cleopatra to the reign of Claudius; Jost, *Gesch. d. Judenth.* i. 353) by their own officer (ἐθνάρχης, Strab. ap. Joseph. *Ant.* xiv. 7, 2; ἀλαβάρχης, Joseph. *Ant.* xviii. 7, 3; 9, 1; xix. 5, 1; cf. Rup. ad Juv. Sat. i. 130; γενάρχης, Philo, *In Flacc.* § 10, p. 975), and Augustus appointed a council (γερουσία, *i. e. Sanhedrin:* Philo *l. c.*) "to superintend the affairs of the Jews," according to their own laws. The establishment of Christianity altered the civil position of the Jews, but they maintained their relative prosperity; and when Alexandria was taken by Amrou 40,000 tributary Jews were reckoned among the marvels of the city (Gibbon, cli.).

For some time the Jewish Church in Alexandria was in close dependence on that of Jerusalem. Both were subject to the civil power of the first Ptolemies, and both acknowledged the high-priest as their religious head. The persecution of Ptolemy Philopator (217 B. C.) occasioned the first political separation between the two bodies. From that time the Jews of Palestine attached themselves to the fortunes of Syria [ANTIOCHUS the Great]; and the same policy which alienated the Palestinian party gave unity and decision to the Jews of Alexandria. The Septuagint translation which strengthened the barrier of language between Palestine and Egypt, and the temple at Leontopolis (161 B. C.) which subjected the Egyptian Jews to the charge of schism, widened the breach which was thus opened. But the division, though marked, was not complete. At the beginning of the Christian era the Egyptian Jews still paid the contributions to the temple-service (Raphall, *Hist. of Jews*, ii. 72). Jerusalem, though its name was fashioned to a Greek shape, was still the Holy City, the metropolis not of a country but of a people (Ἱεροπολις, Philo, *In Flacc.* § 7; *Leg. ad Cai.* § 36), and the Alexandrians had a synagogue there (Acts vi. 9). The internal administration of the Alexandrine Church was independent of the Sanhedrim at Jerusalem; but respect survived submission.

There were, however, other causes which tended to produce at Alexandria a distinct form of the Jewish character and faith. The religion and philosophy of that restless city produced an effect upon the people more powerful than the influence of politics or commerce. Alexander himself symbolized the spirit with which he wished to animate his new capital by founding a temple of Isis side by side with the temples of the Grecian gods (Arr. iii. 1). The creeds of the East and West were to coëxist in friendly union; and in after-times the mixed worship of Serapis (comp. Gibbon, c. xxviii.; *Dict. of Geogr.* i. p. 98) was characteristic of the Greek kingdom of Egypt (August. *De Civ. Dei*, xviii. 5; *S. maximus Ægyptiorum Deus*). This catholicity of worship was further combined with the spread of universal learning. The same monarchs who favored the worship of Serapis (Clem. Al. *Protr.* iv. § 48) founded and embellished the Museum and Library; and part of the Library was deposited in the Serapeum. The new faith and the new literature led to a common issue; and the Egyptian Jews necessarily imbibed the spirit which prevailed around them.

The Jews were, indeed, peculiarly susceptible of the influences to which they were exposed. They presented from the first a capacity for Eastern or Western development. To the faith and conservatism of the Oriental they united the activity and energy of the Greek. The mere presence of Hellenic culture could not fail to call into play their powers of speculation, which were hardly repressed by the traditional legalism of Palestine (comp. Jost, *Gesch. d. Judenth.* i. 293 ff.); and the unchanging element of divine revelation which they always retained, enabled them to harmonize new thought with old belief. But while the intercourse of the Jew and Greek would have produced the same general consequences in any case, Alexandria was peculiarly adapted to insure their full effect. The result of the contact of Judaism with the many creeds which were current there must have been speedy and powerful. The earliest Greek fragment of Jewish writing which has been preserved (about 160 B. C.) [ARISTOBULUS] contains large Orphic quotations, which had been already moulded into a Jewish form (comp. Jost, *Gesch. d. Judenth.* i. 370); and the attempt thus made to connect the most ancient Hellenic traditions with the Law was often repeated afterwards. Nor was this done in the spirit of bold forgery. Orpheus, Musæus, and the Sibyls appeared to stand, in some

[a] Polybius (xxxiv. 14; ap. Strab. p. 797) speaks of the population as consisting of "three races (τρία γένη), the native Egyptian . . . the *mercenary* . . . and the Alexandrine . . . of Greek descent." The Jews might receive the title of "mercenaries," from the service which they originally rendered to Alexander (Joseph. *B. J.* ii. 18, 7) and the first Ptolemies (Joseph. *c. Ap.* ii. 4).

Digitized by Google

remote period anterior to the corruptions of polytheism, as the witnesses of a primeval revelation and of the teaching of nature, and thus it seemed excusable to attribute to them a knowledge of the Mosaic doctrines. The third book of the Sibyllines (c. B. C. 150) is the most valuable relic of this pseudo-Hellenic literature, and shows how far the conception of Judaism was enlarged to meet the wider view of the religious condition of heathendom which was opened by a more intimate knowledge of Greek thought; though the later Apocalypse of Ezra [ESDRAS ii.] exhibits a marked reaction towards the extreme exclusiveness of former times.

But the indirect influence of Greek literature and philosophy produced still greater effects upon the Alexandrine Jews than the open conflict and combination of religious dogmas. The literary school of Alexandria was essentially critical and not creative. For the first time men labored to collect, revise, and classify all the records of the past. Poets trusted to their learning rather than to their imagination. Language became a study; and the legends of early mythology are transformed into philosophic mysteries. The Jews took a vigorous share in these new studies. The caution against writing, which became a settled law in Palestine, found no favor in Egypt. Numerous authors adapted the history of the Patriarchs, of Moses, and of the Kings, to classical models (Euseb. *Præp. Ev.* ix. 17–39) [as] Eupolemus, Artapanus (?), Demetrius, Aristæus, Cleodemus or Malchas, "a prophet." A poem which bears the name of Phocylides, gives in verse various precepts of Leviticus (*Daniel sec. LXX. Apolog.* p. 512 f. Romæ, 1772); and several large fragments of a "tragedy" in which Ezekiel (c. B. C. 110) dramatized the Exodus, have been preserved by Eusebius (*l. c.*), who also quotes numerous passages in heroic verse from the elder Philo and Theodotus. This classicalism of style was a symptom and a cause of classicalism of thought. The same Aristobulus who gave currency to the Judæo-Orphic verses, endeavored to show that the Pentateuch was the real source of Greek philosophy (Euseb. *Præp. Ev.* xiii. 12; Clem. Al. *Strom.* vi. 98).

The proposition thus enunciated was thoroughly congenial to the Alexandrine character; and henceforth it was the chief object of Jewish speculation to trace out the subtle analogies which were supposed to exist between the writings of Moses and the teaching of the schools. The circumstances under which philosophical studies first gained a footing at Alexandria favored the attempt. For some time the practical sciences reigned supreme; and the issue of these was skepticism (Matter, *Hist. de l'Ecole d'Alex.* iii. 162 ff.). Then at length the clear analysis and practical morality of the Peripatetics found ready followers; and in the strength of the reaction men eagerly trusted to those splendid ventures with which Plato taught them to be content till they could gain a surer knowledge (*Phæd.* p. 85). To the Jew this surer knowledge seemed to be already given; and the belief in the existence of a spiritual meaning underlying the letter of Scripture was the great principle on which all his investigations rested. The facts were supposed to be essentially symbolic: the language the veil (or sometimes the mask) which partly disguised from common sight the truths which it enwrapped. In this way a twofold object was gained. It became possible to withdraw the Supreme Being (τὸ ὄν, ὁ ὤν) from immediate contact with the material world; and to apply the narratives of the Bible to the phenomena of the soul. It is impossible to determine the process by which these results were embodied; but, as in parallel cases, they seem to have been shaped gradually in the minds of the mass, and not fashioned at once by one great teacher. Even in the LXX. there are traces of an endeavor to interpret the anthropomorphic imagery of the Hebrew text [SEPTUAGINT]; and there can be no doubt that the Commentaries of Aristobulus gave some form and consistency to the allegoric system. In the time of Philo (B. C. 20 — A. D. 50) the theological and interpretative systems were evidently fixed, even in many of their details, and he appears in both cases only to have collected and expressed the popular opinions of his countrymen.

In each of these great forms of speculation — the theological and the exegetical — Alexandrianism has an important bearing upon the Apostolic writings. But the doctrines which are characteristic of the Alexandrine school were by no means peculiar to it. The same causes which led to the formation of wider views of Judaism in Egypt, acting under greater restraint, produced corresponding results in Palestine. A doctrine of the Word (*Memra*), and a system of mystical interpretation grew up within the Rabbinic schools, which bear a closer analogy to the language of St. John and to the "allegories" of St. Paul than the speculations of Philo.

But while the importance of this Rabbinic element in connection with the *expression* of Apostolic truth is often overlooked, there can be no doubt that the Alexandrine teaching was more powerful in furthering its *reception*. Yet even when the function of Alexandrianism with regard to Christianity is thus limited, it is needful to avoid exaggeration. The preparation which it made was indirect and not immediate. Philo's doctrine of the Word (Logos) led men to accept the teaching of St. John, but not to anticipate it; just as his method of allegorizing fitted them to enter into the arguments of the Epistle to the Hebrews, though they could not have foreseen their application.

The first thing, indeed, which must strike the reader of Philo in relation to St. John, is the similarity of phrase without a similarity of idea. His treatment of the Logos is vague and inconsistent. He argues about the term and not about the reality, and seems to delight in the ambiguity which it involves. At one time he represents the Logos as the reason of God in which the archetypal ideas of things exist (λόγος ἐνδιάθετος), at another time as the Word of God by which he makes himself known to the outward world (λόγος προφορικός); but he nowhere realizes the notion of One who is at once Revealer and the Revelation, which is the essence of St. John's teaching. The idea of the active Logos is suggested to him by the necessity of withdrawing the Infinite from the finite, God *from* man, and not by the desire to bring God *to* man. Not only is it impossible to conceive that Philo could have written as St. John writes, but even to suppose that he could have admitted the possibility of the Incarnation of the Logos, or of the personal unity of the Logos and the Messiah. But while it is right to state in its full breadth the opposition between the teaching of Philo and St. John,[a] it is

[a] The closest analogy to the teaching of Philo on the Logos occurs in the Epistle to the Hebrews, which

impossible not to feel the important office which the mystic theosophy, of which Philo is the representative, fulfilled in preparing for the apprehension of the highest Christian truth. Without any distinct conception of the personality of the Logos, the tendency of Philo's writings was to lead men to regard the Logos, at least in some of the senses of the term, as a person; and while he maintained with devout earnestness the indivisibility of the divine nature, he described the Logos as divine. In this manner, however unconsciously, he prepared the way for the recognition of a twofold personality in the Godhead, and performed a work without which it may well appear that the language of Christianity would have been unintelligible (comp. Dorner, *Die Lehre von der Person Christi*, i. 23 ff.).

The allegoric method stands in the same relation to the spiritual interpretation of Scripture as the mystic doctrine of the Word to the teaching of St. John. It was a preparation and not an anticipation of it. Unless men had been familiarized in some such way with the existence of an inner meaning in the Law and the Prophets, it is difficult to understand how an Apollos "mighty in the Scriptures" (Acts xviii. 24–28) could have convinced many, or how the infant Church could have seen almost unmoved the ritual of the Old Covenant swept away, strong in the conscious possession of its spiritual antitypes. But that which is found in Philo in isolated fragments combines in the New Testament to form one great whole. In the former the truth is affirmed in casual details, in the latter it is laid down in its broad principles which admit of infinite application; and a comparison of patristic interpretations with those of Philo will show how powerful an influence the Apostolic example exercised in curbing the imagination of later writers. Nor is this all. While Philo regarded that which was positive in Judaism as the mere symbol of abstract truths, in the Epistle to the Hebrews it appears as the shadow of blessings realized (Hebr. ix. 11, γενομένων [so Lachm.]) in the presence of a personal Saviour. History in the one case is the enunciation of a riddle; in the other it is the record of a life.

The speculative doctrines which thus worked for the general reception of Christian doctrine were also embodied in a form of society which was afterwards transferred to the Christian Church. Numerous bodies of ascetics (*Therapeutæ*), especially on the borders of Lake Mareotis, devoted themselves to a life of ceaseless discipline and study. Unlike the Essenes, who present the corresponding phase in Palestinian life, they abjured society and labor, and often forgot, as it is said, the simplest wants of nature in the contemplation of the hidden wisdom of the Scriptures (Philo, *De Vit. Contempl.* throughout). The description which Philo gives of their occupation and character seemed to Eusebius to present so clear an image of Christian virtues that he claimed them as Christians; and there can be no doubt that some of the forms of monasticism were shaped upon the model of the Therapeutæ (Euseb. *H. E.* ii. 16).

According to the common legend (Euseb. *l. c.*) St. Mark first "preached the Gospel in Egypt, and founded the first Church in Alexandria." At the beginning of the second century the number of Christians at Alexandria must have been very large, and the great leaders of Gnosticism who arose there (Basilides, Valentinus) exhibit an exaggeration of the tendency of the Church. But the later forms of Alexandrine speculation, the strange varieties of Gnosticism, the progress of the catechetical school, the development of Neo-Platonism, the various phases of the Arian controversy, belong to the history of the Church and to the history of philosophy. To the last Alexandria fulfilled its mission; and we still owe much to the spirit of its great teachers, which in later ages struggled, not without success, against the sterner systems of the West.

The following works embody what is valuable in the earlier literature on the subject, with copious references to it: Matter, *Histoire de l'École d'Alexandrie*, 2d ed., Paris, 1840. Dähne, A. F. *Geschichtliche Darstellung der jüdisch-alexandrinischen Religionsphilosophie*, Halle, 1834. Gfrörer, A. F., *Philo, und die jüdisch-alexandrinische Theosophie*, Stuttgart, 1835. To these may be added, Ewald, H., *Gesch. des Volkes Israel*, Göttingen, 1852, iv. 250 ff., 393 ff. Jost, J. M., *Gesch. des Judenthums*, Leipzig, 1857, i. 344 ff., 388 ff. Neander, A., *History of Christian Church*, i. 66 ff., Eng. Tr. 1847 [i. 49 ff., Amer. ed.]. Prof. Jowett, *Philo and St. Paul. St. Paul's Epistles to the Thessalonians, &c.*, London, 1855, i. 363 ff. [Vacherot *Hist. crit. de l'École d'Alexandrie*, 3 vol., Paris 1846–51.] And for the later Christian history: Guerike, H. F., *De Schola Alexandrinâ Catechetica*, Halis, 1824–25.[a] B. F. W.

ALGUM or ALMUG TREES (אַלְגֻּמִּים, *algummîm*; אַלְמֻגִּים, *almuggim*: ξύλα ἀπελέκητα, Alex., ξ. πελεκητά, Vat., in 1 K. x. 11, 12; ξ. πεύκινα: *ligna thyina, ligna pinea*). There can be no question that these words are identical, although, according to Celsius (*Hierob.* i. 173), some doubted it. The same author enumerates no fewer than fifteen different trees, each one of which has been supposed to have a claim to represent the *algum* or *almug*-tree of Scripture. Mention of the *almug* is made in 1 K. x. 11, 12, 2 Chr. ix. 10, 11, as having been brought in great plenty from Ophir, together with gold and precious stones, by the fleet of Hiram, for Solomon's Temple and house, and for the construction of musical instruments. "The king made of the almug-trees pillars for the house of the Lord, and for the king's house, harps also and psalteries for singers; there came no such almug-trees, nor were seen unto this day." In 2 Chr. ii. 8, Solomon is represented as desiring Hiram to send him "cedar-trees, fir-trees, and algum-trees (marg. *almuggim*) out of Lebanon." From the passage in Kings, it seems clear almug-trees came from Ophir; and as it is improbable that Lebanon should also have been a locality for them, the passage which appears to ascribe the growth of the

is throughout Hellenistic rather than Rabbinic. Compare Heb. iv. 12 with Philo, *Quis rerum div. hæres*, § 26.

[a] Alexandria occurs in the Vulgate by an error for No-Ammon [No-AMMON], Jer. xlvi. 25; Ez. xxx. 14 15, 16; Nah. iii. 8.

almug-tree to the mountains of Lebanon must be considered to be either an interpolation of some transcriber, or else it must bear a different interpretation. The former view is the one taken by Rosenmüller (*Bibl. Bot.* p. 245, Morren's translation), who suggests that the wood had been brought from Ophir to Tyre, and that Solomon's instructions to Hiram were to send on to Jerusalem (*viâ* Joppa, perhaps) the timber imported from Ophir that was lying at the port of Tyre, with the cedars which had been cut in Mount Lebanon (see Lee's *Heb. Lex.* s. v. "Almuggim"). No information can be deduced from the readings of the LXX., who explain the Hebrew word by "hewn wood" (1 K. x. 11, Vat.), "unhewn wood" (ibid. Alex.), and "pine-wood" (2 Chr. ii. 8, and ix. 10, 11). The Vulg. in the passages of Kings and 2 Chr. ix. reads *ligna thyina;* but in 2 Chr. ii. 8 follows the LXX., and has *ligna pinea*. Interpreters are greatly perplexed as to what kind of tree is denoted by the words *algummim* and *almuggim*. The Arabic and the Chaldee interpretations, with Munster, A. Montanus, Deodatus, Noldius, Tigurinus, retain the original word, as does the A. V. in all the three passages. The attempts at identification made by modern writers have not been happy. (1.) Some maintain that the thyina[a] wood (*Thuya articulata*) is signified by *algum*. This wood, as is well known, was highly prized by the Romans, who used it for doors of temples, tables, and a variety of purposes; for the citron-wood of the ancients appears to be identical with the *thuya*. (The word occurs in Rev. xviii. 12.) Its value to the Romans accounts for the reading of the Vulgate in the passages quoted above. But the *Thuya articulata* is indigenous to the north of Africa, and is not found in Asia; and few geographers will be found to identify the ancient Ophir with any port on the N. African coast. [OPHIR.] (2.) Not more happy is the opinion of Dr. Kitto, that the *deodar* is the tree probably designated by the term *almug* (*Pict. Bibl.*, note on 2 Chr.). On this subject Dr. Hooker, in a letter to the writer, says, "The *deodar* is out of the question. It is no better than cedar, and never could have been exported from Himalaya." (3.) The late Dr. Royle, with more reason, is inclined to decide on the white sandal-wood (*Santalum album;* see *Cycl. Bib. Lit.* art. "Algum.") This tree is a native of India, and the mountainous parts of the coast of Malabar, and deliciously fragrant in the parts near to the root. It is much used in the manufacture of work-boxes, cabinets, and other ornaments. (4.) The rabbins[b] understand a wood commonly called *brasil*, in Arabic *albaccam*, of a deep red color, used in dyeing.[c] This appears to be the *bukkum* (*Cæsalpinia sappan*), a tree allied to the Brazil-wood of modern commerce, and found in India; and many of the Jewish doctors understand *coral* (*i. e.* coral-wood) by the word *almug*, the name no doubt having reference to the color of the wood. (5.) If any reliance is to be placed on these rabbinical interpretations, the most probable of all the attempts to identify the almug is that first proposed by Celsius (*Hierob.* i. 172), namely that the red sandal-wood (*Pterocarpus santaunus*) may be the kind denoted by the Hebrew word. But this, after all, is mere conjecture. "I have often," says Dr. Hooker, "heard the subject of the almug-tree discussed, but never to any purpose The *Pterocarpus santalinus* has occurred to me, but it is not found in large pieces, nor is it, I believe, now used for musical purposes."

This tree, which belongs to the natural order *Leguminosæ*, and sub-order *Papilionaceæ*, is a native of India and Ceylon. The wood is very heavy, hard, and fine-grained, and of a beautiful garnet color, as any one may see who has observed the medicinal preparation, the compound tincture of lavender, which is colored by the wood of the red sandal-tree. Dr. Lee (*Lex. Heb.* s. v. "Algummim") identifying Ophir with some seaport of Ceylon, following Bochart (*Chanaan*, i. 46) herein, thinks that there can be no doubt that the wood in question must be either the *Kalanji ûd* of Ceylon or the sandal-wood (*Pterocarpus sant.?*) of India. The *Kalanji ûd*, which apparently is some species of *Pterocarpus*, was particularly esteemed and sought after for the manufacture of lyres and musical instruments, as Dr. Lee has proved by quotations from Arabic and Persian works. In fact he says that the Eastern lyre is termed the *ûd*, perhaps because made of this sort of wood. As to the derivation of the word nothing certain can be learnt. Hiller (*Hierophyt.* p. i. 106) derives it from two words meaning "drops of gum,"[d] as if some resinous wood was intended. There is no objection to this derivation. The various kinds of pines are for the most part trees of a resinous nature; but the value of the timber for building is great. Nor would this derivation be unsuitable to the *Pterocarpidæ* generally, several species of which emit resins when the stem is wounded. Josephus (*Ant* viii. 7, § 1) makes special mention of a tree not unlike pine, but which he is careful to warn us not to confuse with the pine-trees known to the merchants of his time. "Those we are speaking of," he says, "were in appearance like the wood of the fig-tree, but were whiter and more shining." This description is too vague to allow us even to conjecture what he means. And it is quite impossible to arrive at any certain conclusion in the attempt to identify the algum or almug-tree. The arguments, however, are more in favor of the red sandal-wood than of any other tree. W. H.

ALI'AH. [ALVAH.]

ALI'AN. [ALVAN.]

[a] *Thuja* appears to be a corruption of *Thya*, from θύω, "I sacrifice," the wood having been used in sacrifices *Thuja occidentalis* is the well-known evergreen, "arbor vitæ."

[b] R. Salomon Ben Melek, 1 K. x. 11, and R. Dav. Kimchi, 2 Chr. ii. 8. "*Algummim* est quod *almyggim*, arbor rubris coloris dicta Arabum linguâ *albaccam*, vulgo *brasilia*." See Celsius, who wonders that the term "Brazil-wood" (*Lignum brasiliense*) should be named by one who lived 300 years before the discovery of America; but the word *brasil* also = red color. Cf. Rosenm. *Bot. of Bibl.* p. 243, Morren's note.

[c] בקם, lignum arboris magnæ, foliis amygdalinis, cujus decocto tingitur color rubicundus seu pseudo-purpureus — lignum brasilium — *etiam*, color ejus tincturam referens (Golius, *Arab. Lex.* s. v. *bakkam*).

[d] For the various etymologies that have been given to the Hebrew word see Celsius, *Hierob.* i. 172, sq. Salmasius, *Hyl. Iatr.* p. 120, B.; Castell. *Lex. Hept* s. v. אַלְגּוּם. Lee says "the word is apparently foreign." Gesenius gives no derivation. Fürst refers the words to מוּג, *fluere, manare*. It is, he says, the *red sandal-wood*. He compares the Sanskrit *morcha, mochêta*.

ALLEGORY, a figure of speech which has been defined by Bishop Marsh, in accordance with its etymology, as "a representation of one thing which is intended to excite the representation of another thing;" the first representation being consistent with itself, but requiring, or being capable of admitting, a moral and spiritual interpretation over and above its literal sense. An allegory has been incorrectly considered by some as a lengthened or sustained metaphor, or a continuation of metaphors, as by Cicero, thus standing in the same relation to metaphor as parable to simile. But the two figures are quite distinct; no sustained metaphor, or succession of metaphors, can constitute an allegory, and the interpretation of allegory differs from that of metaphor, in having to do not with words but things. In every allegory there is a twofold sense; the immediate or historic, which is understood from the words, and the ultimate, which is concerned with the things signified by the words. The allegorical interpretation is not of the words but of the things signified by them; and not only may, but actually does, coexist with the literal interpretation in every allegory, whether the narrative in which it is conveyed be of things possible or real. An illustration of this may be seen in Gal. iv. 24, where the apostle gives an allegorical interpretation to the historical narrative of Hagar and Sarah; not treating that narrative as an allegory in itself, as our A. V. would lead us to suppose, but drawing from it a deeper sense than is conveyed by the immediate representation.

In *pure* allegory no direct reference is made to the principal object. Of this kind the parable of the prodigal son is an example (Luke xv. 11–32). In *mixed* allegory the allegorical narrative either contains some hint of its application, as Ps. lxxx., or the allegory and its interpretation are combined, as in John xv. 1–8; but this last passage is, strictly speaking, an example of a metaphor.

The distinction between the parable and the allegory is laid down by Dean Trench (*On the Parables*, chap. i.) as one of form rather than of essence. "In the allegory," he says, "there is an interpretation of the thing signifying and the thing signified, the qualities and properties of the first being attributed to the last, and the two thus blended together, instead of being kept quite distinct and placed side by side, as is the case in the parable." According to this, there is no such thing as pure allegory as above defined.

W. A. W.

ALLELU'IA (Ἀλληλούϊα: *Alleluia*), so written in Rev. xix. 1 ff. [and Tob. xiii. 18], or more properly HALLELUJAH (הַלְלוּ יָהּ), "praise ye Jehovah," as it is found in the margin of Ps. civ. 35, cv. 45, cvi. 1, cxi. 1, cxii. 1, cxiii. 1 (comp. Ps. cxiii. 9, cxv. 18, cxvi. 19, cxvii. 2). The Psalms from cxiii. to cxviii. were called by the Jews the Hallel, and were sung on the first of the month, at the feast of Dedication, and the feast of Tabernacles, the feast of Weeks, and the feast of the Passover. [HOSANNA.] On the last occasion Pss. cxiii. and cxiv., according to the school of Hillel (the former only according to the school of Shammai), were sung before the feast, and the remainder at its termination, after drinking the last cup The hymn (Matt. xxvi. 30), sung by Christ and his disciples after the last supper, is supposed to have been the great Hallel, which seems to have varied according to the feast. The literal meaning of "Hallelujah" sufficiently indicates the character of the Psalms in which it occurs, as hymns of praise and thanksgiving. They are all found in the last book of the collection, and bear marks of being intended for use in the temple-service; the words "praise ye Jehovah" being taken up by the full chorus of Levites. In the great hymn of triumph in heaven over the destruction of Babylon, the apostle in vision heard the multitude in chorus like the voice of mighty thunderings burst forth, "Alleluia, for the Lord God omnipotent reigneth," responding to the voice which came out of the throne saying "Praise our God, all ye his servants, and ye that fear him, both small and great" (Rev. xix. 1–6). In this, as in the offering of incense (Rev. viii.), there is evident allusion to the service of the temple, as the apostle had often witnessed it in its fading grandeur. W. A. W.

ALLIANCES. On the first establishment of the Jews in Palestine, no connections were formed between them and the surrounding nations. The geographical position of their country, the peculiarity of their institutions, and the prohibitions against intercourse with the Canaanites and other heathen nations, alike tended to promote an exclusive and isolated state. But with the extension of their power under the kings, the Jews were brought more into contact with foreigners, and alliances became essential to the security of their commerce. Solomon concluded two important treaties exclusively for commercial purposes: the first with Hiram, king of Tyre, originally with the view of obtaining materials and workmen for the erection of the Temple, and afterwards for the supply of ship-builders and sailors (1 K. v. 2–12, ix. 27); the second with a Pharaoh, king of Egypt, which was cemented by his marriage with a princess of the royal family; by this he secured a monopoly of the trade in horses and other products of that country (1 K. x. 28, 29). After the division of the kingdom, the alliances were of an offensive and defensive nature. They had their origin partly in the internal disputes of the kingdoms of Judah and Israel, and partly in the position which these countries held relatively to Egypt on the one side, and the great eastern monarchies of Assyria and Babylonia on the other. The scantiness of the historical records at our command makes it probable that the key to many of the events that occurred is to be found in the alliances and counter-alliances formed between these peoples, of which no mention is made. Thus the invasion of Shishak in Rehoboam's reign was not improbably the result of an alliance made with Jeroboam, who had previously found an asylum in Egypt (1 K. xii. 2, xiv. 25). Each of these monarchs sought a connection with the neighboring kingdom of Syria, on which side Israel was particularly assailable (1 K. xv. 19); but Asa ultimately succeeded in securing the active coöperation of Benhadad against Baasha (1 K. xv. 16–20). Another policy, induced probably by the encroaching spirit of Syria, led to the formation of an alliance between the two kingdoms under Ahab and Jehoshaphat, which was maintained until the end of Ahab's dynasty. It occasionally extended to commercial operations (2 Chr. xx. 36). The alliance ceased in Jehu's reign: war broke out

Digitized by Google

shortly after between Amaziah and Jeroboam II.: each nation looked for foreign aid, and a coalition was formed between Rezin, king of Syria, and Pekah on the one side, and Ahaz and Tiglath-Pileser, king of Assyria, on the other (2 K. xvi. 5–9). By this means an opening was afforded to the advances of the Assyrian power; and the kingdoms of Israel and Judah, as they were successively attacked, sought the alliance of the Egyptians, who were strongly interested in maintaining the independence of the Jews as a barrier against the encroachments of the Assyrian power. Thus Hoshea made a treaty with So (Sabaco or Sevechus), and revolted against Shalmaneser (2 K. xvii. 4): Hezekiah adopted the same policy in opposition to Sennacherib (Is. xxx. 2). In neither case was the alliance productive of much good: the Israelites were abandoned by So. It appears probable that his successor Sethos, who had offended the military caste, was unable to render Hezekiah any assistance; and it was only when the independence of Egypt itself was threatened, that the Assyrians were defeated by the joint forces of Sethos and Tirhakah, and a temporary relief afforded thereby to Judah (2 K. xix. 9, 36; Herod. ii. 141). The weak condition of Egypt at the beginning of the 26th dynasty left Judah entirely at the mercy of the Assyrians, who under Esarhaddon subdued the country, and by a conciliatory policy secured the adhesion of Manasseh and his successors to his side against Egypt (2 Chr. xxxiii. 11–13). It was apparently as an ally of the Assyrians that Josiah resisted the advance of Necho (2 Chr. xxxv. 20). His defeat, however, and the downfall of the Assyrian empire again changed the policy of the Jews, and made them the subjects of Egypt. Nebuchadnezzar's first expedition against Jerusalem was contemporaneous with and probably in consequence of the expedition of Necho against the Babylonians (2 K. xxiv. 1; Jer. xlvi. 2); and lastly, Zedekiah's rebellion was accompanied with a renewal of the alliance with Egypt (Ez. xvii. 15). A temporary relief appears to have been afforded by the advance of Hophrah (Jer. xxxvii. 11), but it was of no avail to prevent the extinction of Jewish independence.

On the restoration of independence, Judas Maccabæus sought an alliance with the Romans, who were then gaining an ascendency in the East, as a counterpoise to the neighboring state of Syria (1 Macc. viii.; Joseph. *Ant.* xii. 10, § 6). This alliance was renewed by Jonathan (1 Macc. xii. 1; *Ant.* xiii. 5, § 8), and by Simon (1 Macc. xv. 17; *Ant.* xiii. 7, § 3). On the last occasion the independence of the Jews was recognized and formally notified to the neighboring nations B. C. 140 (1 Macc. xv. 22, 23). Treaties of a friendly nature were at the same period concluded with the Lacedæmonians under an impression that they came of a common stock (1 Macc. xii. 2, xiv. 20; *Ant.* xii. 4, § 10, xiii. 5, § 8). The Roman alliance was again renewed by Hyrcanus, B. C. 128 (*Ant.* xiii. 9, § 2), after his defeat by Antiochus Sidetes, and the losses he had sustained were repaired. This alliance, however, ultimately proved fatal to the independence of the Jews. The rival claims of Hyrcanus and Aristobulus having been referred to Pompey, B. C. 63, he availed himself of the opportunity of placing the country under tribute (*Ant.* xiv. 4, § 4). Finally, Herod was raised to the sovereignty by the Roman Senate, acting under the advice of M. Antony (*Ant.* xiv. 14, § 5).

The formation of an alliance was attended with various religious rites. A victim was slain and divided into two parts, between which the contracting parties passed, involving imprecations of a similar destruction upon him who should break the terms of the alliance (Gen. xv. 10; cf. Liv. i. 24), hence the expression כָּרַת בְּרִית (= ὅρκια τέμνειν, *fœdus icere*) to make (lit. *to cut*) a treaty; hence also the use of the term אָלָה (lit. *imprecation*) for a covenant. That this custom was maintained to a late period appears from Jer. xxxiv. 18–20. Generally speaking, the oath alone is mentioned in the contracting of alliances, either between nations (Josh. ix. 15) or individuals (Gen. xxvi. 28, xxxi. 53; 1 Sam. xv. 17; 2 K. xi. 4). The event was celebrated by a feast (Gen. *l. c.*; Ex. xxiv. 11; 2 Sam. iii. 12, 20). Salt, as symbolical of fidelity, was used on these occasions; it was applied to the sacrifices (Lev. ii. 13), and probably used, as among the Arabs, at hospitable entertainments; hence the expression "covenant of salt" (Num. xviii. 19; 2 Chr. xiii. 5). Occasionally a pillar or a heap of stones was set up as a memorial of the alliance (Gen. xxxi. 52).[a] Presents were also sent by the party soliciting the alliance (1 K. xv. 18; Is. xxx. 6; 1 Macc. xv. 18). The fidelity of the Jews to their engagements was conspicuous at all periods of their history (Josh. ix. 18), and any breach of covenant was visited with very severe punishment (2 Sam. xxi. 1; Ez. xvii. 16).

W. L. B.

ALLOM (Αλλώμ; [Vat. M. Αλλων;] Alex. Αδλων: *Malmon*). The same as AMI or AMON (1 Esdr. v. 34; comp. Ezr. ii. 57; Neh. vii. 59).

W. A. W.

ALLON (אַלּוֹן or אֵלוֹן), a large strong tree of some description, probably an oak (see Ges. *Thes.* 51, 103; Stanley, App. § 76). The word is found in two names in the topography of Palestine.

1. ALLON, more accurately ELON (אֵלוֹן) (בְּצַעֲנַנִּים): Μωλά; [Alex. Μηλων:] *Elon*), a place named among the cities of Naphtali (Josh. xix. 33). Probably the more correct construction is to take it with the following word, *i. e.* "the oak by Zaanannim," or "the oak of the loading of tents" ["tents of the wanderers," according to Fürst], as if deriving its name from some nomad tribe frequenting the spot. Such a tribe were the Kenites, and in connection with them the place is again named in Judg. iv. 11,[c] with the additional

[a] * Though this usage happens to be mentioned only in the transaction between Jacob and Laban (Gen. xxxi. 52), it was evidently not uncommon among the eastern races. Sir Henry C. Rawlinson mentions the interesting and illustrative fact that he has found in the Assyrian inscriptions frequent examples of this same practice of raising a tumulus for the purpose of commemorating and ratifying a compact. See *Athenæum*, April 19, 1862 The erection of a stone as a religious memorial or as the sign of a covenant between God and man (*e. g.* by Jacob at Bethel, Gen. xxviii 18) was a similar proceeding, but not altogether analogous. H.

[b] אַלּוֹן, *Allon*, is the reading of V. d. Hooght, and of Walton's Polyglott; but most MSS. have as above (Davidson's *Hebr. Text*, p. 46).

[c] It must be remarked that the Targum Jonathan

definition of "by Kedesh (Naphtali)." Here, however, the A. V., following the Vulgate, renders the words "the plain of ZAANAIM." [ELON.] (See Stanley, p. 340, *note*.)

2. AL'LON-BA'CHUTH (אַלּוֹן בָּכוּת)[a] = *oak of weeping*; and so βάλανος πένθους: *quercus fletus*), the tree under which Rebekah's nurse Deborah, was buried (Gen. xxxv. 8,. Ewald (*Gesch.* iii. 29) believes the "oak of Tabor" (1 Sam. x. 3, A. V. "plain of T.") to be the same as, or the successor of, this tree, "Tabor" being possibly a merely dialectical change from "Deborah," and he would further identify it with the "palm-tree of Deborah" (Judg. iv. 5). See also Stanley, pp. 143, 220.[b] G.

3. AL'LON (אַלּוֹן) [*an oak*]: Αλών; [Vat. M. Αμων, H. Αμμων;] Alex. Αλλων: *Allon*). A Simeonite, ancestor of Zirza, a prince of his tribe in the reign of Hezekiah (1 Chr. iv. 37). W. A. W.

ALMO'DAD (אַלְמוֹדָד [possibly = *the progenitor*, Fürst]: Ελμωδάδ: *Elmodad*), the first, in order, of the descendants of Joktan (Gen. x. 26; 1 Chr. i. 20), and the progenitor of an Arab tribe. His settlements must be looked for, in common with those of the other descendants of Joktan, in the Arabian peninsula; and his name appears to be preserved in that of Mudád (or El-Mudád, the word being one of those proper names that admits of the article being prefixed), a famous personage in Arabian history, the reputed father of Ishmael's Arab wife (*Mir-át ez-Zemán*, &c.), and the chief of the Joktanite tribe Jurhum (not to be confounded with the older, or first, Jurhum), that, coming from the Yemen, settled in the neighborhood of Mekkeh, and intermarried with the Ishmaelites. The name of Mudád was peculiar to Jurhum, and borne by several of its chiefs (Caussin de Perceval, *Essai sur l'Hist. des Arabes avant l'Islamisme*, &c., i. 33 ff., 168, and 194 ff.). Gesenius (*Lex.* ed. Tregelles, *in loc.*) says, "If there were an ancient error in reading (for אלמורד), we might compare *Morad*, مراد or بنى مراد, the name of a tribe living in a mountainous region of Arabia Felix, near Zabid." (For this tribe see Abulfedæ *Hist. Anteislamica*, ed. Fleischer, p. 190.) Others have suggested مضر, but the well-known tribes of this stock are of Ishmaelite descent. Bochart (*Phaleg*, ii. 16) thinks that Almodad may be traced in the name of the Αλλουμαῶται of Ptolemy (vi. 7, § 24) a people of the interior of Arabia Felix, near the sources of the river Lar [ARABIA].

E. S. P.

AL'MON (עַלְמוֹן [*hidden*]: Γάμαλα; [Alex. Αλμων: Comp. Ελμών; Ald. Αλμώ:] *Almon*), a city within the tribe of Benjamin, with "suburbs" given to the priests (Josh. xxi. 18). Its name does not occur in the list of the towns of Benjamin in Josh. xviii. In the parallel list in 1 Chr. vi. it is found as Alemeth — probably a later form, and that by which it would appear to have descended to us [ALEMETH.] G.

AL'MON-DIBLATHA'IM (accurately Diblathamah, עַלְמוֹן־דִּבְלָתָיְמָה: Γελμών Δεβλαθαίμ: *Helmon-diblathaim*), one of the latest stations of the Israelites, between Dibon-gad and the mountains of Abarim (Num. xxxiii. 46, 47). Dibon-gad is doubtless the present *Dhibán*, just to the north of the Arnon; and there is thus every probability that Almon-diblathaim was identical with Beth-diblathaim, a Moabite city mentioned by Jeremiah (xlviii. 22) in company with both Dibon and Nebo, and that its traces will be discovered on further exploration. [For the etymology see DIBLATHAIM.] G.

ALMOND (שָׁקֵד, *shâkêd* (לוז): ἀμύγδαλον, κάρυον, καρύϊνος, καρυωτά: *amygdalus, amygdala, in nucis modum, instar nucis, virga vigilans*). This word is found in Gen. xliii. 11; Ex. xxv. 33, 34, xxxvii. 19, 20; Num. xvii. 8; Eccles. xii. 5; Jer. i. 11, in the text of the A. V. It is invariably represented by the same Hebrew word (*shâkêd*), which sometimes stands for the whole tree, sometimes for the fruit or nut; for instance, in Gen. xliii. 11, Jacob commands his sons to take as a present to Joseph "a little honey, spices and myrrh, nuts and almonds;" here the fruit is clearly meant. In the passages out of the book of Exodus the "bowls made like unto almonds,"[c] which were to adorn the golden candlestick, seem to allude to the nut also.[d] Aaron's rod, that so miraculously budded, yielded *almond nuts*. In the two passages from Ecclesiastes and Jeremiah, *shâkêd* is translated *almond tree*, which from the context it certainly represents. It is clearly then a mistake to suppose, with some writers, that *shâkêd* stands exclusively for "almond-nuts," and that *lûz* signifies the "tree."[e] Rosenmüller conjectures that the latter word designates the *wild*, the former the *cultivated* tree. This may be so, but it appears more probable that this tree, conspicuous as it was for its early flowering and useful fruit, was known by these *two* different names.

renders this passage by words meaning "the plain of the swamp" (see Schwarz, p. 181). This is Ewald's explanation also (*Gesch.* ii. 492, note). For other interpretations see Fürst (*Handwb.* p. 91).

[a] The Sam. Version, according to its customary rendering of Allon, has here משור בכירה, "the plain of Bakith." See this subject more fully examined under ELON.

[b] The place of the first Deborah's "oak" and that of the second Deborah's "palm-tree," may possibly have been the same; but in order to identify the one tree with the other, Ewald has to assume that the text has miscalled the tree intended in one of the passages (*Gesch.* iii. 29, note). In Gen. xxxv. 8, we are to read "under the oak," *i. e.* the original one or its representative as still well known, and not "an oak" (A. V.). H.

[c] מְשֻׁקָּדִים, Pual part. pl., from denom. verb שָׁקֵד, always used in Heb. text in reference to the golden candlestick: LXX. ἐκτετυπωμένοι καρύσκους, al. *καρυΐσκοις*; Aquila, ἐξημυγδαλωμένην.

[d] שָׁקֵד, "est *amygdalus* et *amygdalum*, arbor et fructus; hic autem fructus potius quam arboris forma designari videtur" (Rosenmüll. *Schol. in Exod.* xxv. 33; That *shâkêd* = *tree* and *fruit*, see also Fürst, *Concord.* שָׁקֵד, "*amygdala* et *amygdalum*, de arbore et fructu;" and Buxtorf, *Lex. Chald.*, שְׁקַד, "significat arborem et fructum." Michaelis (*Suppl.* s. v גָּבִיעַ) understands the almond-shaped bowls to refer to the *blossom*, i. e. the *calyx* and the *corolla*.

[e] Harris, *Nat. Hist. of the Bible*, art. "Almond," and Dr. Robinson in Kitto, art. "Shaked."

Digitized by Google

The etymology of the Hebrew *láz* is uncertain; and although the word occurs only in Gen. xxx. 37, where it is translated *hazel* in the text of the A. V., yet there can be little or no doubt that it is another word for the *almond*, for in the Arabic this identical word, *láz*, denotes the almond. [HAZEL.] The early appearance of the blossoms on the almond-tree (*Amygdalus communis*) was no doubt regarded by the Jews of old as a welcome harbinger of spring, reminding them that the winter was passing away — that the flowers would soon appear on the earth — and that the time of the singing of birds and the voice of the turtle would soon be heard in the land (Song of Sol. ii. 11, 12). The word *shâkéd*, therefore, or the tree which *hastened* to put forth its blossoms, was a very beautiful and fitting synonym for the *láz*, or almond-tree, in the language of a people so fond of imagery and poetry as were the Jews. We have in our own language instances of plants being named from the season of the year when they are flowering — *may* for *hawthorn*; *pasque flower* for *anemone*; *lent lily* for *daffodil*; *winter cress* for *hedge mustard*. But perhaps the best and most exact illustration of the Hebrew *shâkéd* is to be found in the English word *apricot*, or *apricock*, as it was formerly and more correctly called, which is derived from the Latin *præcoqua*, *præcocia*; this tree was so called by the Romans, who considered it a kind of peach which *ripened earlier* than the common one; hence its name, the *precocious tree* (comp. Plin. xv. 11; Martial, xiii. 46). *Shâkéd*, therefore, was in all probability only another name with the Jews for *láz*.

Shâkéd is derived from a root which signifies "to be wakeful," "to hasten,"[a] for the almond-tree blossoms very early in the season, the flowers appearing before the leaves. Two species of Amygdalus — *A. persica*, the peach-tree, and *A. communis*, the *shâkéd* — appear to be common in Palestine. They are both, according to Dr. Kitto (*Phys. Hist. Palest.* p. 211), in blossom in every part of Palestine in January. The almond-tree has been noticed in flower as early as the 9th of that month: the 19th, 23d, and 25th are also recorded dates. The knowledge of this interesting fact will explain that otherwise unintelligible passage in Jeremiah (i. 11, 12), "The word of the Lord came unto me, saying, Jeremiah, what seest thou? And I said, I see the rod of an almond-tree (*shâkéd*). Then said the Lord unto me, Thou hast well seen, for I will *hasten* (*shôkéd*) my word to perform it."

In that well-known poetical representation of old age in Eccles. xii. it is said, "the almond-tree shall flourish." This expression is generally understood as emblematic of the hoary locks of old age thinly scattered on the bald head, just as the white blossoms appear on the yet leafless boughs of this tree Gesenius, however, does not allow such an interpretation, for he says, with some truth,[b] that the almond flowers are pink or rose-colored, not *white*. This passage, therefore, is rendered by him — "the almond is rejected."[c] Though a delicious fruit, yet the old man, having no teeth, would be obliged to refuse it.[d] If, however, the reading of the A. V. is retained, then the allusion to the almond-tree is intended to refer to the *hastening* of old age in the case of him who remembereth not "his Creator in the days of his youth." As the almond-tree ushers in spring, so do the signs mentioned in the context foretell the approach of old age and death. It has always been regarded by the Jews with reverence, and even to this day the English Jews on their great feast-days carry a bough of flowering almond to the synagogue, just as in old time they used to present palm-branches in the Temple, to remind them perhaps, as Lady Callcott has observed (*Script. Herb.* p. 10), that in the great famine in the time of Joseph the almond did not fail them, and that, as it "failed not to their patriarchs in the days of dearth, it cometh to their hand in this day of worse and more bitter privation, as a token that God forgetteth not his people in their distress, nor the children of Israel, though scattered in a foreign land, though their home is the prey of the spoiler, and their temple is become an high place for the heathen."

A modern traveller in Palestine records that, at the passover, the Jews prepare a compound of almonds and apples in the form of a brick, and having the appearance of lime or mortar to remind the people of their hard service in the land of Egypt and house of bondage (Anderson's *Wanderings in the Land of Israel*, p. 250).

The almond-tree, whose scientific name is *Amygdalus communis*, belongs to the natural order *Rosaceæ*, and sub-order *Amygdalæ*. This order is a large and important one, for it contains more than 1000 species, many of which produce excellent fruit. Apricots, peaches, nectarines, plums, cherries, apples, pears, strawberries, &c., &c., are all included under this order. It should be remembered, however, that the seeds, flowers, bark, and leaves, of many plants in the order *Rosaceæ* contain a deadly poison, namely, prussic or hydrocyanic acid. The almond-tree is a native of Asia and North Africa, but it is cultivated in the milder parts of Europe. In England it is grown simply on account of its beautiful vernal flowers, for the fruit scarcely ever comes to maturity. The height of the tree is about 12 or 14 feet; the flowers are pink, and arranged for the most part in pairs; the leaves are long, ovate, with a serrated margin, and an acute point. The covering of the fruit is downy

[a] שָׁקַד (1) *decubuit*, (2) *vigilavit* = Arab. شَقَبَ.

شَقْبٌ: *insomnis*. The Chaldee is שְׁקֵדִין, שְׁבֵדִין; שְׁנַדָּא; שְׁמַד; ב and ן being interchanged. The Syriac word is similar.

[b] The general color of the almond blossom is pink, but the flowers do vary from deep pink to nearly white.

[c] יָנֵאץ שָׁקֵד. Gesenius makes the verb יָנֵאץ to be Hiphil future, from נָאַץ, to *deride*, to *despise*; יָנֵאץ would then be after the Syriac form instead of יִנְאַץ. But all the old versions agree with the translation of the A. V., the verb being formed regularly from the root נוּץ, *florere*.

[d] "When the grinders cease because they are few" (Eccles. xii. 3). For some other curious interpretations of this passage, see that of R. Salomon, quoted by Santes Pagninus in his *Thesaurus*, sub voce נוּץ and Vatablus, *Annotata ad Ecclesiasten*, xii. 5 (*Crit. Sac.* iii. 236).

and succulent, enclosing the hard shell which contains the kernel. The bitter almond is only a

Almond-tree and blossom.

variety of this species. The English *Almond*, Spanish *Almendra*, the Provençal *Amandola*, the French *Amande*, are all apparently derived from the Greek ἀμυγδάλη, Latin *Amygdala*. It is curious to observe, in connection with the almond-bowls of the golden candlestick, that pieces of rock-crystal used in adorning branch-candlesticks are still denominated by the lapidaries "Almonds."

W. H.

ALMS (Chald. צְדָקָא), beneficence towards the poor, from Anglo-Sax. *ælmesse*, probably, as well as Germ. *almosen*, from ἐλεημοσύνη; *eleemosyna*, Vulg. (but see Bosworth, *A. S. Dict.*). The word "alms" is not found in our version of the canonical books of O. T., but it occurs repeatedly in N. T., and in the Apocryphal books of Tobit and Ecclesiasticus. The Heb. צְדָקָה, *righteousness*, the usual equivalent for *alms* in O. T., is rendered by LXX. in Deut. xxiv. 13, Dan. iv. 24, and elsewhere, ἐλεημοσύνη, whilst some MSS., with Vulg. and Rhem. Test., read in Matt. vi. 1, δικαιοσύνη. [This reading is adopted by Griesb., Lachm., Tisch., Tregelles, and Alford. — A.]

The duty of almsgiving, especially in kind, consisting chiefly in portions to be left designedly from produce of the field, the vineyard, and the olive-yard (Lev. xix. 9, 10, xxiii. 22; Deut. xv. 11, xxiv. 19, xxvi. 2–13; Ruth ii. 2), is strictly enjoined by the Law. After his entrance into the land of promise, the Israelite was ordered to present yearly the first-fruits of the land before the Lord, in a manner significant of his own previously destitute condition. Every third year also (Deut. xiv. 28) each proprietor was directed to share the tithes of his produce with "the Levite, the stranger, the fatherless, and the widow." The theological estimate of almsgiving among the Jews is indicated by the following passages: — Job xxxi. 17; Prov. x. 2, xi. 4; Esth. ix. 22; Ps. cxii. 9; Acts ix. 36, the case of Dorcas; x. 2, of Cornelius: to which may be added, Tob. iv. 10, 11, xiv. 10, 11; and Ecclus. iii. 30, xl. 24. And the Talmudists went so far as to interpret *righteousness* by almsgiving in such passages as Gen. xviii. 19; Is. liv. 14, Ps. xvii. 15.

In the women's court of the Temple there were 13 receptacles for voluntary offerings (Mark xii. 41), one of which was devoted to alms for education of poor children of good family. Before the Captivity there is no trace of permission of mendicancy, but it was evidently allowed in later times (Matt xx. 30; Mark x. 46; Acts iii. 2).

After the Captivity, but at what time it cannot be known certainly, a definite system of almsgiving was introduced, and even enforced under penalties. In every city there were three collectors. The collections were of two kinds: (1.) Of money for the poor of the city only, made by two collectors, received in a chest or box (קוּפָּה) in the synagogue on the Sabbath, and distributed by the three in the evening; (2.) For the poor in general, of food and money, collected every day from house to house, received in a dish (תַּמְחוּי), and distributed by the three collectors. The two collections obtained the names respectively of "alms of the chest," and "alms of the dish." Special collections and distributions were also made on fast-days.

The Pharisees were zealous in almsgiving, but too ostentatious in their mode of performance, for which our Lord finds fault with them (Matt. vi. 2). But there is no ground for supposing that the expression μὴ σαλπίσῃς is more than a mode of denouncing their display, by a figure drawn from the frequent and well-known use of trumpets in religious and other celebrations, Jewish as well as heathen. Winer, *s. v.* Carpzov. *Eleem. Jud.* 32. Vitringa, *De Syn. Vet.* iii. 1, 13. Elsley, *On Gospels.* Maimonides, *De Jure Pauperis*, vii. 10; ix. 1, 6; x. (Prideaux.) Jahn, *Arch. Bibl.* iv. 371. The duty of relieving the poor was not neglected by the Christians (Matt. vi. 1–4; Luke xiv. 13; Acts xx. 35; Gal. ii. 10.) Every Christian was exhorted to lay by on the Sunday in each week some portion of his profits, to be applied to the wants of the needy (Acts xi. 30; Rom. xv. 25–27; 1 Cor. xvi. 1–4). It was also considered a duty specially incumbent on widows to devote themselves to such ministrations (1 Tim. v. 10).

ALMUG-TREE. [ALGUM.]

AL'NATHAN ('Αλναθάν; [Vat. Εναασαν;] Alex. Ελναθαν: *Enaathan*). ELNATHAN 2 (1 Esdr. viii. 44; comp. Ezr. viii. 16). W. A. W.

ALOES, LIGN ALOES (אֲהָלִים, *Ahâlîm*, אֲהָלוֹת: *Ahâlôth*: σκηναί (in Num. xxiv. 6), σταχτή (in Ps. xlv. 8); ἀλόθ, Aquila and Ald. ἀλωή; Comp. ἀλόθ; Sym. θυμίαμα (in Cant. iv 14): *tabernacula, gutta, aloe*: in N. T. ἀλόη, *aloe*). the name of some costly and sweet-smelling wood mentioned in Num. xxiv. 6, where Balaam compares the condition of the Israelites to "trees of lign-aloes which the Lord hath planted;" in Ps. xlv. 8, "All thy garments smell of myrrh, and aloes, and cassia;" in Prov. vii. 17, "I have perfumed my bed with myrrh, aloes, and cinnamon." In Cant. iv. 14, Solomon speaks of "myrrh and aloes, with all the chief spices." The word occurs once in the N. T. (John xix. 39), where mention is made of Nicodemus bringing "a mixture of myrrh and aloes, about an hundred pound weight," for the purpose of anointing the body of our Lord. Writers generally, following Celsius (*Hierob.* i. 135), who devotes thirty-five pages to this subject, suppose that the *Aquilaria agallochum* is the tree

Digitized by Google

n question. The trees which belong to the natural order *Aquilariaceæ*, apetalous dicotyledonous flowering plants, are for the most part natives of tropical Asia. The species *Aq. agallochum*, which supplies the aloes-wood of commerce, is much valued in India on account of its aromatic qualities for fumigations and incense. It was well known to the Arabic physicians. Ibn Sina [a] (Avicenna), in the Latin translation, speaks of this wood under the names of *Agallochum*, *Xylaloe*, or *Lignum-Aloes*. In the Arabic original a description is given of it under the names of *Aghlajoon*, *Aghalookhi*, *Ood* [b] (Dr. Royle, in *Cyc. Bib. Lit.* s. v. "Ahalim"). Dr. Royle (*Illust. of Himmalayan Botany*, p. 171) mentions three varieties of this wood as being obtained in the bazaars of Northern India.

The *Aquilaria secundaria* of China has the character of being the most highly scented. But it is a singular fact that this fragrancy does not exist in any of this family of trees when in a healthy and growing condition; it is only when the tree is diseased that it has this aromatic property. On this account the timber is often buried for a short time in the ground, which accelerates the decay, when the *utter* or fragrant oil, is secreted. The best aloe-wood is called *calambac*, and is the produce of *Aquilaria agallochum*, a native of Silhet, in Northern India. This is a magnificent tree, and grows to the height of 120 feet, being 12 feet in girth: "The bark of the trunk is smooth and ash-

Aquilaria Agallochum.

colored; that of the branches gray and lightly striped with brown. The wood is white, and very light and soft. It is totally without smell; and the leaves, bark, and flowers are equally inodorous" (*Script. Herb.* p. 238). The *Excœcaria agallochum*, with which some writers have confused the *Aq. agall.*, is an entirely different plant, being a small crooked tree, containing an acrid milky poison, in common with the rest of the *Euphorbiaceæ*. Persons have lost their sight from this juice getting into their eyes, whence the plant's generic name, *Excœcaria*. It is difficult to account for the specific name of this plant, for the *agallochum* is certainly not the produce of it.

It must be confessed, however, that, notwithstanding all that has been written to prove the identity of the *Ahâlim*-trees with the *aloes-wood* of commerce, and notwithstanding the apparent connection of the Hebrew word with the Arabic *Aghlajoon* and the Greek *Agallochon*, the opinion is not clear of difficulties. In the first place the passage in Num. xxiv. 6, "as the *Ahâlim* which Jehovah hath planted, is an argument against the identification with the *Aquilaria agallochum*. The LXX. read σκηναί (tents); and they are followed by the Vulg., the Syriac, the Arabic, and some other versions. If *Ohâlim* (tents) is not the true reading — and the context is against it — then if *Ahâlim* = *Aq. agallochum*, we must suppose that Balaam is speaking of trees concerning which in their growing state he could have known nothing at all. Rosenmüller (*Schol. in V. T.* ad Num. xxiv. 6) allows that this tree is not found in Arabia, but thinks that Balaam might have become acquainted with it from the merchants. Perhaps the prophet might have seen the wood. But the passage in Numbers manifestly implies that he had seen the *Ahâlim growing*, and that in all probability they were some kind of tree sufficiently known to the Israelites to enable them to understand the allusion in its full force. But if the *Ahâlim* = the *Agallochum*, then much of the illustration would have been lost to the people who were the subject of the prophecy; for the *Aq. agallochum* is found neither on the banks of the Euphrates, where Balaam lived, nor in Moab, where the blessing was enunciated.

Michaelis (*Supp.* pp. 34, 35) believes the LXX. reading to be the correct one, though he sees no difficulty, but rather a beauty, in supposing that Balaam was drawing a similitude from a tree of foreign growth. He confesses that the parallelism of the verse is more in favor of the *tree* than the *tent*; but he objects that the lign-aloes should be mentioned before the cedars, the parallelism requiring, he thinks, the inverse order. But this is hardly a valid objection; for what tree was held in greater estimation than the cedar? And even if *Ahâlim* = *Aq. agall.*, yet the latter clause of the verse does no violence to the law of parallelism, for of the two trees the cedar "*major est et augustior*." Again, the passage in Ps. xlv. 8 would perhaps be more correctly translated thus: "The myrrh, aloes, and cassia, perfuming all thy garments, brought from the ivory palaces of the *Minni*, shall make thee glad." [c] The Minni, or Minæi, were inhab-

[a] Abdallah ibn Sina, a celebrated Arabian physician and natural philosopher, born A. D. 980. The Jews abbreviated the name into Abensina, whence the Christians call it Avicenna.

tants of spicy Arabia, and carried on a great trade in the exportation of spices and perfumes (Plin. xii. 14, 16; Bochart, *Phaleg*, ii. 22, 135. As the *myrrh* and *cassia* are mentioned as coming from the Minni, and were doubtless natural productions of their country, the inference is that *abes*, being named with them, was also a production of the same country.

The Scriptural use of the Hebrew word applies both to the tree and to its produce; and although some weight must be allowed to the opinion which identifies the *Ahâlim* with the *Agallochum*, supported as it is by the authority of so eminent a botanist as the late Dr. Royle, yet it must be conceded that the matter is by no means proved. Hiller (*Hierophyt.* i. 394) derives the word from a root which signifies "to shine," "to be splendid," and believes the tree to be some species of *cedar*; probably, he says, the *Cedrus magna*, or *Cedrelate*. What the *C. magna* may be, modern botanical science would be at a loss to conjecture, but it is quite possible that some kind of odoriferous cedar may be the tree denoted by the term *Ahâlim* or *Ahâlôth*.
W. H.

A'LOTH (עָלוֹת: Βααλώθ; [Alex. Μααλωτ:] *Baloth*), a place or district, forming with Asher the jurisdiction of the ninth of Solomon's commissariat officers (1 K. iv. 16). It is read by the LXX. and later scholars as Bealoth, though the A. V. treats the ב as a prefix.[a] In the former case see BEALOTH. Josephus has *τὴν περὶ* Ἀρκὴν *παραλίαν*, Ἀρκή being the name which he elsewhere gives to Ecdippa (Achzib) on the seacoast in Asher. G.

AL'PHA, the first letter of the Greek alphabet, as Omega is the last. Its significance is plainly indicated in the context, "I am Alpha and Omega, the beginning and the end, the first and the last" (Rev. xxii. 13; comp. i. 8, 11 [rec. text], xxi. 6), which may be compared with Is. xli. 4, xliv. 6, "I am the first and I am the last, and beside me there is no God." So Prudentius (*Cathemer. hymn.* ix. 11) explains it:

"Alpha et O cognominatur : ipse fons et clausula
Omnium quæ sunt, fuerunt, quæque post futura sunt."

The expression "I am Alpha and Omega" is illustrated by the usage in Rabbinical writers of Aleph and Tau, the first and last letters of the Hebrew alphabet. Schoettgen (*Hor. Hebr.* i. 1086) quotes from *Jalkut Rubeni*, fol. 17, 4, "Adam transgressed the whole law from א to ת," that is, from the beginning to the end. It is not necessary to inquire whether in the latter usage the meaning is so full as in the Revelation: that must be determined by separate considerations. As an illustration merely, the reference is valuable. Both Greeks and Hebrews employed the letters of the alphabet as numerals. In the early times of the Christian Church the letters A and Ω were combined with the cross or with the monogram of Christ (Maitland, *Church in the Catacombs*, pp. 166–8). One of the oldest monuments on which this occurs is a marble tablet found in the catacombs at Melos, which belongs, if not to the first century, to the first half of the second. [CROSS.]
W. A. W.

* The declaration "I am Alpha and Omega, the beginning and the end," taken in its most general sense, appears to represent God as the being *from* whom all things proceed and *to* whom they tend, — the creator and ruler of the universe, directing all events to the accomplishment of his purposes In special reference to the subject of the Apocalypse, it gives assurance that he will carry on to its consummation the work which he has begun; "the kingdoms of this world shall become the kingdom of our Lord and of his Christ" (Rev. xi. 15). As Hengstenberg remarks (on Rev. i. 8), "in this declaration the Omega is to be regarded as emphatic It is equivalent to saying, As I am the Alpha, so am I also the Omega. The beginning is surety for the end." See also Bengel's note. Comp. 2 Esdr. vi. 6; Rom. xi. 36. Joseph. *c. ALPHABET. [WRITING.]

ALPHÆ'US [*or* Alphe'us, A. V. 1611, and most eds.] (Ἀλφαῖος: חַלְפַּי [perh. *exchange*]), the father of the lesser St. James the Apostle (Matt. x. 3; Mark iii. 18; Luke vi. 15; Acts i. 13), and husband of that Mary (called in Mark xv. 40, mother of James the less and of Joses) who, with the mother of Jesus and others, was standing by the cross during the crucifixion (John xix. 25). [MARY.] In this latter place he is called Clopas (not, as in the A. V., Cleophas); a variation arising from the double pronunciation of the letter ח: and found also in the LXX. rendering of Hebrew names. Winer compares Ἀγγαῖος from חַגַּי, Ἐμάθ from חֲמָת, *φασέκ* from פָּסַח (2 Chr. xxx. 1), Ταβέκ from מֵכָּח (Gen. xxii. 24), and says that although no reliable example appears in the LXX. of the hardening of ח at the beginning of a word, yet such are found, as in Κιλικία from חִלְקִיָּה. Whether the fact of this variety existing gives us a further right to identify Alphæus with the Cleopas of Luke xxiv. 18, can never be satisfactorily determined. If, as commonly, the ellipsis in Ἰούδας Ἰακώβου in Luke vi. 15, Acts i. 13, is to be filled up by inserting ἀδελφός, then the apostle St. Jude was another son of Alphæus. And in Mark ii. 14, Levi (or Matthew) is also said to have been the son of Alphæus. Nor can any satisfactory reason be given why we should suppose this to have been a different person, as is usually done. For further particulars, see JAMES THE LESS, and BRETHREN OF JESUS. H. A.

* The Alphæus who was the father of Levi or Matthew (Mark ii. 14). and the Alphæus who was the father of James the Less (Matt. x. 3), in all probability, were different persons. In the lists

. *T. ad Ps.* xlv. 9), and Lee's *Heb. Lex.* (s. v. עָלוֹת).

[a] * It does so in 1 K iv. 16, but not in Josh. xv 24.

of the apostles (Matt. x. 3; Mark iii. 18; Luke vi. 15; Acts i. 13), those of them known to be related to each other are usually mentioned in pairs, whereas Matthew (or Levi) and James the younger are never placed thus together. Alphæus was a common name among the Jews (see Lightfoot on Acts i. 13), and need not be appropriated to one person. Fritzsche, Winer, De Wette, Olshausen, Meyer, Lange, and most of the leading critics, recognize two men of this name in the Gospels. Bleek remarks (*Synopt. Evangelien*, i. 386) that it is only on the supposition that Levi and Matthew were different persons, and that Levi was a disciple only and not an apostle, that he could be the son of the Alphæus who was the father of the younger James. H.

ALTANE'US (Ἀλταναῖος; [Vat. Μαλταναιος;] Alex. Αλταναιος: *Carianeus*). The same as MATTENAI (Ezr. x. 33), one of the sons of Hashum (1 Esdr. ix. 33). W. A. W.

ALTAR (מִזְבֵּחַ: θυσιαστήριον, βωμός: *altare*). (A.) The first altar of which we have any account is that built by Noah when he left the ark (Gen. viii. 20). The Targumists indeed assert that Adam built an altar after he was driven out of the garden of Eden, and that on this Cain and Abel, and afterwards Noah and Abraham, offered sacrifice (Pseudo-Jonath. Gen. viii. 20, xxii. 9). According to the tradition the First Man was made upon an altar which God himself had prepared for the purpose, and on the site of this altar were reared both those of the Patriarchs and that in the Temple of Solomon. This tradition, if no other way valuable, at least shows the great importance which the Jews attached to the altar as the central point of their religious worship (Bähr, *Symbol.* ii. 350).

In the early times altars were usually built in certain spots hallowed by religious associations, *e. g.* where God appeared (Gen. xii. 7, xiii. 18, xxvi. 25, xxxv. 1). Generally of course they were erected for the offering of sacrifice; but in some instances they appear to have been only memorial. Such was the altar built by Moses and called Jehovah Nissi, as a sign that the Lord would have war with Amalek from generation to generation (Ex. xvii. 15, 16). Such too was the altar which was built by the Reubenites, Gadites, and half-tribe of Manasseh, "in the borders of Jordan," and which was erected "not for burnt-offering nor for sacrifice," but that it might be "a witness" between them and the rest of the tribes (Josh. xxii. 10–29). Altars were most probably originally made of earth. The Law of Moses allowed them to be made either of earth or unhewn stones (Ex. xx. 26): any iron tool would have profaned the altar — but this could only refer to the body of the altar and that part on which the victim was laid, as directions were given to make a casing of shittim-wood overlaid with brass for the altar of burnt-offering. (See below).

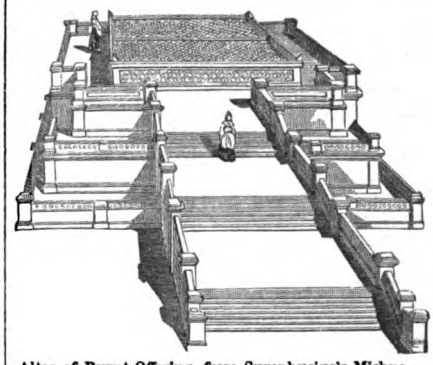
In later times they were frequently built on high places, especially in idolatrous worship (Deut. xii. 2; for the pagan notions on this subject, see Tac. *Ann.* xiii. 57). The altars so erected were themselves sometimes called "high places" (בָּמוֹת, 2 K. xxiii. 8; 2 Chr. xiv. 3, &c.). By the Law of Moses all altars were forbidden except those first in the Tabernacle and afterwards in the Temple (Lev. xvii. 8, 9; Deut. xii. 13, &c.). This prohibition, however, was not strictly observed, at least till after the building of the Temple, even by pious Israelites. Thus Gideon built an altar (Judg. vi. 24). So likewise did Samuel (1 Sam. vii. 9, 10), David (2 Sam. xxiv. 25), and Solomon (1 K. iii 4).

The sanctity attaching to the altar led to its being regarded as a place of refuge or asylum (Ex. xxi. 14; 1 K. i. 50).

(B.) The Law of Moses directed that two altars should be made, the one the Altar of Burnt-offering (called also the Altar κατ' ἐξοχήν, see Hävernick in Ez. xliii. 13 ff.) and the other the Altar of Incense.

I. The Altar of Burnt-offering (מִזְבַּח הָעוֹלָה), called in Mal. i. 7, 12, "the table of the Lord," perhaps also in Ez. xliv. 16. This differed in construction at different times. (1.) In the Tabernacle (Ex. xxvii. 1 ff., xxxviii. 1 ff.) it was comparatively small and portable. In shape it was square. It was five cubits in length, the same in breadth, and three cubits high. It was made of planks of shittim (or acacia) wood overlaid with brass. (Josephus says *gold* instead of *brass*, *Ant.* iii. 6, § 8.) The interior was hollow (נָבוּב לֻחֹת, Ex. xxvii. 8). But as nothing is said about a covering to the altar on which the victims might be placed, Jarchi is probably correct in supposing that whenever the tabernacle for a time became stationary, the hollow case of the altar was filled up with earth. In support of this view he refers to Ex. xx. 24, where the command is given, "make me an altar of earth," &c., and observes: "Altare terreum est hoc ipsum æneum altare cujus concavum terra implebatur, cum castra metarentur."

At the four corners were four projections called horns, made, like the altar itself, of shittim-wood overlaid with brass. It is not quite certain how the words in Ex. xxvii. 2, מִמֶּנּוּ תִּהְיֶיןָ קַרְנֹתָיו, should be explained. According to Mendelssohn they mean that these horns were of one piece with the altar. So also Knobel (*Comm.* in loc.). And this is probably right. By others they are understood to describe only the projection of the horns from the altar. These probably projected upwards; and to them the victim was bound when about to be sacrificed (Ps. cxviii. 27). On the occasion of the consecration of the priests (Ex. xxix. 12) and the offering of the sin-offering (Lev. iv. 7 ff.) the blood of the victim was sprinkled on the horns of the altar. (See the symbolism explained by Baumgarten, *Commentar zum Pentateuch*, ii. 63.) Round the altar midway between the top and bottom (or, as others suppose, at the top) ran a projecting ledge (כֶּרֶב, A. V. "Compass") on which perhaps the priests stood when they officiated. To the outer edge of this, again, a grating or network of brass (מִכְבַּר מַעֲשֵׂה רֶשֶׁת נְחֹשֶׁת) was affixed, and reached to the bottom of the altar which thus presented the appearance of being larger below than above.[a] Others have supposed this grating to adhere closely to the boards of which



[a] Knobel (*in loc.*) is of opinion that the object of the net-work was to protect the altar from being injured by the feet and knees of the officiating priests, The כֶּרֶב, he thinks, was merely an ornament b way of finish at the top of this.

Digitized by Google

the altar was composed, or even to have been substituted for them half-way up from the bottom.

At any rate there can be little doubt that the grating was perpendicular, not horizontal as Jonathan supposes (Targum on Ex. xxvii. 5). According to him it was intended to catch portions of the sacrifice or coals which fell from the altar, and which might thus be easily replaced. But it seems improbable that a net-work or grating should have been constructed for such a purpose (cf. Joseph. *Ant.* iii. 6, § 8). At the four corners of the network were four brazen rings into which were inserted the staves by which the altar was carried. These staves were of the same materials as the altar itself. As the priests were forbidden to ascend the altar by steps (Ex. xx. 26), it has been conjectured that a slope of earth led gradually up to the כַּרְכֹּב, or ledge from which they officiated. This must have been either on the north or south side; for on the east was "the place of the ashes" (Lev. i. 16), and on the west at no great distance stood the laver of brass. According to the Jewish tradition it was on the south side. The place of the altar was at "the door of the tabernacle of the tent of the congregation" (Ex. xl. 29). The various utensils for the service of the altar (Ex. xxvii. 3) were: (*a*) סִירוֹת, *pans* to clear away the fat (לְדַשְּׁנוֹ) and ashes with: elsewhere the word is used of the pots in which the flesh of the sacrifices was put to seethe (cf. Zech. xiv. 20, 21, and 2 Chr. xxxv. 13, with 1 Sam. ii. 14). (*b*) יָעִים, *shovels*, Vulg. *forcipes*, Gesen. *palæ cineri removendo*. (*c*) מִזְרָקוֹת, *basons*, LXX. φιαλαί, vessels in which the blood of the victims was received, and from which it was *sprinkled* (r. זרק). (*d*) מִזְלָגוֹת, *flesh-hooks*, LXX. κρεάγραι, by means of which the flesh was removed from the caldron or pot. (See 1 Sam. ii. 13, 14, where they are described as having three prongs.) (*e*) מַחְתֹּת, *fire-pans*, or perhaps *censers*. These might either be used for taking coals from the fire on the altar (Lev. xvi. 12), or for burning incense (Num. xvi. 6, 7). There is no reason to give the word a different meaning in Ex. xxv. 38, where our version, following the Vulgate, translates it "snuff-dishes." All these utensils were of brass.

(2.) In Solomon's Temple the altar was considerably larger in its dimensions, as might have been expected from the much greater size of the building in which it was placed. Like the former it was square; but the length and breadth were now twenty cubits, and the height ten (2 Chr. iv. 1). It differed, too, in the material of which it was made, being entirely of brass (1 K. viii. 64; 2 Chr. vii. 7). It had no grating; and instead of a single gradual slope, the ascent to it was probably made by three successive platforms, to each of which it has been supposed that steps led (Surenhus. *Mishna*, vol. ii. p. 261, as in the figure annexed). Against this may be urged the fact that the Law of Moses positively forbade the use of steps (Ex. xx. 26) and the assertion of Josephus that in Herod's temple the ascent was by an inclined plane. On the other hand steps are introduced in the ideal, or symbolical, temple of Ezekiel (xliii. 17), and the prohibition in Ex. xx. has been interpreted as applying to a *continuous* flight of stairs and not to a broken ascent. But the biblical account is so brief that we are necessarily unable to determine the

Altar of Burnt Offering, from Surenhusius's Mishna.

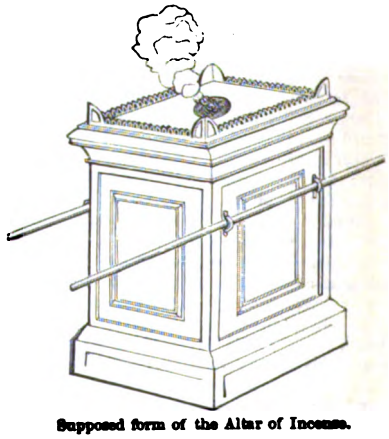
question. Asa, we read, renewed (וַיְחַדֵּשׁ) this altar (2 Chr. xv. 8). This may either mean that he *repaired* it, or more probably perhaps that he *reconsecrated* it, after it had been polluted by idol-worship (ἐνεκαίνισε, LXX.). Subsequently Ahaz had it removed from its place to the north side of the new altar which Urijah the priest had made in accordance with his direction (2 K. xvi. 14). It was "cleansed" by command of Hezekiah (טִהֲרוּ, 2 Chr. xxix. 18), and Manasseh, after renouncing his idolatry, either *repaired* (Chetib, וַיִּכֵּן) or *rebuilt* it (Keri, וַיִּבֶן). It may finally have been broken up and the brass carried to Babylon, but this is not mentioned (Jer. lii. 17 ff.). According to the Rabbinical tradition, this altar stood on the very spot on which man was originally created.

(3.) The Altar of Burnt-offering in the second (Zerubbabel's) temple. Of this no description is given in the Bible. We are only told (Ezr. iii. 2 that it was built before the foundations of the Temple were laid. According to Josephus (*Ant.* xi. 4, § 1) it was placed on the same spot on which that of Solomon had originally stood. It was constructed, as we may infer from 1 Macc. iv. 47, of unhewn stones (λίθους ὁλοκλήρους). Antiochus Epiphanes desecrated it (ᾠκοδόμησαν βδέλυγμα ἐρημώσεως ἐπὶ τὸ θυσιαστήριον, 1 Macc. i. 54) and according to Josephus (*Ant.* xii. 5, § 4) removed it altogether. In the restoration by Judas Maccabæus a new altar was built of unhewn stone in conformity with the Mosaic Law (1 Macc. iv. 47).

(4.) The altar erected by Herod which is thus described by Josephus (*B. J.* v. 5, § 6): "In front of the Temple stood the altar, 15 cubits in height, and in breadth and length of equal dimensions, viz. 50 cubits: it was built foursquare, with horn-like corners projecting from it; and on the south side a gentle acclivity led up to it. Moreover it was made without any iron tool, neither did iron ever touch it at any time." Rufin. has 40 cubits square instead of 50. The dimensions given in the Mishna are different. It is there said (*Middoth*, 3, 1) that the altar was at the base 32 cubits square; at the height of a cubit from the ground 30 cubits square; at 5 cubits higher (where was the circuit, סוֹבְבָא) it was reduced to 28 cubits square, and at the

Digitized by Google

horns still further to 26. A space of a cubit each way was here allowed for the officiating priests to walk, so that 24 cubits square were left for the fire on the altar (חַמְּעֲרָכָה). This description is not very clear. But the Rabbinical and other interpreters consider the altar from the סוֹבְבָא upwards to have been 28 cubits square, allowing at the top, however, a cubit each way for the horns, and another cubit for the passage of the priests. Others, however (as L'Empereur *in loc.*), suppose the ledge on which the priests walked to have been 2 cubits lower than the surface of the altar on which the fire was placed.



The Mishna further states, in accordance with Josephus (see above), and with reference to the law already mentioned (Ex. xx. 25), that the stones of which the altar was made were unhewn; and that twice in the year, viz. at the Feast of the Passover and the Feast of Tabernacles they were whitewashed afresh. The way up (יֵרֵךְ) was on the south side, 32 cubits long and 16 broad, constructed also of unhewn stones. In connection with the horn on the south-west was a pipe intended to receive the blood of the victims which was sprinkled on the left side of the altar: the blood was afterwards carried by means of a subterranean passage into the brook Kidron. Under the altar was a cavity into which the drink-offerings passed. It was covered over with a slab of marble, and emptied from time to time. On the north side of the altar were a number of brazen rings, to secure the animals which were brought for sacrifice. Lastly, round the middle of the altar ran a scarlet thread (חוּט שֶׁל פֵּיכָא) to mark where the blood was to be sprinkled, whether above or below it.

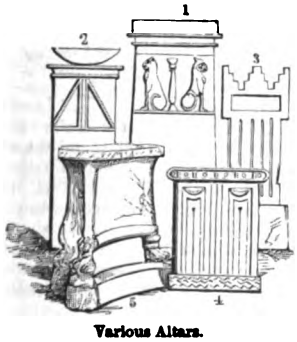
According to Lev. vi. 12, 13, a perpetual fire was to be kept burning on the altar. This, as Bähr (*Symbol.* ii. 350) remarks, was the symbol and token of the perpetual worship of Jehovah. For inasmuch as the whole religion of Israel was concentrated in the sacrifices which were offered, the extinguishing of the fire would have looked like the extinguishing of the religion itself. It was therefore, as he observes, essentially different from the perpetual fire of the Persians (Curt. iii. 3; Amm. Marc. xxiii. 6; Hyde, *Rel. Vet. Pers.* viii. 148), or the fire of Vesta to which it has been compared. These were not sacrificial fires at all, but were symbols of the Deity, or were connected with the belief which regarded fire as one of the primal elements of the world. This fire, according to the Jews, was the same as that which came down from heaven (πῦρ οὐρανοτερές) "and consumed upon the altar the burnt-offering and the fat" (Lev. ix. 24). It couched upon the altar, they say, like a lion; it was bright as the sun; the flame thereof was solid and pure; it consumed things wet and dry alike; and finally, it emitted no smoke. This was one of the five things existing in the first temple which tradition declares to have been wanting in the second (*Tract. Joma*, c. i. sub fin. fol. 21, col. b.). The fire which consumed the sacrifices was kindled from this: and besides these there was the fire from which the coals were taken to burn incense with. (See Carpzov. *Apparat. Hist. Crit. Innot.* p. 286.)

II. **The Altar of Incense** (מִזְבַּח הַקְּטֹרֶת and מִקְטַר הַקְּטֹרֶת, Ex. xxx. 1; θυσιαστήριον θυμιάματος, LXX.), called also the golden altar (מִזְבַּח הַזָּהָב, Ex. xxxix. 38; Num. iv. 11) to distinguish it from the Altar of Burnt-offering which was called the *brazen* altar (Ex. xxxviii. 30). Probably this is meant by the "altar of wood" spoken of Ezek. xli. 22, which is further described as the "table that is *before the Lord*," precisely the expression used of the altar of incense. (See Delitzsch, *Brief an die Hebr.* p. 678.) The name מִזְבֵּחַ, "altar," was not strictly appropriate, as no sacrifices were offered upon it; but once in the year on the great day of atonement, the high-priest sprinkled upon the horns of it the blood of the sin-offering (Ex. xxx. 10).

(*a.*) That in the Tabernacle was made of acacia-wood, overlaid with pure gold. In shape it was square, being a cubit in length and breadth, and 2 cubits in height. Like the Altar of Burnt-offering it had horns at the four corners, which were of one piece with the rest of the altar. So Rabb. Levi ben Gerson: "Discimus inde quod non conveniat facere cornua separatim, et altari deinde apponere, sed quod cornua debeant esse ex corpore altaris." (*Comment. in Leg.* fol. 109, col. 4).

It had also a *top* or *roof* (גַּג: ἐσχάρα, LXX.), on which the incense was laid and lighted. Many, following the interpretation of the Vulgate *craticulam ejus*, have supposed a kind of grating to be meant; but for this there is no authority. Round the altar was a border or wreath (זֵר: στρεπτὴν στεφάνην χρυσῆν, LXX.). Josephus says: ἐπὶ τὴν ἐσχάρα χρυσέα ὑπεραιεστῶσα, ἔχουσα κατὰ γωνίαν ἑκάστην στέφανον (*Ant.* iii. 6, § 8). "Erat itaque cinctorium, ex solido conflatum auro, quod tecto ita adhærebat, ut in extremitate illud cingeret, et prohiberet, ne quid facile ab altari in terram devolveretur." (Carpzov. *Appar. Hist. Crit. Annot* p. 273.) Below this were two golden rings which were to be "for places for the staves to bear it withal." The staves were of acacia-wood overlaid with gold. Its appearance may be illustrated by the following figure: —

Supposed form of the Altar of Incense.



This altar stood in the Holy Place, "before the vail that is by the ark of the testimony" (Ex. xxx. 6, xl. 5). Philo too speaks of it as ἴσον τοῦ προτὸ

ου καταπετάσματος, and as standing between the candlestick and the table of shew bread. In apparent contradiction to this, the author of the Epistle to the Hebrews enumerates it among the objects which were within the second vail (*μετὰ τὸ δεύτερον καταπέτασμα*), *i. e.* in the Holy of Holies. It is true that by *θυμιατήριον* in this passage *may* be meant "a censer," in accordance with the usage of the LXX., but it is better understood of the Altar of Incense which by Philo and other Hellenists is called *θυμιατήριον*. It is remarkable also that in 1 K. vi. 21, 22, this same altar is said to belong to "the oracle" (הַמִּזְבֵּחַ אֲשֶׁר לַדְּבִיר) or most Holy Place. This may perhaps be accounted for by the great typical and symbolical importance attached to this altar, so that it might be considered to *belong* to the *δευτέρα σκηνή*. (See Bleek on Heb. ix. 4, and Delitzsch *in loc.*)

(*b.*) The Altar in Solomon's Temple was similar (1 K. vii. 48; 1 Chr. xxviii. 18), but was made of cedar overlaid with gold. The altar mentioned in Is. vi. 6, is clearly the Altar of Incense, not the Altar of Burnt-offering. From this passage it would seem that heated stones (רִצָּפָה) were laid upon the altar, by means of which the incense was kindled. Although it is the heavenly altar which is there described, we may presume that the earthly corresponded to it.

(*c.*) The Altar of Incense is mentioned as having been removed from the Temple of Zerubbabel by Antiochus Epiphanes (1 Macc. i. 21). Judas Maccabæus restored it, together with the holy vessels, &c. (1 Macc. iv. 49). On the arch of Titus no Altar of Incense appears. But that it existed in the last Temple, and was richly overlaid, we learn from the Mishna (*Chagiga*, iii. 8). From the circumstance that the sweet incense was burnt upon it every day, morning and evening (Ex. xxx. 7, 8), as well as that the blood of atonement was sprinkled upon it (v. 10), this altar had a special importance attached to it. It is the only altar which appears in the Heavenly Temple (Is. vi. 6; Rev. viii. 3, 4).

(C.) Other Altars. (1.) Altars of brick. There seems to be an allusion to such in Is. lxv. 3. The words are: מְקַטְּרִים עַל הַלְּבֵנִים, "offering in-

Various Altars.

1, 2. Egyptian, from bas-reliefs. (Rosellini.)
3. Assyrian, found at Khorsabad. (Layard.)
4. Babylonian, *Bibliothèque Nationale*. (Lajard.)
5. Assyrian, from Khorsabad. (Layard.)

ense on the bricks," generally explained as referring to altars made of this material, and probably situated in the "gardens" mentioned just before. Rosenmüller suggests, however, that the allusion is to some Babylonish custom of burning incense on bricks covered over with magic formulæ or cuneiform inscriptions. This is also the view of Gesenius and Maurer.

(2.) An Altar to an Unknown God (Ἀγνώστῳ Θεῷ, Acts xvii. 23). What altar this was has been the subject of much discussion. St. Paul merely mentions in his speech on the Areopagus that he had himself seen such an altar in Athens. His assertion, as it happens, is confirmed by other writers. Pausanias says (i. § 4), *ἐνταῦθα καὶ βωμοὶ θεῶν τε ὀνομαζομένων ἀγνώστων καὶ ἡρώων καὶ παίδων τῶν Θήσεως καὶ Φαλήρου*. And Philostratus (*Vit. Apollon.* vi. 3), *σωφρονέστερον τὸ περὶ πάντων θεῶν εὖ λέγειν, καὶ ταῦτα Ἀθήνησιν οὗ καὶ ἀγνώστων δαιμόνων βωμοὶ ἵδρυνται*. This as Winer observes, need not be interpreted as if the several altars were dedicated to a number of ἄγνωστοι θεοί, but rather that *each* altar had the inscription Ἀγνώστῳ Θεῷ. It is not at all probable that such inscription referred to the God of the Jews, as One whose Name it was unlawful to utter (as Wolf and others have supposed). As to the origin of these altars, Eichhorn suggests that they may have been built before the art of writing was known (*βωμοὶ ἀνώνυμοι*), and subsequently inscribed *ἀγν. θεῷ*. Neander's view, however, is probably more correct. He quotes Diog. Laertius, who, in his Life of Epimenides, says that in the time of a plague, when they knew not what God to propitiate in order to avert it, he caused black and white sheep to be let loose from the Areopagus, and wherever they lay down to be offered to the respective divinities (*τῷ προσήκοντι θεῷ*). Ὅθεν, adds Diogenes, *ἔτι καὶ νῦν ἐστιν εὑρεῖν κατὰ τοὺς δήμους τῶν Ἀθ. βωμοὺς ἀνωνύμους*. On which Neander remarks that on this or similar occasions altars might be dedicated to an Unknown God, since they knew not what God was offended and required to be propitiated. J. J. S. P.

* If the import of the inscription on the Athenian altar (*ἀγνώστῳ θεῷ*) was simply that the worshippers knew not any longer to what particular heathen god the altars were originally dedicated, it is not easy to see what proper point of connection the apostle could have found for his remark (Acts xvii. 23) with such a relic of sheer idolatry. In that case their ignorance related merely to the identity of the god whom they should conciliate, and implied no recognition of any power additional to that of their heathen deities. A more satisfactory view would seem to be that these altars had their origin in the feeling of uncertainty, which was inherent after all in the minds of the heathen, whether their acknowledgment of the superior powers was sufficiently full and comprehensive; in their distinct consciousness of the limitation and imperfection of their religious views, and their consequent desire to avoid the anger of any still unacknowledged god who might be unknown to them. That no deity might punish them for neglecting his worship, or remain uninvoked in asking for blessings, they not only erected altars to all the gods named or known among them, but distrustful still lest they might not comprehend fully the extent of their subjection and dependence, they erected them also to any other god or power that might exist, although as yet unrevealed to them. It is not to be objected that this explanation ascribes too much discernment to the heathen. (See Psalm xix. 1–4, and Rom.

Digitized by Google

. 18–21.) Not to insist on other proofs furnished by confession of the heathen themselves, such expressions as the comprehensive address, — *At o deorum quicquid in cœlo regit* (Horat. *Epod.* v. 1); the oft-used formula in the prayers of the Greeks and Romans, *Si deo, si deæ;* and the superstitious dread, which they manifested in so many ways, of omitting any deity in their invocations, prove the existence of the feeling to which reference has been made. For ample proof of this more enlightened consciousness among the heathen, see especially Pfanner, *Systema Theologiæ Gentilis Puriorís* (Cap. ii. and viii.). Out of this feeling, therefore, these altars may have sprung, because the supposition is so entirely consistent with the genius of polytheistic heathenism; because the many-sided religiousness of the Athenians would be so apt to exhibit itself in some such demonstration; and especially because Paul could then appeal with so much effect to such an avowal of the insufficiency of heathenism, and to such a testimony so borne, indirect, yet significant, to the existence of the one true God. Under these circumstances an allusion to one of these altars by the apostle would be equivalent to his saying to the Athenians thus: — "You are correct in acknowledging a divine existence beyond any which the ordinary rites of your worship recognize; there is such an existence. You are correct in confessing that this Being is unknown to you; you have no just conceptions of his nature and perfections." He could add then with truth, *Ον οὖν καταγγέλλω ὑμῖν, Whom, therefore, not knowing* (where ἀγνοοῦντες points back evidently to ἀγνώστῳ), *ye worship, this one I announce to you.*

The modern Greeks point out some niches in the rocks at Phaleron as remains of the sanctuary and altar of the "Unknown God"; but these, though ancient, cannot be shown to have any claim to this distinction. It may be added that if the so-called βῆμα at Athens, which is in sight from the Areopagus, be in fact not the famous platform from which the orators spoke, but a βωμός, an altar of sacrifice, as many archæologists now maintain,[a] it then was unquestionably one of the objects of religious veneration (τὰ σεβάσματα) which Paul so carefully scrutinized (ἀναθεωρῶν) as he wandered through the city. H.

AL-TAS'CHITH (אַל תַּשְׁחֵת, *Al Tashcheth*), found in the introductory verse to the four following Psalms: — lvii., lviii., lix., lxv. Literally rendered, the import of the words is "destroy not"; and hence some Jewish commentators, including Rashi (ר' שׁ') and Kimchi (ר' ד' ק'), have regarded אַל תַּשְׁחֵת as a compendium of the argument treated in the above-mentioned Psalms. Modern expositors, however, have generally adopted the view of Aben-Ezra (*Comment.* on Psalm lvii.), agreeably to which "Al Tashcheth" is the beginning of some song or poem to the tune of which those psalms were to be chanted. D. W. M.

A'LUSH (אָלוּשׁ [perh. *wild place*, Fürst or *turba hominum*, Ges.], Sam. אלישׁ: Αἰλούς; [Vat. Αιλειμ:] *Alus*), one of the stations of the Israelites on their journey to Sinai, the last before Rephidim (Num. xxxiii. 13, 14). No trace of it has yet been found. In the Seder Olam (Kitto, *Cyc.* s. v.) it is stated to have been 8 miles from Rephidim. G.

AL'VAH (עַלְוָה [*wickedness*, Hos. x. 9] Γωλά: *Alva*), a duke of Edom (Gen. xxxvi. 40) written Aliah (עַלְיָה [Rom. Γωλαδά; Vat. Alex. Γωλα; Comp. Ald. Αλουά:]) in 1 Chr. i. 51.

* The "duke" in this and other passages is from the Vulg. "dux"; in the Sept. ἡγεμών. Alvah is the name of a place as well as of a chief, like the other associated names in the above passage. See Tuch, *Ueber die Genesis*, p. 492. H.

AL'VAN (עַלְוָן [*tall, thick*, Ges.]: Γωλάμ: [Alex. Γωλαν:] *Alvan*), a Horite, son of Shobal (Gen. xxxvi. 23), written Alian (עַלְיָן [Αλιών; Vat. Σωλαμ; Alex. Ιωλαμ; Comp. Αλουάν: *Alian*]) in 1 Chr. i. 40.

A'MAD (עַמְעָד [perh. *post, station*]: Αμιήλ; [Ald. Alex. Αμάδ: Comp. Αμαάδ:] *Amaad*), an unknown place in Asher between Alammelech and Misheal (Josh. xix. 26 only).[b]

AMADA'THA (Esth. xvi. 10, 17); and **AMADA'THUS** (Esth. xii. 6). [HAMMEDATHA.]

A'MAL (עָמָל [*labor, sorrow*]: Αμάλ; [Vat. M. Αμαα, H. Αμλα:] *Amal*), name of a man (1 Chr. vii. 35) [who is unknown except as one of the descendants of Ashur, the son of Jacob, and as one of the heads of his tribe.]

AM'ALEK (עֲמָלֵק: Αμαλήκ: *Amalech*, [*Amalec*]), son of Eliphaz by his concubine Timnah, grandson of Esau, and one of the chieftains ("dukes" A. V.) of Edom (Gen. xxxvi. 12, 16; 1 Chr. i. 36). His mother came of the Horite race, whose territory the descendants of Esau had seized, and, although Amalek himself is represented as of equal rank with the other sons of Eliphaz, yet his posterity appear to have shared the fate of the Horite population, a "remnant" only being mentioned as existing in Edom in the time of Hezekiah, when they were dispersed by a band of the tribe of Simeon (1 Chr. iv. 43). W. L. B.

AM'ALEKITES (עֲמָלֵקִים: Αμαληκῖται: [Vat. -κει-:] *Amalecitæ*), a nomadic tribe, which occupied the peninsula of Sinai and the wilderness intervening between the southern hill-ranges of Palestine and the border of Egypt (Num. xiii. 29; 1 Sam. xv. 7, xxvii. 8). Arabian historians represent them as originally dwelling on the shores of the Persian Gulf, whence they were pressed westward by the growth of the Assyrian empire, and spread over a portion of Arabia at a period antecedent to its

a * The question is argued with that result by E. Jurtius in his *Attische Studien* (Göttingen, 1862). He had excavations made, under his personal supervision, around the "bema of the Pnyx," as it has been thought to be, and concludes that it must have been not the *bema* "but an altar sacred to Jupiter, and, as indicated by the style of the work, dating from the earliest Athenian antiquity." It would be premature to adopt this conclusion at present. Such Greek archæologists at Athens as Rangabes and such Hellenists as Finlay (as the writer has learned by correspondence still adhere to the old opinion. H

b * Knobel (*Josua*, p. 463) thinks that *Haifa*, the claimant for so many biblical places (see ACHSHAPH may be the present site. Keil (*Josua*. p. 146) refutes that opinion. H.

Digitized by Google

occupation by the descendants of Joktan. This account of their origin harmonizes with Gen xiv. 7, where the "country" ("princes" according to the reading adopted by the LXX.) of the Amalekites is mentioned several generations before the birth of the Edomite Amalek: it throws light on the traces of a permanent occupation of central Palestine in their passage westward, as indicated by the names Amalek and Mount of the Amalekites (Judg. v. 14, xii. 15): and it accounts for the silence of Scripture as to any relationship between the Amalekites on the one hand, and the Edomites or the Israelites on the other. That a mixture of the two former races occurred at a later period, would in this case be the only inference from Gen. xxxvi. 16, though many writers have considered that passage to refer to the origin of the whole nation, explaining Gen. xiv. 7 as a case of *prolepsis*. The physical character of the district which the Amalekites occupied [ARABIA], necessitated a nomadic life, which they adopted to its fullest extent, taking their families with them, even on their military expeditions (Judg. vi. 5). Their wealth consisted in flocks and herds. Mention is made of a "town" (1 Sam. xv. 5), and Josephus gives an exaggerated account of the capture of several towns by Saul (*Ant.* vi. 7, § 2); but the towns could have been little more than stations or nomadic enclosures. The kings or chieftains were perhaps distinguished by the hereditary title Agag (Num. xxiv. 7; 1 Sam. xv. 8). Two important routes led through the Amalekite district, namely, from Palestine to Egypt by the *Isthmus of Suez*, and to southern Asia and Africa by the Ælanitic arm of the Red Sea. It has been conjectured that the expedition of the four kings (Gen. xiv.) had for its object the opening of the latter route; and it is in connection with the former that the Amalekites first came in contact with the Israelites, whose progress they attempted to stop, adopting a *guerilla* style of warfare (Deut. xxv. 18), but were signally defeated at REPHIDIM (Ex. xvii.). In union with the Canaanites they again attacked the Israelites on the borders of Palestine, and defeated them near Hormah (Num. xiv. 45). Thenceforward we hear of them only as a secondary power, at one time in league with the Moabites (Judg. iii. 13), when they were defeated by Ehud near Jericho; at another time in league with the Midianites (Judg. vi. 3) when they penetrated into the plain of Esdraelon, and were defeated by Gideon. Saul undertook an expedition against them, overrunning their whole district "from Havilah to Shur," and inflicting an immense loss upon them (1 Sam. xv.). Their power was thenceforth broken, and they degenerated into a horde of banditti, whose style of warfare is well expressed in the Hebrew term גְּדוּד (Gesen. *Lex.*) frequently applied to them in the description of their contests with David in the neighborhood of Ziklag, when their destruction was completed (1 Sam. xxvii., xxx.; comp. Num. xxiv. 20). W. L. B.

A'MAM (עַמָּם [*gathering-place*]: Χήν; [Ald. Comp. Ἀμάμ:] *Amam*), a city in the south of Judah, named with Shema and Moladah (*el-Milh*) in Josh. xv. 26 only. In the Alex. LXX. the name is joined to the preceding — ἀσωραμάμ. Nothing is known of it. G.

A'MAN (Ἀμάν; [In Tobit, Vat. Αδαμ; Sin. Νααβ:] *Aman*). HAMAN (Tob. xiv. 10; Esth x. 7, xii. 6, xiii. 3, 12, x v. 17, xvi. 10, 17).

AM'ANA (אֲמָנָה [*perennial*]), apparently a mountain in or near Lebanon, — "from the head of Amana" (Cant. iv. 8). It is commonly assumed that this is the mountain in which the river Abana (2 K. v. 12; Keri, Targum Jonathan, and margin of A. V. "Amana") has its source, but in the absence of further research in the Lebanon this is mere assumption. The LXX. translate ἀπὸ ἀρχῆς πίστεως. G.

* If Amana and Abana be the same (ABANA), and consequently the name of a river, the mountain so called, as the etymology shows (see above), must have taken its name from the stream; and further, if this river be the *Barada*, which has its sources in a part of Anti-Lebanon near Hermon, that part of Anti-Lebanon near Hermon must be the part that was anciently called Amana. See *Bibl. Sacra*, vi. 371; and *Handb. for Syria*, ii. 558. There is no proof that Amana still exists as the name of any part of this range.[a] If, as above suggested, the name of the mountain was derived from the river, and not the reverse, it is less surprising that the name of the region should fade away as in the lapse of time Amana, the river-name, gave place to *Barada*. H.

AMARI'AH (אֲמַרְיָה and אֲמַרְיָהוּ: Ἀμαρία and [Alex.] Ἀμαρίας: *Amarias; whom God promised*, Sim., Gesen., *q. v.* Θεόφραστος). Father of Ahitub, according to 1 Chr. vi. 7, 52, and son of Meraioth, in the line of the high-priests. In Josephus's Hist. (*Ant.* viii. 1, § 3) he is transformed into Ἀροφαῖος.

2. The high-priest in the reign of Jehoshaphat (2 Chr. xix. 11). He was the son of Azariah, and the fifth high-priest who succeeded Zadok (1 Chr. vi. 11). Nothing is known of him beyond his name, but from the way in which Jehoshaphat mentions him he seems to have seconded that pious king in his endeavors to work a reformation in Israel and Judah (see 2 Chr. xvii. xix.). Josephus, who calls him Ἀμασίαν τὸν ἱερέα, "Amaziah the priest," unaccountably says of him that he was of the tribe of Judah, as well as Zebadiah, as the text now stands. But if ἑκατέρους is struck out, this absurd statement will disappear (*Ant.* ix. 1, § 1). It is not easy to recognize him in the wonderfully corrupt list of high-priests given in the *Ant.* x. 8, § 6. But he seems to be concealed under the strange form ΑΕΙΩΡΑΜΟΣ, Axioramus The syllable ΑΕ is corrupted from ΑΣ, the termination of the preceding name, Azarias, which has accidentally adhered to the beginning of Amariah, as the final Σ has to the very same name in the text of Nicephorus (ap. Seld. *de Success.* p. 103), producing the form Σαμαρίας. The remaining Ἰόραμος is not far removed from Ἀμαρίας. The successor of Amariah in the high-priesthood must have been Jehoiada. In Josephus Φιδέας, which is a corruption of Ἰωδέας, follows Axioramus. There is not the slightest support in the sacred history for the names *Ahitub* and *Zadok*, who are made to follow *Amariah* in the genealogy, 1 Chr. vi. 11, 12.

3. [In 1 Chr. xxiv. 23, Rom. Ald. Ἀμαδ.] The head of a Levitical house of the Kohathites in the time of David (1 Chr. xxiii. 19, xxiv. 23).

4. [Ἀμαρίας, -ία; in 2 Chr., Vat. Alex. Μαριας:

[a] * Dr. Robinson's remark (iii. 447) is understood to be an inference from Cant. iv. 8. H

Amarias, -ia.] The head of one of the twenty-four sources of priests, which was named after him, in the time of David, of Hezekiah, and of Nehemiah (1 Chr. xxiv. 14; 2 Chr. xxxi. 15; Neh. x. 3, xii. 2, 13). In the first passage the name is written אִמֵּר, *Immer*, but it seems to be the same name. Another form of the name is אִמְרִי, *Imri* (1 Chr. ix. 4), a man of Judah, of the sons of Bani. Of the same family we find,

5. [In Neh., Σαμαρία, Vat. -ρει-; in Ezr., Rom. Ἀμαρεία, Vat. Μαρια; Alex. FA. Comp. Ald. Ἀμαρίας: *Amaria.*] Amariah in the time of Ezra (Ezr. x. 42; Neh. xi. 4).

6. [Ἀμορίας, Alex. -εἰας; Ald. Ἀμαρίας.] An ancestor of Zephaniah the prophet (Zeph. i. 1). A. C. H.

7. (Σαμαρία [Vat. -ρει-].) A descendant of Pharez, the son of Judah (Neh. xi. 4). Probably the same as IMRI in 1 Chr. ix. 4. W. A. W.

AMARI'AS (Ἀμαρίας; [Vat. Αμαρθειας:] *Ameri, Amerias*). AMARIAH 1 (1 Esdr. viii. 2; 2 Esdr. i. 2). W. A. W.

AM'ASA (עֲמָשָׂא, *a burden*: Ἀμεσσαΐ, [etc.; Vat. Alex. Αμεσσαει, etc.:] *Amasa*). 1. Son of Ithra or Jether, by Abigail, David's sister (2 Sam. xvii. 25). He joined Absalom in his rebellion, and was by him appointed commander-in-chief in the place of Joab, by whom he was totally defeated in the forest of Ephraim (2 Sam. xviii. 6). When Joab incurred the displeasure of David for killing Absalom, David forgave the treason of Amasa, recognized him as his nephew, and appointed him Joab's successor (xix. 13). Joab afterwards, when they were both in pursuit of the rebel Sheba, pretended to salute Amasa, and stabbed him with his sword (xx. 10), which he held concealed in his left hand. Whether Amasa be identical with עֲמָשַׂי who is mentioned among David's commanders (1 Chr. xii. 18), is uncertain (Ewald, *Gesch. Israel*, ii. 544).

2. [Ἀμασίας; Vat. Αμασειας.] A prince of Ephraim, son of Hadlai, in the reign of Ahaz (2 Chr. xxviii. 12). R. W. B.

AMA'SAI [3 syl.] (עֲמָשַׂי, in pause עֲמָשָׁי [*burdensome*]: Ἀμεσσί, Ἀμαθί; [Vat. Αμεσσει, Αμαθειας:] Alex. Αμας in 1 Chr. vi. 25: *Amasai*). 1. A Kohathite, father of Mahath and ancestor of Samuel and Ethan the singer (1 Chr. vi. 25, 35).

2. (Ἀμασαί; FA. Αμασε.) Chief of the captains (LXX. "thirty") of Judah and Benjamin, who deserted to David while an outlaw at Ziklag (1 Chr. xii. 18). Whether he was the same as Amasa, David's nephew, is uncertain.

3. (Ἀμασαΐ; FA. Αμασε.) One of the priests who blew trumpets before the Ark, when David brought it from the house of Obed-edom (1 Chr. xv. 24).

4. (Ἀμασί; [Vat. Μασι.]) Another Kohathite, father of another Mahath, in the reign of Hezekiah (2 Chr. xxix. 12), unless the name is that of a family. W. A. W.

AMA'SHAI [3 syl.] (עֲמַשַׁי: Ἀμασία; [Vat. -σεια;] Alex. Αμεσαΐ: *Amassai*). Son of Azareel, a priest in the time of Nehemiah (Neh. xi. 13); apparently the same as MAASIAI (1 Chr. ix. 12). The name is properly "Amashsai." W. A. W.

AMASI'AH (עֲמַסְיָה [*whom Jehovah bears*]: Ἀμασίας; [Vat. Μασσιας;] Alex. Μασσαίας: *Amasias*). Son of Zichri, and captain of 200,000 warriors of Judah, in the reign of Jehoshaphat (2 Chr. xvii. 16). W. A. W.

A'MATH. [HAMATH.]

AM'ATHEIS [3 syl.] (Ἀμαθίας; [Vat. Εμαθθις; Ald. Alex. Ἐμαθείς; Wechel Ἀμαθείς: *Emeus*), 1 Esdr. ix. 29. [ATHLAI.]

AM'ATHIS (in some copies AMATHAS) "THE LAND OF" (ἡ Ἀμαθῖτις χώρα); a district to the north of Palestine, in which Jonathan Maccabæus met the forces of Demetrius (1 Macc. xii. 25). From the context it is evidently HAMATH. G.

AMAZI'AH (אֲמַצְיָה or אֲמַצְיָהוּ, *strength of Jehovah*: Ἀμεσσίας [Vat. -σει-], Ἀμασίας: *Amasias*), son of Joash, and eighth king of Judah, succeeded to the throne at the age of 25, on the murder of his father, and punished the murderers; sparing, however, their children, in accordance with Deut. xxiv. 16, as the 2d book of Kings (xiv. 6) expressly informs us, thereby implying that the precept had not been generally observed. In order to restore his kingdom to the greatness of Jehoshaphat's days, he made war on the Edomites, defeated them in the valley of Salt, south of the Dead Sea (the scene of a great victory in David's time, 2 Sam. viii. 13; 1 Chr. xviii. 12; Ps. lx. title), and took their capital, Selah or Petra, to which he gave the name of Jokteel, i. e. *præmium Dei* (Gesenius, *in voce*), which was also borne by one of his own Jewish cities (Josh. xv. 38). We read in 2 Chr. xxv. 12–14, that the victorious Jews threw 10,000 Edomites from the cliffs, and that Amaziah performed religious ceremonies in honor of the gods of the country; an exception to the general character of his reign (cf. 2 K. xiv. 3, with 2 Chr. xxv. 2). In consequence of this he was overtaken by misfortune. Having already offended the Hebrews of the northern kingdom by sending back, in obedience to a prophet's direction, some mercenary troops whom he had hired from it, he had the foolish arrogance to challenge Joash king of Israel to battle, despising probably a sovereign whose strength had been exhausted by Syrian wars, and who had not yet made himself respected by the great successes recorded in 2 K. xiii. 25. But Judah was completely defeated, and Amaziah himself was taken prisoner, and conveyed by Joash to Jerusalem, which, according to Josephus (*Ant.* ix. 9, 3), opened its gates to the conqueror under a threat that otherwise he would put Amaziah to death. We do not know the historian's authority for this statement, but it explains the fact that the city was taken apparently without resistance (2 K. xiv. 13). A portion of the wall of Jerusalem on the side towards the Israelitish frontier was broken down, and treasures and hostages were carried off to Samaria. Amaziah lived 15 years after the death of Joash; and in the 29th year of his reign was murdered by conspirators at Lachish, whither he had retired for safety from Jerusalem. The chronicler seems to regard this as a punishment for his idolatry in Edom, though his language is not very clear on the point (2 Chr. xxv. 27); and doubtless it is very probable that the conspiracy was a consequence of the low state to which Judah must have been reduced in the latter part of his reign after the Edomitish war and humiliation inflicted by Joash king of Israel. His reign lasted from B. C. 837 to 809. (Clinton, *Fasti Hellenici*, i. 325.

2 [Ἀμασίας.] Priest of the golden calf at Bethel, who endeavored to drive the prophet Amos from Israel into Judah, and complained of him to king Jeroboam II. (Am. vii. 10).

3. [Ἀμασία, Vat. -σεια.] A descendant of Simeon (1 Chr. iv. 34).

4. [Ἀμεσσία, Vat. -σεια, Alex. Μασσια; Comp. Ald. Αμασία.] A Levite (1 Chr. vi. 45).

G. E. L. C.

AMBASSADOR. Sometimes יָצִיר and sometimes מַלְאָךְ is thus rendered, and the occurrence of both terms in the parallel clauses of Prov. xiii. 17 seems to show that they approximate to synonyms. The office, like its designation, was not definite nor permanent, but *pro re natâ* merely. The precept given Deut. xx. 10, seems to imply some such agency; rather, however, that of a mere nuncio, often bearing a letter (2 K. v. 5, xix. 14) than of a legate empowered to treat. The inviolability of such an officer's person may perhaps be inferred from the only recorded infraction of it being followed with unusual severities towards the vanquished, probably designed as a condign chastisement of that offense (2 Sam. x. 2–5; cf. xii. 26–31). The earliest examples of ambassadors employed occur in the cases of Edom, Moab, and the Amorites (Num. xx. 14, xxi. 21; Judg. xi. 17–19), afterwards in that of the fraudulent Gibeonites (Josh. ix. 4, &c.), and in the instances of civil strife mentioned Judg. xi. 12, and xx. 12. (See Cunæus *de Rep. Hebr.* ii. 20, with notes by J. Nicolaus. Ugol. iii. 771–4.) They are mentioned more frequently during and after the contact of the great adjacent monarchies of Syria, Babylon, &c., with those of Judah and Israel, *e. g.* in the invasion of Sennacherib. They were usually men of high rank; as in that case the chief captain, the chief cupbearer, and chief of the eunuchs were deputed, and were met by delegates of similar dignity from Hezekiah (2 K. xviii. 17, 18; see also Is. xxx. 4). Ambassadors are found to have been employed, not only on occasions of hostile challenge or insolent menace (2 K. xiv. 8; 1 K. xx. 2, 6), but of friendly compliment, of request for alliance or other aid, of submissive deprecation, and of curious inquiry (2 K. xiv. 8, xvi. 7, xviii. 14; 2 Chr. xxxii. 31). The dispatch of ambassadors with urgent haste is introduced as a token of national grandeur in the obscure prophecy Is. xviii. 2. H. H.

AMBER (חַשְׁמַל, *chashmal*; חַשְׁמַלָה, *chashmalâh*: ἤλεκτρον: *electrum*) occurs only in Ez. i. 4, 27, viii. 2. In the first passage the prophet compares it with the brightness in which he beheld the heavenly apparition who gave him the divine commands. In the second, "the glory of the God of Israel" is represented as having, "from the appearance of his loins even downward, fire; and from his loins even upward as the appearance of brightness, as the color of amber." It is by no means a matter of certainty, notwithstanding Bochart's dissertation and the conclusion he comes to (*Hieroz.* iii. 876, ed. Rosenmüll.), that the Hebrew word *chashmal* denotes a metal, and not the fossil resin called *amber*, although perhaps the probabilities are more in favor of the metal. Dr. Harris (*Nat. Hist. Bib.* art. "Amber") asserts that the translators of the A. V. could not mean amber, "for that being a bituminous substance, becomes dim as soon as it feels the fire, and soon dissolves and consumes." But this is founded on a misconstruction of the words of the prophet, who does not say that what he saw was amber, but of the color of amber (*Pict. Bib.* note on Ez. viii. 2). The context of the passages referred to above is clearly as much in favor of amber as of metal. Neither do the LXX. and Vulg. afford any certain clew to identification, for the word *electron* was used by the Greeks to express both *amber* and a certain *metal*, composed of gold and silver, and held in very high estimation by the ancients (Plin. *H. N.* xxxiii. 4). It is a curious fact, that in the context of all the passages where mention of *electron* is made in the works of Greek authors (Hom. see below; Hes. *Sc. Herc.* 142; Soph. *Antig.* 1038; Aristoph. *Eq.* 532; &c.), no evidence is afforded to help us to determine what the *electron* was. In the *Odyssey* (iv. 73) it is mentioned as enriching Menelaus's palace, together with copper, gold, silver, and ivory. In *Od.* xv. 460, xviii. 296, a necklace of gold is said to be fitted with *electron*. Pliny, in the chapter quoted above, understands the electron in Menelaus's palace to be the *metal*. But with respect to the golden necklace, it is worthy of note that amber necklaces have been long used, as they were deemed an amulet against throat diseases. Beads of amber are frequently found in British barrows with entire necklaces (Fosbr. *Antiq.* i. 289). Theophrastus (ix. 18, § 2; and *Fr.* ii. 29, ed. Schneider), it is certain, uses the term *electron* to denote *amber*, for he speaks of its attracting properties. On the other hand, that *electron* was understood by the Greeks to denote a metal composed of one part of silver to every four of gold, we have the testimony of Pliny to show; but whether the early Greeks intended the metal or the amber, or sometimes one and sometimes the other, it is impossible to determine with certainty. Passow believes that the *metal* was always denoted by *electron* in the writings of Homer and Hesiod, and that amber was not known till its introduction by the Phœnicians; to which circumstance, as he thinks, Herodotus (iii. 115, who seems to speak of the resin, and not the metal) refers. Others again, with Buttmann (*Mythol.* ii. 337), maintain that the *electron* denoted *amber*, and they very reasonably refer to the ancient myth of the origin of *amber*. Pliny (*H. N.* xxxvii. cap. 2) ridicules the Greek writers for their credulity in the fabulous origin of this substance; and especially finds fault with Sophocles, who, in some lost play, appears to have believed in it.

From these considerations it will be seen that it is not possible to identify the *chashmal* by the help of the LXX., or to say whether we are to understand the metal or the fossil resin by the word. There is, however, one reason to be adduced in favor of the *chashmal* denoting the metal rather than the resin, and this is to be sought in the etymology of the Hebrew name, which, according to Gesenius, seems to be compounded of two words which together = *polished copper*. Bochart (*Hieroz.* iii. 885) conjectures that *chashmal* is compounded of two Chaldee words meaning *copper — gold-ore*, to which he refers the *aurichalcum*. But *aurichalcum* is in all probability only the Latin form of the Greek *orichalcon* (*mountain copper*). (See Smith's *Lat.-Engl. Dict.* s. v. "Orichalcum.") Isidorus, however (*Orig.* xvi. 19), sanctions the etymology which Bochart adopts. But the *electron*, according to Pliny, Pausanias (v. 12, § 6), and the numerous authorities quoted by Bochart, was composed of *gold and silver*, not of *gold and copper*

Digitized by Google

The Hebrew word may denote either the metal *electron* or *amber;* but it must still be left as a question which of the two substances is really intended. W. H.

* **AMEDA'THA**, Esth. iii. 1, A. V. ed. 1611, for HAMMEDATHA. A.

A'MEN (אָמֵן), literally, "firm, true;" and, used as a substantive, "that which is true," "truth" (Is. lxv. 16); a word used in strong asseverations, fixing as it were the stamp of truth upon the assertion which it accompanied, and making it binding as an oath (comp. Num. v. 22). In the LXX. of 1 Chr. xvi. 36, Neh. v. 13, viii. 6, the word appears in the form Ἀμήν, which is used throughout the N. T. In other passages the Heb. is rendered by γένοιτο, except in Is. lxv. 16. The Vulgate adopts the Hebrew word in all cases except in the Psalms, where it is translated *fiat*. In Deut. xxvii. 15–26, the people were to say "Amen," as the Levites pronounced each of the curses upon Mount Ebal, signifying by this their assent to the conditions under which the curses would be inflicted. In accordance with this usage we find that, among the Rabbins, "Amen" involves the ideas of swearing, acceptance, and truthfulness. The first two are illustrated by the passages already quoted; the last by 1 K. i. 36; John iii. 3, 5, 11 (A. V. "verily"), in which the assertions are made with the solemnity of an oath, and then strengthened by the repetition of "Amen." "Amen" was the proper response of the person to whom an oath was administered (Neh. v. 13, viii. 6; 1 Chr. xvi. 36; Jer. xi. 5, marg.); and the Deity, to whom appeal is made on such occasions, is called "the God of *Amen*" (Is. lxv. 16), as being a witness to the sincerity of the implied compact. With a similar significance Christ is called "the *Amen*, the faithful and true witness" (Rev. iii. 14; comp. John i. 14, xiv. 6; 2 Cor. i. 20). It is matter of tradition that in the Temple the "Amen" was not uttered by the people, but that, instead, at the conclusion of the priest's prayers, they responded, "Blessed be the name of the glory of his kingdom for ever and ever." Of this a trace is supposed to remain in the concluding sentence of the Lord's Prayer (comp. Rom. xi. 36). But in the synagogues and private houses it was customary for the people or members of the family who were present to say "Amen" to the prayers which were offered by the minister or the master of the house, and the custom remained in the early Christian church (Matt. vi. 13; 1 Cor. xiv. 16). And not only public prayers, but those offered in private, and doxologies, were appropriately concluded with "Amen" (Rom. ix. 5, xi. 36, xv. 33, xvi. 27; 2 Cor. xiii. 14 (13), &c.). W. A. W.

* The Ἀμήν of the received text at the end of most of the books of the N. T., is probably genuine only in Rom., Gal., Heb. (?), 2 Pet. (?), and Jude. A.

AMETHYST (אַחְלָמָה, *achlâmâh:* ἀμέθυστος: *amethystus*). Mention is made of this precious stone, which formed the third in the third row of the high-priest's breastplate, in Ex. xxviii. 19, xxxix. 12, "And the third row a ligure, an agate, and an amethyst." It occurs also in the N. T. (Rev. xxi. 20) as the twelfth stone which garnished the foundations of the wall of the heavenly Jerusalem. Commentators generally are agreed that the *amethyst* is the stone indicated by the Hebrew word, an opinion which is abundantly supported by the ancient versions. The Targum of Jerusalem indeed reads *smaragdin* (*smaragdus*), those of Jonathan and Onkelos have two words which signify "calf's-eye" (*oculus vituli*), which Braunius (*de Vestit. Sacerd. Heb.* ii. 711) conjectures may be identical with the *Beli oculus* of the Assyrians (Plin. *H. N.* xxxvii. 10), the *Cat's eye Chalcedony*, according to Ajasson and Desfontaines; but as Braunius has observed, the word *achlâmâh* according to the best and most ancient authorities signifies *amethyst*.

Modern mineralogists by the term amethyst usually understand the amethystine variety of *quartz*, which is crystalline and highly transparent: it is sometimes called *Rose quartz*, and contains alumina and oxide of manganese. There is, however, another mineral to which the name of *Oriental amethyst* is usually applied, and which is far more valuable than the quartz kind. This is a crystalline variety of *Corundum*, being found more especially in the E. and W. Indies. It is extremely hard and bright, and generally of a purple color, which, however, it may readily be made to lose by subjecting it to fire. In all probability the common *Amethystine quartz* is the mineral denoted by *achlâmâh;* for Pliny speaks of the amethyst being easily cut (*scalpturis facilis, H. N.* xxxvii. 9), whereas the *Oriental amethyst* is inferior only to the diamond in hardness, and is moreover a comparatively rare gem.

The Greek word *amethustos*, the origin of the English *amethyst*, is usually derived from ἀ, "not," and μεθύω, "to be intoxicated," this stone having been believed to have the power of dispelling drunkenness in those who wore it. (Dionys. Perieg. 1122; *Anthol. Palat.* 9, 752; Martini, *Excurs.* 158.) Pliny, however (*H. N.* xxxvii. 9), says, "The name which these stones have is to be traced to their peculiar tint, which, after approximating to the color of wine shades off into a violet." Theophrastus also alludes to its wine-like color.[a] W. H.

A'MI (אָמִי [*architect*, Fürst]: Ἡμεί: *Ami*), name of one of "Solomon's servants" (Ezr. ii. 57), called Amon (אָמֹן [Ἡμίμ; Vat. Alex. FA. Ημειμ; Comp. Ἀμών: *Amon*]) in Neh. vii. 59 *Ami* is probably a corrupted form of *Amon*.

AMIN'ADAB (Ἀμιναδάβ: *Aminadab*). AMMINADAB 1 (Matt. i. 4; Luke iii. 33). W. A. W.

AMITTAI [3 syl.] (אֲמִתַּי [*true, faithful*]: Ἀμαθί; [Vat. Sin. -θει:] *Amathi*), father of the prophet Jonah (2 K. xiv. 25; Jon. i. 1).

* **AMIZ'ABAD**, 1 Chr. xxvii. 6. So the A. V. ed. 1611, etc. following the Vulgate, the Genevan version, and the Bishops' Bible, for the correct form AMMIZABAD. A.

AM'MAH, the hill of (גִּבְעַת אַמָּה [*mother cubit;* but here, according to Fürst, *aqueducts*, after an Aramæan and Talmudic usage]: ὁ βουνὸς Ἀμμάν; [Alex. Comp. Ἀμμά; Ald. Ἐμμάτ:] *collis aquæ ductûs*), a hill "facing" Giah by the way of the wilderness of Gibeon, named as the point to which Joab's pursuit of Abner after the death of Asahel extended (2 Sam. ii. 24). Josephus (*Ant.* vii. 1, § 3) τόπος τις, ὃν Ἀμμάταν καλοῦσι (comp

[a] Τὸ δ' ἀμέθυστον οἰνωπὸν τῇ χρόᾳ. (*De Lapp.* § 31, ed. Schneid.)

Targ. Jon. אַמִּתָּא). Both Symmachus (*πάτη*), and Theodotion (*ὁδραγωγός*), agree with the Vulgate in an allusion to some watercourse here. Can this point to the "excavated fountain," "under the high rock," described as near Gibeon (*El-Jîb*) by Robinson (i. 455)? G.

* **AMMEDA'THA**, Esth. iii. 1, A. V. ed. 1611, for HAMMEDATHA. A.

AM'MI (עַמִּי: λαός μου: *populus meus*), i. e., as explained in the margin of the A. V., "my people"; a figurative name applied to the kingdom of Israel in token of God's reconciliation with them, and their position as "sons of the living God," in contrast with the equally significant name Lo-ammi, given by the prophet Hosea to his second son by Gomer, the daughter of Diblaim (Hos. ii. 1). In the same manner Ruhamah contrasts with Lo-Ruhamah. W. A. W.

AM'MIDOI, in some copies [*e. g.* ed. 1611] AMMID'IOI (Ἀμμιδοι or Ἀμμιδιοι), named in 1 Esdr. v. 20 among those who came up from Babylon with Zorobabel. The three names Pira, Chadias, and A. are inserted between Beeroth and Ramah, without any corresponding words in the parallel lists of Ezra or Nehemiah.

* Fritzsche (*in loc.*) identifies Ἀμμιδιοι with the inhabitants of Humtah, Josh. xv. 54. There appears to be no authority for the form Ἀμμιδοι. A.

AM'MIEL (עַמִּיאֵל [*people of God*]: Αμιήλ; [Vat. Αμειηλ:] *Ammiel*). 1. The spy selected by Moses from the tribe of Dan (Num. xiii. 12).

2. (Alex. Αμιηρ, Vulg. *Ammihel* in 2 Sam. xvii. 27; [Vat. in 2 Sam. ix., Αμαηρ, Αμειηλ.]) The father of Machir of Lodebar (2 Sam. ix. 4, 5, xvii. 27).

3. The father of Bathshua, or Bathsheba, the wife of David (1 Chr. iii. 5), called ELIAM in 2 Sam. xi. 3; the Hebrew letters, which are the same in the two names, being transposed. He was the son of Ahithophel, David's prime minister.

4. [Vat. Αμειηλ.] The sixth son of Obed-edom (1 Chr. xxvi. 5), and one of the doorkeepers of the Temple. W. A. W.

AMMI'HUD (עַמִּיהוּד [*people of Judah*]: Ἐμιούδ in Num., Ἀμιουδ [Vat. Αμιουειδ] in 1 Chr.: *Ammiud*). 1. An Ephrainite, father of Elishama, the chief of the tribe at the time of the Exodus (Num. i. 10, ii. 18, vii. 48, 53, x. 22), and through him ancestor of Joshua (1 Chr. vii. 26).

2. (Ἀεμιούδ; Alex. Εμιουδ.) A Simeonite, father of Shemuel, chief of the tribe at the time of the division of Canaan (Num. xxxiv. 20).

3. (Ἰαμιούδ; [Vat. Βενιαμειουδ:] Alex. Αμιουδ.) The father of Pedahel, chief of the tribe of Naphtali at the same time (Num. xxxiv. 28).

4. (עַמִּיהוּר, *Keri* עַמִּיהוּד: Ἐμιούδ.) Ammihud, or "Ammichur," as the written text has it, was the father of Talmai, king of Geshur (2 Sam. xiii. 37).

5. (Ἀαμιούδ; [Vat. Ἀαμμιουν or -αs;] Alex. Ἀμιουδ.) A descendant of Pharez, son of Judah (1 Chr. ix. 4). W. A. W.

AMMIN'ADAB (עַמִּינָדָב · Ἀμιναδάβ [Vat. -μειν-]: *Aminadab*; one *of the people*, i. e. family, *of the prince* (*famulus principis*), Gesen.; *man of generosity*, Fürst, who ascribes to עַם the sense of "homo" as its primitive meaning. The passages, Ps. cx. 3, Cant. vi. 12, margin, seem however rather to suggest the sense *my people is willing*). 1. Son of Ram or Aram, and father of Nahshon, or Naasson (as it is written, Matt. i. 4; Luke iii. 33), who was the prince of the tribe of Judah, at the first numbering of Israel in the second year of the Exodus (Num. i. 7, ii. 3; Ruth iv. 19, 20; 1 Chr. ii. 10). We gather hence that Amminadab died in Egypt before the Exodus, which accords with the mention of him in Ex. vi. 23, where we read that "Aaron took him Elisheba daughter of Amminadab, sister of Nahshon, to wife, and she bare him Nadab and Abihu, Eleazar and Ithamar." This also indicates that Amminadab must have lived in the time of the most grievous oppression of the Israelites in Egypt. He is the fourth generation after Judah the patriarch of his tribe, and one of the ancestors of JESUS CHRIST. Nothing more is recorded of him; but the marriage of his daughter to Aaron may be marked as the earliest instance of alliance between the royal line of Judah and the priestly line of Aaron. And the name of his grandson Nadab may be noted as probably given in honor of Ammi-nadab his grandfather.

2. The chief of the 112 sons of Uzziel, a junior Levitical house of the family of the Kohathites (Ex. vi. 18), in the days of David, whom that king sent for, together with Uriel, Asaiah, Joel, Shemaiah, and Eliel, other chief fathers of Levitical houses, and Zadok and Abiathar the priests, to bring the ark of God to Jerusalem (1 Chr. xv. 10–12), to the tent which he had pitched for it. The passage last quoted is instructive as to the mode of naming the houses; for besides the sons of Kohath, 120, at v. 5, we have the sons of Elizaphan, 200, at v. 8, of Hebron, 80, at v. 9, and of Uzziel, 112, at v. 10, all of them Kohathites (Num. iii. 27, 30).

3. [Alex. Ισσααρ.] At 1 Chr. vi. 22 (7, Heb. B.) Izhar, the son of Kohath, and father of Korah, is called Amminadab, and the Vatican LXX. has the same reading. (The Alexandrine has Izhar.) But it is probably only a clerical error.

4. In Cant. vi. 12 it is uncertain whether we ought to read עַמִּינָדִיב, *Amminadib*, with the A. V., or עַמִּי נָדִיב, *my willing people*, as in the margin. If Amminadib is a proper name, it is thought to be either the name of some one famous for his swift chariots, מַרְכָּבוֹת, or that there is an allusion to Abinadab, and to the new cart on which they *made to ride* (יַרְכִּיבוּ) the ark of God (2 Sam. vi. 3). But this last, though perhaps intended by the LXX. version of Cant., which has Ἀμιναδάβ, is scarcely probable. In vii. 2 (1 A. V.) the LXX. also render בַּת־נָדִיב, "oh! prince's daughter," by *θύγατερ* Ναδάβ, and in the Cod. Alex. *θύγατερ* Ἀμιναδάβ. A. C. H.

AMMIN'ADIB (Cant. vi. 12). [AMMINADAB 4.]

AMMISHAD'DAI [4 syl.] (עַמִּישַׁדָּי [*people of the Almighty*]: Ἀμισαδαΐ; [Vat. -μει-, exc. in Num. x. 25;] Alex. Αμισαδαι, exc. Num. ii. 25, Ἀαμισαδαι, and Num x. 25, Μισαδαι: *Amisaddaï*, *Ammisaddaï*). The father of Ahiezer, chief of the tribe of Dan at the time of the Exodus (Num. i. 12, ii. 25, vii. 66, 71, x. 25). His name

Digitized by Google

is one of the few which we find at this period compounded with the ancient name of God, Shaddai; Zurishaddai, and possibly Shedeur, are the only other instances, and both belong to this early time.

W. A. W.

AMMIZ'ABAD (עַמִּיזָבָד [*people of the Giver*, i. e. *God:* Rom. Ald.] Ζαβδί; [Vat. Λαιβαζαβ; Alex. Αμιαζαβ; Comp. Ἀμειζαβδλ:] *Amizabad*). The son of Benaiah, who apparently acted as his father's lieutenant, and commanded the third division of David's army, which was on duty for the third month (1 Chr. xxvii. 6). [AMIZABAD.]

W. A. W.

AM'MON, AM'MONITES, CHILDREN OF AMMON [a] עַמּוֹן (only twice), עַמּוֹנִי, עַמּוֹנִים: בְּנֵי עַמּוֹן: Ἀμμών, Ἀμμανῖται, LXX. in Pent.; elsewhere Ἀμμών, υἱοὶ Ἀμμών; Joseph. Ἀμμανῖται: *Ammon* [*Ammonitæ*], Vulg.), a people descended from Ben-Ammi, the son of Lot by his younger daughter (Gen. xix. 38; comp. Ps. lxxxiii. 7, 8), as Moab was by the elder; and dating from the destruction of Sodom.

The near relation between the two peoples indicated in the story of their origin continued throughout their existence: from their earliest mention (Deut. ii.) to their disappearance from the biblical history (Jud. v. 2), the brother-tribes are named together (comp. Judg. x. 10; 2 Chr. xx. 1; Zeph. ii. 8, &c.). Indeed, so close was their union, and so near their identity, that each would appear to be occasionally spoken of under the name of the other. Thus the "land of the children of Ammon" is said to have been given to the "children of Lot," *i. e.* to both Ammon and Moab (Deut. ii. 19). They are both said to have hired Balaam to curse Israel (Deut. xxiii. 4), whereas the detailed narrative of that event omits all mention of Ammon (Num. xxii., xxiii.). In the answer of Jephthah to the king of Ammon the allusions are continually to Moab (Judg. xi. 15, 18, 25), while Chemosh, the peculiar deity of Moab (Num. xxi. 29), is called "thy god" (24). The land from Arnon to Jabbok, which the king of Ammon calls "my land" (13), is elsewhere distinctly stated to have once belonged to a "king of Moab" (Num. xxi. 26).

Unlike Moab the precise position of the territory of the Ammonites is not ascertainable. In the earliest mention of them (Deut. ii. 20) they are said to have destroyed those Rephaim, whom they called the Zamzummim, and to have dwelt in their place, Jabbok being their border [b] (Num. xxi. 24; Deut. iii. 16, ii. 37). "Land" or "country" is, however, but rarely ascribed to them, nor is there any reference to those habits and circumstances of civilization — the "plentiful fields," the "hay," the "summer-fruits," the "vineyards," the "presses," and the "songs of the grape-treaders" — which so constantly recur in the allusions to Moab (Is. xv., xvi.; Jer. xlviii.); but on the contrary we find everywhere traces of the fierce habits of marauders in their incursions — thrusting out the right eyes of whole cities (1 Sam. xi. 2), ripping up the women with child (Am. i. 13), and displaying a very high degree of crafty cruelty (Jer. xli. 6, 7; Jud. vii. 11, 12) to their enemies, as well as a suspicious discourtesy to their allies, which on one occasion (2 Sam. x. 1–5) brought all but extermination on the tribe (xii. 31). Nor is the contrast less observable between the one city of Ammon, the fortified hold of Rabbah (2 Sam. xi. 1; Ez. xxv. 5: Am. i. 13), and the "streets," the "house-tops," and the "high-places," of the numerous and busy towns of the rich plains of Moab (Jer. xlviii.; Is xv., xvi.). Taking the above into account it is hard to avoid the conclusion that, while Moab was the settled and civilized half of the nation of Lot, the Bene-Ammon formed its predatory and Bedouin section. A remarkable confirmation of this opinion occurs in the fact that the special deity of the tribe was worshipped, not in a house or on a high place, but in a booth or tent designated by the very word which most keenly expressed to the Israelites the contrast between a nomadic and a settled life (Am. v. 26; Acts vii. 43) [SUCCOTH]. (See Stanley, App. § 89.)

On the west of Jordan they never obtained a footing. Among the confusions of the times of the Judges we find them twice passing over; once with Moab and Amalek seizing Jericho, the "city of palm-trees" (Judg. iii. 13), and a second time "to fight against Judah and Benjamin, and the house of Ephraim;" but they quickly returned to the freer pastures of Gilead, leaving but one trace of their presence in the name of Chephar ha-Ammonai, "The hamlet of the Ammonites" (Josh. xviii. 24), situated in the portion of Benjamin somewhere at the head of the passes which lead up from the Jordan-valley, and form the natural access to the table-land of the west country.

The hatred in which the Ammonites were held by Israel, and which possibly was connected with the story of their incestuous origin, is stated to have arisen partly from their opposition, or, rather, their want of assistance (Deut. xxiii. 4), to the Israelites on their approach to Canaan. But it evidently sprang mainly from their share in the affair of Balaam (Deut. xxiii. 4; Neh. xiii. 1). At the period of Israel's first approach to the south of Palestine the feeling towards Ammon is one of regard. The command is then "distress not the Moabites distress not the children of Ammon, nor meddle with them" (Deut. ii. 9, 19; and comp 37); and it is only from the subsequent transaction that we can account for the fact that Edom, who had also refused passage through his land but had taken no part with Balaam, is punished with the ban of exclusion from the congregation for three generations, while Moab and Ammon is to be kept out for ten generations (Deut. xxiii. 3), a sentence which acquires peculiar significance from its being the same pronounced on "bastards" in the preceding verse, from its collocation amongst those pronounced in reference to the most loathsome physical deformities, and also from the emphatic recapitulation (ver. 6), "thou shalt not seek their peace or their prosperity all thy days forever."

But whatever its origin it is certain that the animosity continued in force to the latest date. Subdued by Jephthah (Judg. xi. 33) and scattered with great slaughter by Saul (1 Sam. xi. 11) — and that not once only, for he "vexed" them

[a] The expression most commonly employed for this nation is "Bene-Ammon"; next in frequency comes "Ammoni" or "Ammonim"; and least often "Ammon." The translators of the Auth. Version have, as usual, neglected these minute differences, and have employed the three terms, Children of Ammon, Ammonites, Ammon, indiscriminately.

[b] Josephus says in two places (*Ant.* i. 11, § 5, and xi. 5, § 8), that Moab and Ammon were in Cœle-Syria

Digitized by Google

whithersoever he turned" (xiv. 47) — they enjoyed under his successor a short respite, probably the result of the connection of Moab with David (1 Sam. xxii. 3) and David's town, Bethlehem — where the memory of Ruth must have been still fresh. But this was soon brought to a close by the shameful treatment to which their king subjected the friendly messengers of David (2 Sam. x. 1; 1 Chr. xix. 1), and for which he destroyed their city and inflicted on them the severest blows (2 Sam. xii.: 1 Chr. xx.). [RABBAH.]

In the days of Jehoshaphat they made an incursion into Judah with the Moabites and the Maonites,[a] but were signally repulsed, and so many killed that three days were occupied in spoiling the bodies (2 Chr. xx. 1–25). In Uzziah's reign they made incursions and committed atrocities in Gilead (Am. i. 13); Jotham had wars with them, and exacted from them a heavy tribute of "silver (comp. "jewels," 2 Chr. xx. 25), wheat, and barley" (2 Chr. xxvii. 5). In the time of Jeremiah we find them in possession of the cities of Gad from which the Jews had been removed by Tiglath-Pileser (Jer. xlix. 1–6); and other incursions are elsewhere alluded to (Zeph. ii. 8, 9). At the time of the captivity many Jews took refuge among the Ammonites from the Assyrians (Jer. xl. 11), but no better feeling appears to have arisen, and on the return from Babylon, Tobiah the Ammonite and Sanballat a Moabite (of Choronaim, Jer. xlix.), were foremost among the opponents of Nehemiah's restoration.

Amongst the wives of Solomon's harem are included Ammonite women (1 K. xi. 1), one of whom, Naamah, was the mother of Rehoboam (1 K. xiv. 31; 2 Chr. xii. 13), and henceforward traces of the presence of Ammonite women in Judah are not wanting (2 Chr. xxiv. 26; Neh. xiii. 23; Ezr. ix. 1; see Geiger, *Urschrift*, &c., pp. 47, 49, 299).

The last appearances of the Ammonites in the biblical narrative are in the books of Judith (v., vi., vii.) and of the Maccabees (1 Macc. v. 6, 30–43), and it has been already remarked that their chief characteristics — close alliance with Moab, hatred of Israel and cunning cruelty — are maintained to the end. By Justin Martyr (*Dial. c. Tryph.*) they are spoken of as still numerous (*νῦν πολὺ πλῆθος*); but, notwithstanding this they do not appear again.

The tribe was governed by a king (Judg. xi. 12, &c.; 1 Sam. xii. 12; 2 Sam. x. 1; Jer. xl. 14) and by "princes," שָׂרִי (2 Sam. x. 3; 1 Chr. xix. 3). It has been conjectured that Nahash (1 Sam. xi. 1; 2 Sam. x. 2) was the official title of the king, as Pharaoh was of the Egyptian monarchs; but this is without any clear foundation.

The divinity of the tribe was Molech, generally named in the O. T. under the altered form of Milcom — "the abomination of the children of Ammon;" and occasionally as Malcham. In more than one passage under the word rendered "their king" in the A. V., an allusion is intended to this idol. [MOLECH.]

The Ammonite names preserved in the sacred text are as follow. It is open to inquiry whether these words have reached us in their original form (certainly those in Greek have not), or whether they have been altered in transference to the Hebrew records.

Achior, Ἀχιώρ, quasi אֲחִי אוֹר, *brother of light*, Jud. v. 5, &c.

Baalis, בַּעֲלִיס, *joyful*, Jer. xl. 14.

Hanun, חָנוּן, *pitiable*, 2 Sam. x. 1, &c.

Molech, מֹלֶךְ, *king*.

Naamah, נַעֲמָה, *pleasant*, 1 K. xiv. 21, &c.

Nachash, נָחָשׁ, *serpent*, 1 Sam. xi. 1, &c.

Shobi, שֹׁבִי, *return*, 2 Sam. xvii. 27.

Timotheus, Τιμόθεος, 1 Macc. v. 6, &c.

Tobijah, טוֹבִיָּה, *good*, Neh. ii. 10, &c.

Zelek, צֶלֶק, *scar*,[b] 2 Sam. xxiii. 37.

The name Zamzummim, applied by the Ammonites to the Rephaim whom they dispossessed, should not be omitted. G.

AMMONITESS (הָעַמּוֹנִית: ἡ Ἀμμωνῖτις in 1 K., ἡ Ἀμμανῖτις, 2 Chr. xii. 13, ὁ Ἀμμανίτης, 2 Chr. xxiv. 26; Alex. Αμανιτις in 1 K.; [Vat. η Αμμανειτις, ο Αμμανειτης:] *Ammanitis*). A woman of Ammonite race. Such were Naamah, the mother of Rehoboam, one of Solomon's foreign wives (1 K. xiv. 21, 31; 2 Chr. xii. 13), and Shimeath, whose son Zabad or Jozachar was one of the murderers of king Joash (2 Chr. xxiv. 26). For allusions to these mixed marriages see 1 K. xi. 1, and Neh. xiii. 25. In the Hebrew the word has always the definite article, and therefore in all cases should be rendered "the Ammonitess."

W. A. W.

AMNON (אַמְנוֹן, once אֲמִינוֹן [*faithful*]: Ἀμνών, [Alex. sometimes Αμμαν:] *Amnon*). 1. Eldest son of David by Ahinoam the Jezreelitess, born in Hebron while his father's royalty was only acknowledged in Judah. He dishonored his half-sister Tamar, and was in consequence murdered by her brother (2 Sam. xiii. 1–29). [ABSALOM.] [See also 2 Sam. iii. 2, xiii. 32, 33, 39; 1 Chr. iii 1.]

2. Son of Shimon (1 Chr. iv. 20). G. E. L. C.

AMOK (עָמוֹק [*deep* or *incomprehensible*]: Ἀμέκ; [Vat. om.; Comp. Αμούκ:] *Amoc*). A priest, whose family returned with Zerubbabel, and were represented by Eber in the days of Joiakim (Neh. xii. 7, 20). W. A. W.

***AMOMUM** (ἄμωμον: *amomum*). In the description of the merchandise of Babylon (Rome) in Rev. xviii. 13, the best critical editions read *κιννάμωμον καὶ ἄμωμον*, "cinnamon *and amomum*," for the *κινάμωμον* of the received text. Under the name ἄμωμον or *amomum* Dioscorides and Pliny describe an aromatic plant growing in India, Armenia, Media, and Pontus, which modern botanists have found it difficult to identify with any known species. (See Dioscor. i. 14; Plin. *H. N.* xii. 13, xiii. 1, 2, xvi. 32; Theophr. *Hist. Plant.* ix. 7; *Fr.* iv. 32.) Fée (*Flore de Virgile*, pp. 16, 17) supposes it to be the *Amomum racemosum*, Lam., *Am. cardamomum*, Lin.; Billerbeck (*Flora Classica*, p. 2) makes it the *Amomum grana Paradisi*; Sprengel (*Hist. Rei Herb.* i. 140 ff., 247 f.), Fraas, and others identify it with the *Cissus*

[a] There can be no doubt that instead of "Ammonites" in 2 Chr. xx. 1, and xxvi. 8, we should read, with the LXX., "Maonites" or "Mehunim." The reasons for this will be given under MEHUNIM.

[b] Compare the sobriquet of "Le Balafré"

designation of Linnæus. See also Salmasius, *Homon. Hyl. Iatr.* c. 91; *Plin. Exerc.* i. 284 ff. From the fruit of the *amomum* a precious oil or balsam was obtained, which was used in funeral rites (Pers. iii. 104; Ovid. *Pont.* i. 9, 51; see also *Trist.* iii. 3, 69, where we have *amomi pulvis*), and especially as a perfume for the hair (Ovid. *Her.* xxi. 166; Lucan, x. 164 ff.; Mart. v. 64, 3, viii. 77, 3; Sil. Ital. xi. 403). See Wetstein's note on Rev. xviii. 13. A.

AMON (אָמוֹן: Ἀμμών; [Sin.[1] in Nah., Αρμων]). 1. An Egyptian divinity, whose name occurs in that of נֹא אָמוֹן (Nah. iii. 8), or Thebes, also called נֹא [No]. It has been supposed that Amon is mentioned in Jer. xlvi. 25, but the A. V. is most probably correct in rendering אָמוֹן מִנֹּא "the multitude of No," as in the parallel passage, Ez. xxx. 15, where the equivalent הָמוֹן is employed. Comp. also Ex. xxx. 4, 10, for the use of the latter word with reference to Egypt. These cases, or at least the two former, seem therefore to be instances of paronomasia (comp. Is. xxx. 7, lxv. 11, 12). The Greeks called this divinity Ἄμμων, whence the Latin Ammon and Hammon; but their writers give the Egyptian pronunciation as Ἀμμοῦν (Herod. ii. 42), Ἀμοῦν (Plut. *de Isid. et Osir.* 9), or Ἀμῶν (Iambl. *de Myst.* viii. 3). The ancient Egyptian name is Amen, which must signify "the hidden," from the verb *amen*, "to enwrap, conceal" (Champollion, *Dictionnaire Égyptien*, p. 197), Copt. ⲁⲙⲟⲩⲛ. This interpretation agrees with that given by Plutarch, on the authority of a supposition of Manetho. (Μανεθὼς μὲν ὁ Σεβεννύτης τὸ κεκρυμμένον σέβεται καὶ τὴν κρύψιν ἐκ τούτου δηλοῦσθαι τῆς φωνῆς, *de Isid. et Osir. l. c.*) Amen was one of the eight gods of the first order, and chief of the triad of Thebes. He was worshipped at that city as Amen-Ra, or "Amen the sun," represented as a man wearing a

The god Amon. (Wilkinson.)

cap with two high plumes, and Amen-Ra ka mut-ef, "Amen-Ra, who is both male and female," represented as the generative principle. In the latter form he is accompanied by the figures of trees or other vegetable products, like the "groves" mentioned in the Bible [EGYPT], and is thus connected with Baal. In the Great Oasis, and the famous one named after him, he was worshipped in the form of the ram-headed god Num, and called either Amen. Amen-Ra, or Amen-Num, and thus the Greeks came to suppose him to be always ram-headed, whereas this was the proper characteristic of Num (Wilkinson, *Modern Egypt and Thebes*, vol. ii. pp. 367, 375). The worship of Amen spread from the Oasis along the north coast of Africa, and even penetrated into Greece. The Greeks identified Amen with Zeus, and he was therefore called Zeus Ammon and Jupiter Ammon. R. S. P.

AMON (אָמוֹן [*multitude*, or *architect*]. Ἀμώς, Kings [Jer., and so Lachm., Tisch., Treg., in Matt.]; Ἀμών, Chr., [Zeph., where Sin. reads Αμμων; Vat.[1] in 1 Chr. Αμων, Vat. in 2 Chr. Αμως; Alex. Αμμων in 1 K., elsewhere Αμως:] Joseph. Ἄμωσος: *Amon*). 1. King of Judah, son and successor of Manasseh. The name may mean *skillful in his art*, or *child* (verbal from אָמַן, *to nurse*). Yet it sounds Egyptian, as if connected with the Theban god, and possibly may have been given by Manasseh to his son in an idolatrous spirit. Following his father's example, Amon devoted himself wholly to the service of false gods, but was killed in a conspiracy after a reign of two years. Probably by insolence or tyranny he had alienated his own servants, and fell a victim to their hostility, for the people avenged him by putting all the conspirators to death, and secured the succession to his son Josiah. To Amon's reign we must refer the terrible picture which the prophet Zephaniah gives of the moral and religious state of Jerusalem: idolatry supported by priests and prophets (i. 4, iii. 4), the poor ruthlessly oppressed (iii. 3), and shameless indifference to evil (iii. 11). According to Clinton (*F. H.* i. 328), the date of his accession is B. C. 642; of his death, B. C. 640 (2 K. xxi. 19; 2 Chr. xxxiii. 20). [Occurs 2 K. xxi. 18–25; 1 Chr. iii. 14; 2 Chr. xxxiii. 20–25; Jer. i. 2, xxv. 3; Zeph. i. 1; Matt. i. 10.] G. E. L. C.

2. (אָמוֹן, אָמֹן: Σεμήρ, Ἐμήρ; Alex. Αμμων, Σεμμηρ; [Ald. Ἀμμών, Ἐμμήρ; Comp. Ἀμών, Ἀμμών:] *Aman*). Prince or governor of Samaria in the reign of Ahab (1 K. xxii. 26; 2 Chr. xviii. 25). What was the precise nature of his office is not known. Perhaps the prophet Micaiah was intrusted to his care as captain of the citadel. The Vat. MS. of the LXX. has τὸν βασιλέα τῆς πόλεως in 1 K., but ἄρχοντα in 2 Chr. Josephus (*Ant.* viii. 15, § 4) calls him Ἀχάμων W. A. W.

3. See AMI.

AM'ORITE, THE AM'ORITES (הָאֱמֹרִי, הָאֱמֹרִי (always in the singular), accurately "the Emorite" — the dwellers on the summits — mountaineers: Ἀμορραῖοι: *Amorrhæi*), one of the chief nations who possessed the land of Canaan before its conquest by the Israelites.

In the genealogical table of Gen. x. "the Amorite" is given as the fourth son of Canaan, with "Zidon, Heth [Hittite], the Jebusite," &c. The interpretation of the name as "mountaineers" or "highlanders" — due to Simonis (see his *Onomasticon*), though commonly ascribed to Ewald — is quite in accordance with the notices of the text which, except in a few instances, speak of the Amorites as dwelling on the elevated portions of the

Digitized by Google

country. In this respect they are contrasted with the Canaanites, who were the dwellers in the lowlands; and the two thus formed the main broad divisions of the Holy Land. "The Hittite, and the Jebusite, and the Amorite, dwell in the mountain [of Judah and Ephraim], and the Canaanite dwells by the sea [the lowlands of Philistia and Sharon] and by the 'side' of Jordan" [in the valley of the Arabah], — was the report of the first Israelites who entered the country (Num. xiii. 29; and see Josh. v. 1, x. 6, xi. 3; Deut. i. 7, 20; "Mountain of the A.," ver. 44). This we shall find borne out by other notices. In the very earliest times (Gen. xiv. 7) they are occupying the barren heights west of the Dead Sea, at the place which afterwards bore the name of En-gedi; hills in whose fastnesses, the "rocks of the wild goats," David afterwards took refuge from the pursuit of Saul (1 Sam. xxiii. 29; xxiv. 2). [HAZEZON-TAMAR]. From this point they stretched west to Hebron, where Abram was then dwelling under the "oak-grove" of the three brothers, Aner, Eshcol, and Mamre (Gen. xiv. 13; comp. xiii. 18). From this, their ancient seat, they may have crossed the valley of the Jordan, tempted by the high table-lands on the east, for there we next meet them at the date of the invasion of the country. Sihon, their then king, had taken the rich pasture-land south of the Jabbok, and had driven the Moabites, its former possessors, across the wide chasm of the Arnon (Num. xxi. 26; 13), which thenceforward formed the boundary between the two hostile peoples (Num. xxi. 13). The Israelites apparently approached from the south-east, keeping "on the other side" (that is, on the east) of the upper part of the Arnon, which there bends southwards, so as to form the eastern boundary of the country of Moab. Their request to pass through his land to the fords of Jordan was refused by Sihon (Num. xxi. 21; Deut. ii. 26); he "went out" against them (xxi. 23; ii. 32), was killed with his sons and his people (ii. 33), and his land, cattle, and cities taken possession of by Israel (xxi. 24, 25, 31, ii. 34–6). This rich tract, bounded by the Jabbok on the north, the Arnon on the south, Jordan on the west, and "the wilderness" on the east (Judg. xi. 21, 22) — in the words of Josephus "a land lying etween three rivers after the manner of an island" (*Ant.* iv. 5, § 2) — was, perhaps, in the most special sense the "land of the Amorites" (Num. xxi. 31; Josh. xii. 2, 3, xiii. 9; Judg. xi. 21, 22); but their possessions are distinctly stated to have extended to the very feet of Hermon (Deut. iii. 8, iv. 48), embracing "all Gilead and all Bashan" (iii. 10), with the Jordan valley on the east of the river (iv. 49), and forming together the land of the "two kings of the Amorites," Sihon and Og (Deut. xxxi. 4; Josh. ii. 10, ix. 10, xxiv. 12).

After the passage of the Jordan we again meet with Amorites disputing with Joshua the conquest of the west country. But although the name generally denotes the mountain tribes of the centre of the country, yet this definition is not always strictly maintained, varying probably with the author of the particular part of the history, and the time at which it was written. Nor ought we to expect that the Israelites could have possessed very accurate knowledge of a set of small tribes whom they were called upon to exterminate — with whom they were forbidden to hold any intercourse — and, moreover, of whose general similarity to each other we have convincing proof in the confusion in question.

Some of these differences are as follows: — Hebron is "Amorite" in Gen. xiii. 18, xiv. 13, though "Hittite" in xxiii. and "Canaanite" in Judg. i. 10. The "Hivites" of Gen. xxxiv. 2, are "Amorites" in xlviii. 22; and so also in Josh. ix. 7, xi. 19, as compared with 2 Sam. xxi. 2. Jerusalem is "Amorite" in Josh. x. 5, 6,[a] but in xv. 63, xviii. 28; Judg. i. 21, xix. 11; 2 Sam. v. 6, &c., it is "Jebusite." The "Canaanites" of Num. xiv. 45 (comp. Judg. i. 17), are "Amorites" in Deut. i. 44. Jarmuth, Lachish, and Eglon, were in the low country of the *Shefelah* (Josh. xv. 35, 39), but in Josh. x. 5, 6, they are "Amorites that dwell in the mountains;" and it would appear as if the "Amorites" who forced the Danites into the mountain (Judg. i. 34, 35) must have themselves remained on the plain.

Notwithstanding these few differences, however, from a comparison of the passages previously quoted it appears plain that "Amorite" was a local term, and not the name of a distinct tribe. This is confirmed by the following facts. (1.) The wide area over which the name was spread. (2.) The want of connection between those on the east and those on the west of Jordan — which is only once hinted at (Josh. ii. 10). (3.) The existence of kings like Sihon and Og, whose territories were separate and independent, but who are yet called "the two kings of the Amorites," a state of things quite at variance with the habits of Semitic tribes. (4.) Beyond the three confederates of Abram, and these two kings, no individual Amorites appear in the history (unless Araunah or Ornan the Jebusite be one). (5.) There are no traces of any peculiar government, worship, or customs, different from those of the other "nations of Canaan."

One word of the "Amorite" language has survived — the name Senir (not "Shenir") for Mount Hermon (Deut. iii. 9); but may not this be the Canaanite name as opposed to the Phœnician (Sirion) on the one side and the Hebrew on the other?

All mountaineers are warlike; and, from the three confederate brothers who at a moment's notice accompanied "Abram the Hebrew" in his pursuit of the five kings, down to those who, not depressed by the slaughter inflicted by Joshua and the terror of the name of Israel, persisted in driving the children of Dan into the mountain, the Amorites fully maintained this character.

After the conquest of Canaan nothing is heard in the Bible of the Amorites, except the occasional mention of their name in the usual formula for designating the early inhabitants of the country

G.

AMOS (עָמוֹס, a *burden*: Ἀμώς: *Amos*), a native of Tekoah in Judah, about six miles S. of Bethlehem, originally a shepherd and dresser of sycamore-trees, was called by God's Spirit to be a prophet, although not trained in any of the regular prophetic schools (i. 1, vii. 14, 15). He travelled from Judah into the northern kingdom of Israel or Ephraim, and there exercised his ministry, apparently not for any long time. His date cannot be later than the 15th year of Uzziah's reign (B. C. 808, according to Clinton, *F. H.* i. 325); for he tells us that he prophesied "in the reigns of Uzziah king of Judah, and Jeroboam the son of Joash king of Israel, two years before the earthquake."

[a] The LXX. has here τῶν Ἰεβουσαίων

This earthquake (also mentioned Zech. xiv. 5) cannot have occurred after the 17th year of Uzziah, since Jeroboam II. died in the 15th of that king's reign, which therefore is the latest year fulfilling the three chronological indications furnished by the prophet himself. But his ministry probably took place at an earlier period of Jeroboam's reign, perhaps about the middle of it; for on the one hand Amos speaks of the conquests of this warlike king as completed (vi. 13, cf. 2 K. xiv. 25), on the other the Assyrians, who towards the end of his reign were approaching Palestine (Hos. x. 6, xi. 5), do not seem as yet to have caused any alarm in the country. Amos predicts indeed that Israel and other neighboring nations will be punished by certain wild conquerors from the North (i. 5, v. 27, vi. 14), but does not name them, as if they were still unknown or unheeded. In this prophet's time Israel was at the height of power, wealth, and security, but infected by the crimes to which such a state is liable. The poor were oppressed (viii. 4), the ordinances of religion thought burdensome (viii. 5), and idleness, luxury, and extravagance were general (iii. 15). The source of these evils was idolatry, of course that of the golden calves, not of Baal, since Jehu's dynasty occupied the throne, though it seems probable from 2 K. xiii. 6, which passage must refer to Jeroboam's reign [BENHADAD III.], that the rites even of Astarte were tolerated in Samaria, though not encouraged. Calf-worship was specially practiced at Bethel, where was a principal temple and summer palace for the king (vii. 13; cf. iii. 15), also at Gilgal, Dan, and Beersheba in Judah (iv. 4, v. 5, viii. 14), and was offensively united with the true worship of the Lord (v. 14, 21–23; cf. 2 K. xvii. 33). Amos went to rebuke this at Bethel itself, but was compelled to return to Judah by the high-priest Amaziah, who procured from Jeroboam an order for his expulsion from the northern kingdom.[a]

The book of the prophecies of Amos seems divided into four principal portions closely connected together. (1) From i. 1 to ii. 3 he denounces the sins of the nations bordering on Israel and Judah, as a preparation for (2), in which, from ii. 4 to vi. 14, he describes the state of those two kingdoms, especially the former. This is followed by (3), vii. 1–ix. 10, in which, after reflecting on the previous prophecy, he relates his visit to Bethel, and sketches the impending punishment of Israel which he predicted to Amaziah. After this, in (4), he rises to a loftier and more evangelical strain, looking forward to the time when the hope of the Messiah's kingdom will be fulfilled, and His people forgiven and established in the enjoyment of God's blessings to all eternity. The chief peculiarity of the style consists in the number of allusions to natural objects and agricultural occupations, as might be expected from the early life of the author. See i. 3, ii. 13, iii. 4, 5, iv. 2, 7, 9, v. 8, 19, vi. 12, vii. 1, ix. 3, 9, 13, 14. The book presupposes a popular acquaintance with the Pentateuch (see Hengstenberg, *Beiträge zur Einleitung ins Alte Testament*, i. 83–125), and implies that the ceremonies of religion, except where corrupted by Jeroboam I., were in accordance with the law of Moses. The references to it in the New Testament are two: v. 25, 26, 27 is quoted by St. Stephen in Acts vii. 42, and ix. 11 by St. James in Acts xv. 16. As the book is evidently not a series of detached prophecies, but logically and artistically connected in its several parts, it was probably written by Amos as we now have it after his return to Tekoah from his mission to Bethel. (See Ewald, *Propheten des Alten Bundes*, i. 84 ff.) G. E. L. C.

* Among the later commentators on Amos may be mentioned J. A. Theiner, *Klein. Propheten*, 1828; Hitzig, *Klein. Proph. erklärt*, 1838, 3e Aufl. 1863; Maurer, *Com. Gram. Hist. Crit. in Proph. Minores*, 1840; Ewald, *Proph. d. Alten Bundes*, 1840; Umbreit, *Prakt. Com. über die Proph.* IV. i., 1844; Henderson, *Minor Prophets*, Lond. 1845, Amer. ed. 1860; Baur, *Der Proph. Amos erklärt*, 1847; and Pusey, *Minor Prophets*, 1861. There is a rapid but graphic sketch of the contents of the prophecy, as well as of the career of the prophet, by Stanley (*Jewish Church*, ii. 396 ff. Amer. ed.). For a list of the older writers and their characteristics, the reader is referred to Baur's *Einleitung* to his commentary named above (pp. 149–162). H.

2. (Ἀμώς: *Amos*.) Son of Naum, in the genealogy of Jesus Christ (Luke iii. 25). W. A. W.

AMOZ (אָמוֹץ: Ἀμώς: *Amos*), father of the prophet Isaiah (2 K. xix. 2, 20, xx. 1; 2 Chr. xxvi. 22, xxxii. 20, 32; Is. i. 1, ii. 1, xiii. 1, xx. 2 [xxxvii. 2, 21, xxxviii. 1.]

AMPHIPOLIS (Ἀμφίπολις: *Amphipolis*), a city of Macedonia, through which Paul and Silas passed in their way from Philippi to Thessalonica (Acts xvii. 1). It was distant 33 Roman miles from Philippi (*Itin. Anton.* p. 320). It was called Amphipolis, because the river Strymon flowed almost round the town (Thuc. iv. 102). It stood upon an eminence on the left or eastern bank of this river, just below its egress from the lake Cercinitis, and at the distance of about three miles from the sea. It was a colony of the Athenians, and was memorable in the Peloponnesian war for the battle fought under its walls, in which both Brasidas and Cleon were killed (Thuc. v. 6–11). Its site is now occupied by a village called *Neokhório*, in Turkish *Jeni-Keui*, or "New-Town."

* The reader will notice from the wood-cut (taken from Cousinéry) the singular position of this apostolic place. *Neokhório* is the modern Greek Νεοχώριον. Though the name is changed, the identification is undoubted, since the position answers so perfectly to the ancient name and to the notices of ancient writers (ἐπ' ἀμφότερα περιῤῥέοντος τοῦ Στρυμόνος, Thuc. iv. 102). Cousinéry inserts a plan of the ruins still found on the spot in his *Voyage dans Macédoine* (i. 134), among which are parts of the city wall, symbolic figures, inscriptions, *tumuli*, &c. See also Leake's *Northern Greece*, iii. 181 ff. At the point here where Paul crossed the Strymon on his mission of philanthropy (ἡ φιλανθρωπία τοῦ σωτῆρος ἡμῶν θεοῦ, Tit. iii. 4), Xerxes, on his invasion of Greece, "offered a sacrifice of white horses to the river, and buried alive nine youths and maidens." See Herod. vii. 113, 114 and Rawlinson's note there. It was not till after the great sacrifice on Golgotha that human sacri-

[a] * There was a later Jewish tradition, says Stanley, "that he was beaten and wounded by the indignant hierarchy of Bethel and carried back half dead to his native place—the fate which such a rough, plain-spoken preacher would naturally invite; and it would almost seem as if faint allusions to it transpire in more than one place in the N. T." (comp. Heb. xi. 35; Matt. xxi. 35). See *Jewish Church*, ii. 400, Amer. ed. H

Amphipolis.

loes ceased generally, even among the Greeks and Romans. See Lasaulx's interesting monograph entitled *Sühnopfer der Griechen u. Römer u. ihr Verhältniss zu dem Einem auf Golgotha* (tr. in the *Bibl. Sacra*, i. 368–408). For the classical interest of Amphipolis, the reader is referred to Grote's *History of Greece*, vi. 625 ff., and Arnold's *Thucydides*, ii. (at the end). [APOLLONIA.] H.

AMPLIAS (Ἀμπλίας, [Lachm. marg. Sin. AFG, Ἀμπλιᾶτος: *Ampliatus*]), a Christian at Rome [whom Paul salutes and terms his "beloved in the Lord"] (Rom. xvi. 8).

AM'RAM (עַמְרָם [*people of the exalted*, i. e. *God*]: Ἀμβράμ, [Ἀμράμ; Vat. in Ex. vi. 20, Αμβραν:] *Amram*). 1. A Levite, father of Moses, Aaron, and Miriam (Ex. vi. 18, 20; Num. iii. 19, [xxvi. 58, 59; 1 Chr. vi. 2, 3, 18, xxiii. 12, 13, xxiv. 20]). R. W. B.

2. (חַמְרָן: Ἐμερών; Alex. Αμαδα; [Ald. Ἀμαδάμ; Comp. Ἀμαδάν:] *Hamram.*) Properly Hamran or Chamran; son of Dishon and descendant of Levi (1 Chr. i. 41). In Gen. xxxvi. 26 he is called HEMDAN, and this is the reading in 1 Chr. in many of Kennicott's MSS.

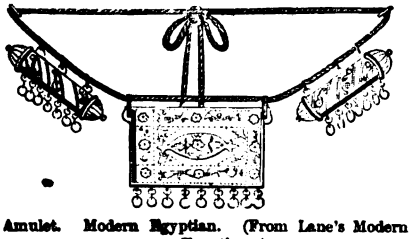
3. (עַמְרָם: Ἀμράμ; [Vat. Αμαρει;] Alex. Αμβραμ: *Amram.*) One of the sons of Bani, in the time of Ezra, who had married a foreign wife (Ezr. x. 34). Called OMAERUS in 1 Esdr. ix. 34.

AM'RAMITES, THE (עַמְרָמִי: ὁ Ἀμράμ, ὁ Ἀμβράμ; Alex. ο Αμβρααμ, ο Αμραμι: *Amramitæ*). A branch of the great Kohathite family of the tribe of Levi (Num. iii. 27; 1 Chr. xxvi. 23); descended from Amran., the father of Moses. W. A. W.

AM'RAPHEL (אַמְרָפֶל: Αμαρφάλ: *Amraphel*), perhaps a Hamite king of Shinar or Babylonia, who joined the victorious incursion of the Elamite Chedorlaomer against the kings of Sodom and Gomorrah and the cities of the plain (Gen. xiv. 1, 9). The meaning of the name is uncertain; some have connected it with the Sanskrit *amarapála*, "the guardian of the immortals." (Comp. Rawlinson's *Herodotus*, i. 446.) S. L.

AMULETS were ornaments, gems, scrolls, &c., worn as preservatives against the power of enchantments, and generally inscribed with mystic forms or characters. The "ear-rings" in Gen. xxxv. 4 (נְזָמִים: ἐνώτια: *inaures*) were obviously connected with idolatrous worship, and were probably amulets taken from the bodies of the slain Shechemites. They are subsequently mentioned among the spoils of Midian (Judg. viii. 24), and perhaps their objectionable character was the reason why Gideon asked for them. Again, in Hos. ii. 13, "decking herself with ear-rings" is mentioned as one of the signs of the "days of Baalim." Hence in Chaldee an ear-ring is called חַרְשָׁא.

But amulets were more often worn round the neck, like the golden bulla or leather lorum of the Roman boys. Sometimes they were precious stones, supposed to be endowed with peculiar virtues. In the "Mirror of stones" the strangest properties are attributed to the amethyst, Kinocetus, Alectoria, Ceraunium, &c.; and Pliny, talking of succina, says "Infantibus alligari amuleti ratione prodest" (xxxvii. 12, s. 37). They were generally suspended as the centre-piece of a necklace, and among the Egytians often consisted of the emblems of various deities, or the symbol of truth and justice ("Thmei"). A gem of this kind, formed of sapphires, was worn by the chief judge of Egypt (Diod. i. 48, 75), and a similar one is represented as worn by the youthful deity Harpocrates (Wilkinson, *An. Egypt.* iii. 364). The Arabs hang round their children's necks the figure of an open hand; a custom which, according to Shaw, arises from the *unluckiness* of the number 5. This principle is often found in the use of amulets. Thus the basilisk is constantly engraved on the talismanic scarabæi of Egypt, and according to Jahn (*Arch. Bibl.* § 131, Engl. tr.), the לְחָשִׁים of Is. iii. 21, were "fig



Digitized by Google

ures of serpents carried in the hand" (more probably worn in the ears) "by Hebrew women." The word is derived from לָחַשׁ, *sibilavit*, and means both "enchantments" (cf. Is. iii. 3), and the magical gems and formularies used to avert them (Gesen. s. v.). It is doubtful whether the LXX. intends περιδέξια as a translation of this word; "pro voce περιδ. nihil est in textu Hebraico" (Schleusner's *Thesaurus*). For a like reason the phallus was among the sacred emblems of the Vestals (*Dict. of Ant.*, art. "Fascinum").

The commonest amulets were sacred words (the tetragrammaton, &c.) or sentences, written in a peculiar manner, or inscribed in some cabalistic figure like the shield of David, called also Solomon's Seal. Another form of this figure is the pentangle (or pentacle, v. Scott's *Antiquary*), which "consists of three triangles intersected, and made of five lines, which may be so set forth with the body of man as to touch and point out the places where our Saviour was wounded" (Sir Thos. Brown's *Vulg. Errors*, i. 10). Under this head fall the Ἐφέσια γράμματα (Acts xix. 19), and in later times the Abraxic gems of the Basilidians; and the use of the word "Abracadabra," recommended by the physician Serenus Samonicus as a cure of the hemitritæus. The same physician prescribes for quartan ague

"Mæoniæ Iliados quartum suppone timenti."

Charms "consisting of words written on folds of papyrus tightly rolled up and sewed in linen," have been found at Thebes (Wilkinson, *l. c.*), and our English translators possibly intended something of the kind when they rendered the curious phrase (in Is. iii.) פְּתָתֵי הַנְּפָשׁ by "tablets." It was the danger of idolatrous practices arising from a

Amulet. Modern Egyptian. (From Lane's Modern Egyptians.)

knowledge of this custom that probably induced the sanction of the use of phylacteries (Deut. vi. 8; xi. 18, טוֹטָפוֹת). The modern Arabs use scraps of the Koran (which they call "telesmes" or "alakakirs") in the same way.

A very large class of amulets depended for their value on their being constructed under certain astronomical conditions. Their most general use was to avert ill-luck, &c., especially to nullify the effect of the ὀφθαλμὸς βάσκανος, a belief in which is found among all nations. The Jews were particularly addicted to them, and the only restriction placed by the Rabbis on their use was, that none but *approved* amulets (*i. e.* such as were *known* to have cured three persons) were to be worn on the Sabbath (Lightfoot's *Hor. Hebr.* in Matt. xxiv. 24). It was thought that they kept off the evil spirits who caused disease. Some animal substances were considered to possess such properties, as we see from Tobit. Pliny (xxviii. 47) mentions a fox's tongue worn on an amulet as a charm against blear eyes, and says (xxx. 15) "Scarabæorum cornua alligata amuleti naturam obtinent;" perhaps an Egyptian fancy. In the same way one of the Roman emperors wore a seal-skin as a charm against thunder Among plants, the white bryony and the Hypericon, or Fuga Dæmonum, are mentioned as useful (Sir T. Brown, *Vulg. Errors*, i. 10. He attributes the whole doctrine of amulets to the devil, but still throws out a hint that they may work by "imponderous and invisible emissions").

Amulets are still common. On the Mod. Egyptian "Hegáb" see Lane, *Mod. Egypt*, c. 11, and on the African "pieces of medicine," a belief in which constitutes half the religion of the Africans, see Livingstone's *Travels*, p. 285, *et passim*. [TERAPHIM; TALISMAN.] F. W. F.

AM'ZI (אַמְצַי [*strong*]: Ἀμεσσία; [Vat. -σει-] Alex. Μασσια: *Amasai*). 1. A Levite of the family of Merari, and ancestor of Ethan the minstrel (1 Chr. vi. 46).

2. (Ἀμασί [Vat. -σει]: *Amsi*.) A priest, whose descendant Adaiah with his brethren did the service for the Temple in the time of Nehemiah (Neh. xi. 12). W. A. W.

A'NAB (עֲנָב [*grape-town*, Gesen.]: Ἀναβώθ, Ἀνών; Alex. Ανωβ: [*Anab*]), a town in the mountains of Judah (Josh. xv. 50), named, with Debir and Hebron, as once belonging to the Anakim (Josh. xi. 21). It has retained its ancient name ['*Anâb*], and lies among the hills about 10 miles S. S. W. of Hebron, close to Shoco and Eshtemoa (Rob. i. 494). The conjecture of Eus. and Jerome (*Onom. Anob, Anab*) is evidently inadmissible. G.

AN'AEL (Ἀναήλ). The brother of Tobit (Tob. i. 21).

A'NAH (עֲנָה [perh. *answering*, i. e. *a request*]; Ἀνά; [Gen. xxxvi. 24, Alex. Ωνας; 1 Chr. i. 40, 41, Rom. Σωνάν, Alex. Ωναμ, Ανα:] *Ana*), the son of Zibeon, the son of Seir, the Horite (Gen. xxxvi. 20. 24), and father of Aholibamah, one of the wives of Esau (Gen. xxxvi. 2, 14). We are no doubt thus to understand the text with Winer, Hengstenberg, Tuch, Knobel, and many others, though the Hebrew reads "Aholibamah, daughter of Anah, daughter of Zibeon (בַּת־עֲנָה בַּת־צִבְעוֹן);" nor is there any necessity to correct the reading in accordance with the Sam., which has בן instead of the second בת; it is better to refer the second בת to Aholibamah instead of to its immediate antecedent Anah. The word is thus used in the wider sense of descendant (here granddaughter), as it is apparently again in this chapter, v. 39. We may further conclude with Hengstenberg (*Pent.* ii. 280; Eng. transl. ii. 229) that the Anah mentioned amongst the sons of Seir in v. 20 in connection with Zibeon, is the same person as is here referred to, and is therefore the grandson of Seir. The intention of the genealogy plainly is not so much to give the lineal descent of the Seirites as to enumerate those descendants who, being heads of tribes, came into connection with the Edomites. It would thus appear that Anah, from whom Esau's wife sprang, was the head of a tribe independent of his father, and ranking on an equality with that tribe. Several difficulties occur in regard to the race and name of Anah By his descent from Seir he is

Digitized by Google

Horite [which see] (Gen. xxxvi. 20), whilst in v. 2 he is called a Hivite, and again in the narrative (Gen. xxvi. 34) he is called Beeri the Hittite. Hengstenberg's explanation of the first of these difficulties is far-fetched; and it is more probable that the word Hivite (חַוִּי) is a mistake of transcribers for Horite (חֹרִי). With regard to the identification of Anah the Horite with Beeri the Hittite, see BEERI. F. W. G.

* In Gen. xxxvi. 24 (A. V.), we read: "This was that Anah that found the mules in the wilderness, as he fed the asses of Zibeon his father." The word יְמִים is here rendered *mules*, according to the Jewish explanation (Targ. of Jonathan, the Talmud, Saadias, Rabbinic commentators), followed in Luther's and other modern versions. With this rendering of יְמִים, the statement is altogether insignificant, unless מָצָא is taken (as by the Talmudist) in the sense of *invent*, as in Luther's version; meaning that Anah *found out* the way of producing mules, by coupling animals of different species. But this sense the Hebrew word will not bear. The explanation is evidently drawn from the connection merely, without any support from etymology. Equally baseless is the interpretation in the Targ. of Onkelos, and the Samaritan Codex, taking יְמִים in the sense of *giants* (as if = אֵמִים, Deut. ii. 11).

Another and probably older exegetical tradition, transmitted through Jerome and the Vulgate, renders יְמִים by *warm springs* (Vulgate *aquas calidas*). This has the support of etymology (Gesenius, *Thes.*, יוֹם), as well as of the ancient tradition, and is corroborated by the frequent occurrence of warm springs in the region referred to, as observed both by ancient writers and by modern travellers.[a] T. J. C.

ANAHA'RATH (אֲנָחֲרָה [*hollow way* or *pass*, Fürst]: Ἀναχερέθ; [Alex. Αρρανεθ: *Anaharath*]), a place within the border of Issachar, named with Shichon and Rabbith (Josh. xix. 19). Nothing is yet known of it. G.

* Some think it may be the present *Arâneh*, near the foot of Gilboa, about 2 miles east of *Jenin* (Engannim). See Zeller's *Bibl. Wörterb.* p. 60, 2te Aufl. Robinson mentions the place twice (ii. 316, 319), but does not suggest the identification. H.

ANA'IAH [3 syl.] (עֲנָיָה: Ἀναΐας; [Vat. M. Ανανια:] *Ania*). 1. Probably a priest; one of those who stood on Ezra's right hand as he read the Law to the people (Neh. viii. 4). He is called ANANIAS in 1 Esdr. ix. 43.

2. (Ἀναΐα: [Vat. Αναναΐα; Ald. Ἀναΐα:] *Anaïa.*) One of the "heads" of the people, who signed the covenant with Nehemiah (Neh. x. 22). W. A. W.

A'NAK. [ANAKIM.]

AN'AKIM (עֲנָקִים: Ἐνακίμ, [Vat. -κειμ, and so Alex. in Deut.:] *Enacim*), a race of giants (so called either from their stature (*longicolli*, Gesen.), or their strength (Fürst), (the root עָנַק being identical with our word *neck*), descendants of Arba (Josh. xv. 13, xxi. 11), dwelling in the southern part of Canaan, and particularly at Hebron, which from their progenitor received the name of קִרְיַת אַרְבַּע, city of Arba. Besides the general designation Anakim, they are variously called בְּנֵי עֲנָק, sons of Anak (Num. xiii. 33), יְלִידֵי הָעֲנָק, descendants of Anak (Num. xiii. 22), and בְּנֵי עֲנָקִים, sons of Anakim [LXX. υἱοὶ γιγάντων] (Deut. i. 28). These designations serve to show that we must regard Anak as the name of the race rather than that of an individual, and this is confirmed by what is said of Arba, their progenitor, that he "was a great man among the Anakim" (Josh. xiv. 15). The race appears to have been divided into three tribes or families, bearing the names Sheshai, Ahiman, and Talmai. Though the warlike appearance of the Anakim had struck the Israelites with terror in the time of Moses (Num. xiii. 28; Deut. ix. 2), they were nevertheless dispossessed by Joshua, and utterly driven from the land, except a small remnant that found refuge in the Philistine cities, Gaza, Gath, and Ashdod (Josh. xi. 21). Their chief city, Hebron, became the possession of Caleb, who is said to have driven out from it the three sons of Anak mentioned above, that is, the three families or tribes of the Anakim (Josh. xv. 14, Judg. i. 20). After this time they vanish from history.[b] F. W. G.

AN'AMIM (עֲנָמִים: Ἐνεμετείμ; [Alex. in Gen. Αινεμετειμ, in 1 Chr. Αναμιειμ; Comp. in 1 Chr. Αἰνομίμ; 7 MSS. Ἀναμίμ:] *Anamim*), a Mizraite people or tribe, respecting the settlements of which nothing certain is known (Gen. x. 13; 1 Chr. i. 11). Judging from the position of the other Mizraite peoples, as far as it has been determined, this one probably occupied some part of Egypt, or of the adjoining region of Africa, or possibly of the south-west of Palestine. No name bearing any strong resemblance to Anamim has been pointed out in the geographical lists of the Egyptian monuments, or in classical or modern geography. [The name may be Egyptian and refer to the region of the tribe. Ges., Fürst.] R. S. P.

ANAM'MELECH [*Hebrew* Anamme'lech] (עַנַמֶּלֶךְ: Ἀνημελέχ; [Alex. Αμημελεχ; Ald. Ἀνεμελέχ:] *Anamelech*), one of the idols worshipped by the colonists introduced into Samaria from Sepharvaim (2 K. xvii. 31). He was worshipped with rites resembling those of Molech, children being burnt in his honor, and is the companion-god to ADRAMMELECH. As Adrammelech is the male power of the sun, so Anammelech is the female power of the sun (Rawlinson's *Herodotus*, i. 611). The etymology of the word is uncertain. Rawlinson connects it with the name *Anunit*. Gesenius derives the name from words meaning *idol* and *king*, but Reland (*de vet. ling. Pers.* ix.) deduces the first part of it from the Persian word for *grief*. Winer advocates a derivation connecting the idol with the constellation Ce-

[a] * It may have been from the discovery of these springs, as Hengstenberg suggests, that Anah received the other name which he bore, namely, BEERI, "of wells," i. e. a man concerned with them. See also Baumgarten (*Pentateuch*, i. 300). H.

[b] * The A. V. adds *s* to this name, and thus makes it (Anakims) doubly plural, as in the case of Emim, Cherubim, and similar terms. H.

pheus, some of the stars in which are called by the Arabs "the shepherd and the sheep."

G. E. L. C.

ANAN (עֲנָן [*a cloud*]: Ἀνάμ, Alex. [Comp.] Ἀνάν: *Anan*). 1. One of the "heads" of the people, who signed the covenant with Nehemiah (Neh. x. 26).

2. (Ἀνάν; Alex. Ἀννάν: *Anani*.) HANAN 4 (1 Esdr. v. 30; comp. Ezr. ii. 46). W. A. W.

ANA'NI (עֲנָנִי [*Jehovah protects*]: Ἀνάν; [Vat. Μανεί;] Alex. Ἀνανί: *Anani*). The seventh son of Elioenai, descended through Zerubbabel from the line royal of Judah (1 Chr. iii. 24). W. A. W.

ANANI'AH (עֲנַנְיָה [*whom Jehovah protects*]: Ἀνανία: *Ananias*). Probably a priest; ancestor of Azariah, who assisted in rebuilding the city wall after the return from Babylon (Neh. iii. 23). W. A. W.

ANANI'AH (עֲנַנְיָה [*whom Jehovah protects*]), a place, named between Nob and Hazor, in which the Benjamites lived after their return from captivity (Neh. xi. 32). The LXX. [in most MSS.] omits all mention of this and the accompanying names [but Comp. has Ἀνία, and FA.^{3} Ἀνανια]. G.

ANANI'AS (עֲנַנְיָ, or חֲנַנְיָה [*Jehovah is gracious*]: Ἀνανίας). 1. A high-priest in Acts xxiii. 2 ff. xxiv. 1, [before whom Paul attempted to defend himself, in the Jewish Council at Jerusalem, but was silenced with a blow on the mouth for asserting that he had always "lived in all good conscience before God." See, in regard to that incident, PAUL]. He was the son of Nebedæus (Joseph. *Ant.* xx. 5, § 2), succeeded Joseph son of Camydus (*Ant.* xx. 1, § 3, 5, § 2), and preceded Ismael son of Phabi (*Ant.* xx. 8, §§ 8, 11). He was nominated to the office by Herod king of Chalcis, in A. D. 48 (*Ant.* xx. 5, § 2); and in A. D. 52 sent to Rome by the prefect Ummidius Quadratus to answer before the Emperor Claudius a charge of oppression brought by the Samaritans (*Ant.* xx. 6, § 2). He appears, however, not to have lost his office, but to have resumed it on his return. This has been doubted; but Wieseler (*Chronol. d. Apostol. Zeitalters*, p. 76, note) has shown that it was so in all probability, seeing that the procurator Cunanus, who went to Rome with him as his adversary, was unsuccessful, and was condemned to banishment. He was deposed from his office shortly before Felix left the province (*Ant.* xx. 8, § 8; but still had great power, which he used violently and lawlessly (*Ant.* xx. 9, § 2). He was at last assassinated by the Sicarii (*B. J.* ii. 17, § 9) at the beginning of the last Jewish war.

2. A disciple at Jerusalem, husband of Sapphira (Acts v. 1 ff.). Having sold his goods for the benefit of the church, he kept back a part of the price, bringing to the apostles the remainder, as if it were the whole, his wife also being privy to the scheme. St. Peter, being enabled by the power of the Spirit to see through the fraud, denounced him as having lied to the Holy Ghost, *i. e.* having attempted to pass upon the Spirit resident in the apostles an act of deliberate deceit. On hearing this, Ananias fell down and expired. That this incident was no mere physical consequence of St. Peter's severity of tone, as some of the German writers have maintained, distinctly appears by the direct sentence of a similar death pronounced by the same apostle upon his wife Sapphira a few hours after. [SAPPHIRA.] It is of course possible that Ananias's death may have been an act of divine justice unlooked for by the apostle, as there is no mention of such an intended result in his speech; but in the case of the wife, such an idea is out of the question. Niemeyer (*Charakteristik der Bibel*, i. 574) has well stated the case as regards the blame which some have endeavored to cast on St. Peter in this matter, when he says that not man, but God, is thus animadverted on. The apostle is but the organ and announcer of the divine justice, which was pleased by this act of deserved severity to protect the morality of the infant church, and strengthen its power for good.

3. A Jewish disciple at Damascus (Acts ix. 10 ff.), of high repute, "a devout man according to the law, having a good report of all the Jews which dwelt there" (Acts xxii. 12). Being ordered by the Lord in a vision, he sought out Saul during the period of blindness and dejection which followed his conversion, and announced to him his future commission as a preacher of the Gospel, conveying to him at the same time, by the laying on of his hands, the restoration of sight, and commanding him to arise, and be baptized, and wash away his sins, calling on the name of the Lord. Tradition makes him to have been afterwards bishop of Damascus, and to have died by martyrdom (*Menolog. Græcorum*, i. 79 f.). H. A.

ANANI'AS (Ἀννίς; [Vat. Ἀννεις;] Alex. Ἀνναιας;] Ald. Ἀναναίας:] *Ananias*). 1. The sons of Ananias to the number of 101 (Vulg. 130) enumerated in 1 Esdr. v. 16 as having returned with Zorobabel. No such name exists in the parallel lists of Ezra and Nehemiah.

2. (Ἀναναίας: om. in Vulg.) HANANI 3 (1 Esdr. ix. 21; comp. Ezr. x. 20).

3. (*Amanias.*) HANANIAH 9 (1 Esdr. ix. 29; comp. Ezr. x. 28).

4. (*Ananias.*) ANAIAH 1 (1 Esdr. ix. 43; comp. Neh. viii. 4).

5. [Ἀναναίας; Vat. Ἀννιας.] HANAN 5 (1 Esdr. ix. 48; comp. Neh. viii. 7).

6. Father of Azarias, whose name was assumed by the angel Raphael (Tob. v. 12, 13). In the LXX. he appears to be the eldest brother of Tobit.

7. (*Jamnor.*) Ancestor of Judith (Jud. viii. 1). The Cod. Sin. [with Alex.] gives Ἀνανιας, though the Vat. MS. omits the name.

8. (Ἀναναίας: *Ananias.*) Shadrach (Song of 3 Ch. 66; 1 Macc. ii. 59). [HANANIAH 7.] W. A. W.

ANAN'IEL (Ἀνανιήλ: *Ananiel*), forefather of Tobias (Tob. i 1).

A'NATH (עֲנָת [*answer*, i. e. *to* prayer]: Δινάχ, Ἀνάθ; [Vat. Δειναχ, Ἀναθεν; Alex. Ἀναθ, Κεναθ:] *Anath*), father of Shamgar (Judg. iii. 31, v. 6).

ANATH'EMA (ἀνάθεμα, in LXX., the equivalent for חֵרֶם, a thing or person *devoted*: in N. T. generally translated *accursed*. The more usual form is ἀνάθημα (ἀνατίθημι), with the sense of an *offering suspended* in a temple (Luke xxi. 5; 2 Macc. ix. 16). The Alexandrine writers preferred the short penultimate in this and other kindred words (*e. g.* ἀντίθεμα, σύνθεμα); but occasionally both forms occur in the MSS., as in Jud. xvi 19 2 Macc. xiii. 15; Luke xxi. 5: no distinct- were

fore existed originally in the meanings of the words, as has been supposed by many early writers. The Hebrew חֵרֶם is derived from a verb signifying primarily to *shut up*, and hence to (1) *consecrate* or *devote*, and (2) *exterminate*. Any object so devoted to the Lord was irredeemable: if an inanimate object, it was to be given to the priests (Num. xviii. 14); if a living creature or even a man, it was to be slain (Lev. xxvii. 28, 29); hence the idea of *extermination* as connected with *devoting*. Generally speaking, a vow of this description was taken only with respect to the idolatrous nations who were marked out for destruction by the special decree of Jehovah, as in Num. xxi. 2; Josh. vi. 17; but occasionally the vow was made indefinitely, and involved the death of the innocent, as is illustrated in the cases of Jephthah's daughter (Judg. xi. 31), and Jonathan (1 Sam. xiv. 24) who was only saved by the interposition of the people. The breach of such a vow on the part of any one directly or indirectly participating in it was punished with death (Josh. vii. 25). In addition to these cases of spontaneous devotion on the part of individuals, the word חֵרֶם is frequently applied to the extermination of idolatrous nations: in such cases the idea of a *vow* appears to be dropped, and the word assumes a purely secondary sense (ἐξολοθρεύω, LXX.): or, if the original meaning is still to be retained, it may be in the sense of Jehovah (Is. xxxiv. 2) *shutting up*, i. e. *placing under a ban*, and so necessitating the *destruction* of them, in order to prevent all contact. The extermination being the result of a positive command (Ex. xxii. 20), the idea of a vow is excluded, although doubtless the instances already referred to (Num. xxi. 2; Josh. vi. 17) show how a vow was occasionally superadded to the command. It may be further noticed that the degree to which the work of destruction was carried out, varied. Thus it applied to the destruction of (1) men alone (Deut. xx. 13); (2) men, women, and children (Deut. ii. 34); (3) virgins excepted (Num. xxxi. 17; Judg. xxi. 11); (4) all living creatures (Deut. xx. 16; 1 Sam. xv. 3); the spoil in the former cases was reserved for the use of the army (Deut. ii. 35, xx. 14; Josh. xxii. 8), instead of being given over to the priesthood, as was the case in the recorded vow of Joshua (Josh. vi. 19.) Occasionally the town itself was utterly destroyed, the site rendered desolate (Josh. vi. 26), and the name Hormah (Ἀνάθεμα, LXX.) applied to it (Num. xxi. 3).

We pass on to the Rabbinical sense of חֵרֶם as referring to *excommunication*, premising that an approximation to that sense is found in Ezr. x. 8, where forfeiture of goods is coupled with separation from the congregation. Three degrees of excommunication are enumerated (1) נִדּוּי, involving various restrictions in civil and ecclesiastical matters for the space of 30 days: to this it is supposed that the terms ἀφορίζειν (Luke vi. 22) and ἀποσυνάγωγος (John ix. 22) refer. (2) חֵרֶם, a more public and formal sentence, accompanied with curses and involving severer restrictions for an indefinite period. (3) שַׁמְּתָא, rarely, if ever, used — complete and irrevocable excommunication. חֵרֶם was occasionally used in a generic sense for any of the three (Carpzov. *Appar.* p. 557). Some expositors refer the terms ὀνειδίζειν καὶ ἐκβάλλειν (Luke vi. 22) to the second species, but a comparison of John ix. 22 with 34 shows that ἐκβάλλειν is synonymous with ἀποσυνάγωγον ποιεῖν, and there appears no reason for supposing the latter to be of a severe character.

The word ἀνάθεμα frequently occurs in St. Paul's writings [five times], and many expositors have regarded his use of it as a technical term for judicial excommunication. That the word was so used in the early Church, there can be no doubt (Bingham, *Antiq.* xvi. 2, § 16); but an examination of the passages in which it occurs shows that, like the cognate word ἀναθεματίζω (Matt. xxvi. 74; Mark xiv. 71; Acts xxiii. 12, 21), it had acquired a more general sense as expressive either of strong feeling (Rom. ix. 3; cf. Ex. xxxii. 32), or of dislike and condemnation (1 Cor. xii. 3, xvi. 22; Gal. i. 8, 9)

W. L. B.

AN'ATHOTH (עֲנָתוֹת [see *below*]: Ἀναθώθ; *Anathoth*). 1. Son of Becher, a son of Benjamin (1 Chr. vii. 8), probably the founder of the place of the same name.

2. One of the heads of the people, who signed the covenant in the time of Nehemiah (Neh. x. 19); unless, as is not unlikely, the name stands for "the men of Anathoth" enumerated in Neh. vii. 27

W. A. W.

AN'ATHOTH (עֲנָתוֹת,[a] possibly = *echoes* [or *inclinations*, *declivity*, Dietr.]; plur. of עֲנָה, by which name the place is called in the Talmud, *Joma*, p. 10; Ἀναθώθ: *Anathoth*), a city of Benjamin, omitted from the list in Josh. xviii., but a priests' city; with "suburbs" (Josh. xxi. 18; 1 Chr. vi. 60 (45)). Hither, to his "fields," Abiathar was banished by Solomon after the failure of his attempt to put Adonijah on the throne (1 K. ii. 26). This was the native place of Abiezer, one of David's 30 captains (2 Sam. xxiii. 27; 1 Chr. xi. 28, xxvii. 12), and of Jehu, another of the mighty men (1 Chr. xii. 3); and here, "of the priests that were in Anathoth," Jeremiah was born (Jer. i. 1; xi. 21, 23; xxix. 27; xxxii. 7, 8, 9).

The "men" (אַנְשֵׁי not בְּנֵי, as in most of the other cases; comp. however, Netophah, Michmash, &c.) of Anathoth returned from the captivity with Zerubbabel (Ezr. ii. 23; Neh. vii. 27; 1 Esdr. v. 18.)

Anathoth lay on or near the great road from the north to Jerusalem (Is. x. 30); by Eusebius it is placed at three miles from the city (*Onom.*), and by Jerome (*turris Anathoth*) at the same distance *contra septentrionem Jerusalem* (*ad Jerem.* cap. i.). The traditional site at *Kuriet el-Enab* does not fulfill these conditions, being 10 miles distant from the city, and nearer W. than N. But the real position has no doubt been discovered by Robinson at *'Anâta*, on a broad ridge 1 hour N.N.E. from Jerusalem. The cultivation of the priests survives

[a] There are some variations in the orthography of this name, both in Hebrew and the A. V., which must be noticed. 1. Hebrew: In 1 K. ii. 26, and Jer. xxxii. 9, it is עֲנָתֹת, and similarly in 2 Sam. xxiii. 27, הָעֲנָתֹתִי. 2. English: Anethothite, 2 Sam xxiii. 27; Anetothite, 1 Chr. xxvii. 12; Antothite, 1 Chr. xi. 28, xii. 3. "Jeremiah of A.," Jer xxix. 27 should be, "J. the Anathothite."

Digitized by Google

in tilled fields of grain, with figs and olives. There are the remains of walls and strong foundations, and the quarries still supply Jerusalem with building stone (Rob. i. 437, 438). G.

* The present *Anâta* is a little hamlet of 12 or 15 houses, where, as of old on roofs of this humble class, the grass still grows on the house-tops; and striking image of the Hebrew writers (Ps. cxxix. 6, 7, and Is. xxxvii. 27) of man's immaturity and frailty. The 100 *Häuser* in Besser's *Bibl. Wörth.* p. 61, should certainly be 100 inhabitants (or less), and not "houses." It is worth remarking, too, that parts of the Dead Sea and its dismal scenery are distinctly visible from this ancient home of the pensive, heart-burdened Jeremiah. Dr. Wilson (*Lands of the Bible*, i. 483) represents *Anâta* as within sight from the Mount of Olives. H.

ANCHOR. [SHIP.]

ANDREW, ST. (Ἀνδρέας: *Andreas*; the name Andreas occurs in Greek writers; *e. g.* Athen. vii. 312, and xv. 675; it is found in Dion Cass. lxviii. 32, as the name of a Cyrenian Jew, in the reign of Trajan), one among the first called of the Apostles of our Lord (John i. 40, 41; Matt iv. 18); brother (whether elder or younger is uncertain) of Simon Peter (*ibid.*). He was of Bethsaida, and had been a disciple of John the Baptist.[a] On hearing Jesus a second time designated by him as the Lamb of God, he left his former master, and in company with another of John's disciples attached himself to our Lord. By his means his brother Simon was brought to Jesus (John i. 41). The apparent discrepancy in Matt. iv. 18 ff. Mark iii. 16 ff., where the two appear to have been called together, is no real one, St. John relating the first introduction of the brothers to Jesus, the other Evangelists their formal call to follow Him in his ministry. In the catalogue of the Apostles, Andrew appears, in Matt. x. 2, Luke vi. 14, second, next after his brother Peter; but in Mark iii. 16, Acts i. 13, fourth, next after the three, Peter, James, and John, and in company with Philip. And this appears to have been his real place of dignity among the apostles; for in Mark xiii. 3, we find Peter, James, John, and Andrew, inquiring privately of our Lord about His coming; and in John xii. 22, when certain Greeks wished for an interview with Jesus, they applied through Andrew, who consulted Philip, and in company with him made the request known to our Lord. This last circumstance, conjoined with the Greek character of both their names, may perhaps point to some slight shade of Hellenistic connection on the part of the two apostles; though it is extremely improbable that any of the Twelve were Hellenists in the proper sense. On the occasion of the five thousand in the wilderness wanting nourishment, it is Andrew who points out the little lad with the five barley loaves and the two fishes. Scripture relates nothing of him beyond these scattered notices. Except in the catalogue (i. 13), his name does not occur once in the Acts. The traditions about him are various. Eusebius (iii. 1) makes him preach in Scythia; Jerome (Ep. 148, *ad Marc.*) and Theodoret (*ad Psalm.* cxvi.), in Achaia (Greece); Nicephorus (ii. 39), in Asia Minor and Thrace. He is said to have been crucified at Patræ in Achaia, on a *crux decussata* (X); but this is doubted by Lipsius (*de Cruce*, i. 7), and Sagittarius (*de Cruciatibus Martyrum*, viii. 12). Eusebius (*H. E.* iii. 25) speaks of an apocryphal Acts of Andrew; and Epiphanius (*Hær.* xlvi. 1) states that the Encratites accounted it among their principal Scriptures; and (lxiii. 2) he says the same of the Origenians. (See Fabric. *Cod. Apocr.* i. 456 ff. [Tischendorf, *Acta Apost. Apoc.* p. xl. ff., 105 ff.] *Menolog. Græcor.* i. 221 f.; Perion. *Vit. Apostol.* i. 82 ff.)

H. A.

ANDRONI'CUS (Ἀνδρόνικος [*man of victory*]). 1. An officer left as viceroy (διαδεχόμενος, 2 Macc. iv. 31) in Antioch by Antiochus Epiphanes during his absence (B. C. 171). Menelaus availed himself of the opportunity to secure his good offices by offering him some golden vessels which he had taken from the temple. When Onias (ONIAS III.) was certainly assured that the sacrilege had been committed, he sharply reproved Menelaus for the crime, having previously taken refuge in the sanctuary of Apollo and Artemis at Daphne. At the instigation of Menelaus, Andronicus induced Onias to leave the sanctuary and immediately put him to death in prison (παρέκλεισεν, 2 Macc. iv. 34?). This murder excited general indignation; and on the return of Antiochus, Andronicus was publicly degraded and executed (2 Macc. iv. 30–38). Josephus places the death of Onias before the high-priesthood of Jason (*Ant.* xii. 5, 1,) and omits all mention of Andronicus; but there is not sufficient reason to doubt the truthfulness of the narrative, as Wernsdorf has done (*De fide libr. Macc.* pp. 90 f.)

2. Another officer of Antiochus Epiphanes who was left by him on Garizim (ἐν Γαρ. 2 Macc. v. 23), probably in occupation of the temple there. As the name was common, it seems unreasonable to identify this general with the former one, and so to introduce a contradiction into the history (Wernsdorf, *l. c.*; Ewald, *Gesch. d. Volkes Isr* iv. 335 n.; comp. Grimm, 2 Macc. iv. 38). B. F. W.

ANDRONI'CUS (Ἀνδρόνικος: *Andronicus*), a Christian at Rome, saluted by St. Paul (Rom. xvi. 7), together with Junias. The two are called by him his relations (συγγενεῖς) and fellow-captives, and of note among the apostles, using that term probably in the wider sense;[b] and he describes them as having been converted to Christ before himself. According to Hippolytus he was bishop of Pannonia; according to Dorotheus, of Spain. H. A.

* Luke, as the companion of Paul's life for so many years, could hardly fail to have met with Andronicus and Junias (rather than Junia) in his travels, and, according to his habit (Luke i. 1), could have learnt much from them as personal witnesses, concerning the earlier events of Christianity, before Paul himself had been brought into the ranks of Christ's followers. As regards the means

a * It is evident from Mark i. 29 that Andrew as well as Peter lived at Capernaum at the time of Christ's healing the mother-in-law of the latter. At that time (according to the best scheme of harmony) a year or more had elapsed since Jesus had called the brothers to be his disciples at Bethany beyond the Jordan (John i. 28, 41 ff.). It is to be inferred that, during this interval, they had removed to the neighboring Capernaum from Bethsaida, their original home (John i. 44). H.

b * The sense may be (as Meyer, Philippi, De Wette Stuart, prefer) that the two were so famous (ἐπίσημοι) as to have become well known among the apostles. It is uncertain when or where they shared Paul's captivity. H

(thus illustrated) of the early Christians for obtaining and diffusing such knowledge among themselves see Tholuck's striking remarks in his *Glaubwürdigkeit des evang. Gesch.*, p. 149 ff. H.

ANEM (עָנֵם [*two fountains*]: τὴν Αἰνάι, Alex. Ανεμ: [*Anem*]), a city of Issachar, with "suburbs," belonging to the Gershonites, 1 Chr. vi. 73 (Heb. 58). It is omitted in the lists in Josh. xix. and xxi., and instead of it we find En-gannim. Possibly the one is a contraction of the other, as Kartan of Kirjathaim. G.

ANER (עָנֵר [perh. = נער, *boy*, Ges.]: ἡ Ἀνάρ; [Vat. Αμαρ; Ald. Alex. Ἐνήρ; Comp. Ἀνήρ:] *Aner*), a city of Manasseh west of Jordan, with "suburbs" given to the Kohathites (1 Chr. vi. 70 (55)). By comparison with the parallel list in Josh. xxi. 25, it would appear to be a corruption of Taanach (תענך for ענר).

* Raumer distinguishes Aner from Taanach, regarding the former merely as omitted in Josh. xxi. 25 (*Palästina*, p. 120, 4te Aufl.). H.

ANER (עָנֵר [perh. *boy*]: Ἀνάν; [Comp. in Gen. xiv. 24, Ἀνέρ:] *Aner*), one of the three Hebronite chiefs who aided Abraham in the pursuit after the four invading kings (Gen. xiv. 13, 24). R. W. B.

ANETHOTHITE, THE (הָעַנְּתֹתִי: ὁ Ἀνωθίτης [Vat. -θει-]; Alex. ο Αναθωθειτης: *de Anathoth.*) An inhabitant of Anathoth of the tribe of Benjamin (2 Sam. xxiii. 27). Called also ANETOTHITE and ANTOTHITE. W. A. W.

ANETOTHITE, THE (הָעַנְּתֹתִי: [Vat. om.] ὁ ἐξ Ἀναθώθ: *Anathothites*). An inhabitant of Anathoth (1 Chr. xxvii. 12). Called also ANETHOTHITE and ANTOTHITE. W. A. W.

ANGAREU'O (Ἀγγαρεύω: *Angario*, Vulg., Matt. v. 41, Mark xv. 21), simply translated "compel" in the A. V., is a word of Persian, or rather of Tatar, origin, signifying to compel to serve as an ἄγγαρος or mounted courier. The words *ankarié* or *angharié*, in Tatar, mean compulsory work without pay. Herodotus (viii. 98) describes the system of the ἀγγαρεία. He says that the Persians, in order to make all haste in carrying messages, have relays of men and horses stationed at intervals, who hand the despatch from one to another without interruption either from weather or darkness, in the same way as the Greeks in their λαμπαδηφορία. This horse-post the Persians called ἀγγαρήϊον. In order to effect the object, license was given to the couriers by the government to press into the service men, horses, and even vessels. Hence the word came to signify "press," and ἀγγαρεία is explained by Suidas δημοσία καὶ ἀναγκαία δουλεία, and ἀγγαρεύεσθαι, εἰς φορτηγίαν ἄγεσθαι. Persian supremacy introduced the practice and the name into Palestine; and Lightfoot says the Talmudists used to call any oppressive service אַנְגַרְיָא. Among the proposals made by Demetrius Soter to Jonathan the high-priest, one was μὴ ἀγγαρεύεσθαι τὰ τῶν Ἰουδαίων ὑποζύγια. The system was also adopted by the Romans, and thus the word "angario" came into use in later Latin. Pliny alludes to the practice, "festinationem tabellarii diplomate adjuvi." Sir J. Chardin and other travellers make mention of it. The ἄγγαροι were also called ἀστάνδαι. (Liddell and Scott, and Stephens; and Scheller, *Lex.* s. vv.; Xen. *Cyrop.* viii. 6, §§ 17, 18; Athen. iii. 94, 122; Æsch. *Ag.* 282, *Pers.* 217 (Dind.); Esth. viii. 14; Joseph. *A. J.* xiii. 2, § 3; Pliny, *Ep.* x. 14, 121, 122; Lightfoot, *On Matt.* v. 41; Chardin, *Travels*, p. 257; Plut. *De Alex. Mag.* p. 326.) H. W. P.

ANGELS (מַלְאָכִים: οἱ ἄγγελοι; often with the addition of יְהוָה, or אֱלֹהִים. In later books the word קְדֹשִׁים, οἱ ἅγιοι, is used as an equivalent term). By the word "angels" (*i. e.* "messengers" of God) we ordinarily understand a race of spiritual beings, of a nature exalted far above that of man, although infinitely removed from that of God, whose office is "to do Him service in heaven, and by His appointment to succor and defend men on earth." The object of the present article is threefold: 1st, to refer to any other Scriptural uses of this and similar words; 2dly, to notice the revelations of the *nature* of these spiritual beings given in Scripture; and 3rdly, to derive from the same source a brief description of their *office* towards man. It is to be noticed that its scope is purely Biblical, and that, in consequence, it does not enter into any extra-Scriptural speculations on this mysterious subject.

I. In the first place, there are many passages in which the expression the "angel of God," "the angel of Jehovah," is certainly used for a manifestation of God himself. This is especially the case in the earlier books of the Old Testament, and may be seen at once, by a comparison of Gen. xxii. 11 with 12, and of Ex. iii. 2 with 6, and 14; where He, who is called the "angel of God" in one verse, is called "God," and even "Jehovah" in those which follow, and accepts the worship due to God alone. (Contrast Rev. xix. 10, xxi. 9.) See also Gen. xvi. 7, 13, xxxi. 11, 13, xlviii. 15, 16; Num. xxii. 22, 32, 35, and comp. Is. lxiii. 9 with Ex. xxiii. 14, &c., &c. The same expression (it seems) is used by St. Paul, in speaking to heathens. See Acts xxvii. 23 comp. with xxiii. 11.

It is to be observed also, that, side by side with these expressions, we read of God's being manifested in the form of *man;* as to Abraham at Mamre (Gen. xviii. 2, 22 comp. xix. 1), to Jacob at Penuel (Gen. xxxii. 24, 30), to Joshua at Gilgal (Josh. v 13, 15), &c. It is hardly to be doubted, that both sets of passages refer to the same kind of manifestation of the Divine Presence.

This being the case, since we know that "no man hath seen God" (the Father) "at any time," and that "the only-begotten Son, which is in the bosom of the Father, He hath revealed Him" (John i. 18), the inevitable inference is that by the "Angel of the Lord" in such passages is meant He, who is from the beginning the "Word," *i. e.* the Manifester or Revealer of God. These appearances are evidently "foreshadowings of the Incarnation." By these (that is) God the Son manifested Himself from time to time in that human nature, which He united to the Godhead forever in the Virgin's womb.

This conclusion is corroborated by the fact, that the phrases used as equivalent to the word "Angels" in Scripture, viz. the "sons of God," or even in poetry, the "gods" (Elohim), the "holy ones," &c., are names, which in their full and proper sense are applicable only to the Lord Jesus Christ. As He is "*the* Son of God," so also is He *the* "Angel"

Digitized by Google

or "messenger" of the Lord. Accordingly it is to His incarnation that all angelic ministration is distinctly referred, as to a central truth, by which alone its nature and meaning can be understood. (See John i. 51, comparing it with Gen. xxviii. 11–17, and especially with v. 13.)

Besides this, which is the highest application of the word "angel," we find the phrase used of any messengers of God, such as the prophets (Is. xlii. 19; Hag. i. 13; Mal. iii. 1), the priests (Mal. ii. 7), and the rulers of the Christian churches (Rev. i. 20); much as, even more remarkably, the word "Elohim" is applied, in Ps. lxxxii. 6. to those who judge in God's name.

These usages of the word are not only interesting in themselves, but will serve to throw light on the nature and the method of the ministration of those whom we more especially term "the angels."

II. In passing on to consider what is revealed in Scripture as to the angelic *nature*, we are led at once to notice, that the Bible deals with this and with kindred subjects exclusively in their practical bearings, only so far (that is) as they conduce to our knowledge of God and of ourselves, and more particularly as they are connected with the one great subject of all Scripture, the Incarnation of the Son of God. Little therefore is said of the nature of angels as distinct from their office.

They are termed "spirits" (as *e. g.* in Heb. i. 14), although this word is applied more commonly, not so much to themselves, as to their power dwelling in man (*e. g.* 1 Sam. xviii. 10; Matt. viii. 16, &c., &c.). The word is the same as that used of the soul of man, when separate from the body (*e. g.* Matt. xiv. 26; Luke xxiv. 37, 39; 1 Pet. iii. 19); but, since it properly expresses only that supersensuous and rational element of man's nature, which is in him the image of God (see John iv. 24), and by which he has communion with God (Rom. viii. 16); and since also we are told that there is a "spiritual body," as well as a "natural (ψυχικόν) body" (1 Cor. xv. 44), it does not assert that the angelic nature is incorporeal. The contrary seems expressly implied by the words in which our Lord declares that, *after the Resurrection*, men shall be "like the angels" (ἰσάγγελοι) (Luke xx. 36); because (as is elsewhere said, Phil. iii. 21) their bodies, as well as their spirits, shall have been made entirely like His. It may also be noticed that the glorious appearance ascribed to the angels in Scripture (as in Dan. x. 6) is the same as that which shone out in our Lord's transfiguration, and in which St. John saw Him clothed in heaven (Rev. i. 14–16); and moreover, that, whenever angels have been made manifest to man, it has always been in human form (as *e. g.* in Gen. xviii., xix.; Luke xxiv. 4; Acts i. 10, &c., &c.). The very fact that the titles "sons of God" (Job. i. 6, xxxviii. 7; Dan. iii. 25 comp. with 28[a]), and "gods" (Ps. viii. 5; xcvii. 7), applied to them, are also given to men (see Luke iii. 38; Ps. lxxxii. 6, and comp. our Lord's application of this last passage in John x. 34–37), points in the same way to a difference only of degree, and an identity of kind, between the human and the angelic nature.

The angels are therefore revealed to us as beings, such as man might be and will be when the power of sin and death is removed, partaking in their measure of the attributes of God, — Truth, Purity and Love, — because always beholding His face (Matt. xviii. 10), and therefore being "made like Him" (1 John iii. 2). This, of course, implies finiteness, and therefore (in the strict sense) "imperfection" of nature, and constant progress, both moral and intellectual, through all eternity. Such imperfection, contrasted with the infinity of God, is expressly ascribed to them in Job iv. 18; Matt xxiv. 36; 1 Pet. i. 12; and it is this which emphatically points them out to us as creatures, fellow-servants of man, and therefore incapable of usurping the place of gods.

This finiteness of nature implies capacity of temptation (see Butler's *Anal.* part i. ch. 5); and accordingly we hear of "fallen angels." Of the nature of their temptation and the circumstances of their fall, we know absolutely nothing. All that is certain is, that they "left their first estate" (τὴν ἑαυτῶν ἀρχήν); and that they are now "angels of the devil" (Matt. xxv. 41; Rev. xii. 7, 9), partaking therefore of the falsehood, uncleanness, and hatred which are his peculiar characteristics (John viii. 44). All that can be conjectured must be based on the analogy of man's own temptation and fall.

On the other hand, the title especially assigned to the angels of God, that of the "holy ones" (see *e. g.* Dan. iv. 13, 23, viii. 13; Matt. xxv. 31), is precisely the one which is given to those men who are renewed in Christ's image, but which belongs to them in actuality and in perfection only hereafter. (Comp. Heb. ii. 10, v. 9, xii. 23.) Its use evidently implies that the angelic probation is over, and their crown of glory won.

Thus much, then, is revealed of the angelic nature as may make it to us an ideal of human goodness (Matt. vi. 10), or beacon of warning as to the tendency of sin. It is obvious to remark, that in such revelation is found a partial satisfaction of that craving for the knowledge of creatures, higher than ourselves and yet fellow-servants with us of God, which in its diseased form becomes Polytheism.[b] Its full satisfaction is to be sought in the Incarnation alone, and it is to be noticed, that after the Revelation of God in the flesh, the angelic ministrations recorded are indeed fewer, but the references to the angels are far more frequent — as though the danger of polytheistic idolatry had, comparatively speaking, passed away.

III. The most important subject, and that on which we have the fullest revelation, is the office of the angels.

Of their office in heaven, we have, of course, only vague prophetic glimpses (as in 1 K. xxii. 19; Is. vi. 1–3; Dan. vii. 9, 10; Rev. v. 11, &c.), which show us nothing but a never-ceasing adoration, proceeding from the vision of God, through the "perfect love, which casteth out fear."

Their office towards man is far more fully described to us. They are represented as being, in the widest sense, agents of God's Providence, natural and supernatural, to the body and to the soul. Thus the operations of nature are spoken of as

[a] Gen. vi. 2. is omitted here and below, as being a controverted passage; although many MSS. of the LXX. have οἱ ἄγγελοι instead of οἱ υἱοί here.

[b] The inordinate subjectivity of German philosophy on this subject (see, *e. g.*, Winer's *Realw.*), of course, hastens to the conclusion that the belief in angels is a mere consequence of this craving, never (it would seem) so entering into the analogy of God's providence as to suppose it possible that this inward craving should correspond to some outward reality.

Digitized by Google

under angelic guidance fulfilling the will of God. Not only is this the case in poetical passages, such as Ps. civ. 4 (commented upon in Heb. i. 7), where the powers of air and fire are referred to them, but in the simplest prose history, as where the pestilences which slew the firstborn (Ex. xii. 23; Heb. xi. 28), the disobedient people in the wilderness (1 Cor. x. 10), the Israelites in the days of David (2 Sam. xxiv. 16; 1 Chr. xxi. 16), and the army of Sennacherib (2 K. xix. 35), as also the plague which cut off Herod (Acts xii. 23) are plainly spoken of as the work of the "Angel of the Lord." Nor can the mysterious declarations of the Apocalypse, by far the most numerous of all, be resolved by honest interpretation into mere poetical imagery. (See especially Rev. viii. and ix.) It is evident that angelic agency, like that of man, does not exclude the action of secondary, or (what are called) "natural" causes, or interfere with the directness and universality of the Providence of God. The personifications of poetry and legends of mythology are obscure witnesses of its truth, which, however, can rest only on the revelations of Scripture itself.

More particularly, however, angels are spoken of as ministers of what is commonly called the "supernatural," or perhaps more correctly, the "spiritual" Providence of God; as agents in the great scheme of the spiritual redemption and sanctification of man, of which the Bible is the record. The representations of them are different in different books of Scripture, in the Old Testament and in the New; but the reasons of the differences are to be found in the differences of scope attributable to the books themselves. As different parts of God's Providence are brought out, so also arise different views of His angelic ministers.

In the Book of Job, which deals with "Natural Religion," they are spoken of but vaguely, as surrounding God's throne above, and rejoicing in the completion of His creative work (Job i. 6, ii. 1, xxxviii. 7). No direct and visible appearance to man is even hinted at.

In the book of Genesis, there is no notice of angelic appearance till after the call of Abraham. Then, as the book is the history of the *chosen family* so the angels mingle with and watch over its family life, entertained by Abraham and by Lot (Gen. xviii., xix.), guiding Abraham's servant to Padan-Aram (xxiv. 7, 40), seen by the fugitive Jacob at Bethel (xxvii. 12), and welcoming his return at Mahanaim (xxxii. 1). Their ministry hallows domestic life, in its trials and its blessings alike, and is closer, more familiar, and less awful than in after times. (Contrast Gen. xviii. with Judg. vi. 21, 22, xiii. 16, 22.)

In the subsequent history, that of a *chosen nation*, the angels are represented more as ministers of wrath and mercy, messengers of a King, rather than common children of the One Father. It is, moreover, to be observed, that the records of their appearance belong especially to two periods, that of the Judges and that of the Captivity, which were transition periods in Israelitish history, the former one destitute of direct revelation or prophetic guidance, the latter one of special trial and unusual contact with heathenism. During the lives of Moses and Joshua there is no record of the appearance of created angels, and only obscure reference to angels at all. In the book of Judges angels appear at once to rebuke idolatry (ii. 1–4), to call Gideon (vi. 11, &c.), and consecrate Samson (xiii. 3, &c.) to the work of deliverance.

The prophetic office begins with Samuel, and immediately angelic guidance is withheld, except when needed by the prophets themselves (1 K. xix. 5; 2 K. vi. 17). During the prophetic and kingly period, angels are spoken of only (as noticed above) as ministers of God in the operations of nature. But in the captivity, when the Jews were in the presence of foreign nations, each claiming its tutelary deity, then to the prophets Daniel and Zechariah angels are revealed in a fresh light, as watching, not only over Jerusalem, but also over heathen kingdoms, under the Providence, and to work out the designs, of the Lord. (See Zech. passim, and Dan. iv. 13, 23, x. 10, 13, 20, 21, &c.) In the whole period, they, as truly as the prophets and kings themselves, are seen as God's ministers, watching over the *national life* of the subjects of the Great King.

The Incarnation marks a new epoch of angelic ministration. "*The* Angel of Jehovah," the Lord of all created angels, having now descended from heaven to earth, it was natural that His servants should continue to do Him service there. Whether to predict and glorify His birth itself (Matt. i. 20; Luke i. ii.) to minister to Him after His temptation and agony (Matt. iv. 11; Luke xxii. 43), or to declare His resurrection and triumphant ascension (Matt. xxviii. 2; John xx. 12; Acts i. 10, 11)—they seem now to be indeed "ascending and descending on the Son of Man," almost as though transferring to earth the ministrations of heaven. It is clearly seen, that whatever was done by them for men in earlier days, was but typical of and flowing from their service to Him. (See Ps. xci. 11, comp. Matt. iv. 6.)

The New Testament is the history of the *Church of Christ*, every member of which is united to Him. Accordingly, the angels are revealed now as "ministering spirits" to each *individual* member of Christ for his spiritual guidance and aid (Heb. i. 14). The records of their visible appearance are but unfrequent (Acts v. 19, viii. 26, x. 3, xii. 7, xxvii. 23); but their presence and their aid are referred to familiarly, almost as things of course, ever after the Incarnation. They are spoken of as watching over Christ's little ones (Matt. xviii. 10),[a] as rejoicing over a penitent sinner (Luke xv. 10), as present in the worship of Christians (1 Cor. xi 10),[b] and (perhaps) bringing their prayers before God (Rev. viii. 3, 4), and as bearing the souls of the redeemed into Paradise (Luke xvi. 22). In one word, they are Christ's ministers of grace now, as they shall be of judgment hereafter (Matt. xiii. 39, 41, 49, xvi. 27, xxiv. 31, &c.). By what method they act we cannot know of ourselves, nor are we told, perhaps lest we should worship them, instead of Him, whose servants they are (see Col. ii. 18; Rev. xxii. 9); but of course their agency, like that of human ministers, depends for its efficacy on the aid of the Holy Spirit.

Such is the action of God's angels on earth, as disclosed to us in the various stages of Revelation;

[a] The notion of special guardian angels, watching over individuals, is consistent with this passage, but not necessarily deduced from it. The belief of it among the early Christians is shown by Acts xii. 15.

[b] The difficulty of the passage has led to its being questioned, but the wording of the original and the usage of the N. T. seem almost decisive on the point

Digitized by Google

that of the evil angels may be better spoken of elsewhere [SATAN]: here it is enough to say that it is the direct opposite of their true original office, but permitted under God's overruling providence to go until the judgment day.

That there are degrees of the angelic nature, fallen and unfallen, and special titles and agencies belonging to each, is clearly declared by St. Paul (Eph. i. 21; Rom. viii. 38), but what their general nature is, it is needless for us to know, and therefore useless to speculate. For what little is known of this special nature see CHERUBIM, SERAPHIM, MICHAEL, GABRIEL. A. B.

A. and H.

ANGLING. [FISHING.]

ANI'AM (אֲנִיעָם [*sighing of the people*] Ἀνιάν; [Vat. Αλιαλειμ;] Alex. Ανιαμ: *Aniam*): A Manassite, son of Shemidah (1 Chr. vii. 19).

W. A. W.

ANIM (עֲנִים [*fountains*]: Αἰσάμ; [Alex. Ανειμ; Comp. Ἀνίμ:] *Anim*), a city in the mountains of Judah, named with Eshtemoh (*Es-Semueh*) and Goshen (Josh. xv. 50). Eusebius and Jerome (Onom. Ἀνσήμ, *Anim*) mention a place of this name in Daroma, 9 miles south of Hebron (comp also *Anea*, s. v. *Anab*). G.

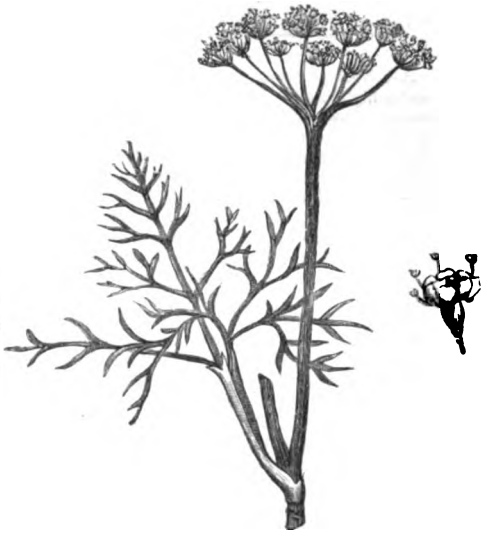
* Anim is a contraction for עֲנִיִּים, and might be the plural form of Ayin (which see); but the fact that Ayin was "toward the coast of Edom southward" (Josh. xv. 31, 32) while Anim was in the mountain district (Josh. xv. 48, 50) indicates that they were different places. Dr. Wilson insists on the difference, and would identify Anim with the present *Ghuwein* (which though singular in Arabic may by a frequent permutation stand for a Hebrew plural) near *Anab* and *Semū'a*, and therefore in the territory of Judah (Wilson's *Lands of the Bible*, i. 354). Dr. Robinson adopts this suggestion in the second edition of his *Bibl. Res.* (ii. 204), though he had previously declared himself for the other view. See also Raumer, *Palästina*, p. 171 (4th ed.). H.

ANISE (ἄνηθον: *anethum*). This word occurs only in Matt. xxiii. 23, "Woe unto you, scribes and Pharisees, hypocrites! for ye pay tithe of mint and anise and cummin." It is by no means a matter of certainty whether the anise (*Pimpinella anisum*, Lin.), or the dill (*Anethum graveolens*) is here intended, though the probability is certainly more in favor of the latter plant. Both the dill and the anise belong to the natural order *Umbelliferæ*, and are much alike in external character; the seeds of both, moreover, are and have been long employed in medicine and cookery, as condiments and carminatives. Celsius (*Hierob.* i. 494, ff.) quotes several passages from ancient writers to show that the dill was commonly so used. Pliny uses the term *anisum*, to express the *Pimpinella anisum*, and *anethum* to represent the common *dill*. He enumerates as many as sixty-one remedies [diseases? that the *anisum* is able to cure, and says that on this account it is sometimes called *anicetum*. The best anise, he adds, comes from Crete; and next to it that of Egypt is preferred (Plin. *H. N.* xx. 17). Forskål (*Descript. Plant.* p. 154) includes the anise (*Yanisún*, Arabic[b]) in the Materia Medica

[a] From ἀ, *not*, and νικάω, *to conquer*. It should be noted that Dioscorides uses ἀνίκητον for *dill*, and not anise

[b] يَانِيسُون, *anisum*, v. Gol. *Arab Lex.* s. v.

of Egypt. Dr. Royle is decidedly in favor of the *dill*[a] being the proper translation, and says that the *anethum*[b] is more especially a genus of Eastern cultivation than the other plant. The strongest argument in favor of the dill, is the fact that the Talmuds (Tract. *Maaseroth*, c. iv. § 5) use the word *shâbâth* to express the dill, "The seeds, the leaves, and the stem of dill are, according to Rabbi Eliezer, subject to tithe;" and in connection with this it should be stated, that Forskâl several times alludes to the *Anethum graveolens* as growing both in a cultivated and a wild state in Egypt, and he uses the Arabic name for this plant, which is identical with the Hebrew word, namely, *Sjoebet*, or *Schibt* (*Descr. Plant.* 65, 109).



Celsius remarks upon the difference of opinion amongst the old authors who have noticed this plant, some maintaining that it has an agreeable taste and odor, others quite the opposite; the solution of the difficulty is clearly that the matter is simply one of opinion.

There is another plant very dissimilar in external character to the two named above, the leaves and capsules of which are powerfully carminative. This is the *aniseed-tree* (*Illicium anisatum*), which belongs to the natural order *Magnoliaceæ*. In China this is frequently used for seasoning dishes, &c.; but the species of this genus are not natives of the Bible lands, and must not be confused with the *umbelliferous* plants noticed in this article.

W. H.

Pimpinella Anisum.

Common Dill. (*Anethum graveolens.*)

ANKLET (περισκελίδες, πέδαι περισφύριοι, Clem. Alex.). This word only occurs in Is. iii. 18, עֲכָסִים (and as a proper name, Josh. xiii. 16); unless such ornaments are included in אֲצַעָדָה, Num. xxxi. 50, which word etymologically would mean rather an anklet than a bracelet. Indeed, the same word is used in Is. iii. 20 (without the Aleph prosthetic) for the "stepping-chains worn by Oriental women, fastened to the ankle-band of each leg, so that they were forced to walk elegantly with short steps" (Gesen. *s. v.*). They were as common as bracelets and armlets, and made of much the same materials; the pleasant jingling and tinkling which they made as they knocked against each other, was no doubt one of the reasons why they were admired (Is. iii. 16, 18, "the bravery of their tinkling ornaments"). To increase this pleasant sound pebbles were sometimes enclosed in them (Calmet, s. v. *Periscelis* and *Bells*). The Arabic name "khulkhâl" seems to be onomatopœan, and Lane (*Mod. Egypt.* App. A.) quotes from a song, in allusion to the pleasure caused by their sound, "the ringing of thine anklets has deprived me of reason." Hence Mohammed forbade them in public "let them not make a noise with their feet, that their ornaments which they hide may [thereby] be discovered" (*Koran*, xxiv. 31, quoted by Lane). No doubt Tertullian discountenances them for similar reasons: "Nescio an crus de periscelio in nervum se patiatur arctari. . . . Pedes domi figito et plus quam in auro placebunt" (*De cult. femin.* ii 13).

They were sometimes of great value. Lane speaks of them (although they are getting uncommon) as "made of solid gold or silver" (*Mod.*

[a] *Dill*, so called from the old Norse word, the nurse's lullaby, *to dill = to soothe*. Hence the name of the carminative plant, the *dilling* or *soothing herb* (see Wedgw. *Dict. Engl. Etymol.*).

[b] ἄνηθον: παρὰ τὸ ἄνω θεῖν, διὰ τὴν ἐν τάχει αὔξησιν (*Etym. Mag.* ed Gaisford).

Egypt. l. c.); but he says that the poorer village children wear them of iron. For their use among the ancient Egyptians see Wilkinson, iii. 374, and among the ancient Greeks and Romans, *Dict. of Ant.* art. "Periscelis." They do not, we believe, occur in the Nineveh sculptures.

Livingstone writes of the favorite wife of an African chief, "she wore a profusion of iron rings on her ankles, to which were attached little pieces of sheet iron to enable her to make a tinkling as she walked in her mincing African style" (p. 273). On the weight and inconvenience of the copper rings worn by the chiefs themselves, and the odd walk it causes them to adopt, see *id.* p. 276. F. W. F.

ANNA (חַנָּה [*grace* or *prayer*]: Ἄννα: *Anna*). The name occurs in Punic as the sister of Dido. 1. The mother of Samuel (1 Sam. i. 2 ff.). [HANNAH.]

2. The wife of Tobit (Tob. i. 9 ff.).

3. The wife of Raguel (Tob. vii. 2 ff.).[a]

4. A "prophetess" in Jerusalem at the time of our Lord's birth (Luke ii. 36). B. F. W.

ANNAAS (Ἀανδας; [Vat. Ἀαμα; Ald. Ἀνάδ:] *Anaas*), 1 Esdr. v. 23. [SENAAH.]

ANNAS (Ἄννας, in Josephus Ἄνανος), a Jewish high-priest. He was son of one Seth, and was appointed high-priest in his 37th year (A. D. 7), after the battle of Actium, by Quirinius, the imperial governor of Syria (Joseph. *Ant.* xviii. 2, § 1); but was obliged to give way to Ismael, son of Phabi, by Valerius Gratus, procurator of Judæa, at the beginning of the reign of Tiberius, A. D. 14 (*ib.* xviii. 2, § 2). But soon Ismael was succeeded by Eleazar, son of Annas; then followed, after one year, Simon, son of Camithus, and then, after another year (about A. D. 25), Joseph Caiaphas, son-in-law of Annas (John xviii. 13; Joseph. l. c.). He remained till the passover, A. D. 37, and is mentioned in Luke iii. 2, as officiating high-priest, but after Annas, who seems to have retained the title, and somewhat also of the power of that office. Our Lord's first hearing (John xviii. 13) was before Annas, who then sent him bound to Caiaphas. In Acts iv. 6, he is plainly called the high-priest, and Caiaphas merely named with others of his family. It is no easy matter to give an account of the seemingly capricious applications of this title. Winer supposes that Annas retained it from his former enjoyment of the office; but to this idea St. Luke's expressions seem opposed, in which he clearly appears as bearing the high-priest's dignity at the time then present in each case. Wieseler, in his *Chronology*, and more recently in an article in Herzog's *Real-Encyklopädie*, maintains that the two, Annas and Caiaphas, were together at the head of the Jewish people, the latter as actual high-priest, the former as president of the Sanhedrim (נָשִׂיא); and so also Selden, *De Synedriis et præfecturis juridicis veterum Ebræorum*, ii. 655: except that this latter supposes Caiaphas to have been the second prefect of the Sanhedrim. Some again suppose that Annas held the office of סָגָן, or substitute of the high-priest, mentioned by the later Talmudists. He lived to old age, having had five sons high-priests (Joseph. *Ant.* xx. 9, § 1).

H. A.

ANNAS (Ἀνάν; [Ald.] Alex. Ἄννας: *Nuas*). A corruption of HARIM (1 Esdr. ix. 32; comp. Ezr x. 31). W. A. W.

ANNUS (Ἄννους; Alex. Ἀννους *Amin*), 1 Esdr. viii. 48. Probably a corruption of the Hebrew אִתּוֹ (A. V. "with him") of Ezr viii. 19. The translator may have read אָנוֹ. W. A. W.

ANOINT (מָשַׁח: χρίω: *ungo*). Anointing in Holy Scripture is either (I.) Material, with oil [OIL], or (II.) Spiritual, with the Holy Ghost.

I. MATERIAL. — 1. *Ordinary.* Anointing the body or head with oil was a common practice with the Jews, as with other Oriental nations (Deut. xxviii. 40; Ruth iii. 3; Mic. vi. 15). Abstinence from it was a sign of mourning (2 Sam. xiv. 2; Dan. x. 3; Matt. vi. 17). Anointing the head with oil or ointment seems also to have been a mark of respect sometimes paid by a host to his guests (Luke vii. 46 and Ps. xxiii. 5), and was the ancient Egyptian custom at feasts. Observe, however, that in Ps. xxiii. the Hebrew is דִּשַּׁנְתָּ, "thou hast made fat;" LXX., ἐλίπανας; Vulg., *impinguasti;* and in Luke vii. ἀλείφω is used as it is in the similar passages (John xi. 2, xii. 3). The word "anoint" (ἀλείφω) also occurs in the sense of preparing a body with spices and unguents for burial (Mark xvi. 1. Also xiv. 8, μυρίζω). From the custom of discontinuing the use of oil in times of sorrow or disaster, to be anointed with oil comes to signify metaphorically, to be in the enjoyment of success or prosperity (Ps. xcii. 10; comp. Eccl. ix. 8).

2. *Official.* Anointing with oil was a rite of inauguration into each of the three typical offices of the Jewish commonwealth, whose tenants, as anointed, were types of the Anointed One (מָשִׁיחַ, χριστός). (*a.*) *Prophets* were occasionally anointed to their office (1 K. xix. 16), and are called messiahs, or anointed (1 Chr. xvi. 22; Ps. cv. 15). (*b.*) *Priests*, at the first institution of the Levitical priesthood, were all anointed to their offices, the sons of Aaron as well as Aaron himself (Ex. xl. 15; Num. iii. 3); but afterwards anointing seems not to have been repeated at the consecration of ordinary priests, but to have been especially reserved for the high-priest (Ex. xxix. 29; Lev. xvi. 32); so that "the priest that is anointed" (Lev. iv. 3) is generally thought to mean the high-priest, and is rendered by the LXX. ὁ ἀρχιερεὺς ὁ κεχρισμένος (הַכֹּהֵן הַמָּשִׁיחַ). See also vv. 5, 16, and c. vi. 22 (vi. 15, Heb.). (*c.*) *Kings.* The Jews were familiar with the idea of making a king by anointing, before the establishment of their own monarchy (Judg. ix. 8, 15). Anointing was the principal and divinely-appointed ceremony in the inauguration of their own kings (1 Sam. ix. 16, x. 1; 1 K. i. 34, 39); indeed, so preëminently did it belong to the kingly office, that "the Lord's anointed" was a common designation of the theocratic king (1 Sam. xii. 3, 5; 2 Sam. i. 14, 16) The rite was sometimes performed more than once David was thrice anointed to be king: first, privately by Samuel, before the death of Saul, by way of conferring on him a right to the throne (1 Sam. xvi. 1, 13); again over Judah at Hebron (2 Sam. ii. 4), and finally over the whole nation (2 Sam v. 3). After the separation into two kingdoms the kings both of Judah and of Israel seem still

[a] Here the LXX. has Ἔδνα, and the A. V. EDNA. A.

ρ have been anointed (2 K. ix. 3, xi. 12). So late as the time of the Captivity the king is called "the anointed of the Lord" (Ps. lxxxix. 38, 51; Lam. iv. 20). Some persons, however, think that, after David, subsequent kings were not anointed except when, as in the cases of Solomon, Joash, and Jehu, the right of succession was disputed or transferred (Jahn, *Archæol. Bibl.* § 223). Beside Jewish kings, we read that Hazael was to be anointed king over Syria (1 K. xix. 15). Cyrus also is called the Lord's anointed, as having been raised by God to the throne for the special purpose of delivering the Jews out of captivity (Is. xlv. 1). (*d*) Inanimate objects also were anointed with oil in token of their being set apart for religious service. Thus Jacob anointed a pillar at Bethel (Gen. xxxi. 13); and at the introduction of the Mosaic economy, the tabernacle and all its furniture were consecrated by anointing (Ex. xxx. 26–28). The expression "anoint the shield" (Is. xxi. 5) (ἀτσμίσατε θυρεούς, LXX.; *arripite clypeum*, Vulg.) refers to the custom of rubbing oil into the hide, which, stretched upon a frame, formed the shield, in order to make it supple and fit for use.

3. *Ecclesiastical.* Anointing with oil in the name of the Lord is prescribed by St. James to be used together with prayer, by the elders of the church, for the recovery of the sick ἀλείψαντες (James v. 14). Analogous to this is the anointing with oil practiced by the twelve (Mark vi. 13), and our Lord's anointing the eyes of a blind man with clay made from saliva, in restoring him miraculously to sight (ἐπέχρισε, John ix. 6, 11).

II. SPIRITUAL. — 1. In the O. T. a Deliverer is promised under the title of Messiah, or Anointed (Ps. ii. 2; Dan. ix. 25, 26); and the nature of his anointing is described to be spiritual, with the Holy Ghost (Is. lxi. 1; see Luke iv. 18). As anointing with oil betokened prosperity, and produced a cheerful aspect (Ps. civ. 15), so this spiritual unction is figuratively described as anointing "with the oil of gladness" (Ps. xlv. 7; Heb. i. 9). In the N. T. Jesus of Nazareth is shown to be the Messiah, or Christ, or Anointed of the Old Testament (John i. 41; Acts ix. 22, xvii. 2, 3, xviii. 5, 28); and the historical fact of his being anointed with the Holy Ghost is recorded and asserted (John i. 32, 33; Acts iv. 27, x. 38). 2. Spiritual anointing with the Holy Ghost is conferred also upon Christians by God (2 Cor. i. 21), and they are described as having an unction (χρίσμα) from the Holy One, by which they know all things (1 John ii. 20, 27). To anoint the eyes with eye-salve is used figuratively to denote the process of obtaining spiritual perception (Rev. iii. 18). T. T. P.

A'NOS ('Ανώς: *Jonas*), 1 Esdr. ix. 34. VANIAH.]

ANT (נְמָלָה, *nemâlâh*: μύρμηξ *formica*). This insect is mentioned twice in the O. T.; in Prov. vi. 6, "Go to the ant, thou sluggard consider her ways and be wise;" in Prov. xxx. 25. "The ants are a people not strong, yet they prepare their meat in the summer." In the former of these passages the *diligence* of this insect is instanced by the wise man as an example worthy of imitation; in the second passage the ant's *wisdom* is especially alluded to, for these insects, "though they be little on the earth, are exceeding wise." It is well known that the ancient Greeks and Romans believed that the ant stored up food, which it collected in the summer, ready for the winter's consumption. Bochart (*Hieroz.* iii. 478) has cited numerous passages from Greek and Latin writers, as well as from Arabian naturalists and Jewish rabbis, in support of this opinion. Such wisdom was this little insect believed to possess, that, in order to prevent the corn which it had stored from germinating, it took care to bite off the head of each grain; accordingly some have sought for the derivation of the Hebrew word for ant, *nemâlâh*,[a] in this supposed fact. Nor is the belief in the ant's biting off the head of the grains unsupported by some modern writers Addison, in the *Guardian* (No. 156, 157), inserts the following letter "of undoubted credit and authority," which was first published by the French Academy: "The corn which is laid up by ants would shoot under ground if these insects did not take care to prevent it. They therefore bite off all the germs before they lay it up, and therefore the corn that has lain in their cells will produce nothing. Any one may make the experiment, and even see that there is no germ in their corn." N. Pluche, too (*Nature Displ.* i. 128), says of these insects, "Their next passion is to amass a store of corn or other grain that will keep, and lest the humidity of the cells should make the corn shoot up, we are told for a certainty that they gnaw off the buds which grow at the point of the grain."

It is difficult to see how this opinion originated, for it is entirely without foundation. Equally erroneous appears to be the notion that ascribes to the ant provident foresight in laying up a store of corn for the winter's use;[b] though it is an easy matter to trace it to its source. No recorded species of ant is known to store up food of any kind for provision in the cold seasons, and certainly not grains of corn, which ants do not use for food. The European species of ants are all dormant in the winter, and consequently require no food; and although it is well still to bear in mind the careful language of the authors of *Introduction to Entomology* (ii. 46), who say, "till the manners of exotic

[a] From נָמַל, *abscissus* (Simon. *Lex. Heb.* ed. Winer). The derivation of the word is uncertain. Gesenius is inclined to derive it from the Arabic نمل, "conscendit, *pec.* proreptando, arborem." Vid. Gol. *Arab. Lex.* s. v. V. conj. "moti inter sese permistique sunt *formicarum reptantium* more." First says, "Forsitan potius diminutivum est n. נֵם, unde נֵמִל, f. נְמָלָה, sicut נְמִידָה, ad bestiolam pusillam significandam factum esse potest." Cf. Michaelis, *Sup. Lex. Heb.* ii. 1644, and Rosenmüll. not. ad Bochart, iii. 480. It is not probable that the name *nemâlâh* (from נָמַל, "to cut") was given to the ant from its extreme tenuity at the junction of the thorax and abdomen? If the term *insect* is applicable to any one living creature more than to another, it certainly is to the *ant*. *Nemâlâh* is the exact equivalent to *insect*. [Since the above was written it has been found that Parkhurst — *s. v.* מר (iv.) — gives a similar derivation.]

[b] "Parvula (nam exemplo est) magni formica laboris
Ore trahit quodcunque potest, atque addit acervo
Quem struit, haud ignara ac non incauta futuri." Hor. *Sat.* i. 1, 33.

ants are more accurately explored, it would be rash to affirm that no ants have magazines of provisions; for although during the cold of our winters in this country they remain in a state of torpidity, and have no need of food, yet in warmer regions during the rainy seasons, when they are probably confined to their nests, a store of provisions may be necessary for them," — yet the observations of modern naturalists who have paid considerable attention to this disputed point, seem almost conclusive that ants do not lay up food for future consumption. It is true that Col. Sykes has a paper, vol. ii. of *Transactions of Entomol. Soc.* p. 103, on a species of Indian ant which he calls *Atta providens*, so called from the fact of his having found a large store of grass-seeds in its nest; but the amount of that gentleman's observations merely goes to show that this ant carries seeds underground, and brings them again to the surface after they have got wet during the monsoons, apparently to dry.[a] "There is not," writes Mr. F. Smith, the author of the Catalogue of the *Formicidæ* in the British Museum, in a letter to the author of this article, "any evidence of the seeds having been stored for food;" he observes, *Catalogue of Formicidæ* (1858), p. 180, that the processionary ant of Brazil (*Œcodoma cephalotes*) carries immense quantities of portions of leaves into its underground nests, and that it was supposed that these leaves were for food; but that Mr. Bates quite satisfied himself that the leaves were for the purpose of lining the channels of the nest, and not for food. Ants are carnivorous in their habits of living, and although they are fond of saccharine matter, there is no evidence at all to prove that any portion of plants ever forms an article of their diet. The fact is, that ants seem to delight in running away with almost any thing they find, — small portions of sticks, leaves, little stones, — as any one can testify who has cared to watch the habits of this insect. This will explain the erroneous opinion which the ancients held with respect to that part of the economy of the ant now under consideration; nor is it, we think, necessary to conclude that the error originated in observers mistaking the cocoons for grains of corn, to which they bear much resemblance. It is scarcely credible that Aristotle, Virgil, Horace, &c., who all speak of this insect storing up *grains of corn*, should have been so far misled, or have been such bad observers, as to have taken the cocoons for grains. Ants do carry off grains of corn, just as they carry off other things — not, however, as was stated, for food, but for their nests. "They are great robbers," says Dr. Thomson (*Land and Book*, p. 337), "and plunder by night as well as by day, and the farmer must keep a sharp eye to his floor, or they will abstract a large *quantity of grain* in a single night."

It is right to state that a well-known entomologist, the Rev. F. W. Hope, in a paper "On some doubts respecting the economy of Ants" (*Trans. Entom. Soc.* ii. 211), is of opinion that Col. Sykes's observations do tend to show that there are species of exotic ants which store up food for winter consumption; but it must be remembered that Mr. Bates's investigations are subsequent to the publication of that paper.

A further point in the examination of this subject remains to be considered, which is this: Does Scripture assert that any species of ant stores up food for future use? It cannot, we think, be maintained that the words of Solomon, in the only two passages where mention of this insect is made, *necessarily* teach this doctrine; but at the same time it must be allowed, that the language used, and more especially the context of the passage in Prov. xxx. 25, do seem to *imply* that such an opinion was held with respect to the economy of this insect. "There are four things which are little upon the earth, but they are exceeding wise; the ants are a people not strong, yet they prepare their meat in the summer." In what particular, it may be asked, are these insects so especially noted for their wisdom, unless some allusion is made to their supposed provident foresight in "preparing their meat in the summer." If the expression here used merely has reference to the fact that ants are able to provide themselves with food, how is their wisdom herein more excellent than the countless host of other minute insects whose natural instinct prompts them to do the same? If this question is fairly weighed in connection with the acknowledged fact, that from very early times the ancients attributed storing habits to the ant, it will appear at least probable that the language of Solomon implies a similar belief; and if such was the general opinion, is it a matter of surprise that the wise man should select the ant as an instance whereon he might ground a lesson of prudence and forethought?

The teaching of the Bible is accommodated to the knowledge and opinions of those to whom its language is addressed, and the observations of naturalists, which, as far as they go, do certainly tend to disprove the assertion that ants store up food for future use, are no more an argument against the truth of the Word of God than are the ascertained laws of astronomical science, or the facts in the mysteries of life which the anatomist or physiologist has revealed.

The Arabians held the wisdom of the ant in such estimation, that they used to place one of these insects in the hands of a newly-born infant, repeating these words, "May the boy turn out clever and skillful." Hence in Arabic, with the noun *nemleh*, "an ant," is connected the adjective *nemil*, "quick," "clever" (Bochart, *Hieroz.* lii. 494). The Talmudists, too, attributed great wisdom to this insect. It was, say they, from beholding the wonderful ways of the ant that the following expression originated: "Thy justice, O God, reaches to the heavens" (*Chulin*, 63).[b] Ants live together in societies, having "no guide, overseer, or ruler." See Latreille's *Histoire Naturelle des Fourmis* Paris, 1802; Huber's *Traité des Mœurs des F Indig.*; *Encycl. Brit.* 8th ed. art. "Ant;" Kirby and Spence, *Introd. to Entom.* Ants belong to the family *Formicidæ*, and order *Hymenoptera*. There is not in the British Museum a single specimen of an ant from Palestine. W. H.

ANTICHRIST (ὁ ἀντίχριστος). The word Antichrist is used by St. John in his first and second Epistles, and by him alone. Elsewhere it does not occur in Scripture. Nevertheless, by an

[a] This fact corroborates what the ancients have written on this particular point, who have recorded that the ant brings up to dry in the sun the corn, &c., which had become wet. See instances in Bochart, iii. 490.

[b] Our English word *ant* appears to be an abbreviation of the form *emmet* (Sax. *æmmet*).

almost universal consent, the term has been applied to the Man of Sin of whom St. Paul speaks in the Second Epistle to the Thessalonians, to the Little Horn and to the fierce-countenanced King of whom Daniel prophesies, and to the two Beasts of the Apocalypse, as well as to the false Christs whose appearance our Lord predicts in his prophetic discourse on the Mount of Olives. Before we can arrive at any clear and intelligent view of what Scripture teaches us on the subject of Antichrist, we must decide whether this extension of the term is properly made; whether the characteristics of the Antichrist are those alone with which St. John makes us acquainted in his Epistles, or whether it is his portrait which is drawn, darker, fuller, and larger, in some or all of the other passages to which we have referred.

(A.) The following are the passages in Scripture which ought to be carefully compared for the elucidation of our subject: — I. Matt. xxiv. 3–31. II. 1 John ii. 18–23; iv. 1–3; 2 John 5, 7. III. 2 Thess. ii. 1–12; 1 Tim. iv. 1–3; 2 Tim. iii. 1–5. IV. Dan. viii. 8–25; xi. 36–39. V. Dan. vii. 7–27. VI. Rev. xiii. 1–8; xvii. 1–18. VII. Rev. xiii. 11–18; xix. 11–21. The first contains the account of the false Christs and false prophets predicted by our Lord; the second, of the Antichrist as depicted by St. John; the third, of the Adversary of God as portrayed by St. Paul; the fourth and fifth, of the fierce-countenanced King and of the Little Horn foretold by Daniel; the sixth and the seventh, of the Beast and the False Prophet of the Revelation.

I. *The False Christs and False Prophets of Matt.* xxiv. — The purpose of our Lord in his prophetic discourse on the Mount of Olives was at once to predict to his disciples the events which would take place before the capture of Jerusalem, and those which would precede the final destruction of the world, of which the fall of Jerusalem was the type and symbol. Accordingly, his teaching on the point before us amounts to this, that (1) in the latter days of Jerusalem there should be sore distress, and that in the midst of it there should arise impostors who would claim to be the promised Messiah, and would lead away many of their countrymen after them; and that (2) in the last days of the world there should be a great tribulation and persecution of the saints, and that there should arise at the same time false Christs and false prophets, with an unparalleled power of leading astray. In type, therefore, our Lord predicted the rise of the several impostors who excited the fanaticism of the Jews before their fall. In antitype He predicted the future rise of impostors in the last days, who should beguile all but the elect into the belief of their being God's prophets or even his Christs. We find no direct reference here to the Antichrist. Our Lord is not speaking of any one individual (or polity), but rather of those forerunners of the Antichrist who are his servants and actuated by his spirit. They are ψευδόχριστοι, and can deceive almost the elect, but they are not ὁ ἀντίχριστος; they are ψευδοπροφῆται, and can show great signs and wonders, but they are not ὁ ψευδοπροφήτης. Rev. xvi. 13). However valuable, therefore, the prophecy on Mount Olivet is, as helping us to picture to ourselves the events of the last days, it does not elucidate for us the characteristics of the Antichrist, and must not be allowed to mislead us as though it gave information which it does not profess to give.

II. *The Antichrist of St. John's Epistles.* — The first teaching with regard to the Antichrist and to the antagonist of God (whether these are the same or different we leave as yet uncertain) was oral. "*Ye have heard* that the Antichrist cometh," says St. John (1 Ep. ii. 18); and again, "This is that spirit of Antichrist *whereof ye have heard* that it should come" (1 Ep. iv. 3). Similarly St. Paul, "Remember ye not, that when I was yet with you *I told you these things*" (2 Thess. ii. 5)? We must not therefore look for a full statement of the "doctrine of the Antichrist" in the Apostolic Epistles, but rather for allusions to something already known. The whole of the teaching of St. John's Epistle with regard to the Antichrist himself seems to be confined to the words twice repeated, "Ye have heard that the Antichrist shall come." The verb ἔρχεται here employed has a special reference, as used in Scripture, to the first and second advents of our Lord. Those whom St. John was addressing had been taught that, as Christ was to come (ἔρχεται), so the Antichrist was to come likewise. The rest of the passage in St. John appears to be rather a practical application of the doctrine of the Antichrist than a formal statement of it. He warns his readers that the spirit of the Antichrist could exist even then, though the coming of the Antichrist himself was future, and that all who denied the Messiahship and Sonship of Jesus were Antichrists, as being types of the final Antichrist who was to come. The teaching of St. John's Epistles therefore amounts to this, that *in type*, Cerinthus, Basilides, Simon Magus, and those Gnostics who denied Christ's Sonship, and all subsequent heretics who should deny it, were Antichrists, as being wanting in that divine principle of love which with him is the essence of Christianity; and he points on to the final appearance of the Antichrist that was "to come" in the last times, according as they had been orally taught, who would be the *antitype* of these his forerunners and servants.

III. *The Adversary of God of St. Paul's Epistles.* — St. Paul does not employ the term Antichrist, but there can be no hesitation in identifying his Adversary (ὁ ἀντικείμενος) of God with the Antichrist who was "to come." Like St. John, he refers to his oral teaching on the subject, but as the Thessalonians appeared to have forgotten it, and to have been misled by some passages in his previous Epistle to them, he recapitulates what he had taught them. Like St. John, he tells them that the spirit of Antichrist or Antichristianism, called by him "the mystery of iniquity," was already working; but Antichrist himself he characterizes as "the Man of Sin," "the Son of Perdition," "the Adversary to all that is called God," "the one who lifts himself above all objects of worship;" and assures them that he should not be revealed in person until some present obstacle to his appearance should have been taken away, and until the predicted ἀποστασία should have occurred.

From St. John and St. Paul together we learn (1) that the Antichrist should come; (2) that he should not come until a certain obstacle to his coming was removed; (3) nor till the time of, or rather till after the time of the ἀποστασία; (4) that his characteristics would be (α) open opposition to God and religion, (β) a claim to the incommunicable attributes of God, (γ) iniquity, sin, and lawlessness, (δ) a power of working lying mir

seles, (*a*) marvellous capacity of beguiling souls; (5) that he would be actuated by Satan; (6) that his spirit was already at work manifesting itself partially, incompletely, and typically, in the teachers of infidelity and immorality already abounding in the Church.

IV. *The fierce-countenanced King of Daniel.* — This passage is universally acknowledged to be primarily applicable to Antiochus Epiphanes. Antiochus Epiphanes is recognized as the chief prototype of the Antichrist. The prophecy may therefore be regarded as descriptive of the Antichrist. The point is fairly argued by St. Jerome: — "Down to this point (Dan. xi. 21) the historical order is preserved, and there is no difference between Porphyry and our own interpreters. But all that follows down to the end of the book he applies personally to Antiochus Epiphanes, brother of Seleucus, and son of Antiochus the Great; for, after Seleucus, he reigned eleven years in Syria, and possessed Judæa; and in his reign there occurred the persecution about the Law of God, and the wars of the Maccabees. But our people consider all these things to be spoken of Antichrist, who is to come in the last time. It is the custom of Holy Scripture to anticipate in types the reality of things to come. For in the same way our Lord and Saviour is spoken of in the 72d Psalm, which is entitled a Psalm of Solomon, and yet all that is there said cannot be applied to Solomon. But in part, and as in a shadow and image of the truth, these things are foretold of Solomon, to be more perfectly fulfilled in our Lord and Saviour. As, then, in Solomon and other saints the Saviour has types of His coming, so Antichrist is rightly believed to have for his type that wicked king Antiochus, who persecuted the saints and defiled the Temple." (S. Hieron. *Op.* tom. i. p. 523, Col. Agr. 1616; tom. iii. p. 1127, Paris, 1704).

V. *The Little Horn of Daniel.* — Hitherto we have been dealing with a person, not a kingdom or a polity. This is evident from St. John's words, and still more evident from the Epistle to the Thessalonians. The words used by St. Paul could not well have been more emphatic, had he studiously made use of them in order to exclude the idea of a polity. "The Man of Sin," "the Son of Perdition," "the one who opposeth himself to God," "the one who exalteth himself above God," "the one who represents himself as God," "the wicked one who was to come with Satanic power and lying wonders:" if words have a meaning, these words designate an individual. But when we come to Daniel's prophecy of the Little Horn this is all changed. We there read of four beasts, which are explained as four kings, by which expression is meant four kingdoms or empires. These kingdoms represented by the four beasts are undoubtedly the Assyrian empire, the Persian empire, the Grecian empire, and the Roman empire. The Roman Empire is described as breaking up into ten kingdoms, amongst which there grows up another kingdom which gets the mastery over nearly a third of them (three out of ten). This kingdom, or polity, is the little horn of the fourth beast, before which three of the first ten horns are plucked up. If the four "kings" (vii. 17) represented by the four beasts are really empires, if the ten "kings" (vii. 24) are monarchies or nationalities, then the other "king" who rises after them is, in like manner, not an individual but a polity. It follows that the "Little Horn" of Daniel cannot be identified with the Antichrist of St. John and St. Paul. The former is a polity, the latter is an individual.

VI. *The Apocalyptic Beast of St. John.* — A further consequence follows. For the Beast of the Apocalypse is clearly identical with the Little Horn of Daniel. The Beast whose power is absorbed into the Little Horn has ten horns (Dan. vii. 7); and rises from the sea (Dan. vii. 3): the Apocalyptic Beast has ten horns (Rev. xiii. 1) and rises from the sea (*ibid.*). The Little Horn has a mouth speaking great things (Dan. vii. 8, 11, 20); the Apocalyptic Beast has a mouth speaking great things (Rev. xiii. 5). The Little Horn makes war with the saints, and prevails (Dan. vii. 21): the Apocalyptic Beast makes war with the saints, and overcomes them (Rev. xiii. 7). The Little Horn speaks great words against the Most High (Dan. vii. 25): the Apocalyptic Beast opens his mouth in blasphemy against God (Rev. xiii. 6). The Little Horn wears out the saints of the Most High (Dan. vii. 25): the woman who rides on, *i. e.* directs, the Apocalyptic Beast, is drunken with the blood of saints (Rev. xvii. 6). The persecution of the Little Horn is to last a time and times and a dividing of times, *i. e.* three and a half times (Dan. vii. 25): power is given to the Apocalyptic Beast for forty-two months, *i. e.* three and a half times (Rev xiii. 5). These and other parallelisms cannot be accidental. Whatever was meant by Daniel's Little Horn must be also meant by St. John's Beast. Therefore St. John's Beast is not the Antichrist. It is not an individual like the Antichrist of St. John's and St. Paul's Epistles, but a polity like the Little Horn of Daniel.

But, though not identical, it is quite evident, and it has been always recognized, that the Antichrist of the Epistles and the Beast of the Apocalypse have some relation to each other. What is this relation? and in what relation to both does the second Apocalyptic Beast or False Prophet stand? To answer this question we must examine the imagery of the Apocalypse. Shortly stated, it is, so far as concerns our present purpose, as follows. The church is represented (Rev. xii.) as a woman bringing forth children to Christ, persecuted by Satan, and compelled to fly from him into the wilderness, where she remains for 1260 days, or three and a half times. Satan, being unable to destroy the woman, sets himself to make war with her seed (xii. 17). At this time the Beast arises from the sea, and Satan gives to him his power, and his seat, and great authority. The length of time during which the Beast prevails is three and a half times, the same period as that during which the sufferings of the woman last. During a certain part of this three and a half times the Beast takes upon its back, as its guide and rider, a harlot, by whom, as it is explained, is figured "that great city which reigneth over the kings of the earth" (Rev. xvii. 18) from her seven hills (xvii. 9). After a time Babylon the harlot-rider falls (ch. xviii.), but the Beast on whom she had ridden still survives, and is finally destroyed at the glorious coming of Christ (xix. 20).

Can we harmonize this picture with the prediction of St. Paul, always recollecting that his Man of Sin is an individual, and that the Apocalyptic Beast is a polity?

As we have here reached that which constitutes the great difficulty in mastering the conception of the Antichrist as revealed by the inspired writers we shall now turn from the text of Scripture to

Digitized by Google

the comments of annotators and essayists to see what assistance we can derive from them. We shall then resume the consideration of the Scriptural passages at the point at which we now leave them. We shall classify the opinions which have been held on the Antichrist according as he is regarded as an individual, or as a polity, or as a principle. The individualists, again, must be subdivided, according as they represent him as one to come or as one already come. We have, therefore, four classes of writers on the Antichrist: — (1) those who regard him as an individual yet future; (2) those who regard him as a polity now present; (3) those who regard him as an individual already past away; (4) those who consider that nothing is meant beyond antichristian and lawless principle, not embodied either in an individual or in a special polity.

1. The first opinion held in the Church was that the Antichrist was a real person who would appear in the world when the time of his appearance was come. The only point on which any question arose was, whether he should be a man armed with satanic powers or Satan himself. That he would be a man armed with satanic powers is the opinion of Justin Martyr, A. D. 103 (*Dial.* 371, 20, 21, Thirlbii, 1722); of Irenæus, A. D. 140 (*Op.* v. 25, 437, Grabii, 1702); of Tertullian, A. D. 150 (*De Res. Carn.* c. 24; *Apol.* c. 32); of Origen, A. D. 184 (*Op.* i. 667, Delarue, 1733); of his contemporary, Hippolytus (*De Antichristo*, 57, Fabricii, Hamburgi, 1716); of Cyprian, A. D. 250 (*Ep.* 58; *Op.* 120, Oxon. 1682); of Victorinus, A. D. 270 (*Bibl. Patr. Magna*, iii. p. 136, Col. Agrip. 1618); of Lactantius, A. D. 300 (*Div. Inst.* vii. 17) of Cyril of Jerusalem, A. D. 315 (*Catech.* xv. 4); of Jerome, A. D. 330 (*Op.* iv. pars i. 209, Parisiis, 1693); of Chrysostom, A. D. 347 (*Comm. in II. Thess.*); of Hilary of Poictiers A. D. 350 (*Comm. in Matt.*); of Augustine, A. D. 354 (*De Civit. Dei*, xx. 19); of Ambrose, A. D. 380 (*Comm. in Luc.*).[a] The authors of the Sibylline Oracles, A. D. 150, and of the Apostolical Constitutions, Celsus (see *Orig. c. Cels.* lib. vi.), Ephrem Syrus, A. D. 370, Theodoret, A. D. 430, and a few other writers seem to have regarded the Antichrist as the Devil himself rather than as his minister or an emanation from him. But they may, perhaps, have meant no more than to express the identity of his character and his power with that of Satan. Each of the writers to whom we have referred gives his own judgment with respect to some particulars which may be expected in the Antichrist, whilst they all agree in representing him as a person about to come shortly before the glorious and final appearance of Christ, and to be destroyed by His presence. Justin Martyr speaks of him as the man of the apostasy, and dwells chiefly on the persecutions which he would cause. Irenæus describes him as summing up the apostasy in himself; as having his seat at Jerusalem; as identical with the Apocalyptic Beast (c. 28), as foreshadowed by the unjust judge; as being the man who should come in his own name;" and as belonging to the tribe of Dan (c. 30). Tertullian identifies him with the Beast, and supposes him to be about to arise on the fall of the Roman Empire (*De Res. Carn.* c. 25). Origen describes him in Eastern phrase as the child of the Devil and the counterpart of Christ. Hippolytus understands the Roman empire to be represented by the Apocalyptic Beast and the Antichrist by the False Prophet who would restore the wounded Beast by his craft and by the wisdom of his laws. Cyprian sees him typified in Antiochus Epiphanes (*Exhort. ad Mart.* c. 11). Victorinus, with several others — misunderstanding St. Paul's expression that the mystery of iniquity was in his day working — supposes that the Antichrist will be a revivified hero; Lactantius that he will be a king of Syria, born of an evil spirit; Cyril that he will be a magician, who by his arts will get the mastery of the Roman empire. Jerome describes him as the son of the Devil sitting in the Church as though he were the Son of God; Chrysostom as ἀντιθεός τις sitting in the Temple of God, that is, in all the churches, not merely in the Temple at Jerusalem: St. Augustine as the adversary holding power for three and a half years — the Beast, perhaps, representing Satan's empire. The primitive belief may be summed up in the words of St. Jerome. In his Commentary on Daniel he writes — "Let us say that which all ecclesiastical writers have handed down, viz., that at the end of the world, when the Roman empire is to be destroyed, there will be ten kings who will divide the Roman world amongst them; and there will arise an eleventh little king, who will subdue three of the ten kings, that is, the king of Egypt, of Africa, and of Ethiopia, as we shall hereafter show. And on these having been slain, the seven other kings will also submit. 'And behold,' he says, 'in the ram were the eyes of a man.' This is that we may not suppose him to be a devil or a demon, as some have thought, but a man in whom Satan will dwell utterly and bodily. 'And a mouth speaking great things,' for he is 'the man of sin, the son of perdition, who sitteth in the temple of God, making himself as God'" (*Op.* vol. iv. p. 511, Col. Agrip. 1616). In his Comment. on Dan. xi., and in his reply to Algasia's eleventh question, he works out the same view in greater detail. The same line of interpretation continued. Andreas of Cæsarea, A. D. 550, explains him to be a king actuated by Satan, who will reunite the old Roman empire and reign at Jerusalem (*In Apoc.* c. xiii.); Aretas, A. D. 650, as a king of the Romans who will reign over the Saracens in Bagdad (*In Apoc.* c. xiii.); John Damascene, A. D. 800 [fl. 730], repeats the primitive belief (*Orth. Fid.* l. iv. c. 26). Adso, A. D. 950 [980], says that a Frank king will reunite the Roman empire, and that he will abdicate on Mount Olivet, and that, on the dissolution of his kingdom, the Antichrist will be revealed. The same writer supposes that he will be born in Babylon, that he will be educated at Bethsaida and Chorazin, and that he will proclaim himself the Son of God at Jerusalem (*Tract. in Antichr. apud August. Opera*, tom. ix. p. 454, Paris, 1637). Theophylact, A. D. 1070, speaks of him as a man who will carry Satan about with him. Albert the Great, Cardinal Hugo, and Alexander de Hales repeat the received tradition in the thirteenth century. So also Thomas Aquinas, A. D. 1260, who recurs to the tradition with regard to the birth of Antichrist

[a] * The dates here given in connection with the names of many of the Christian fathers are likely to mislead the reader. In the case of Justin Martyr, Irenæus, Tertullian, Origen, Cyril of Jerusalem, Jerome, Chrysostom, and Augustine, they denote the supposed time of their *birth*; in the case of the others mentioned above and below, they represent the time when they *flourished*. A

at Babylon, saying that he will be instructed in the Magian philosophy, and that his doctrine and miracles will be a parody of those of the Lamb. The received opinion of the twelfth century is brought before us in a striking and dramatic manner at the interview between King Richard I. and the Abbot Joachim at Messina, as the king was on his way to the Holy Land. "I thought," said the king, "that Antichrist would be born in Antioch or in Babylon, and of the tribe of Dan; and would reign in the temple of the Lord in Jerusalem; and would walk in that land in which Christ walked; and would reign in it for three years and a half; and would dispute against Elijah and Enoch, and would kill them; and would afterwards die; and that after his death God would give sixty days of repentance, in which those might repent which should have erred from the way of truth, and have been seduced by the preaching of Antichrist and his false prophets." This seems to have been the view defended by the archbishops of Rouen and Auxerre and by the bishop of Bayonne, who were present at the interview; but it was not Joachim's opinion. He maintained the seven heads of the Beast to be Herod, Nero, Constantius, Mohammed, Melsemut, who were past; Saladin, who was then living; and Antichrist, who was shortly to come, being already born in the city of Rome, and about to be elevated to the Apostolic See (Roger de Hoveden in *Richard I.*, anno 1190).[a] In his own work on the Apocalypse Joachim speaks of the second Apocalyptic beast as being governed by "some great prelate who will be like Simon Magus, and as it were universal pontiff throughout the world, and be that very Antichrist of whom St. Paul speaks." These are very noticeable words. Gregory I. had long since (A. D. 590) declared that any man who held even the shadow of the power which the popes of Rome soon after his time arrogated to themselves, would be the precursor of Antichrist. Arnulphus bishop of Orleans (or perhaps Gerbert), in an invective against John XV. at the Council of Rheims, A. D. 991, had declared that if the Roman pontiff was destitute of charity and puffed up with knowledge, he was Antichrist — if destitute both of charity and of knowledge, that he was a lifeless stone (Mansi, tom. ix. p. 132, Ven. 1774); but Joachim is the first to suggest, not that such and such a pontiff was Antichrist, but that the Antichrist would be a *Universalis Pontifex*, and that he would occupy the Apostolic See. Still, however, we have no hint of an order or succession of men being the Antichrist. It is an actual, living, individual man that Joachim contemplates.

The master had said that *a* Pope would be the Antichrist; his followers began to whisper that it was *the* Pope. Amalric, professor of logic and theology at Paris at the end of the 12th century, appears to have been the first to have put forth the idea. It was taken up by three different classes: by the moralists, who were scandalized at the laxity of the Papal Court; by the Imperialists, in their temporal struggle with the Papacy; and, perhaps independently, by the Waldenses and their followers in their spiritual struggle. Of the first class we may find examples in the Franciscan enthusiasts Peter John of Olivi, Telesphorus, Ubertinus, and John of Paris, who saw a mystic Antichrist at Rome, and looked forward to a real Antichrist in the future; and again in such men as Grostête whom we find asking, as in despair, whether the name of Antichrist has not been earned by the Pope (Matt. Par. in *An.* 1253, p. 875, 1640). Of the second class we may take Eberhard archbishop of Salzburg as a specimen, who denounces Hildebrand as "having, in the name of religion, laid the foundation of the kingdom of Antichrist 170 years before his time." He can even name the ten horns. They are the "Turks, Greeks, Egyptians, Africans, Spaniards, French, English, Germans, Sicilians, and Italians, who now occupy the provinces of Rome; and a little horn has grown up with eyes and mouth, speaking great things, which is reducing three of these kingdoms — *i. e.* Sicily, Italy, and Germany — to subserviency, is persecuting the people of Christ and the saints of God with intolerable opposition, is confounding things human and divine, and attempting things unutterable, execrable" (Aventinus, *Annal. Boiorum*, p 651, Lips. 1710). The Waldenses eagerly grasped at the same notion, and from that time it has never been lost sight of. Thus we slide from the individualist view, which was held unanimously in the Church for upwards of a thousand years, to the notion of a polity, or a succession of rulers of a polity, that polity being the Church of Rome. The hitherto received opinion now vanishes, and does not appear again until the excesses and extravagances of the new opinion produced a reaction against itself.

2. The Waldenses also at first regarded the Antichrist as an individual. The "Noble Lesson," written in the 12th century, teaches the expectation of a future and personal Antichrist;[b] but the Waldensian treatise of Antichrist in the 14th century identifies Antichrist, Babylon, the Fourth Beast, the Harlot, and the Man of Sin, with the system of Popery. Wickliffites and Hussites held the same language. Lord Cobham declared at his trial that the Pope was Antichrist's head (Bede's *Works*, p. 38, Cambridge, 1849). Walter Brute, brought before the Bishop's Court at Hereford at the end of the 14th century, pronounced the Antichrist to be "the high Bishop of Rome calling himself God's servant and Christ's chief vicar in this world" (Foxe, iii. 131, Lond. 1844). Thus we reach the Reformation. Walter Brute (A. D. 1393), Bullinger (1504), Chytræus (1571), Aretius (1573), Foxe (1586), Napier (1593), Mede (1632), Jurieu (1685), Bp. Newton (1750), Cunninghame (1813), Faber, (1814), Woodhouse (1828), Habershon (1843), identify the False Prophet, or Second Apocalyptic Beast, with Antichrist and with the Papacy; Marlorat (A. D. 1574), King James I. (1603), Daubuz (1720), Galloway (1802), the First Apocalyptic Beast; Brightman (A. D. 1600) Pareus (1615), Vitringa (1705), Gill (1776), Bachmair (1778), Fraser (1795), Croly (1828) Fysh (1837), Elliott (1844), both the Beasts That the Pope and his system are Antichrist, was

[a] The Bollandists reject the story of this interview as an invention. It has also been suggested (see M. Stuart) that Joachim's works have been interpolated.

[b] "E esser mot aviss, cant venre l' Antexrist,
Que nos non crean, ni a son fait, ni a son dit:
Car, segont l'escriptura, son ara fait moti Antexrist;
Car Antexrist son tuit aquilh que contrastan a Xrist."
— *La Nobla Leyczon*, l. 457. See Raynouard's *Choix des Poésies Originales des Troubadours*, ii. 100; App iii. to vol. iii. of Elliott's *Hora Apocalypticæ*, Lond 1846; Hallam's *Lit. Europe*, i. 28 (note), Lond. 1855

taught by Luther, Calvin, Zwingli, Melancthon, Bucer, Beza, Calixtus, Bengel, Michaelis, and by almost all Protestant writers on the Continent. Nor was there any hesitation on the part of English theologians to seize the same weapon of offense. Bp. Bale (A. D. 1491), like Luther, Bucer, and Melancthon, pronounces the Pope in Europe and Mohammed in Africa to be Antichrist. The Pope is Antichrist, say Cranmer (*Works*, vol. ii. p. 46, Camb. 1844), Latimer (*Works*, vol. i. p. 149, Camb. 1844), Ridley (*Works*, p. 53, Camb. 1841), Hooper (*Works*, vol. ii. p. 44, Camb. 1852), Hutchinson (*Works*, p. 304, Camb. 1842), Tyndale (*Works*, vol. i. p. 147, Camb. 1848), Sandys (*Works*, p. 11, Camb. 1841), Philpot (*Works*, p. 152, Camb. 1842), Jewell (*Works*, vol. i. p. 109, Camb. 1845), Rogers (*Works*, p. 182, Camb. 1854), Fulke (*Works*, vol. ii. p. 269, Camb. 1848), Bradford (*Works*, p. 435, Camb. 1848). Nor is the opinion confined to these 16th century divines, who may be supposed to have been specially incensed against Popery. King James held it (*Apol. pro Juram. Fidel.* London, 1609), as strongly as Queen Elizabeth (see Jewell, *Letter to Bulling.* May 22, 1559, *Zurich Letters*, First Series, p. 33, Camb. 1842); and the theologians of the 17th century did not repudiate it, though they less and less dwelt upon it as their struggle came to be with Puritanism in place of Popery. Bp. Andrewes maintains it as a probable conclusion from the Epistle to the Thessalonians (*Resp. ad Bellarm.* p. 304, Oxon. 1851); but he carefully explains that King James, whom he was defending, had expressed his private opinion, not the belief of the Church, on the subject (*ibid.* p. 23). Bramhall introduces limitations and distinctions (*Works*, iii. 520, Oxf. 1845); significantly suggests that there are marks of Antichrist which apply to the General Assembly of the Kirk of Scotland as much as to the Pope or to the Turk (*ib.* iii. 287); and declines to make the Church of England responsible for what individual preachers or writers had said on the subject in moments of exasperation (*ib.* ii. 582). From this time forward the Papal-Antichrist theory is not to be found in any theologians of name in the English Church, nor indeed in the sixteenth century does it seem to have taken root in England. Hard names were bandied about, and the hardest of all being Antichrist, it was not neglected. But the idea of the Pope being the Antichrist was not the idea of the English Reformation, nor was it ever applied to the Pope in his Patriarchal or Archiepiscopal, but solely in his distinctively Papal character. But the more that the sober and learned divines of the seventeenth century gave up this application of the term, the more violently it was insisted upon by men of little charity and contracted views. A string of writers followed each other in succession, who added nothing to the interpretation of prophecy, but found each the creation of his own brain in the sacred book of the Revelation, grouping history in any arbitrary manner that they chose around the central figure of the Papal Antichrist.

3. A reaction followed. Some returned to the ancient idea of a future individual Antichrist, as Lacunza or Benezra (A. D. 1810), Burgh, Samuel Maitland, Newman (*Tracts for the Times*, No 83), Charles Maitland (*Prophetic Interpretation*). Others preferred looking upon him as long past, and fixed upon one or another persecutor or heresiarch as the man in whom the predictions as to Antichrist found their fulfillment. There seems to be no trace of this idea for more than 1600 years in the Church. But it has been taken up by two opposite classes of expounders, by Romanists who were anxious to avert the application of the Apocalyptic prophecies from the Papacy, and by others, who were disposed, not indeed to deny the prophetic import of the Apocalypse, but to confine the seer's ken within the closest and narrowest limits that were possible. Alcasar, a Spanish Jesuit, taking a hint from Victorinus, seems to have been the first (A. D. 1604) to have suggested that the Apocalyptic prophecies did not extend further than to the overthrow of Paganism by Constantine. This view, with variations by Grotius, is taken up and expounded by Bossuet, Calmet, De Sacy, Eichhorn, Hug, Herder, Ewald, Moses Stuart, Davidson. The general view of the school is that the Apocalypse describes the triumph of Christianity over Judaism in the first, and over Heathenism in the third century. Mariana sees Antichrist in Nero; Bossuet in Diocletian and in Julian; Grotius in Caligula; Wetstein in Titus; Hammond in Simon Magus (*Works*, vol. iii. p. 620, Lond. 1631); Whitby in the Jews (*Comm.* vol. ii. p. 431, Lond. 1760); Le Clerc in Simon, son of Giora, a leader of the rebel Jews; Schöttgen in the Pharisees; Nösselt and Krause in the Jewish zealots; Harduin in the High Priest Ananias; F. D. Maurice in Vitellius (*On the Apocalypse*, Camb. 1860).

4. The same spirit that refuses to regard Satan as an individual, naturally looks upon the Antichrist as an evil principle not embodied either in a person or in a polity. Thus Koppe, Storr, Nitzsch, Pelt. (See Alford, *Gk. Test.* iii. 69.)

We do not gain much by a review of the opinions of the commentators. In the case of prophecy, partially at least unfulfilled, little is to be expected. Of the four opinions which we have exhibited, the last is in accordance neither with St. Paul nor St. John, for St. Paul describes the Adversary as being distinctly a man; St. John speaks of the coming of Antichrist in terms similar to those used for the coming of Christ, and describes Antichristianism as τὸ τοῦ ἀντιχρίστου, thereby showing that Antichristianism is Antichristianism because it is the spirit of the concrete Antichrist. The third opinion is plainly refuted by the fact that the persons fixed upon as the Antichrist have severally passed away, but Christ's glorious presence, which is immediately to succeed the Antichrist, has not yet been vouchsafed. The majority of those who maintain the second opinion are shown to be in the wrong because they represent as a polity what St. Paul distinctly describes as a man. The majority of those who hold the first opinion are in like manner shown to be in the wrong, because they represent as an individual what the Apocalypse demonstrably pictures as a polity. We are unable to follow any one interpreter or any one school of interpreters. The opinions of the two last schools, we are able to see, are wholly false. The two first appear to contain the truth between them, but so divided as to be untrue in the mouth of almost any individual expositor who has entered into details. We return to Scripture.

St. Paul says that there are two things which are to precede the Day of Christ, the ἀποστασία and the revelation of the Adversary, but he does not say that these two things are contemporary. On the contrary, though he does not directly express it, he implies that there was to be a successive

of events. First, it would seem, an unnamed and to us unknown obstacle has to be removed: then was to follow the "Apostasy;" after this, the Adversary was to arise, and then was to come his destruction. We need hardly say that the word "apostasy," as ordinarily used, does not give the exact meaning of ἡ ἀποστασία. The A. V. has most correctly rendered the original by "falling away," having only failed of entire exactness by omitting to give the value of the article.[a] An open and unblushing denial and rejection of all belief, which is implied in our "apostasy," is not implied in ἀποστασία. It means one of two things: (1) Political defection (Gen. xiv. 4; 2 Chr. xiii. 6; Acts v. 37); (2) Religious defection (Acts xxi. 21; 1 Tim. iv. 1; Heb. iii. 12). The first is the common classical use of the word. The second is more usual in the N. T. Cyril of Jerusalem seems to understand the word rightly when he says in reference to this passage: Νῦν δὲ ἐστὶν ἡ ἀποστασία· ἀπέστησαν γὰρ οἱ ἄνθρωποι τῆς ὀρθῆς πίστεως . . . ἀπέστησαν γὰρ οἱ ἄνθρωποι ἀπὸ τῆς ἀληθείας . . . Αὕτη τοίνυν ἐστὶν ἡ ἀποστασία· καὶ μέλλει προσδοκᾶσθαι ὁ ἔχθρος (St. Cyril. *Catech.* xv. 9, *Op.* p. 228, Paris, 1720). And St. Ambrose, "A verâ religione plerique lapsi errore desciscent" (*Comm. in Luc.* xx. 20). This "falling away" implies persons who fall away, the ἀποστασία consists of ἀπόσταται. Supposing the existence of an organized religious body, some of whom should fall away from the true faith, the persons so falling away would be ἀπόσταται, though still formally unsevered from the religious body to which they belonged, and the religious body itself, while from one side and in respect to its faithful members it would retain its character and name as a religious body, might yet from another side and in respect to its other members be designated an ἀποστασία. It is such a corrupted religious body as this that St. Paul seems to mean by the ἀποστασία which he foretells in the Epistle to the Thessalonians. In the Epistles to Timothy he describes this religious defection by some of its peculiar characteristics. These are, seducing spirits, doctrines of demons, hypocritical lying, a seared conscience, a forbidding of marriage and of meats, a form of godliness without the power thereof (1 Tim. iv. 1; 2 Tim. iii. 5). It has been usual, as we have seen, to identify the Beast of the Apocalypse with St. Paul's Man of Sin. It is impossible, as we have said, to do so. But it is possible, and more than possible, to identify the Beast and the ἀποστασία. Can we find any thing which will serve as the antitype of both? In order to be the antitype of St. John's Beast it must be a polity, arising, not immediately, but shortly, after the dissolution of the Roman Empire, gaining great influence in the world, and getting the mastery over a certain number of those nationalities which like itself grew out of that empire (Dan. vii. 24). It must last three and a half times, *i. e.* nearly twice as long as the empire of Assyria, or Persia, or Grecia, to which only two times seem to be allotted (Dan. vii. 12). It must blaspheme against God, *i. e.* it must arrogate to itself or claim for creatures the honor due to God alone.[b] It must be an object of wonder and worship to the world (Rev. xiii. 6). It must put forward unblushing claims in behalf of itself, and be full of its own perfections (Rev. xiii. 5). At a certain period in its history it must put itself under the guidance of Rome (Rev. xviii. 3), and remain ridden by her until the destruction of the latter (Rev xviii. 2); its own existence being still prolonged until the coming of Christ in glory (Rev. xix. 20). To satisfy the requirements of St. Paul's description, its essential features must be a falling away from the true faith (2 Thess. ii. 3; 1 Tim. iv. 1), and it must be further characterized by the specific qualities already transcribed from the Epistles to Timothy.

The antitype may be found in the corrupted Church of Christ, in so far as it was corrupted. The same body, in so far as it maintained the faith and love, was the bride and the spouse, and, in so far as it "fell away" from God, was the ἀποστασία, just as Jerusalem of old was at once Sion the beloved city and Sodom the bloody city — the Church of God and the Synagogue of Satan. According to this view, the three and a half times of the Beast's continuance (Rev. xiii. 5), and of the Bride's suffering in the wilderness (Rev. xii. 6), would necessarily be conterminous, for the persecuted and the persecutors would be the faithful and the unfaithful members of the same body. These times would have commenced when the Church lapsed from her purity and from her first love into unfaithfulness to God, exhibited especially in idolatry and creature-worship. It is of the nature of a religious defection to grow up by degrees. We should not therefore be able to lay the finger on any special moment at which it commenced. St. Cyril of Jerusalem considered that it was already existing in his time. "*Now*," he says, "is the ἀποστασία, for men have fallen away (ἀπέστησαν) from the right faith. This then is the ἀποστασία, and we must begin to look out for the enemy; already he has begun to send his forerunners, that the prey may be ready for him at his coming" (*Catech.* xv. 9). It was at the Second Council of Nice that the Church formally committed itself for the first time (A. D. 787) by the voice of a General Council to false doctrine and idolatrous practice. The after acquiescence in the Hildebrandine theory of the Papal supremacy would be typified by the Beast taking the woman who represents the seven-hilled city on its back as its guide and director. From the twelfth to the sixteenth century, and partially to the present day, this Hildebrandine idea has reigned over and has been the governing spirit of the Corrupted Church. The fall of Babylon, *i. e.* of Rome, would be as yet future, as well as the still subsequent destruction of the Corrupted Church, on the day of the coming of Christ. The period of the three and a half times would continue down to the final moment that this destruction takes place.

[a] For the force of the article, see Bp. Middleton *in loc.* (*Gk. Art.* p. 382, Camb. 1833).

[b] The word "blasphemy" has come to bear a secondary meaning, which it does not bear in Scripture. Schleusner (*in voc.*) rightly explains it, *Dicere et facere quibus majestas Dei violatur.* The Jews accused our Lord of blasphemy because He claimed divine power and the divine attributes (Matt. ix. 2, xxvi. 64; John x. 33). There was nothing in our Lord's words which the most bitter malignity could have called blasphemous in the later sense which the word has come to bear. It is of course in the Scriptural, not in the modern, sense that St. John attributes blasphemy to the Beast. (See Wordsworth, *On the Apocalypse*, p 528.)

VII. *The Apocalyptic False Prophet.* — There is a second Apocalyptic Beast: the Beast from the Earth (Rev. xiii. 11), or the False Prophet (Rev. xix. 20). Can we identify this Beast either with the individual Antichrist of the Epistles or with the corrupt polity of the Apocalypse? We were compelled to regard the First Beast as a polity by its being identical with that which clearly is a polity, the Little Horn of Daniel. There is no such necessity here, and there is no reason for regarding the Second Beast as a polity, beyond the fact of its being described under a similar figure to that by which a polity had been just previously described. This presumption is more than counterbalanced by the individualizing title of the False Prophet which he bears (Rev. xvi. 13, xix. 20). His characteristics are — (1) "doing great wonders, so that he maketh fire to come down from heaven on the earth in the sight of men" (Rev. xiii. 13). This power of miracle-working, we should note, is not attributed by St. John to the First Beast; but it is one of the chief signs of St. Paul's Adversary, "whose coming is with all power and signs and lying wonders" (2 Thess. ii. 9). (2) "He deceiveth them that dwell on the earth by the means of those miracles which he had power to do in the sight of the Beast" (Rev. xiii. 14). "He wrought miracles with which he deceived them that received the mark of the Beast and worshipped the image of the Beast" (Rev. xix. 20). In like manner, no special power of beguiling is attributed to the First Beast; but the Adversary is possessed of "all deceivableness of unrighteousness in them that perish because they received not the love of the truth that they might be saved" (2 Thess. ii. 10). (3) He has horns like a lamb, *i. e.* he bears an outward resemblance to the Messiah (Rev. xiii. 11); and the Adversary sits in the temple of God showing himself that he is God (2 Thess. ii. 4). (4) His title is The False Prophet, ὁ Ψευδοπροφήτης (Rev. xvi. 13, xix. 20); and our Lord, whom Antichrist counterfeits, is emphatically ὁ Προφήτης. The ψευδοπροφῆται of Matt. xxiv. 24 are the forerunners of ὁ Ψευδοπροφήτης, as John the Baptist of the True Prophet. On the whole, it would seem that if the Antichrist appears at all in the Book of the Revelation it is by this Second Beast or the False Prophet that he is represented. If this be so, it follows that he is an individual person who will at some future time arise, who will ally himself with the Corrupted Church, represent himself as her minister and vindicator (Rev. xiii. 12), compel men by violence to pay reverence to her (xiii. 14), breathe a new life into her decaying frame by his use of the secular arm in her behalf (xiii. 15), forbidding civil rights to those who renounce her authority and reject her symbols (xiii. 17), and putting them to death by the sword (xiii. 15), while personally he is an atheistical blasphemer (1 John ii. 22) and sums up in himself the evil spirit of unbelief which has been working in the world from St. Paul's days to his (2 Thess. ii. 7). That it is possible for a professed unbeliever and atheist to make himself the champion of a corrupt system of religion, and to become on political grounds as violent a persecutor in its behalf as the most fanatical bigot could be, has been proved by events which have already occurred, and which might again occur on a more gigantic and terrible scale. The Antichrist would thus combine the forces, generally and happily antagonistic, of infidelity and superstition. In this would consist the special horror of the reign of the Antichrist. Hence also the special sufferings of the faithful believers until Christ himself once again appeared to vindicate the cause of truth and liberty and religion.

The sum of Scripture teaching with regard to the Antichrist, then, appears to be as follows. Already in the times of the Apostles there was the mystery of iniquity, the spirit of Antichrist, at work. It embodied itself in various shapes — in the Gnostic heretics of St. John's days, in the Jewish impostors who preceded the fall of Jerusalem, in all heresiarchs and unbelievers, especially those whose heresies had a tendency to deny the incarnation of Christ, and in the great persecutors who from time to time afflicted the Church. But this Antichristian spirit was then, and is still, diffused. It had not, and it has not yet, gathered itself into the one person in whom it will be one day completely and fully manifested. There was something which prevented the open manifestation of the Antichrist in the Apostles' days which they spoke of by word of mouth, but were unwilling to name in letters. What this obstacle was, or is, we cannot now know. The general opinion of the early writers and fathers is that it was the power of secular law existing in the Roman Empire. The Roman Empire fell, and upon its fall, and in consequence of its fall, there arose a secularization and corruption of the Church, which would not have been so secularized and corrupted had it been kept in check by the jealousy of the imperial power. The secularization and corruption increasing, the Church, which from one point of view and in respect to some of its members was considered as the Church of Christ, from another point of view and in respect to others of its members, came to be regarded as no better than an ἀποστασία. Time passing on, the corrupt element, getting still more the mastery, took the Papacy on its back and gave itself up to be directed from Rome. So far we speak of the past. It would appear further that there is to be evolved from the womb of the Corrupt Church, whether after or before the fall of Rome does not appear, an individual Antichrist, who, being himself a scoffer and contemner of all religion, will yet act as the patron and defender of the Corrupt Church, and compel men to submit to her sway by the force of the secular arm and by means of bloody persecutions. He will unite the old foes superstition and unbelief in a combined attack on liberty and religion. He will have, finally, a power of performing lying miracles and beguiling souls, being the embodiment of satanic as distinct from brutal wickedness. How long his power will last we are wholly ignorant, as the three and a half times do not refer to his reign (as is usually imagined), but to the continuance of the ἀποστασία. We only know that his continuance will be short. At last he will be destroyed together with the Corrupt Church, in so far as it is corrupt, at the glorious appearance of Christ, which will usher in the millennial triumph of the faithful and hitherto persecuted members of the Church.

(B.) There are points which require further elucidation: —

1. *The meaning of the name Antichrist.* Mr. Greswell argues at some length that the only correct reading of the word is Counterfeit-Christ or *Pro-Christo*, and denies that the idea of Adversary to Christ is involved in the word. Mr. Greswell's authority is great; but he has been in this case too hasty in drawing his conclusion from the instances

Digitized by Google

which he has cited. It is true that "ἀντί is not synonymous with κατά," but it is impossible to resist the evidence which any Greek Lexicon supplies that the word ἀντί, both in composition and by itself, will bear the sense of "opponent to." It is probable that both senses are combined in the word Antichrist, as in the word Antipope, which is very exact in its resemblance, but the primary notion which it conveys would seem rather to be that of antagonism than rivalry. See Greswell, *Exposition of the Parables*, vol. i. p. 372 ff.; Wordsworth, *On the Apocalypse*, p. 512.

2. *The meaning of* τὸ κατέχον. What is that thing which withholdeth (2 Thess. ii. 6)? and why is it apparently described in the following verse as a person (ὁ κατέχων)? There is a remarkable unanimity among the early Christian writers on this point. They explain the obstacle, known to the Thessalonians but unknown to us, to be the Roman Empire. Thus Tertullian, *De Resur. Carn.*, c. 24, and *Apol.*, c. 32; St. Chrysostom and Theophylact on 2 Thess. ii.; Hippolytus, *De Antichristo*, c. 49; St. Jerome on Dan. vii.; St. Augustine, *De Civ. Dei*, xx. 19; St. Cyril of Jerusalem, *Catech.* xv. 6 (see Dr. H. More's Works, bk. ii. c. 19, p. 690; Mede, bk. iii. ch. xiii. p. 656; Alford, *Gk. Test.* iii. 57; Wordsworth, *On the Apocalypse*, p. 520). Theodoret and Theodore of Mopsuestia hold it to be the determination of God. Theodoret's view is embraced by Pelt; the Patristic interpretation is accepted by Wordsworth. Ellicott and Alford so far modify the Patristic interpretation as to explain the obstacle to be the restraining power of human law (τὸ κατέχον) wielded by the Empire of Rome (ὁ κατέχων) when Tertullian wrote, but now by the several governments of the civilized world. The explanation of Theodoret is untenable on account of St. Paul's further words, "until he be taken out of the way," which are applied by him to the obstacle. The modification of Ellicott and Alford is necessary if we suppose the ἀποστασία to be an *infidel* apostasy still future, for the Roman Empire is gone, and *this* apostasy is not come, nor is the Wicked One revealed. There is much to be said for the Patristic interpretation in its plainest acceptation. How should the idea of the Roman Empire being the obstacle to the revelation of Antichrist have originated? There was nothing to lead the early Christian writers to such a belief. They regarded the Roman Empire as idolatrous and abominable, and would have been more disposed to consider it as the precursor than as the obstacle to the Wicked One. Whatever the obstacle was, St Paul says that he told the Thessalonians what it was. Those to whom he had preached knew, and every time that his Epistle was publicly read (1 Thess. v 27), questions would have been asked by those who did not know, and thus the recollection must have been kept up. It is very difficult to see whence the tradition could have arisen except from St. Paul's own teaching. It may be asked, Why then did he not express it in writing as well as by word of mouth? St. Jerome's answer is sufficient: "If he had openly and unreservedly said, 'Antichrist will not come unless the Roman Empire be first destroyed,' the infant Church would have been exposed in consequence to persecution" (*ad Algas.* Qu. xi. vol. iv. p. 209, Paris, 1706). Remigius gives the same reason, 'He spoke obscurely for fear a Roman should perhaps read the Epistle, and raise a persecution against him and the other Christians, for they held that they were to rule forever in the world' (*Bib. Patr. Max.* viii. 1018; see Wordsworth, *On the Apocalypse*, p. 343). It would appear then that the obstacle *was* probably the Roman Empire, and on its being taken out of the way there did occur the "falling away." Zion the beloved city became Sodom the bloody city — still Zion though Sodom, still Sodom though Zion. According to the view given above, this would be the description of the Church in her present estate, and this will continue to be our estate, until the time, times and half time, during which the evil element is allowed to remain within her, shall have come to their end.

3. *What is the Apocalyptic Babylon?* There is not a doubt that by Babylon is figured Rome. The "seven mountains on which the woman sitteth" (Rev. xvii. 9), and the plain declaration, "the woman which thou sawest is that great city which reigneth" (*i. e.* in St. John's days) "over the kings of the earth" (Rev. xvii. 18), are too strong evidence to be gainsaid. There is no commentator of note, ancient or modern, Romanist or Protestant, who does not acknowledge so much. But *what* Rome is it that is thus figured? There are four chief opinions: (1) Rome Pagan; (2) Rome Papal; (3) Rome having hereafter become infidel; (4) Rome as a type of the world. That it is old Pagan Rome is the view ably contended for by Bossuet and held in general by the *præterist* school of interpreters. That it is Rome Papal was held by the Protestants of the sixteenth century, and by those who preceded and have followed them in their line of interpretation. That it is Rome having lapsed into infidelity is the view of many of the *futurists*. That it is Rome as the type of the world is suggested or maintained by Tichonius, Primasius, Aretas, Albert the Great, and in our own days by Dr. Arnold (*On the Interpretation of Prophecy*) and Dr. Newman (*Tracts for the Times*, No. 83). That the harlot-woman must be an unfaithful Church is argued convincingly by Wordsworth (*On the Apocalypse*, p. 376), and no less decisively by Isaac Williams (*The Apocalypse*, p. 335). A close consideration of the language and import of St. John's prophecy appears, as Mr. Williams says, to leave no room for doubt on this point. If this be so, the conclusion seems almost necessarily to follow that the unfaithful Church spoken of is, as Dr. Wordsworth argues, the Church of Rome. And this appears to be the case. The Babylon of the Apocalypse is probably the Church of Rome which gradually raised and seated herself on the back of the Corrupted Church — the Harlot-rider on the Beast. A very noticeable conclusion follows from hence, which has been little marked by many who have been most anxious to identify Babylon and Rome. It is, that it is impossible that the Pope or the Papal system can be Antichrist, for the Harlot who rides on the Beast and the Antichrist are wholly distinct. After Babylon is fallen and destroyed (Rev. xviii.) the Antichrist is still found (Rev. xix.). Indeed there is hardly a feature in the Papal system which is similar in its lineaments to the portrait of Antichrist as drawn by St. John, however closely it may resemble Babylon.

4. *What are we to understand by the two Witnesses?* The usual interpretation given in the early Church is that they are Enoch and Elijah, who are to appear in the days of Antichrist, and by him to be killed. Victorinus substitutes Jeremiah for Enoch. Joachim would suggest Moses

Digitized by Google

and Elijah taken figuratively for some persons, or perhaps orders, actuated by their spirit. Bullinger, Bale, Chytræus, Pareus, Mede, Vitringa understand by them the line of Antipapal remonstrants. Foxe takes them to be Huss and Jerome of Prague; Bossuet, the early Christian martyrs: Herder and Eichhorn, the chief priest Ananus and Jesus slain by the Zealots; Moses Stuart, the sick and old who did not fly from Jerusalem on its capture by the Romans; Maurice, the priest Jeshua and the judge Zerubbabel as representing Law and Sacrifice; Lee understands by them the Law and the Gospel; Tichonius and Bede, the two Testaments; others the two Sacraments. All that we are able to say is this: The time of their witnessing is 1260 days, or a time, times, and half a time. This is the same period as that during which the ἀποστασία and the power of the Beast continue. They would seem therefore to represent all those who in the midst of the faithless are found faithful throughout this time. Their being described as "candlesticks" would lead us to regard them perhaps as Churches. The place of their temporary death, "the great city, which spiritually is called Sodom and Egypt, where also our Lord was crucified," would appear to be Jerusalem, as typifying the Corrupted Church. The Beast that kills them is not Antichrist, but the faithless Church.

5. *The Number of the Beast.* Nothing whatever is known about it. No conjecture that has been made is worth mentioning on the ground of its being likely in any the least degree to approximate to the truth. The usual method of seeking the solution of the difficulty is to select the name of an individual and to count the numerical values of its constituent letters. The extravagant conclusions which have been made to result from this system have naturally brought it into disrepute, but it is certain that it was much more usual, at the time that St. John wrote, to make calculations in this manner than most persons are now aware. On this principle Mercury or Ilnuth was invoked under the name of 1218, Jupiter under that of 717, the Sun of 608 or XH. Mr. Elliott quotes an enigma from the Sibylline verses in some way expressing the name of God, strikingly illustrative of the challenge put forth by St. John, and perhaps formed in part on its model:

> Ἐννέα γράμματ' ἔχω· τετρασυλλαβός εἰμι· νόει με.
> Αἱ τρεῖς αἱ πρῶται δύο γράμματ' ἔχουσιν ἑκάστη,
> Ἡ λοιπὴ δὲ τὰ λοιπά· καὶ εἰσὶν ἄφωνα τὰ πέντε.
> Τοῦ παντὸς δ' ἀριθμοῦ ἑκατοντάδες εἰσὶ δὶς ὀκτώ
> Καὶ τρεῖς τρισδεκάδες, σύν γ' ἑπτά· γνοὺς δὲ τίς εἰμι,
> Οὐκ ἀμύητος ἔσῃ θείης παρ ἐμοί γε σοφίης.
> *Sibyll. Orac.* p. 171, Paris, 1599.

supposed by Mr. Clarke to be Θεὸς σωτήρ. The only conjecture with respect to the number of the Beast, made on this principle, which is worthy of mention is one which dates as early as the time of Irenæus, and has held its ground down to the time of Dean Alford and Canon Wordsworth. Irenæus suggests, though he does not adopt, the word Λατεινος. Dr. Wordsworth (1860) thinks it possible, and Dean Alford (1861) has "the strongest persuasion that no other can be found approaching so near to a complete solution." Of other names the chief favorites have been Τειταν (Irenæus), Αρνουμε (Hippolytus), Λαμπετις, Αντεμος (Tichonius), Γενσηρικος (Rupertus), Κακος Ὀδηγος, Ἀληθης Βλαβερος, Παλαι Βασκανος, Ἀμνος αδικος (Arethas), Οὐλπιος (Grotius), Μαομετις, Ἀποστατης, Diocles Augustus (Bossuet): Ewald constructs "the Roman Cæsar" in Hebrew, and Benary "the Cæsar Nero" in the same language. Any one who wishes to know the many attempts that have been made to solve the difficulty — attempts seldom even relieved by ingenuity — may consult Wolfius, Calmet, Clarke, Wrangham, Thorn [Thom?].[a] Probably the principle on which the explanation goes is false. Men have looked for Antichrist among their foes, and have tortured the name of the person fixed upon into being of the value of 666. Hence Latinus under the Roman Emperors, Mohammed at the time of the Saracenic successes, Luther at the Reformation, Bonaparte at the French Revolution. The name to be found is not that of Antichrist, but the name of the Beast, which, as we have argued, is not the same as Antichrist. It is probable that a sounder method of interpretation is adopted by Mr. Isaac Williams, Dr. Wordsworth, and Mr. Maurice. There is clearly a symbolical meaning in the numbers used in the Apocalypse; and they would explain the three sixes as a threefold declension from the holiness and perfection symbolized by the number seven. We will add an ingenious suggestion by an anonymous writer, and will leave the subject in the same darkness in which it is probably destined to remain: "At his first appearance," he writes, "he will be hailed with acclamations and hosannahs as the redeemer of Israel, another Judas Maccabæus: and either from the initials of his name, or from the initial letter of some scriptural motto adopted by him, an artificial name will be formed, a cipher of his real name. And that abbreviated name or cipher will be ostentatiously displayed as their badge, their watchword, their shibboleth, their 'Maccabi,' by all his adherents. This artificial name, this mark or symbol of the real name, will be equal by Gematria to 666 (*Jewish Missionary*, p. 52, 1848).

(C.) *Jewish and Mohammedan traditions respecting Antichrist.* The name given by the Jews to Antichrist is (אַרְמִילוּס) Armillus. There are several Rabbinical books in which a circumstantial account is given of him, such as the "Book of Zerubbabel," and others printed at Constantinople. Buxtorf gives an abridgment of their contents in his Lexicon, under the head "Armillus," and in the fiftieth chapter of his *Synagoga Judaica* (p. 717). The name is derived from Isaiah xi. 4, where the Targum gives "By the word of his mouth the wicked Armillus shall die," for "with the breath of his lips shall he slay the wicked." There will, say the Jews, be twelve [ten] signs of the coming of the Messiah: — 1. The appearance of three apostate kings who have fallen away from the faith, but in the sight of men appear to be worshippers of the true God. 2. A terrible heat of the sun. 3. A dew of blood (Joel ii. 30). 4. A healing dew for the pious. 5. A darkness will be cast upon the sun (Joel ii. 31) for thirty days (Is. xxiv. 22). 6. God will give universal power to

[a] * Dr. David Thom, of Liverpool, is the author of a work entitled "The Number and Names of the Apocalyptic Beasts, Part I." (Lond. 1848, 8vo, pp. xxxix., 398), which may well be regarded as a curiosity of literature.

the Romans for nine months, during which time the Roman chieftain will afflict the Israelites; at the end of the nine months God will raise up the Messiah Ben-Joseph, that is, the Messiah of the tribe of Joseph, named Nehemiah, who will defeat the Roman chieftain and slay him. 7. Then there will arise Armillus, whom the Gentiles or Christians call Antichrist. He will be born of a marble statue in one of the churches in Rome. He will go to the Romans and will profess himself to be their Messiah and their God. At once the Romans will believe in him and accept him for their king, and will love him and cling to him. Having made the whole world subject to him, he will say to the Idumæans (*i. e.* Christians), "Bring me the law which I have given you." They will bring it with their book of prayers; and he will accept it as his own, and will exhort them to persevere in their belief of him. Then he will send to Nehemiah, and command the Jewish Law to be brought him, and proof to be given from it that he is God. Nehemiah will go before him, guarded by 30,000 warriors of the tribe of Ephraim, and will read, "I am the Lord thy God: thou shalt have none other gods but me." Armillus will say that there are no such words in the Law, and will command the Jews to confess him to be God as the other nations had confessed him. But Nehemiah will give orders to his followers to seize and bind him. Then Armillus in rage and fury will gather all his people in a deep valley to fight with Israel, and in that battle the Messiah Ben-Joseph will fall, and the angels will bear away his body and carry him to the resting-place of the Patriarchs. Then the Jews will be cast out by all nations, and suffer afflictions such as have not been from the beginning of the world, and the residue of them will fly into the desert, and will remain there forty and five days, during which time all the Israelites who are not worthy to see the Redemption shall die. 8. Then the great angel Michael will rise and blow three mighty blasts of a trumpet. At the first blast there shall appear the true Messiah Ben-David and the prophet Elijah, and they will manifest themselves to the Jews in the desert, and all the Jews throughout the world shall hear the sound of the trump, and those that have been carried captive into Assyria shall be gathered together; and with great gladness they shall come to Jerusalem. Then Armillus will raise a great army of Christians and lead them to Jerusalem to conquer the new king. But God shall say to Messiah, "Sit thou on my right hand," and to the Israelites, "Stand still and see what God will work for you to-day." Then God will pour down sulphur and fire from heaven (Ez. xxxviii. 22), and the impious Armillus shall die, and the impious Idumæans (*i. e.* Christians), who have destroyed the house of our God and have led us away into captivity, shall perish in misery, and the Jews shall avenge themselves upon them, as it is written: "The house of Jacob shall be a fire, and the house of Joseph a flame, and the house of Esau (*i. e.* the Christians) for stubble, and they shall kindle in them and devour them: there shall not be any remaining of the house of Esau, for the Lord hath spoken it" (Obad. 18.) 9. On the second blast of the trumpet the tombs shall be opened, and Messiah Ben-David shall raise Messiah Ben-Joseph from the dead. 10. The ten tribes shall be led to Paradise, and shall celebrate the wedding-feast of the Messiah. And the Messiah shall choose a bride amongst the fairest of the daughters of Israel, and children and children's children shall be born to him, and then he shall die like other men, and his sons shall reign over Israel after him, as it is written, "He shall prolong his days" (Is. liii. 10), which Rambam explains to mean "He shall live long, but he too shall die in great glory, and his son shall reign in his stead, and his son's sons in succession" (Buxtorfii *Synagoga Judaica*, p. 717, Basil. 1661 [and Eisenmenger, *Entdecktes Judenthum*, ii. 698–717]).

The Mohammedan traditions are an adaptation of Christian prophecy and Jewish legend without any originality or any beauty of their own. They too have their signs which are to precede the final consummation. They are divided into the greater and lesser signs. Of the greater signs the first is the rising of the sun from the west (cf. Matt. xxiv. 29). The next is the appearance of a Beast from the earth, sixty cubits high, bearing the staff of Moses, and the seal of Solomon, with which he will inscribe the word "Believer" on the face of the faithful, and "Unbeliever" on all who have not accepted Islamism (comp. Rev. xiii.). The third sign is the capture of Constantinople, while the spoil of which is being divided, news will come of the appearance of Antichrist (*Al Dajjal*), and every man will return to his own home. Antichrist will be blind of one eye and deaf of one ear, and will have the name of Unbeliever written on his forehead (Rev. xiii.). It is he that the Jews call Messiah Ben-David, and say that he will come in the last times and reign over sea and land, and restore to them the kingdom. He will continue forty days, one of these days being equal to a year, another to a month, another to a week, the rest being days of ordinary length. He will devastate all other places, but will not be allowed to enter Mecca and Medina, which will be guarded by angels. Lastly, he will be killed by Jesus at the gate of Lud. For when news is received of the appearance of Antichrist, Jesus will come down to earth, alighting on the white tower at the east of Damascus, and will slay him: Jesus will then embrace the Mohammedan religion, marry a wife, and leave children after him, having reigned in perfect peace and security, after the death of Antichrist, for forty years. (See Pococke, *Porta Mosis*, p. 258, Oxon. 1655; and Sale, *Koran*, *Preliminary Discourse*.)

Literature. — On the subject of the Antichrist and of the Apocalyptic visions the following is a condensed list of the writers most deserving of attention: — S. Cyril of Jerusalem, *Catech.* xv. 220, Paris, 1720. S. Jerome, *Explan. in Daniel.* v. 617, Veron. 1734. These two writers are expounders of the Patristic view. Andreas, *Comm. in Apoc.* Bibl. Patr. Max. v. 590. Aretas, *Comm. in Apoc.* Bibl. Patr. Max. ix. 741. Abbas Joachim (founder of the Antipapal school), *Exp. Apoc.* Venet. 1519. Ribeira (founder of the later school of Futurists), *Comm. in Apoc.* Salam. 1591. Alcasar (founder of the Præterist school), *Vestigatio Arcani Sensûs in Apoc.* Antv. 1614. Pareus, *Comm. in Apoc.* Heidelb. 1618. Cornelius a Lapide, *Comm. in Apoc.* Antv. 1627. Mede, *Clavis Apocalypt.* Cantab. 1632. Bossuet, *L'Apocalypse, avec une Explication*, Œuvres, vol. xxiii. Vitringa, *Anacrisis Apocalyps.* Amst. 1719. Daubuz, *Comm. on Rev* Lond. 1720. Hug, *Einleitung in die Schriften des Neuen Test.* Stuttg. 1821. Bengel, *Erklärte Offenbarung Johannis*, Stuttg. 1834. ANTIOCH (Ἀντιόχεια). 1. In SYRIA. The capital of the Greek kings of Syria, and afterwards the residence of the Roman governors of the province which bore the same name. This metropolis was situated where the chain of Lebanon, running northwards, and the chain of Taurus, running eastwards, are brought to an abrupt meeting. Here the Orontes breaks through the mountains; and Antioch was placed at a bend of the river, partly on an island, partly on the level which forms the left bank, and partly on the steep and craggy ascent of Mount Silpius, which rose abruptly on the south. In the immediate neighborhood was Daphne, the celebrated sanctuary of Apollo (2 Macc. iv. 33); whence the city was sometimes called ANTIOCH BY DAPHNE, to distinguish it from other cities of the same name.

No city, after Jerusalem, is so intimately connected with the history of the apostolic church. Certain points of close association between these two cities, as regards the progress of Christianity, may be noticed in the first place. One of the seven deacons or almoners appointed at Jerusalem, was Nicolas, a proselyte of Antioch (Acts vi. 5). The Christians, who were dispersed from Jerusalem at the death of Stephen, preached the gospel at Antioch (*ibid.* xi. 19). It was from Jerusalem that Agabus and the other prophets, who foretold the famine, came to Antioch (*ibid.* xi. 27, 28): and Barnabas and Saul were consequently sent on a mission of charity from the latter city to the former (*ibid.* xi. 30, xii. 25). It was from Jerusalem again that the Judaizers came, who disturbed the church at Antioch (*ibid.* xv. 1); and it was at Antioch that St. Paul rebuked St. Peter for conduct into which he had been betrayed through the influence of emissaries from Jerusalem (Gal. ii. 11, 12).

The chief interest of Antioch, however, is connected with the progress of Christianity among the heathen. Here the first Gentile church was founded (Acts xi. 20, 21); here the disciples of Jesus Christ were first called Christians (xi. 26); here St. Paul exercised (so far as is distinctly recorded) his first systematic ministerial work (xi 22–26; see xiv. 26–28; also xv. 35 and xviii. 23): hence he started at the beginning of his first missionary journey (xiii. 1–3), and hither he returned (xiv. 26). So again after the apostolic council (the decrees of which were specially addressed to the Gentile converts at Antioch, xv. 23), he began and ended his second missionary journey at this place (xv. 36, xviii. 22). This too was the starting-point of the third missionary journey (xviii. 23), which was brought to a termination by the imprisonment at Jerusalem and Cæsarea.[a] Though St. Paul was never again, so far as we know, at Antioch, it did not cease to be an important centre for Christian progress; but it does not belong to this place to trace its history as a patriarchate, and its connection with Ignatius, Chrysostom, and other eminent names.

Antioch was founded in the year 300 B. C., by Seleucus Nicator, with circumstances of considerable display, which were afterwards embellished by fable. The situation was well chosen, both for military and commercial purposes. Jews were settled there from the first in large numbers, were governed by their own ethnarch, and allowed to have the same political privileges with the Greeks (Joseph. *Ant.* xii. 3, § 1; *c. Ap.* ii. 4). Antioch grew under the successive Seleucid kings, till it became a city of great extent and of remarkable beauty. Some of the most magnificent buildings were on the island. One feature, which seems to have been characteristic of the great Syrian cities — a vast street with colonnades, intersecting the whole from end to end — was added by Antiochus Epiphanes. Some lively notices of the Antioch of this period, and of its relation to Jewish history, are supplied by the books of Maccabees. (See especially 1 Macc iii. 37, xi. 13; 2 Macc. iv. 7–9, v. 21, xi. 36.)

It is the Antioch of the Roman period with which we are concerned in the N. T. By Pompey it had been made a free city, and such it continued till the time of Antoninus Pius. The early Emperors raised there some large and important structures, such as aqueducts, amphitheatres, and baths Herod the Great contributed a road and a colonnade (Joseph. *Ant.* xvi. 5, § 3; *B. J.*, i. 21, § 11; Here should be mentioned that the citizens of Antioch under the Empire were noted for scurrilous wit and the invention of nicknames. This perhaps was the origin of the name by which the disciples of Jesus Christ are designated, and which was

a * It illustrates signally the contrasts of history, that the Antioch of the N. T. from which the first missionaries to the heathen were sent forth, is itself now one of the foreign fields to which missionaries are sent by the churches of America. ed

Antioch.

probably given by Romans to the despised sect, and not by Christians to themselves.

The great authority for all that is known of ancient Antioch is C. O. Müller's *Antiquitates Antiochenæ* (Gött. 1839). Modern *Antakia* is a shrunken and miserable place. Some of the walls, shattered by earthquakes, have a striking appearance on the crags of Mount Silpius. They are described in Chesney's account of the *Euphrates Expedition*, where also is given a view of a gateway which still bears the name of St. Paul. One error, however, should be pointed out, which has found its way into these volumes from Calmet, namely, Jerome's erroneous identification of Antioch with the Riblah of the Old Testament.

Gate of St. Paul, Antioch.

2. ANTIOCH IN PISIDIA (Acts xiii. 14, xiv. 19, 21; 2 Tim. iii. 11). The position of this town is clearly pointed out by Strabo in the following words (xii. 577): — "In the district of Phrygia called Paroreia, there is a certain mountain-ridge, stretching from E. to W. On each side there is a large plain below this ridge; and it has two cities in its neighborhood: Philomelium on the north, and on the other side Antioch, called Antioch near Pisidia. The former lies entirely in the plain; the latter (which has a Roman colony) is on a height." The relations of distance also between Antioch and other towns are known by the Peutingerian table. Its site, however, has only recently been ascertained. It was formerly supposed to be *Ak-sher*, which is now known to be Philomelium on the north side of the ridge. Even Winer (1847) gives this view, the difficulties of which were seen by Leake, and previously by Mannert. Mr. Arundell, the British chaplain at Smyrna, undertook a journey in 1833 for the express purpose of identifying the Pisidian Antioch, and he was perfectly successful (Arundell's *Asia Minor*, ch. xii., xiii., xiv.). The ruins are very considerable. This discovery was fully confirmed by Mr Hamilton (*Res. in Asia Minor*, vol. i. ch. 27). Antioch corresponds to *Yalobatch*, which is distant from *Ak-sher* six hours over the mountains.

This city, like the Syrian Antioch, was founded by Seleucus Nicator. Under the Romans it became a *colonia*, and was also called Cæsarea, as we learn from Pliny (v. 24). The former fact is confirmed by the Latin inscriptions and other features of the coins of the place; the latter by inscriptions discovered on the spot by Mr. Hamilton.

The occasion on which St. Paul visited the city for the first time (Acts xiii. 14) was very interesting and important. His preaching in the synagogue led to the reception of the gospel by a great number of the Gentiles: and this resulted in violent persecution on the part of the Jews, who first, using the influence of some of the wealthy female residents, drove him from Antioch to Ico

Digitized by Google

ium (*ib.* 50, 51), and subsequently followed him even to Lystra (Acts xiv. 19). St. Paul, on his return from Lystra, revisited Antioch for the purpose of strengthening the minds of the disciples (*ib.* 21). These events happened when he was on his first missionary journey, in company with Barnabas. He probably visited Antioch again at the beginning of his second journey, when Silas was his associate, and Timotheus, who was a native of this neighborhood, had just been added to the party. The allusion in 2 Tim. iii. 11 shows that Timotheus was well acquainted with the sufferings which the apostle had undergone during his first visit to the Pisidian Antioch. [PHRYGIA; PISIDIA.] J. S. H.

ANTIOCHI'A (Ἀντιόχεια; [FA.] Alex. Ἀντιοχια exc. in 2 Macc. iv. 33: *Antiochia*). ANTIOCH 1 (1 Macc. iv. 35, vi. 63; 2 Macc. iv. 33, v. 21). W. A. W.

ANTIO'CHIANS (Ἀντιοχεῖς: *Antiocheni*). Partisans of Antiochus Epiphanes, including Jason and the Hellenizing faction (2 Macc. iv. 9, 19). In the latter passages the Vulgate has *viros peccatores*. W. A. W.

ANTI'OCHIS (Ἀντίοχις: *Antiochis*). The concubine of Antiochus Epiphanes (2 Macc. iv. 30). W. A. W.

ANTI'OCHUS (Ἀντίοχος; Alex. Ἀντιμαχος in 1 Macc. xii. 16: *Antiochus*). Father of Numenius, one of the ambassadors from Jonathan to the Romans (1 Macc. xii. 16, xiv. 22). W. A. W.

ANTI'OCHUS II. (Ἀντίοχος, *the withstander*), king of Syria, surnamed *the God* (Θεός), "in the first instance by the Milesians, because he overthrew their tyrant Timarchus" (App. *Syr.* 65), succeeded his father Antiochus (Σωτήρ, *the Savior*) in B. C. 261. During the earlier part of his reign he was engaged in a fierce war with Ptolemæus Philadelphus, king of Egypt (*totis viribus dimicavit*, Hieron. *ad Dan.* xi. 6), in the course of which Parthia and Bactria revolted and became independent kingdoms. At length (B. C. 250) peace was made, and the two monarchs "joined themselves together" (Dan. xi. 6), and Ptolemy ("the king of the south") gave his daughter Berenice in marriage to Antiochus ("the king of the north") who set aside his former wife, Laodice, to receive her. After some time, on the death of Ptolemy (B. C. 247), Antiochus recalled Laodice and her children Seleucus and Antiochus to court. Thus Berenice was "not able to retain her power;" and Laodice, in jealous fear lest she might a second time lose her ascendency, poisoned Antiochus (him "that supported her," *i. e.* Berenice), and caused Berenice and her infant son to be put to death, B. C. 246 (Dan. xi. 6; Hieron. *ad Dan.* l. c.; App. *Syr.* 65).

After the death of Antiochus, Ptolemæus Evergetes, the brother of Berenice ("out of a branch of her root"), who succeeded his father Ptol. Philadelphus, exacted vengeance for his sister's death by an invasion of Syria, in which Laodice was killed, her son Seleucus Callinicus driven for a time from the throne, and the whole country plundered (Dan. xi. 7–9; Hieron. *l. c.*; hence his surname "*the benefactor*"). The hostilities thus renewed continued for many years; and on the death of Seleucus B. C. 226, after his "return into his own land" (Dan. xi. 9), his sons Alexander (Seleucus) Keraunos and Antiochus "assembled a great multitude of forces" against Ptol. Philopator the son of Evergetes, and "one of them" (Antiochus) threatened to overthrow the power of Egypt (Dan. xi. 9, 10; Hieron. *l. c.*). B. F. W.

ANTI'OCHUS III., surnamed *the Great* (μέγας), succeeded his brother Seleucus Keraunos, who was assassinated after a short reign in B. C. 223. He prosecuted the war against Ptol. Philopator with vigor, and at first with success. In B. C. 218 he drove the Egyptian forces to Sidon, conquered Samaria and Gilead, and wintered at Ptolemais, but was defeated next year at Raphia, near Gaza (B. C. 217), with immense loss, and in consequence made a peace with Ptolemy, in which he ceded to him the disputed provinces of Cœle-Syria, Phœnicia and Palestine (Dan. xi. 11, 12; Polyb. v. 40 ff., 53 ff.). During the next thirteen years Antiochus was engaged in strengthening his position in Asia Minor, and on the frontiers of Parthia, and by his successes gained his surname of *the Great*. At the end of this time, B. C. 205, Ptolemæus Philopator died, and left his kingdom to his son Ptol. Epiphanes, who was only five years old. Antiochus availed himself of the opportunity which was offered by the weakness of a minority and the unpopularity of the regent, to unite with Philip III. of Macedon for the purpose of conquering and dividing the Egyptian dominions. The Jews, who had been exasperated by the conduct of Ptol. Philopator both in Palestine and Egypt, openly espoused his cause, under the influence of a short-sighted policy ("the factions among thy people shall rise," *i. e.* against Ptolemy: Dan. xi. 14.) Antiochus succeeded in occupying the three disputed provinces, but was recalled to Asia by a war which broke out with Attalus, king of Pergamos; and his ally Philip was himself embroiled with the Romans. In consequence of this diversion Ptolemy, by the aid of Scopas, again made himself master of Jerusalem (Joseph. *Ant.* xii. 3, 3) and recovered the territory which he had lost (Hieron. *ad Dan.* xi. 14). In B. C. 198 Antiochus reappeared in the field and gained a decisive victory "near the sources of the Jordan" (Joseph. *Ant.* xii. 3, 3; Hieron. *l. c.* ubi *Paneas* nunc condita est); and afterwards captured Scopas and the remnant of his forces who had taken refuge in Sidon (Dan. xi. 15). The Jews, who had suffered severely during the struggle (Joseph. *l. c.*), welcomed Antiochus as their deliverer, and "he stood in the glorious land which by his hand was to be consumed" (Dan. xi. 16). His further designs against Egypt were frustrated by the intervention of the Romans; and his daughter Cleopatra (Polyb. xxviii. 17), whom he gave in marriage to Ptol. Epiphanes, with the Phœnician provinces for her dower (Joseph. *Ant.* xii. 4, 1), favored the interests of her husband rather than those of her father (Dan. xi. 17; Hieron. *l. c.*). From Egypt Antiochus turned again to Asia Minor, and after various successes in the Ægæan crossed over to Greece, and by the advice of Hannibal entered on a war with Rome. His victorious course was checked at Thermopylæ (B. C. 191), and after subsequent reverses he was finally defeated at Magnesia in Lydia, B. C. 190.[a] By the peace which was concluded shortly afterwards (B. C. 188) he was forced to cede all his possessions "on the Roman side of

[a] The statement in 1 Macc. viii 6, that Antiochus was taken prisoner by the Romans, is not supported by any other testimony.

Digitized by Google

Mt. Taurus," and to pay in successive installments an enormous sum of money to defray the expenses of the war (15,000 Euboic talents: App. *Syr.* 38). This last condition led to his ignominious death. In B. C. 187 he attacked a rich temple of Belus in Elymais, and was slain by the people who rose in its defense (Strab. xvi. 744; Just. xxxii. 2). Thus "he stumbled and fell, and was not found" (Dan. xi. 19).

The policy of Antiochus towards the Jews was liberal and conciliatory. He not only assured to them perfect freedom and protection in the exercise of their worship, but according to Josephus (*Ant.* xii. 3, 3), in consideration of their great sufferings and services in his behalf, he made splendid contributions towards the support of the temple ritual, and gave various immunities to the priests and other inhabitants of Jerusalem. At the same time imitating the example of Alexander and Seleucus, and appreciating the influence of their fidelity and unity, he transported two thousand families of Jews from Mesopotamia to Lydia and Phrygia, to repress the tendency to revolt which was manifested in those provinces (Joseph. *Ant.* l. c.).

Two sons of Antiochus occupied the throne after him, Seleucus Philopator, his immediate successor, and Antiochus IV., who gained the kingdom upon the assassination of his brother. B. F. W.

ANTI'OCHUS IV. EPIPH'ANES (Ἐπιφανής, *the Illustrious*, also called Θεός, and in mockery ἐπιμανής, *the frantic:* Athen. x. 438; Polyb. xxvi. 10) was the youngest son of Antiochus the Great. He was given as a hostage to the Romans (B. C. 188) after his father's defeat at Magnesia. In B. C. 175 he was released by the intervention of his brother Seleucus, who substituted his own son Demetrius in his place. Antiochus was at Athens when Seleucus was assassinated by Heliodorus. He took advantage of his position, and, by the assistance of Eumenes and Attalus, easily expelled Heliodorus who had usurped the crown, and himself "obtained the kingdom by flatteries" (Dan. xi. 21; cf. Liv. xli. 20), to the exclusion of his nephew Demetrius (Dan. viii. 7).

The accession of Antiochus was immediately followed by desperate efforts of the Hellenizing party at Jerusalem to assert their supremacy. Jason (Jesus: Jos. *Ant.* xii. 5, 1, see JASON), the brother of Onias III., the high priest, persuaded the king to transfer the high priesthood to him, and at the same time bought permission (2 Macc. iv. 9) to carry out his design of habituating the Jews to Greek customs (2 Macc. iv. 7, 20). Three years afterwards Menelaus, of the tribe of Benjamin [SIMON], who was commissioned by Jason to carry to Antiochus the price of his office, supplanted Jason by offering the king a larger bribe and was himself appointed high priest, while Jason was obliged to take refuge among the Ammonites (2 Macc. iv. 23–26). From these circumstances and from the marked honor with which Antiochus was received at Jerusalem very early in his reign (c. B. C. 173; 2 Macc. iv. 22), it appears that he found no difficulty in regaining the border provinces which had been given as the dower of his sister Cleopatra to Ptol. Epiphanes. But his ambition led him still further, and he undertook four campaigns against Egypt, B. C. 171, 170, 169, 168 with greater success than had attended his predecessor, and the complete conquest of the country was prevented only by the interference of the Romans (Dan. xi. 24; 1 Macc. i. 16 ff.; 2 Macc. v 11 ff.). The course of Antiochus was everywhere marked by the same wild prodigality as had signalized his occupation of the throne (Dan. *l. c.*). The consequent exhaustion of his treasury, and the armed conflicts of the rival high priests whom he had appointed, furnished the occasion for an assault upon Jerusalem on his return from his second Egyptian campaign (B. C. 170), which he had probably planned in conjunction with Ptol. Philometor, who was at that time in his power (Dan. xi. 26). The temple was plundered, a terrible massacre took place, and a Phrygian governor was left with Menelaus in charge of the city (2 Macc. v. 1–22; 1 Macc. i. 20–28). Two years afterwards, at the close of the fourth Egyptian expedition (Polyb. xxix. 1, 11; App. *Syr.* 66; cf. Dan. xi. 29, 30), Antiochus detached a force under Apollonius to occupy Jerusalem and fortify it, and at this time he availed himself of the assistance of the ancestral enemies of the Jews (1 Macc. iv. 61, v. 3 ff.; Dan. xi. 41). The decrees then followed which have rendered his name infamous. The Temple was desecrated, and the observance of the law was forbidden. "On the fifteenth day of Cisleu [the Syrians] set up the abomination of desolation (*i. e.* an idol altar: v. 59) on the altar" (1 Macc. i. 54). Ten days afterwards an offering was made upon it to Jupiter Olympius. At Jerusalem all opposition appears to have ceased; but Mattathias and his sons organized a resistance ("holpen with a little help," Dan. xi. 34), which preserved inviolate the name and faith of Israel. Meanwhile Antiochus turned his arms to the East, towards Parthia (Tac. *Hist.* v. 8) and Armenia (App. *Syr.* 45; Diod. ap. Müller, *Fragm.* ii. p. 10; Dan. xi. 40). Hearing not long afterwards of the riches of a temple of Nanæa ("the desire of women," Dan. xi. 37) in Elymais, hung with the gifts of Alexander, he resolved to plunder it. The attempt was defeated; and though he did not fall like his father in the act of sacrilege, the event hastened his death. He retired to Babylon, and thence to Tabæ in Persia, where he died B. C. 164, the victim of superstition, terror, and remorse (Polyb. xxxi. 2; Joseph. *Ant.* xii. 8, 1 ff.), having first heard of the successes of the Maccabees in restoring the temple-worship at Jerusalem (1 Macc. vi. 1–16; cf. 2 Macc. i. 7–17?) "He came to his end and there was none to help him" (Dan. xi. 45). Cf. App. *Syr.* 45; Liv. xli 24–5, xlii. 6, xliv. 19, xlv. 11–13; Joseph. *Ant.* xii 5, 8.

The reign of Antiochus, thus shortly traced, was the last great crisis in the history of the Jews be

fore the coming of our Lord. The prominence which is given to it in the book of Daniel fitly accords with its typical and representative character (Dan. vii. 8, 25, viii. 11 ff.). The conquest of Alexander had introduced the forces of Greek thought and life into the Jewish nation, which was already prepared for their operation [ALEXANDER]. For more than a century and a half these forces had acted powerfully both upon the faith and upon the habits of the people; and the time was come when an outward struggle alone could decide whether Judaism was to be merged in a rationalized Paganism, or to rise not only victorious from the conflict, but more vigorous and more pure. There were many symptoms which betokened the approaching struggle. The position which Judæa occupied on the borders of the conflicting empires of Syria and Egypt, exposed equally to the open miseries of war and the treacherous favors of rival sovereigns, rendered its national condition precarious from the first, though these very circumstances were favorable to the growth of freedom. The terrible crimes by which the wars of "the North and South" were stained, must have alienated the mind of every faithful Jew from his Grecian lords, even if persecution had not been superadded from Egypt first and then from Syria. Politically nothing was left for the people in the reign of Antiochus but independence, or the abandonment of every prophetic hope. Nor was their social position less perilous. The influence of Greek literature, of foreign travel, of extended commerce, had made itself felt in daily life. At Jerusalem the mass of the inhabitants seem to have desired to imitate the exercises of the Greeks; and a Jewish embassy attended the games of Hercules at Tyre (2 Macc. iv. 9–20). Even their religious feelings were yielding; and before the rising of the Maccabees no opposition was offered to the execution of the king's decrees. Upon the first attempt of Jason the "priests had no courage to serve at the altar" (2 Macc. iv. 14; cf. 1 Macc. i. 43); and this not so much from willful apostasy, as from a disregard to the vital principles involved in the conflict. Thus it was necessary that the final issues of a false Hellenism should be openly seen, that it might be discarded forever by those who cherished the ancient faith of Israel.

The conduct of Antiochus was in every way suited to accomplish this end; and yet it seems to have been the result of passionate impulse rather than of any deep-laid scheme to extirpate a strange creed. At first he imitated the liberal policy of his predecessors; and the occasion for his attacks was furnished by the Jews themselves. Even the motives by which he was finally actuated were personal, or at most only political. Able, energetic, (Polyb. xxvii. 17) and liberal to profusion, Antiochus was reckless and unscrupulous in the execution of his plans. He had learnt at Rome to court power and to dread it. He gained an empire, and he remembered that he had been a hostage. Regardless himself of the gods of his fathers (Dan. xi. 37), he was incapable of appreciating the power of religion in others; and like Nero in later times he became a type of the enemy of God, not as the Roman emperor by the perpetration of unnatural crimes, but by the disregard of every higher feeling. "He magnified himself above all." The real deity whom he recognized was the human war-god, and fortresses were his most sacred temples (Dan. xi. 38 ff.; Ewald, *Gesch. des Volkes Isr.* iv. 340) Confronted with such a persecutor the Jew realized the spiritual power of his faith. The evils of heathendom were seen concentrated in a personal shape. The outward forms of worship became in-

Tetradrachm (Attic talent) of Antiochus IV Epiphanes.

vested with something of a sacramental dignity Common life was purified and ennobled by heroic devotion. An independent nation asserted the integrity of its hopes in the face of Egypt, Syria, and Rome. B. F. W.

ANTI'OCHUS V. EU'PATOR (Εὐπάτωρ, *of noble descent*), succeeded his father Antiochus IV. B. C. 164, while still a child, under the guardianship of Lysias (App. *Syr.* 46; 1 Macc. iii. 32 f., vi. 17). though Antiochus had assigned this office to Philip his own foster-brother on his death-bed (1 Macc. vi. 14 f., 55; 2 Macc. ix. 29). Shortly after his accession he marched against Jerusalem with a large army, accompanied by Lysias, to relieve the Syrian garrison, which was hard pressed by Judas Maccabæus (1 Macc. vi. 19 ff.). He repulsed Judas at Bethzacharia, and took Bethsura (Bethzur) after a vigorous resistance (1 Macc. vi. 31–50). But when the Jewish force in the temple was on the point of yielding, Lysias persuaded the king to conclude a hasty peace that he might advance to meet Philip, who had returned from Persia and made himself master of Antioch (1 Macc. vi. 51 ff.; Joseph. *Ant.* xii. 9, 5 f.). Philip was speedily overpowered (Joseph. *l. c.*); but in the next year (B. C. 162) Antiochus and Lysias fell into the hands of Demetrius Soter, the son of Seleucus Philopator, who caused them to be put to death in revenge for the wrongs which he had himself suffered from Antiochus Epiphanes (1 Macc. vii. 2–4; 2 Macc. xiv. 1, 2; Joseph. *Ant.* xii. 10, 1; Polyb. xxxi. 19). B. F. W.

ANTI'OCHUS VI. (Ἀλέξανδρος Ἀλεξάνδρου τοῦ νόθου, App. *Syr.* 68; surnamed Θεός Joseph. *Ant.* xiii. 7, 1; and ἐπιφανὴς Διόνυσος on coins), was the son of Alexander Balas and Cleopatra (App. *Syr.* l. c.). After his father's death (146 B. C.) he remained in Arabia; but though still a child (παιδίον, App. *l. c.*, παιδάριον νεώτερον, 1 Macc. xi. 54), he was soon afterwards brought forward (c. 145 B. C.) as a claimant to the throne of Syria against Demetrius Nicator by Tryphon or Diodotus (1 Macc. xi. 39; App. *Syr.* 68; Strab. xiv. p. 668; xvi. p. 752), who had been an officer of his father. Tryphon succeeded in gaining Antioch (1 Macc. xi. 56); and afterwards the greater part of Syria submitted to the young Antiochus. Jonathan, who was confirmed by him in the high priesthood (1 Macc. xi. 57) and invested with the government of Judæa, contributed greatly to his

Obv.: Head of King, radiate, to right. Rev.: ΒΑΣΙΛΕΩΣ ΑΝΤΙΟΧΟΥ ΕΠΙΦΑΝΟΥΣ ΔΙΟΝΥΣΟΥ. In field, ΤΡΥΦ (Tryphon), and date ΘΞΡ (169 Æra Seleucid.).

success [ALEXANDER BALAS], occupying Ascalon and Gaza, and reducing the country as far as Damascus (1 Macc. xi. 60–2). He afterwards defeated the troops of Demetrius at Hazor (1 Macc. xi. 67) near Cadesh (v. 73); and repulsed a second attempt which he made to regain Palestine (1 Macc. xii. 24 ff.). Tryphon having now gained the supreme power in the name of Antiochus, no longer concealed his design of usurping the crown. As a first step he took Jonathan by treachery and put him to death, B. C. 143 (1 Macc. xii. 40 ff.); and afterwards murdered the young king, and ascended the throne (1 Macc. xiii. 31; Joseph. *Ant.* xiii. 5, 6; App. *Syr.* 68. Livy (*Epit.* 55) says incorrectly *decem annos admodum habens* Diod. ap. Müller, *Fragm.* ii. 19. Just. xxxvi. 1).

B. F. W.

ANTI'OCHUS VII. SIDETES (Σιδήτης, *of Side*, in Pamphylia: not from צַיִד, *a hunter*: Plut. *Apophth.* p. 34; called also Εὐσεβής, *the pious*, Joseph. *Ant.* xiii. 8, 2; Euseb. *Chron. Arm.* i. 349), king of Syria, was the second son of Demetrius I. When his brother, Demetrius Nicator, was taken prisoner (c. 141 B. C.) by Mithridates I. (Arsaces VI., 1 Macc. xiv. 1) king of Parthia, he married his wife Cleopatra (App. *Syr.* 68; Just. xxxvi. 1), and obtained possession of the throne (137 B. C.), having expelled the usurper Tryphon (1 Macc. xv. 1 ff.; Strab. xiv. p. 668). At first he made a very advantageous treaty with Simon, who was now "high-priest and prince of the Jews," but when he grew independent of his help, he withdrew the concessions which he had made and demanded the surrender of the fortresses which the Jews held, or an equivalent in money (1 Macc. xv. 26 ff.; Joseph. *Ant.* xiii. 7, 3). As Simon was unwilling to yield to his demands, he sent a force under Cendebæus against him, who occupied a fortified position at Cedron (? 1 Macc. xv. 41), near Azotus, and harassed the surrounding country. After the defeat of Cendebæus by the sons of Simon and the destruction of his works (1 Macc. xvi. 1–10), Antiochus, who had returned from the pursuit of Tryphon, undertook an expedition against Judæa in person. He laid siege to Jerusalem, but according to Josephus granted honorable terms to John Hyrcanus (B. C. 133), who had made a vigorous resistance (Joseph. *Ant.* xiii. 8; yet comp. Porphyr. ap Euseb. *Chron. Arm.* i. 349, *muros urbis demolitur atque electissimos eorum trucidat*). Antiochus next turned his arms against the Parthians, and Hyrcanus accompanied him in the campaign. But, after some successes, he was entirely defeated by Phraortes II. (Arsaces VII.) and fell in the battle c. B. C. 127–6 (Joseph. *l. c.*; Just. xxxvi., xxxviii. 10; App. *Syr.* 68, ἔκτεινεν ἑαυτόν. For the year of his death cf. Niebuhr, *Kl. Schrift.* i 251 f.; Clinton, *F. H.* ii. 332 ff.).

B. F. W.

ANTIPAS ('Αντίπας: *Antipas*). A martyr at Pergamos, and, according to tradition, bishop of that place (Rev. ii. 13). He is said to have suffered martyrdom in the reign of Domitian by being cast into a burning brazen bull (*Menol. Gr.* iii. 51). His day in the Greek calendar is April 11.

W. A. W.

ANTIPAS. [HEROD.]

ANTIPATER ('Αντίπατρος: *Antipater*), son of Jason, ambassador from the Jews to the Lacedæmonians (1 Macc. xii. 16, xiv. 22).

ANTIPATRIS ('Αντιπατρις). Our means of identifying this town are due, partly to the fortunate circumstance that the old Semitic name of the place has lingered among the present Arabic population, and partly to a journey specially undertaken by Dr. Eli Smith, for the purpose of illustrating the night march of the soldiers who conveyed St. Paul from Jerusalem to Cæsarea (Acts xxiii. 31). Dr. Robinson was of opinion, when he published his first edition, that the road which the soldiers took on this occasion led from Jerusalem to Cæsarea by the pass of *Beth-Horon*, and by Lydda, or Diospolis. This is the route which was followed by Cestius Gallus, as mentioned by Josephus (*B. J.* ii. 19, § 1); and it appears to be identical with that given in the Jerusalem Itinerary, according to which Antipatris is 42 miles from Jerusalem, and 26 from Cæsarea. Even on this supposition it would have been quite possible for troops leaving Jerusalem on the evening of one day, to reach Cæsarea on the next, and to start thence after a rest, to return to (it is not said that they arrived at) their quarters at Jerusalem before nightfall. But the difficulty is entirely removed by Dr. Smith's discovery of a much shorter road, leading by Gophna direct to Antipatris. On this route he met the Roman pavement again and again, and indeed says "he does not remember observing anywhere before so extensive remains of a Roman road." (See *Bibl. Sacra*, vol. i. pp. 478–498; *Life and Epistles of St. Paul*, vol. ii. pp. 330–334, 2d ed.)

It may be difficult to fix the precise spot where the ancient city stood, but the Arabic name, *Kefr-Saba*, determines the general situation. Josephus tells us that the old name was Capharsaba (Καφαρσάβα or Χαβαρζάβα), and that Herod, when he rebuilt the city, changed it to Antipatris, in honor of his father Antipater (*Ant.* xiii. 15, § 1, xvi. 5, § 2; *B. J.* i. 21, § 9). The position of Kefr-Saba is in sufficient harmony with what the Jewish historian says of the position of Antipatris, which he describes as a well-watered and well-wooded plain, near a hilly ridge, and with his notices of a trench dug from thence for military purposes to the sea near Joppa, by one of the Asmonean princes (*Ant.* xiii. 15, § 1; *B. J.* i. 4, § 7). At a later period he mentions the place again in connection with a military movement of Vespasian from Cæsarea towards Jerusalem (*B. J.* ix. 8, § 1). No remains of ancient Antipatris have been found; but the ground has not been fully explored.

ANTO'NIA, a fortress built by Herod on the site of the more ancient Baris, on the N. W. of the Temple, and so named by him after his friend Antonius. [JERUSALEM.] The word nowhere occurs in the Bible. [The fortress is referred to, however, in Acts xxi. 31 ff.]

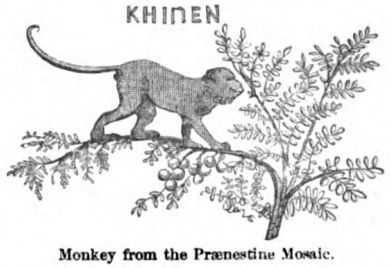
ANTOTHI'JAH (עֲנְתֹתִיָּה [*answers of Jehovah*]: Ἀναθὼθ καὶ Ἰαθίν; [Vat. Ανωθαιθ και Ιαθειν;] Alex. Αναθωθια: *Anathothia*). A Benjamite, one of the sons of Shashak (1 Chr. viii. 24). W. A. W.

AN'TOTHITE, THE (הָעֲנָתֹתִי: ὁ Ἀναθαθί [Vat. -θει; Comp. ὁ Ἀναθωθίτης:] *Anthothites, Anathotites*). A native of ANATHOTH (1 Chr. xi. 28, xii. 3). W. A. W.

A'NUB (עָנוּב [*bound together*]: Ἐνώβ; [Vat. Εννων;] Alex. Εγγωβ; [Comp. Ἀνώβ:] *Anob*). Son of Coz, and descendant of Judah, through Ashur the father of TEKOA (1 Chr. iv. 8). W. A. W.

A'NUS (Ἀννιούθ; [Alex. Αννους; Ald. Ἀνούς:] *Banæus*), a Levite (1 Esdr. ix. 48). [BANI.]

APA'ME (Ἀπάμη: *Apeme*), concubine of Darius [and daughter of Bartacus] (1 Esdr. iv. 29).



APELLES (Ἀπελλῆς), a Christian saluted by St. Paul in Rom. xvi. 10, and honored by the designation δόκιμος ἐν Χριστῷ. Origen (*in loc.*) suggests that he may have been identical with Apollos; but there seems no ground for supposing it, and we learn from Horace (*Sat.* i. 5, 100) that Apella was a common name among the Jews. Tradition makes him bishop of Smyrna, or Heraclea (Fabric. *Lux Evangel.* p. 116). H. A.

APES (קוֹפִים, *Kôphîm*: πίθηκοι: *simiæ*) occur in 1 K. x. 22, "once in three years came the navy of Tharshish, bringing gold, and silver, ivory, and apes, and peacocks," and in the parallel passage of 2 Chr. ix. 21. The Vat. version [edition] of the LXX. in the first-mentioned passage omits the words "ivory, and apes, and peacocks," while the Alex. version [edition] has them; but both these versions have the words in the passage of the book of Chronicles.

For some attempts to identify the various kinds of Quadrumana which were known to the ancients, see A. A. H. Lichtenstein's work, entitled *Commentatio philologica de Simiarum quotquot veteribus innotuerunt formis* (Hamb. 1791); and Ed. Tyson's *Homo sylvestris, or the Anatomy of a Pigmie* (Lond. 1699), to which he has added a Philosophical Essay concerning the Cynocephali, the Satyrs, and Sphinges of the ancients. Aristotle (*De Anim. Hist.* ii. 5, ed. Schneider) appears to divide the Quadrumana order of Mammalia into three tribes, which he characterizes by the names, πίθηκοι, κῆβοι, and κυνοκέφαλοι. The last-named family are no doubt identical with the animals that form the African genus *Cynocephalus* of modern zoologists. The κῆβοι Aristotle distinguishes from the πίθηκοι, by the fact of the former possessing a tail. This name, perhaps, may stand for the whole tribe of tailed monkeys, excluding the *Cynocephali* and the *Lemuridæ*, which latter, since they belong to the island of Madagascar, were probably wholly unknown to the ancients.

The πίθηκοι, therefore, would stand as the representative of the tailless apes, such as the Chimpanzee, &c. Although, however, Aristotle perhaps used these terms respectively in a definite sense, it by no means follows that they are so employed by other writers. The name πίθηκοι, for instance, seems to have been sometimes used to denote some species of Cynocephalus (see a Fragment of Simonides in Schneider's *Annot. ad Arist. Hist. Anim.* iii. 76). The LXX. use of the word was in all probability used in an extended sense as the representative of the Hebrew word *Kôph*, to denote any species of Quadrumanous Mammalia; Lichtenstein conjectures that the Hebrew word represents some kind of Diana monkeys, perhaps, *Cercopithecus Diana*; but as this species is an inhabitant of Guinea, and unknown in Eastern Africa, it is not at all probable that this is the animal denoted.

In the engraving which represents the Lithostrotum Prænestinum (that curious mosaic pavement found at Præneste), in Shaw's *Travels* (ii 294, 8vo ed.), is to be seen the figure of some animal in a tree, with the word KHIIIEN over it. Of this animal Dr. Shaw says (312), "It is a beautiful little creature, with a shaggy neck like the *Callithrix*, and shaped exactly like those monkeys that are commonly called Marmosets. The KHIIIEN may therefore be the Ethiopian monkey, called by the Hebrews *Koph*, and by the Greeks ΚΗΠΟΣ, ΚΗΦΟΣ, or ΚΕΙΠΟΣ, from whence the Latin

Monkey from the Prænestine Mosaic.

name *Cephus*." This description will be found to apply better to the figure in the 4to ed. of Dr. Shaw's *Travels* than to that in the 8vo ed. Perhaps, as Col. Hamilton Smith has suggested, the *Keipen* of the Prænestine mosaic may be the *Cercopithecus griseo-viridis*, Desmar., which is a native of Nubia, the country represented in that part of the mosaic where the figure of the *keipen* occurs. It cannot represent any species of *marmoset*, since the members of that group of Quadrumana are peculiar to America. In all probability, as has been stated above, the *kôph* of the Bible is not intended to refer to any one particular species of ape.*

Solomon was a naturalist, and collected everything that was curious and beautiful; and if, as Sir E. Tennent has very plausibly argued, the ancient Tarshish is identical with Pt de Galle, or some seaport of Ceylon, it is not improbable that the *kôphîm* which the fleet brought to Solomon were some of the monkeys from that country, which, according to Sir E. Tennent, are comprised, with the exception of the graceful *rilawa* (*Macacus pileatus*), under the Wanderer group of Quadrumana There can be little doubt but that the *kôphîm* were brought from the same country which supplied ivory and peacocks; both of which are common in

* The use of the word *ape* is generally now understood in a restricted sense to apply to the *tailless* Quadrumana.

Digitized by Google

Ceylon; and Sir E. Tennent has drawn attention to the fact that the Tamil names for apes, ivory, and peacocks are identical with the Hebrew.[a]

Dr. Krapf (*Trav. in E. Africa*, p. 518), believing Ophir to be on the E. African coast, thinks Solomon wished to obtain specimens of the Guresa (*Colobus*).

It is very probable that some species of baboons are signified by the term *Satyrs*, which occurs in the A. V. in the prophet Isaiah. [SATYR.] The English versions of 1550 and 1574 [Bishops' Bible] read (Is. xiii. 21), where the A. V. has "satyrs shall dance there," — "apes shall daunce there." The ancients were no doubt acquainted with many kinds of Quadrumana, both of the tailed and tailless kinds (see Plin. viii. c. 19, xi. 44; Ælian. *Nat. An.* xvii. 25, 39; Strab. xvii. p. 827; Bochart, *Hieroz.* ii. 398); cf. Mart. *Epig.* iv. 12: —

"Si mihi cauda foret cercopithecus ero."

APHAR'SATHCHITES, APHAR'SITES, APHAR'SACHITES (אֲפַרְסַתְכָיֵא, אֲפַרְסָיֵא, אֲפַרְסָכָיֵא: Αφαρσαθαχαῖοι, Αφαρσαῖοι. Αφαρσαχαῖοι; [Vat. in Ezr. iv., Φαρεσθαχαιοι, Αφρασαιοι; Ezr. v., Αφαρσαχ:] *Apharsathachæi*, [*Arphasæi*,] *Arphasachæi*, [*Apharsuchæi*]), the names of certain tribes, colonies from which had settled in Samaria under the Assyrian leader Asnappar (Ezr. iv. 9, v. 6, [vi. 6]). The first and last are regarded as the same. Whence these tribes came is entirely a matter of conjecture: the initial א is regarded as *prosthetic:* if this be rejected, the remaining portion of the first two names bears some resemblance (a very distant one, it must be allowed) to Parætacæ, or Parætaceni, significant of *mountaineers*, applied principally to a tribe living on the borders of Media and Persia; while the second has been referred to the Parrhasii, and by Gesenius to the Persæ, to which it certainly bears a much greater affinity, especially in the prolonged form of the latter name found in Dan. vi. 28 (פָּרְסָיֵא). The presence of the proper name of the Persians in Ezr. i. 1, iv. 3, must throw some doubt upon Gesenius's conjecture; but it is very possible that the *local* name of the tribe may have undergone alteration, while the official and general name was correctly given. W. L. B.

A'PHEK (אֲפֵק, from a root signifying tenacity or firmness, Ges.; Αφέκ: [*Aphec*]), the name of several places in Palestine.

1. [Rom. Οφέκ; Vat. om.] A royal city of the Canaanites, the king of which was killed by Joshua (Josh. xii. 18). As this is named with Tappuah and other places in the mountains of Judah, it is very probably the same as the Aphekah of Josh. xv. 53.

2. [In Josh. xiii., Vat. Ταφεκ; Ald. Alex. Αφεκά; Comp. Αφεκκά: *Apheca.*] A city, apparently in the extreme north of Asher (Josh. xix. 30), from which the Canaanites were not ejected (Judg. 31: though here it is Aphik, אֲפִיק). This is probably the same place as the Aphek (Josh. xiii. 4), on the extreme north "border of the Amorites," and apparently beyond Sidon, and which is identified by Gesenius (*Thes.* 140 *a*) with the Aphaca of classical times, famous for its temple of Venus, and now *Afka* (Rob. iii. 606; Porter, ii. 395–6). *Afka* however, lies beyond the ridge of Lebanon, on the north-western slopes of the mountain, and consequently much further up than the other towns of Asher which have been identified. On the other hand it is hardly more to the north of the known limits of the tribe, than Kadesh and other places named as in Judah were to the south; and Aphek may, like many other sanctuaries, have had a reputation at a very early date, sufficient in the days of Joshua to cause its mention in company with the other northern sanctuary of Baal-gad.

3. (With the article, הָאֲפֵק), a place at which the Philistines encamped, while the Israelites pitched in Eben-ezer, before the fatal battle in which the sons of Eli were killed and the ark taken (1 Sam. iv. 1). This would be somewhere to the N. W. of, and at no great distance from, Jerusalem.

4. The scene of another encampment of the Philistines, before an encounter not less disastrous than that just named, — the defeat and death of Saul (1 Sam. xxix. 1). By comparison with ver. 11, it seems as if this Aphek were not necessarily near Shunem, though on the road thither from the Philistine district. It is possible that it may be the same place as the preceding; and if so, the Philistines were marching to Jezreel by the present road along the "backbone" of the country.

5. [In 1 K. Αφεκά.] A city on the military road from Syria to Israel (1 K. xx. 26). It was walled (30), and was apparently a common spot for engagements with Syria (2 K. xiii. 17; with the article). The use of the word הַמִּישׁוֹר (A. V. "the plain") in 1 K. xx. 25, fixes the situation of A. to have been in the level down-country east of the Jordan [MISHOR]; and there, accordingly, it is now found in *Fik*, at the head of the *Wady Fik*, 6 miles east of the Sea of Galilee, the great road between Damascus, *Nâbulus*, and Jerusalem, still passing (Kiepert's map, 1857), with all the permanence of the East, through the village, which is remarkable for the number of inns that it contains (Burckh. p. 280). By Josephus (viii. 14, § 4) the name is given as Αφεκά. Eusebius (*Onom.* Αφεκά) says that in his time there was, beyond Jordan, a κώμη μεγάλη (Jer. castellum grande) called Apheca by (περί) Hippes (Jer. Hippus); but he apparently confounds it with 1. Hippos was one of the towns which formed the Decapolis. *Fik*, or *Feik*, has been visited by Burckhardt, Seetzen, and others (Ritter, *Pal.* pp. 348–353), and is the only one of the places bearing this name that has been identified with certainty. G.

APHE'KAH (אֲפֵקָה: Φακουά; [Alex. Ald. Comp. Αφακά:] *Apheca*), a city of Judah, in the mountains (Josh. xv. 53), probably the same as APHEK 1.

APHE'REMA (Αφαίρεμα; [Alex. Αφερεμα;] Αφερειμά, Jos.), one of the three "governments" (νόμους) added to Judæa from Samaria (and Galilee, x. 30) by Demetrius Soter, and confirmed by Nicanor (1 Macc. xi. 34) (see Jos. *Ant.* xiii. 4, § 9, and Reland, p. 178). The word is

[a] קוֹף appears to be a word of foreign origin, allied to the Sanskrit and Malabar *kapi*, which perhaps = *swift, nimble*, whence the German *affe* and the English *ape*, the initial aspirate being drowned. Gesenius illustrates this derivation by comparing the Latin *amare* from Sanskr. *kam*.

Digitized by Google

omitted in the Vulgate. It is probably the same as Ephraim (Ophrah, *Tayyibeh*).

APHER'RA ('Αφερρά: *Eurra*) one of the [sons of the] "servants of Solomon" [who returned with Zerubbabel] (1 Esdr. v. 34). [His name is not found in the parallel lists of Ezra and Nehemiah.]

APHI'AH (אֲפִיחַ [*refreshed*]. Αφέκ; [Alex. Αφιχ:] *Aphia*), name of one of the forefathers of King Saul (1 Sam. ix. 1).

A'PHIK (אֲפִיק: [Ναΐ; Vat. Ναει; Alex. Ναφεκ; Ald. Comp. 'Αφέκ:] *Aphec*), a city of Asher from which the Canaanites were not driven out (Judg. i. 31). Probably the same place as APHEK 2.

APH'RAH, the house of (בֵּית לְעַפְרָה) [*the fawn*], a place mentioned in Mic. i. 10, and supposed by some (Winer, 172) to be identical with Ophrah. But this can hardly be, inasmuch as all the towns named in the context are in the low country to the west of Judah, while Ophrah would appear to lie E. of Bethel [OPHRAH]. The LXX. translate the word *ἐξ οἴκου κατὰ γέλωτα* [Vulg. *in domo pulveris*]. G.

* According to the analogy of other similar compound names the translators of the A. V. might have written Beth Leaphrah for Aphrah. The ל here is sign of the genitive. If the name be the same as Ophrah (it may be different as there is some evidence of an Aphrah near Jerusalem) it is written עֲפָרָה in Mic. i. 10, instead of עָפְרָה, so as more readily to suggest עָפָר, *dust*, in conformity with the expression which follows: "In Ashe" (as we should say in English) "roll thyself in ashes." See Pusey's *Minor Prophets*, iii. 300. H.

APH'SES (הַפְּצֵץ [*the dispersion*]: 'Αφεσή; [Ald. Alex. 'Αφεσσῆ:] *Aphses*), chief of the 18th of the 24 courses in the service of the Temple (1 Chr. xxiv. 15).

APOC'ALYPSE. [REVELATION.]

APOC'RYPHA (Βιβλία 'Απόκρυφα). The collection of Books to which this term is popularly applied includes the following. The order given is that in which they stand in the English version.

I. 1 Esdras.
II. 2 Esdras.
III. Tobit.
IV. Judith.
V. The rest of the chapters of the Book of Esther, which are found neither in the Hebrew nor in the Chaldee.
VI. The Wisdom of Solomon.
VII. The Wisdom of Jesus the Son of Sirach, or Ecclesiasticus.
VIII. Baruch.
IX. The Song of the Three Holy Children.
X. The History of Susanna.
XI. The History of the destruction of Bel and the Dragon.
XII. The Prayer of Manasseh, king of Judah.
XIII. 1 Maccabees.
XIV. 2 Maccabees.

The separate books of this collection are treated of in distinct articles. Their relation to the canonical books of the Old Testament is discussed under CANON. In the present article it is proposed to consider: — I. The meaning and history of the word. II. The history and character of the collection as a whole in its relation to Jewish literature.

I. The primary meaning of *ἀπόκρυφος*, "hidden, secret" (in which sense it is used in Hellenistic as well as classical Greek, cf. Ecclus. xxiii. 19; Luke viii. 17; Col. ii. 3), seems, towards the close of the 2d century, to have been associated with the signification "spurious," and ultimately to have settled down into the latter. Tertullian (*de Anim.* c. 2) and Clement of Alexandria (*Strom.* i. 19, 69, iii. 4, 29) apply it to the forged or spurious books which the heretics of their time circulated as authoritative. The first passage referred to from the Stromata, however, may be taken as an instance of the transition stage of the word. The followers of Prodicus, a Gnostic teacher, are said there to boast that they have *βίβλους ἀποκρύφους* of Zoroaster. In Athanasius (*Ep. Fest.* vol. ii. p. 38; *Synopsis Sac. Script.* vol. ii. p. 154, ed. Colon. 1686), Augustine (*c. Faust.* xi. 2, *de Civ. Dei*, xv. 23), Jerome (*Ep. ad Lætum*, and *Prol. Gal.*) the word is used uniformly with the bad meaning which had become attached to it. The writers of that period, however, do not seem to have seen clearly *how* the word had acquired this secondary sense; and hence we find conjectural explanations of its etymology. The remark of Athanasius (*Synops. S. Script.* l. c.) that such books are *ἀποκρυφῆς μᾶλλον ἢ ἀναγνώσεως ἄξια* is probably meant rather as a play upon the word than as giving its derivation. Augustine is more explicit: "Apocryphæ nuncupantur eo quod earum occulta origo non claruit patribus" (*de Civ. Dei*, l. c.). "Apocryphi non quod habendi sunt in aliqua auctoritate secretâ sed quia nullâ testificationis luce declarati, de nescio quo secreto, nescio quorum præsumtione prolati sunt" (*c. Faust.* l. c.). Later conjectures are (1), that given by the translation of the English Bible (ed. 1539, Pref. to Apocr.), "because they were wont to be read not openly and in common, but as it were in secret and apart;" (2) one, resting on a misapprehension of the meaning of a passage in Epiphanius (*de Mens. ac Pond.* c. 4) that the books in question were so called because, not being in the Jewish canon, they were excluded *ἀπὸ τῆς κρυπτῆς* from the ark in which the true Scriptures were preserved; (3) that the word *ἀπόκρυφα* answers to the Heb גְּנוּזִים, *libri absconditi*, by which the later Jews designated those books which, as of doubtful authority or not tending to edification, were not read publicly in the synagogues; (4) that it originates in the *κρυπτά* or secret books of the Greek mysteries. Of these it may be enough to say, that (1) is, as regards some of the books now bearing the name, at variance with fact; that (2), as has been said, rests on a mistake; that (3) wants the support of direct evidence of the use of *ἀπόκρυφα* as the translation for the Hebrew word, and that (4), though it approximates to what is probably the true history of the word, is so far only a conjecture. The data for explaining the transition from the neutral to the bad meaning, are to be found, it is believed, in the quotations already given, and in the facts connected with the books to which the epithet was in the first instance applied. The language of Clement implies that it was not altogether disclaimed by those of whose books he uses it. That of Athanasius is in the tone of a man who is convicting his opponents out of their own mouth. Augustine implicitly admits that a "se

Digitized by Google

meta auctoritas" had been claimed for the writings to which he ascribes merely an "occulta origo." All these facts harmonize with the belief that the use of the word as applied to special books originated in the claim common to nearly all the sects that participated in the Gnostic character, to a secret esoteric knowledge deposited in books which were made known only to the initiated. It seems not unlikely that there is a reference in Col. ii. 3 to the pretensions of such teachers. The books of our own Apocrypha bear witness both to the feeling and the way in which it worked. The inspiration of the Pseudo-Esdras (2 Esdr. xiv. 40–47) leads him to dictate 204 books, of which the 70 last are to be "delivered only to such as are wise among the people." Assuming the var. lect. of 94 in the Arabic and Ethiopian versions to be the true reading, this indicates the way in which the secret books, in which was the "spring of understanding, the fountain of wisdom, and the stream of knowledge," were set up as of higher value than the twenty-four books acknowledged by the Jewish canon, which were for "the worthy and unworthy alike." It was almost a matter of course that these secret books should be pseudonymous, ascribed to the great names in Jewish or heathen history that had become associated with the reputation of a mysterious wisdom. So books in the existing Apocrypha bear the names of Solomon, Daniel, Jeremiah, Ezra. Beyond its limits the creation of spurious documents took a yet bolder range, and the list given by Athanasius[a] (*Synops. S. Script.*) shows at once the variety and extent of the mythical literature which was palmed off upon the unwary as at once secret and sacred.

Those whose faith rested on the teaching of the Christian Church, and who looked to the O. T. Scriptures either in the Hebrew or the LXX. collection, were not slow to perceive that these productions were destitute of all authority. They applied in scorn what had been used as a title of honor. The *secret* book (*libri secretiores*, *Orig. Comm. in Matt.* ed. Lomm. iv. p. 237) was rejected as *spurious*. The word Apocryphal was degraded to the position from which it has never since risen. So far as books like the Testaments of the Twelve Patriarchs and the Assumption of Moses were concerned, the task of discrimination was comparatively easy, but it became more difficult when the question affected the books which were found in the LXX. translation of the Old Testament and recognized by the Hellenistic Jews, but were not in the Hebrew text or in the Canon acknowledged by the Jews of Palestine. The history of this difficulty, and of the manner in which it affected the reception of particular books, belongs rather to the subject of CANON than to that of the present article, but the following facts may be stated as bearing on the application of the word. (1.) The teachers of the Greek and Latin Churches, accustomed to the use of the Septuagint or versions resting on the same basis, were naturally led to quote freely and reverently from all the books which were incorporated in it. In Clement of Alexandria, Origen, Athanasius, *e. g.*, we find citations from the books of the present Apocrypha, as "Scripture," "divine Scripture," "prophecy." They are very far from applying the term ἀπόκρυφος to these writings. If they are conscious of the difference between them and the other books of the O. T., it is only so far as to lead them (cf. Athan. *Synops. S. Script.* l. c., to place the former in the list of οὐ κανονιζόμενα, ἀντιλεγόμενα, books which were of more use for the ethical instruction of catechumens than for the edification of mature Christians. Augustine, in like manner, applies the word "Apocrypha" only to the spurious books with false titles which were in circulation among heretics, admitting the others, though with some qualifications, under the title of Canonical (*de doctr. Chr.* ii. 8). (2.) Wherever, on the other hand, any teacher came in contact with the feelings that prevailed among the Christians of Palestine, there the influence of the rigorous limitation of the old Hebrew canon is at once conspicuous. This is seen in its bearing on the history of the Canon in the list given by Melito, bishop of Sardis (Euseb. *H. E.* iv. 26), and obtained by him from Palestine. Of its effects on the application of the word, the writings of Cyril of Jerusalem and Jerome give abundant instances. The former (*Catech.* iv. 33) gives the canonical list of the 22 books of the O. T. Scriptures, and rejects the introduction of all "apocryphal" writings. The latter in his Epistle to Læta warns the Christian mother in educating her daughter against "omnia apocrypha." The *Prologus Galeatus* shows that he did not shrink from including under that title the books which formed part of the Septuagint, and were held in honor in the Alexandrian and Latin Churches. In dealing with the several books he discusses each on its own merits, admiring some, speaking unhesitatingly of the "dreams," "fables" of others. (3.) The teaching of Jerome influenced, though not decidedly, the language of the Western Church. The old spurious heretical writings, the "Apocrypha" of Tertullian and Clement, fell more and more into the background, and were almost utterly forgotten. The doubtful books of the Old Testament were used publicly in the service of the Church, quoted frequently with reverence as Scripture, sometimes however with doubts or limitations as to the authority of individual books according to the knowledge or critical discernment of this or that writer (cf. Bp. Cosin's *Scholastic History of the Canon*). During this period the term by which they were commonly described was not "apocryphal" but "ecclesiastical." So they had been described by Rufinus (*Expos. in Symb. Apost.* p. 26), who practically recognized the distinction drawn by Jerome, though he would not use the more opprobrious epithet of books which were held in honor: "libri qui non canonici sed Ecclesiastici a majoribus appellati sunt" "quæ omnia (the contents of these books) legi quidem in Ecclesiis voluerunt non tamen proferri ad auctoritatem ex his fidei confirmandam. Cæteras vero scripturas apocryphas nominarunt quas in Ecclesiis legi noluerunt:" and this offered a *mezzo termine* between the language of Jerome and that of Augustine, and as such found favor. (4.) It was reserved for the age of the Reformation to stamp the word Apocrypha with its present signification. The two views which had hitherto existed together, side by side, concerning which the Church had pronounced no authoritative

[a] The books enumerated by Athanasius, besides writings falsely ascribed to authors of canonical books, as Zephaniah, Habakkuk, Ezekiel, and Daniel, included "those which have the names of Enoch, of the Patriarchs, of Zechariah the father of the Baptist, the Prayer of Joseph, the Testament (διαθήκη) and Assumption of Moses, Abraham, Eldad and Modad, and Elijah."

Digitized by Google

decision, stood out in sharper contrast. The Council of Trent closed the question which had been left open, and deprived its theologians of the liberty they had hitherto enjoyed — extending the Canon of Scripture so as to include all the hitherto doubtful or deutero-canonical books, with the exception of the two books of Esdras and the Prayer of Manasseh, the evidence against which seemed too strong to be resisted (*Sess. IV. de Can. Script.*). In accordance with this decree, the editions of the Vulgate published by authority contained the books which the Council had pronounced canonical, as standing on the same footing as those which had never been questioned, while the three which had been rejected were printed commonly in smaller type and stood after the New Testament. The Reformers of Germany and England on the other hand, influenced in part by the revival of the study of Hebrew and the consequent recognition of the authority of the Hebrew Canon, and subsequently by the reaction against this stretch of authority, maintained the opinion of Jerome and pushed it to its legitimate results. The principle which had been asserted by Carlstadt dogmatically in his "De Canonicis Scripturis libellus" (1520) was acted on by Luther. He spoke of individual books among those in question with a freedom as great as that of Jerome, judging each on its own merits, praising Tobit as a "pleasant comedy" and the Prayer of Manasseh as a "good model for penitents," and rejecting the two books of Esdras as containing worthless fables. The example of collecting the doubtful books in a separate group had been set in the Strasburg edition of the Septuagint, 1526. In Luther's complete edition of the German Bible accordingly (1534) the books (Judith, Wisdom, Tobias, Sirach, 1 and 2 Maccabees, Additions to Esther and Daniel, and the Prayer of Manasseh) were grouped together under the general title of "Apocrypha, *i. e.* Books which are not of like worth with Holy Scripture, yet are good and useful to be read." In the history of the English Church, Wicliffe showed himself in this as in other points the forerunner of the Reformation, and applied the term Apocrypha to all but the "*twenty-five*" Canonical Books of the Old Testament. The judgment of Jerome was formally asserted in the sixth Article. The disputed books were collected and described in the same way in the printed English Bible of 1539 (Cranmer's), and since then there has been no fluctuation as to the application of the word. The books to which the term is ascribed are in popular speech not merely apocryphal, but the Apocrypha.

II. Whatever questions may be at issue as to the authority of these books, they have in any case an interest of which no controversy can deprive them as connected with the literature, and therefore with the history, of the Jews. They represent the period of transition and decay which followed on the return from Babylon, when the prophets who were then the teachers of the people had passed away and the age of scribes succeeded. Uncertain as may be the dates of individual books, few, if any, can be thrown further back than the commencement of the 3d century B. C. The latest, the 2d Book of Esdras, is probably not later than 30 B. C., 2 Esdr. vii. 28 being a subsequent interpolation. The alterations of the Jewish character, the different phases which Judaism presented in Palestine and Alexandria, the good and the evil which were called forth by contact with idolatry in Egypt and by the struggle against it in Syria, all these present themselves to the reader of the Apocrypha with greater or less distinctness. In the midst of the diversities which we might naturally expect to find in books written by different authors, in different countries, and at considerable intervals of time, it is possible to discern some characteristics which belong to the collection as a whole, and these may be noticed in the following order.

(1.) The absence of the prophetic element. From first to last the books bear testimony to the assertion of Josephus (*c. Ap.* i. 8), that the ἀκριβὴς διαδοχὴ of prophets had been broken after the close of the O. T. canon. No one speaks because the word of the Lord had come to him. Sometimes there is a direct confession that the gift of prophecy had departed (1 Macc. ix. 27), or the utterance of a hope that it might one day return (*ibid.* iv. 46 xiv. 41). Sometimes a teacher asserts in words the perpetuity of the gift (Wisd. vii. 27), and shows in the act of asserting it how different the illumination which he had received was from that bestowed on the prophets of the Canonical Books. When a writer simulates the prophetic character, he repeats with slight modifications the language of the older prophets, as in Baruch, or makes a mere prediction the text of a dissertation, as in the Epistle of Jeremy, or plays arbitrarily with combinations of dreams and symbols, as in 2 Esdras. Strange and perplexing as the last-named book is, whatever there is in it of genuine feeling indicates a mind not at ease with itself, distracted with its own sufferings and with the problems of the universe, and it is accordingly very far removed from the utterance of a man who speaks as a messenger from God.

(2.) Connected with this is the almost total disappearance of the power which had shown itself in the poetry of the Old Testament. The Song of the Three Children lays claim to the character of a Psalm, and is probably a translation from some liturgical hymn; but with this exception the form of poetry is altogether absent. So far as the writers have come under the influence of Greek cultivation they catch the taste for rhetorical ornament which characterized the literature of Alexandria. Fictitious speeches become almost indispensable additions to the narrative of a historian, and the story of a martyr is not complete unless (as in the later Acta Martyrum of Christian traditions) the sufferer declaims in set terms against the persecutors. (Song of the Three Child., 3–22; 2 Macc. vi. vii.)

(3.) The appearance, as part of the current literature of the time, of works of fiction, resting or purporting to rest on a historical foundation. It is possible that this development of the national genius may have been in part the result of the Captivity. The Jewish exiles brought with them the reputation of excelling in minstrelsy, and were called on to sing the "songs of Zion" (Ps. cxxxvii.). The trial of skill between the three young men in 1 Esdr. iii. iv implies a traditional belief that those who were promoted to places of honor under the Persian kings were conspicuous for gifts of a somewhat similar character. The transition from this to the practice of story telling was with the Jews, as afterwards with the Arabs, easy and natural enough. The period of the Captivity with its strange adventures, and the remoteness of the scenes connected with it, offered a wide and attractive field to the imagination of such narrators. Sometimes, as in Bel and the Dragon, the motive of such stories would be the love of the marvellous mingling itself with the feeling of scorn with which

Digitized by Google

the Jew looked on the idolater. In other cases, as in Tobit and Susanna, the story would gain popularity from its ethical tendencies. The singular variations in the text of the former book indicate at once the extent of its circulation and the liberties taken by successive editors. In the narrative of Judith, again, there is probably something more than the interest attaching to the history of the past. There is indeed too little evidence of the truth of the narrative for us to look on it as history at all, and it takes its place in the region of historical romance, written with a political motive. Under the guise of the old Assyrian enemies of Israel, the writer is covertly attacking the Syrian invaders against whom his countrymen were contending, stirring them up by a story of imagined or traditional heroism to follow the example of Judith as she had followed that of Jael (Ewald, *Gesch. Israels*, vol. iv. p. 541). The development of this form of literature is of course compatible with a high degree of excellence, but it is true of it at all times, and was especially true of the literature of the ancient world, that it belongs rather to its later and feebler period. It is a special sign of decay in honesty and discernment when such writings are passed off and accepted as belonging to actual history.

(4.) The free exercise of the imagination within the domain of history led to the growth of a purely legendary literature. The full development of this was indeed reserved for a yet later period. The books of the Apocrypha occupy a middle place between those of the Old Testament in their simplicity and truthfulness and the wild extravagances of the Talmud. As it is, however, we find in them the germs of some of the fabulous traditions which were influencing the minds of the Jews at the time of our Lord's ministry, and have since in some instances incorporated themselves more or less with the popular belief of Christendom. So in 2 Macc. i. ii. we meet with the statements that at the time of the Captivity the priests had concealed the sacred fire, and that it was miraculously renewed — that Jeremiah had gone, accompanied by the tabernacle and the ark, "to the mountain where Moses climbed up to see the heritage of God," and had there concealed them in a cave together with the altar of incense. The apparition of the prophet at the close of the same book (xv. 15), as giving to Judas Maccabæus the sword with which, as a "gift from God," he was to "wound the adversaries," shows how prominent a place was occupied by Jeremiah in the traditions and hopes of the people, and prepares us to understand the rumors which followed on our Lord's teaching and working that "Jeremias or one of the prophets" had appeared again (Matt xvi. 14). So again in 2 Esdr. xiii. 40–47 we find the legend of the entire disappearance of the Ten Tribes which, in spite of direct and indirect testimony on the other side, has given occasion even in our own time to so many wild conjectures. In ch. xiv. of the same book we recognize (as has been pointed out already) the tendency to set a higher value on books of an esoteric knowledge than on those in the Hebrew Canon; but it deserves notice that this is also another form of the tradition that Ezra dictated from a supernaturally inspired memory the Sacred Books which, according to that tradition, had been lost, and that both fables are exaggerations of the part actually taken by him and by "the men of the Great Synagogue" in the work of collecting and arranging them. So also the rhetorical narrative of the Exodus in Wisd. xvi.–xix. indicates the existence of a traditional, half-legendary history side by side with the canonical. It would seem, indeed, as if the life of Moses had appeared with many different embellishments. The form in which that life appears in Josephus, the facts mentioned in St. Stephen's speech and not found in the Pentateuch, the allusions to Jannes and Jambres (2 Tim. iii. 8), to the disputes between Michael and the Devil (Jude 9), to the "rock that followed" the Israelites (1 Cor. x. 4), all bear testimony to the wide-spread popularity of this semi-apocryphal history.

(5.) As the most marked characteristic of the collection as a whole and of the period to which it belongs, there is the tendency to pass off supposititious books under the cover of illustrious names. The books of Esdras, the additions to Daniel, the letters of Baruch and Jeremiah, and the Wisdom of Solomon, are obviously of this character. It is difficult perhaps for us to measure in each instance the degree in which the writers of such books were guilty of actual frauds. In a book like the Wisdom of Solomon, for example, the form may have been adopted as a means of gaining attention by which no one was likely to be deceived, and, as such, it does not go beyond the limits of legitimate personation. The fiction in this case need not diminish our admiration and reverence for the book any more than it would destroy the authority of Ecclesiastes were we to come to the conclusion from internal or other evidence that it belonged to a later age than that of Solomon. The habit, however, of writing books under fictitious names, is, as the later Jewish history shows, a very dangerous one. The practice becomes almost a trade. Each such work creates a new demand, to be met in its turn by a fresh supply, and thus the prevalence of an apocryphal literature becomes a sure sign of want of truthfulness on one side, and want of discernment on the other.

(6.) The absence of honesty and of the power to distinguish truth from falsehood, shows itself in a yet more serious form in the insertion of formal documents purporting to be authentic, but in reality failing altogether to establish any claim to that title. This is obviously the case with the decree of Artaxerxes in Esth. xvi. The letters with which 2 Macc. opens, from the Jews at Jerusalem, betray their true character by their historical inaccuracy. We can hardly accept as genuine the letter in which the king of the Lacedæmonians (1 Macc. xii. 20, 21) writes to Onias that "the Lacedæmonians and Jews are brethren, and that they are of the stock of Abraham." The letters in 2 Macc. ix. and xi., on the other hand, might be authentic so far as their contents go, but the recklessness with which such documents are inserted as embellishments and make-weights throws doubt in a greater or less degree on all of them.

(7.) The loss of the simplicity and accuracy which characterize the history of the O. T. is shown also in the errors and anachronisms in which these books abound. Thus, to take a few of the most striking instances, Haman is made a Macedonian and the purpose of his plot is to transfer the kingdom from the Persians to the Macedonians (Esth xvi. 10); two contradictory statements are given in the same book of the death of Antiochus Epiphanes (2 Macc. i. 15–17, ix. 5–29); Nabuchodonosor is made to dwell at Nineve as the king of the Assyrians (Judith i. 1).

(8.) In their relation to the religious and ethical development of Judaism during the period which

Digitized by Google

these books embrace, we find (*a.*) The influences of the struggle against idolatry under Antiochus, as shown partly in the revival of the old heroic spirit, and in the record of the deeds which it called forth, as in Maccabees, partly again in the tendency of a narrative like Judith, and the protests against idol-worship in Baruch and Wisdom. (*b.*) The growing hostility of the Jews towards the Samaritans is shown by the Confession of the Son of Sirach (Ecclus. l. 25, 26). (*c.*) The teaching of Tobit illustrates the prominence then and afterwards assigned to almsgiving among the duties of a holy life (Tob. iv. 7–11, xii. 9). The classification of the three elements of such a life — prayer, fasting, alms — in xii. 8, illustrates the traditional ethical teaching of the Scribes, which was at once recognized and purified from the errors that had been connected with it in the Sermon on the Mount (Matt. vi. 1–18). (*d.*) The same book indicates also the growing belief in the individual guardianship of angels and the germs of a grotesque demonology, resting in part on the more mysterious phenomena of man's spiritual nature, like the cases of demoniac possession in the Gospels, but associating itself only too easily with all the frauds and superstitions of vagabond exorcists. (*e.*) The great Alexandrian book of the collection, the Wisdom of Solomon, breathes, as we might expect, a strain of higher mood; and though there is absolutely no ground for the patristic tradition that it was written by Philo, the conjecture that it might have been was not without a plausibility which might well commend itself to men like Basil and Jerome. The personification of Wisdom as "the unspotted mirror of the power of God and the image of his goodness" (vii. 26) as the universal teacher of all "holy souls" in "all ages" (vii. 27), as guiding and ruling God's people, approaches the teaching of Philo and foreshadows that of St. John as to the manifestation of the Unseen God through the medium of the Logos and the office of that divine Word as the light that lighteth every man. In relation again to the symbolic character of the Temple as "a resemblance of the holy tabernacle" which God "has prepared from the beginning" (ix. 8), the language of this book connects itself at once with that of Philo and with the teaching of St. Paul or Apollos in the Epistle to the Hebrews. But that which is the great characteristic of the book, as of the school from which it emanated, is the writer's apprehension of God's kingdom and the blessings connected with it as eternal, and so, as independent of men's conceptions of time. Thus chs. i. ii. contain the strong protest of a righteous man against the materialism which then in the form of a sensual selfishness, as afterwards in the developed system of the Sadducees, was corrupting the old faith of Israel. Against this he asserts that the "souls of the righteous are in the hands of God" (iii. 1); that the blessings which the popular belief connected with length of days were not to be measured by the duration of years, seeing that "wisdom is the gray hair unto men, and an unspotted life is old age." (*f.*) In regard to another truth also, this book was in advance of the popular belief of the Jews of Palestine. In the midst of its strong protests against idolatry, there is the fullest recognition of God's universal love (xi. 23–26), of the truth that His power is but the instrument of His righteousness (xii. 16), of the difference between those who are the "less to be blamed" as "seeking God and desirous to find Him" (xiii. 6), and the victims of a darker and more debasing idolatry. Here also the unknown writer of the Wisdom of Solomon seems to prepare the way for the higher and wider teaching of the New Testament.

It does not fall within the scope of the present article to speak of the controversies which have arisen within the Church of England, or in Lutheran or Reformed communities abroad, in connection with the authority and use of these Books. Those disputes raise questions of a very grave interest to the student of Ecclesiastical History. What has been aimed at here is to supply the Biblical student with data which will prepare him to judge fairly and impartially. E. H. P

* On the Apocrypha in general see Rainolds, John, *Censura Librorum V. T. adv. Pontificios*, 2 vol. Oppenh. 1611, 4to, learned, but prolix and discursive; Eichhorn, *Einl. in die apokr. Schriften des A. T.*, Leipz. 1795; the *Einleitungen* of Bertholdt, De Wette, Scholz (Cath.), and Keil; Welte (Cath.), *Einl. in d. deuterokanon. Bücher des A. T.*, Freib. 1844 (Bd. iv. of Herbst's *Einl.*); Palfrey, *Lect. on the Jewish Scriptures*, Bost. 1838–52, vol. iv.; Davidson, *Introd. to the Old Test.*, Lond. 1863, iii. 346–467; and Volkmar, *Handb. d. Einl. in die Apokryphen*, Theil i. Abth. i. *Judith*, 1860; Abth. ii. *Das vierte Buch Esra*, 1863. See also on the separate books the valuable articles of Ginsburg, in the 3d ed. of Kitto's *Cyclop. of Bibl. Literature*.

The relation of the Apoc. Books to the Canon, and their title to a secondary place in the Bible, have been warmly discussed of late in Germany. On what has been called the *Purist* side, see especially Keerl, *Die Apokryphen des A. T.*, 1852, a prize essay, and *Die Apokryphenfrage aufs Neue beleuchtet*, 1855. See also Stowe, C. E., *The Apoc. Books of the O. T., and the Reasons for their Exclusion from the Canon*, in the *Bibl. Sacra* for April, 1854, xi. 278–305, and Horne's *Introd.* 10th ed. 1856, i. 469–511. On the other side, see Stier, *Die Apokryphen*, 1853; *Letztes Wort über die Apokryphen*, 1855, and especially Bleek, *Ueber die Stellung der Apoc. des A. T. im christl. Kanon*, in the *Theol. Stud. u. Krit.* 1853, pp. 267–354.

The most recent separate ed. of the Greek text, with a selection of various readings, is by H. A. Apel, *Libri V. T. Apoc. Græce*, Lips. 1837. This includes 3d and 4th Maccabees, and is the basis of Wahl's excellent *Clavis Librorum V. T. Apoc philologica*, Lips. 1853.

By far the most important exegetical help to the study of the Apocrypha is the *Kurzgefasstes exeget. Handb. zu den Apokr. des A. T.* by O. F. Fritzsche and C. L. W. Grimm, 6 Lieferungen, Leipz. 1851–60, which also contains full critical introductions to the several books. The German translation and notes of Hezel, 2 Theile, 1800–02, are not highly esteemed. There is a more recent German translation, with notes, by a Jewish Rabbi, M. Gutmann, *Die Apokryphen des A. T.*, u. s. w. Altona, 1841. The principal commentary in English is by Richard Arnald, Lond. 1744–52, fol., 2d ed. 1760, new ed. by Pitman, Lond. 1822, 4to. It was published as a continuation of Patrick and Lowth's Comm. on the Old Test., which it usually accompanies, as in the Philadelphia ed. of 1846. There is a separate ed. of the common English version by Charles Wilson, *The Books of the Apocrypha, with Crit. and Hist. Observations prefixed*, Edin. 1801. A good English translation of the Apocrypha, with

Digitized by Google

suitable introductions and notes, is a desideratum. The annotations of Grotius, Drusius, and others of the older commentators will be found in the *Critici Sacri*, vol. v. Calmet has also illustrated the Apocryphal Books in his great *Commentaire littéral*.

On the theology and morality of the Apocrypha, see Bretschneider, *Syst. Darstellung d. Dogmatik u. Moral d. apokr. Schriften des A. T.* Theil i. *Dogmatik*, Leipz. 1805; Cramer, *Syst. Darstellung d. Moral d. Apokr. des A. T.*, Leipz. 1815; De Wette, *Bibl. Dogmatik*; Von Cölln, *Bibl. Theologie*, Bd. i.; Nicolas, M., *Doctrines relig. des Juifs pendant les deux siècles antérieurs à l'ère chrétienne*, Paris, 1860. See also Frisch, *Vergleichung zwischen den Ideen, welche in den Apokr. des A. T. und d. Schriften des N. T. über Unsterblichkeit, Auferstehung, Gericht u. Vergeltung herrschen*, in Eichhorn's *Allgem. Bibl.* 1792, iv. 653–718, and Böttcher, *De Inferis*, Dresd. 1846, pp. 248–263.

Hencke (1711), Jenichen (1786), Kuinoel (1794), and Beckhaus (1808), have collected illustrations of the phraseology of the N. T. from the Apocrypha. A.

APOLLO'NIA (Ἀπολλωνία: [*Apollonia*]), a city of Macedonia, through which Paul and Silas passed in their way from Philippi and Amphipolis to Thessalonica (Acts xvii. 1). It was in the district of Mygdonia (Plin. iv. 10. s. 17), and according to the *Antonine Itinerary* was distant 30 Roman miles from Amphipolis and 37 Roman miles from Thessalonica. This city must not be confounded with the more celebrated Apollonia in Illyria.

* The distances in the *Itinerarium Antonini Augusti* (ed. Parth. et Pind.) are: "From Philippi to Amphipolis 32 miles; from Amphipolis to Apollonia 32 miles; from Apollonia to Thessalonica 36 miles." Luke's record of Paul's journey through these places (Acts xvii. 1) almost reminds us of a leaf from a traveller's note-book. Paul spent a night probably at Apollonia as well as at Amphipolis; for he was hastening to Thessalonica, and could make the journey between the places in a single day. Pliny mentions Apollonia (*Hist. Nat.* iv. 10): "regio Mygdoniæ subjacens, in qua recedentes a mari Apollonia, Arethusa." At the present day the site has not been ascertained with certainty. There is known to be a little village, *Pollona*, with ruins, just south of Lake *Bechik* (Βόλβη, Æsch. *Pers.* 490) which possibly perpetuates the ancient name. Both Cousinéry (*Voyage dans la Macédoine*, p. 115) and Leake (*Northern Greece*, i. 368) saw the village at a distance, and incline to place Apollonia there. Tafel would place it further to the northwest (see his *De Via Militari Romanorum Egnatia*), at *Klisali*, a post-station 7 hours from *Saloniki*, on the road to Constantinople (Murray's *Handbook of Greece*, p. 432). The position may be correct enough in either case, as there is some uncertainty respecting the line of the Egnatian Way in parts of its course. See AMPHIPOLIS. H.

APOLLO'NIUS (Ἀπολλώνιος: [*Apollonius*]), the son of Thrasæus governor of Cœle-Syria and Phœnice, under SELEUCUS IV. PHILOPATOR, B. C. 187 ff., a bitter enemy of the Jews (2 Macc. iv. 4), who urged the king, at the instigation of Simon the commander (στρατηγός) of the temple, to plunder the temple at Jerusalem (2 Macc. iii. 5 ff.). The writer of the Declamation on the Maccabees, printed among the works of Josephus, relates of Apollonius the circumstances which are commonly referred to his emissary Heliodorus (*De Macc.* 4; cf. 2 Macc. iii. 7 ff.).

2. An officer of Antiochus Epiphanes, governor of Samaria (Joseph. *Ant.* xii. 5, § 5; 7, § 1), who led out a large force against Judas Maccabæus, but was defeated and slain B. C. 166 (1 Macc. iii. 10–12, Joseph. *Ant.* xii. 71). He is probably the same person who was chief commissioner of the revenue of Judæa (ἄρχων φορολογίας, 1 Macc. i. 29; cf. 2 Macc. v. 24), who spoiled Jerusalem, taking advantage of the Sabbath (2 Macc. v. 24–26), and occupied a fortified position there (B. C. 168) (1 Macc. i. 30 ff.).

3. The son of Menestheus (possibly identical with the former), an envoy commissioned (B. C 173) by Antiochus Epiphanes to congratulate Ptolemæus Philometor on his being enthroned (2 Macc iv. 21). An ambassador of the same name was at the head of the embassy which Antiochus sent to Rome (Liv. xlii. 6).

4. The son of Gennæus (ὁ τοῦ Γενναίου, it seems impossible that this can be *des edlen Apoll. Sohn*, Luth.), a Syrian general under Antiochus V. Eupator c. B. C. 163 (2 Macc. xii. 2).

5. THE DAIAN (Δάος, Joseph. *Ant.* xiii. 4, § 3, *i. e.* one of the Dahæ or Dai, a people of Sogdiana), a governor of Cœle-Syria (τὸν ὄντα ἐπὶ κ. Σ. 1 Macc. x. 69) under Alexander Balas, who embraced the cause of his rival Demetrius Nicator, and was appointed by him to a chief command (1 Macc. *l. c.* κατέστησε, Vulg. *constituit ducem*). If he were the same as the Apollonius whom Polybius mentions as foster-brother and confidant of Demetrius I. (probably a son of (3) δυοῖν ὑπαρχόντοιν ἀδελφοῖν, Μελεάγρου καὶ Μενεσθέως, Polyb. xxxi. 21, § 2), his conduct is easily intelligible. Apollonius raised a large force and attacked Jonathan, the ally of Alexander, but was entirely defeated by him (B. C. 147) near Azotus (1 Macc. x. 70 ff.). Josephus (*Ant.* xiii. 4, § 3 f.) represents Apollonius as the general of Alexander at the time of his defeat; but this statement, though it has found advocates (Wernsdorf, *de fide libr. Macc.* p. 135, yet doubtfully), appears to be untenable on internal grounds. Cf. Grimm, 1 Macc. x. 69.

B. F. W.

APOLLOPH'ANES (Ἀπολλοφάνης: *Apollophanes*), a Syrian, killed by Judas Maccabæus (2 Macc. x. 37).

APOL'LOS (Ἀπολλώς, *i. e.* Ἀπολλώνιος [*belonging to Apollo*], as the Codex Bezæ actually gives it, or perhaps Ἀπολλόδωρος [*gift of Apollo*]), a Jew from Alexandria, eloquent (λόγιος, which may also mean *learned*), and mighty in the Scriptures: one instructed in the way of the Lord (Christ) according to the imperfect view of the disciples of John the Baptist (Acts xviii. 25), but on his coming to Ephesus during a temporary absence of St. Paul, A. D. 54, more perfectly taught by Aquila and Priscilla. After this he became a preacher of the gospel, first in Achaia, and then in Corinth (Acts xviii. 27, xix. 1), where he watered that which Paul had planted (1 Cor. iii. 6). When the apostle wrote his first Epistle to the Corinthians, Apollos was with or near him (1 Cor. xvi. 12), probably at Ephesus in A. D. 57. We hear of him then that he was unwilling at that time to journey to Corinth, but would do so when he should have convenient time. He is mentioned but once more in the N. T., in Tit. iii. 13, where Titus is desired to "bring Zenas the lawyer and Apollos on their

Digitized by Google

way diligently, that nothing may be wanting to them." After this nothing is known of him. Tradition makes him bishop of Cæsarea (*Menolog. Græc.* ii. b. 17). The exact part which Apollos took in the missionary work of the apostolic age can never be ascertained; and much fruitless conjecture has been spent on the subject. After the entire amity between St. Paul and him which appears in the first Epistle to the Corinthians, it is hardly possible to imagine any important difference in the doctrines which they taught. Certainly we cannot accede to the hypothesis that the σοφία against which the apostle so often warns the Corinthians, was a characteristic of the teaching of Apollos. Thus much may safely be granted, that there may have been difference enough in the outward character and expression of the two to attract the lover of eloquence and philosophy rather to Apollos, somewhat, perhaps, to the disparagement of St. Paul.

Much ingenuity has been spent in Germany in defining the four parties in the church at Corinth, supposed to be indicated 1 Cor. i. 12; and the Apollos party has been variously characterized. See Neander, *Pflanz. u. Leitung*, p. 378 ff. 4th ed.; Conybeare and Howson, *Life and Epistles of St. Paul*, vol. i. p. 526, vol. ii. pp. 6–11, 2d ed.; Winer refers to Pfizer, *Diss. de Apollone doctore apostol.*, Altorf, 1718; Hopf, *Comm. de Apollone pseudo-doctore*, Hag. 1782; and especially to Heymann, in the Saxon *Exegetische Studien*, ii. 213 ff. H. A.

* The conjecture of Luther, that Apollos was the author of the Epistle to the Hebrews, has been favored by many eminent scholars, among whom may be named Osiander, Beausobre, Le Clerc, Heumann, Ziegler, Semler, Dindorf, Bertholdt, Schott, Bleek, Norton, Feilmoser (Cath.), Credner, Lutterbeck (Cath.), De Wette (without confidence), Tholuck, Reuss, Bunsen, Lünemann, and Alford. See Bleek, *Brief an die Hebr.* i. 423–430; Norton in the *Christian Examiner* for July 1829, vi. 338–343; and Alford's *Prolegomena* to the Epistle, ch. i. sect. i. §§ 180–191. [HEBREWS, EPISTLE TO THE.] A.

APOLLYON (Ἀπολλύων: *Apollyon*), or, as it is literally in the margin of the A. V. of Rev. ix. 11, "a destroyer," is the rendering of the Hebrew word ABADDON, "the angel of the bottomless pit." The Vulgate adds, "Latine habens nomen Exterminans." The Hebrew term is really abstract, and signifies "destruction," in which sense it occurs in Job xxvi. 6, xxviii. 22; Prov. xv. 11; and other passages. The angel Apollyon is further described as the king of the locusts which rose from the smoke of the bottomless pit at the sounding of the fifth trumpet. From the occurrence of the word in Ps. lxxxviii. 11, the Rabbins have made Abaddon the nethermost of the two regions into which they divided the under world. But that in Rev. ix. 11 Abaddon is the angel, and not the abyss, is perfectly evident in the Greek. There is no authority for connecting it with the destroyer alluded to in 1 Cor. x. 10; and the explanation, quoted by Bengel, that the name is given in Hebrew and Greek, to show that the locusts would be destructive alike to Jew and Gentile, is far-fetched and unnecessary. The etymology of Asmodeus, the king of the demons in Jewish mythology, seems to point to a connection with Apollyon, in his character as "the destroyer," or the destroying angel. See also Wisd. xviii. 22. 25. [ASMODEUS.] W. A. W.

APOSTLE (ἀπόστολος, one sent forth), the official name, in the N. T., originally of those Twelve of the disciples whom Jesus chose, to send forth first to preach the gospel, and to be with Him during the course of his ministry on earth. Afterwards it was extended to others who, though not of the number of the Twelve, yet were equal with them in office and dignity. The word also appears to have been used in a non-official sense to designate a much wider circle of Christian messengers and teachers (see 2 Cor. viii. 23; Phil. ii. 25). It is only of those who were officially designated Apostles that we treat in this article.[a]

The original qualification of an apostle, as stated by St. Peter, on occasion of electing a successor to the traitor Judas, was, that he should have been personally acquainted with the whole ministerial course of our Lord, from the baptism of John till the day when He was taken up into heaven. He himself describes them as "they that had continued with Him in his temptations" (Luke xxii. 28). By this close personal intercourse with Him they were peculiarly fitted to give testimony to the facts of redemption; and we gather from his own words in John xiv. 26, xv. 26, 27, xvi. 13, that an especial bestowal of the Spirit's influence was granted them, by which their memories were quickened, and their power of reproducing that which they had heard from Him increased above the ordinary measure of man. The Apostles were from the lower ranks of life, simple and uneducated; some of them were related to Jesus according in the flesh; some had previously been disciples of John the Baptist. Our Lord chose them early in his public career, though it is uncertain precisely at what time. Some of them had certainly partly attached themselves to Him before; but after their call as apostles, they appear to have been continuously with Him, or in his service. They seem to have been all on an equality, both during and after the ministry of Christ on earth. We find one indeed, St. Peter, from fervor of personal character, usually prominent among them, and distinguished by having the first place assigned him in founding the Jewish and Gentile churches [PETER]; but we never find the slightest trace in Scripture of any superiority or primacy being in consequence accorded to him. We also find that he and two others, James and John, the sons of Zebedee, are admitted to the inner privacy of our Lord's acts and sufferings on several occasions (Mark v. 37; Matt. xvii. 1 ff., xxvi. 37); but this is no proof of superiority in rank or office. Early in our Lord's ministry, He sent them out two and two to preach repentance, and perform miracles in his name (Matt. x.; Luke ix.). This their mission was of the nature of a solemn call to the children of Israel, to whom it was confined (Matt. x. 5, 6). There is, however, in his charge to the Apostles on this occasion, not a word of their proclaiming his own mission as the Messiah of the Jewish people. Their preaching was at this time strictly of a preparatory kind, resembling that of John the Baptist, the Lord's forerunner.

[a] * For a good discussion of this topic, see a dissertation on the "Name and Office of an Apostle," by Prof. Lightfoot, *St. Paul's Ep. to the Galatians*, pp 89–97 E.

Digitized by Google

The Apostles were early warned by their Master of the solemn nature and the danger of their calling (Matt. x. 17), but were not intrusted with any esoteric doctrines, of which indeed his teaching, being eminently and entirely practical, did not admit. They accompanied Him in his journeys of teaching and to the Jewish feasts, saw his wonderful works, heard his discourses addressed to the people (Matt. v. 1 ff., xxiii. 1 ff.; Luke iv. 13 ff.) or those which He held with learned Jews (Matt. xix. 13 ff.; Luke x. 25 ff.), made inquiries of Him on religious matters, sometimes concerning his own sayings, sometimes of a general nature (Matt. xiii. 10 ff., xv. 15 ff., xviii. 1 ff.; Luke viii. 9 ff., xii. 41, xvii. 5; John ix. 2 ff., xiv. 5, 22 al.): sometimes they worked miracles (Mark vi. 13; Luke ix. 6), sometimes attempted to do so without success (Matt. xvii. 16). They recognized their Master as the Christ of God (Matt. xvi. 16; Luke ix. 20), and ascribed to Him supernatural power (Luke ix. 54), but in the recognition of the spiritual teaching and mission of Christ, they made very slow progress, held back as they were by weakness of apprehension and by natural prejudices (Matt. xv. 16, xvi. 22, xvii. 20 f.; Luke ix. 54, xxiv. 25; John xvi. 12). They were compelled to ask of Him the explanation of even his simplest parables (Mark viii. 14 ff.; Luke xii. 41 ff.), and openly confessed their weakness of faith (Luke xvii. 5). Even at the removal of our Lord from the earth they were yet weak in their knowledge (Luke xxiv. 21; John xvi. 12), though He had for so long been carefully preparing and instructing them. And when that happened of which He had so often forewarned them, — his apprehension by the chief priests and Pharisees, — they all forsook Him and fled (Matt. xxvi. 56, &c.). They left his burial to one who was not of their number and to the women, and were only convinced of his resurrection on the very plainest proofs furnished by Himself. It was first when this fact became undeniable that light seems to have entered their minds, and not even then without his own special aid, opening their understandings that they might understand the Scriptures. Even after that, many of them returned to their common occupations (John xxi. 3 ff.), and it required a new direction from the Lord to recall them to their mission and reunite them in Jerusalem (Acts i. 4). Before the descent of the Holy Spirit on the Church, Peter, at least, seems to have been specially inspired by Him to declare the prophetic sense of Scripture respecting the traitor Judas, and direct his place to be filled up. On the Feast of Pentecost, ten days after our Lord's ascension, the Holy Spirit came down on the assembled church (Acts ii. 1 ff.); and from that time the Apostles became altogether different men, giving witness with power of the life and death and resurrection of Jesus as he had declared they should (Luke xxiv. 48; Acts i. 8, 22, ii. 32, iii. 15 v. 32, xiii. 31). First of all the mother-church at Jerusalem grew up under their hands (Acts iii.-vii.), and their superior dignity and power were universally acknowledged by the rulers and the people (Acts v. 12 ff.). Even the persecution which arose about Stephen, and put the first check on the spread of the Gospel in Judæa, does not seem to have brought peril to the Apostles (Acts viii. 1). Their first mission out of Jerusalem was to Samaria (Acts viii. 5 ff 14), where the Lord himself had, during his ministry, sown the seed of the Gospel. Here ends, properly speaking (or rather perhaps with the general visitation hinted at in Acts ix. 32), the first period of the Apostles agency, during which its centre is Jerusalem, and the prominent figure is that of St. Peter. Agreeably to the promise of our Lord to him (Matt. xvi. 18), which we conceive it impossible to understand otherwise than in a personal sense, he among the twelve foundations (Rev. xxi. 14) was the stone on whom the Church was first built: and it was his privilege first to open the doors of the kingdom of heaven to Jews (Acts ii. 14, 42) and to Gentiles (Acts x. 11). The centre of the second period of the apostolic agency is Antioch, where a church soon was built up, consisting of Jews and Gentiles; and the central figure of this and of the subsequent period is St. Paul, a convert not originally belonging to the number of the Twelve, but wonderfully prepared and miraculously won for the high office [PAUL]. This period, whose history (all that we know of it) is related in Acts xi. 19–30, xiii. 1–5, was marked by the united working of Paul and the other apostles, in the cooperation and intercourse of the two churches of Antioch and Jerusalem. From this time the third apostolic period opens, marked by the almost entire disappearance of the Twelve from the sacred narrative, and the exclusive agency of St. Paul, the great apostle of the Gentiles. The whole of the remaining narrative of the Acts is occupied with his missionary journeys; and when we leave him at Rome, all the Gentile churches from Jerusalem round about unto Illyricum owe to him their foundation, and look to him for supervision. Of the missionary agency of the rest of the Twelve, we know absolutely nothing from the sacred narrative. Some notices we have of their personal history, which will be found under their respective names, together with the principal legends, trustworthy or untrustworthy, which have come down to us respecting them. See PETER, JAMES, JOHN especially. As regards the *apostolic office*, it seems to have been preeminently that of founding the churches, and upholding them by supernatural power specially bestowed for that purpose. It ceased, as a matter of course, with its first holders — all continuation of it, from the very conditions of its existence (cf. 1 Cor. ix. 1), being impossible. The ἐπίσκοπος of the ancient churches coexisted with, and did not in any sense succeed, the Apostles; and when it is claimed for bishops or any church officers that they are their successors, it can be understood only chronologically, and not officially.

The work which contains the fullest account of the agency of the Apostles within the limits of the N. T. history is Neander's treatise, *Gesch. der Pflanzung und Leitung der christlichen Kirche durch die Apostel*, 4th edition, Hamburg, 1847. More ample, but far less interesting, notices may be found in Cave's *Antiq. Apost.*, or History of the Apostles, Lond. 1677. H. A.

* The older works of Benson, *Hist. of the First Planting of the Christian Religion*, 2d ed., 3 vol., Lond. 1756, 4to, and Lardner, *Hist. of the Apostles and Evangelists*, deserve mention here. See also Stanley, *Sermons and Essays on the Apostolic Age*, 2d ed., Oxford, 1852, Renan, *Les Apôtres*, Paris, 1866, and the literature referred to under the art. ACTS OF THE APOSTLES. A

* **APOTHECARIES** occurs in Neh. iii. 8 (A. V.) for רוֹקְחִים, supposed to mean "perfumers" or "makers of ointments" (in the Sept strangely Ῥαχείμ, as a proper name). In this

craft belonged (בֶּן) Hananiah, one of the builders of the wall of Jerusalem (Neh. iii. 8), where the A. V., with a misapprehension of the idiom, renders "a son of one of the apothecaries." H.

APPAIM (אַפַּיִם [*the nostrils*]: Ἀπφαΐν; [Vat. Εφραιμ;] Alex. Αφφαΐμ: *Apphaïm*). Son of Nadab, and descended from Jerahmeel, the founder of an important family of the tribe of Judah (1 Chr. ii. 30, 31). The succession fell to him, as his elder brother died without issue.

W. A. W.

APPEAL. The principle of appeal was recognized by the Mosaic law in the establishment of a central court under the presidency of the judge or ruler for the time being, before which all cases too difficult for the local courts were to be tried (Deut. xvii. 8–9). Winer, indeed, infers from Josephus (*Ant.* iv. 8, § 14, ἀναπεμπέτωσαν, sc. οἱ δικασταί) that this was not a proper court of appeal, the local judges and not the litigants being, according to the above language, the appellants: but these words, taken in connection with a former passage in the same chapter (εἴ τις . . . τινὰ αἰτίαν προφέροι) may be regarded simply in the light of a general direction. According to the above regulation, the appeal lay in the time of the Judges to the judge (Judg. iv. 5), and under the monarchy to the king, who appears to have deputed certain persons to inquire into the facts of the case, and record his decision thereon (2 Sam. xv. 3). Jehoshaphat delegated his judicial authority to a court permanently established for the purpose (2 Chr. xix. 8). These courts were reëstablished by Ezra (Ezr. vii. 25). After the institution of the Sanhedrim the final appeal lay to them, and the various stages through which a case might pass are thus described by the Talmudists: from the local consistory before which the cause was first tried, to the consistory that sat in the neighboring town; thence to the courts at Jerusalem, commencing in the court of the 23 that sat in the gate of Shushan, proceeding to the court that sat in the gate of Nicanor, and concluding with the great council of the Sanhedrim that sat in the room Gazith (Carpzov. *Appar.* p. 571).

A Roman citizen under the republic had the right of appealing in criminal cases from the decision of a magistrate to the people; and as the emperor succeeded to the power of the people, there was an appeal to him in the last resort. (See *Dict. of Ant.* art. APPELLATIO).

St. Paul, as a Roman citizen, exercised a right of appeal from the jurisdiction of the local court at Jerusalem to the emperor (Acts xxv. 11). But as no decision had been given, there could be no appeal, properly speaking, in his case: the language used (Acts xxv. 9) implies the right on the part of the accused of electing either to be tried by the provincial magistrate or by the emperor. Since the procedure in the Jewish courts at that period was of a mixed and undefined character, the Roman and the Jewish authorities coexisting and carrying on the course of justice between them, Paul availed himself of his undoubted privilege to be tried by the pure Roman law. W. L. B.

* The appeal of Paul to Cæsar (Acts xxv. 11) was peculiar as laying claim not to the revision of a sentence, but to a hearing at Rome before judgment had been rendered elsewhere. The point is not without its difficulty, and deserves a more special notice.

Appeal in Roman law *under the emperors* (for this alone concerns us) proceeded on the principle that the emperor was the supreme judge, and all other judges, the provincial magistrates, for instance, his delegates. Such appeal from a decision in a province, when allowed, was authenticated by *apostoli* or *literæ dimissoriæ*, which contained a notice of the appeal to the higher court, and were accompanied by the necessary documents, evidence, etc. The appeal did not necessarily come before the emperor in the first instance, but he delegated the matter to subordinate persons, as to consular men, to the præfect of the city, and particularly to the præfect of the prætorium. Appeal was allowed in all sorts of cases, when a decision *valid in form* had been given by the inferior court. Where the judgment was *formally* invalid, a *querela nullitatis* was necessary.

The apostle Paul, a Roman citizen, was brought to trial before the procurator of Judæa on the charge of having profaned the temple and of having been "a mover of sedition among all the Jews throughout the world;" and to these offenses it was sought to attach political importance (Acts xxv. 8). If he had consented, a trial might have been held at Jerusalem before the procurator Festus. But Paul, fearing that he would be sacrificed to the malice of his enemies, if such a trial were held, made an appeal to the emperor, and Festus, after consulting with his *consilium* or *assessores*, allowed the appeal to take effect, glad, doubtless, to be freed from the responsibility of either irritating the Jewish leaders by acquitting Paul, or of pronouncing an innocent man guilty.

The peculiarity of this case consisted in this: that an appeal was taken before any condemnatory decision had been made, whereas an appeal implied a verdict. It is not easy to explain this aspect of Paul's trial, or to illustrate it by analogous instances. The emperors, however, "were wont, and sometimes from the best motives, to prevent the initiation or the continuance of a judicial proceeding" (Geib, *Gesch. d. röm. Criminalprocess*, p. 424). And Walter in his *Gesch. d. röm. Rechts*, ii. 347, says that a case was "sometimes sent to the emperor by the proconsul for his settlement of it without a previous verdict," in support of which he cites Fronto, *Epist. ad Marcum*, ii. 15, but there is a mistake in the citation. The emperors' tribunician power could easily involve such a kind of appeal, which would be no stranger than to quash proceedings before a verdict (see Geib, as above). For appeal see the two writers referred to, and Rein in Pauly's *Real-Encycl.* s. v. *Appellatio*.

T. D. W.

APPHIA (Ἀπφία, a Greek form of the Latin *Appia*, written Ἀππία, Acts xxviii. 15[a]), a Christian woman addressed jointly with Philemon and Archippus in Philem. 2, apparently a member of the former's household, seeing that the letter is on a family matter, and that the church that is in her house is mentioned next to these two, and not improbably his wife (Chrys., Theodoret). Nothing more is said or known of her.[b] H. A.

[a] * This is not strictly correct. Ἀππία does not occur in Acts xxviii. 15, or elsewhere in the N. T. In the passage referred to by Alford we have Ἀππίου. (See APPII FORUM). ☁

[b] * See, more fully, on Philem. ver. 2, in Schaff's edition of Lange's *Commentary* (N. Y. 1867). B.

APPHUS (Ἀπφοῦς; [Alex. Σαφφους. Sin. Σαπφους:] *Apphus*), surname of Jonathan Maccabæus (1 Macc. ii. 5).

APPII FORUM (Ἀππίου φόρου, Acts xxviii. 15) was a very well known station (as we learn from Hor. *Sat.* i. 5, and Cic. *ad Att.* ii. 10) on the Appian Way, the great road which led from Rome to the neighborhood of the Bay of Naples. St. Paul, having landed at Puteoli (ver. 13) on his arrival from Malta, proceeded under the charge of the centurion along the Appian Way towards Rome, and found at Appii Forum a group of Christians, who had gone to meet him. The position of this place is fixed by the ancient Itineraries at 43 miles from Rome (*Itin. Ant.* p. 107; *Itin. Hier.* p. 611). The Jerusalem Itinerary calls it a *mutatio*. Horace describes it as full of taverns and boatmen. This arose from the circumstance that it was at the northern end of a canal which ran parallel with the road, through a considerable part of the Pomptine Marshes. There is no difficulty in identifying the site with some ruins near *Treponti;* and in fact the 43d milestone is preserved there. The name is probably due to Appius Claudius, who first constructed this part of the road; and from a passage in Suetonius, it would appear that it was connected in some way with his family, even in the time of St. Paul. [THREE TAVERNS.] J. S. H.

APPLE-TREE, APPLE (תַּפּוּחַ,[a] *tappûach:* μῆλον; μηλέα, Sym. in Cant. viii. 5: *malum, malus*). Mention of the apple-tree occurs in the A. V., in the following passages. Cant. ii. 3: "As the apple-tree among the trees of the wood, so is my beloved among the sons. I sat down under his shadow with great delight, and his fruit was sweet to my taste." Cant. viii. 5: "I raised thee up under the apple-tree: there thy mother brought thee forth." Joel i. 12, where the apple-tree is named with the vine, the fig, the pomegranate, and the palm-trees, as withering under the desolating effects of the locust, palmer-worm, &c. The fruit of this tree is alluded to in Prov. xxv. 11: "A word fitly spoken is like apples of gold in pictures of silver." In Cant. ii. 5: "Comfort me with apples, for I am sick of love;" vii. 8, "The smell of thy rose [shall be] like apples."

It is a difficult matter to say with any degree of certainty what is the specific tree denoted by the Hebrew word *tappûach*. The LXX. and Vulg. afford no clue, as the terms μῆλον, *malum*, have a wide signification, being used by the Greeks and Romans to represent almost any kind of tree-fruit; at any rate, the use of the word is certainly generic; — but Celsius (*Hierob.* i. 255) asserts that the quince-tree (*Pyrus cydonia*) was very often called by the Greek and Roman writers *malus*, as being, from the esteem in which it was held ("primaria malorum species") *the malus*, or μῆλον κατ' ἐξοχήν. Some therefore, with Celsius, have endeavored to show that the *tappûach* denotes the quince; and certainly this opinion has some plausible arguments in its favor. The fragrance of the quince was held in high esteem by the ancients; and the fruit "was placed on the heads of those images in the sleeping apartments which were reckoned among the household gods" (Rosenmüller, *Botany of Bible, Bib. Cab.* p. 314; Voss, *On Virgil. Eclog.* ii. 51). The Arabians make especial allusion to the restorative properties of this fruit; and Celsius (p. 261 quotes Abu'l Fadli in illustration of Cant. ii. 5 "Comfort me with apples, for I am sick of love.' "Its scent," says the Arabic author, "cheers my soul, renews my strength, and restores my breath." Phylarchus (*Histor.* lib. vi.), Rabbi Salomon (in Cant. ii. 3), Pliny (*H. N.* xv. 11), who uses the words *odoris prestantissimi*, bear similar testimony to the delicious fragrance of the quince. It is well known that among the ancients the quince was sacred to the goddess of love; whence statues of Venus sometimes represent her with the fruit of this tree in her hand, the quince being the ill-fated "apple of discord" which Paris appropriately enough presented to that deity.[b]

Other writers, amongst whom may be mentioned Dr. Royle, demur to the opinion that the quince is the fruit here intended, and believe that the citron (*Citrus medica*) has a far better claim to be the *tappûach* of Scripture. The citron belongs to the orange family of plants (*Aurantiaceæ*), the fruit of which tree, together with the lemon (*C. limonium*) and the lime (*C. limetta*), is distinguished from the orange by its oblong form and a protuberance at the apex. The citron, as its name imports, is a native of Media (Theophrast. *Plant. Hist.* iv. 4, § 2); and according to Josephus (*Ant.* xiii. 13, § 5), branches of the citron-tree were ordered by law to be carried by those persons who attended the Feast of Tabernacles, and to this day the Jews offer citrons at this feast; they must be "without blemish and the stalk must still adhere to them" (*Script. Herb.* p. 109). "The boughs of goodly trees" (Lev. xxiii. 40) are by several of the Jewish rabbis understood to be those of this tree (Celsius, *Hierob.* i. 251); and the citron-tree is occasionally represented on old Samaritan coins. "The rich color, fragrant odor, and handsome appearance of the tree, whether in flower or in fruit, are," Dr. Royle asserts, "particularly suited to the passages of Scripture mentioned above." Dr. Thomson (*Land and Book*, p. 545), on the other hand, is in favor of the translation of the A. V., and has little doubt that *apples* is the correct rendering of the Hebrew word. He says, "The whole area (about Askelon) is especially celebrated for its apples, which are the largest and best I have ever seen in this country. When I was here in June, quite a caravan started for Jerusalem loaded with them, and they would not have disgraced even an American orchard. . . . The Arabic word for apple is almost the same as the Hebrew, and it is as perfectly definite, to say the least, as our English word — as much as the word for grape, and just as well understood; and so is that for citron: but this is a comparatively rare fruit. Citrons are also very large, weighing several pounds each, and are so hard and indigestible, that they cannot be used except when made into preserves. The tree is small, slender, and must be propped up, or the fruit will bend it down to the ground. Nobody ever thinks of sitting under its shadow, for it is too small and straggling to make a shade. I cannot believe, therefore, that it is spoken of in the Canticles. It can scarcely be called a *tree* at all, much less would it be singled out as among the choice trees of the wood. As to the smell and color, all the demands of the Biblical allusions are fully met

[a] תַּפּוּחַ. a v. נָפַח, *spiravit*, in allusion to the perfume of the fruit.

[b] Hence the act expressed by the term μηλοβολεῖν (*Schol.* ad Aristoph. *Nub.* p. 180; Theocr. *Id.* iii. 10 v. 88, &c.; Virg. *Ecl.* iii. 64) was a token of love. For numerous testimonies see Celsius. *Hierob.* i. 253.

by these apples of Askelon; and no doubt, in ancient times and in royal gardens, their cultivation was far superior to what it is now, and the fruit larger and more fragrant. Let *tappûach* therefore stand for apple, as our translation has it."

Neither the quince nor the citron nor the apple, however, appears fully to answer to all the scriptural allusions. The *tappûach* must denote some tree which is sweet to the taste, and which possesses some fragrant and restorative properties, in order to meet all the demands of the Biblical allusions. Both the quince and the citron may satisfy the last-named requirement; but it can hardly be said that either of these fruits are sweet to the taste. Dr. Thomson, in the passage quoted above, says that the citron is "too straggling to make a shade;" but in Cant. ii. 3 the *tappûach* appears to be associated with other trees of the wood, and it would do no violence to the passage to suppose that this tree was selected from amongst the rest under which to recline, not on account of any extensive shade it afforded, but for the fragrance of its fruit. The expression "under the shade" by no means necessarily implies any thing more than "under its branches." But Dr. Thomson's trees were no doubt small specimens. The citron-tree is very variable as regards its size. Dr. Kitto (*Pict. Bib.* on Cant. ii. 3) says that it "grows to a fine large size, and affords a pleasant shade;" and Risso, in his *Histoire Naturelle des Oranges*, speaks of the citron-tree as having a magnificent aspect.

The passage in Cant. ii. 3 seems to demand that the fruit of the *tappûach* in its unprepared state was sweet to the taste, whereas the rind only of the citron is used as a sweetmeat, and the pulp, though it is less acid than the lemon, is certainly far from sweet. The same objection would apply to the fruit of the quince, which is also far from being sweet to the taste in its uncooked state. The *orange* would answer all the demands of the Scriptural passages, and orange-trees are found in Palestine; but there does not appear sufficient evidence to show that this tree was known in the earlier times to the inhabitants of Palestine, the tree having been in all probability introduced at a later period. As to the apple-tree being the *tappûach*, most travellers assert that this fruit is generally of a very inferior quality, and Dr. Thomson does not say that he tasted the apples of Askelon.[a] Moreover the apple would hardly merit the character for excellent fragrance which the *tappûach* is said to have possessed. The question of identification, therefore, must still be left an open one. The citron appears to have the best claim to represent the *tappûach*, but there is no conclusive evidence to establish the opinion. As to the APPLES OF SODOM, see VINE OF SODOM.

The expression "*apple* of the eye" occurs in Deut. xxxii. 10; Ps. xvii. 8; Prov. vii. 2; Lam. ii. 18; Zech. ii. 8. The word is the representative of an entirely different name from that considered above: the Hebrew word being *ishôn*,[b] "little man" — the exact equivalent to the English *pupil*, the Latin *pupilla*, the Greek κόρη. It is curious to observe how common the image ("pupil of the eye") is in the languages of different nations. Gesenius (*Thes.* p. 86) quotes from the Arabic, the Syriac, the Ethiopic, the Coptic, the Persian, in all of which tongues an expression similar to the English "pupil of the eye" is found. It is a pity that the same figure is not preserved in the A. V., which invariably uses the expression "apple of the eye" (in allusion to its shape), instead of giving the literal translation from the Hebrew. W. H.

* **APPREHEND** (as used in Phil. iii. 12, 13, of the A. V.) meant formerly "to take in the hand, or by the hand," (a Latin sense of the word). Thus Jeremy Taylor (*Holy Living*, ii. 6) says: "There is nothing but hath a double handle, or at least we have two hands to *apprehend* it." Hence a more correct rendering now would be: "If that I may lay hold (καταλάβω) on that (*i. e.* the victor's crown, ver. 14) for which also I was laid hold upon" (κατελήφθην). "Brethren, I count not myself to have laid hold," &c. The language is evidently figurative, derived from the contests of runners in the stadium. See GAMES. H.

AQUILA ('Ακύλας: Wolf, *Curæ*, on Acts xviii. 2, believes it to have been Grecised from the Latin Aquila, not to have any Hebrew origin, and to have been adopted as a Latin name, as Paulus by Saul), a Jew whom St. Paul found at Corinth on his arrival from Athens (Acts xviii. 2). He is there described as Ποντικὸς τῷ γένει, from the connection of which description with the fact that we find more than one Pontius Aquila in the Pontian gens at Rome in the days of the Republic (see Cic. *ad Fam.* x. 33; Suet. *Cæs.* 78; *Dict. of Biogr.* art. AQUILA and PONTIUS), it has been imagined that he may have been a freedman of a Pontius Aquila, and that his being a Pontian by birth may have been merely an inference from his name. But besides that this is a point on which St. Luke could hardly be ignorant, Aquila, the translator of the O. T. into Greek, was also a native of Pontus. At the time when St. Paul met with Aquila at Corinth, he had fled, with his wife Priscilla, from Rome, in consequence of an order of Claudius commanding all Jews to leave Rome (Suet. *Claud.* 25 — "Judæos impulsore Chresto assidue tumultuantes Roma expulit:" see CLAUDIUS). He became acquainted with St. Paul, and they abode together, and wrought at their common trade of making the Cilician tent or hair-cloth [PAUL]. On the departure of the apostle from Corinth, a year and six months after,

[a] Since the above was written Dr. Hooker has returned from a tour in Palestine, and remarks in a letter to the author of this article — "I procured a great many plants, but very little information of service to you, though I made every inquiry about the subject of your notes. You would hardly believe the difficulty in getting reliable information about the simplest subjects; *e. g.* three, to all appearance unexceptionable English resident authorities, including a consul and a medical gentleman, assured me that the finest apples in Syria grew at Joppa and Askelon. The fact appeared so improbable that, though one authority had eaten them, I could not resist prosecuting the inquiry, and at last found a gentleman who had property there, and knew a little of horticulture, who assured me they were all QUINCES, the apples being abominable."

* In like manner Mr. Tristram says (*Land of Israel* p. 604) that he scarcely ever saw the apple-tree in the Holy Land except on a few high situations in Lebanon and in the region of Damascus. The question does not affect at all the accuracy of Scripture, but the meaning of תַּפּוּחַ which the A. V. renders "apple." Mr. Tristram concludes that it cannot be "the apple" that is intended, but is "the apricot." H.

[b] אִישׁוֹן, *homunculus*, אִישׁוֹן הָעַיִן, homunculus oculus oculi, *i. e.* pupilla, in qua tanquam in speculo hominis imagunculam conspicimus (Ges. *Thes.* s. v.)

Priscilla and Aquila accompanied him to Ephesus on his way to Syria. There they remained; and when Apollos came to Ephesus, knowing only the baptism of John, they took him and taught him the way of the Lord more perfectly. At what time they became Christians is uncertain: had Aquila been converted before his first meeting with St. Paul, the word *μαθητής* would hardly have been omitted (see against this view Neander, *Pfl. u. Leit.* p. 333 f., and for it Herzog, *Encykl.* s. v.). At the time of writing 1 Cor., Aquila and his wife were still in Ephesus (1 Cor. xvi. 19); but in Rom. xvi. 3 ff., we find them again at Rome, and their house a place of assembly for the Christians. They are there described as having endangered their lives for that of the apostle. In 2 Tim. iv. 19, they are saluted as being with Timotheus, probably at Ephesus. In both these latter places the form Prisca and not Priscilla is used.

Nothing further is known of either of them. The *Menolog. Græcorum* gives only a vague tradition that they were beheaded; and the *Martyrol. Rom.* celebrates both on July 8. H. A.

* We must advert here to the question whether Luke mentions the Nazarite vow (Acts xviii. 18) of Aquila or the apostle Paul. The passage, grammatically viewed, no doubt should be understood of Aquila; and so much the more, it is urged, because Luke places Priscilla's name before Aquila's as if for the very purpose of showing that *κειράμενος* belongs to Ἀκύλας, and not Παῦλος. So Grotius, Kuinoel, Wieseler, Meyer, and others. On the contrary, Neander, Olshausen, Hemsen, De Wette, Winer, Wordsworth, Lechler (Lange's *Bibelwerk*, p. 261), with others, refer the vow to the apostle, and not Aquila. Παῦλος is the leading subject, and the reader connects the remark spontaneously with him. It is only as an act of reflection, on perceiving that Ἀκύλας stands nearer, that the other connection occurs to the mind as a possible one. The intervening words (*καὶ σὺν αὐτῷ* Ἀκύλας) may separate *κειράμενος* and Παῦλος from each other, because the clause is so evidently parenthetic, and because *ἐξέπλει* has a tendency to draw its several subjects towards itself. That no stress can be laid upon Luke's naming Priscilla before Aquila, is clear from Rom. xvi. 3 and 2 Tim. iv. 19, where the names follow each other in the same manner. Some principle of association, as possibly that of the relative superiority of Priscilla, seems to have made it customary to speak of them in that order. Dr. Howson (*Life and Epistles of St. Paul*, i. 498) maintains that Aquila assumed the vow; but in his *Hulsean Lectures* (p. 16, note) recedes from that opinion and ascribes the act to Paul. H.

AR (עָר) **and AR OF MOAB** (עָר מוֹאָב,[a] Sam. Vers. ארשה: [Num. xxi. 15] Ἥρ; [Deut. ii. 9, 18, Rom. Alex. Ἀροήρ, Vat. Ξηειρ; 29, Rom. Vat. Ἀροήρ, Alex. Ἀροηλ, Comp. Ἀρ:] *Ar*), one of the chief places of Moab (Is. xv. 1; Num. xxi. 28).[b] From the Onomasticon (*Moab*), and from Jerome's Com. on Is. xv. 1, it appears that in that day the place was known as Areopolis[c] and Rabbath-Moab, "*id est, grandis Moab*" (Reland p. 577; Rob. ii. 166, note).[d] The site is still called *Rabba*; it lies about half-way between *Kerek* and the *Wady Mojeb*, 10 or 11 miles from each, the Roman road passing through it. The remains are not so important as might be imagined (Irby, p. 140; Burckh. p. 377; De Saulcy, ii. 44–46, and map 8).

In the books of Moses Ar appears to be used as a representative name for the whole nation of Moab; see Deut. ii. 9, 18, 29; and also Num. xxi. 15, where it is coupled with a word rarely if ever used in the same manner, יְשִׁמֹן, "the *dwelling* of Ar." In Num. xxii. 36 the almost identical words עִיר מוֹאָב are rendered "a city of Moab," following the Sam. Vers., the LXX., and Vulgate. G.

* Ritter's view (referred to in the *note*[d]) that Ar was not the present *Rabba*, but was situated near Aroer on the Arnon, is held also by Hengstenberg (*Gesch. Bileams*, p. 234 ff.), Keil (*Pentateuch* iii. 146), and Kurtz (*Gesch. des A. Bundes*, ii. 448). Among the reasons on which they rely for this opinion, are that Ar formed the northern boundary of Moab (Num. xxii. 36, comp. xxi. 15), whereas *Rabba* is 3 or 4 hours further south in the interior of Moab, and that Ar was in the Wady of the Arnon (Deut. ii. 36; Josh. xiii. 9) whereas *Rabba* is not in that valley, but 10 miles or more distant from it. Burckhardt (*Syria*, ii. 636) found "a fine green pasture-land in which is a hill with important ruins," near the confluence of Wady *Lejum* and Wady *Mojib* (the Arnon) which may well be supposed to be the site of the ancient Ar. It is true, the name Areopolis, which was the Greek name of Ar, was applied also to *Rabba*; but there is no proof that this was done till after the destruction of Ar by an earthquake in the 4th century (Jer. *ad Jes.* xv. 1), and hence the name may have designated different places at different times. It is possible, as Ritter argues, that after the overthrow of Ar, the capital of the region, the name was transferred to *Rabba*, which was the next in rank and became then the seat of the episcopate, which had previously been at Ar. Dr. Robinson identifies Ar with *Rabba*, but without specially noticing the objections to that view. The argument against that identification, and for supposing Ar to have been on the Arnon, is well stated in Zeller's *Bibl. Wörth.* p. 95. Raumer held at first a different opinion, but changed it in view of Hengstenberg's arguments (*Palästina*, p. 271, 4te Aufl.). Dietrich also agrees with Ritter, and distinguishes Ar from the present *Rabba* in Moab (*Hebr. u. Chald. Handw.* p. 680). H.

ARA (אֶרַא [perh. *lion* = אַרְיֵה]: Ἀρά: *Ara*). One of the sons of Jether, the head of a family of Asherites (1 Chr. vii. 38). W. A. W.

ARAB (אֲרָב [*ambush*]: Ἀρέμ; [Comp.

[a] According to Gesenius (*Jesaia*, p. 515), an old, probably Moabite, form of the word עִיר, a "city."

[b] Samaritan Codex and Version, "as far as Moab," reading עד for ער; and so also LXX. ἕως M.

[c] We have Jerome's testimony that Areopolis was believed to be *quasi* Ἄρεως πόλις, "the city of Ares" (Mars). This is a good instance of the tendency which is noticed by Trench (*English Past and Present*, pp 218, 220) as existing in language, to tamper with the derivations of words. He gives another example of it in "Hierosolyma," *quasi* ἱερός, "holy."

[d] Ritter (*Syrien*, p. 1212, 18) tries hard to make out that Areopolis and Ar-Moab were not identical and that the latter was the "city in the midst of the wady" [ARNON]; but he fails to establish his point.

Digitized by Google

Ald.] Alex. Ερεβ: *Arab*), a city of Judah in the mountainous district, probably in the neighborhood of Hebron. It is mentioned only in Josh. xv. 52, and has not yet been identified. [ARBITE.]

AR'ABAH (עֲרָבָה: Ἀραβα; [Βαιθάραβα in Josh. xviii. 18; see also note *a*:] *campestria, planities*), Josh. xviii. 18. Although this word appears in the Auth. Vers. in its original shape only in the verse above quoted, yet in the Hebrew text it is of frequent occurrence.

1. If the derivation of Gesenius (*Thes.* p. 1066) is to be accepted, the fundamental meaning of the term is "burnt up" or "waste," and thence "sterile," and in accordance with this idea it is employed in various poetical parts of Scripture to designate generally a barren, uninhabitable district, — "a desolation, a dry land, and a *desert*, a land wherein no man dwelleth, neither doth any son of man pass thereby" (Jer. li. 43: see a striking remark in Martineau, p. 395; and amongst other passages, Job xxiv. 5, xxxix. 6; Is. xxxiii. 9, xxxv. 1).

2. But within this general signification it is plain, from even a casual examination of the topographical records in the earlier books of the Bible, that the word has also a more special and local force. In these cases it is found with the definite article (הָעֲרָבָה, ha-Arabah). "the Arabah," and is also so mentioned as clearly to refer to some spot or district familiar to the then inhabitants of Palestine. This district — although nowhere expressly so defined in the Bible, and although the peculiar force of the word "Arabah" appears to have been disregarded by even the earliest commentators and interpreters of the Sacred Books [a] — has within our own times been identified with the deep-sunken valley or trench which forms the most striking among the many striking natural features of Palestine, and which extends with great uniformity of formation from the slopes of Hermon to the Elanitic Gulf of the Red Sea; the most remarkable depression known to exist on the surface of the globe (Humboldt, *Cosmos*, i. 150, ed. Bohn; see also 301). Through the northern portion of this extraordinary fissure the Jordan rushes through the lakes of Huleh and Gennesareth down its tortuous course to the deep chasm of the Dead Sea. This portion, about 150 miles in length, is known amongst the Arabs by the name of el-Ghor (الغور), an appellation which it has borne certainly since the days of Abulfeda.[b] The southern boundary of the Ghor has been fixed by Robinson to be the wall of cliffs which crosses the valley about 10 miles south of the Dead Sea. Down to the foot of these cliffs the Ghor extends; from their summits, southward to the Gulf of Akabah, the valley changes its name, or, it would be more accurate to say, retains its old name of Wady el-Arabah (وادي العربة).

Looking to the indications of the Sacred Text there can be no doubt that in the times of the conquest and the monarchy the name "Arabah" was applied to the valley in the entire length of both its southern and northern portions. Thus in Deut. i 1, probably, and in Deut. ii. 8, certainly (A. V. "plain" in both cases), the allusion is to the southern portion, while the other passages in which the name occurs, point with certainty — now that the identification has been suggested — to the northern portion. In Deut. iii. 17, iv. 49; Josh. iii. 16, xi. 2, xii. 3; and 2 K. xiv. 25, both the Dead Sea and the Sea of Cinneroth (Gennesareth) are named in close connection with the Arabah. The allusions in Deut. xi. 30; Josh. viii. 14, xii. 1, xviii. 18; 2 Sam. ii. 29, iv. 7; 2 K. xxv. 4; Jer. xxxix. 4, lii 7, become at once intelligible when the meaning of the Arabah is known, however puzzling they may have been to former commentators.[c] In Josh. xi. 16 and xii. 8 the Arabah takes its place with "the mountain," "the lowland" plains of Philistia and Esdraelon, "the south" and "the plain" of Cœle-Syria, as one of the great natural divisions of the conquered country.

3. But further the word is found in the plural and without the article (עַרְבוֹת, *Arboth*), always in connection with either Jericho or Moab, and therefore doubtless denoting the portion of the Arabah near Jericho; in the former case on the west, and in the latter on the east side of the Jordan; the Arboth-Moab being always distinguished from the Sede-Moab — the bare and burnt-up soil of the sunken valley, from the cultivated pasture or cornfields of the downs on the upper level — with all

[a] The early commentators and translators seem to have overlooked or neglected the fact, that the Jordan valley and its continuation south of the Dead Sea had a special name attached to them, *and to them only*. By Josephus the Jordan valley is always called the πέγα πεδίον; but he applies the same name to the plain of Esdraelon. Jerome, in the *Onomasticon*, states the name by which it was then known was *Aulon*, αὐλών (i. e. channel); but he preserves no such distinction in the Vulgate, and renders Arabah by *planities, solitudo, campestria, desertum*, by one or all of which he translates indiscriminately Mishor, Bekaa, Midbar, Shefela, Jeshimon, equally unmindful of the special force attaching to several of these words. Even the accurate Aquila has failed in this, and uses his favorite ἡ ὁμαλή indiscriminately. The Talmud, if we may trust the single reference given by Reland (p. 865), mentions the Jordan valley under the name Bekaah, a word at that time of no special import. The Samaritan Version and the Targums apparently confound all words for valley, plain, or low country, under the one term Mishor, which was originally confined strictly to the high smooth downs east of Jordan on the upper level [Misnor].

In the LXX we frequently find the words Ἀραβά and Ἀραβώθ; but it is difficult to say whether this has been done intelligently, or whether it is an instance of the favorite habit of these translators of transferring a Hebrew word literally into Greek when they were unable to comprehend its force. (See some curious examples of this — to take one book only — in 2 K. ii. 14, ἀφφώ; iii. 4, νωχήδ; iv. 39, ἀρωθ; v. 12 (comp. Gen. xxxv. 16), διαβραθά; vi. 8, ἐλμωνί; ix. 18, γαρίμ, &c. &c.) In the latter case it is evidence of an equal ignorance to that which has rendered the word by δυσμαί, καθ' ἑσπέραν, and Ἀραβία.

[b] By Abulfeda and Ibn Haukal the word *el-Ghor* is used to denote the valley from the Lake of Gennesareth to the Dead Sea (Ritter, *Sinai*, pp. 1059, 1060). Thus each word was originally applied to the whole extent, and each has been since restricted to a portion only (see Stanley, App. p. 487). The word *Ghor* is interpreted by Freytag to mean "locus depressior inter montes."

[c] See the mistakes of Michaelis, Marius, and others, who identified the Arabah with the Bekaa (*i. e.* the plain of Cœle-Syria, the modern *el-Bukáa*), or with the Mishor, the level down country on the east of Jordan (Kal, pp. 205, 226).

Digitized by Google

the precision which would naturally follow from the essential difference of the two spots. (See Num. xxii. 1, xxvi. 3, 63, xxxi. 12, xxxiii. 48, 49, 50, xxxv. 1, xxxvi. 13; Deut. xxxiv. 1, 8; Josh. iv. 13, v. 10, xiii. 32; 2 Sam. xv. 28, xvii. 16; 2 K. xxv. 5; Jer. xxxix. 5, lii. 8.)

The word Arabah does not appear in the Bible until the book of Numbers. In the allusions to the valley of the Jordan in Gen. xiii. 10, &c. the curious term *Ciccar* is employed. This word and the other words used in reference to the Jordan valley, as well as the peculiarities and topography of that region — in fact of the whole of the Ghor — will be more appropriately considered under the word JORDAN. At present our attention may be confined to the southern division, to that portion of this singular valley which has from the most remote date borne, as it still continues to bear, the name of "Arabah."

A deep interest will always attach to this remarkable district, from the fact that it must have been the scene of a large portion of the wanderings of the children of Israel after their repulse from the south of the Promised Land. Wherever Kadesh and Hormah may hereafter be found to lie, we know with certainty, even in our present state of ignorance, that they must have been at the north of the Arabah; and therefore "the way of the Red Sea," by which they journeyed "from Mount Hor to compass the land of Edom," after the refusal of the king of Edom to allow them a passage through his country, must have been southwards, down the Arabah towards the head of the Gulf, till, as is nearly certain, they turned up one of the wadies on the left, and so made their way by the back of the mountain of Seir to the land of Moab on the east of the Dead Sea.

More accurate information will no doubt be obtained before long of the whole of this interesting country, but in the mean time as short a summary as possible is due of what can be collected from the reports of the principal travellers who have visited it.

The direction of the Ghor is nearly due north and south. The Arabah, however, slightly changes its direction to about N. N. E. by S. S. W. (Rob. i. 162, 3). But it preserves the straightness of its course, and the general character of the region is not dissimilar from that of the Ghor (Ritter, *Sinai*, p. 1132; Irby, p. 134) except that the soil is more sandy, and that from the absence of the central river and the absolutely desert character of the highland on its western side (owing to which the wadies bring down no fertilising streams in summer, and nothing but raging torrents in winter), there are very few of those lines and "circles" of verdure which form so great a relief to the torrid climate of the Ghor.

The whole length of the Arabah proper, from the cliffs south of the Dead Sea to the head of the Gulf of Akabah, appears to be rather more than 100 miles (Kiepert's Map, Rob. i.). In breadth it varies. North of Petra, that is, about 70 miles from the Gulf of Akabah, it is at its widest, being perhaps from 14 to 16 miles across; but it contracts gradually to the south till at the gulf the opening to the sea is but 4, or, according to some travellers, 2 miles wide (Rob. i. 162; Martineau, p. 392).

The mountains which form the walls of this vast valley or trench are the legitimate successors of those which shut in the Ghor, only in every way grander and more desert-like. On the west are the long horizontal lines of the limestone ranges of the Tih, "always faithful to their tabular outline and blanched desolation" (Stanley, pp. 7, 84; also MS. Journal; and see Laborde, p. 262), mounting up from the valley by huge steps with level barren tracts on the top of each (Rob. ii. 125), and crowned by the vast plateau of the "Wilderness of the Wanderings." This western wall ranges in height from 1500 to 1800 feet above the floor of the Arabah (Rob. i. 162), and through it break in the wadies and passes from the desert above — unimportant towards the south, but further north larger and of more permanent character. The chief of these wadies is the *W. el-Jeraifeh*, which emerges about 60 miles from Akabah, and leads its waters, when any are flowing, into the *W. el-Jeib* (Rob. ii. 120, 125), and through it to the marshy ground under the cliffs south of the Dead Sea.

Two principal passes occur in this range. First, the very steep and difficult ascent close to the Akabah, by which the road of the Mecca pilgrims between the Akabah and Suez mounts from the valley to the level of the plateau of the Tih. It bears apparently no other name than *es-Nâkb*, "the Pass" (Rob. i. 175). The second — *es-Sufah* — has a more direct connection with the Bible history, being probably that at which the Israelites were repulsed by the Canaanites (Deut. i. 44; Num. xiv. 43–45). It is on the road from Petra to Hebron, above *Ain el-Weibeh*, and is not like the former, from the Arabah to the plateau, but from the plateau itself to a higher level 1000 feet above it. See the descriptions of Robinson (ii. 178), Lindsay (ii. 46), Stanley (p. 85).

The eastern wall is formed by the granite and basaltic (Schubert in Ritter, *Sinai*, p. 1013) mountains of Edom, which are in every respect a contrast to the range opposite to them. "At the base are low hills of limestone and argillaceous rock like promontories jutting into the sea in some places thickly strewed with blocks of porphyry; then the lofty masses of dark porphyry constituting the body of the mountain; above these, sandstone broken into irregular ridges and grotesque groups or cliffs, and further back and higher than all, long elevated ridges of limestone without precipices" (Rob. ii. 123, 154; Laborde, pp. 209, 210, 262; Lord Lindsay, ii. 43), rising to a height of 2000 to 2300 feet, and in Mount Hor reaching an elevation of not less than 5000 feet (Ritter, *Sinai*, pp. 1139, 40). Unlike the sterile and desolate ranges of the Tih, these mountains are covered with vegetation, in many parts extensively cultivated and yielding good crops; abounding in "the fatness of the earth" and the "plenty of corn and wine" which were promised to the forefather of the Arab race as a compensation for the loss of his birthright (Rob. ii. 154; Laborde, pp. 203, 263). In these mountains there is a plateau of great elevation, from which again rise the mountains — or rather the downs (Stanley, p. 87) — of Sherâh. Though this district is now deserted, yet the ruins of towns and villages with which it abounds show that at one time it must have been densely inhabited (Burckh. pp. 435, 436).

The numerous wadies which at once drain and give access to the interior of these mountains are in strong contrast with those on the west, partaking of the fertile character of the mountains from which they descend. In almost all cases they contain streams which, although in the heat of summer small and losing themselves in their own beds, a

Digitized by Google

in the sand of the Arabah, "in a few paces" after they forsake the shadow of their native ravines (Laborde, 141), are yet sufficient to keep alive a certain amount of vegetation, rushes, tamarisks, palms, and even oleanders, lilies, and anemones, while they form the resort of the numerous tribes of the children of Esau, who still "dwell (Stanley, p. 87, also MS. Journal; Laborde, p. 141; Mart. p. 396) in Mount Seir, which is Edom" (Gen. xxxvi. 8). The most important of these wadies are the *Wady Ithm* (*Jetoum* of Laborde), and the *Wady Abû Kusheibeh*. The former enters the mountains close above the Akabah and leads by the back of the range to Petra, and thence by Shobek and Tufileh to the country east of the Dead Sea. Traces of a Roman road exist along this route (Laborde, p. 203; Rob. ii. 161); by it Laborde returned from Petra, and there can be little doubt that it was the route by which the Israelites took their leave of the Arabah when they went to "compass the land of Edom" (Num. xxi. 4). The second, the *W. Abû Kusheibeh*, is the most direct access from the Arabah to Petra, and is that up which Laborde[a] and Stanley appear to have gone to the city. Besides these are *Wady Tubal*, in which the traveller from the south gains his first glimpse of the red sandstone of Edom, and *W. Ghurundel*, not to be confounded with those of the same name north of Petra and west of Sinai.[b]

To Dr. Robinson is due the credit of having first ascertained the spot which forms at once the southern limit of the Ghor and the northern limit of the Arabah. This boundary is the line of chalk cliffs which sweep across the valley at about 6 miles below the S. W. corner of the Dead Sea. They are from 50 to 150 feet in height; the Ghor ends with the marshy ground at their feet, and level with their tops the Arabah begins (Rob. ii. 116, 118, 120). Thus the cliffs act as a retaining wall or buttress supporting the higher level of the Arabah, and the whole forms what in geological language might be called a "fault" in the floor of the great valley.

Through this wall breaks in the embouchure of the great main drain of the Arabah — the *Wady el-Jeib* — in itself a very large and deep water-course which collects and transmits to their outlet at this point the torrents which the numerous wadies from both sides of the Arabah pour along it in the winter season (Rob. ii. 118, 120, 125). The furthest point south to which this drainage is known to reach is the *Wady Ghurundel* (Rob. ii. 125), which debouches from the eastern mountains about 40 miles from the Akabah and 60 from the cliffs just spoken of. The *Wady el-Jeib* also forms the most direct road for penetrating into the valley from the north. On its west bank, and crossed by the road from *Wady Musa* (Petra) to Hebron, are the springs of *Ain el-Weibeh*, maintained by Robinson to be Kadesh (Rob. ii. 175; but see Stanley, pp. 93, 95).

Of the substructure of the floor of the Arabah very little is known. In his progress southward along the *Wady el-Jeib*, which is during part of its course over 100 feet in depth, Dr. Robinson (ii. 119) notes that the sides are "of chalky earth or marl," but beyond this there is no information.

The surface is dreary and desolate in the extreme. "A more frightful desert," says Dr. Robinson (ii. 121) "it had hardly been our lot to behold . . . loose gravel and stones everywhere furrowed with the beds of torrents . . . blocks of porphyry brought down by the torrents among which the camels picked their way with great difficulty . . . a lone shrub of the ghûdah, almost the only trace of vegetation." This was at the ascent from the *Wady el-Jeib* to the floor of the great valley itself. Further south, near *Ain el-Weibeh*, it is a rolling gravelly desert with round naked hills of considerable elevation (ii. 173). At *Wady Ghurundel* it is "an expanse of shifting sands, broken by innumerable undulations and low hills" (Burckh. p. 442), and "countersected by a hundred watercourses" (Stanley, p. 87). The southern portion has a considerable general slope from east to west quite apart from the undulations of the surface (Stanley, p. 85), a slope which extends as far north as Petra (Schubert, p. 1097). Nor is the heat less terrible than the desolation, and all travellers, almost without exception, bear testimony to the difficulties of journeying in a region where the sirocco appears to blow almost without intermission (Schub. p. 1016; Burckh. p. 444; Mart. p. 394; Rob. ii. 123).[c]

However, in spite of this heat and desolation, there is a certain amount of vegetation, even in the open Arabah, in the driest parts of the year. Schubert in March found the *Arta* (Calligonum com.), the *Anthia variegata*, and the *Cotoquinta* (Ritter, p. 1014), also tamarisk-bushes (*tarfa*) lying thick in a torrent-bed[d] (p. 1016); and on Stanley's road "the shrubs at times had almost the appearance of a jungle," though it is true that they were so thin as to disappear when the "waste of sand" was overlooked from an elevation (85, and see Rob. i. 163, 175).

It is not surprising that after the discovery by Burckhardt in 1812[e] of the prolongation of the Jordan valley in the Arabah, it should have been assumed that this had in former times formed the outlet for the Jordan to the Red Sea.[f] Lately, however, the levels of the Jordan and the Dead Sea have been taken, imperfectly, but still with sufficient accuracy[g] to disprove the possibility of such a theory; and in addition there is the universal testimony of the Arabs that at least half of the dis-

[a] Hardly recognisable, though doubtless to be recognised, under the *Pabouchere* of Laborde (p. 144), or the *Abou Ghabeb* of Lindsay.

[b] The various springs occurring both on the east and west sides of the Arabah are enumerated by Robinson (iii. 184).

[c] The wind in the Elanitic arm of the Red Sea is very violent, constantly blowing down the Arabah from the North. The navigation of these waters is on that account almost proverbially dangerous and difficult. (See the notice of this in the *Edin. Rev* vol. cili. p. 243).

[d] The bees whose hum so charmed him (p. 1017) must from his description have been in a side wady, not in the Arabah itself.

[e] See Burckhardt, pp. 441, 442. The sagacity of Ritter had led him earlier than this to infer its existence from the remarks of the ancient Mohammedan historians (Rob. ii. 187).

[f] This theory appears to have been first announced by Col. Leake in the preface to Burckhardt's Travels (see p. vi.). It was afterwards espoused and dilated on amongst others, by Lord Lindsay (ii. 28), Dean Milman (*Hist. of Jews*, Allen, p. 241), and Stephens (*Incidents of Trav.* ii. 41).

[g] These observations will be stated in detail in the account of the Jordan. Those of Lynch seem on the whole the most reliable: they give as the levels of the Sea of Galilee and the Dead Sea below the Mediterranean respectively 652 and 1316 feet.

Digitized by Google

trict drains northward to the Dead Sea — a testimony fully confirmed by all the recorded observations of the conformation of the ground. A series of accurate levels from the Akabah to the Dead Sea, up the Arabah, are necessary before the question can be set at rest, but in the mean time the following may be taken as an approximation to the real state of the case.

1. The waters of the Red Sea and of the Mediterranean are very nearly at one level.[a]

2. The depression of the surface of the Sea of Galilee is 652 feet, and of the Dead Sea 1316 feet, below the level of the Mediterranean, and therefore of the Red Sea. Therefore the waters of the Jordan can never in historical times have flowed into the Gulf of Akabah, even if the formation of the ground between the Dead Sea and the Gulf would admit of it. But,

3. All testimony goes to show that the drainage of the northern portion of the Arabah is towards the Dead Sea, and therefore that the land rises southward from the latter. Also that the south portion drains to the gulf, and therefore that the land rises northward from the gulf to some point between it and the Dead Sea.[b] The watershed is said by the Arabs to be a long ridge of hills running across the valley at 2½ days, or say 40 miles, from the Akabah (Stanley, p. 85), and it is probable that this is not far wrong. By M. de Bertou it is fixed as opposite the entrance to the *Wady Talh*, apparently the same spot. G.

ARABATTINE (ἡ Ἀκραβαττίνη; [Alex. Sin.[1] Ἀκραβαττηνη:] *Acrabattane*), in Idumæa (1 Macc. v. 3). [AKRABBIM; and see the note to that article.] G.

ARA'BIA (Ἀραβία, Gal. i. 17, iv. 25), a country known in the O. T. under two designations: — 1. אֶרֶץ קֶדֶם, *the east country* (Gen. xxv. 6); or perhaps קֶדֶם (Gen. x. 30; Num. xxiii. 7; Is. ii. 6); and אֶרֶץ בְּנֵי קֶדֶם (Gen. xxix. 1); gent. n. בְּנֵי קֶדֶם, *sons of the East* (Judg. vi. 3 ff.; 1 K. iv. 30; Job i. 3; Is. xi. 14; Jer. xlix. 28; Ez. xxv. 4). (Translated by the LXX. and in Vulg., and sometimes transcribed (Κεδέμ) by the former.) From these passages it appears that בְּנֵי קֶדֶם and אֶרֶץ קֶדֶם indicate, primarily, the country east of Palestine, and the tribes descended from Ishmael and from Keturah; and that this original signification may have become gradually extended to Arabia and its inhabitants generally, though without any strict limitation. The third and fourth passages above referred to, as Gesenius remarks (*Lex.* ed. Tregelles, *in voc.*), relate to Mesopotamia and Babylonia (*comp.* ἡ ἀνατολή, Matt. ii. 1 ff.). Winer considers Kedem, &c., to signify Arabia and the Arabians generally (*Realwörterbuch, in voc.*); but a comparison of the passages on which his opinion is founded has led us to consider it doubtful. [BENE-KEDEM.] 2. עֲרָב (2 Chr. ix. 14) and עֲרַב (Is. xxi. 13; Jer. xxv. 24; Ez. xxvii. 21); gent. n. עַרְבִי (Is. xiii 20; Jer. iii. 2); and עָרְבִי (Neh. ii. 19); pl עַרְבִים (2 Chr. xxi. 16, xxii. 1), and עַרְבִיאִים (2 Chr. xvii. 11, xxvi. 7). (LXX. Ἀραβία, &c. Vulg. *Arabia*, &c.) These seem to have the same geographical reference as the former names to the country and tribes east of the Jordan, and chiefly north of the Arabian peninsula. In the N. T. Ἀραβία cannot be held to have a more extended signification than the Hebrew equivalents in the O. T.[c] עֲרָב (Ex. xii. 38; Neh. xiii. 3) and עֵרֶב (1 K. x. 15; Jer. xxv. 20, l. 37; Ez. xxx. 5), rendered in the A. V. "a mixed multitude" (Ex. xii. 38, here followed by רַב), "the mixed multitude," kings of "Arabia" (so in Vulg., and in Heb. in corresponding passage in 2 Chr. ix. 14), and (in the last two instances) "the mingled people," have been thought to signify the Arabs. The people thus named dwelt in the deserts of Petra. By the Arabs the country is called بِلَاد اَلْعَرَب (Bilád El-'Arab), "*the country of the Arabs*," and جَزِيرَة اَلْعَرَب (Jezeeret El-'Arab), "*the peninsula of the Arabs*," and the people عَرَب ('Arab); "Bedawee" in modern Arabic, and Aarâb (أَعْرَاب) in the old language, being applied to people of the desert, as distinguished from townspeople. They give no satisfactory derivation of the name 'Arab, that from Ysarub being puerile. The Hebrew designation, 'Ereb, has been thought to be from 'Arabah, "a desert," &c., which, with the article, is the name of an extensive district in Arabia Petræa.

Geographical Divisions. — Arabia was divided, by the Greeks, into *Arabia Felix* (ἡ εὐδαίμων Ἀραβία), *Arabia Deserta* (ἡ ἔρημος Ἀραβία), (Strab. xvi. p. 767; Plin. vi. 28, § 32; Diod. Sic. ii. 48 ff.), and *Arabia Petræa* (ἡ πετραία Ἀραβία, Pt. v. 17, § 1). The first two divisions were those of the earlier writers; the third being introduced by Ptolemy. According to this geographer's arrangement, they included, within doubtful limits, 1, the whole peninsula; 2, the Arabian desert north of the former; and, 3, the desert of Petra, and the peninsula of Sinai. It will be more convenient in this article to divide the country, agreeably to the natural divisions and the native nomenclature, into *Arabia Proper*, or Jezeeret El-'Arab, containing the whole peninsula as far as the limits of the northern deserts; *Northern Arabia*, or El-Bádiyeh, bounded by the peninsula, the Euphrates, Syria, and the desert of Petra, constituting properly Arabia Deserta, or the great desert of Arabia; and *Western Arabia*, the desert of Petra and the peninsula of Sinai, or the country that has been called Arabia Petræa, bounded by Egypt, Palestine, Northern Arabia, and the Red Sea.

[a] See the Report of Mr. Robert Stephenson, and of M. Bourdaloue, quoted in Allen's *Dead Sea*.

[b] Schubert's barometrical observations are not very intelligible, but they at least show this: at the end of the 2d day his halting-place was 495 ft. above the water of the Gulf; 3d day, 1017 ft.; 4th day, 2180 ft. Then, after leaving Petra, his halting-place (? in the Arabah) was 97 ft. below the water of the Gulf (Schubert; Ritter, *Sinai*, p. 1097).

[c] See in PAUL respecting his journey to Arabia (Gal. i. 17). H.

Arabia Proper, or the Arabian peninsula, consists of high table-land, declining towards the north; its most elevated portions being the chain of mountains running nearly parallel to the Red Sea, and the territory east of the southern part of this chain. The high land is encircled from the 'Akabah to the head of the Persian Gulf by a belt of low littoral country; on the west and southwest the mountains fall abruptly to this low region; on the opposite side of the peninsula the fall is generally gradual. So far as the interior has been explored, it consists of mountainous and desert tracts, relieved by large districts under cultivation, well-peopled, watered by wells and streams, and enjoying periodical rains. The water-shed, as the conformation of the country indicates, stretches from the high land of the Yemen to the Persian Gulf. From this descend the torrents that irrigate the western provinces, while several considerable streams — there are no navigable rivers — reach the sea in the opposite direction: two of these traverse 'Omán; and another, the principal river of the peninsula, enters the Persian Gulf on the coast of El-Bahreyn, and is known to traverse the inland province called Yemámeh. The geological formation is in part volcanic; and the mountains are basalt, schist, granite, as well as limestone, &c.; the volcanic action being especially observable about El-Medeeneh on the northwest, and in the districts bordering the Indian Ocean. The most fertile tracts are those on the southwest and south. The modern Yemen is especially productive, and at the same time, from its mountainous character, picturesque. The settled regions of the interior also appear to be more fertile than is generally believed to be the case; and the deserts afford pasturage after the rains. The principal products of the soil are date-palms, tamarind-trees, vines, fig-trees, tamarisks, acacias, the banana, &c., and a great variety of thorny shrubs, — which, with others, afford pasture for the camels, — the chief kinds of pulse and cereals (except oats), coffee, spices, drugs, gums and resins, cotton and sugar. Among the metallic and mineral products are lead, iron, silver (in small quantities), sulphur, the emerald, onyx, &c. The products mentioned in the Bible as coming from Arabia will be found described under their respective heads. They seem to refer, in many instances, to merchandise of Ethiopia and India, carried to Palestine by Arab and other traders. Gold, however, was perhaps found in small quantities in the beds of torrents (comp. Diod. Sic. ii. 93, iii. 45, 47); and the spices, incense, and precious stones, brought from Arabia (1 K. x. 2, 10, 15; 2 Chr. ix. 1, 9, 14; Is. lx. 6; Jer. vi. 20; Ez. xxvii. 22), probably were the products of the southern provinces, still celebrated for spices, frankincense, ambergris, &c., as well as for the onyx and other precious stones. Among the more remarkable of the wild animals of Arabia, besides the usual domestic kinds, and of course the camel and the horse, for both of which it is famous, are the wild ass, the musk-deer, wild goat, wild sheep, several varieties of the antelope, the hare, monkeys (in the south, and especially in the Yemen); the bear, leopard, wolf, jackal, hyena, fox; the eagle, vulture, several kinds of hawk, the pheasant, red-legged partridge (in the peninsula of Sinai), sand-grouse (throughout the country), the ostrich (abundantly in Central Arabia, where it is hunted by Arab tribes); the tortoise, serpents, locusts, &c. Lions were formerly numerous, as the names of places testify. The sperm-whale is found off the coasts bordering the Indian Ocean. Greek and Roman writers (Herod., Agatharch. *ap.* Muller Strab., Diod. Sic., Q. Curt., Dion. *Perieg.*, Heliod *Æthiop.*, and Plin.) mention most of the Biblical and modern products, and the animals, above enumerated, with some others. (See the *Dictionary of Geography.*)

Arabia Proper may be subdivided into five principal provinces: the Yemen; the districts of Hadramäwt, Mahreh, and 'Omán, on the Indian Ocean and the entrance of the Persian Gulf; El-Bahreyn, towards the head of the Gulf just named; the great central country of Nejd and Yemámeh; and the Hijáz and Tihámeh on the Red Sea. The Arabs also have five divisions, according to the opinion most worthy of credit (*Marásid*, ed. Juynboll, *in voc.* Hijáz; *comp.* Strabo), Tihámeh, the Hijáz, Nejd, El-'Arood (the provinces lying towards the head of the Persian Gulf, including Yemámeh), and the Yemen (including 'Omán and the intervening tracts). They have, however, never agreed either as to the limits or the number of the divisions. It will be necessary to state in some detail the positions of these provinces, in order to the right understanding of the identifications of Biblical with Arab names of places and tribes.

The Yemen embraced originally the most fertile districts of Arabia, and the frankincense and spice country. Its name, signifying "the right hand" (and therefore "south," *comp.* Matt. xii. 42), is supposed to have given rise to the appellation εὐδαίμων (Felix), which the Greeks applied to a much more extensive region. At present, it is bounded by the Hijáz on the north, and Hadramäwt on the east, with the sea-board of the Red Sea and the Indian Ocean; but formerly, as Fresnel remarks (*comp.* Sale, *Prelim. Disc.*), it appears to have extended at least so as to include Hadramäwt and Mahreh (Ibn-El-Wardee MS.; Yákoot's *Mushtarak*, ed. Wüstenfield, and *Marásid*, *passim*). In this wider acceptation, it embraced the region of the first settlements of the Joktanites. Its modern limits include, on the north, the district of Khäwlán (not, as Niebuhr supposes, two distinct districts), named after Khäwlán (*Kámoos*), the Joktanite (*Marásid*, *in* voc., and Caussin de Perceval, *Essai sur l'Hist. des Arabes avant l'Islamisme*, i. 113); and that of Nejrán, with the city of that name founded by Nejrán the Joktanite (Caussin, i. 60, and 113 ff.), which is, according to the soundest opinion, the Negra of Ælius Gallus (Strab. xvi. 782; see Jomard, *Études géogr. et hist. sur l'Arabie*, appended to Mengin, *Hist. de l'Égypte*, &c., iii. 385–6).

Hadramäwt, on the coast east of the Yemen, is a cultivated tract contiguous to the sandy deserts called El-Ahkáf, which are said to be the original seats of the tribe of 'A'd (Ibn-El-Wardee, and others). It was celebrated for its frankincense, which it still exports (El-Idreesee, ed. Jaubert, i. 54), and formerly it carried on a considerable trade, its principal port being Zafári, between Mirbát and Rás Sájir, which is now composed of a series of villages (Fresnel, 4e *Lettre*, *Journ. Asiat.* iiie Série, v. 521). To the east of Hadramäwt are the districts of Shihr, which exported ambergris (*Marásid*, *in voc.*), and Mahreh (so called after a tribe of Kuláh (*Id. in voc.*), and therefore Joktanite), extending from Seyhoot to Karwán (Fresnel, 4e *Lettre*, p. 510). 'Omán forms the easternmost corner of the south coast, lying at the entrance of the Persian gulf It presents the same natural charac-

Digitized by Google

teristics as the preceding districts, being partly desert with large fertile tracts. It also contains some considerable lead-mines.

The highest province on the Persian Gulf is El-Bahreyn, between 'Omán and the head of the Gulf, of which the chief town is Hejer (according to some, the name of the province also) (*Kámoos, Marásid, in vocc.*) It contains the towns (and districts) of Kateef and El-Ahsà (El-Idreesee, i. 371; *Marásid, in vocc.; Mushtarak, in voc.* El-Ahsà), the latter not being a province, as has been erroneously supposed. The inhabitants of El-Bahreyn dwelling on the coast are principally fishermen and pearl-divers. The district of El-Ahsà abounds in wells, and possesses excellent pastures, which are frequented by tribes of other parts.

The great central province of Nejd, and that of Yemámeh, which bounds it on the south, are little known from the accounts of travellers. Nejd signifies "high land," and hence its limits are very doubtfully laid down by the Arabs themselves. It consists of cultivated table-land, with numerous wells, and is celebrated for its pastures; but it is intersected by extensive deserts. Yemámeh appears to be generally very similar to Nejd. On the south lies the great desert called Er-Ruba el-Khálee, uninhabitable in the summer, but yielding pasturage in the winter after the rains. The camels of the tribes inhabiting Nejd are highly esteemed in Arabia, and the breed of horses is the most famous in the world. In this province are said to be remains of very ancient structures, similar to those east of the Jordan.

The Hijáz, and Tihámeh (or El-Ghór, the "low land"), are bounded by Nejd, the Yemen, the Red Sea, and the desert of Petra, the northern limit of the Hijáz being Eyleh (El-Makreezee's *Khitat, in voc.* Eyleh). The Hijáz is the holy land of Arabia, its chief cities being Mekkeh and El-Medeeneh; and it was also the first seat of the Ishmaelites in the peninsula. The northern portion is in general sterile and rocky; towards the south it gradually merges into the Yemen, or the district called El-'Aseer, which is but little noticed by either eastern or western geographers (see Jomard, p. 245 ff.). The province of Tihámeh extends between the mountain-chain of the Hijáz, and the shore of the Red Sea; and is sometimes divided into Tihámeh of the Hijáz, and Tihámeh of the Yemen. It is a parched, sandy tract, with little rain, and fewer pasturages and cultivated portions than the mountainous country.

Northern Arabia, or the Arabian Desert (البَادِيَة) is divided by the Arabs (who do not consider it as strictly belonging to their country) into Bádiyet Esh-Shám, "the Desert of Syria," Bádiyet El-Jezeereh, "the Desert of Mesopotamia" (not "—— of Arabia," as Winer supposes), and Bádiyet El-'Irák, "the Desert of El-'Irák." It is, so far as it is known to us, a high, undulating, parched plain, of which the Euphrates forms the natural boundary from the Persian Gulf to the frontier of Syria, whence it is bounded by the latter country and the desert of Petra on the north-west and west, the peninsula of Arabia forming its southern limit. It has few oases, the water of the wells is generally either brackish or unpotable, and it is visited by the sand-wind called *Samoom*, of which however the terrors have been much exaggerated. The Arabs find pasture for their flocks and herds after the rains, and in the more depressed plains; and the desert generally produces prickly shrubs, &c., on which the camels feed. The inhabitants were known to the ancients as σκηνῖται, "dwellers in tents," or perhaps so called from their town *al* Σκηναί (Strab. xvi. 747, 767; Diod. Sic. ii. 24; Amm. Marc. xxiii. 6; *comp.* Is. xiii. 20 Jer. xlix. 31; Ezek. xxxviii. 11); and they extended from Babylonia on the east (*comp.* Num. xxiii. 7; 2 Chr. xxi. 16; Is. ii. 6, xiii. 20), to the borders of Egypt on the west (Strab. xvi. 748; Plin. v. 12; Amm. Marc. xiv. 4, xxii. 15). These tribes, principally descended from Ishmael and from Keturah, have always led a wandering and pastoral life. Their predatory habits are several times mentioned in the O. T. (2 Chr. xxi. 16 and 17, xxvi. 7; Job i. 15; Jer. iii. 2). They also conducted a considerable trade of merchandise of Arabia and India from the shores of the Persian Gulf (Ezek. xxvii. 20–24), whence a chain of oases still forms caravan stations (Burckhardt, *Arabia*, Appendix vi.); and they likewise traded from the western portions of the peninsula. The latter traffic appears to be frequently mentioned in connection with Ishmaelites, Keturahites, and other Arabian peoples (Gen. xxxvii. 25, 28; 1 K. x. 15, 25; 2 Chr. ix. 14, 24; Is. lx. 6; Jer. vi. 20), and probably consisted of the products of southern Arabia and of the opposite shores of Ethiopia; it seems, however, to have been chiefly in the hands of the inhabitants of Idumæa; but it is difficult to distinguish between the references to the latter people and to the tribes of Northern Arabia in the passages relating to this traffic. That certain of these tribes brought tribute to Jehoshaphat appears from 2 Chr. xvii. 11; and elsewhere there are indications of such tribute (*comp.* passages referred to above).

Western Arabia includes the peninsula of Sinai [SINAI], and the desert of Petra, corresponding generally with the limits of Arabia Petræa. The latter name is probably derived from that of its chief city, not from its stony character. It was in the earliest times inhabited by a people whose genealogy is not mentioned in the Bible, the Horites or Horim (Gen. xiv. 6, xxxvi. 20, 21; Deut. ii. 12, 22, xxxvi. 20–22). [HORITES.] Its later inhabitants were in part the same as those of the preceding division of Arabia, as indeed the boundary of the two countries is arbitrary and unsettled; but it was mostly peopled by descendants of Esau, and was generally known as the land of Edom, or Idumæa [EDOM], as well as by its older appellation, the desert of Seir, or Mount Seir [SEIR]. The common origin of the Idumæans from Esau and Ishmael is found in the marriage of the former with a daughter of the latter (Gen. xxviii. 9, xxxvi. 3). The Nabathæans succeeded to the Idumæans, and Idumæa is mentioned only as a geographical designation after the time of Josephus. The Nabathæans have always been identified with Nebaioth, son of Ishmael (Gen. xxv. 13; Is. lx. 7), until Quatremère (*Mémoire sur les Nabathéens*) advanced the theory that they were of another race, and a people of Mesopotamia. [NEBAIOTH.] Petra was in the great route of the western caravan-traffic of Arabia, and of the merchandise brought up the Elanitic Gulf. See preceding section, and EDOM: ELATH, EZIONGEBER, &c.

Inhabitants.[a] — The Arabs, like every other an

[a] In this section is included the history. The Arab

ient nation of any celebrity, have traditions representing their country as originally inhabited by races which became extinct at a very remote period. These were the tribes of 'A'd, Thamood, Umeiyim, Abeel, Tasm, Jedees, 'Emleek (Amalek), Jurhum (the *first* of this name), and Webári. Some omit the fourth and the last two, but add Jásim. The majority of their historians derive these tribes from Shem; but some, from Ham, though *not* through Cush.[a] Their earliest traditions that have any obvious relation to the Bible refer the origin of the existing nation in the first instance to Kahtán, whom they and most European scholars identify with Joktan; and secondly to Ishmael, whom they assert to have married a descendant of Kahtán, though they only carry up their genealogies to 'Adnán (said to be of the 21st generation before Mohammed). They are silent respecting Cushite settlements in Arabia; but modern research, we think, proves that Cushites were among its early inhabitants. Although Cush in the Bible usually corresponds to Ethiopia, certain passages seem to indicate Cushite peoples in Arabia; and the series of the sons of Cush should, according to recent discoveries, be sought for in order along the southern coast, exclusive of Sebà (Meroë), occupying one extreme of their settlements, and Nimrod the other. The great ruins of Ma-rib or Sebà, and of other places in the Yemen and Hadramäwt, are not those of a Semitic people; and further to the east, the existing language of Mahreh, the remnant of that of the inscriptions found on the ancient remains just mentioned, is in so great a degree apparently African, as to be called by some scholars *Cushite;* while the settlements of Raamah and those of his sons Sheba and Dedan are probably to be looked for towards the head of the Persian Gulf, bordered on the north by the descendants of Keturah, bearing the same names as the two latter. In Babylonia also independent proofs of this immigration of Cushites from Ethiopia have, it is thought, been lately obtained. The ancient cities and buildings of southern Arabia, in their architecture, the inscriptions they contain, and the native traditions respecting them, are of the utmost value in aiding a student of this portion of primeval history. Indeed they are the only important archaic monuments of the country; and they illustrate both its earliest people and its greatest kingdoms. Ma-rib, or Sebà[b] (the Mariaba of the Greek geographers), is one of the most interesting of these sites. See Michaelis's *Questions*, No. 94, &c. in Niebuhr's *Arabia*.) It was founded, according to the general agreement of tradition, by 'Abd-esh-Shems Sebà, grandson of Yaarub the Kahtánite (*Mushtarak, in loc.*; Abu-l-Fidà, *Hist. anteisl.* ed. Fleischer, p. 114); and the Dyke of El-'Arim, which was situate near the city, and the rupture of which (A. D. 150–170 according to De Sacy; 120 according to Caussin de Perceval) formed an era in Arabian history, is generally ascribed to Lukmán the Greater, the 'A'dite, who founded the dynasty of the 2d 'A'd (Ibn-El-Wardee MS.; Hamza Ispahanensis, *ap.* Schultens, pp. 24–5; El-Mes-'oodee, cited by De Sacy, *Mém. de l'Acad.*, xlviii p. 484 ff.; and Ibn Khaldoon in Caussin's *Essai*, i. 16). 'A'dites (in conjunction with Cushites) were probably the founders of this and similar structures, and were succeeded by a predominantly Joktanite people, the Biblical Sheba, whose name is preserved in the Arabian Sebà, and in the *Sabæi* of the Greeks. It has been argued (Caussin, *Essai*, i. 42 ff.; Renan, *Langues Sémitiques*, i. 300) that the 'A'dites were the Cushite Seba; but this hypothesis, which involves the question of the settlements of the eldest son of Cush, and that of the descent of the 'A'dites, rests solely on the existence of Cushite settlements in southern Arabia, and of the name of Sebà (سَبَا) in the Yemen (by these writers inferentially identified with סְבָא; by the Arabs, unanimously, with Sebà the Kahtánite, or שְׁבָא; the Hebrew *shin* being, in by far the greater number of instances, *sin* in Arabic); and it necessitates the existence of the two Biblical kingdoms of Seba and Sheba in a circumscribed province of southern Arabia, a result which we think is irreconcilable with a careful comparison of the passages in the Bible bearing on this subject. [CUSH, SEBA, SHEBA.] Neither is there evidence to indicate the identity of 'A'd and the other extinct tribes with any Semitic or Hamitic people. They must, in the present state of knowledge, be classed with the Rephaim and other peoples whose genealogies are not known to us. The only one that can possibly be identified with a Scriptural name is Amalek, whose supposed descent from the grandson of Esau seems inconsistent with Gen. xiv. 7 and Num. xxiv. 20. [AMALEK.]

The several nations that have inhabited the country are divided, by the Arabs, into extinct and existing tribes; and these are again distinguished as 1. El-'Arab el-'A'ribeh (or —— el-'Arbá, or —— el-'Aribeh), the Pure or Genuine Arabs; 2. El 'Arab el-Muta'arribeh, and 3. El-'Arab el-Mustaaribeh, the Insititious, or Naturalized, Arabs. Of many conflicting opinions respecting these races, two only are worthy of note. According to the first of these, El-'Arab el-'A'ribeh denotes the extinct tribes, with whom some conjoin Kahtán; while the other two, as synonymous appellations, belong to the descendants of Ishmael.[c] According to the second, El-'Arab el-'A'ribeh denotes the extinct tribes; El-'Arab el-Muta'arribeh, the unmixed descendants of Kahtán; and El-'Arab el-Mustaaribeh the descendants of Ishmael, by the daughter of Mudád the Joktanite. That the descendants of Joktan occupied the principal portions of the south and southwest of the peninsula, with colonies in the interior, is attested by the Arabs and fully confirmed by historical and philological researches. It is also asserted that they have been gradually ab-

materials for the latter are meagre, and almost purely traditional. The chronology is founded on genealogies, and is too intricate and unsettled for discussion in this article; but it is necessary to observe that "son" should often be read "descendant," and that the Arabs ascribe great length of life to the ancient people.

[a] This enumeration is from a comparison of Arab authors. Caussin de Perceval has entered into some detail on the subject (*Essai*, i. 11–35), but without satisfactorily reconciling contradictory opinions; and his identifications of these with other tribes are purely hypothetical.

[b] Sebà was the city of Ma-rib (*Mushtarak, in voc.*), or the country in the Yemen of which the city was Ma-rib (*Marásid, in voc.*). See also SHEBA.

[c] El-'Arab el-'A'ribeh is conventionally applied by the lexicographers to all who spoke pure Arabic before its corruption began.

Digitized by Google

sorbed into the Ishmaelite immigrants, though not without leaving strong traces of their former existence. Fresnel, however (1e *Lettre*, p 24), says that they were quite distinct, at least in Mohammed's time, and it is not unlikely that the Ishmaelite element has been exaggerated by Mohammedan influence.

Respecting the Joktanite settlers we have some certain evidence. In Genesis (x. 30) it is said, "and their dwelling was from Mesha, as thou goest unto Sephar, a mount of the east [Kedem]." The position of Mesha is very uncertain; it is most reasonably supposed to be the western limit of the first settlers [MESHA]. Sephar is undoubtedly Dhafári, or Zafári, of the Arabs (probably pronounced, in ancient times, without the final vowel, as it is at the present day), a name not uncommon in the peninsula, but especially that of two celebrated towns — one being the seaport on the south coast, near Mirbát; the other, now in ruins, near San'à, and said to be the ancient residence of the Himyerite kings (Es-Sághánee, MS.; *Mushtarak, in voc.; Marásid, ib.;* El-Idreesee, i. 148). Fresnel (4e *Lettre*, p. 516 ff.) prefers the seaport, as the Himyerite capital, and is followed by Jomard (*Études*, p. 367). He informs us that the inhabitants call this town "Isfor." Considering the position of the Joktanite races, this is probably Sephar. It is situate near a thuriferous mountain (*Marásid, in voc.*), and exports the best frankincense (Niebuhr, p. 148). Zafári, in the Yemen, however, is also among mountains [SEPHAR]. In the district indicated above are distinct and undoubted traces of the names of the sons of Joktan mentioned in Genesis, such as Hadramäwt for Hazarmaveth, Azál for Uzal, Sebà for Sheba, &c. Their remains are found in the existing inhabitants of (at least) its eastern portion, and their records in the numerous Himyerite ruins and inscriptions.

The principal Joktanite kingdom, and the chief state of ancient Arabia, was that of the Yemen, founded (according to the Arabs) by Yaarub, the son (or descendant) of Kahtán (Joktan). Its most ancient capital was probably San'à, formerly called Azál (أزال, or أوزال in the *Marásid, in voc.* San'à), after Azál, son of Joktan (Yákoot). [UZAL.] The other capitals were Ma-rib, or Sebà, and Zafári. This was the Biblical kingdom of Sheba. Its rulers, and most of its people, were descendants of Sebà (= Sheba), whence the classical *Sabæi* (Diod. Sic. iii. 38, 46). Among its rulers was probably the Queen of Sheba who came to hear the wisdom of Solomon (1 K. x. 2). The Arabs call her Bilkees, a queen of the later Himyerites, and their traditions respecting her are otherwise not worthy of credit. [SHEBA.] The dominant family was apparently that of Himyer, son (or descendant) of Sebà. A member of this family founded the more modern kingdom of the Himyerites. The testimony of the Bible, and of the classical writers, as well as native tradition, seems to prove that the latter appellation superseded the former only shortly before the Christian æra: i. e. after the foundation of the later kingdom. "Himyerite," however, is now very vaguely used. Himyer, it may be observed, is perhaps "red" (حِمْيَر, from حُمْرَة, or أَحْمَر), and several places in Arabia whose soil is reddish derive their names from Asfar (أَصْفَر), "reddish." This may identify Himyer (the *red man*) with Ophir, respecting whose settlements, and the position of the country called Ophir, the opinion of the learned is widely divided [OPHIR]. The similarity of signification with φοίνιξ and ἐρυθρός lends weight to the tradition that the Phœnicians came from the Erythræan Sea (Herod. vii. 89) The maritime nations of the Mediterranean who had an affinity with the Egyptians, — such as the Philistines, and probably the primitive Cretans and Carians, — appear to have been an offshoot of an early immigration from southern Arabia, which moved northwards, partly through Egypt [CAPHTOR]. It is noticeable that the Shepherd invaders of Egypt are said to have been Phœnicians; but Manetho, who seems to have held this opinion, also tells us that some said they were Arabs (Manetho, *ap.* Cory, *Anc. Fragments*, 2d ed., p. 171), and the hieroglyphic name has been supposed to correspond to the common appellation of the Arabs, Shasu, the "camel-riding Shasu" (*Select Papyri*, pl. iiii.), an identification entirely in accordance with the Egyptian historian's account of their invasion and polity In the opposite direction, an early Arab domination of Chaldæa is mentioned by Berosus (Cory, p. 60), as preceding the Assyrian dynasty. All these indications, slight as they are, must be borne in mind in attempting a reconstruction of the history of southern Arabia. The early kings of the Yemen were at continual feud with the descendants of Kahlán (brother of Himyer) until the fifteenth in descent (according to the majority of native historians) from Himyer united the kingdom. This king was the first Tubbaa, a title also distinctive of his successors, whose dynasty represents the proper kingdom of Himyer, whence the *Homeritæ* (Ptol. vi. 7; Plin. vi. 28). Their rule probably extended over the modern Yemen, Hadramäwt, and Mahreh. The fifth Tubbaa, Dhu-l-Adhár, or Zu-l-Azár, is supposed (Caussin, i. 73) to be the Ilasarus of Ælius Gallus (B. C. 24). The kingdom of Himyer lasted until A. D. 525, when it fell before an Abyssinian invasion. Already, about the middle of the 4th century, the kings of Axum appear to have become masters of part of the Yemen (Caussin, *Essai*, i. 114; *Zeitschr. der Deutschen Morgenländ. Gesellschaft*, vii. 17 ff., xi. 338 ff.), adding to their titles the names of places in Arabia belonging to Himyer. After four reigns they were succeeded by Himyerite princes, vassals of Persia, the last of whom submitted to Mohammed. Kings of Hadramäwt (the people of Hadramäwt are the classical *Chatramotitæ*, Plin. vi. 28; *comp. Adramitæ*) are also enumerated by the Arabs (Ibn-Khaldoon, *ap.* Caussin, i. 135 ff.) and distinguished from the descendants of Yaarub, an indication, as is remarked by Caussin (*l. c.*), of their separate descent from Hazarmaveth [HAZARMAVETH]. The Greek geographers mention a fourth people in conjunction with the Sabæi, Homeritæ, and Chatramotitæ, — the *Minæi* (Strab xvi. 768; Ptol. v. 7, § 23; Plin. vi. 32; Diod. Sic. iii. 42) who have not been identified with any Biblical or modern name. Some place them as high as Mekkeh and derive their name from Minà (the sacred valley N. E. of that city), or from the goddess Manáh, worshipped in the district between Mekkeh and El-Medeeneh. Fresnel, however, places them in the Wádu Do'án in Hadramäwt, arguing

Digitized by Google

hat the Yemen anciently included this tract, that the Minæi were probably the same as the Rhabanitæ or Rhamanitæ (Ptol. vi. 7, § 24; Strabo, xvi. p. 782), and that 'Ραμανιτων was a copyist's error for 'Ιεμανιτων.

The other chief Joktanite kingdom was that of the Hijáz, founded by Jurhum, the brother of Yaarub, who left the Yemen and settled in the neighborhood of Mekkeh. The Arab lists of its kings are inextricably confused; but the name of their leader and that of two of his successors was Mudád (or El-Mudád), who probably represents Almodad [ALMODAD]. Ishmael, according to the Arabs, married a daughter of the first Mudád, whence sprang 'Adnán the ancestor of Mohammed. This kingdom, situate in a less fertile district than the Yemen, and engaged in conflict with aboriginal tribes, never attained the importance of that of the south. It merged, by intermarriage and conquest, into the tribes of Ishmael. (Kutb-ed-Deen, ed. Wüstenfeld, pp. 35 and 39 ff.; comp. authorities quoted by Caussin.) Fresnel cites an Arab author who identifies Jurhum with Hadoram [HADORAM].

Although these were the principal Joktanite kingdoms, others were founded beyond the limits of the peninsula. The most celebrated of these were that of El-Heereh in El-Irák, and that of Ghassán on the confines of Syria; both originated by emigrants after the Flood of El-'Arim. El-Heereh soon became Ishmaelitic; Ghassán long maintained its original stock. Among its rulers were many named El-Hárith. Respecting the presumed identity of some of these with kings called by the Greeks and Romans Aretas, and with the Aretas mentioned by St. Paul (2 Cor. xi. 32), see ARETAS.

The Ishmaelites appear to have entered the peninsula from the northwest. That they have spread over the whole of it (with the exception of one or two districts on the south coast which are said to be still inhabited by unmixed Joktanite peoples), and that the modern nation is predominantly Ishmaelite, is asserted by the Arabs. They do not, however, carry up their genealogies higher than 'Adnán (as we have already said), and they have lost the names of most of Ishmael's immediate and near descendants. Such as have been identified with existing names will be found under the several articles bearing their names. [See also HAGARENES.] They extended northwards from the Hijáz into the Arabian desert, where they mixed with Keturahites and other Abrahamic peoples; and westwards to Idumæa, where they mixed with Edomites, &c. The tribes sprung from Ishmael have always been governed by petty chiefs or heads of families (sheykhs and emeers); they have generally followed a patriarchal life), and have not originated kingdoms, though they have in some instances succeeded to those of Joktanites, the principal one of these being that of El-Heereh. With reference to the Ishmaelites generally, we may observe, in continuation of a former remark, that although their first settlements in the Hijáz, and their spreading over a great part of the northern portions of the peninsula, are sufficiently proved, there is doubt as to the wide extension given to them by Arab tradition. Mohammed derived from the Jews whatever tradition he pleased, and silenced any contrary, by the Kur-án or his own dicta. This religious element, which does not directly affect the tribes of Joktan (whose settlements are otherwise unquestionably identified), has a great influence over those of Ishmael. They therefore cannot be certainly proved to have spread over the peninsula, notwithstanding the almost universal adoption of their language (which is generally acknowledged to have been the Arabic commonly so called), and the concurrent testimony of the Arabs; but from these and other considerations it becomes at the same time highly probable that they now form the predominant element of the Arab nation.

Of the descendants of Keturah the Arabs say little. They appear to have settled chiefly north of the peninsula in Desert Arabia, from Palestine to the Persian Gulf; and the passages in the Bible in which mention is made of Dedan (except those relating to the Cushite Dedan, Gen. x. 7) refer apparently to the tribe sprung from this race (Is. xxi. 13; Jer. xxv. 23; Ez. xxvii. 20), perhaps with an admixture of the Cushite Dedan, who seems to have passed up the western shores of the Persian Gulf. Some traces of Keturahites, indeed, are asserted to exist in the south of the peninsula, where a king of Himyer is said to have been a Midianite (El-Mes'oodee, *ap.* Schultens, pp. 158–9), and where one dialect is said to be of Midian, and another of Jokshan son of Keturah (*Moajam*); but these traditions must be ascribed to the Rabbinical influence in Arab history. Native writers are almost wholly silent on this subject; and the dialects mentioned above are not, so far as they are known to us, of the tribes of Keturah. [KETURAH, &c.]

In Northern and Western Arabia are other peoples which, from their geographical position and mode of life, are sometimes classed with the Arabs. Of these are AMALEK, the descendants of ESAU, &c.

Religion. — The most ancient idolatry of the Arabs we must conclude to have been fetichism, of which there are striking proofs in the sacred trees and stones of historical times, and in the worship of the heavenly bodies, or Sabæism. With the latter were perhaps connected the temples (or palace-temples) of which there are either remains or traditions in the Himyerite kingdom; such as Beyt Ghumdán in San'à, and those of Reydán, Beynooneh, Ru'eyn, 'Eyneyn, and Riám. To the worship of the heavenly bodies we find allusions in Job (xxxi. 26–28) and to the belief in the influence of the stars to give rain (xxxviii. 31), where the Pleiades give rain, and Orion withholds it; and again in Judges (v. 20, 21) where the stars fight against the host of Sisera. The names of the objects of the earlier fetichism, the stone-worship, tree-worship, &c., of various tribes, are too numerous to mention. One, that of Manáh, the goddess worshipped between Mekkeh and El-Medeeneh has been compared with Meni (Is. lxv. 11), which is rendered in the A. V. "number" [MENI]. Magianism, an importation from Chaldæa and Persia, must be reckoned among the religions of the pagan Arabs; but it never had very numerous followers. Christianity was introduced in southern Arabia towards the close of the 2d century, and about a century later it had made great progress. It flourished chiefly in the Yemen, where many churches were built (see Philostorg. *Hist. Eccles.* iii.; Sozomen, vi.; Evagr. vi.). It also rapidly advanced in other portions of Arabia, through the kingdom of Heereh and the contiguous countries, Ghassán, and other parts. The persecutions of the Christians, and more particularly of those of Nejrán by the Tubbaa Zu-n-Nuwás, brought about the fall of the Himyerite dynasty by the invasion of the

Digitized by Google

Christian rulers of Abyssinia. Judaism was propagated in Arabia, principally by Karaites, at the captivity, but it was introduced before that time. It became very prevalent in the Yemen, and in the Hijáz, especially at Kheybar and El-Medeeneh, where there are said to be still tribes of Jewish extraction. In the period immediately preceding the birth of Mohammed another class had sprung up, who, disbelieving the idolatry of the greater number of their countrymen, and not yet believers in Judaism, or in the corrupt Christianity with which alone they were acquainted, looked to a revival of what they called the "religion of Abraham" (see Sprenger's *Life of Mohammed*, i., Calcutta, 1856). The promulgation of the Mohammedan imposture overthrew paganism, but crushed while it assumed to lead the movement which had been one of the causes of its success, and almost wholly superseded the religions of the Bible in Arabia.

Language. — Arabic, the language of Arabia, is the most developed and the richest of the Semitic languages, and the only one of which we have an extensive literature: it is, therefore, of great importance to the study of Hebrew. Of its early phases we know nothing; while we have archaic monuments of the Himyeritic (the ancient language of southern Arabia), though we cannot fix their precise ages. Of the existence of Hebrew and Chaldee (or Aramaic) in the time of Jacob there is evidence in Gen. (xxxi. 47); and probably Jacob and Laban understood each other, the one speaking Hebrew and the other Chaldee. It seems also (Judg. vii. 9–15) that Gideon, or Phurah, or both, understood the conversation of the "Midianites, and the Amalekites, and all the children of the east" (בְּנֵי קֶדֶם). It is probable, therefore, that in the 14th or 13th century B. C. the Semitic languages differed much less than in after times. But it appears from 2 K. xviii. 26, that in the 8th century B. C. only the educated classes among the Jews understood Aramaic. With these evidences before us, and making a due distinction between the archaic and the known phases of the Aramaic and the Arabic, we think that the Himyeritic is to be regarded as a sister of the Hebrew, and the Arabic (commonly so called) as a sister of the Hebrew and the Aramaic, or, *in its classical phasis*, as a descendant of a sister of these two, but that the Himyeritic is mixed with an African language, and that the other dialects of Arabia are in like manner, though in a much less degree, mixed with an African language. The inferred differences between the older and later phases of the Aramaic, and the presumed difference between those of the Arabic, are amply confirmed by comparative philology. The division of the Ishmaelite language into many dialects is to be attributed chiefly to the separation of tribes by uninhabitable tracts of desert, and the subsequent amalgamation of those dialects to the pilgrimage and the annual meetings of 'Okáz, a fair in which literary contests took place, and where it was of the first importance that the contending poets should deliver themselves in a language perfectly intelligible to the mass of the people congregated, in order that it might be *critically* judged by them; for many of the meanest of the Arabs, utterly ignorant of reading and writing, were of the highest of the authorities consulted by the lexicologists when the corruption of the language had commenced, *i. e.* when the Arabs, as Mohammedans, had begun to spread among foreigners.

Respecting the Himyeritic,[a] until lately little was known; but monuments bearing inscriptions in this language have been discovered in the southern parts of the peninsula, principally in Hadramáwt and the Yemen, and some of the inscriptions have been published by Fresnel, Arnaud, Wellsted, and Cruttenden;[b] while Fresnel has found a dialect still spoken in the district of Mahreh and westwards as far as Kisheem, that of the neighborhood of Zafári and Mirbát being the purest, and called "Ekhili;" and this is supposed with reason to be the modern phasis of the old Himyeritic (4° *Lettre*). Fresnel's alphabet has been accepted by the learned. The dates found in the inscriptions range from 30 (on the dyke of Ma-rib) to 604 at Hisn Ghoráb, but what era these represent is uncertain. Ewald (*Ueber die Himyarische Sprache*, in Hœfer's *Zeitschrift*, i. 295 ff.) thinks that they are years of the Rupture of the Dyke, while acknowledging their apparent high antiquity; but the difficulty of supposing such inscriptions on a ruined dyke, and the fact that some of them would thus be brought later than the time of Mohammed, make it probable that they belong rather to an earlier era, perhaps that of the Himyerite empire, though what point marks its commencement is not determined. The Himyeritic in its earlier phasis probably represents the first Semitic language spoken in Arabia.[c]

The *manners* and *customs* of the Arabs[d] are of great value in illustrating the Bible; but supposed parallels between the patriarchal life of the Scriptures and the state of the modern Arabs must not be hastily drawn. It should be remembered that this people are in a degraded condition; that they have been influenced by Jewish contact, especially by the adoption, by Mohammed, of parts of the ceremonial law, and of rabbinical observances; and that they are not of the race of Israel. They must be regarded, 1st, as Bedawees, or people of the desert, and 2dly, as settled tribes or townspeople.

[a] By this term is to be understood the ancient language of southern Arabia generally, not that of the Himyerites only.

[b] * On the pretended discovery of a key for reading the Himyeritic inscriptions by the English writer, Rev. Charles Forster, Professor Salisbury has a decisive article in the *Bibl. Sacra*, ii. 237–260. H.

[c] * In 1863 the Trustees of the British Museum published a volume entitled "Inscriptions in the Himyaritic character, discovered chiefly in Southern Arabia, and now in the British Museum," with 18 lithographic plates containing forty-two inscriptions. A description of the monuments precedes the plates, but no commentary is given, the preparation of that part of the work having been assigned to Dr. Ernst Osiander, of Göppingen, whose essay on the Himyaritic Antiquities, *Zur himjarischen Alterthumskunde*, published in 1856 in the *Zeitschr. der Deutschen Morgenl. Gesellschaft* (x. 17–78) had given evidence of his peculiar qualifications for the task. The result of Dr. Osiander's labors has lately appeared as a posthumous publication in the *Zeitschr. d. D. M. Gesellschaft* for 1865 and 1866. xix. 159–298 (with 35 plates), and xx. 205–287, with the title, *Zur himjarischen Spruch- und Alterthumskunde von Dr. Ernst Osiander, aus seinem Nachlasse herausg. von Prof. Dr. M. A. Levy.* This is probably the most important work at present existing on the subject. A.

[d] The Arabs have impressed their national characteristics on every people whom they have conquered except the Tartar races. "Arab life" is therefore generally understood in a very wide sense. The modern Egyptians are essentially an Arab people.

Digitized by Google

The Bedawees acknowledge that their ancient excellence has greatly declined since the time of Mohammed, and there cannot be a doubt that this decline had commenced much earlier. Though each tribe boasts of its unadulterated blood, and pure language, their learned men candidly admit the depreciation of national character. Scriptural customs still found among them must therefore be generally regarded rather as indications of former practices, than as being identical with them. Furthermore, the Bible always draws a strong contrast between the character of the Israelites and that of the descendants of Ishmael, whom the Bedawees mostly represent. Yet they are, by comparison with other nations, an essentially unchangeable people, retaining a primitive, pastoral life, and many customs strikingly illustrating the Bible. They are not as much affected by their religion as might be supposed. Many tribes disregard religious observances, and even retain some pagan rites. The Wahhábees, or modern Arab reformers, found great difficulty in suppressing by persuasion, and even by force of arms, such rites; and where they succeeded, the suppression was, in most cases, only temporary. Incest, sacrifices to sacred objects, &c., were among these relics of paganism. (See Burckhardt's *Notes on the Bedouins and Wahabys*.) The less changed a tribe, however, the more difficulty is there in obtaining information respecting it. Such a one is very jealous of intercourse with strangers even of its own nation. In southern Arabia, for instance, is a tribe which will not allow a guest to stay within its encampments beyond the three days demanded by the laws of hospitality. This exclusion undoubtedly tends to preserve the language from corruption, and the people from foreign influence; but it probably does not improve the national character.

To the settled Arabs, these remarks apply with the difference that the primitive mode of life is in a great degree lost, and the Jewish practices are much more observable; while intermixture with foreigners, especially with Abyssinian and Negro concubines in the Yemen and the Hijáz, has tended to destroy their purity of blood. A Bedawee will scarcely marry out of his tribe, and is not addicted to concubinage; he considers himself, and is, quite distinct from a townsman in habits, in mode of thought, and in national feeling. Again, a distinction should be made between the people of northern and those of southern Arabia; the former being chiefly of Ishmaelite, the latter of Joktanite, descent, and in other respects than settlement and intermarriage with foreigners, further removed from the patriarchal character.

Regarded in the light we have indicated, Arab manners and customs, whether those of the Bedawees or of the townspeople, afford valuable help to the student of the Bible, and testimony to the truth and vigor of the Scriptural narrative. No one can mix with this people without being constantly and forcibly reminded either of the early patriarchs or of the settled Israelites. We may illustrate their pastoral life, their hospitality (that most remarkable of desert virtues) [HOSPITALITY], their universal respect for age (comp. Lev. xix. 32), their familiar deference (comp. 2 K. v. 13), their superstitious regard for the beard. On the signet-ring, which is worn on the little finger of the right hand, is usually inscribed a sentence expressive of submission to God, or of his perfection, &c., explaining Ex. xxxix. 30, "the engraving of a signet, Holiness to the Lord," and the saying of our Lord (John iii. 33), "He . . . hath set to his seal that God is true." As a mark of trust, this ring is given to another person (as in Gen. xli. 42). The inkhorn worn in the girdle is also very ancient (Ez. ix. 2, 3, 11), as well as the veil. (For these and many other illustrations, see Lane's *Modern Egyptians, index*.) A man has a right to claim his cousin in marriage, and he relinquishes this right by taking off his shoe, as the kinsman of Ruth did to Boaz (Ruth iv. 7, 8; see Burckhardt's *Notes on the Bedouins and Wahabys*, i. 113).

References in the Bible to the Arabs themselves are still more clearly illustrated by the manners of the modern people in their predatory expeditions, their mode of warfare, their caravan journeys, &c. To the interpretation of the book of Job, an intimate knowledge of this people, and their language and literature, is essential; for many of the most obscure passages can only be explained by that knowledge.

The *commerce* of Arabia especially connected with the Bible has been referred to in the sections on western and northern Arabia, and incidentally in mentioning the products of the peninsula. Direct mention of the commerce of the south does not appear to be made in the Bible, but it seems to have passed to Palestine principally through the northern tribes. Passages relating to the fleets of Solomon and to the maritime trade, however, bear on this subject, which is a curious study for the historical inquirer. The Joktanite people of southern Arabia have always been, in contradistinction to the Ishmaelite tribes, addicted to a seafaring life. The latter were caravan-merchants; the former, the chief traders of the Red Sea, carrying their commerce to the shores of India, as well as to the nearer coasts of Africa. Their own writers describe these voyages — since the Christian era especially, as we might expect from the modern character of their literature. (See the curious *Accounts of India and China by Two Mohammedan Travellers of the 9th cent.*, trans. by Renaudot, and amply illustrated in Mr. Lane's notes to his translation of the *Thousand and One Nights*.) The classical writers also make frequent mention of the commerce of southern Arabia. (See the *Dict. of Gr. and Rom. Geography*.) It was evidently carried to Palestine by the two great caravan routes from the head of the Red Sea and from that of the Persian Gulf; the former especially taking with it African produce; the latter, Indian. It should be observed that the wandering propensities of the Arabs, of whatever descent, do not date from the promulgation of El-Islám. All testimony goes to show that from the earliest ages the peoples of Arabia formed colonies in distant lands, and have not been actuated only by either the desire of conquest or by religious impulse in their foreign expeditions; but rather by restlessness and commercial activity.

The principal European authorities for the history of Arabia are, Schultens' *Hist. Imp. Vetus Joctanidarum*, Hard. Gr. 1786, containing extracts from various Arab authors; and his *Monumenta Vetustiora Arabica*, Lug. Bat. 1740; Eichhorn's *Monumenta Antiquiss. Hist. Arabum*, chiefly extracted from Ibn-Kuteybeh, with his notes, Goth. 1775; Fresnel, *Lettres sur l'Hist. des Arabes avant l'Islamisme*, published in the *Journal Asiatique*, 1838–53; Quatremère, *Mémoire sur les Nabathéens*; Caussin [de Perceval], *Essai sur l'Hist. des Arabes avant l'Islamisme*, Paris, 1847–8; for

the *geography*, Niebuhr's *Description de l'Arabie*, Amst. 1774, [a trans. of his *Beschreibung von Arabien*, Kopenh. 1772; see also his *Reisebeschreib. nach Arabien*, 2 vol. *ibid.* 1774–78;] Burckhardt's *Travels in Arabia*, Lond. 1829; Wellsted, *Narrative of a Journey to the ruins of Nukeb-al-Hajar*, in *Journ. of R. G. S.*, vii. 20; his copy of Inscription, in *Journ. of Asiat. Soc. of Bengal*, iii. 1834; and his *Journal*, London, 1838; Cruttenden, *Narrative of a Journey from Mokhá to San'á*; Jomard, *Études geogr. et hist.* appended to Mengin, *Hist. de l'Égypte*, vol. iii. Paris, 1839; [Burton, R. F., *Pilgrimage to El-Medinah and Meccah*, 3 vol., Lond. 1855–56; Palgrave, W. G., *Journey through Central and Eastern Arabia*, 2d ed., 2 vol., Lond. 1865;] and for Arabia Petræa and Sinai, Robinson's *Biblical Researches*; Stanley's *Sinai and Palestine*; Tuch's *Essay on the Sinaitic Inscriptions*, in the *Journal of the German Oriental Soc.* xiv. 129 ff. Strabo, Ptolemy, Diodorus Siculus, Pliny, and the minor geographers, should also be consulted. For the *manners and customs* of the Arabs, Burckhardt's *Notes on the Bedouins and Wahabys*, 8vo, 1831; and for Arab life in its widest sense, Mr. Lane's *Notes on the Thousand and One Nights*, ed. 1838; and his *Modern Egyptians*, ed. 1842 [new ed. 1860].

The most important native works are, with two exceptions, still untranslated, and but few of them are edited. Abu-l-Fidà's *Hist. Anteislamica* has been edited and translated by Fleischer, Lips. 1831; and El-Idreesee's *Geography* translated by Jaubert, and published in the *Recueil de Voyages et de Mémoires*, by the Geogr. Soc. of Paris, 1836; of those which have been, or are in course of being edited, are Yákoot's Homonymous Geographical Dictionary, entitled *El-Mushtarak Wad'an, wa-l-Muftarak Sak'an*, ed. Wüstenfeld, Got. 1845; the *Marásid el-Ittilá'*, probably an abridgment by an unknown hand of his larger geogr. dict. called the *Mojam*, ed. Juynboll, Lug. Bat. 1852–4; the *Histories of Mekkeh*, ed. Wüstenfeld, and now publishing by the German Oriental Society; and Ibn-Khaldoon's *Prolegomena*, ed. Quatremère, i. [–iii.] Paris, 1858 [in the *Notices et Extraits des Manuscrits*, xvi. pt. 1, xvii. pt. 1, xviii. pt. 1; trans. into French, with notes, by Slane, Parts 1, 2, Paris, 1863–65.] Of those in MS., besides the indispensable works of the Arab lexicographers, we would especially mention Ibn-Khaldoon's *History of the Arabs*; the *Khareedet el-Ajáib* of Ibn-El-Wardee; the *Mir-át ez-Zemán* of Ibn-El-Jozee; the *Murooj edh-Dhahab* of El-Mes'oodee; Yákoot's *Mojam el-Buldán*; the *Kitáb-el-Aghánee* of El-Isfahánee; and the *'Ikd* of El-Kurtubee.

E. S. P.

ARA'BIAN, THE (הָעַרְבִי, Neh. ii. 19, A. 1: ὁ Ἀραβί [Vat. -βει]: *Arabs*: עַרְבִי, Is. xiii. 20; Jer. iii. 2: Ἀραβες: *Arabes*); **ARABIANS, THE** (הָעַרְבִיאִים, 2 Chr. xvii. 11; הָעַרְבִים, 2 Chr. xxi. 16, xxii. 1, xxvi. 7 (*Keri*); Neh. iv. 7): οἱ Ἀραβες: *Arabes*). The nomadic tribes inhabiting the country to the east and south of Palestine, who in the early times of Hebrew history were known as Ishmaelites and descendants of Keturah. Their roving pastoral life in the desert is alluded to in Is. xiii. 20; Jer. iii. 2; 2 Macc. xii. 11; their country is associated with the country of the Dedanim the travelling merchants (Is. xxi. 13) with Dedan, Tema, and Buz (Jer. xxv. 24), and with Dedan and Kedar (Ez. xxvii. 21), all of which are supposed to have occupied the northern part of the peninsula later known as Arabia. During the prosperous reign of Jehoshaphat, the Arabians, in conjunction with the Philistines, were tributary to Judah (2 Chr. xvii. 11), but in the reign of his successor they revolted, ravaged the country, plundered the royal palace, slew all the king's sons with the exception of the youngest, and carried off the royal harem (2 Chr. xxi. 16, xxii. 1). The Arabians of Gur-baal were again subdued by Uzziah (2 Chr. xxvi. 7). During the Captivity they appear to have spread over the country of Palestine, for on the return from Babylon they were among the foremost in hindering Nehemiah in his work of restoration, and plotted with the Ammonites and others for that end (Neh. iv. 7). Geshem, or Gashmu, one of the leaders of the opposition, was of this race (Neh. ii. 19, vii. 1). In later times the Arabians served under Timotheus in his struggle with Judas Maccabæus, but were defeated (1 Macc. v. 39; 2 Macc. xii. 10). The Zabadæans, an Arab tribe, were routed by Jonathan, the brother and successor of Judas (1 Macc. xii. 31). The chieftain or king of the Arabians bore the name of Aretas as far back as the time of Antiochus Epiphanes and Jason the high-priest (2 Macc. v. 8; comp. 2 Cor. xi. 32). Zabdiel, the assassin of Alexander Balas (1 Macc. xi. 17), and Simalcue, who brought up Antiochus, the young son of Alexander (1 Macc. xi. 39), afterwards Antiochus VI., were both Arabians. In the time of the N. T. the term appears to have been used in the same manner (Acts ii. 11). [ARABIA.]

W. A. W.

* **ARABIC LANGUAGE.** Besides the remarks under ARABIA, p. 142, see SHEMITIC LANGUAGES, §§ 20–24.

* **ARABIC VERSIONS.** [VERSIONS, ANCIENT.]

A'RAD (עֲרָד [*wild ass*]: Ὠρήδ; Alex. Αρωδ; [Vat. Ωρηρ; Comp. Ald. Ἀράδ:] *Arod*). A Benjamite, son of Beriah, who drove out the inhabitants of Gath (1 Chr. viii. 15).

W. A. W.

A'RAD (עֲרָד [*place of fugitives*, Fürst]. Ἀράδ: [*Arad*; exc. in Josh., where we find] Ἀδέρ; [Vat. Αιραθ βασιλεα Αραθ; Comp. Ἀρέδ: *Heder*]), a royal city of the Canaanites, named with Horman and Libnah (Josh. xii. 14). The wilderness of Judah was to "the south of Arad" (Judg. i. 16). It is also undoubtedly named in Num. xxi. 1 (comp. Hormah in ver. 3), and xxxiii. 40, "the Canaanite king of Arad," instead of the reading of the A. V., "king Arad the Canaanite." (See the translations of Zunz, De Wette, &c.) It is mentioned in the *Onomasticon* (s. v. Ἀραμα, Arad, Ἀδέρ, Asaon Thamar) as a city of the Amorites, near the desert of Kaddes, 4 miles from Malatha (Moladah), and 20 from Hebron This agrees with the conjecture of Robinson, who identifies it with a hill, *Tell 'Arád*, an hour and a half N. E. by E. from *Milh* (Moladah), and 8 hours from Hebron (Rob. ii. 101 201, 202).

G.

AR'ADUS (Ἀραδος: *Aradus*), included in the list of places to which the decree of Lucius the consul, protecting the Jews under Simon the high-priest, was addressed (1 Macc. xv. 23). The same place as ARVAD.

G.

A'RAH (אָרַח [*wayfarer*]: Ἀρά: *Ara*

Digitized by Google

[ratner, 'Ορέχ: *Aree*]). 1. An Asherite, of the sons of Ulla (1 Chr. vii. 39).

2. ([Ezr.] Ἄρες, [Vat. Ηρα; Neh.] 'Ηρασέ, 'Ηρά: *Area*.) The sons of Arah returned with Zerubbabel, in number 775, according to Ezr. ii. 5, but 652 according to Neh. vii. 10. One of his descendants, Shechaniah, was the father-in-law of Tobiah the Ammonite (Neh. vi. 18). The name is written ARES in 1 Esdr. v. 10. W. A. W.

A'RAM (אֲרָם, occasionally with the definite article הָאֲרָם, and once רָם; probably from a root signifying *height*, and which is also the base of "Ramah" (Gesenius, p. 151; Stanley, p. 129), the name by which the Hebrews designated, generally, the country lying to the northeast of Palestine;[a] the great mass of that high table-land which, rising with sudden abruptness from the Jordan and the very margin of the lake of Gennesareth, stretches, at an elevation of no less than 2000 feet above the level of the sea, to the banks of the Euphrates itself, contrasting strongly with the low land bordering on the Mediterranean, the "land of Canaan," or the low country (Gen. xxxi. 18, xxxiii. 18, &c.). Throughout the A. V. the word is, with only a very few exceptions [Num. xxiii. 7, Judg. iii. 10, marg.], rendered as in the Vulgate and LXX. — SYRIA [or SYRIANS]; a name which, it must be remembered, includes far more to our ears than did Aram to the Jews. [SYRIA.]

Its earliest occurrence in the book of Genesis is in the form of Aram-naharaim, *i. e.* the "highland of or between the two rivers" (Gen. xxiv. 10, A. V. "Mesopotamia"), but in several succeeding chapters, and in other parts of the Pentateuch, the word is used without any addition, to designate a dweller in Aram-naharaim — Laban or Bethuel — "the Aramite" (see Gen. xxv. 20, xxviii. 2, 5, xxxi. 20, 24; also Judg. iii. 10, compared with 8; Deut. xxvi. 5, compared with xxiii. 4, and Ps. lx. title).

Padan, or accurately Paddan, Aram (פַּדַּן אֲרָם) "cultivated highland," from *paddah*, to plough, Ges. p. 1092; Stanley, p. 129, note) was another designation for the same region (Gen. xxv. 20, xxviii. 2; comp. Hos. xii. 12, where the word *Sadeh*, שְׂדֵה, is, perhaps, equivalent to *Paddan*). [SADEH; PADAN ARAM.] A tribe of Hittites (*Khatté*) bearing the name of *Patena* is reported to have been met with in the inscriptions of Shalmaneser, B. C. 900–860. They then occupied the valley of the Orontes, and the country eastward as far as the water-shed between that river and the Euphrates. The latest explorers do not hesitate to identify this name with *Padan*-aram and *Batanæa* or Bashan (Rawlinson's *Herodotus*, i. 463); but if this be correct, the conclusion of the identity of Padan-aram and Mesopotamia arrived at above from a comparison of the statements of Scripture, must be modified.

Later in the history we meet with a number of small nations or kingdoms forming parts of the general land of Aram: — 1. Aram-Zobah (2 Sam. x. 6, 8), or simply Zobah, צוֹבָה (1 Sam. xiv. 47; 2 Sam. viii. 3; 1 Chr. xviii., xix.) [ZOBAH.] 2. Aram Beth-rehob (2 Sam. x. 6), or Rehob. רְחוֹב (x. 8). [REHOB.] 3. Aram-maachah (1 Chr. xix. 6), or Maachah only, מַעֲכָה (2 Sam. x. 6). [MAACHAH.] 4. Geshur, "in Aram" (2 Sam. xv. 8), usually named in connection with Maachah (Deut. iii. 14; Josh. xiii. 11, 13, &c.). [GESHUR.] 5. Aram-Dammesek (Damascus) (2 Sam. viii. 5, 6; 1 Chr. xviii. 5, 6). The whole of these petty states are spoken of collectively under the name of "Aram" (2 Sam. x. 13), but as Damascus increased in importance it gradually absorbed the smaller powers (1 K. xx. 1), and the name of Aram was at last applied to it alone (Is. vii. 8; also 1 K xi. 25, xv. 18, &c.).

It is difficult to believe, from the narrative, that at the time of David's struggles these "kingdoms" were anything more than petty tribes located round the skirts of the possessions of Gad and Manasseh. Some writers, however (Rosenmüller and Michaelis amongst others), have attempted to show that their territory extended as far as the Euphrates on the one hand and the Mediterranean (at Berytus) on the other, in which case it would have been considerably larger than Palestine itself. This, however, will be best examined under the separate heads, including, in addition to those already noticed, ISH-TOB and HAMATH.

According to the genealogical table in Gen. x., Aram was a son of Shem, and his brethren were Elam, Asshur, and Arphaxad. It will be observed that these names occur in regular order from the east, Aram closing the list on the borders of the "western sea."

In three passages Aram would seem to denote Assyria (2 K. xviii. 26; Is. xxxvi. 11; Jer. xxxv. 11).

In 2 K. xvi. 6, the Syrians are said to have come to Elath (on the Red Sea). The word rendered Syrians is אֲרַמִּים, *Aromim*, which in the Keri is corrected to *Adomim*, Edomites.

In 2 Chr. xxii. 5, the name is presented in a shortened form as Ram, הָרָמִים; comp. Job xxxii. 2.

2. [Σύρσι: *Syri*.] Another Aram is named in Gen. xxii. 21, as a son of Kemuel, and descendant of Nahor. From its mention with Uz and Buz it is probably identical with the tribe of Ram, to the "kindred" of which belonged "Elihu, the son of Barachel the Buzite," who was visiting Job in the land of Uz (Job xxxii. 2). It is also worthy of notice that among the other descendants of Nahor are named Tebach (comp. Tibhath, 1 Chr. xix. 18), and Maacah; so that the tribe was possibly one of the smaller divisions of Aram described above.

G.

3. ('Αράμ; [Vat. M. Ωβαλακαραν:] *Aram*) An Asherite, one of the sons of Shamer (1 Chr. vii. 34).

4. The son of Esrom, or Hezron; elsewhere called RAM (Matt. i. 3, 4; Luke iii. 33).

W. A. W.

* In Luke, Tisch. with Sin. BZXΓ reads (instead of 'Αράμ) 'Αδμεὶν, τοῦ 'Αρνεί. A.

A'RAMITESS (אֲרַמִּיָּה [Σύρα: *Syra*]): *i. e.* a female inhabitant of Aram (1 Chr. vii. 14). In other passages of the A. V. the ethnic of Aram is rendered Syrian.

A'RAM-NAHARA'IM (אֲרַם נַהֲרַיִם

[a] The name Aram probably appears also in the Homeric names Ἀρίμοι (*Il.* ii. 783) and Ἐρεμβοί (*Od.* iv. 84). Comp. Strab. xvi. 785; Grote, *History of Greece*, iii. 367.

A'RAN (אֲרָן [*wild goat*]: Sam. אדן: Ἀράν; [Alex. Ἀραμ: in 1 Chr. Ἀρραν (and so Vat.):] *Aran*, *Aram*), name of a Horite (Gen. xxxvi. 28; 1 Chr. i. 42).

ARARAT (אֲרָרָט: Ἀραράτ: *Ararat*), a mountainous district of Asia mentioned in the Bible in connection with the following events: — (1.) As the resting-place of the ark after the Deluge (Gen. viii. 4, "upon the mountains of Ararat," A. V., *super montes Armeniæ*, Vulg.): (2.) As the asylum of the sons of Sennacherib (2 K. xix. 37; Is. xxxvii. 38; the LXX. have εἰς Ἀρμενίαν in the latter, and the Vulg. *in terram Armeniorum* in the former passage; A. V. has in both "the land of Armenia"): (3.) As the ally, and probably the neighbor, of Minni and Ashchenaz (Jer. li. 27). [ARMENIA.] In Gen. xi. 2 we have apparently an indication of its position as eastward of Mesopotamia (מִקֶּדֶם, "from the east," A. V.), whence Bohlen (*Introd. to Gen.* ii. 139) identifies Ararat with *Aryavarta*, [a Sanskrit name =] the "holy land" in the north of Hindostan; but the Hebrew is more correctly translated in the margin, as also in Gen. xiii. 11, *eastward* (Gesen. *Thes.* p. 305), the writer, as it would seem, describing the position of Mesopotamia in reference to his own country, rather than to Ararat.

The name Ararat was unknown to the geographers of Greece and Rome, as it still is to the Armenians of the present day; but that it was an indigenous and an ancient name for a portion of Armenia, appears from the statement of Moses of Chorene, who gives Araratia as the designation of the central province, and connects the name with an historical event reputed to have occurred B. C. 1750 (*Histor. Armen.* Whiston, p. 361). Jerome identified it with the plain of the Araxes. It would, however, be more correct to consider the name in its Biblical sense as descriptive generally

Ararat.

of the Armenian highlands — the lofty plateau which overlooks the plain of the Araxes on the N., and of Mesopotamia on the S. We shall presently notice the characteristics of this remarkable region, which adapted it to become the cradle of the human race and the central spot whence, after the Deluge, the nations were to radiate to different quarters of the world. It is, however, first necessary to notice briefly the opinions put forth as to the spot where the ark rested, as described in Gen. viii. 4, although all such speculations, from the indefiniteness of the account, cannot lead to any certain result. Berosus the Chaldæan, contemporary with Alexander the Great, fixes the spot on the mountains of *Kurdistan* (πρὸς τῷ ὄρει τῶν Κορδυαίων, Joseph. *Ant.* i. 3, § 6), which form the southern frontier of Armenia. His opinion is followed by the Syriac and Chaldee versions, which give הָרְדִּי as the equivalent for Ararat in Gen. viii. 4, and in a later age by the Koran. Tradition still points to the *Jebel Judi* as the scene of the event, and maintains the belief, as stated by Berosus, that fragments of the ark exist on its summit. The selection of this range was natural to an inhabitant of the Mesopotamian plain; for it presents an apparently insurmountable barrier on that side, hemming in the valley of the Tigris with abrupt declivities so closely that only during the summer months is any passage afforded between the mountain and river (Ainsworth's *Travels in the Track of the Ten Thousand*, p. 154). Josephus also quotes Nicolaus Damascenus to the effect that a mountain named Baris, beyond Minyas, was the spot. This has been identified with *Varaz*, a mountain mentioned by St. Martin (*Mém. sur l'Arménie*, i. 265) as rising to the N. of *Lake Van*; but the only important mountain in the position indicated is described by recent travellers under the name *Seiban Tagh*, and we are therefore inclined to accept the emendation of Schroeder, who proposes to read Μδσις, the indigenous name of *Mount Ararat*, for Βδρις. That the scene of an event so deeply interesting to mankind had even at that

Digitized by Google

early age been transferred, as was natural, to the oftiest and most imposing mountain in the district, appears from the statement of Josephus (*Ant.* i. 3, § 5), that the spot where Noah left the ark had received a name descriptive of that event, which he renders Ἀποβατήριον, and which seems identical with *Nachdjevan*, on the banks of the Araxes. To this neighborhood all the associations connected with Noah are now assigned by the native Armenians, and their opinion has been so far indorsed by Europeans that they have given the name Ararat exclusively to the mountain which is called *Massis* by the Armenians, *Agri-Dagh*, i. e. *Steep Mountain*, by the Turks, and *Kuh-i-Nuh*, i. e. *Noah's Mountain*, by the Persians. It rises immediately out of the plain of the Araxes, and terminates in two conical peaks, named the Great and Less Ararat, about seven miles distant from each other, the former of which attains an elevation of 17,260 feet above the level of the sea and about 14,000 above the plain of the Araxes, while the latter is lower by 4000 feet. The summit of the higher is covered with eternal snow for about 3000 feet of perpendicular height. That it is of volcanic origin, is evidenced by the immense masses of lava, cinders, and porphyry with which the middle region is covered. A deep cleft on its northern side has been regarded as the site of its crater, and this cleft was the scene of a terrible catastrophe which occurred July 2, 1840, when the village of Arguri and the Monastery of St. James were buried beneath the *débris* brought down from the upper heights by a violent earthquake. Clouds of reddish smoke and a strong smell of sulphur, which pervaded the neighborhood after the earthquake, seem to indicate that the volcanic powers of the mountain are not altogether dormant. The summit of Ararat was long deemed inaccessible, and the Armenians still cling to this belief. It was first ascended in 1829 by Parrot, who approached it from the N. W. He describes a secondary summit about 400 yards distant from the highest point, and on the gentle depression which connects the two eminences he surmises that the ark rested (*Journey to Ararat*, p. 179). The region immediately below the limits of perpetual snow is barren and unvisited by beast or bird. Wagner (*Reise*, p. 185) describes the silence and solitude that reign there as quite overpowering. *Arguri*, the only village known to have been built on its slopes, was the spot where, according to tradition, Noah planted his vineyard. Lower down, in the plain of Araxes, is *Nachdjevan*, where the patriarch is reputed to have been buried.

Returning to the broader signification we have assigned to the term "the mountains of Ararat," as coextensive with the Armenian plateau from the base of *Ararat* in the N. to the range of *Kurdistan* in the S., we notice the following characteristics of that region as illustrating the Bible narrative: — (1.) Its *elevation*. It rises as a rocky island out of a sea of plain to a height of from 6000 to 7000 feet above the level of the sea, presenting a surface of extensive plains, whence, as from a fresh base, spring important and lofty mountain-ranges, having a generally parallel direction from E. to W., and connected with each other by transverse ridges of moderate height. (2.) *Its geographical position*. The Armenian plateau stands equidistant from the Euxine and the Caspian seas on the N., and between the Persian Gulf and the Mediterranean on the S. With the first it is connected by the Acampis, with the second by the Araxes, with the third by the Tigris and Euphrates, the latter of which also serves as an outlet towards the countries on the Mediterranean coast. These seas were the high roads of primitive colonization, and the plains watered by these rivers were the seats of the most powerful nations of antiquity, the Assyrians, the Babylonians, the Medes, and the Colchians. Viewed with reference to the dispersion of the nations, Armenia is the true ὀμφαλός of the world, and it is a significant fact that at the present day Ararat is the great boundary-stone between the empires of Russia, Turkey, and Persia. (3.) *Its physical formation*. The Armenian plateau is the result of volcanic agencies: the plains as well as the mountains supply evidence of this. Armenia, however, differs materially from other regions of similar geological formation, as, for instance, the neighboring range of Caucasus, inasmuch as it does not rise to a sharp, well-defined central crest, but expands into plains or steppes, separated by a graduated series of subordinate ranges. Wagner (*Reise*, p. 263) attributes this peculiarity to the longer period during which the volcanic powers were at work, and the room afforded for the expansion of the molten masses into the surrounding districts. The result of this expansion is that Armenia is far more accessible, both from without and within its own limits, than other districts of similar elevation. The passes, though high, are comparatively easy, and there is no district which is shut out from communication with its neighbors. The fall of the ground in the centre of the plateau is not decided in any direction, as is demonstrated by the early courses of the rivers — the Araxes, which flows into the Caspian, rising westward of either branch of the Euphrates, and taking at first a northerly direction — the Euphrates, which flows to the S., rising northward of the Araxes, and taking a westerly direction. (4.) The *climate* is severe. Winter lasts from October to May, and is succeeded by a brief spring and a summer of intense heat. The contrast between the plateau and the adjacent countries is striking. In April, when the Mesopotamian plains are scorched with heat, and on the Euxine shore the azalea and rhododendron are in bloom, the Armenian plains are still covered with snow; and in the early part of September it freezes keenly at night. (5.) The *vegetation* is more varied and productive than the climate would lead us to expect. Trees are not found on the plateau itself, but grass grows luxuriantly, and furnishes abundant pasture during the summer months to the flocks of the nomad Kurds. Wheat and barley ripen at far higher altitudes than on the Alps and the Pyrenees: the volcanic nature of the soil, the abundance of water, and the extreme heat of the short summer bring the harvest to maturity with wonderful speed. At Erz-rûm, more than 6000 feet above the sea, the crops appear above ground in the middle of June, and are ready for the sickle before the end of August (Wagner, p. 255). The vine ripens at about 5000 feet, while in Europe its limit, even south of the Alps, is about 2650 feet.

The general result of these observations as bearing upon the Biblical narrative would be to show that, while the elevation of the Armenian plateau constituted it the natural resting-place of the ark after the Deluge, its geographical position and its physical character secured an impartial distribution of the families of mankind to the various quarters of the world. The climate furnished a powerful

Digitized by Google

inducement to seek the more tempting regions on all sides of it. At the same time the character of the vegetation was remarkably adapted to the nomad state in which we may conceive the early generations of Noah's descendants to have lived.
W. L. B.

AR'ARATH ('Αραράθ; Alex. [FA.] Αραρατ). ARARAT (Tob. i. 21; comp. 2 K. xix. 37).
W. A. W.

ARAU'NAH (אֲרַוְנָה: 'Ορνά: *Areuna*), a Jebusite who sold his threshing-floor on Mount Moriah to David as a site for an altar to Jehovah, together with his oxen, for 50 shekels of silver (2 Sam. xxiv. 18–24), or (according to 1 Chr. xxi. 25) for 600 shekels of gold by weight. From the expression (2 Sam. xxiv. 23) "these things did Araunah, the king, give unto the king," it has been inferred that he was one of the royal race of the Jebusites. His name is variously written in various places: הָאַוְרְנָה (2 Sam. xxiv. 16); אֲרַוְנִיָּה (xxiv. 18); אָרְנָן (1 Chr. xxi. 15 ff.; 2 Chr. iii. 1). [ORNAN.]
R. W. B.

ARBA (אַרְבַּע, *hero of Baal*, so Fürst, for אַרְבַּעַל, like אוּרִיאֵל: ['Αργόβ,] 'Αρβόκ; [Alex. Αρβο, Αρβεκ; Comp. 'Αρβαί; Ald. 'Αρβό, 'Αρβέ:] *Arbe*), the progenitor of the ANAKIM, or sons of Anak, from whom their chief city HEBRON received its name of Kirjath Arba (Josh. xiv. 15, xv. 13, xxi. 11). [See also ARBAH.] F. W. G.

ARBAH (אַרְבַּע [*four*]: τὸ πεδίον: *Arbee*). "The city of Arbah" is always rendered elsewhere Hebron, or KIRJATH-ARBA (Gen. xxxv. 27). The LXX. appear to have read עֲרָבָה *'arábáh*.
W. A. W.

* In Josh. xxi. 11 the A. V., ed. 1611, reads "the citie of Arbah," marg. "Kiriath-arbah" (Καριαβαρβόκ; Vat. Καραβαρβοκ: *Cariatharbe*). In Josh. xv. 13 the A. V. translates "the city of Arba," marg. "Kiriath-arba."
A.

ARBATHITE, THE (הָעַרְבָתִי: [in 1 Chr.] ὁ Γαραβαιθί; [Vat. -θεί; Alex. Σαραβεθθει; FA. Γαραβεθ; Comp. 'Αραβαθί; Ald. 'Αραβεθί; in 2 Sam. all different:] *Arbathites*), *i. e.* a native of the Arabah or *Ghor*. Abialbon the A. was one of David's 30 mighty men (2 Sam. xxiii. 31; 1 Chr. xi. 32).

ARBATTIS (ἐν 'Αρβάττοις; [Sin. Αρβαττοις;] Alex. Αρβακτοις [and so Sin.ca]: *Arbatis*), a district of Palestine named in 1 Macc. v. 23 only. Ewald's conjecture (*Geschichte*, iv. 359, *note*) grounded on the reading of the Peshito Syriac (ܐܪܒܛ, *Ard Bot*) is that the district N. of the sea of Galilee, part of which is still called *Ard el-Batihah*, is here intended. But it seems at least equally probable that the word is merely a corruption of 'Ακραβατίνη, the province of toparchy which lay between Neapolis and Jericho (Reland, p. 192; Joseph. *B. J.* iii. 3, §§ 4, 5, &c.).
G.

ARBE'LA (ἐν 'Αρβήλοις: *in Arbellis*), mentioned in the Bible only in 1 Macc. ix. 2, and there only as defining the situation of Masaloth, a place besieged and taken by Bacchides and Alcimus at the opening of the campaign in which Judas Maccabæus was killed. According to Josephus (*Ant.* xii. 11, § 1) this was at Arbela of Galilee, ἐν 'Αρβήλοις πόλει τῆς Γαλιλαίας, a place which he elsewhere states to be near Sepphoris, on the lake of Gennesareth, and remarkable for certain impregnable caves, the resort of robbers and insurgents, and the scene of more than one desperate encounter (comp. *Ant.* xiv. 15, §§ 4, 5; *B. J.* i. 16, §§ 2, 3; ii. 20, § 6; *Vita*, § 37). These topographical requirements are fully met by the existing *Irbid*,[a] a site with a few ruins, west of *Medjel*, on the southeast side of the *Wady Hamâm*, in a small plain at the foot[b] of the hill of *Kurûn Hattîn*. The caverns are in the opposite face of the ravine, and bear the name of *Kula'at Ibn Maân* (Rob. ii. 398; Burckh. p. 331; Irby, p. 91).

There seems no reason to doubt the soundness of this identification.[c] The army of Bacchides was on its road from Antioch to the land of Judæa (γῆν Ἰούδα), which they were approaching "by the way that leadeth to Galgala" (Gilgal),[d] that is by the valley of the Jordan in the direct line to which *Irbid* lies.[e] Ewald, however (*Geschichte*, iv. 370, *note*), insists, in opposition to Josephus, that the engagements of this campaign were confined to Judæa proper, a theory which drives him to consider "Galgala" as the *Jiljilia* north of Gophna. [GILGAL.] But he admits that no trace of an Arbela in that direction has yet come to light.

Arbela may be the BETH-ARBEL of Hos. x. 14, but there is nothing to ensure it.
G.

ARBITE, THE (הָאַרְבִּי: *de Arbi*). Paarai the Arbite, was one of David's guard (2 Sam. xxiii. 35). The word, according to Gesenius (*Thes.* p. 145) [and Fürst, i. 133], signifies a native of ARAB. In the parallel list of Chronicles, it is given as Ben-Ezbai, by a change in letters not unfrequently occurring. [EZBAI.] The LXX. version, Οὐραιοερχί, is very corrupt. [Comp., however, reads ὁ 'Αρβί; Alex. ο Αραχειις.—A.] (See Kennicott, *Dissert.* on 2 Sam. xxiii. p. 210.)
G.

ARBO'NAI ['Αβρωνά; Sin. Χεβρων; Comp. 'Αρβωναί; Ald. 'Αρβοναί: *Mambre*], Jud. ii. 24.

* It is called there a "river" (A. V.), on the banks of which were "high cities" destroyed by HOLOFERNES in his desolating march toward the country of the Jews. [ABRONAS.]

Volkmar (*Handb. d. Einl. in die Apocr.* i. 190, 195) adopts with some modification the com-

[a] The Arbela of Alexander the Great is called *Irbil* by the Arabic historians (Rob. ii. 399). The change of *l* to *d* is not unfrequent. Moreover, the present *Irbid* is undoubtedly mentioned in the Talmud as Arbel (see Schwarz, p. 189; Reland, p. 868; Rob. iii. 942, note).

[b] So Irby (p. 91). Robinson, on the contrary, says that the ruins are on the brow overlooking the chasm of the wady. [Thomson (*Land and Book*, ii. 114) says the same.—H.]

[c] First suggested in the *Münchener Gel. Anzeigen*, 1847, 1268, and eagerly laid hold of by Robinson.

[d] Some MSS. and the important version of the Syriac Peshito read "Gilead;" in which case the Arbela beyond Jordan must be thought of. But it is hardly likely that Josephus would be inaccurate in his topography of a part of the country which he knew so thoroughly.

[e] The importance of the *Wady Hamâm* in a military point of view, as commanding the great north road, the Sea of Galilee, and the important springs in the plain of Gennesareth, is not lost sight of by Wilson (*Lands of the Bible*, in Ritter, *Jordan*, p 328).

Digitized by Google

jecture of Movers respecting this name. He supposes ἐπὶ χειμάρρου Ἀβρωνᾶ (the best supported reading) to represent the Hebrew בעב״ר חנהר, "on the other side of the river," namely, the Euphrates. The final ׳ in עברי being written long like ׳ was easily converted into ב, as in Jud. ii. 28 עַכּוֹ, Accho, is represented by Ὀκίνα. The "high cities" referred to he supposes to be Babylon, Seleucia, Ctesiphon, and others in their neighborhood, citing Eutropius viii. 3, and Dion Cassius lxviii. 28, in accordance with his theory that the passage relates to the conquests of Trajan [JUDITH]. A.

ARCHELA'US (Ἀρχέλαος [*ruler of the people*]: *Archelaus*: in the Talmud, אַרְכְּלָיוֹס, son of Herod the Great, by a Samaritan woman, Malthaké (Joseph. *Ant.* xvii. 1, § 3; *B. J.* i. 28, § 4), and, with his brother Antipas, brought up at Rome (*id. B. J.* i. 31, § 1). At the death of Herod (B. C. 4)[a] his kingdom was divided between his three sons, Herod Antipas, Archelaus, and Philip. Archelaus received the half, containing Idumea, Judæa, Samaria, and the cities on the coast, with 600 talents' income (Joseph. *Ant.* xvii. 11, § 4). With one party among the Jews he was popular: another complained against him, but in vain, to Augustus (id. *Ant.* xvii. 11, 1). He never properly had the title of king (βασιλεύς) assigned to him (Matt. ii. 22), but only that of ἐθνάρχης (*ibid.*); so that the former word must be taken as loosely used. In the 10th year of his reign (Joseph. xvii. 13, § 2, *Vit.* 1), or the 9th (*B. J.* ii. 7, § 3), according to Dion Cass. (xv. 27) in the consulship of M. Æmil. Lepidus and L. Arruntius, *i. e.* A. D. 6, a complaint was preferred by his brothers and his subjects against him on the ground of his tyranny, in consequence of which he was deposed and banished to Vienne in Gaul (Joseph. *Ant.* xvii. 13, § 2; *B. J.* ii. 7, § 3), where he is generally said to have died. But Jerome (*Onomast.* s. v. *Bethlehem*) relates that he was shown the sepulchre of Archelaus near that town. If so, he must have returned as a private man to Judæa, and there have died. The parents of our Lord turned aside from fear of him on their way back from Egypt, and went to Nazareth in Galilee, in the domain of his gentler brother Antipas. He seems to have been guilty of great cruelty and oppression. Josephus relates (*Ant.* xvii. 9, § 3; *B. J.* ii. 1, 3) that he put to death 3000 Jews in the temple not long after his accession. This cruelty was exercised not only towards Jews, but towards Samaritans also (Joseph. *B. J.* ii. 7, § 3). Archelaus wedded illegally (τοῦ πατρίου παραβάσιν ποιησάμενος, *Ant.* xvii. 13, § 2) Glaphyra, the former wife of his brother Alexander, who had had children by her. (There is no reason for saying with Winer that Archelaus had children by her: he has apparently mistaken Josephus's ἐξ οὗ καὶ τέκνα ἦν αὐτῷ, where οὗ refers to Alexander, not to Archelaus.) H. A.

ARCHERY. [ARMS.]

AR'CHEVITES (אַרְכְּוָיֵא: Ἀρχυαῖοι; [Vat. Αρχουσι:] *Erchuæi*, Vulg.) perhaps the inhabitants of EREGH, some of whom had been placed as colonists in Samaria (Ezr. iv. 9). W. L. B.

AR'CHI (הָאַרְכִּי: *Archi*), Josh. xvi. 2. [ARCHITE.]

ARCHIP'PUS (Ἄρχιππος [*master of the horse*]: *Archippus*), a Christian teacher in Colossæ, called by St. Paul his συνστρατιώτης (Philem. 2). As the epistle, which concerns a private matter, is addressed to him jointly with Philemon and Apphia, and as "the church in their house" is also addressed, it seems necessary to infer that he was a member of Philemon's family. He had received (Col. iv. 17) a διακονία in the Lord, and was admonished to take heed to it that he fulfill it. Jerome, Theodoret, and Œcumenius, suppose him to have been overseer of the church at Colossæ. Others believe him to have been a teacher at Laodicea (*Const. Apostol.* vii. 46; Theodoret *ad Col.* iv. 17; and recently Wieseler, *Chronol. des apostolischen Zeitalters*, p. 452); but there does not seem to be any ground for the view. There is a legend that he was of the number of the Seventy disciples, and suffered martyrdom at Chonæ, near Laodicea (*Menolog. Græc.* i. 246). There is a monograph written about him by Dietelmair, *De Archippo*, Altorf, 1751, 4to. H. A.

ARCHI'TE, THE (הָאַרְכִּי, as if from a place named Erech, אֶרֶךְ: [2 Sam. xv., xvi., ὁ ἀρχιεταῖρος (for ὁ Ἀρχί, ἑταῖρος? so Comp.; ὁ Αραχι, εταιρος or ετερος, 29); 2 Sam. xvii.,] ὁ Ἀραχί [Vat. -χει; 1 Chr. ὁ (om. Ald. Alex.) πρῶτος; Comp. ὁ ἀρχιαίτερος (for ὁ ἀρχιεταῖρος or rather ὁ Ἀρχί, ἑταῖρος, as above):] *Arachites*), the usual designation of David's friend Hushai (2 Sam. xv. 32, [xvi. 16,] xvii. 5, 14; 1 Chr. xxvii. 33).

The word also appears (somewhat disguised, it is true, in the A. V.) in Josh. xvi. 2, where "the borders of Archi" (*i. e.* "the Archite")[b] are named as on the boundary of the "children of Joseph," somewhere in the neighborhood of Bethel No town of the name of אֶרֶךְ appears in Palestine; is it possible that, as in the case of the Gerizi, the Zemarites, and the Jebusites, we have here the last faint trace of one of the original tribes of the country? G.

ARCHITECTURE. Although there are many notices, both in the Canonical Scriptures and in the Apocryphal writings, bearing reference to the architecture of other nations besides the Israelites, it is nevertheless obvious that the chief business of a work like the present, under the article of Architecture, is to examine the modes of building in use among the Jews, and to discover, if possible, how far they were influenced, directly or indirectly, by the example or the authority of foreigners. The book of Genesis (iv. 17, 20, 22) appears to divide mankind into great characteristic sections, namely, the "dwellers in tents" and the "dwellers in cities," when it tells us that Cain was the founder of a city; and that among his descendants one Jabal was "the father of them that dwell in tents," whilst Tubal-cain was "the instructor of

[a] The death of Herod took place in the same year with the birth of Christ; but this is to be placed four years before the date in general use as the Christian era

[b] Compare Josh. xviii. 16, where "Jebusi" should be translated "the Jebusite," as it has been in xv. 8. See also GEZERITE; ZEMARAITE.

Digitized by Google

every artificer in brass and iron." It is probable that the workers in metal were for the most part dwellers in towns: and thus the arts of architecture and metallurgy became from the earliest times leading characteristics of the civilized as distinguished from the nomadic tendencies of the human race.

To the race of Shem is attributed (Gen. x. 11, 12, 22, xi. 2–9) the foundation of those cities in the plain of Shinar, Babylon, Nineveh, and others; to one of which, Resen, the epithet "great" sufficiently marks its importance in the time of the writer, a period at least as early as the 13th cent. B. C., if not very much earlier. (Rawlinson, *Outline of Ass. Hist.* p. 10; Layard, *Nineveh*, ii. 221, 235, 238.) From the same book we learn the account of the earliest recorded building, and of the materials employed in its construction (Gen. xi. 3, 9); and though a doubt rests on the precise site of the tower of Belus, so long identified with the Birs Nimroud (Benjamin of Tudela, p. 100, Bohn; Newton, *On Proph.* x. pp. 155, 156; Vaux, *Nin. and Persep.* pp. 173, 178; Keith, *On Proph.* p. 289), yet the nature of the soil, and the bricks found there in such abundance, though bearing mostly the name of Nebuchadnezzar, agree perfectly with the supposition of a city previously existing on the same or a closely neighboring site. (Layard, ii. 249, 278, and *Nin. and Bab.* 531; Plin. vii. 56; Ez. iv. 1.)

In the book of Esther (i. 2) mention is made of the palace at Susa, for three months in the spring the residence of the kings of Persia (Esth. iii. 13; Xen. *Cyrop.* viii. 6, § 22); and in the books of Tobit and Judith, of Ecbatana, to which they retired for two months during the heat of summer. (Tob. iii. 7, xiv. 14; Jud. i. 14; Herod. i. 98.)

A branch of the same Syro-Arabian race as the Assyrians, but the children of Ham, was the nation, or at least the dominant caste, of the Egyptians, the style of whose architecture agrees so remarkably with the Assyrian (Layard, ii. 206 ff.). It is in connection with Egypt that the Israelites appear first as builders of cities, compelled, in common with other Egyptian captives, to labor at the buildings of the Egyptian monarchs. Pithom and Raamses are said to have been built by them. (Ex. i. 11; Wilkinson, ii. 195.)

The Israelites were by occupation shepherds, and by habit dwellers in tents (Gen. xlvii. 3). The "house" built by Jacob at Succoth is probably no exception to this statement (בַּיִת, Gesen.). They had therefore originally, speaking properly, no architecture. Even Hebron, a city of higher antiquity than the Egyptian Zoan (Tanis), was called originally from its founder, perhaps a Canaanite of the race of Anak, Kirjath-Arba, the house of Arba (Num. xiii. 22; Josh. xiv. 15). From the time of the occupation of Canaan they became dwellers in towns and in houses of stone, for which the native limestone of Palestine supplied a ready material (Lev. xiv. 34, 45; 1 K. vii. 10; Stanley, *S. & P.* pp. 146, 8); but the towns which they occupied were not all, nor indeed in most cases, built from the first by themselves (Deut. vi. 10; Num. xiii. 19).

The peaceful reign and vast wealth of Solomon gave great impulse to architecture; for besides the Temple and his other great works at and near Jerusalem, he built fortresses and cities in various places, among which the names and sites of Baalath and Tadmor are in all probability represented by the more modern superstructures of Baalbec and Palmyra (1 K. ix. 15–24). Among the succeeding kings of Israel and of Judah, more than one is recorded as a builder: Asa (1 K. xv. 23), Baasha (xvi. 17), Omri (xvi. 24), Ahab (xvi. 34, xxii. 39), Hezekiah (2 K. xx. 20; 2 Chr. xxxii. 27, 30), Jehoash, and Josiah (2 K. xii. 11, 12, xxii. 6); and, lastly, Jehoiakim, whose winter palace is mentioned (Jer. xxii. 14, xxxvi. 22; see also Am. iii. 15).

On the return from captivity, the chief care of the rulers was to rebuild the Temple and the walls of Jerusalem in a substantial manner, with stone, and with timber from Lebanon (Ezr. iii. 8, v. 8; Neh. ii. 8, iii. 1, 32). During the government of Simon Maccabæus, the fortress called Baris, and afterwards Antonia, was erected for the defense of the Temple and the city. But the reigns of Herod and of his sons and successors were especially remarkable for the great architectural works in which they delighted. Not only was the Temple restored to a large portion if not to the full degree of its former magnificence, but the fortifications and other public buildings of Jerusalem were enlarged and embellished to an extent previously unknown (Luke xxi. 5; Benj. of Tudela, p. 83, Bohn). [More particular descriptions of these works will be found under JERUSALEM.] Besides these great works, the town of Cæsarea was built on the site of an insignificant building called Strato's Tower; Samaria was enlarged, and received the name of Sebaste; the town of Agrippium was built; and Herod carried his love for architecture so far as to adorn with buildings cities even not within his own dominions, Berytus, Damascus, Tripolis, and many other places (Joseph. *B. J.* i. 21, 1, 11). His son Philip the tetrarch enlarged the old Greek colony of Paneas, giving it the name of Cæsarea in honor of Tiberius; whilst his brother Antipas founded the city of Tiberias, and adorned the towns of Sepphoris and Betharamphta, giving to the latter the name Livias, in honor of the mother of Tiberius (Reland, p 497).

Of the original splendor of these great works no doubt can be entertained; but of their style and appearance we can only conjecture, though with nearly absolute certainty, that they were formed on Greek and Roman models. Of the style of the earlier buildings of Palestine, we can only form an idea from the analogy of the Egyptian, Assyrian, and Persian monuments now existing, and from the modes of building still adopted in Eastern countries. The connection of Solomon with Egypt and with Tyre, and the influence of the Captivity, may have in some measure successively affected the style both of the two temples, and of the palatial edifices of Solomon. The enormous stones employed in the Assyrian, Persepolitan, and Egyptian buildings find a parallel in the substructions of Baalbec, more ancient than the superstructure (Layard, ii. 317, 318), and in the stones of so vast a size which still remain at Jerusalem, relics of the building either of Solomon or of Herod (Williams, pt. ii. 1). But as it has been observed again and again, scarcely any connected monuments are known to survive in Palestine by which we can form an accurate idea of its buildings, beautiful and renowned as they were throughout the East (Plin. v. 14; Stanley, p. 183), and even of those which do remain no trustworthy examination has yet been made. It is probable, however, that the reservoirs known under the names of the Pools of Solomon and Hezekiah contain some portions at least of the original fabric (Stanley, pp. 103, 165).

The domestic architecture of the Jews, so far as it can be understood, is treated under HOUSE. Tools and instruments of building are mentioned by the sacred writers; the plumb-line, Am. vii. 7; the measuring-reed, Ez. xl. 3; the saw, 1 K. vii. 9.
H. W. P.

ARCTU'RUS. The Hebrew words עָ֫שׁ, *'Âsh*, and עַיִשׁ, *'Ayish*, rendered "Arcturus" in the A. V. of Job ix. 9, xxxviii. 32, in conformity with the Vulg. of the former passage, are now generally believed to be identical, and to represent the constellation Ursa Major, known commonly as the Great Bear, or Charles's Wain. Niebuhr (*Desc. de l'Arab.* p. 101) relates that he met with a Jew at Sanà, who identified the Hebrew *'Âsh* with the constellation known to the Arabs by the name *Om es-Nash*, or *Nash* simply, as a Jew of Bagdad informed him. The four stars in the body of the Bear are named *Ennash* in the tables of Ulugh Beigh, those in the tail being called *el Benât*, "the daughters" (comp. Job. xxxviii. 32). The ancient versions differ greatly in their renderings. The LXX. render *'Âsh* by the "Pleiades" in Job ix. 9 (unless the text which they had before them had the words in a different order), and *'Ayish* by "Hesperus," the evening star, in Job xxxviii. 32. In the former they are followed or supported by the Chaldee, in the latter by the Vulgate. R. David Kimchi and the Talmudists understood by *'Ash* the tail of the Ram or the head of the Bull, by which they are supposed to indicate the bright star Aldebaran in the Bull's eye. But the greatest difficulty is found in the rendering of the Syriac translators, who give as the equivalent of both *'Âsh* and *'Ayish* the word *'Iyutho*, which is interpreted to signify the bright star Capella in the constellation Auriga, and is so rendered in the Arabic translation of Job. On this point, however, great difference of opinion is found. Bar Ali conjectured that *'Iyutho* was either Capella or the constellation Orion; while Bar Bahlul hesitated between Capella, Aldebaran, and a cluster of three stars in the face of Orion. Following the rendering of the Arabic, Hyde was induced to consider *'Âsh* and *'Ayish* distinct; the former being the Great Bear, and the latter the bright star Capella, or α of the constellation Auriga.
W. A. W.

ARD (אֶ֫רֶד [*descent*]: Ἀρδί: *Ared*). 1. Son of Benjamin [and if so, the youngest of his sons] (Gen. xlvi. 21).

2. Ἀδάρ; [Ald. Alex. Ἀδέρ:] *Hered*. Son of BELA, and grandson of Benjamin (Num. xxvi. 40), written Addar in 1 Chr. viii. 3. His descendants are called THE ARDITES (הָאַרְדִּי), Num. xxvi. 40. [As Ard is not mentioned among the sons of Benjamin in Num. xxvi. 38, 39, "son" may stand for grandson in Gen. xlvi. 21, and thus the same person be meant in both passages.]

ARDATH — "the field called Ardath" — 2 Esdr. ix. 26.

* Lücke (*Einl. in d. Offenb. d. Joh.* i. 174) and Volkmar (*Einl. in d. Apokr.* ii. 131) take Ardath (Æth. *Arphad*, Ar. *Arvad*) to be a corruption for *Arbath*, meaning "desert" (Heb. עֲרָבָה), used as an appellative rather than as a proper name. Lücke supposes the desert of Judah to be intended; Volkmar, the Holy Land in general, which though "a field of flowers," was then to the Israelites a desert (comp. 2 Esdr. x. 21, 22).
A.

ARDITES, THE. [ARD.]

ARDON (אַרְדֹּן [*fugitive*]: Ἀρδών; [Vat. H. Alex. Ορρα; Vat. M. Ιορρα:] *Ardon*), 1 Chr. ii. 18. [A son of Caleb, the son of Hezron, by his wife Azubah.]

ARELI (אַרְאֵלִי, Sam. ארולי [*son of a hero*]: Ἀριήλ; [in Gen. Ἀρηλεής; Alex. Αρωηλεις:] *Areli*), a son of Gad (Gen. xlvi. 16; Num. xxvi. 17). His descendants are called THE ARELITES (Num. xxvi. 17).

AREOPAGITE (Ἀρεοπαγίτης [Tisch. -γείτης]: *Areopagita*). A member of the Court of Areopagus (Acts xvii. 34). [See DIONYSIUS.]
W. A. W.

AREOPAGUS or MARS' HILL (ὁ Ἄρειος πάγος, *i. e.* the hill of Ares or Mars; *Areopagus*, Vulg.), was a rocky height in Athens, opposite the western end of the Acropolis,[a] from which it is separated only by an elevated valley. It rises gradually from the northern end, and terminates abruptly on the south, over against the Acropolis, at which point it is about fifty or sixty feet above the valley already mentioned. Of the site of the Areopagus, there can be no doubt, both from the description of Pausanias, and from the narrative of Herodotus, who relates that it was a height over against the Acropolis, from which the Persians assailed the latter rock (Paus. i. 28, § 5; Herod. viii. 52). According to tradition it was called the hill of Mars (Ares), because this god was brought to trial here before the assembled gods by Neptune (Poseidon), on account of his murdering Halirrhothius, the son of the latter. The spot is memorable as the place of meeting of the Council of Areopagus (ἡ ἐν Ἀρείῳ πάγῳ βουλή), frequently called the Upper Council (ἡ ἄνω βουλή) to distinguish it from the Council of Five Hundred, which held its sittings in the valley below the hill. It existed as a criminal tribunal before the time of Solon, and was the most ancient and venerable of all the Athenian courts. It consisted of all persons who had held the office of Archon, and who were members of it for life, unless expelled for misconduct. It enjoyed a high reputation, not only in Athens, but throughout Greece. Before the time of Solon the court tried only cases of willful murder, wounding, poison, and arson; but he gave it extensive powers of a censorial and political nature. The Council is mentioned by Cicero (*ad Fam.* xiii. 1; *ad Att.* i. 14, v. 11), and continued to exist even under the Roman emperors. Its meetings were held on the south-eastern summit of the rock. There are still sixteen stone steps cut in the rock, leading up to the hill from the valley of the Agora below; and immediately above the steps is a bench of stones excavated in the rock, forming three sides of a quadrangle, and facing the south. Here the Areopagites sat as judges in the open air (ὑπαίθριοι ἐδικάζοντο, Pollux, viii. 118). On the eastern and western side is a raised block. These blocks are probably the two rude stones which Pausanias saw there, and which are described by Euripides as assigned, the one to the accuser, the other to the criminal, in the causes which were tried in the court (*Iph. T.* 961). The Areopagus possesses peculiar interest to the

a * Dr. Robinson says, however, that it "bears about north" from the Acropolis (*Bib. Res.* i. 7).

Christian, as the spot from which St. Paul delivered his memorable address to the men of Athens (Acts xvii. 22–31). It has been supposed by some commentators that St. Paul was brought before the Council of Areopagus; but there is no trace in the narrative of any judicial proceedings. St. Paul "disputed daily" in the "market" or Agora (xvii. 17), which was situated south of the Areopagus in the valley lying between this hill and those of the Acropolis, the Pnyx, and the Museum. Attracting more and more attention, "certain philosophers of the Epicureans and Stoics" brought him up from the valley, probably by the stone steps already mentioned, to the Areopagus above, that they might listen to him more conveniently. Here the philosophers probably took their seats on the stone benches usually occupied by the members of the Council, while the multitude stood upon the steps and in the valley below. (For details, see *Dict. of Ant.* p. 126; *Dict. of Geogr.* i. 281.) [See MARS' HILL for Paul's discourse there.]

ARES (Ἀρές: *Ares*). ARAH 2 (1 Esdr. v. 10).

ARETAS (Ἀρέτας: [*Aretas*:] Arab. *Chorâh*), a common appellation of many of the Arabian kings or chiefs. Two are mentioned in the Bible.

1. A contemporary of Antiochus Epiphanes (B. C. 170) and Jason (2 Macc. v. 8). B. F. W.

2. In 2 Cor. xi. 32, St. Paul writes, ἐν Δαμασκῷ ὁ ἐθνάρχης Ἀρέτα τοῦ βασιλέως ἐφρούρει τὴν πόλιν Δαμασκηνῶν πιάσαι με. This Aretas was father-in-law of Herod Antipas. [HEROD.] There is a somewhat difficult chronological question respecting the subordination of Damascus to this Aretas. The city under Augustus and Tiberius was attached to the province of Syria; and we have Damascene coins of both these emperors, and again of Nero and his successors. But we have none of Caligula and Claudius, and the following circumstances make it probable that a change in the rulership of Damascus took place after the death of Tiberius. There had been war for some time between Aretas, king of Arabia Nabatæa, whose capital was Petra, and Antipas, on account of the divorce by Antipas of Aretas's daughter at the instance of Herodias, and also on account of some frontier disputes. A battle was fought, and the army of Antipas entirely destroyed (Joseph. *Ant.* xviii. 5, § 1).[a] On this, being a favorite with Tiberius, he sent to Rome for help; and Vitellius, governor of Syria, was commissioned to march against Aretas, and to take him dead or alive. While he was on his march (*Ant.* xviii 5, § 3) he heard at Jerusalem of the death of Tiberius (March 16, A. D. 37), and, πόλεμον ἐκφέρειν οὐκετ' ὁμοίως δυνάμενος διὰ τὸ εἰς Γάϊον μεταπεπτωκέναι τὰ πράγματα, abandoned his march, and sent his army into winter-quarters, himself remaining at Antioch. By this change of affairs at Rome, a complete reversal took place in the situation of Antipas and his enemy. The former was ere long (A. D. 39) banished to Lyons, and his kingdom given to Agrippa, his foe (*Ant.* xviii. 7), who had been living in habits of intimacy with the new emperor (*Ant.* xviii. 6, § 5). It would be natural that Aretas, who had been grossly injured by Antipas, should, by this change of affairs, be received into favor; and the more so, as Vitellius had an old grudge against Antipas, of which Josephus says, *Ant.* xviii. 4, § 5, ἔκρυπτε· ὀργήν, μέχρι δὴ καὶ μετῆλθε, Γαΐου τὴν ἀρχὴν παρειληφότος. Now in the year 38 Caligula made several changes in the East, granting Iturea to Soœmus, Lesser Armenia and parts of Arabia to Cotys, the territory of Cotys to Rhœmetalces, and to Polemon, son of Polemon, his father's government. These facts, coupled with that of no Damascene coins of Caligula or Claudius existing, make it probable that about this time Damascus, which belonged to the predecessor of Aretas (*Ant.* xiii. 5, § 2), was granted to him by Caligula. Thus the difficulty would vanish. The other hypotheses, that the ethnarch was only visiting the city (as if he could then have guarded the walls to prevent escape), — that Aretas had seized Damascus on Vitellius giving up the expedition against him (as if a Roman governor of a province would allow one of its chief cities to be taken from him, merely because he was in uncertainty about the policy of a new emperor), are very improbable.[b] Wieseler, *Chron. des apostolischen Zeitalters*, p. 174, and again in his art. in Herzog's *Encyklopädie*, refers to a coin βασιλέως Ἀρέτα φιλέλληνος, but it seems to belong to an earlier Aretas. See Conyb. and Howson, *Life of St. Paul*, ed. 2, vol. i. p. 132, note. See Wieseler, pp. 142 ff., 167 ff., whose view has been adopted in this article; Anger, *de Temporum in Actis Ap. ratione*, p. 173 ff., and Conyb. and Howson, vol. i. p. 99 ff. end. H. A.

ARE'US, a king of the Lacedæmonians, whose letter to the high priest Onias is given in 1 Macc. xii. 20 ff. He is called *Areus* in the A. V. in ver. 20 and in the margin of ver. 7; but in the Greek text he is named Ὀνιάρης [Alex. -νει-] in ver. 20, and Δαρεῖος in ver. 7: there can be little doubt however that these are corruptions of Ἄρευς. In Josephus (*Ant.* xii. 4, § 10, v. § 8) the name is written Ἀρεῖος, and in the Vulgate *Arius*. There were two Spartan kings of the name of Areus, of whom the first reigned B. C. 309–265, and the second, the grandson of the former, died when a child of eight years old in B. C. 257. There were three high priests of the name of Onias, of whom the first held the office B. C. 323–300. This is the one who must have written the letter to Areus I., probably in some interval between 309 and 300. (Grimm, *in Macc.* p. 185.) [ONIAS.]

ARGOB (אַרְגֹּב, once with the def. article הָאַרְגֹּב = "the stony," from רָגַב, Ges. *Thes.* 1260: Ἀργόβ: *Argob*), a tract of country on the east of the Jordan, in Bashan, in the kingdom of Og, containing 60 "great" and fortified "cities"

a * It is with reference to this defeat that Josephus makes his remarkable statement, that the Jews looked upon it as a punishment from God inflicted on Herod for putting to death John the Baptist, whom the Jews held in such veneration for his teaching and holy life. (*Ant.* xviii. 5, § 2.) See Lardner's *Jewish Testimonies*, Ch. iv. 1. H.

b * The view that Aretas seized and held Damascus by force for a short time after the defeat of Herod Antipas is maintained by Neander (*Pflanzung*, i. 159); Hemsen (*Der Apostel Paulus*, pp. 19–22); Winer (*Bibl. Realw.* i. 84); Meyer (*Apostelgeschichte*, p. 15); Guerlike (*Einl. in das N. T.* p. 336); Bleek (*Einl. in das N. T.* p. 361), and others. It is not easy to believe that the Roman government would so suddenly, of its own accord, confer so important a city on a vassal who had just defeated one of its most faithful allies, and who had been proscribed as an enemy who was to be taken at all hazards dead or alive. H.

(עָרִים). Argob was in the portion allotted to the half-tribe of Manasseh, and was taken possession of by Jair, a chief man in that tribe. [JAIR; BASHAN; HAVOTH-JAIR.] It afterwards formed one of Solomon's commissariat districts, under the charge of an officer whose residence was at Ramoth-Gilead (Deut. iii. 4, 13, 14; 1 K. iv. 13). In later times Argob was called Trachonitis, apparently a mere translation of the older name. [TRACHONITIS.] In the Samaritan version it is rendered ריגובאה (Rigobaah); but in the Targums of Onkelos and Jonathan it is טרכונא[a] (*i. e.* Trachonitis). Later on we trace it in the Arabic version of Saadiah as موجب, (*Mujeb*, with the same meaning); and it is now apparently identified with the *Lejah*, اللجاة, a very remarkable district south of Damascus, and east of the Sea of Galilee, which has been visited and described by Burckhardt (pp. 111–119), Seetzen, and Porter (vol. ii. specially pp. 240–245). This extraordinary region — about 22 miles from N. to S. by 14 from W. to E., and of a regular, almost oval, shape — has been described as an ocean of basaltic rocks and boulders, tossed about in the wildest confusion, and intermingled with fissures and crevices in every direction. "It is," says Mr. Porter, "wholly composed of black basalt, which appears to have issued from innumerable pores in the earth in a liquid state, and to have flowed out on every side. Before cooling, its surface was violently agitated, and it was afterwards shattered and rent by internal convulsions. The cup-like cavities from which the liquid mass was extruded are still seen, and likewise the wavy surface that a thick liquid assumes which cools while flowing. The rock is filled with little pits and air-bubbles; it is as hard as flint, and emits a sharp metallic sound when struck" (241). "Strange as it may seem, this ungainly and forbidding region is thickly studded with deserted cities and villages, in all of which the dwellings are solidly built and of remote antiquity" (238). The number of these towns visited by one traveller lately returned is 50, and there were many others which he did not go to. A Roman road runs through the district from S. to N. probably between Bosra and Damascus. On the outer boundary of the *Lejah* are situated, amongst others, the towns known in Biblical history as Kenath and Edrei. In the absence of more conclusive evidence on the point, a strong presumption in favor of the identification of the *Lejah* with Argob arises from the peculiar Hebrew word constantly attached to Argob, and in this definite sense apparently to Argob only. This word is חֶבֶל (Chebel), literally "a rope" (*σχοινισμα, περίμετρον, funiculus*), and it designates with charming accuracy the remarkably defined boundary line of the district of the *Lejah*, which is spoken of repeatedly by its latest explorer as "a rocky shore;" "sweeping round in a circle clearly defined as a rocky shore-line;" "resembling a Cyclopean wall in ruins" (Porter, ii 19, 219, 239, &c.). The extraordinary features of this region are rendered still more extraordinary by the contrast which it presents to the surrounding plain of the Hauran, a high plateau of waving downs of the richest agricultural soil stretching from the Sea of Galilee to the *Lejah*, and beyond that to the desert, almost literally "without a stone;" and it is not to be wondered at — if the identification proposed above be correct — that this contrast should have struck the Israelites, and that their language, so scrupulous of minute topographical distinctions, should have perpetuated in the words Mishor, Argob, and Chebel, at once the level downs of Bashan [MISHOR], the stony labyrinth which so suddenly intrudes itself on the soil (Argob), and the definite fence or boundary which encloses it [CHEBEL]. G.

[a] Jonath. גרגונא; Jerus. אטרכונא

AR'GOB (אַרְגֹב: Ἀργόβ: *Argob*), perhaps a Gileadite officer, who was governor of Argob. According to some interpreters, an accomplice of Pekah in the murder of Pekahiah. But Sebastian Schmid explained that both Argob and Arieh were two princes of Pekahiah, whose influence Pekah feared, and whom he therefore slew with the king. Rashi understands by Argob the royal palace, near which was the castle in which the murder took place (2 K. xv. 25). W. A. W.

ARIARA'THES (properly Mithridates, Diod. xxxi., X. 25, ed. Bip.) VI., PHILOPATOR (Ἀριαράθης, [Comp. Ald. Alex.] Ἀράθης [Vulg. *Ariarathes*], probably signifying "*great*" or "*honorable master*," from the roots existing in *aryas* (Sanskrit), "honorable," and *rata* (head), "master;" Smith, *Dict. Biogr.* s. v.), king of Cappadocia B. C. 163–130. He was educated at Rome (Liv. xlii. 19); and his whole policy was directed according to the wishes of the Romans. This subservience cost him his kingdom B. C. 158; but he was shortly afterwards restored by the Romans to a share in the government (App. *Syr.* 47; cf. Polyb. xxxii. 20, 23; Polyb. iii. 5); and on the capture of his rival Olophernes by Demetrius Soter, regained the supreme power (Just. xxxv. 1). He fell in B. C. 130, in the war of the Romans against Aristonicus, who claimed the kingdom of Pergamus on the death of Attalus III. (Just. xxxvii. 1, 2). Letters were addressed to him from Rome in favor of the Jews (1 Macc. xv. 22), who in after-times seem to have been numerous in his kingdom (Acts ii. 9; comp. 1 Pet. i. 1). B. F. W.

ARI'DAI [3 syl.] (אֲרִידַי: Ἀρσαῖος; [FA. Ἀρσεος; Comp. Ἀριδαΐ:] *Aridaï*), ninth son of Haman (Esth. ix. 9).

ARIDA'THA (אֲרִידָתָא: Ζαρβανά; [Vat Alex. FA. Ζαρβαχα; Comp. Ἀρ δαθά:] *Aridatha*), sixth son of Haman (Esth. ix. 8).

ARI'EH [*properly* Arjeh *or* Aryeh] (הָאַרְיֵה: Ἀρία; [Vat. Αρεια;] Alex. [Comp.] Ἀρίε: *Arie*). "The Lion," so called probably from his daring as a warrior: either one of the accomplices of Pekah in his conspiracy against Pekahiah, king of Israel, or, as Sebastian Schmid understands the passage, one of the princes of Pekahiah, who was put to death with him (2 K. xv. 25). Rashi explains it literally of a golden lion which stood in the castle. W. A. W.

A'RIEL (אֲרִיאֵל, *lion*, i. e. *hero, of God*, or, *hearth of God*: Ἀριήλ: *Ariel*).

1. As the proper name of a man (where the meaning no doubt is the first of those given above) the word occurs in Ezr. viii. 16. This Ariel was one of the "chief men" who under Ezra directed

Digitized by Google

the caravan which he led back from Babylon to Jerusalem.

The word occurs also in reference to two Moabites slain by Benaiah, one of David's chief captains (2 Sam. xxiii. 20; 1 Chr. xi. 22). Gesenius and many others agree with our A. V. in regarding the word as an epithet, "two lion-like men of Moab;" but it seems better to look upon it, with Thenius, Winer, Fürst, and others, as a proper name, and translate "two [sons] of Ariel," supplying the word בְּנֵי, which might easily have fallen out.

A similar word occurs in Num. xxvi. 17, ARELI (אֲרִאֵלִי), as the name of a Gadite, and head of one of the families of that tribe. Both the LXX. and the Vulg. give Ariel for this word, and Winer without remark treats it as the same name.

2. A designation given by Isaiah to the city of Jerusalem (Is. xxix. 1 (*bis*), 2 (*bis*), 7 [Alex. Ισραηλ]). Its meaning is obscure. We must understand by it either "Lion of God" — so Gesenius, Ewald, Hävernick, Fürst, and many others — or, with Umbreit, Knobel, and most of the ancient Jewish expositors, "Hearth of God," tracing the first component of the word to the Arabic أَرِيَ, *a fire-place* or *hearth* (Gesen. *Thes.*; Fürst, *Heb. u. Chald. Handwört.* s. v.). This latter meaning is suggested by the use of the word in Ez. xliii. 15, 16, as a synonym for the altar of burnt-offering, although Hävernick (*Commentar üb. Ezech.* p. 699), relying on the passage in Isaiah, insists that even here we must understand Lion of God. The difficulty is increased by the reading of the text in Ezekiel being itself doubtful. On the whole it seems most probable that the words used by the two prophets, if not different in form, are at least different in derivation and meaning, and that as a name given to Jerusalem Ariel means "Lion of God," whilst the word used by Ezekiel means "Hearth of God." F. W. G.

ARIMATHÆ'A [A. V. -the'a] ('Αριμαθαία, Matt. xxvii. 57; Luke xxiii. 51; John xix. 38), the birthplace, or at least the residence of Joseph, who obtained leave from Pilate to bury our Lord in his "new tomb" at Jerusalem. St. Luke calls this place "a city of Judea;" but this presents no objection to its identification with the prophet Samuel's birthplace, the RAMAH of 1 Sam. i. 1, 19, which is named in the Septuagint Armathaim ('Αρμαθαιμ), and by Josephus, Armatha ('Αρμαθά, Joseph. *Ant.* v. 10, § 2). The Ramathem of the Apocrypha ('Ραυαθέμ, 1 Macc. xi 34) is probably the same place. [RAMAH.] J. S. H.

A'RIOCH (אַרְיוֹךְ, probably from אֲרִי, *a lion*, "lion like," comp. נְסַרְךְ: 'Αριώχης, LXX., [twice] in Dan. only: [elsewhere 'Αριώχ;] 'Αριώχ, Theodot.: *Arioch*, Vulg.).

1. "King of Ellasar" (Gen. xiv. 1, 9).

2. "The captain of the guard" of Nebuchadnezzar (Dan. ii. 14 ff.). B. F. W.

3. (Ελριώχ; Alex. [Vat. Comp. Ald.] 'Αριώχ: *Erioch*). Properly [?] "Eirioch" or "Erioch," mentioned in Jud. i. 6 as king of the Elymæans. Junius and Tremellius identify him with Deioces, king of part of Media. W. A. W.

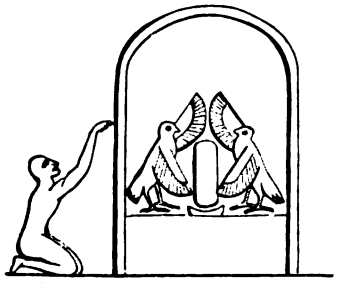
ARI'SAI [3 syl.] (אֲרִיסַי: Ρουφαΐος; [Alex. Ρουφανος; Comp. 'Αριαΐ:] *Arisai*), eighth son of Haman (Esth. ix. 9).

ARISTAR'CHUS ('Αρίσταρχος [*most excellent ruler*]: *Aristarchus*), a Thessalonian (Acts xx. 4; xxvii. 2), who accompanied St. Paul on his third missionary journey (Acts xix. 29, where he is mentioned as having been seized in the tumult at Ephesus together with Gaius, both συνεκδήμους Παύλου). We hear of him again as accompanying the apostle on his return to Asia, Acts xx. 4; and again xxvii. 2, as being with him on his voyage to Rome. We trace him afterwards as St. Paul's συναιχμάλωτος in Col. iv. 10, and Philem. 24, both these notices belonging to one and the same time of Col. iv. 7; Philem. 12 ff. After this we altogether lose sight of him. Tradition, says Winer, makes him bishop of Apamea. H. A.

* Though Aristarchus is mentioned so often, the A. V. very strangely speaks of him as "one Aristarchus" in Acts xxvii. 2. He appears from that passage to have gone with the apostle to Rome of his own accord. We do not "trace him as Paul's συναιχμάλωτος (fellow-prisoner) in Philem. 24;" but since he is reckoned there among the συνεργοί (fellow-laborers), we may conclude that he received the other appellation in Col. iv. 10, because he made himself the voluntary sharer of Paul's exile and captivity. To remember the brethren in their bonds was accounted the same thing as to be bound with them; see Heb. xiii. 3 (συνδεδεμένοι). The letters to the Colossians and to Philemon were sent away at the same time, which leaves no room for supposing that Aristarchus had been put in prison after the letter to Philemon was written. H.

ARISTOBU'LUS ('Αριστόβουλος [*most excellent counsellor*]: *Aristobolus*), a Jewish priest (2 Macc. i. 10), who resided in Egypt in the reign of Ptolemæus VI. Philometor (comp. Grimm, 2 Macc. i. 9). In a letter of Judas Maccabæus he is addressed (165 B. C.) as the representative of the Egyptian Jews ('Αριστοβούλῳ . . . καὶ τοῖς ἐν Αἰγ. Ἰουδ. 2 Macc. *l. c.*), and is further styled "the teacher" (διδάσκαλος, i. e. counsellor?) of the king. Josephus makes no mention of him but there can be little doubt that he is identical with the Peripatetic philosopher of the name (Clem. Alex. *Str.* v. § 98; Euseb. *Præp. Ev.* viii. 9), who dedicated to Ptol. Philometor his allegoric exposition of the Pentateuch (Βίβλους ἐξηγητικὰς τοῦ Μωυσέως νόμου, Euseb. *H. E.* vii. 32). Considerable fragments of this work have been preserved by Clement and Eusebius (Euseb. *Præp. Evang.* vii. 13, 14, viii. (8) 9, 10, xiii. 12; in which the Clementine fragments recur); but the authenticity of the quotations has been vigorously contested. It was denied by R. Simon, and especially by Hody (*De bibl. text. orig.*, pp. 50 ff. Oxon. 1705), who was answered by Valckenaer (*Diatribe de Aristobulo Judæo*, Lugd. Bat. 1806); and Valckenaer's arguments are now generally considered conclusive. (Gfrörer, *Philo u. s. w.* ii. 71 ff.; Daehne, *Jüd. Alex. Relig.-Philos.* ii. 73 ff.; Ewald, *Gesch. des Volkes Isr.* iv. 294 n.) The object of Aristobulus was to prove that the Peripatetic doctrines were based (ἠρτῆσθαι) on the Law and the Prophets, and his work has an additional interest as showing that the Jewish doctrines were first brought into contact with the Aristotelian and not with the Platonic philosophy (comp. Matter, *Hist de l'École d'Alex.* iii. 153 ff.). The fragments which remain

Digitized by Google



are discussed at length in the works quoted above which contain also a satisfactory explanation of the chronological difficulties of the different accounts of Aristobulus. B. F. W.

ARISTOBU'LUS (Ἀριστόβουλος), a resident at Rome, some of whose household are greeted in Rom. xvi. 10. It does not appear whether he was a Roman; or whether he believed: from the form of expression, probably not. Or he may have been dead at the time. The *Menolog. Graecorum*, as usual (iii. 17 f.), makes him to have been one of the 70 disciples, and reports that he preached the gospel in Britain. H. A.

* It is not safe to infer merely from the expression itself (ἐκ τῶν Ἀριστοβούλου) either that Aristobulus was not a Christian, or that he was not living when the epistle to the Romans was written. (See Fritzsche, *Epistola ad Romanos*, iii. 307). Paul speaks twice precisely in the same way of Stephanas (1 Cor. i. 16, and xvi. 15); but we happen to learn from 1 Cor. xvi. 17, that Stephanas just then was with the apostle at Ephesus (χαίρω ἐπὶ τῇ παρουσίᾳ Στεφανᾶ), and consequently separated from his family at Rome. It is quite possible that Aristobulus was at Corinth when Paul wrote to the Romans, though his proper home was at Rome, or the reverse: he himself may have lived at Corinth, but have had sons or other members of his family settled at Rome. This entire class of passages (NARCISSUS, ONESIPHORUS, CHLOË) involves a peculiarity of phraseology which has not been duly recognized. H.

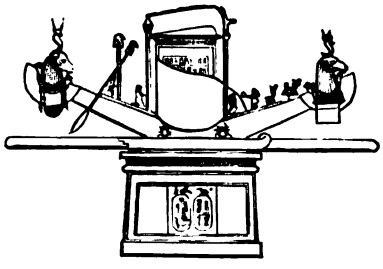
ARK, NOAH'S. [NOAH.]

ARK OF THE COVENANT (אָרוֹן). This, taken generally together with the mercy-seat, was the one piece of the tabernacle's furniture especially invested with sacredness and mystery, and is therefore the first for which precise directions were delivered (Ex. xxv.). The word signifies a mere chest or box, and is (as well as the word תֵּבָה, "ark" of Noah) rendered by the LXX. and New Testament writers by κιβωτός. We may remark: (I.) its material dimensions and fittings; (II.) its design and object, under which will be included its contents; and (III.) its history.

Egyptian Ark. (Rosellini, p. 99)

I. It appears to have been an oblong chest of Shittim (acacia) wood, 2½ cubits long, by 1½ broad and deep. Within and without gold was overlaid on the wood, and on the upper side or lid, which was edged round about with gold, the mercy-seat, supporting the cherubim one at each end, and regarded as the symbolical throne of the Divine presence [CHERUBIM and MERCY-SEAT], was placed. The ark was fitted with rings one at each of the four corners, and therefore two on each side, and through these were passed staves of the same wood similarly overlaid. By these staves, which always remained in the rings, the Levites of the house of Kohath, to whose office this especially appertained, bore it in its progress. Probably, however, when removed from within the veil, in the most holy place, which was its proper position, or when taken out thence, priests were its bearers (Num. vii. 9, x. 21, iv. 5, 19, 20; 1 K. viii. 3, 6). The ends of the staves were visible without the veil in the holy place of the temple of Solomon, the staves being drawn to the ends, apparently, but not out of the rings. The ark, when transported, was enveloped in the "veil" of the dismantled tabernacle, in the curtain of badgers' skins, and in a blue cloth over all, and was therefore not seen.

II. Its purpose or object was to contain inviolate the Divine autograph of the two tables, that "covenant" from which it derived its title, the idea of which was inseparable from it, and which may be regarded as the *depositum* of the Jewish dispensation. The perpetual safe custody of the material tables no doubt suggested the moral observance of the precepts inscribed. It was also probably a reliquary for the pot of manna and the rod of Aaron. We read in 1 K. viii. 9, that "there was nothing in the ark save the two tables of stone which Moses put there at Horeb." Yet St. Paul, or the author of Heb. ix. 4, asserts that, beside the two tables of stone, the "pot of manna" and "Aaron's rod that budded" were inside the ark, which were directed to be "laid up" and "kept *before the testimony*," *i. e.* before the tables of the law (Ex. xl. 20); and probably, since there is no mention of any other receptacle for them, and some would have been necessary, the statement of 1 K. viii. 9 implies that by Solomon's time these relics had disappeared. The expression מִצַּד אֲרוֹן, Deut. xxxi. 26, obscurely rendered "*in* the side of the ark" (A. V.), merely means "beside" it. The words of the A. V. in 1 Chr. xiii. 3, seem to imply an use of the ark for the purpose of an oracle; but this is probably erroneous, and "we sought it not" the meaning; so the LXX. renders it: see Gesenius. *Lex.* s. v. דָּרַשׁ.



Occupying the most holy spot of the whole sanctuary, it tended to exclude any idol from the centre of worship. And Jeremiah (iii. 16) looks forward to the time when even the ark should be "no more remembered," as the climax of spiritualized religion apparently in Messianic times. It was also the support of the mercy-seat, materially symbolizing, perhaps, the "covenant" as that on which "mercy" rested. It also furnished a legitimate vent to that longing after a material object for reverential feeling which is common to all religions. It was, however, never seen, save by the high-priest, and resembled in this respect the Deity whom it symbolized, whose face none might look upon and live (Winer, *ad loc. note*). That this reverential feeling may have been impaired during its absence among the Philistines, seems probable from the example of Uzzah.

III. The chief facts in the earlier history of the ark (see Josh. iii. and vi.) need not be recited We may notice, however, a fiction of the Rabbis that there *were two* arks, one which remained in the shrine, and another which preceded the camp on its march, and that this latter contained the

Digitized by Google

broken tables of the law, as the former the whole ones. In the decline of religion in a later period a superstitious security was attached to its presence in battle. Yet, though this was rebuked by its permitted capture, when captured its sanctity was vindicated by miracles, as seen in its avenging progress through the Philistine cities. From this period till David's time its abode was frequently shifted. It sojourned among several, probably Levitical, families (1 Sam. vii. 1; 2 Sam. vi. 3, 11; 1 Chr. xiii. 13, xv. 24, 25) in the border villages of Eastern Judah, and did not take its place in the tabernacle, but dwelt in curtains, *i. e.* in a separate tent pitched for it in Jerusalem by David. Its bringing up by David thither was a national festival, and its presence there seems to have suggested to his piety the erection of a house to receive it. Subsequently that house, when completed, received, in the installation of the ark in its shrine, the signal of its inauguration by the effulgence of Divine glory instantly manifested. Several of the Psalms contain allusions to these events (*e. g.* xxiv., xlvii., cxxxii.) and Ps. cv. appears to have been composed on the occasion of the first of them.

When idolatry became more shameless in the kingdom of Judah, Manasseh placed a "carved image" in the "house of God," and probably removed the ark to make way for it. This may account for the subsequent statement that it was reinstated by Josiah (2 Chr. xxxiii. 7, xxxv. 3). It was probably taken captive or destroyed by Nebuchadnezzar (2 Esdr. x. 22). Prideaux's argument that there *must* have been an ark in the second temple is of no weight against express testimony, such as that of Josephus (*B. J.* v. 5, § 5) and Tacitus (*Hist.* v. 9, *inania arcana*), confirmed also by the Rabbins, who state that a sacred stone called by them אבן שתיה, "stone of drinking" [STONE], stood in its stead; as well as by the marked silence of those apocryphal books which enumerate the rest of the principal furniture of the sanctuary as present, besides the positive statement of 2 Esdr. as above quoted.

Egyptian Ark. (Wilkinson, Anc. Egypt.)

The ritual of the Etruscans, Greeks, Romans, and other ancient nations, included the use of what Clemens Alexandrinus calls κίσται μυστικαί (Protrept. p 12); but especially that of the Egyptians, in whose religious processions, as represented on monuments, such an ark, surmounted by a pair of winged figures like the cherubim, constantly appears (Wilkinson, *An. Egypt.* v. 271, 275). The same Clemens (Strom. v. 578) also contains an allusion of a proverbial character to the ark and its rites, which seems to show that they were popularly known, where he says that "only the master (διδάσκαλος) may uncover the ark" (κιβωτός). In Latin also, the word *arcanum*, connected with *arca* and *arceo*, is the recognized term for a sacred mystery. Illustrations of the same subject occur also Plut. *de Is. et Osi.* c. 39; Ov. *Ars Am.* ii 609, &c.; Euseb. *Præp. Evang.* ii. 3; Catull. lxiv 260–1; Apul. *Met.* xi. 262. H. H.

ARKITE, THE (הָעַרְקִי, Sam. Cod ערוקי: Ἀρουκαῖος: *Arucæus*), one of the families of the Canaanites (Gen. x. 17; 1 Chr. i. 15), and from the context evidently located in the north of Phœnicia. Josephus (*Ant.* i. 6, § 2) gives the name as Ἀρουκαῖος, and as possessing Ἄρκην τὴν ἐν τῷ Λιβάνῳ. He also again mentions the place (Ἀρκαία, *B. J.* vii. 5, § 1) in defining the position of the Sabbatical river. The name is found in Pliny (v. 18), and Ptolemy (v. 15), and from Ælius Lampridius (*Alex. Sev.*) we learn that the *Urbs Arcena* contained a temple dedicated to Alexander the Great. It was the birthplace of Alexander Severus, and was thence called Cæsarea Libani. Arca was well known to the Crusaders, who under Raimond of Toulouse besieged it for two months in 1099 in vain; it was, however, afterwards taken by William of Sartanges. In 1202 it was totally destroyed by an earthquake. The site which now bears the name of *'Arka* (عرقا) lies on the coast, 2 to 2½ hours from the shore, about 12 miles north of Tripoli, and 5 south of the *Nahr el Khebir* (Eleutherus). The great coast road passes half-way between it and the sea. The site is marked by a rocky tell rising to the height of 100 feet close above the *Nahr Arka*. On the top of the tell is an area of about two acres, and on this and on a plateau to the north the ruins of the former town are scattered. Among them are some columns of granite and syenite (Rob. iii. 579–81; Ges. 1073; Winer, *s. v.*; Reland, 575; Burckhardt, 162; *Dict. of Gr. and Rom. Geogr.*, art. ARCA). G.

ARMAGED'DON (['Αρμαγεδδών; Lachm. Tisch.] 'Αρμαγεδών: [*Armagedon*], Rev. xvi. 16). It would be foreign to the purpose of this work to enter into any of the theological controversies connected with this word. Whatever its full symbolical import may be, the image rests on a geographical basis; and the locality implied in the Hebrew term here employed (τὸν τόπον τὸν καλούμενον Ἑβραϊστὶ Ἀρμαγεδών) is the great battlefield of the Old Testament, where the chief conflicts took place between the Israelites and the enemies of God's people. The passage is best illustrated by comparing a similar one in the book of Joel (iii. 2, 12), where the scene of the Divine judgments is spoken of in the prophetic imagery as the "valley of Jehoshaphat," the fact underlying the image being Jehoshaphat's great victory (2 Chr. xx. 26; see Zech. xiv. 2, 4). So here the scene of the struggle of good and evil is suggested by that battlefield, the plain of Esdraelon, which was famous for two great victories, of Barak over the Canaanites (Judg. iv., v.), and Gideon over the Midianites (Judg. vii.); and for two great disasters, the death of Saul in the invasion of the Philistines (1 Sam. xxxi. 8), and the death of Josiah in the invasion of the Egyptians (2 K. xxiii. 29, 30; 2 Chr. xxxv 22). With the first and fourth of these events Megiddo (Μαγεδδώ in the LXX. and Josephus) is especially connected. Hence Ἀρμαγεδών, "the hill of Megiddo." (See Bähr's *Excursus* on Herod ii. 159.) The same figurative language is

used by one of the Jewish prophets (Zech. xii. 11). As regards the Apocalypse, it is remarked by Stanley (*S. & P.* p. 330), that this imagery would be peculiarly natural to a Galilæan, to whom the scene of these battles was familiar. [MEGIDDO.]

J. S. H.

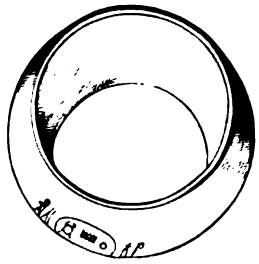
ARMENIA (Ἀρμενία) is nowhere mentioned under that name in the original Hebrew, though it occurs in the English version (2 K. xix. 37), where our translators have very unnecessarily substituted it for Ararat (comp. marginal reading). [Here the LXX. read Ἀραράθ (Alex. Ἀραβάς), Vulg. *Armenii*.] The absence of the *name*, however, which was not the indigenous name of the people, by no means implies that the Hebrew writers were unacquainted with the country. They undoubtedly describe certain districts of it under the names Ararat, Minni, and Togarmah. Of these three the latter appears to have the widest signification. It is the name of a *race* (Gen. x. 3), and not of a locality, and is used by Ezekiel as descriptive of the whole country (xxvii. 14, xxxviii. 6), while the two former are mentioned together, and have been identified with separate localities.

Armenia is that lofty plateau whence the rivers Euphrates, Tigris, Araxes, and Acampsis, pour down their waters in different directions, the two first to the Persian Gulf, the last two respectively to the Caspian and Euxine Seas. It may be termed the *nucleus* of the mountain system of western Asia. From the centre of the plateau rise two lofty chains of mountains, which run from E. to W., converging towards the Caspian sea, but parallel to each other towards the W., the most northerly named by ancient geographers Abus Mts, and culminating in Mount Ararat; the other named Niphates Mts. Westward these ranges may be traced in Anti-Taurus and Taurus, while in the opposite direction they are continued in Caspius Mts. The climate of Armenia is severe, the degree of severity varying with the altitude of different localities, the valleys being sufficiently warm to ripen the grape, while the high lands are bleak and only adapted for pasture. The latter supported vast numbers of mules and horses, on which the wealth of the country chiefly depended; and hence Strabo (xi. 529) characterizes the country as σφόδρα ἱππόβοτος, and tells us that the horses were held in as high estimation as the celebrated Nisæan breed. The inhabitants were keen traders in ancient as in modern times.

The slight acquaintance which the Hebrew writers had of this country was probably derived from the Phœnicians. There are signs of their knowledge having been progressive. Isaiah, in his prophecies regarding Babylon, speaks of the hosts as coming from "the mountains" (xiii. 4), while Jeremiah, in connection with the same subject, uses the specific names Ararat and Minni (li. 27). Ezekiel, who was apparently better acquainted with the country, uses a name which was familiar to its own inhabitants, Togarmah. Whether the use of the term Ararat in Is. xxxvii. 38 belongs to the period in which the prophet himself lived, is a question which cannot be here discussed. In the prophetical passages to which we shall refer, it will be noticed that Armenia is spoken of rather in reference to its geographical position as one of the extreme northern nations with which the Jews were acquainted, than for any more definite purpose. (1.) ARARAT is noticed as the place whither the sons of Sennacherib fled (Is. xxxvii. 38). In the prophecies of Jeremiah (li. 27) it is summoned along with Minni and Ashkenaz to the destruction of Babylon, — the LXX. however only notice the last. It was the central district surrounding the mountain of that name. (2.) MINNI (מִנִּי) is only noticed in the passage just referred to. It is probably identical with the district Minyas, in the upper valley of the *Murad-su* branch of the Euphrates (Joseph. *Ant.* i. 3, § 6). It contains the root of the name Armenia according to the generally received derivation, Har-Minni, "the mountains of Minni." It is worthy of notice that the spot where Xenophon ascertains that the name of the country through which he was passing was Armenia, coincides with the position here assigned to Minni (Xen. *An.* iv. 5; Ainsworth, *Track of 10,000*, p. 177). (3.) TOGARMAH (תּוֹגַרְמָה: Θογαρμά, and Θοργομά) is noticed in two passages of Ezekiel, both of which support the idea of its identity with Armenia. In xxvii. 14 he speaks of its commerce with the Tyrians in "horses, horsemen, and mules" (A. V.), or, as the words mean, "carriage-horses, riding-horses, and mules" (Hitzig, *Comment.*), which we have already noticed as the staple productions of Armenia. That the house of Togarmah "traded in the fairs of Tyre," as the A. V. expresses it, is more than the Hebrew text seems to warrant. The words simply signify that the Armenians carried on commerce with the Tyrians in those articles. In this passage Togarmah is mentioned in connection with Meshech and Tubal; in xxxviii. 6, it is described as "of the north quarters" in connection with Gomer. Coupling with these particulars the relationship between Togarmah, Ashkenaz, and Riphat (Gen. x. 3), the three sons of Gomer, and the nations of which these patriarchs were the progenitors, we cannot fail in coming to the conclusion that Togarmah represents Armenia. We will only add that the traditional belief of the Armenians themselves, that they are descended from Thorgomass or Torgarmah, strongly confirms this view.[a] W. L. B.

ARMLET (אֶצְעָדָה, Num. xxxi. 50, 2 Sam. i. 10: χλιδών; Aquila [In 2 Sam.] βραχιόνιον: [*periscelis,*] *armilla, brachiale*; properly a fetter, from צָעַד, *a step*; comp. Is. iii

Assyrian Armlet. From Nineveh Marbles, British Museum.



2, and ANKLET), an ornament universal [illegible]

[a] We are indebted for a valuable work on Armenia and Persia to the American missionaries, Messrs. H. G. O. Dwight and Eli Smith, who made a tour of observation in these countries in 1830. We have a still later work from Dr. Dwight (1850) entitled "Christianity revived in the East," treating especially of [illegible] moral changes which are taking place among the Armenians of Turkey.

Digitized by Google

East, especially among women; used by princes as one of the insignia of royalty, and by distinguished persons in general. The word is not used in the A. V., as even in 2 Sam. i. 10, they render it "by the bracelet on his arm." Sometimes only one was worn, on the right arm (Ecclus. xxi. 21). From Cant. viii. 6, it appears that the signet sometimes consisted of a jewel on the armlet.

These ornaments were worn by most ancient princes. They are frequent on the sculptures of Persepolis and Nineveh, and were set in rich and fantastic shapes, resembling the heads of animals (Layard, *Nineveh*, ii. 298). The kings of Persia wore them, and Astyages presented a pair among other ornaments to Cyrus (Xen. *Cyr.* i. 3). The Æthiopians, to whom some were sent by Cambyses scornfully characterized them as weak fetters (Herod. ii. 23). Nor were they confined to the kings, since Herodotus (viii. 113) calls the Persians generally ψελιοφόροι. In the Egyptian monuments "kings are often represented with armlets and bracelets, and in the Leyden Museum is one bearing the name of the third Thothmes." [A gold bracelet figured below.] (Wilkinson's *Anc.*

Egyptian Armlet. From the Leyden Museum.

Egypt. iii. 375, and Plates 1, 2, 14). They were even used by the old British chiefs (Turner, *Angl. Sax.* i. 383). The story of Tarpeia shows that they were common among the ancient Sabines, but the Romans considered the use of them effeminate, although they were sometimes given as military rewards (Liv. x. 44). Finally, they are still worn among the most splendid regalia of modern Oriental sovereigns, and it is even said that those of the king of Persia are worth a million sterling (Kitto, *Pict. Hist. of Pal.* i. 499). They form the chief wealth of modern Hindoo ladies, and are rarely taken off. They are made of every sort of material from the finest gold, jewels, ivory, coral, and pearl, down to the common glass rings and varnished earthenware bangles of the women of the Deccan. Now, as in ancient times, they are sometimes plain, sometimes enchased, sometimes with the ends not joined, and sometimes a complete circle. The arms are sometimes quite covered with them, and if the wearer be poor, it matters not how mean they are, provided only that they glitter. It is thought essential to beauty that they should fit close, and hence Harmer calls them "rather manacles than bracelets," and Buchanan says "that the poor girls rarely get them on without drawing blood, and rubbing part of the skin from the hand; and as they wear great numbers, which often break, they suffer much from their love of admiration." Their enormous weight may be conjectured from Gen. xxiv. 24. [BRACELET.] F. W. F.

ARMONI (אַרְמֹנִי [*Palatinus, palace inmate*]: Ἐρμωνί; [Vat. Ερμωνοι; Alex. -νει Ald. Ἐρμωνεί; Comp. Ἀρμωνί:] *Armoni*), son of Saul by Rizpah (2 Sam. xxi. 8).

***ARMORY** (בִּירָה, which Luther renders *Harnischhaus* and De Wette *Zeughaus*) occurs only in Neh. iii. 19 (A. V.), and is mentioned there as being opposite the part of the walls of Jerusalem built by EZRA (3) after the captivity. The same place, no doubt, is meant in Is. xxii. 8 (בֵּית הַיָּעַר), whether we render there "armorer" (A. V.) or "armory of the house of the forest," *i. e.* (as more fully in 1 Kings vii. 2 ff.) "of the forest of Lebanon," and so called because built with cedars brought from Lebanon. See Knobel, *Exeget. Handb.* v. 153; and Gesenius, *über den Jesaia*, ii. 690. This "armory," therefore, was an apartment in this "house" or palace of Solomon, in which, as we see expressly from 1 Kings x. 16, 17, he deposited his "golden targets and shields" (Keil, *Bücher der Könige*, p. 153). It appears to have existed still, or remains of it, in the time of Nehemiah. Gesenius infers from Neh. iii. 19 (though the local indication there is very indefinite) that it was situated on OPHEL, the southern projection of Moriah (*Thesaur.* ii. 612); but a different view is presented under PALACE. H.

ARMS, ARMOR. In the records of a people like the Children of Israel, so large a part of whose history was passed in warfare, we naturally look for much information, direct or indirect, on the arms and modes of fighting of the nation itself and of those with whom it came into contact.

Unfortunately, however, the notices that we find in the Bible on these points are extremely few and meagre, while even those few, owing to the uncertainty which rests on the true meaning and force of the terms, do not convey to us nearly all the information which they might. This is the more to be regretted because the notices of the history, scanty as they are, are literally everything we have to depend on, inasmuch as they are not yet supplemented and illustrated either by remains of the arms themselves, or by those commentaries which the sculptures, vases, bronzes, mosaics, and paintings of other nations furnish to the notices of manners and customs contained in their literature.

In remarkable contrast to Greece, Rome, Egypt, and we may now add Assyria, Palestine has not yet yielded one vestige of the implements or utensils of life or warfare of its ancient inhabitants; nor has a single sculpture, piece of pottery, coin, or jewel, been discovered of that people with whose life, as depicted in their literature, we are more familiar than with that of our own ancestors. Even the relations which existed between the customs of Israel and those of Egypt on the one hand, and Assyria on the other, have still to be investigated, so that we are prevented from applying to the history of the Jews the immense amount of information which we possess on the warlike customs of these two nations, the former especially. Perhaps the time will arrive for investigations in Palestine of the same nature as those which have, within the last ten years, given us so much insight into Assyrian manners; but in the meantime all that can be done here is to examine the various terms by which instruments of war appear to be designated in the Bible, in the light of such help as can be got from the comparison of parallel passages, from

Digitized by Google

the derivation of the words, and from the renderings of the ancient versions.

The subject naturally divides itself into — I. Offensive weapons: Arms. II. Defensive weapons: Armor.

I. Offensive weapons: 1. Apparently the earliest known, and most widely used, was the *Chereb* (חֶרֶב), "SWORD," from a root signifying to lay waste.

Its first mention in the history is in the narrative of the massacre at Shechem, when "Simeon and Levi took each man his sword, and came upon the city boldly and slew all the males" (Gen. xxxiv. 25). But there is an allusion to it shortly before in a passage undoubtedly of the earliest date (Ewald, i. 446 *note*): the expostulation of Laban with Jacob (Gen. xxxi. 26). After this, during the account of the conquest and of the monarchy, the mention of the sword is frequent, but very little can be gathered from the casual notices of the text as to its shape, size, material, or mode of use. Perhaps if anything is to be inferred it is that the *chereb* was not either a heavy or a long weapon. That of Ehud was only a cubit, *i. e.* 18 inches long, so as to have been concealed under his garment, and nothing is said to lead to the inference that it was shorter than usual, for the "dagger" of the A. V. is without any ground, unless it be a rendering of the μάχαιρα of the LXX. But even assuming that Ehud's sword was shorter than usual, yet a consideration of the narratives in 2 Sam. ii. 16 and xx. 8–10, and also of the ease with which David used the sword of a man so much larger than himself as Goliath (1 Sam. xvii. 51, xxi. 8,

Egyptian Sword.

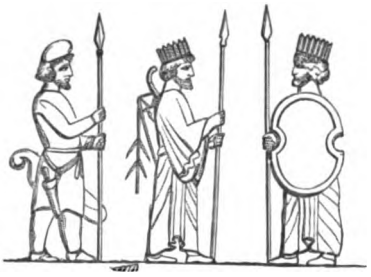
9), goes to show that the *chereb* was both a lighter and a shorter weapon than the modern sword. What frightful wounds one blow of the sword of the Hebrews could inflict, if given even with the left hand of a practiced swordsman, may be gathered from a comparison of 2 Sam. xx. 8–12 with 1 K. ii. 5. A ghastly picture is there given us of the murdered man and his murderer. The unfortunate Amasa actually disembowelled by the single stroke, and "wallowing" in his blood in the middle of the road — the treacherous Joab standing over him, bespattered from his "girdle" to his "shoes" with the blood which had spouted from his victim!

The *chereb* was carried in a sheath (תַּעַר, 1 Sam. xvii. 51; 2 Sam. xx. 8, only: נֶדֶן, 1 Chr. xxi. 27, only) slung by a girdle (1 Sam. xxv. 13) and resting upon the thigh (Ps. xlv. 3; Judg. iii. 16), or upon the hips (2 Sam. xx. 8). "Girding on the sword" was a symbolical expression for com-

Persian Sword, or Acinaces.

mencing war, the more forcible because in times of peace even the king in state did not wear a sword (1 K. iii. 24); and a similar expression occurs to denote those able to serve (Judg. viii. 10; 1 Chr. xxi. 5). Other phrases, derived from the *chereb* are, "to smite with the edge" (literally "mouth," comp. στόμα, and comp. "devour," Is. i. 20) of the "sword" — "slain with the sword" — "men that drew sword," &c.

Swords with two edges are occasionally referred to (Judg. iii. 16; Ps. cxlix. 6), and allusions are found to "whetting" the sword (Deut. xxxii. 41; Ps. lxiv. 3; Ez. xxi. 9). There is no reference to the material of which it was composed (unless it be Is. ii. 4; Joel iii. 10); doubtless it was of metal from the allusions to its brightness and "glittering" (see the two passages quoted above, and others), and the ordinary word for blade, namely, לַהַב, "a flame." From the expression (Josh. v. 2, 3) "swords of rock," A. V. "sharp knives," we may perhaps infer that in early times the material was flint.



2. Next to the sword was the SPEAR; and of this weapon we meet with at least three distinct kinds.

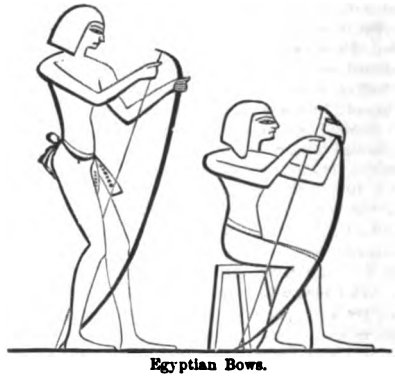
a. The *Chanith* (חֲנִית), a "Spear," and that of the largest kind, as appears from various circumstances attending its mention. It was the weapon of Goliath — its staff like a weaver's beam, the iron head alone weighing 600 shekels, about 25 lbs. (1

Digitized by Google

Sam. xvii. 7, 45; 2 Sam. xxi. 19; 1 Chr. xx. 5), and also of other giants (2 Sam. xxiii. 21; 1 Chr. xi. 23) and mighty warriors (2 Sam. ii. 23, xxiii. 18; 1 Chr. xi. 11, 20). The *chanith* was the habitual companion of King Saul — a fit weapon for one of his gigantic stature — planted at the head of his sleeping-place when on an expedition (1 Sam. xxvi. 7, 8, 11, 12, 16, 22), or held in his hand when mustering his forces (xxii. 6); and on it the dying king is leaning when we catch our last glimpse of his stately figure on the field of Gilboa (2 Sam. i. 6). His fits of anger or madness become even more terrible to us, when we find that it was this heavy weapon and not the lighter "javelin" (as the A. V. renders it) that he cast at David (1 Sam. xviii. 10, 11, xix. 9, 10) and at Jonathan (xx. 33). A striking idea of the weight and force of this ponderous arm may be gained from the fact that a mere back thrust from the hand of Abner was enough to drive its butt end through the body of Asahel (2 Sam. ii. 23). The *chanith* is mentioned also in 1 Sam. xiii. 19, 22, xxi. 8; 2 K. xi. 10; 2 Chr. xxiii. 9, and in numerous passages of poetry.

b. Apparently lighter than the preceding, and in more than one passage distinguished from it, was the *Cidón* (כִּידוֹן), to which the word "Javelin" perhaps best answers (Ewald, *Wurfspiess*). It would be the appropriate weapon for such maneuvering as that described in Josh. viii. 14–27, and could with ease be held outstretched for a considerable time (18, 26; A. V. "spear"). When not in action the *cidón* was carried on the back of

Persian Spears.



the warrior, between the shoulders (1 Sam. xvii. 6, "target," and margin "gorget"). Both in this passage and in verse 45 of the same chapter the *cidón* is distinguished from the *chanith*. In Job xxxix. 23 ("spear") the allusion seems to be to the quivering of a javelin when poised before hurling it.

c. Another kind of spear was the *Romach* (רֹמַח). In the historical books it occurs in Num. xxv. 7 ("javelin"), and 1 K. xviii. 28 ("lancets;" 1611, "lancers"). Also frequently in the later books, especially in the often recurring formula for arms, "shield and *spear*." 1 Chr. xii. 8 ("buckler"), 24 ("spear"), 2 Chr. xi. 12, xiv. 8, xxv. 5, and Neh. iv. 13, 16–21; Ez. xxxix. 9, &c.

d. A lighter missile or "dart" was probably the *Shelach* (שֶׁלַח). Its root signifies to project or send out, but unfortunately there is nothing beyond the derivation to guide us to any knowledge of its nature. See 2 Chr. xxiii. 10, xxxii. 5 ("darts"); Neh. iv. 17, 23 (see margin); Job xxxiii. 18, xxxvi. 12; Joel ii. 8.

e. The word *Shebet* (שֵׁבֶט), the ordinary meaning of which is a rod or staff, with the derived force of a baton or sceptre, is used once only with a military signification, for the "darts" with which Joab despatched Absalom (2 Sam. xviii. 14).

3. Of missile weapons of offense the chief was undoubtedly the Bow, *Kesheth* (קֶשֶׁת); it is met with in the earliest stages of the history, in use both for the chase (Gen. xxi. 20, xxvii. 3) and war (xlviii. 22). In later times archers accompanied the armies of the Philistines (1 Sam. xxxi. 3; 1 Chr. x. 3) and of the Syrians (1 K. xxii. 34). Among the Jews its use was not confined to the common soldiers, but captains high in rank, as Jehu (2 K. ix. 24), and even kings' sons (1 Sam. xviii. 4) carried the bow, and were expert and sure in its use (2 Sam. i. 22). The tribe of Benjamin seems to have been especially addicted to archery (1 Chr. viii. 40, xii. 2; 2 Chr. xiv. 8, xvii. 17); but there were also bowmen among Reuben, Gad, Manasseh (1 Chr. v. 18), and Ephraim (Ps. lxxviii. 9).

Egyptian Bows.

Of the form or structure of the bow we can gather almost nothing. It seems to have been bent with the aid of the foot, as now, for the word commonly used for it is דָּרַךְ, *to tread* (1 Chr. v. 18 viii. 40; 2 Chr. xiv. 8; Is. v. 18; Ps. vii. 12, &c.) Bows of steel (or perhaps brass, נְחוּשָׁה) are mentioned as if specially strong (2 Sam. xxii. 35; Ps. xviii. 34). The string is occasionally named, יֶתֶר or מְיֶתָר. It was probably at first some bind-weed or natural cord, since the same word is used in Judg. xvi. 7–9 for "green withs."

In the allusion to bows in 1 Chr. xii. 2, it will be observed that the sentence in the original stands "could use both the right hand and the left in stones and arrows out of a bow," the words "hurling" and "shooting" being interpolated by the translators. It is possible that a kind of bow for shooting bullets or stones is here alluded to, like the pellet-bow of India, or the "stone-bow" in use in the middle ages — to which allusion is made by Shakespeare (Twelfth Night, ii. 5), and which in Wisd. v. 22 is employed as the translation of λιθοβόλοις. This latter word occurs in the LXX. text of 1 Sam. xiv. 14, in a curious variation of a passage which in the Hebrew is hardly intelligible — ἐν βολίσι, καὶ ἐν λιθοβόλοις, καὶ ἐν σφενδόναις τοῦ πεδίου: "with things thrown, and with stone-bows, and with flints of the field." If this be

Digitized by Google

accepted as the true reading we have here by comparison with xiv. 27, 43, an interesting confirmation of the statement (xiii. 19–22) of the degree to which the Philistines had deprived the people of arms; leaving to the king himself nothing but his faithful spear, and to his son, no sword, no shield, and nothing but a stone-bow and a staff (A. V. "rod").

The ARROWS, *Chitzim* (חִצִּים), were carried in a quiver, *Theli* (תֶּלִי, Gen. xxvii. 3, only), or *Ashpah* (אַשְׁפָּה, Ps. xxii. 6, xlix. 2, cxxvii. 4). From an allusion in Job vi. 4, they would seem to have been sometimes poisoned; and the "sharp arrows of the mighty with coals of juniper," in Ps. cxx. 4, may point to a practice of using arrows with some burning material attached to them.

4. The SLING, *Kela'* (קֶלַע), is first mentioned in Judg. xx. 16, where we hear of the 300 Benjamites who with their left hand could "sling stones at an hairbreadth, and not miss." The simple weapon with which David killed the giant Philistine was the natural attendant of a shepherd, whose duty it was to keep at a distance and drive off anything attempting to molest his flocks. The sling would be familiar to all shepherds and keepers of sheep, and therefore the bold metaphor of Abigail has a natural propriety in the mouth of the wife of a man whose possessions in flocks were so great as those of Nabal — "as for the souls of thine enemies, them shall God sling out, as out of the middle of a sling" (1 Sam. xxv. 29).

Later in the monarchy slingers formed part of the regular army (2 K. iii. 25), though it would seem that the slings there mentioned must have been more ponderous than in earlier times, and that those which could break down the fortifications of so strong a place as Kir-haraseth must have been more like the engines which king Uzziah contrived to "shoot great stones" (2 Chr. xxvi. 15). In verse 14 of the same chapter we find an allusion (concealed in the A. V. by two interpolated words) to stones specially adapted for slings — "Uzziah prepared throughout all the host shields and spears . . . bows and sling-stones."

II. Passing from weapons to Armor — from offensive to defensive arms — we find several references to what was apparently armor for the body.

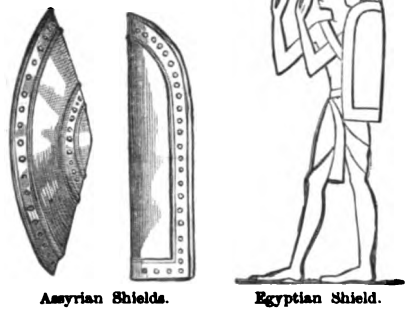
1. The *Shiryon* (שִׁרְיוֹן; or in its contracted form שִׁרְיָן, and once שִׁרְיָה); according to the LXX. θώραξ, Vulg. *lorica*, — a BREASTPLATE. This occurs in the description of the arms of Goliath — שִׁרְיוֹן קַשְׂקַשִּׂים, a "coat of mail," literally a "breastplate of scales" (1 Sam. xvii. 5), and further (38), where *shiryon* alone is rendered "coat of mail." It may be noticed in passing that this passage contains the most complete inventory of the furniture of a warrior to be found in the whole of the sacred history. Goliath was a Philistine, and the minuteness of the description of his equipment may be due either to the fact that the Philistines were usually better armed than the Hebrews, or to the impression produced by the contrast on this particular occasion between this fully armed champion and the wretchedly appointed soldiers of the Israelite host, stripped as they had been very shortly before, both of arms and of the means of supplying them, so completely that no smith could be found in the country, nor any weapons seen among the people, and that even the ordinary implements of husbandry had to be repaired and sharpened at the forges of the conquerors (1 Sam. xiii. 19–22. *Shiryon* also occurs in 1 K. xxii. 34, and 2 Chr. xviii. 33). The last cited passage is very obscure; the A. V. follows the Syriac translation, but the real meaning is probably "between the joints and the breastplate." Ewald reads "between the loins and the chest;" LXX. and Vulgate, "between the lungs and the breastbone." It is further found in 2 Chr. xxvi. 14, and Neh. iv. 16 ("habergeons"), also in Job xli. 26 and Is. lix. 17. This word has furnished one of the names of Mount Hermon (see Deut. iii. 9; Stanley, p. 403), a parallel to which is found in the name Θώραξ given to Mount Sipylus in Lydia. It is possible that in Deut. iv. 48, Sion (שִׂיאֹן) is a corruption of *shiryon* [or *siryon*, cf. Jer. li. 3]

2. Another piece of defensive armor was the *Tachara* (תַּחְרָא), which is mentioned but twice, namely, in reference to the *Meil* or gown of the priest, which is said to have had a hole in the middle for the head, with a hem or binding round the hole "as it were the 'mouth' of an *habergeon*" (תִּחְרָא), to prevent the stuff from tearing (Ex xxviii. 32). The English "habergeon," was the diminutive of the "hauberk" and was a quilted shirt or doublet put on over the head.

3. The HELMET is but seldom mentioned. The word for it is *Cova'* (פּוֹבַע, or twice קוֹבַע), from a root signifying to be high and round. Reference is made to it in 1 Sam. xvii. 5; 2 Chr. xxvi. 14; Ez. xxvii. 10.

Assyrian Helmets.

4. GREAVES, or defenses for the feet (not "legs" as in the A. V.) — מִצְחָה, *Mitzchah*, made of brass, נְחשָׁה — are named in 1 Sam. xvii. 6, only.



Of the defensive arms borne by the warrior the notices are hardly less scanty than those just examined.

5. Two kinds of SHIELD are distinguishable.

a. The *Tzinnah* (צִנָּה; from a root צָנַן, to protect). This was the large shield, encompassing (Ps. v. 12) and forming a protection for the whole person. When not in actual conflict, the *tzinnah* was carried before the warrior (1 Sam. xvii. 7, 41). The definite article in the former passage ("*the*" shield, not "a shield" as in the A. V.) denotes the importance of the weapon. The word is used with *romach* (1 Chr. xii. 8, 24; 2 Chr. xi. 12, &c.) and *chanith* (1 Chr. xii. 34) as a formula for weapons generally.

Digitized by Google

b. Of smaller dimensions was the *Magen* (מָגֵן, from גָּנַן, to cover), a buckler or target, probably for use in hand to hand fight. The difference in size between this and the *tzinnah* is evident from 1 K. x. 16, 17; 2 Chr. ix. 15, 16, where a much larger quantity of gold is named as being used for the latter than for the former. The portability of the *magen* may be inferred from the notice in 2 Chr xii. 9, 10; and perhaps also from 2 Sam. i. 21. The word is a favorite one with the poets of

Assyrian Shields. Egyptian Shield.

the Bible (see Job xv. 26; Ps. iii. 3, xviii. 2, &c.). Like *tzinnah*, it occurs in the formulistic expressions for weapons of war, but usually coupled with light weapons — the bow (2 Chr. xiv. 8, xvii. 17), darts, שֶׁלַח (2 Chr. xxxii. 5).

6. What kind of arm was the *Shelet* (שֶׁלֶט) it is impossible to determine. By some translators it is rendered a "quiver," by some "weapons" generally, by others a "shield." Whether either or none of these are correct, it is clear that the word had a very individual sense at the time. It denoted certain special weapons taken by David from Hadadezer king of Zobah (2 Sam. viii. 7; 1 Chr. xviii. 7), and dedicated in the temple, where they did service on the memorable occasion of Joash's proclamation (2 K. xi. 10; 2 Chr. xxiii. 9), and where their remembrance long lingered (Cant. iv. 4). From the fact that these arms were of gold it would seem that they cannot have been for offense.

In the two other passages of its occurrence (Jer. li. 11; Ez. xxvii. 11) the word has the force of a foreign arm. G.

ARMY. I. JEWISH ARMY. — The military organization of the Jews commenced with their departure from the land of Egypt, and was adapted to the nature of the expedition on which they then entered. Every man above 20 years of age was a soldier (Num. i. 3): each tribe formed a regiment, with its own banner and its own leader (Num. ii. 2, x. 14): their positions in the camp or on the march were accurately fixed (Num. ii.): the whole army started and stopped at a given signal (Num. x. 5, 6): thus they came up out of Egypt ready for the fight (Ex. xiii. 18). That the Israelites preserved the same exact order throughout their march, may be inferred from Balaam's language (Num. xxiv. 6). On the approach of an enemy, a conscription was made from the general body under the direction of a muster-master (originally named שֹׁטֵר, Deut. xx. 5, "officer," afterwards סוֹפֵר, 2 K. xxv. 19, "scribe of the host," both terms occurring, however, together in 2 Chr. xxvi. 11, the meaning of each being primarily a *writer* or *scribe*) by whom also the officers were appointed (Deut. xx 9). From the number so selected, some might be excused serving on certain specified grounds (Deut xx. 5–8; 1 Macc. iii. 56). The army was then divided into thousands and hundreds under their respective captains (שָׂרֵי הָאֲלָפִים, שָׂרֵי הַמֵּאוֹת, Num xxxi. 14), and still further into families (Num. ii. 34; 2 Chr. xxv. 5, xxvi. 12) — the family being regarded as the unit in the Jewish polity From the time the Israelites entered the land of Canaan until the establishment of the kingdom. little progress was made in military affairs. Their wars resembled *border forays*, and the tactics turned upon stratagem rather than upon the discipline and disposition of the forces. Skillfully availing themselves of the opportunities which the country offered, they gained the victory sometimes by an ambush (Josh. viii. 4); sometimes by surprising the enemy (Josh. x. 9, xi. 7; Judg. vii. 21); and sometimes by a judicious attack at the time of fording a river (Judg. iii. 28, iv. 7, vii. 24, xii. 5). No general muster was made at this period; but the combatants were summoned on the spur of the moment either by trumpet-call (Judg. iii. 27), by messengers (Judg. vi. 35), by some significant token (1 Sam. xi. 7), or, as in later times, by the erection of a standard (נֵס, Is. xviii. 3; Jer. iv. 21, li. 27), or a beacon-fire on an eminence (Jer. vi. 1).

With the kings arose the custom of maintaining a body-guard, which formed the nucleus of a standing army. Thus Saul had a band of 3000 select warriors (1 Sam. xiii. 2, xiv. 52, xxiv. 2), and David, before his accession to the throne, 600 (1 Sam. xxiii. 13, xxv. 13). This band he retained after he became king, and added the CHERETHITES and PELETHITES (2 Sam. xv. 18, xx. 7), together with another class, whose name *Shalishim* (שָׁלִשִׁים, τριστάται, LXX.) has been variously interpreted to mean (1) a corps of veteran guards = Roman *triarii* (Winer, s. v., *Kriegsherr*); (2) chariot-warriors, as being *three* in each chariot (Gesen. *Thes.* p. 1429); (3) officers of the guard, *thirty* in number (Ewald, *Gesch.* ii. 601). The fact that the Egyptian war-chariot, with which the Jews were first acquainted, contained but two warriors, forms an objection to the second of these opinions (Wilkinson, *Anc. Egypt.* i. 335), and the frequent use of the term in the singular number (2 K. vii. 2, ix. 25, xv. 25) to the third. Whatever be the meaning of the name, it is evident that it indicated officers of high rank, the chief of whom (הַשָּׁלִישׁ, "lord," 2 K. vii. 2, or רֹאשׁ הַשָּׁלִשִׁים, "chief of the captains," 1 Chr. xii. 18) was immediately about the king's person, as adjutant or secretary-at-war. David further organized a national militia, divided into twelve regiments, each of which was called out for one month in the year under their respective officers (1 Chr. xxvii. 1); at the head of the army when in active service he appointed a commander-in-chief (שַׂר־צָבָא, "captain of the host," 1 Sam. xiv. 50).

Hitherto the army had consisted entirely of infantry (רַגְלִי, 1 Sam. iv. 10, xv. 4), the use of horses having been restrained by divine command

Digitized by Google

(Deut. xvii. 16). The Jews had, however, experienced the great advantage to be obtained by chariots, both in their encounters with the Canaanites (Josh. xvii. 16; Judg. i. 19), and at a later period with the Syrians (2 Sam. viii. 4, x. 18). The interior of Palestine was indeed generally unsuited to the use of chariots. The Canaanites had employed them only in the plains and valleys, such as Jezreel (Josh. xvii. 16), the plain of Philistia (Judg. i. 19; 1 Sam. xiii. 5), and the upper valley of the Jordan (Josh. xi. 9; Judg. iv. 3). But the border, both on the side of Egypt and Syria, was admirably adapted to their use; and accordingly we find that as the foreign relations of the kingdoms extended, much importance was attached to them. David had reserved a hundred chariots from the spoil of the Syrians (2 Sam. viii. 4). These probably served as the foundation of the force which Solomon afterwards enlarged through his alliance with Egypt (1 K. x. 28, 29), and applied to the protection of his border, stations or barracks being erected for them in different localities (1 K. ix. 19). The force amounted to 1400 chariots, 4000 horses, at the rate (in round numbers) of three horses for each chariot, the third being kept as a reserve, and 12,000 horsemen (1 K. x. 26; 2 Chr. i. 14). At this period the organization of the army was complete; and we have, in 1 K. ix. 22, apparently a list of the various gradations of rank in the service, as follows: — (1) אַנְשֵׁי הַמִּלְחָמָה, "men of war" = *privates*; (2) עֲבָדִים, "servants," the lowest rank of officers = *lieutenants*; (3) שָׂרִים, "princes" = *captains*; (4) שָׁלִישִׁים, "captains," already noticed, perhaps = *staff-officers*; (5) שָׂרֵי הַמֶּרְכָּב and שָׂרֵי הַפָּרָשִׁים, "rulers of his chariots and his horsemen" = *cavalry officers*.

It does not appear that the system established by David was maintained by the kings of Judah; but in Israel the proximity of the hostile kingdom of Syria necessitated the maintenance of a standing army. The militia was occasionally called out in time of peace, as by Asa (2 Chr. xiv. 8), by Jehoshaphat (2 Chr. xvii. 14), by Amaziah (2 Chr. xxv. 5), and lastly by Uzziah (2 Chr. xxvi. 11); but these notices prove that such cases were exceptional. On the other hand the incidental notices of the body-guard lead to the conclusion that it was regularly kept up (1 K. xiv. 28; 2 K. xi. 4, 11). Occasional reference is made to war-chariots (2 K. viii. 21), and it would appear that this branch of the service was maintained, until the wars with the Syrians weakened the resources of the kingdom (2 K. xiii. 7). It was restored by Jotham (Is. ii. 7), but in Hezekiah's reign no force of the kind could be maintained, and the Jews were obliged to seek the aid of Egypt for horses and chariots (2 K. xviii. 23, 24). This was an evident breach of the injunction in Deut. xvii. 16, and met with strong reprobation on the part of the prophet Isaiah (xxxi. 1).

With regard to the arrangement and maneuvering of the army in the field, we know but little. A division into three bodies is frequently mentioned (Judg. vii. 16, ix. 43; 1 Sam. xi. 11; 2 Sam. xviii. 2). Such a division served various purposes. In action there would be a centre and two wings; in camp, relays for the night-watches (Judg. vii. 19); and by the combination of two of the divisions, there would be a main body and a reserve, or a strong advanced guard (1 Sam. xiii. 2, xxv 13). Jehoshaphat divided his army into five bodies, corresponding, according to Ewald (*Geschichte*, iii. 192), to the geographical divisions of the kingdom at that time. May not, however, the threefold principle of division be noticed here also, the heavy-armed troops of Judah being considered as the proper army, and the two divisions of light-armed of the tribe of Benjamin as an appendage (2 Chr. xvii. 14–18)?

The maintenance and equipment of the soldiers at the public expense dates from the establishment of a standing army, before which each soldier armed himself, and obtained his food either by voluntary offerings (2 Sam. xvii. 28, 29), by forced exactions (1 Sam. xxv. 13), or by the natural resources of the country (1 Sam. xiv. 27). On one occasion only do we hear of any systematic arrangement for provisioning the host (Judg. xx. 10). It is doubtful whether the soldier ever received pay even under the kings (the only instance of pay being mentioned applies to mercenaries, 2 Chr. xxv. 6); but that he was maintained, while on active service, and provided with arms, appears from 1 K. iv. 27, x. 16, 17; 2 Chr. xxvi. 14. Notices occur of an arsenal or armory, in which the weapons were stored (1 K. xiv. 28; Neh. iii. 19; Cant. iv. 4).

The numerical strength of the Jewish army cannot be ascertained with any degree of accuracy. The numbers, as given in the text, are manifestly incorrect, and the discrepancies in the various statements irreconcilable. At the Exodus the number of the warriors was 600,000 (Ex. xii. 37), or 603,350 (Ex. xxxviii. 26; Num. i. 46); at the entrance into Canaan, 601,730 (Num. xxvi. 51). In David's time the army amounted, according to one statement (2 Sam. xxiv. 9), to 1,300,000, namely, 800,000 for Israel and 500,000 for Judah; but according to another statement (1 Chr. xxi. 5, 6) to 1,470,000, namely, 1,000,000 for Israel and 470,000 for Judah. The militia at the same period amounted to $24{,}000 \times 12 = 288{,}000$ (1 Chr. xxvii. 1 ff.). At a later period the army of Judah under Abijah is stated at 400,000, and that of Israel under Jeroboam at 300,000 (2 Chr. xiii. 3). Still later, Asa's army, derived from the tribes of Judah and Benjamin alone, is put at 580,000 (2 Chr. xiv 8), and Jehoshaphat's at 1,160,000 (2 Chr. xvii. 14 ff.).

Little need be said on this subject with regard to the period that succeeded the return from the Babylonish captivity until the organization of military affairs in Judæa under the Romans. The system adopted by Judas Maccabæus was in strict conformity with the Mosaic law (1 Macc. iii. 55); and though he maintained a standing army, varying from 3000 to 6000 men (1 Macc. iv. 6; 2 Macc. viii. 16), yet the custom of paying the soldiers appears to have been still unknown, and to have originated with Simon (1 Macc. xiv. 32). The introduction of mercenaries commenced with John Hyrcanus, who, according to Josephus (*Ant.* xiii 8, § 4), rifled the tombs of the kings in order to pay them. The intestine commotions that prevailed in the reign of Alexander Jannæus obliged him to increase the number to 6200 men (Joseph. *Ant.* xiii. 13, § 5, 14, § 1); and the same policy was followed by Alexandra (*Ant.* xiii. 16, § 2) and by Herod the Great, who had in his pay Thracian, German, and Gallic troops (*Ant.* xvii. 8, § 3). The discipline and arrangement of the army was gradually assimilated to that of the Romans, and the

Digitized by Google

titles of the officers borrowed from it (Joseph. *B. J.* ii. 20, § 7).

II. ROMAN ARMY. — The Roman army was divided into legions, the number of which varied considerably, each under six *tribuni* (χιλίαρχος, "chief captain," Acts xxi. 31), who commanded by turns. The legion was subdivided into ten cohorts (σπεῖρα, "band," Acts x. 1), the cohort into three maniples, and the maniple into two centuries, containing originally 100 men, as the name implies, but subsequently from 50 to 100 men, according to the strength of the legion. There were thus 60 centuries in a legion, each under the command of a centurion (ἑκατοντάρχης, Acts x. 1, 22; ἑκατόνταρχος, Matt. viii. 5, xxvii. 54). In addition to the legionary cohorts, independent cohorts of volunteers served under the Roman standards; and Biscoe (*History of Acts*, p. 220) supposes that all the Roman forces stationed in Judæa were of this class. Josephus speaks of five cohorts as stationed at Cæsarea at the time of Herod Agrippa's death (*Ant.* xix. 9, § 2), and frequently mentions that the inhabitants of Cæsarea and Sebaste served in the ranks (*Ant.* xx. 8, § 7). One of these cohorts was named the Italian (Acts x. 1), not as being a portion of the *Italica legio* (for this was not embodied until Nero's reign), but as consisting of volunteers from Italy ("Cohors militum voluntaria, quæ est in Syria," Gruter, *Inscr.* i. 434). This cohort probably acted as the body-guard of the procurator. The cohort named "Augustus's" (σπεῖρα Σεβαστή, Acts xxvii. 1) may have consisted of the volunteers from Sebaste (*B. J.* ii. 12, § 5; Biscoe, p. 223). Winer, however, thinks that it was a *cohors Augusta*, similar to the *legio Augusta* (*Realw.* s. v. *Römer*). The head-quarters of the Roman forces in Judæa were at Cæsarea. A single cohort was probably stationed at Jerusalem as the ordinary guard. At the time of the great feasts, however, and on other public occasions, a larger force was sent up, for the sake of preserving order (*B. J.* ii. 12, § 1, 15, § 3). Frequent disturbances arose in reference to the images and other emblems carried by the Roman troops among their military ensigns, which the Jews regarded as idolatrous: deference was paid to their prejudices by a removal of the objects from Jerusalem (*Ant.* xviii. 3, § 1, 5, § 3). The ordinary guard consisted of four soldiers (τετράδιον, "quaternion"), of which there were four, corresponding to the four watches of the night, who relieved each other every three hours (Acts xii. 4; cf. John xix. 23; Polyb. vi. 33, § 7). When in charge of a prisoner, two watched outside the door of the cell, while the other two were inside (Acts xii. 6). The officer mentioned in Acts xxviii. 16 (στρατοπεδάρχης, "captain of the guard") was perhaps the *præfectus prætorio*, or commander of the Prætorian troops, to whose care prisoners from the provinces were usually consigned (Plin. *Ep.* x. 65). The δεξιόλαβοι (*lancearii*, Vulg.; "spearmen," A. V.), noticed in Acts xxiii. 23, appear to have been light-armed, irregular troops. The origin of the name is, however, quite uncertain (Alford, *Comm. in l. c.*). W. L. B.

ARNA (*Arna*), one of the forefathers of Ezra (2 Esdr. i. 2), occupying the place of Zerahiah or Zaraias in his genealogy.

ARNAN (אַרְנָן [*active*]: Ὀρνά; [Comp. Ἀρνών:] *Arnan*). In the received Hebrew text "the sons of Arnan" are mentioned in the genealogy of Zerubbabel (1 Chr. iii. 21). But according to the reading of the LXX., Vulgate, and Syriac versions, which Houbigant adopts, Arnan was the son of Rephaiah. W. A. W.

ARNON (אַרְנוֹן: derivable, according to Ges., *Thes.* p. 153, from roots signifying "swift" or "noisy," either suiting the character of the stream: Ἀρνών: *Arnon*), the river (נַחַל, accurately "torrent") which formed the boundary between Moab and the Amorites, on the north of Moab (Num. xxi. 13, 14, 24, 26: Judg. xi. 22), and afterwards between Moab and Israel (Reuben) (Deut. ii. 24, 36, iii. 8, 12, 16, iv. 48; Josh. xii. 1, 2, xiii. 9, 16; Judg. xi. 13, 26). From Judg. xi. 18, it would seem to have been also the *east* border of Moab.[a] See also 2 K. x. 33; Jer. xlviii. 20. In many of the above passages it occurs in the formula for the site of Aroer, "which is by the brink of the river Arnon." In Numbers it is simply "Arnon," but in Deut. and Joshua generally "the river A." (A. V. sometimes "river of A."). Isaiah (xvi. 2) mentions its fords; and in Judg. xi. 26 a word of rare occurrence (יָד, hand, comp. Num. xiii. 29) is used for the *sides* of the stream. The "high places of A." (בָּמוֹת, a word which generally refers to worship) are mentioned in Num. xxi. 28. By Josephus (*Ant.* iv. 5, § 1) it is described as rising in the mountains of Arabia and flowing through all the wilderness (ἐρῆμος) till it falls into the Dead Sea. In the time of Jerome it was still known as Arnon; but in the Samarito-Arabic version of the Pentateuch by Abû Said (10th to 12th cent.) it is given as *el-Mojeb*. There can be no doubt that the *Wady el-Mojeb* of the present day is the Arnon. It has been visited and described by Burckhardt (pp. 372–375); Irby (p. 142); and Seetzen (*Reise*, 1854, ii. 347; and in Ritter, *Syria*, p. 1195). The ravine through which it flows is still the "locum vallis in prærupta demersæ satis horribilem et periculosum" which it was in the days of Jerome (*Onom.*). The Roman road from *Rabba* to *Dhibân* crosses it at about two hours' distance from the former. On the south edge of the ravine are some ruins called *Mehatet el-Haj*, and on the north edge, directly opposite, those still bearing the name of *'Arâ'ir* [AROER]. The width across between these two spots seemed to Burckhardt to be about two miles, — the descent on the south side to the water occupied Irby 1½ hours, — "extremely steep" (Jerome, *per abrupta descendens*), and almost impassable "with rocks and stones." On each face of the ravine traces of the paved Roman road are still found, with mile-stones; and one arch of a bridge, 31 feet 6 inches in span, is standing. The stream runs through a level strip of grass some 40 yards in width, with a few oleanders and willows on the margin. This was in June and July, but the water must often be much more swollen, many water-worn rocks lying far above its then level.

Where it bursts into the Dead Sea this stream is 82 ft. wide and 4 ft. deep, flowing through a chasm with perpendicular sides of red, brown, and yellow sandstone, 97 ft. wide (romantische Felsen-

[a] This appears to have been the branch called the *Seil es-Sideh*, which flows N. W. from *Kaiaat el-Katrane*, joining the *Wady Mojeb*, two or three miles east from *'Arâ'ir*.

Digitized by Google

thor: Seetzen). It then runs through the delta in S. W. course, narrowing as it goes, and is 10 ft. deep where its waters meet those of the Dead Sea. (Lynch, *Report*, May 3, 1847, p. 20.)

According to the information given to Burckhardt, its principal source is near *Katrane*, on the Haj route. Hence, under the name of *Seil es-Saideh*, it flows N. W. to its junction with the *W. Lejûm*, one hour E. of *'Arâ'ir*, and then, as *W. Mojeb*, more directly W. to the Dead Sea. The *W. Mojeb* receives on the north the streams of the *W. Wale*, and on the south those of *W. Shekik* and *W. Saliheh* (S).

At its junction with the *Lejûm* is a piece of pasture ground, in the midst of which stands a hill with ruins on it (Burck. p. 374). May not these ruins be the site of the mysterious "city that is in the midst of the river" (Josh. xiii. 9, 16; Deut. ii. 36), so often coupled with Aroer? From the above description of the ravine it is plain that that city cannot have been situated immediately below Aroer, as has been conjectured. G.

A'ROD (אֲרוֹד [*descendant*, Fürst]: [Αροαδί; Vat.[1] Αροδει, 2. m. Αροαδει; Comp. Αροάδ:] *Arod*), a son of Gad (Num. xxvi. 17), called Arodi (אֲרוֹדִי) in Gen. xlvi. 16. His family are called THE ARODITES (Num. xxvi. 17).

AR'ODI (אֲרֹדִי: Αροηδείς; Alex. Αροηδις: *Arodi*). AROD the son of Gad (Gen. xlvi. 16).

A'RODITES, THE (הָאֲרֹדִי: ὁ Αροαδί [Vat. -δει]: *Aroditæ*). Descendants of Arod the son of Gad (Num. xxvi. 17). W. A. W.

AR'OER (עֲרֹעֵר, occasionally עֲרוֹעֵר, = *ruins*, places of which the foundations are laid bare, Gesenius:[a] Αροήρ: *Aroer*), the name of several towns of Eastern and Western Palestine.

1. [In Josh. xii. 2, Rom. and Vat. M. Αρῶν; in Jer. xlviii. 19, Rom. Αρήρ.] A city "by the brink," or "on the bank of" (both the same expression — "on the lip") or "by" the torrent Arnon, the southern point of the territory of Sihon king of the Amorites,[b] and afterwards of the tribe of Reuben (Deut. ii. 36, iii. 12, iv. 48; Josh. xii. 2, xiii. 9, 16; Judg. xi. 26;[c] 2 K. x. 33; 1 Chr. v. 8), but later again in possession of Moab (Jer. xlviii. 19). It is described in the Onomasticon (*Aroer*) as "*usque hodie in vertice montis*," "*super ripam* (χείλος) *torrentis Arnon*," an account agreeing exactly with that of the only traveller of modern times who has noticed the site, namely, Burckhardt, who found ruins with the name *'Arâ'ir* on the old Roman road, upon the very edge of the precipitous north bank of the *Wady Mojeb*. [ARNON.] Like all the topography east of the Jordan, this site requires further examination. Aroer is often mentioned in connection with the city that is "in," or "in the midst of," "the river." The nature of the cleft through which the Arnon flows is such that it is impossible there can have been any town in such a position immediately near Aroer; but a suggestion has been made above [ARNON], which on investigation of the spot may clear up this point

2. [In Josh. xiii. 25, Rom. and Vat. M. Ἀρ αβα.] Aroer "that is facing" (עַל־פְּנֵי) Rabbah" (Rabbah of Ammon), a town "built" by and belonging to Gad (Num. xxxii. 34; Josh. xiii. 25; 2 Sam. xxiv. 5). This is probably the place mentioned in Judg. xi. 33, which was shown in Jerome's time (*Onom. Aruir*) "in monte, vigesimo ab Ælia lapide ad septentrionem." Ritter (*Syria*, p. 1130) suggests an identification with *Ayra*, found by Burckhardt 2½ hours S. W. of *es-Salt*. There is considerable difference however in the radical letters of the two words, the second Ain not being present.

3. Aroer, in Is. xvii. 2, if a place at all,[d] must be still further north than either of the two already named, and dependent on Damascus. Gesenius, however, takes it to be Aroer of Gad, and the "forsaken" state of its cities to be the result of the deportation of Galilee and Gilead by Tiglath-Pileser (2 K. xv. 29). See Ges. *Jesaia*, p. 556.

4. A town in Judah, named only in 1 Sam. xxx. 28. Robinson (ii. 199) believes that he has identified its site in *Wady 'Ar'ârah*, on the road from Petra to Gaza, about 11 miles W. S. W. of *Bir es-Seba*, a position which agrees very fairly with the slight indications of the text. G.

AR'OERITE [עֲרֹעֵרִי: Αραρί, Vat. Alex. -ρει: *Ararites*]. Hothan the Aroerite was the father of two of David's chief captains (1 Chr. xi. 44).

A'ROM (Αρόμ; [Ald. Αράμ:] *Asonus*). The "sons of Arom," to the number of 32, are enumerated in 1 Esdr. v. 16 among those who returned with Zorobabel. Unless it is a mistake for Asom, and represents Hashum in Ezr. ii. 19, it has no parallel in the lists of Ezra and Nehemiah. W. A. W.

AR'PAD (אַרְפָּד [*support*, = a strong city]: Αρφάδ; [Αρφάθ, Alex. Αρφατ, etc.:] *Arphad*), a city or district in Syria, apparently dependent on Damascus (Jer. xlix. 23). It is invariably named with Hamath (now *Hamah*, on the Orontes), but no trace of its existence has yet been discovered, nor has any mention of the place been found out of the Bible (2 K. xviii. 34, xix. 13; Is. x. 9, xxxvi. 19, xxxvii. 13. In the two last passages it is rendered in the A. V. Arphad). Arpad has been identified, but without any ground beyond the similarity in the names, with Arvad, the island on the coast of Phœnicia (Winer). G

AR'PHAD. [ARPAD.]

ARPHAX'AD (אַרְפַּכְשַׁד: Αρφαξάδ; Jos. Αρφαξάδης: *Arphaxad*), the son of Shem and the ancestor of Eber (Gen. x. 22, 24, xi. 10), and said to be of the Chaldæans (Joseph. i. 6, 4). Bochart (*Phaleg*, ii. 4) supposed that the name was pre-

[a] May it not with equal probability be derived from עֲרַעַר, *juniper*, the modern Arabic *'Ar'ar* (see Rob. ii. 124, note)? Comp. Luz, Rimmon, Tappuach, and other places deriving their names from trees.

[b] From the omission of the name in the remarkable fragment, Num. xxi. 27–30, where the principal places taken by the Amorites from Moab are named, Aroer would appear not to be one of the very oldest cities. Possibly it was built by the Amorites after their conquest, to guard the important boundary of the Arnon.

[c] In this place the letters of the name are transposed, עֲרַעוֹר.

[d] The LXX. have καταλελειμμένη εἰς τὸν αἰῶνα, apparently reading עֲדֵי עַד for עָרֵי עֲרֹעֵר; nor do any of the ancient versions agree with the Hebrew text.

Digitized by Google

served in that of the province Arrapachitis ('Αρραχῖτις, Ptol. vi. 1, § 2; Ἀρράπα) in northern Assyria (comp. Ewald, *Gesch. des Volkes Isr.*, i. 378). Different interpretations of the name have been given; but that of Ewald (*l. c.*) appears to be the best, who supposes it to mean *the stronghold of the Chaldees* (Arab. *araph*, to bind, and *Kard*, *Kurd*, pl. *Akrad*, Chald. Comp. Niebuhr, *Gesch. Assur's*, p. 414, n.).

2. ARPHAXAD, a king "who reigned over the Medes in Ecbatana, and strengthened the city by vast fortifications" (Jud. i. 1–4). In a war with "Nabuchodonosor, king of Assyria," he was entirely defeated "in the great plain in the borders of Ragau" (? *Rages*, *Raga*, Tobit i. 14, &c.), and afterwards taken prisoner and put to death (Jud. i. 13–15). From the passage in Judith (i. 2, φκοδόμησεν ἐπ' Ἐκβατάνων) he has been frequently identified with Deioces (Artæus, Ctes.), the founder of Ecbatana (Herod. i. 98); but as Deioces died peaceably (Herod. i. 102), it seems better to look for the original of Arphaxad in his son Phraortes (Artynes, Ctes.), who greatly extended the Median empire, and at last fell in a battle with the Assyrians, 633 B. C. (Herod. i. 102, αὐτός τε διεφθάρη . . . καὶ ὁ στρατὸς αὐτοῦ ὁ πολλός). Niebuhr (*Gesch. Assur's*, p. 32) endeavors to identify the name with Astyages = Ashdahak, the common title of the Median dynasty, and refers the events to a war in the twelfth year of Nebuchadnezzar, king of Babylon, B. C. 592 (*ibid.* pp. 212, 285). [JUDITH; NEBUCHADNEZZAR.] B. F. W.

ARROWS. [ARMS.]

AR'SACES VI., a king of Parthia, who assumed the royal title *Arsaces* ('Αρσάκης, Armen. *Arschag*, probably containing the roots both of *Arya* and *Sacæ*) in addition to his proper name, MITHRIDATES I. (Phraates, App. *Syr.* p. 67 from confusion with his successor) according to universal custom (Strab. xv. p. 702), in honor of the founder of the Parthian monarchy (Justin xli. 5, § 5). He made great additions to the empire by successful wars; and when Demetrius Nicator entered his dominions to collect forces or otherwise strengthen his position against the usurper Tryphon, he despatched an officer against him who defeated the great army after a campaign of varied success (Justin, xxxvi. 1), and took the king prisoner, B. C. 138 (1 Macc. xiv. 1–3; Joseph. *Ant.* xiii. 5, § 11; Justin, xxxvi. 1, xxxviii. 9). Mithridates treated his prisoner with respect, and gave him his daughter in marriage (App. *Syr.* pp. 67, 68), but kept him in confinement till his own death, c. B. C. 130. (App. *Syr.* p. 68; Diod. ap. Müller, *Fragm. Hist.* ii. 19.) B. F. W.

AR'SARETH, a region beyond Euphrates, apparently of great extent (2 Esdr. xiii. 45, only). G.

* Volkmar (*Handb. d. Einl. in die Apokr.* ii. 193) supposes the word to represent אֶרֶץ אֲרָת, "Land of Arat" or "Ararat," in northern Armenia. A.

ARTAXER'XES (אַרְתַּחְשַׁשְׂתְּא or אַרְתַּחְשַׁסְתְּא, *Artachshashta* or *Artachshasta*: Ἀρθασασθά; [Vat. Ασαρθα, etc.:] *Artaxerxes*), the name probably of *two* different kings of Persia mentioned in the Old Testament. The word, according to Herod. vi. 98, means ὁ μέγας ἀρήϊος, *the great warrior*, and is compounded of *arta*, great or honored (cf. Ἀρταῖοι, Herod. vii. 61, the old national name of the Persians, also *Arii*, and the Sanscrit *Arya*, which is applied to the followers of the Brahminical law), and *kshatra* or *kshérshé*, a king, grecized into Xerxes. [AHASUERUS.]

1. The first Artaxerxes is mentioned in Ezr. iv. 7, as induced by "the adversaries of Judah and Benjamin" to obstruct the rebuilding of the temple, and appears identical with Smerdis, the Magian impostor, and pretended brother of Cambyses. For there is no doubt that the Ahasuerus of Ezr. iv. 6 is Cambyses, and that the Darius of iv. 24 is Darius Hystaspis, so that the intermediate king must be the Pseudo-Smerdis who usurped the throne B. C. 522, and reigned eight months (Herod. iii. 61, 67 ff.). We need not wonder at this variation in his name. Artaxerxes may have been adopted or conferred on him as a title, and we find the true Smerdis called Tanyoxares (the younger Oxares) by Xenophon (*Cyrop.* viii. 7) and Ctesias (*Pers. fr.* 8–13), and Oropastes by Justin (*Hist.* i. 9). Oxares appears to be the same name as Xerxes, of which Artaxerxes is a compound.

2. In Neh. ii. 1, we have another Artaxerxes, who permits Nehemiah to spend twelve years at Jerusalem, in order to settle the affairs of the colony there, which had fallen into great confusion. We may safely identify him with Artaxerxes Macrocheir or Longimanus, the son of Xerxes, who reigned B. C. 464–425. And we believe that this is the same king who had previously allowed Ezra to go to Jerusalem for a similar purpose (Ezr. vii. 1). There are indeed some who maintain that as Darius Hystaspis is the king in the sixth chapter of Ezra, the king mentioned next after him, at the beginning of the seventh, must be Xerxes, and thus they distinguish *three* Persian kings called Artaxerxes in the Old Testament, (1) Smerdis in Ezr. iv., (2) Xerxes in Ezr. vii., and (3) Artaxerxes Macrocheir in Nehemiah. But it is almost demonstrable that Xerxes is the Ahasuerus of the book of Esther [AHASUERUS], and it is hard to suppose that in addition to his ordinary name he would have been called both Ahasuerus and Artaxerxes in the O. T. It seems, too, very probable that the policy of Neh. ii. was a continuation and renewal of that of Ezr. vii., and that the same king was the author of both. Now it is not possible for Xerxes to be the Artaxerxes of Nehemiah, as Josephus asserts (*Ant.* xi. 5, § 6), for Xerxes only reigned 21 years, whereas Nehemiah (xiii. 6) speaks of the 32d year of Artaxerxes. Nor is it necessary to believe that the Artaxerxes of Ezr. vii. is necessarily the immediate successor of the Darius of Ezr. vi. The book of Ezra is not a continuous history. It is evident from the first words of ch. vii. that there is a pause at the end of ch. vi. Indeed, as ch. vi. concludes in the 6th year of Darius, and ch. vii. begins with the 7th year of Artaxerxes, we cannot even believe the latter king to be Xerxes, without assuming an interval of 36 years (B. C. 515–479) between the chapters, and it is not more difficult to imagine one of 58, which will carry us to B. C. 457, the 7th year of Artaxerxes Macrocheir. We conclude therefore that this is the king of Persia under whom both Ezra and Nehemiah carried on their work; that in B. C. 457 he sent Ezra to Jerusalem; that after 13 years it became evident that a civil as well as an ecclesiastical head was required for the new settlement, and therefore that in 444 he allowed Nehemiah to go up in the

Digitized by Google

after capacity. From the testimony of profane historians this king appears remarkable among Persian monarchs for wisdom and right feeling, and with this character his conduct to the Jews coincides (Diod. xi. 71).

It remains to say a word in refutation of the view that the Artaxerxes of Nehemiah was Artaxerxes Mnemon, elder brother of Cyrus the Younger, who reigned B. C. 404–359. As Ezra and Nehemiah were contemporaries (Neh. viii. 9), this theory transfers the whole history contained in Ezra vii. *ad fin.* and Nehemiah to this date, and it is hard to believe that in this critical period of Jewish annals there are no events recorded between the reigns of Darius Hystaspis (Ezr. vi.) and Artaxerxes Mnemon. Besides, Eliashib, who was high-priest when Nehemiah reached Jerusalem (Neh. iii. 1), *i. e.* on this last supposition, B. C. 397, was grandson of Jeshua (Neh. xii. 10), high-priest in the time of Zerubbabel, B. C. 530. We cannot think that the grandfather and grandson were separated by an interval of 139 years. G. E. L. C.

ARTEMAS (Ἀρτεμᾶς, *i. e.* Ἀρτεμίδωρος), a companion of St. Paul (Tit. iii. 12). According to tradition he was bishop of Lystra.

* Paul was about to send Artemas to Crete at the time of his writing to Titus in that island, and hence Artemas must have been then with the apostle at Nicopolis or on the way thither (Tit. iii. 12). The name, which signifies "gift of Artemis," was a common one among the Greeks. (See Pape's *Griech. Eigennamen*, p. 77.) H.

* **ARTEMIS** (Ἄρτεμις, Acts xix. 24). [DIANA.]

* **ARTILLERY** (no longer applied, as in the older English, to the smaller missive weapons) is the translation of כֵּלָיו in 1 Sam. xx. 40, i. e. *his arms*, namely, the bow and arrows with which Jonathan had been shooting, at the time of his memorable interview with David at the stone EZEL. The A. V. has "his instruments" in the margin, which is the rendering of the Bishops' Bible. H.

ARUBOTH (Arubboth, אֲרֻבּוֹת: Ἀραβώθ: *Aruboth*), the third of Solomon's commissariat districts (1 K. iv. 10). It included Sochoh, and was therefore probably a name for the rich corn-growing country of the *Shefelah*. In any case, the significance of the word is entirely lost at present. Josephus omits all mention of it. G.

ARUMAH (אֲרוּמָה [*height*]: Ἀρημά, Vat. [*not* Vat., *but* Comp. Ald. Alex.] Ἀρμά: in *Ruma*), a place apparently in the neighborhood of Shechem, at which Abimelech resided (Judg. ix. 41). It is conjectured that the word in verse 31, בְּתָרְמָה, rendered "privily," and in the margin "at Tormah," should be read "at Arumah" by changing the ת to an א, but for this there is no support beyond the apparent probability of the change. Arumah is possibly the same place as Ruma, under which name it is given by Eusebius and Jerome in the *Onomasticon*. According to them it was then called Arimathæa (see also ARIMA). But this is not consonant with its apparent position in the story. G.

* Raumer (*Palästina*, p. 148, 4te Aufl.) thinks Arumah was probably *el-'Armah*, of the ruins of which Van de Velde speaks (*Mem.* p. 288), a little S. W. of *Nâblus*.

Bunsen (*Bibelwerk* on Judg. ix. 31) and Bertheau (*Richter*, p. 145) make *Tormah*, referred to above, a proper name = Arumah. Keil and Delitzsch (on *Judges*, p. 368, English trans.) are undecided. But critics generally, as Gesenius, Dietrich, De Wette, Cassel, Fürst, retain the adverbial sense, *secretly* (ἐν κρυφῇ, in Sept. Cod. Vat.); which is better, both as agreeing with the text, and on exegetical grounds. Zebul, who had command in the city, was friendly to Abimelech; but in order to advance the interest of the latter without betraying himself to the Shechemites, he must confer with him secretly, and for this purpose sent messengers to him (ix. 31) for concerting measures against Gaal, the common enemy. If the term suggests the idea of deceit as well as secrecy, it is none the less appropriate, since acting in this way Zebul was deceiving Gaal as well as intriguing with Abimelech. [TORMAH.] H.

ARVAD (אַרְוָד, from a root signifying "wandering," Ges. p. 1268), a place in Phœnicia, the men of which are named in close connection with those of Zidon as the navigators and defenders of the ship of Tyre in Ez. xxvii. 8, 11. In agreement with this is the mention of "the Arvadite" (הָאַרְוָדִי) in Gen. x. 18, and 1 Chr. i. 16, as a son of Canaan, with Zidon, Hamath, and other northern localities. The LXX. have in each of the above passages Ἀράδιος, and in Josephus (*Ant.* i. 6, § 2) we find Ἀρουδαῖος Ἄραδον τὴν νῆσον ἔσχεν. There is thus no doubt that Arvad is the island of *Ruad* (رواد), which lies off Tortosa (*Tartus*), 2 or 3 miles from the Phœnician coast, (not at, but) some distance above, the mouth of the river Eleutherus, now the *Nahr el-Kebir* (Maund. p. 403; Burckh. p. 161), and at the northern extremity of the great bay which stretches above Tripoli (Kiepert's Map, 1856). The island is high and rocky, but very small, hardly a mile in circumference (see Maund. p. 399; "800 yards in extreme length," Allen, ii. 178). According to Strabo (xvi. 2, § 13) Arvad was founded by fugitives from Sidon, and he testifies to its prosperity, its likeness to Tyre, and especially to the well known nautical skill of the inhabitants.[a] (See the notices by Strabo, Pliny, and others in Gesenius, p. 1269, and Winer, *Arvaditen*.) Opposite Arvad, on the mainland, was the city Antaradus, by which name the Targum Jerus. renders the name Arvad in Gen. x. 18. [ARADUS. A plan of the island will be found in Allen's *Dead Sea*, end of vol. ii.; also in the Admiralty Charts, p. 2050, "Island of Ruad." G.

* Dean Stanley has a brief notice of this island, "a spot rarely seen, but full of interest in connection both with Phœnicia and with the cedars of Lebanon," in his *Notices of Some Localities*, &c. p. 220 (1863): "Just where Lebanon, with its white line of snow, ends, and melts away in the north into a range of low green hills, Phœnicia and the last remains of Phœnicia also end in the northernmost of the Phœnician cities, *Arvad*, *Aruad*, by the Greeks called *Aradus*, and now *Ruad*." Mr. Thomson, author of *The Land and the Book*, had already visited and described this place in 1845 (see

[a] These nautical propensities remain in full force (See Allen's *Dead Sea*, ii. 182.)

Digitized by Google

Bibl. Sacra, v. 251 ff.). "On the very margin of the sea there are the remains of double Phœnician walls of huge beveled stones, which remind one of the outer foundations of Baalbek. In one part the wall is still 30 or 40 feet high, and was originally 15 or 20 feet thick. It must have been a stronger place than Tyre, for its distance from the shore and depth of channel rendered it impossible for even an Alexander to destroy its insular character. The harbor was on the northeast side, formed by carrying out into the sea two walls of great stones, to move any one of which would puzzle our best modern engineers." Tyre drew important supplies of military and naval strength from this little island. "The inhabitants of Arvad were thy mariners: the men of Arvad with thine army were upon thy walls round about" (Ez. xxvii. 8, 11). Many Greek inscriptions are found "graven on columns of hard black basalt." Mr. Thomson copied some of them, which are inserted in the *Bibl. Sacra* as above. H.

ARVADITE, THE (הָאַרְוָדִי: ὁ Ἀραδιος: *Aradius*). One of the families of Canaan (Gen. x. 18; 1 Chr. i. 16). [ARVAD.] Probably the inhabitants of the little island Aradus, or Ruad, opposite Antaradus on the N. coast of Phœnicia. W. A. W.

ARZA (אַרְצָא [*earth*]: Ὠσά; Alex. Αρσα; [Comp. Ὡρσᾶ:] *Arsa*). Prefect of the palace at Tirzah to Elah king of Israel, who was assassinated at a banquet in his house by Zimri (1 K. xvi. 9). In the Targum of Jonathan the word is taken as the name of an idol, and in the Arabic version in the London Polyglot the last clause is rendered "which belongs to the idol of Beth-Arza." W. A. W.

ASA (אָסָא, *curing, physician*: Ἀσά; Jos. Ἄσανος: *Asa*). 1. Son of Abijah, and third king of Judah, was conspicuous for his earnestness in supporting the worship of God and rooting out idolatry, with its attendant immoralities: and for the vigor and wisdom with which he provided for the prosperity of his kingdom. In his zeal against heathenism he did not spare his grandmother, Maachah, who occupied the special dignity of "King's Mother," to which great importance was attached in the Jewish court, as afterwards in Persia, and to which parallels have been found in modern Eastern countries, as in the position of the Sultana Valide in Turkey (see 1 K. ii. 19; 2 K. xxiv. 12; Jer. xxix. 2; also Calmet, *Fragm.* xvi.; and Bruce's *Travels*, vol. ii. p. 537, and iv. 244). She had set up some impure worship in a grove (the word translated *idol*, 1 K. xv. 13, is in Hebrew *horror*, while in the Vulgate we read, *ne esset* (*Maacha*) *princeps in sacris Priapi*); but Asa burnt the symbol of her religion, and threw its ashes into the brook Kidron, as Moses had done to the golden calf (Ex. xxxii. 20), and then deposed Maachah from her dignity. He also placed in the temple certain gifts which his father had dedicated, probably in the earlier and better period of his reign [ABIJAH], and which the heathen priests must have used for their own worship, and renewed the great altar which they apparently had desecrated (2 Chr. xv. 8). Besides this, he fortified cities on his frontiers, and raised an army, amounting, according to 2 Chr. xiv. 8, to 580,000 men, but the uncertainty attaching to the numbers in our present text of Chronicles has been pointed out by Kennicott [ABIJAH], and by Davidson (*Introduction to the O. T.*, p. 686), who considers that the copyists were led into error by the different modes of marking them, and by confounding the different letters which denoted them, bearing as they do a great resemblance to each other. Thus Asa's reign marks the return of Judah to a consciousness of the high destiny to which God had called her, and to the belief that the Divine Power was truly at work within her. The good effects of this were visible in the enthusiastic resistance offered by the people to Zerah, an invader, who is called a Cushite or Ethiopian, and whom several authors, as Ewald (*Gesch. des V. I.*, iii. 470), identify with Osorkon I., the second king of the 22d dynasty of Egypt, inheritor therefore of the quarrel of his father Shishak, to whom Asa had probably refused to pay tribute. [ZERAH.] At the head of an enormous host (a million of men, we read in 2 Chr. xiv. 9) he attacked Mareshah or Marissa in the S. W. of the country, near the later Eleutheropolis (Robinson, *B. R.*, ii. 67), a town afterwards taken by Judas Maccabæus (1 Macc. v. 65), and finally destroyed by the Parthians in their war against Herod (Joseph. *Ant.* xiv. 13, § 9). There he was utterly defeated, and driven back with immense loss to Gerar. As Asa returned laden with spoil, he was commended and encouraged by a prophet, and on his arrival at Jerusalem convoked an assembly of his own people and of many who had come to him from Israel, and with solemn sacrifices and ceremonies renewed the covenant by which the nation was dedicated to God. The peace which followed this victory was broken by the attempt of Baasha of Israel to fortify Ramah as a kind of Deceleia, "that he might not suffer any to go out or to come in unto Asa king of Judah." To stop this he purchased the help of Benhadad I., king of Damascus, by a large payment of treasure left in the temple and palace from the Egyptian tribute in Rehoboam's time, and thus he forced Baasha to abandon his purpose, and destroyed the works which he had begun at Ramah, using the materials to fortify two towns in Benjamin, Geba (*the hill*), and Mizpeh (*the watch-tower*), as checks to any future invasion. The wells which he sunk at Mizpeh were famous in Jeremiah's time (xli. 9). The means by which he obtained this success were censured by the prophet Hanani, who seems even to have excited some discontent in Jerusalem, in consequence of which he was imprisoned, and some other punishments inflicted (2 Chr. xvi. 9). The prophet threatened Asa with war, which appears to have been fulfilled by the continuance for some time of that with Baasha, as we infer from an allusion, in 2 Chr. xvii. 2, to the cities of Ephraim which he took, and which can hardly refer to any events prior to the destruction of Ramah.

In his old age Asa suffered from the gout, and it is mentioned that "he sought not to the Lord but to the physicians." If any blame be intended, we must suppose that he acted in an arrogant and independent spirit, and without seeking God's blessing on their remedies. He died greatly loved and honored in the 41st year of his reign. There are difficulties connected with its chronology, arising perhaps from the reasons already mentioned as to the numbers in Chronicles. For instance, in 2 Chr. xvi. 1, we read that Baasha fortified Ramah in the 36th year of Asa's reign. In 1 K. xv. 33, Baasha is said to have died in the 26th. If the former number be genuine, it is supposed by the

Digitized by Google

note in the margin of the English Bible, by Clinton, and with some little hesitation by Ewald, that the chronicler is referring to the years not of Asa's reign, but of the separate kingdom of Judah, which would coincide with the 16th of Asa and the 13th of Baasha, and leave 11 years for the statement of 1 K. xv. 16, and for the fulfillment of Hanani's threat. According to Clinton (*F. H.*, i. 321) the date of Asa's accession was B. C. 956. In his 15th year (B. C. 942) was the great festival after the defeat of Zerah. In B. C. 941 was the league with Benhadad, and in B. C. 916 Asa died. The statement in 2 Chr. xv. 19 must be explained of the 35th year of the kingdom of Judah, if we adopt that view of the date in xvi. 1. Clinton, with an inconsistency very unusual in him, does adopt it in the latter place, but imagines a fresh war with Ethiopia in B. C. 922 to account for the former. G. E. L. C.

* In Matt. i. 7, 8, Lachm., Tisch. (8th ed.), and Tregelles read 'Ασάφ for 'Ασά. A.

2. ('Οσσά; Alex. [Comp. Ald.] 'Ασά.) Ancestor of Berechiah, a Levite who resided in one of the villages of the Netophathites after the return from Babylon (1 Chr. ix. 16). W. A. W.

ASADI'AS ('Ασαδίας; Alex. Ζαδαιας: *Sedeus*). Son of Chelcias, or Hilkiah, and one of the ancestors of Baruch (Bar. i. 1). The name is probably the same as that elsewhere represented by HASADIAH (1 Chr. iii. 20). W. A. W.

AS'AEL ('Ασαήλ; Vulg. omits), of the tribe of Naphtali, and forefather of Tobit (Tob. i. 1). [JAHZEEL?]

AS'AHEL (עֲשָׂהאֵל, *made by God:* 'Ασαήλ: *Asael* [*Asahel*]). 1. Nephew of David, being the youngest son of his sister Zeruiah. He was celebrated for his swiftness of foot, a gift much valued in ancient times, as we see by the instances of Achilles, Antilochus (Hom. *Il.* xv. 570), Papirius Cursor (Liv. ix. 16), and others. When fighting under the command of his brother Joab against Ishbosheth's army at Gibeon, he pursued Abner, who, after vainly warning him to desist, was obliged to kill him in self-defense, though with great reluctance, probably on account of his extreme youth (2 Sam. ii. 18 ff. [iii. 27, 30, xxiii. 24; 1 Chr. xi. 26, xxvii. 7.]). [ABNER.] G. E. L. C.

2. ('Ασαήλ; Alex. Ιασιηλ, [Vat. Ιασειηλ: *Asaël*].) One of the Levites in the reign of Jehoshaphat, who went throughout the cities of Judah to instruct the people in the knowledge of the Law, at the time of the revival of the true worship (2 Chr. xvii. 8).

3. ['Ασαήλ: *Asaël.*] A Levite in the reign of Hezekiah, who had charge of the tithes and dedicated things in the Temple under Cononiah and Shimei (2 Chr. xxxi. 13).

4. (['Ασαήλ; Vat. Ασηλ:] *Azahel.*) A priest, father of Jonathan in the time of Ezra (Ezr. x. 15). He is called AZAEL in 1 Esdr. ix. 14. W. A. W.

ASAHI'AH, or ASA'IAH (עֲשָׂיָה [*whom Jehovah made*]: 'Ασαΐας; [Alex. 2 K. xxii. 14, Ιασαΐ:] *Asaïa*), a servant of king Josiah, sent by him, together with others, to seek information of Jehovah respecting the book of the law which Hilkiah found in the temple (2 K. xxii. 12, 14; also called Asaiah, 2 Chr. xxxiv. 20). R. W. B.

ASA'IAH [3 syl.] (עֲשָׂיָה [*Jehovah made*] 'Ασαΐα; [Vat. Ασια; Ald. 'Ασαΐας:] *Asaïa*). 1 A prince of one of the families of the Simeonite in the reign of Hezekiah, who drove out the Hamite shepherds from Gedor (1 Chr. iv. 36).

2. ('Ασαΐας, [Vat. Ασαβα,] Alex. [Comp.] 'Ασαΐα in 1 Chr. vi.; 'Ασαΐα [Vat. Ασαι, Ασαια]; Alex. [Ald.] 'Ασαΐας in 1 Chr. xv.) A Levite in the reign of David, chief of the family of Merari (1 Chr. vi. 30). With 120 of his brethren he took part in the solemn service of bringing the ark from the house of Obed-edom to the city of David (1 Chr. xv. 6, 11).

3. ('Ασαΐα; Alex. Ασα.) The firstborn of "the Shilonite," according to 1 Chr. ix. 5, who with his family dwelt in Jerusalem after the return from Babylon. In Neh. xi. 5 he is called MAASEIAH, and his descent is there traced from Shiloni, which is explained by the Targum of R. Joseph on 1 Chr. as a patronymic from Shelah the son of Judah, by others as "the native or inhabitant of Shiloh."

4. ([Vat. Ισαια:] *Asaas.*) 2 Chr. xxxiv. 20 [ASAHIAH.] W. A. W.

AS'ANA ('Ασσανά; [Ald. Alex. 'Ασανά:] *Asana*), name of a man (1 Esdr. v. 31). [ASNAH.]

A'SAPH (אָסָף [*collector*]: 'Ασάφ: *Asaph*). 1. A Levite, son of Berechiah, one of the leaders of David's choir (1 Chr. vi. 39). Psalms l. and lxxiii. to lxxxiii. are attributed to him, but probably all these, except l., lxxiii., and lxxvii., are of later origin[a] (Vaihinger, *Vers. of Psalms*); and he was in aftertimes celebrated as a seer (חֹזֶה) as well as a musical composer, and was put on a par with David (2 Chr. xxix. 30; Neh. xii. 46). The office appears to have remained hereditary in his family, unless he was the founder of a school of poets and musical composers, who were called after him "the sons of Asaph" (comp. the Homeridæ) (1 Chr. xxv. 1; 2 Chr. xx. 14; Ezr. ii. 41).

2. (Ζαφίτ [Vat. Ζαφαν] in 2 K., 'Ασάφ in Is.; Alex. [Comp.] 'Ασάφ in 2 K. xviii. 37.) The father or ancestor of Joah, who was recorder or chronicler to the kingdom of Judah in the reign of Hezekiah (2 K. xviii. 18, 37; Is. xxxvi. 3, 22). It is not improbable that this Asaph is the same as the preceding, and that Joah was one of his numerous descendants known as the Bene-Asaph.

3. ('Ασάφ.) The keeper of the royal forest or "paradise" of Artaxerxes (Neh. ii. 8). His name would seem to indicate that he was a Jew, who, like Nehemiah, was at high office at the court of Persia.

4. ('Ασάφ [Vat. Ασαβ in Neh.].) Ancestor of Mattaniah, the conductor of the temple-choir after the return from Babylon (1 Chr. ix. 15; Neh. xi. 17). Most probably the same as 1 and 2. W. A. W.

* **ASAR'AEL.** [AZARAEL.]

ASA'REEL (אֲשַׂרְאֵל [*whom God bound*

[a] *The contents of the Psalms in question are supposed to require a later author than the Asaph in David's time. But the title which ascribes these Psalms to Asaph is not necessarily incorrect; for the Asaph who wrote them may have been a descendant of the founder of the family, which, as Ezr. ii. 41 shows, existed through many generations. H.

sc. *by a vow*, Gen.]: Ἐσερήλ; [Vat. Ισεραηλ;] Alex. Εσεραηλ; [Comp. Ασαρηλ:] *Asrēl*). A son of Jehaleleel, whose name is abruptly introduced into the genealogies of Judah (1 Chr. iv. 16). W. A. W.

ASARE'LAH (אַשַׂרְאֵלָה: Ἐρασήλ; [Alex. Ισσηλ; Comp. Ασειρηλά; Ald. Ασερηλά:] *Asarela*). One of the sons of Asaph, set apart by David to "prophesy with harps and with psalteries and with cymbals" (1 Chr. xxv. 2); called JESHARELAH in ver. 14. W. A. W.

* **ASBAZ'ARETH.** So A. V. ed. 1611 in 1 Esdr. x. 69 for "Azbazareth," the less correct reading of later editions. See AZBAZARETH. A.

AS'CALON. [ASHKELON.]

ASE'AS (Ασαΐας; [Ald. Ασέας:] *Aseas*), name of a man (1 Esdr. ix. 32). [ISHIJAH.]

ASEBEBI'A (Ασεβηβία: *Sebebius*), a Levite (1 Esdr. viii. 47). [SHEREBIAH.]

ASEBI'A (Ασεβία; [Ald. Ασέβεια:] *Asbia*), 1 Esdr. viii. 48. [HASHABIAH 7.]

AS'ENATH (אָסְנַת: Ἀσενέθ; Alex. Ασενεθ: *Aseneth*), daughter of Potipherah, priest, or possibly prince, of On [POTIPHERAH], wife of Joseph (Gen. xli. 45, and mother of Manasseh and Ephraim (xli. 50, xlvi. 20). Her name has been considered to be necessarily Egyptian (Lepsius, *Chronologie d. Ägypter*, i. 382), and Egyptian etymologies have therefore been proposed. Gesenius (*Thes.* s. v.) suggests ⲁⲥ-ⲛⲉⲓⲑ "she who is of Neith," the Egyptian Minerva; but this word has not been found in the ancient Egyptian or Coptic; and it must be regarded as very doubtful. If we are guided by the custom of the Hebrews, and the only parallel case, that of Bithiah, whose Hebrew name, "daughter," that is, "servant, of Jehovah," implying conversion, must have been given her on her marriage to Merod, at a time probably not long distant from Joseph's rule [BITHIAH], we must suppose that his Egyptian wife received a Hebrew name from Joseph especially if her native name implied devotion to the gods of the country. Such a new name would have been preserved in preference to the other in the O. T. If Hebrew, Asenath may be compared to the male proper name Asnah, אַסְנָה (Ezr. ii. 50), and derived like it from אָסָן or אָסַם, in which case both names would signify *storehouse*; unless both may be cognate with סְנֶה, and mean *bramble*, a sense not repugnant to Semitic usage in proper names. The former derivation is perhaps the more probable, in connection with Joseph's history and the name of Ephraim. R. S. P.

* **ASER** (Ασήρ; FA. Ασσηρ: *Naasson*) occurs in Tob. i. 2 as the name of a city in Galilee near THISBE, which see. HAZOR is probably the place intended. A.

A'SER, Luke ii. 36, Rev. vii. 6. [ASHER.]

ASE'RER (Σερήρ; [Ald. Ασηρήρ:] *Sareei*), name of a man (1 Esdr. v. 32). [SISERA.]

ASH אֹרֶן, *oren*: πίτυς: *pinus*) occurs only in Is. xliv. 14, as one of the trees out of the wood of which idols were carved: "He beweth him down cedars, and taketh the cypress and the oak, which he strengtheneth for himself among the trees of the forest: he planteth an *ash*, and the rain doth nourish it." It is impossible to determine what is the tree denoted by the Hebrew word *oren*; the LXX. and the Vulg. understand some species of pine-tree, and this rendering is supported by many learned commentators, amongst whom may be named Munster, Calvin, and Bochart; and some of the Jewish Rabbis, according to Celsius (*Hierob.* i. 191), believe that the *oren* is identical with the Arabic *sanauber*, a kind of pine,[a] and assert that the *aran* is often coupled with the *arez* and *berosch*,[b] as though all the three trees belonged to the same nature. Luther understands the *cedar* by *oren*.[c] Rosenmüller thinks that the stone-pine (*Pinus pinia*, Linn.) is the tree denoted. Celsius is inclined to think that the *oren* is identical with a tree of Arabia Petræa, of which Abul Fadli makes mention, called *aran*. Of the same opinion are Michaelis (*Supp. ad Lex. Heb.* 129), Dr. Royle (*Cyc. Bib. Lit.* art. *Oren*), and Dr. Lee (*Lex. Heb.* s. v.). This tree is described as growing chiefly in valleys and low districts; it is a thorny tree, bearing grape-like clusters of berries, which are noxious and bitter when green, but become rather sweet when they ripen, and turn black. Gesenius (*Thes.* s. v.) is in favor of some species of pine being the tree intended.

Nothing is known of the tree of which Abul Fadli speaks. Sprengel (*Hist. Rei Herb.* i. 14) thinks the *aran* is the caper-tree (*Capparis spinosa*, Linn.). Dr. Royle says the tree appears to agree in some respects with *Salvadora persica*. Other attempts at identification have been made by Faber in his posthumous MS. notes on Biblical Botany, and Link (Schroeder's *Botan. Journ.* iv. 152), but they are mere conjectures. The A. V. adopted the translation of *ash* in all probability from the similarity of the Hebrew *oren* with the Latin *ornus*; and Dr. Royle states that the *Ornus Europæus* is found in Syria, but thinks it is not a true native.

Until future investigation acquaints us with the nature of the tree denoted by the *aran* of Abul Fadli, it will be far better to adopt the interpretation of the LXX., and understand some kind of pine to be the *oren* of Scripture. *Pinus halipensis* or *P. maritima* may be intended. Celsius (*Hierob.* i. 193) objects to any pine representing the *oren* because he says pines are difficult to transplant and therefore that the pine would ill suit the words of the prophet, "he planteth an *oren*." This, however, is not a valid objection: the *larch*, for instance, is readily transplanted, and grows with great rapidity, but it is not a native of Syria. The Hebrew *oren* is probably derived from the Arabic verb *aran*, "to be agile," "to be slender," or "graceful." W. H.

[a] صنوبر, *pinus*, allis *ejus nuces* (Gol. *L. Arab.*).

Dr. Wilson (*Lands of the Bible*, ii. 392) identifies the common "fir" (*Pinus sylvestris*) with the *berosh* of Scripture, and states that it is "frequently seen in Lebanon, where it is known by the name of *snoear*," but Dr. Hooker says he never heard of *P. sylvestris* in Syria, and thinks *P. halipensis* is meant.

[b] ארז and ברוש, cedar and cypress.

[c] Reading ארז instead of ארן, "quia ארן nun finali minusculo, in multis codicis Ebraei editionibus scribatur, quod כף *Sain* simillimum est" (*Hierob.* i. 191).

A'SHAN (עָשָׁן [*smoke*]· [Ανώχ,] Ασάν, Αἰσάρ; [Alex. Ιεφθα, Ασαν, Αισαν:] *Asan*), a city in the low country of Judah named in Josh. xv. 42 with Libnah and Ether. In Josh. xix. 7, and 1 Chr. iv. 32, it is mentioned again as belonging to Simeon, but in company with Ain and Rimmon, which (see Josh. xv. 31) appear to have been much more to the south. In 1 Chr. vi. 59, it is given as a priests' city, occupying the same place as the somewhat similar word Ain (עַיִן) does in the list of Josh. xxi. 16.

In 1 Sam. xxx. 30, Chor-ashan is named with Horman and other cities of "the South." [The compound name (כּוּר עָשָׁן) means (Ges.) *smoking furnace*, or (Fürst) *smelting furnace*.]

Eusebius and Jerome (*Onom.*) mention a village named Bethasan as 15 miles west of Jerusalem; but this, though agreeing sufficiently with the position of the place in Josh. xv. 42, is not far enough south for the indications of the other passages; and indeed Euseb. and Jer. discriminate Bethasan from "Asan of the tribe of Simeon." It has not yet been identified, unless it be the same as Ain: in which case Robinson found it at *Al Ghuweir*. G.

* The identification of Ain with *Ghuweir*, Dr. Robinson recalls in his *Res.* ii. 204 (ed. 1858). See ANIM. The Ashan of Simeon, situated on the northern limit of Palestine, may be a different one from the Ashan of Judah (Jos. xix. 7; 1 Chron. iv. 32). (Raumer, *Palästina*, p. 178). See CHOR ASHAN. II.

ASHBE'A (אַשְׁבֵּעַ [*Adjure*, Ges.]: Εσβά [Comp. Ασεβά:] *Juramentum*). A proper name but whether of a person or place is uncertain (1 Chr. iv. 21). Houbigant would understand it of the latter, and would render "the house of Ashbea" by Beth-ashbea. The whole clause is obscure. The Targum of R. Joseph (ed. Wilkins) paraphrases it, "and the family of the house of manufacture of the fine linen for the garments of the kings and priests, which was handed down to the house of Eshba." W. A. W.

ASH'BEL (אַשְׁבֵּל: Ασβηλ, Ασυβήρ: *Asbel*), a son of Benjamin (Gen. xlvi. 21; Num. xxvi. 38; 1 Chr. viii. 1). Respecting the sons of Benjamin, see BECHER.

ASH'BELITES, THE (הָאַשְׁבֵּלִי: ὁ Ασυβηρί; [Vat. -ρει; Comp. Ασυβηλί:] *Asbelita*). The descendants of ASHBEL the son of Benjamin (Num. xxvi. 38). W. A. W

ASH'CHENAZ (אַשְׁכְּנַז: Ασχανάζ, οἱ Αχαναζέοι [Vat. Ασχ.]; Alex. Ασχενες, οἱ Ασχαναζεοι [-ζαιοι]: *Ascenez.*) ASHKENAZ (1 Chr. i. 6; Jer. li. 27). W. A. W.

Ashdod.

ASH'DOD, or AZO'TUS (אַשְׁדּוֹד [*strong-hold* or *castle*]: Ἄζωτος, LXX. [commonly] and N. T.), one of the five confederate cities of the Philistines, situated about 30 miles from the southern frontier of Palestine, 3 from the Mediterranean Sea, and nearly midway between Gaza and Joppa. It stood on an elevation overlooking the plain, and the natural advantages of its position were improved by fortifications of great strength. For this reason it was probably selected as one of the seats of the national worship of Dagon (1 Sam. v. 5). It was assigned to the tribe of Judah (Josh. xv. 47), but was never subdued by the Israelites: it appears on the contrary to have been the point for conducting offensive operations against them, so much so, that after Uzziah had succeeded in breaking down the wall of the town, he secured himself against future attacks by establishing forts on the adjacent hills (2 Chr. xxvi. 6): even down to Nehemiah's age it preserved its distinctiveness of race and language (Neh. xiii. 23). But its chief importance arose

Digitized by Google

from its position on the high road from Palestine to Egypt, commanding the entrance to or from the latter country: it was on this account besieged by Tartan, the general of the Assyrian king, Sargon, about B. C. 716, apparently to frustrate the league formed between Hezekiah and Egypt (Is. xx. 1). Its importance as well as strength is testified by the protracted siege which it afterwards sustained under Psammetichus, about B. C. 630 (Herod. ii. 157), the effects of which are incidentally referred to by Jer. (xxv. 20). That it recovered from this blow appears from its being mentioned as an independent power in alliance with the Arabians and others against Jerusalem (Neh. iv. 7). It was destroyed by the Maccabees (1 Macc. v. 68, x. 84), and lay in ruins until the Roman conquest of Judæa, when it was restored by Gabinius, B. C. 55 (Joseph. *Ant.* xiv. 5, § 3; *B. J.* i. 7, § 7), and was one of the towns assigned to Salome after Herod's death (Joseph. *Ant.* xvii. 8, § 1). The only notice of Azotus in the N. T. is in connection with Philip's return from Gaza (Acts viii. 40). It is now an insignificant village, with no memorials of its ancient importance, but is still called *Esdud*.

W. L. B.

* Yet the present site is not wholly destitute of vestiges of its ancient fame. A few discoveries still reward the traveller's search. The high mound which probably formed the acropolis of the old city cannot be mistaken, covered with fragments of pottery, and with remains of cellars or cisterns which excavations recently made (1852) have laid open. Here must have been the citadel which for 29 years baffled the efforts of Psammetichus for its capture, the longest siege (says Herodotus) on record (see Rawlinson *on Herod.* ii. 242). From the top of this hill may be seen the Mediterranean, and here doubtless, stood the fish-god, DAGON (1 Sam. v. 3 ff.), where he could survey the domain over which he was supposed to preside. Two marble columns remain, one prostrate in the court of the neighboring *khan*, and the other wrought into a drinking trough not far from it; and a few fragments of columns and capitals are to be seen built into a *Sakieh* or watering-machine, or into the walls of goat and sheep pens. Some traces of masonry occur near the Jaffa road, which may have belonged to the city walls, so nearly concealed as to be found only with special pains. There is also a large caravanserai on the edge of an adjacent marsh (see wood-cut), now entirely deserted, but once an important station, when the traffic at present transferred to the sea passed this way between Syria and Egypt. H.

ASH'DODITES, THE (הָאַשְׁדּוֹדִים: om. in LXX. [but Comp. and 9 MSS. have Ἀζώτιοι]: *Azotii*). The inhabitants of Ashdod, or Azotus (Neh. iv. 7); called ASHDOTHITES in Josh. xiii. 3

W. A. W.

ASH'DOTH PIS'GAH (אַשְׁדּוֹת הַפִּסְגָּה, from אָשַׁד, "to pour forth;" Ἀσηδὼθ Φασγά, [once τὴν Φασγά:] *radices* [*montis*] *Phasga*, [*Asedoth Phasga*]), a curious and (since it occurs in none of the later books) probably a very ancient term, found only in Deut. iii. 17; Josh. xii. 3, xiii. 20: and in Deut. iv. 49, A. V. "springs of Pisgah." In the two passages from Deuteronomy the words form part of a formula, by which apparently the mountains which enclose the Dead Sea on the east side are defined. Thus in iii. 17, we read, "the Arabah' also (*i. e.* the Jordan valley) and the 'border,' from Cinnereth (Sea of Galilee) unto the sea of the 'Arabah,' the Salt Sea, under Ashdoth hap-Pisgah eastward;" and so also in iv. 49, though here our translators have chosen to vary the formula for English readers. The same intention is evident in the passages quoted from Joshua; and in x. 40, and xii. 8 of the same book, Ashdoth is used alone — "the springs" — to denote one of the main natural divisions of the country. The only other instance of the use of the word is in the highly poetical passage, Num. xxi. 15, "the '*pouring forth*' of the 'torrents,' which extendeth to Sheheth-Ar." This undoubtedly refers also to the east of the Dead Sea.

What the real significance of the term may be, it is impossible in our present ignorance of the country east of the Dead Sea to determine. Doubtless, like the other topographical words of the Bible, it has a precise meaning strictly observed in its use; but whether it be the springs poured forth at the base of the mountains of Moab, or the roots or spurs of those mountains, or the mountains themselves, it is useless at present to conjecture. G.

ASH'DOTHITES, THE (הָאַשְׁדּוֹדִי: ὁ Ἀζώτιος [Vat. -ειος]: *Azotii*). The inhabitants [strictly "inhabitant," but collective] of Ashdod or Azotus (Josh. xiii. 3).

W. A. W.

ASHER, Apocr. [only Tobit i. 2, see ASER] and N. T. **A'SER** (אָשֵׁר: Ἀσήρ [Rom. Ἀσσήρ in Ez. xlviii.]: *Aser*), the 8th son of Jacob, by Zilpah, Leah's handmaid (Gen. xxx. 13). The name is interpreted as meaning "happy," in a passage full of the paronomastic turns which distinguish these very ancient records: "And Leah said, 'In my happiness am I (בְּאָשְׁרִי), for the daughters will call me happy' (אֹשְׁרוּנִי), and she called his name Asher" (אָשֵׁר), *i. e.* "happy." A similar play occurs in the blessing of Moses (Deut. xxxiii. 24). Gad was Zilpah's other and elder son, but the fortunes of the brothers were not at all connected. Of the tribe descended from Asher no action is recorded during the whole course of the sacred history. Its name is found in the various lists of the tribes which occur throughout the earlier books, as Gen. xxxv., xlvi.; Ex. i.; Num. i., ii., xiii., &c., and like the rest Asher sent his chief as one of the spies from Kadesh-barnea (Num. xiii.). During the march through the desert his place was between Dan and Naphtali on the north side of the tabernacle (Num. ii. 27); and after the conquest he took up his allotted position without any special mention.

The limits of the territory assigned to Asher are, like those of all the tribes, and especially of the northern tribes, extremely difficult to trace. This is partly owing to our ignorance of the principle on which these ancient boundaries were drawn and recorded, and partly from the absence of identification of the majority of the places named. The general position of the tribe was on the sea-shore from Carmel northwards, with Manasseh on the south, Zebulun and Issachar on the southeast, and Naphtali on the northeast (Jos. *Ant.* v. 1, § 22). The boundaries and towns are given in Josh. xix. 24–31, xvii. 10, 11, and Judg. i. 31, 32. From a comparison of these passages it seems plain that Dor (*Tantura*) must have been within the limits of the tribe, in which case the southern boundary was

Digitized by Google

probably one of the streams which enter the Mediterranean south of that place — either *Nahr el-Defneh* or *Nahr Zurka*. Following the beach round the promontory of Carmel, the tribe then possessed the maritime portion of the rich plain of Esdraelon, probably for a distance of eight or ten miles from the shore. The boundary would then appear to have run northwards, possibly bending to the east to embrace Ahlab, and reaching Zidon by Kanah (a name still attached to a site six miles inland from *Said*), whence it turned and came down by Tyre to Achzib (Ecdippa, now *es-Zib*).[a]

This territory contained some of the richest soil in all Palestine (Stanley, p. 265; Kenrick, *Phœn.* p. 35), and in its productiveness it well fulfilled the promise involved in the name "Asher," and in the blessings which had been pronounced on him by Jacob and by Moses. Here was the oil in which he was to "dip his foot," the "bread" which was to be "fat," and the "royal dainties" in which he was to indulge;[b] and here in the metallic manufactures of the Phœnicians (Kenrick, p. 38) were the "iron and brass" for his "shoes." The Phœnician settlements were even at that early period in full vigor;[c] and it is not surprising that Asher was soon contented to partake their luxuries, and to "dwell among them" without attempting the conquest and extermination enjoined in regard to all the Canaanites (Judg. i. 31, 32). Accordingly he did not drive out the inhabitants of Accho, nor Dor,[d] nor Zidon, nor Ahlab, nor Achzib, nor Helbah, nor Aphik, nor Rehob (Judg. i. 31), and the natural consequence of this inert acquiescence is immediately visible. While Zebulun and Naphtali "jeoparded their lives unto the death" in the struggle against Sisera, Asher was content to forget the peril of his fellows in the creeks and harbors of his new allies (Judg. v. 17, 18). At the numbering of Israel at Sinai, Asher was more numerous than either Ephraim, Manasseh, or Benjamin (Num. i. 32–41), but in the reign of David so insignificant had the tribe become, that its name is altogether omitted from the list of the chief rulers (1 Chr. xxvii. 16–22); and it is with a kind of astonishment that it is related that "divers of Asher and Manasseh and Zebulun" came to Jerusalem to the Passover of Hezekiah (2 Chr. xxx. 11). With the exception of Simeon, Asher is the only tribe west of the Jordan which furnished no hero or judge to the nation.[e] "One name alone shines out of the general obscurity — the aged widow 'Anna the daughter of Phanuel of the tribe of Aser,' who in the very close of the history departed not from the temple, but 'served God with fastings and prayers night and day'" (Stanley, p. 265). G.

ASH'ER (אָשֵׁר [*fortress*, Fürst: Comp.] Alex. Ἀσήρ: *Aser*). A place which formed one boundary of the tribe of Manasseh on the south (Josh. xvii. 7). It is placed by Eusebius on the road from Shechem to Bethshan or Scythopolis, about 15 miles from the former. Three quarters of an hour from *Túbâs*, the ancient Thebez, is the hamlet of *Teyâsir*, which Mr. Porter suggests may be the Asher of Manasseh (*Handb.* p. 318). In the Vat MS. the LXX. of this passage is entirely corrupt. W. A. W.

ASHE'RAH (אֲשֵׁרָה), the name of a Phœnician goddess, or rather of the idol itself. Our translators, following the rendering of the LXX. (ἄλσος) and of the Vulg. (*lucus*), translate the word by "grove." Almost all modern interpreters however, since Selden (*De Diis Syriis*, p. 343), agree that an idol or image of some kind must be intended, as seems sufficiently proved from such passages as 2 K. xxi. 7, xxiii. 6, in the latter of which we find that Josiah "brought out the Asherah" (or as our version reads "the *grove*") "from the house of the Lord." There can, moreover, be no doubt that Asherah is very closely connected with ASHTORETH and her worship, indeed the two are so placed in connection with each other, and each of them with Baal (*e. g.* Judg. iii. 7, comp. ii. 3; Judg. vi. 25; 1 K. xviii. 19), that many critics have regarded them as identical. There are other passages, however, in which these terms seem to be distinguished from each other, as 2 K. xxiii. 13, 14, 15. Movers (*Phön.* i. 561) first pointed out and established the difference between the two names, though he probably goes too far in considering them as names of distinct deities. The view maintained by Bertheau (*Exeg. Handb., Richt.*, p. 67) appears to be the more correct one, that Ashtoreth is the proper name of the goddess, whilst Asherah is the name of the image or symbol of the goddess. This symbol seems in all cases to have been of wood (see *e. g.* Judg. vi. 25–30; 2 K. xxiii. 14), and the most probable etymology of the term (אָשֵׁר = יָשַׁר, *to be straight, direct*) indicates that it was formed of the straight stem of a tree, whether living or set up for the purpose, and thus points us to the phallic rites with which no doubt the worship of Astarte was connected. [ASHTORETH.] See also EGYPT. F. W. G.

ASH'ERITES, THE (הָאֲשֵׁרִי: ὁ Ἀσήρ; Alex. Ασηρ: Vulg. om.). The descendants of Asher and members of his tribe (Judg. i. 32). W. A. W.

ASHES. The ashes on the altar of burnt-offering were gathered into a cavity in its surface, on a heap called the apple (תַּפּוּחַ), from its round shape (Cramer, *de Ara exteriori*), said to have sometimes amounted to 300 Cors; but this Maimon. and others say is spoken *hyperbolice*. On the days of the three solemn festivals the ashes were not removed, and the accumulation taken away afterwards in the morning, the priests casting lots for the office (*Mishna, Tamid*, i. 2, and ii. 2). The ashes of a red heifer burnt entire, according to regulations prescribed in Num. xix., had the ceremonial efficacy of purifying the unclean (Heb. ix. 13), but of polluting the clean. [SACRIFICE.] Ashes

[a] Achshaph (LXX. Κεάφ or Καιάψα) must be *Chaifa*. Robinson's identification (iii. 55) is surely too far inland. Alammelech was probably on the *Nahr el-Mi'ech*, a tributary of the Kishon. Jiphthah-el may be *Jefat* (Rob. iii. 107). Bethlehem (*Beit Lahm*) is 10 miles inland from the shore of the bay of *Chaifa* (Rob. p. 113); and as it was in Zebulun, it fixes the distance of Asher's boundary as less than that from the sea.

[b] For the crops, see Rob. iii. 102; for the oil, Kenrick, p. 31; Reland, p. 817.

[c] Zidon was then distinguished by the name Rabbah = "the Strong," Josh. xix. 28.

[d] This name is added by the LXX. Compare Josh. xvii. 11.

[e] This would be well compensated for if the ancient legend could be proved to have any foundation, that the parents of St. Paul resided at Giscala or Gush Chaleb, *i. e.* the Ahlab of Asher (Judg. i. 31) See Reland, p. 813. [But see Acts xxii. 3.]

about the person, especially on the head, were used as a sign of sorrow. [MOURNING.] H. H.

* Jeremiah (xxxi. 40) speaks of "a valley of ashes;" and from his mention of "the brook of Kidron" in the same passage, he may possibly refer to a "valley" which bore this name, near Jerusalem. But the prophet's representation there being symbolic, it is not easy to decide how far we are to regard the scenery under which he couches the allegory as literal and how far as fictitious.

At a little distance north of Jerusalem are several large mounds of ashes (one of them 40 feet high), which some conjecture may be as old as the age of the temple, having been built up by the ashes carried out thither from the altar of sacrifice (Lev. vi. 10, 11). So much curiosity was felt respecting these ashes that two small specimens of them were submitted to Professor Liebig, who found them on analysis to consist largely of animal and not of vegetable elements. But the general opinion is that they are the accumulations of ashes deposited there from soap manufactories which formerly existed at Jerusalem. The fact that similar mounds occur in the vicinity of *Nâbulus* (SHECHEM), which are known to be formed in this way, would seem to be decisive on this question. Travellers have observed them also near *Ghŭzzeh* (Gaza), *Ludd* (Lydda), and *Ramleh*, where the Jews never offered sacrifices. See Dr. Robinson's *Later Res.* iii. 201. The chemical test, as he suggests, is too limited for determining the character of the entire mass, and a few particles of bones might easily be intermixed with the other sediments. Dr. Sepp takes notice of these ash-heaps (*Jerusalem u. das heil. Land*, i. 250), and expresses the same opinion of their origin. H.

ASHIMA (אֲשִׁימָא: Ἀσιμάθ [Vat. -σει-]; [Comp. Ἀσιμά:] *Asima*), a god worshipped by the people of Hamath. The worship was introduced into Samaria by the Hamathite colonists whom Shalmanezer settled in that land (2 K. xvii. 30). The name occurs only in this single instance. The Talmudists say that the word signifies a goat without hair, or rather with short hair (Buxtorf, *Lex. Talm.*), and from this circumstance Ashima has been regarded as identical with the Mendesian god of the Egyptians (considered by the Greeks to be Pan), to whom the goat was sacred. This god has also by some been identified with the Phœnician god Esmûn (see Winer, *Realw.*), whose name is frequently found in Phœnician inscriptions as a component of the names of persons, and who is regarded as the Phœnician Æsculapius (Gesen. *Mon. Phœn.* pp. 136, 347). The two conjectures are not necessarily discrepant, since to the Phœnician Esmûn belong the characteristics both of Pan and of Æsculapius (Movers, *Phönizier*, i. 532). There are many other conjectures of Jewish writers respecting this god, but they are of no authority whatever. F. W. G.

ASH'KELON, AS'KELON, Apocr. **AS'CALON** (אַשְׁקְלוֹן [a] [perh. *migration*, Gesen.; *stony*, Dietr.]; once "the Eshkalonite," הָאַשְׁקְלוֹנִי: Ἀσκάλων: Saad. عسقلان (note the change from Aleph to Ain): *Ascalon*), one of the five cities of the lords of the Philistines (Josh. xiii. 3; 1 Sam. vi. 17), but less often mentioned, and apparently less known to the Jews than the other four. This doubtless arose from its remote situation, alone, of all the Philistine towns, on the extreme edge of the shore of the Mediterranean (Jer. xlvii. 7), and also well down to the south. Gaza, indeed, was still further south, but then it was on the main road from Egypt to the centre and north of Palestine, while Ashkelon lay considerably to the left. The site, which retains its ancient name, fully bears out the above inference; but some indications of the fact may be traced, even in the scanty notices of Ashkelon which occur in the Bible. Thus, the name is omitted from the list in Josh. xv. of the Philistine towns falling to the lot of Judah (but comp. Joseph. *Ant.* v. 1, § 22, where it is specified), although Ekron, Ashdod, and Gaza are all named; and considerable uncertainty rests over its mention in Judg. i. 18 (see Bertheau in *Exeg. Handb.*). Samson went down from Timnath to Ashkelon when he slew the thirty men and took their spoil, as if to a remote place whence his exploit was not likely to be heard of; and the only other mention of it in the historical books is in the formulistic passages, Josh. xiii. 3, and 1 Sam. vi. 17, and in the casual notices of Jud. ii. 28; 1 Macc. x. 86, xi. 60, xii. 33. The other Philistine cities are each distinguished by some special occurrence or fact connected with it, but except the one exploit of Samson, Ashkelon is to us no more than a name. In the poetical books it occurs 2 Sam. i. 20; Jer. xxv. 20, xlvii. 5, 7; Am. i. 8; Zeph. ii. 4, 7; Zech. ix. 5.

In the post-biblical times Ashkelon rose to considerable importance. Near the town — though all traces of them have now vanished — were the temple and sacred lake of Derceto, the Syrian Venus; and it shared with Gaza an infamous reputation for the steadfastness of its heathenism and for the cruelties there practiced on Christians by Julian (Reland, pp. 588, 590). "The soil around the town was remarkable for its fertility; the wine of Ascalon was celebrated, and the *Al-henna* plant flourished better than in any other place except Canopus" (Kenrick, p. 28). It was also celebrated for its cypresses, for figs, olives, and pomegranates, and for its bees, which gave their name to a valley in the neighborhood (Kenrick, p. 28; Edrisi and Ibn Batuta in Ritter, *Palästina*, p. 88). Its name is familiar to us in the "Eschalot" or "Shallot," a kind of onion, first grown there, and for which this place was widely known. "The sacred doves of Venus still fill with their cooings the luxuriant gardens which grow in the sandy hollow within the ruined walls" (Stanley, p. 257). Ashkelon played a memorable part in the struggles of the Crusades. "In it was intrenched the hero of the last gleam of history which has thrown its light over the plains of Philistia, and within the walls and towers now standing Richard held his court" (Stanley, *ibid.*). By the Mohammedan geographers it was called "the bride of Syria" (Schultens, *Index Geogr.*).

"The position of the town is naturally very strong. The walls are built on a ridge of rock which winds in a semicircular curve around the town and terminates at each end in the sea. There is no bay or shelter for ships, but a small harbor towards the east advanced a little way into the town, and anciently bore, like that of Gaza, the name of Majumas" (Kenrick, p. 28).

[a] The usual form would be אַשְׁקֵל, *Ashkal*. Rötiger (in Gesenius, p. 1476) suggests that the uncommon termination is a Philistine form.

Digitized by Google

In the time of Origen some wells of remarkable shape were shown near the town, which were believed to be those dug by Isaac, or at any rate, to be of the time of the patriarchs. In connection with this tradition may be mentioned the fact that in the Samaritan version of Gen. xx. 1, 2, and xxvi. 1, Askelon (סהלון : [a]) is put for the "Gerar" of the Hebrew text. G.

* A word should be said of the present site of Ashkelon. Gesenius speaks of a village there still, bearing the ancient name; but in fact not a living soul dwells any longer within the proper precincts of the old city, though a little east of the ruins is a cluster of some twenty mud hovels surrounded by a few palms and other trees. The name is unknown on the spot except by tradition. The testimony of all travellers is the same: it is difficult to conceive of a more desolate scene, a sadder spectacle of the wasting effects of time, and of the havoc of war, than the ruins of Ashkelon present to us. "A lofty and abrupt ridge begins near the shore, runs up eastward, bends round to the south, then to the west, and finally northwest to the sea again, forming an irregular amphitheatre. On the top of this ridge ran the wall, which was defended at its salient angles by strong towers. The specimens which still exist along the southeast and west sides show that it was very high and thick, built, however, of small stones, and bound together by broken columns of granite and marble. . . . These extraordinary fragments, tilted up in strange confusion along the sandy ridge, are what generally appear in the pictures of Askelon, and impart such an air of desolation to the view. . . . The whole area is now planted over with orchards of the various kinds of fruit which flourish on this coast. . . . From the top of these tall fragments at the southeast angle of the wall, we have the whole scene of desolation before us, stretching, terrace after terrace, quite down to the sea on the northwest. The walls must have been blown to pieces by powder, for not even earthquakes could toss these gigantic masses of masonry into such extraordinary attitudes" (Thomson's *Land and Book*, ii. 328 ff.). "Not a solitary column stands upright, and not a building can be traced even in outline, though a few stones of a wall are here and there seen in their places. Deep wells are frequently met with, with curb-stones of marble or granite; columns, mostly of granite, exist everywhere in vast numbers — scores of them may be seen projecting from the ruinous wall along the cliff over the sea, and some lie half buried in the sands below" (Porter's *Handbook*, i. 269). We seem, as we stand there, to hear echoing through the ruins those words of Zephaniah (ii. 4), spoken 25 centuries ago: "Ashkelon shall be a desolation"; and of Zechariah (ix. 5): "Ashkelon shall not be inhabited." H.

ASH'KENAZ (אַשְׁכְּנַז: Ἀσχανάζ: *Ascenez*), one of the three sons of Gomer, son of Japhet (Gen. x. 3), that is, one of the peoples or tribes belonging to the great Japhetic division of the human race, and springing immediately from that part of it which bears the name of GOMER. The original seat of the people of Ashkenaz was undoubtedly in the neighborhood of Armenia, since they are mentioned by Jeremiah (li. 27) in connection with the kingdoms of Ararat and Minni. We are not, however, on this account to conclude that they, any more than the Gomerites in general, were confined to this locality. Assuming here, what will be more properly discussed under the word Japhet, that the Japhetic tribes migrated from their original seats westward and northward, thus peopling Asia Minor and Europe, we may probably recognize the tribe of Ashkenaz on the northern shore of Asia Minor, in the name of Lake Ascanius, and in Europe in the name *Scand*-ia, *Scand*-inavia. Knobel (*Völkertafel*, p. 35) regards the word as a compound (אש־כנז), the latter element being equivalent to the Gr. *γένος*, Lat. *gens*, *genus*, Eng. *kind*, *kin*; the meaning therefore being the *As*-race. If this be so, it would seem that we here find the origin of the name Asia, which has subsequently been extended to the whole eastern part of the world. Knobel considers that Ashkenaz is to be identified with the German race. It is worthy of notice, though possessing little weight as evidence for this view, that the rabbins, even to the present day, call Germany אשכנז. The opinion of Görres (*Völkertafel*, p. 92) that Ashkenaz is to be identified with the Cymry or Gaelic race seems less probable than that of Knobel. F. W. G.

* In 1 Chr. i. 6 and Jer. li. 27 the word is spelled in the A. V., as in the Genevan version, ASHCHENAZ. A.

ASH'NAH (אַשְׁנָה [*the strong, firm*]), the name of two cities of Judah, both in the *Shefelah* or Lowland; (1) named between Zorea and Zanoah, and therefore probably N. W. of Jerusalem (Josh. xv. 33; Ἄσσα; [Comp. Ald. Alex. Ἀσνά:] *Asena*); and (2) between Jiphthah and Nezib, and therefore to the S. W. of Jerusalem (Josh. xv. 43; [Ιανα; Ald. Alex. Ἀσενά; Comp. Ἀσανά:] *Esna*). Each, according to Robinson's map (1857), would be about 16 miles from Jerusalem, and therefore corresponding to the Bethasan of the Onomast. Eusebius names another place, Ἀσνά, but with no indication of position. G.

ASH'PENAZ (אַשְׁפְּנַז, of uncertain origin, yet see Hitzig on Dan. i. 3, and compare the form אַבִי עֶזְרִי = Ἀβιεσδρί (?); Ἀσφανές, Theodot.: [*Asphenez*, Vulg.], *Asphaz*, *Abiezer*, Syr.), the master of the eunuchs of Nebuchadnezzar (Dan. i. 3). B. F. W.

ASH'RIEL (אַשְׁרִיאֵל: Ἐσριήλ; [Vat. Ασ-ερειηλ:] *Esriel*). Probably ASRIEL, the son of Manasseh (1 Chr. vii. 14). W. A. W.

ASH'TERATHITE (הָעַשְׁתְּרָתִי: ὁ Ἀσ-ταρωθί [Vat. -θει]: *Astarothites*). A native or inhabitant of Ashtaroth (1 Chr. xi. 44) beyond Jordan. Uzzia the Ashterathite was one of David's guard. W. A. W.

ASH'TAROTH, and (once) **ASTAROTH** (עַשְׁתָּרוֹת: Ἀσταρώθ: *Astaroth* [in Josh. xiii. 31, Alex. Ασθαρωμ; in 1 Chr. vi. 71, Ἀσηρώθ; Alex [2] Ραμωθ; Comp. Ald. Ἀσταρώθ]), a city on the E. of Jordan, in Bashan, in the kingdom of Og, doubtless so called from being a seat of the worship of the goddess of the same name. [ASHTORETH.] It is generally mentioned as a description or definition of Og, — who "dwelt in Ashtaroth in Edrei" (Deut. i. 4), "at Ashtaroth and at Edrei" (Josh. xii. 4. xiii. 12), or "who was at

[a] Note here, as in the Arabic, the substitution of *tin* for *Aleph*

Digitized by Google

Ashtaroth" (ix. 10). It fell into possession of the half tribe of Manasseh (Josh. xiii. 31), and was given with its suburbs or surrounding pasture-lands (מִגְרָשׁ) to the Gershonites (1 Chr. vi. 71 [56], the other Levitical city in this tribe being Golan. In the list in Josh. xxi. 27, the name is given as Beeshterah (quasi בֵּית עַ = "house of A.;" Reland, p. 621; Gesenius, *Thes.* pp. 175 *a*, 196 *m*, 1083). Nothing more is heard of Ashtaroth. It is not named in any of the lists, such as those in Chronicles, or of Jeremiah, in which so many of the trans-Jordanic places are enumerated. Jerome (*Onom. Astaroth*) states that in his time it lay six miles from Adra, which again was 25 from Bostra. He further (*Astaroth Carnaim*) and Eusebius speak of two κωμαί, or castella, which lay nine miles apart, "inter Adaram et Abilam civitates." One of these was possibly that first named above, and the other may have been Ashteroth-Karnaim. The only trace of the name yet recovered in these interesting districts is *Tell-Ashterah* or *Asherah* (Ritter, *Syria*, p. 819; Porter, ii. 212), and of this nothing more than the name is known. Uzziah the Ashterathite is named in 1 Chr. xi. 44.

G.

* **ASHTAROTH** (עַשְׁתָּרוֹת: Judg. ii. 13, *al* Ἀστάρται; x. 6, *al* Ἀσταρώθ; 1 Sam. vii. 3, xii. 10, τὰ ἄλση; vii. 4, τὰ ἄλση Ἀσταρώθ; xxxi. 10, with בֵּית, τὸ Ἀσταρτεῖον, Alex. -τι-: *Astaroth*), the plural of ASHTORETH, which see.

A.

ASHTEROTH-KARNAIM (עַשְׁתְּרֹת קַרְנַיִם = "Ashtaroth of the two horns or peaks;" Sam. Vers. עפיניתיק: Saad. الصنمين: Ἀσταρὼθ καὶ (Alex. omits καὶ) Καρναΐν: *Astaroth Carnaim*), a place of very great antiquity, the abode of the Rephaim at the time of the incursion of Chedorlaomer (Gen. xiv. 5), while the cities of the plain were still standing in their oasis. The name reappears but once, and that in the later history of the Jews, as Carnaim, or Carnion (1 Macc. v. 26, 43, 44; 2 Macc. xii. 21, 26; Joseph. *Ant.* xii. 8, § 4), "a strong and great city" "hard to besiege," with a "temple (τὸ τέμενος) of Atargatis" (τὸ Ἀταργατεῖον), but with no indication of its locality, beyond its being in "the land of Galaad."

It is usually assumed to be the same place as the preceding [ASHTAROTH], but the few facts that can be ascertained are all against such an identification. 1. The affix "Karnaim," which certainly indicates some distinction,[a] and which in the times of the Maccabees, as quoted above, appears to have superseded the other name. 2. The fact that Eusebius and Jerome in the Onomasticon, though not very clear on the point, yet certainly make a distinction between Ashtaroth and Astaroth-Carnaim, describing the latter as a κωμὴ μεγίστη τῆς Ἀραβίας, vicus grandis in angulo Batanææ. 3. Some weight is due to the renderings of the Samaritan version, and of the Arabic version of Saadiah, which give Ashtaroth as in the text, but Ashteroth-Karnaim by entirely different names (see above). The first of these, *Aphinith*, does not appear to have been yet recognized; but the second *es-Sanamein*, can hardly be other than the still important place which continues to bear precisely the same name, on the Haj route, about 25 miles south of Damascus, and to the N. W. of the *Lejah* (Burckh. p. 55; Ritter *Syria*, p. 812). Perhaps it is some confirmation of this view that while the name Karnaim refers to some double character in the deity there worshipped *es-Sanamein* is also dual, meaning "the two idols." There accordingly we are disposed to fix the site of Ashteroth-Karnaim in the absence of further evidence.

G.

* Mr. Porter is very confident that "Karnaim" refers to the figure of Ashteroth. At *Kunnawât* (Kenath, Num. xxxii. 42) in *Lejah*, the ancient Argob, he found "a colossal head of Ashteroth, sadly broken, in front of a little temple, of which probably it was once the chief idol. The crescent moon which gave the goddess the name 'Carnaim' (two-horned) is on her brow." Elsewhere also among the massive ruins of the deserted cities there he saw "sculptured images of Astarte, with the crescent moon," showing how prevalent was this form of worship, and what its characteristic symbol was (ASHTORETH). See his *Giant Cities of Bashan*, pp. 12, 43.

H.

ASHTORETH (עַשְׁתֹּרֶת: Ἀστάρτη: *Astarthe* [*Astaroth*]), the principal female divinity of the Phœnicians, as Baal was the principal male divinity. It is a peculiarity of both names that they frequently occur in the plural, and are associated together in this form (Judg. x. 6; 1 Sam. vii. 4, xii. 10). Gesenius (*Thes.* s. vv.) maintained that by these plurals were to be understood statues of Baal and Astarte; but the more correct view seems to be that of Movers (*Phön.* i. 175, 602), that the plurals are used to indicate different modifications of the divinities themselves. In the earlier books of the O. T., only the plural, ASHTAROTH, occurs, and it is not till the time of Solomon, who introduced the worship of the Sidonian Astarte, and only in reference to that particular goddess, Ashtoreth of the Sidonians, that the singular is found in the O. T. (1 K. xi. 5, 33; 2 K. xxiii. 13). The worship of Astarte was very ancient and very widely spread. We find the plural Ashtaroth united with the adjunct Karnaim as the name of a city as early as the time of Abraham (Gen. xiv. 5), and we read of a temple of this goddess, apparently as the goddess of war, amongst the Philistines in the time of Saul (1 Sam. xxxi. 10). From the connection of this goddess with BAAL or BEL, we should moreover naturally conclude that she would be found in the Assyrian pantheon, and in fact the name Ishtar appears to be clearly identified in the list of the great gods of Assyria (Layard, *N. and B.*, pp. 352, 629; Rawlinson, *Early History of Babylon*, Lond. 1854, p. 23; Rawlinson, *Herodotus*, i. 634). There is no reason to doubt that this Assyrian goddess is the Ashtoreth of the Old Testament and the Astarte of the Greeks and Romans. The worship of Astarte seems to have extended wherever Phœnician colonies were founded. Thus we find her name in inscriptions still existing in the island of Cyprus on the site of the ancient Citium, and also at Carthage (Gesen. *Mon. Phœn.* pp. 125, 449), and not unfrequently as an element

[a] This was held by the Jews at the date of the Talmud to refer to its situation between two high peaked hills (see *Sukkah*, fol. 2), though it more probably alludes to the worship of the horned goddess, the "mooned Ashtaroth."

Digitized by Google

in Phœnician proper names, as Ἀστάρτος, Ἀββαστάρτος, Δελεαστάρτος (Joseph. c. *Ap.* i. 18). The name occurs moreover written in Egyptian hieroglyphics, as *Astart* (Ges. *Thes.* s. v. For evidence of her wide-spread worship see also Eckhel, *Doct. Num.* iii. 369 ff.). It is worthy of remark that Rödiger, in his recently published Addenda to Gesenius's *Thesaurus* (p. 106), notices that in the inscription on the sarcophagus of a king named Esmunazar, discovered in January, 1855 (see Robinson, iii. 36, note), the founding, or at least restoration, of the temple of this goddess at Sidon, is attributed to him and to his mother Amashtoreth, who is further styled priestess of Ashtoreth.

If now we seek to ascertain the character and attributes of this goddess, we find ourselves involved in considerable perplexity. There can be no doubt that the general notion symbolized is that of productive power, as Baal symbolizes that of generative power, and it would be natural to conclude that as the sun is the great symbol of the latter, and therefore to be identified with Baal, so the moon is the symbol of the former and must be identified with Astarte. That this goddess was so typified can scarcely be doubted. The ancient name of the city, Ashtaroth-Karnaim, already referred to, seems to indicate a horned Astarte, that is, an image with a crescent moon on her head like the Egyptian Athor. At any rate it is certain that she was by some ancient writers identified with the moon; thus Lucian (*De Syria Dea*, 4) says, Ἀστάρτην δ' ἐγὼ δοκέω Σελήνην ἔμμεναι. And again Herodian, v. 6, 10, Οὐρανίαν Φοίνικες Ἀστροδόχην (a grecized form of Astarte) ὀνομάζουσι, σελήνην εἶναι θέλοντες. On these grounds Movers, Winer, Keil, and others maintain that originally Ashtoreth was the moon-goddess. On the other hand, it appears to be now ascertained that the Assyrian Ishtar was not the moon-goddess, but the planet Venus (Rawlinson, *Herod.* l. c.), and it is certain that Astarte was by many ancient writers identified with the goddess Venus (or Aphrodite) as well as also with the planet of that name. The name itself seems to be identical with our word *Star*, a word very widely spread (Sanskrit, *tara*; Zend, *stârânm*; Pehlevi, *setaran*; Pers. ستارہ, *istarah*; Gr. ἀστήρ; Lat. *stella*. Though this derivation is regarded as doubtful by Keil, from the absence of the initial ס in all the presumed representatives of the word (*Könige*, i. 168, Eng. tr. i. 189), it is admitted by Gesenius, Fürst, Movers, and most Hebrew critics on apparently good grounds. On the whole it seems most likely that both the moon and the planet were looked upon as symbols, under different aspects and perhaps at different periods, of the goddess, just as each of them may in different aspects of the heavens be regarded as the "queen of heaven."

The inquiry as to the worship paid to the goddess is not less perplexed than that of the heavenly body in which she was symbolized. Movers (*Phön.* 607) distinguishes two Astartes, one Carthaginian-Sidonian, a virgin goddess symbolized by the moon, the other Syro-Phœnician symbolized by the planet Venus. Whether this be so or not it is certain that the worship of Astarte became identified with that of Venus: thus Cicero (*de Nat. Deor.* iii. 23) speaks of a fourth Venus, "Syria Tyroque concepta, quæ Astarte vocatur," and that this worship was connected with the most impure and licentious rites is apparent from the close connection of this goddess with ASHERAH, or, as our translators rendered the word, "groves." It is not necessary that we should here enter further into the very perplexed and revolting subject of the worship of this goddess. The reader who wishes to pursue the inquiry may find ample details in Movers' *Phönizier*, already referred to, and in Creuzer's *Symbolik*.

F. W. G.

ASH'UR (אַשְׁחוּר [*black*, Ges., possibly *hero*, Fürst]: Ἀσχώ, Ἀσούρ [Vat. Σαρα]; [Alex. Ασδωδ, Ασχουρ; Comp. Ἀσσούρ:] *Ashur*, *Assur*), the "father of Tekoa," 1 Chr. ii. 24, iv. 5 [which probably means that he was the founder or prince of that village. See TEKOA].

ASH'URITES, THE (הָאַשׁוּרִי : ὁ Θασιρί; [Vat. Θασειρει;] Alex. Θασουρ; [Comp. Ἀσερί:] *Geshuri*). This name occurs only in the enumeration of those over whom Ishbosheth was made king (2 Sam. ii. 9). By some of the old interpreters — Arabic, Syriac, and Vulgate versions — and in modern times by Ewald (*Gesch.* iii. 145), the name is taken as meaning the Geshurites, the members of a small kingdom to the S. or S. E. of Damascus, one of the petty states which were included under the general title of Aram. [ARAM GESHUR.] The difficulty in accepting this substitution is that Geshur had a king of its own, Talmai, whose daughter moreover was married to David somewhere about this very time (1 Chr. iii. 2, compared with 4), a circumstance not consistent with his being the ally of Ishbosheth, or with the latter being made king over the people of Geshur. Talmai was still king many years after this occurrence (2 Sam. xiii. 37). In addition, Geshur was surely too remote from Mahanaim and from the rest of Ishbosheth's territory to be intended here.

It would therefore be perhaps safer to follow the Targum of Jonathan, which has Beth-Asher, בֵּית אָשֵׁר, "the house of Asher," a reading supported by several MSS. of the original text, which, omitting the Vau, have הָאַשֵׁרִי (Davidson, *Hebr Text*, ad loc.). "The Asherites" will then denote the whole of the country west of the Jordan above Jezreel (the district of the plain of Esdraelon), and the enumeration will proceed regularly from north to south, Asher to Benjamin. The form "Asherite" occurs in Judg. i. 32.

The reading of the LXX. was evidently quite different; but what it was has not been yet recognized.

There is clearly no reference here to the Asshurim of Gen. xxv. 3. G.

ASH'VATH (עַשְׁוַת : Ἀσίθ; [Vat.] Alex. Ασειθ; [Comp. Ἀσουάθ; Ald. Ἀσοάθ:] *Asoth*). One of the sons of Japhlet, of the tribe of Asher (1 Chr. vii. 33). W. A. W.

A'SIA (ἡ Ἀσία: [*Asia*]). The passages in the N. T. where this word occurs are the following: Acts ii. 9, vi. 9, xvi. 6, xix. 10, 22, 26, 27, xx. 4, 16, 18, xxi. 27, xxvii. 2; Rom. xvi. 5 (where the true reading is Ἀσίας); 1 Cor. xvi. 19; 2 Cor. i. 8; 2 Tim. i. 15; 1 Pet. i. 1; Rev. i. 4, 11. [CHIEF OF ASIA. See ASIARCHÆ.] In all these passages it may be confidently stated that the word is used, not for "the continent of Asia," nor for what we commonly understand by "Asia Minor," but for a Roman province which embraced the western part of the peninsula of Asia Minor and of which Eph-

Digitized by Google

esus was the capital. This province originated in the bequest of Attalus, king of Pergamus, or king of Asia, who left by will to the Roman Republic his hereditary dominions in the west of the peninsula (B. C. 133). Some rectifications of the frontier were made, and "Asia" was constituted a province. Under the early Emperors it was rich and flourishing, though it had been severely plundered under the Republic. In the division made by Augustus of senatorial and imperial provinces, it was placed in the former class, and was governed by a proconsul. (Hence ἀνθύπατοι, Acts xix. 38, and on coins.) It contained many important cities, among which were the seven churches of the Apocalypse, and it was divided into assize districts for judicial business. (Hence ἀγοραῖοι, *i. e.* ἡμέραι, Acts, *ibid.*) It is not possible absolutely to define the inland boundary of this province during the life of St. Paul: indeed the limits of the provinces were frequently undergoing change; but generally it may be said that it included the territory anciently subdivided into Æolis, Ionia, and Doris, and afterwards into Mysia, Lydia, and Caria. [MYSIA, LYCIA, BITHYNIA, PHRYGIA, GALATIA.]

Meyer's comment on Acts xvi. 6 is curious, and neither necessary nor satisfactory. He supposes that the divine intimation given to St. Paul had reference to the continent of Asia, as opposed to Europe, and that the apostle supposed it might have reference simply to Asia cis Taurum, and therefore attempted to penetrate into Bithynia.[a] The view of Meyer and De Wette on Acts xxvii. 2 (and of the former on Acts xix. 10), namely, that the peninsula of Asia Minor is intended, involves a bad geographical mistake; for this term "Asia Minor" does not seem to have been so applied till some centuries after the Christian era. Moreover the mistake introduces confusion into both narratives. It is also erroneous to speak of Asia in the N. T. as *A. proconsularis;* for this phrase also was of later date, and denoted one of Constantine's subdivisions of the province of which we are speaking.

In the books of Maccabees, where reference is made to the pre-provincial period of this district (B. C. 200–150), we frequently encounter the word Asia in its earlier sense. The title "King of Asia" was used by the Seleucid monarchs of Antioch, and was claimed by them even after it more properly belonged to the immediate predecessors of Attalus (see 1 Macc. xi. 13; Conybeare and Howson's *Life and Epistles of St. Paul*, ch. xiv.; Marquardt s *Röm. Alterthümer*, iii. 130–146). J. S. H.

ASIAR'CHÆ (Ἀσιάρχαι: *principes Asiæ*, Vulg.: *chief of Asia*, A. V.: Acts xix. 31), officers chosen annually by the cities of that part of the province of Asia of which Ephesus was, under Roman government, the metropolis. They had charge of the public games and religious theatrical spectacles, the expenses of which they bore, as was done by the holders of λειτουργίαι at Athens, and the ædiles at Rome (Niebuhr, iii. 35; Gibbon, xv. ii. 205, ed. Smith). Their office was thus, in great measure at least, religious, and they are in consequence sometimes called ἀρχιερεῖς, and their office ἱερωσύνη (*Mart. S. Polycarp. in Patr. Ap.* c. 21 [cf. c. 12]). Probably it represented the religious element of the ancient Panionian league; to the

Greek Imperial Copper Coin ("medallion") of Laodicea of Phrygia; Commodus; with name of Asiarcha.

Obv.: ΑΥΤΚΑΙΜΑΥΡ . ΑΝΤΩΝΕΙΝΟCCΕ. Bust of Emperor to right. Rev.: ΕΠΙΑΙΑΠΙΓΡ ΗΤΟCΑCΙΑΡ . ΑΑΟΔΙΚΕΩΝ ΝΕΩΚΟΡΩΝ. Figure in triumphal quadriga of lions, to left.

territorial limits of which also the circle of the functions of the Asiarchs nearly corresponded. (See Herod. i. 142.) Officers called Λυκιάρχαι are mentioned by Strabo (xiv. 665), who exercised judicial and civil functions, subject to the Roman government; but there is no evidence to show that the Asiarchs exercised any but the religious functions above-mentioned. Modestinus names Βιθυνιαρχία and Καππαδοκαρχία as religious offices in Bithynia and Cappadocia. The office of Asiarch was annual, and subject to the approval of the proconsul, but might be renewed; and the title appears to have been continued to those who had at any time held the office. From its costliness, it was often (ἀεί) conferred on a citizen of the wealthy city of Tralles (Strabo, xiv. 649). Philip, the Asiarch at the time of St. Polycarp's martyrdom, was a Trallian. Coins or inscriptions bearing the names of persons who had served the office of Asiarch once or more times, are known as belonging to the following cities: Aphrodisias, Cyzicus, Hypæpa, Laodicea, Pergamus, Philadelphia, Sardis, Smyrna, Thyatira. (Aristid. *Or.* xxvi. 518, ed. Dind.; Eckhel, ii. 507, iv. 207; Böckh, *Inscr.* vol. ii.; Van Dale, *Dissert.* p. 274 ff.; Krause, *Civitates Neocoræ*, p. 71; Wetstein, *On Acts* xix.; Aker-

[a] Meyer has cancelled this remark in his later editions. He now limits Asia in Acts xvi. 6 to the western coast of the Peninsular Asia, as in Acts ii. 9 and vi. 9 H.

AS'KELON, Judg. i. 18; 1 Sam. vi. 17; 2 Sam. i. 20. [ASHKELON.]

* **ASMA'VETH**. [AZMAVETH.]

ASMODE'US (אַשְׁמְדַי: 'Ασμοδαῖος, Tob. iii. 8), the same as אַבַדּוֹן, which in Job xxxi. 12, &c., means "destruction," and 'Απολλύων, Rev. ix. 11 [APOLLYON], where he is called "a king, the angel of the bottomless pit," and ὁ 'Ολοθρεύων, Wisd. xviii. 25, where he is represented as the "Evil angel" (Ps. lxxviii. 49) of the plague. (Schleusner's *Thesaur.* s. v.) From the fact that the Talmud (cod. *Gittin*, Eccles. i. 12) calls him מלכא דשידי, *rex dæmonum* (cf. Lightfoot, *Hor. Hebr. et Talm.* in Luke xi. 15), some assume him to be identical with Beelzebub, and others with Azrael. The name is derived either from שָׁמַד, to destroy, or, according to Reland (Winer, *s. v.*), from a Persian word = πειράζειν. In the book of Tobit this evil spirit is represented as loving Sara, the daughter of Raguel, and causing the death of seven husbands, who married her in succession, on the bridal night; gaining the power to do so (as is hinted) through their incontinence. Tobias, instructed by Raphael, burns on "the ashes of perfume" the heart and liver of the fish which he caught in the Tigris; "the which smell when the evil spirit had smelled, he fled into the utmost parts of Egypt, and the angel bound him" (Tob. viii. 3).

It is obviously a vain endeavor to attempt to rationalize this story of

> . . . "Asmodëus with the fishy fume
> That drove him, though enamored, from the spouse
> Of Tobit's son, and with a vengeance sent
> From Media post to Egypt, there fast bound,"

since it is throughout founded on Jewish demonology, and "the loves of the angels," a strange fancy derived from Gen. vi. 2. Those, however, who attempt this task make Asmodëus the demon of impurity, and suppose merely that the fumes awakened the passions of Tobias and his wife. The Rabbis (among other odd fables) make this demon the offspring of the incest of Tubal-cain with his sister Noema, and say (in allusion to Solomon's many wives) that Asmodëus once drove him from his kingdom, but being dispossessed was forced to serve in building the temple, which he did noiselessly, by means of a mysterious stone Shamir. (Calmet, *s. v.* and *Fragments*, p. 271, where there is a great deal of fanciful and groundless speculation). F. W. F.

AS'NAH (אַסְנָה [*thorn-bush*]: 'Ασενά: *Asena*). The children of Asnah were among the Nethinim who returned with Zerubbabel (Ezr. ii. 50). In the parallel list of Neh. vii. 52 the name is omitted, and in 1 Esdr. v. 31 it is written ASANA. [See also ASENATH.] W. A. W.

[**ASNAP'PAR** (so correctly A. V. ed. 1611, in later eds.)] **ASNAP'PER** (אָסְנַפַּר: Syr. *Espid*: 'Ασενναφάρ; [Vat. Ασενναφαρ; Alex Ναφαρ:] *Asenaphar*), mentioned in Ezr. iv. 10, with the epithets "great and noble," as the person who settled the Cuthæans in the cities of Samaria. He has been variously identified with Shalmaneser, Sennacherib, and Esar-haddon. Of the three the third is the most probable, as Gesenius says, since in ver. 2 of the same chapter the Cuthæans attribute their settlement to that king. But on the whole, as this is but slight evidence, it seems better to accept Patrick's view (*Comm. in loco*), that Asnapper was "some great commander, who was intrusted by one of these kings to conduct them, and bring them over the river Euphrates, and see them settled in Samaria." G. E. L. C.

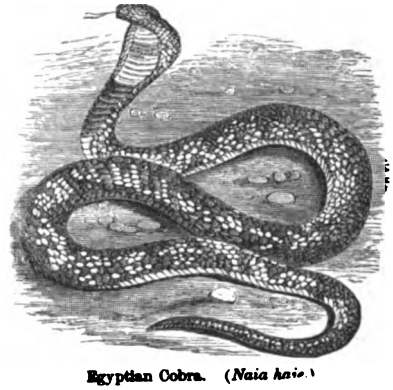
A'SOM ('Ασόμ: *Asom*), 1 Esdr. ix. 33. [HASHUM.]

ASP (פֶּתֶן, *pethen*: ἀσπίς, δράκων, βασιλίσκος: *aspis*, *basiliscus*. The Hebrew word occurs in the six following passages: Deut. xxxii. 33; Ps. lviii. 4, xci. 13; Job xx. 14, 16; Is. xi. 8. It is expressed in the passages from the Psalms by *adder* in the text of the A. V., and by *asp* in the margin. Elsewhere the text of the A. V. has *asp*[a] as the representative of the original word *pethen*.

That some kind of poisonous serpent is denoted by the Hebrew word is clear from the passages quoted above. We further learn from Ps. lviii. 4, that the *pethen* was a snake upon which the serpent-charmers practiced their art. In this passage the wicked are compared to "the deaf adder that stoppeth her ear, which will not hearken to the voice of charmers, charming never so wisely;" and from Is. xi. 8, "the sucking child shall play on the hole of the asp," it would appear that the *pethen* was a dweller in holes of walls, &c. The question of identity is one which is by no means easy to determine. Bochart contributes nothing in aid to a solution when he attempts to prove that the *pethen* is the *asp* (*Hieroz.* iii. 156), for this species of serpent, if a species be signified by the term, has been so vaguely described by authors, that it is not possible to say what known kind is represented by it. The term *asp* in modern zoology is generally restricted to the *Vipera aspis* of Latreille, but it is most probable that the name, amongst the ancients, stood for different kinds of venomous serpents. Solinus (c. xxvii.) says, "plures diversæque sunt aspidum species;" and Ælian (*N. Anim.* x. 31) asserts that the Egyptians enumerate

[a] *Asp* (the Greek ἀσπίς, the Latin *aspis*) has by some been derived from the Heb. אָסַף, "to gather up," in allusion to the coiling habits of the snake when at rest; but this etymology is very improbable. We think that the words are onomatopoetic, alluding to the hissing sounds serpents make: cf. Lat. *asper-rare*. The shield (ἀσπίς) is no doubt derived from the form of the animal at rest.

Digitized by Google



sixteen kinds of *asp*. Bruce thought that the *asp* of the ancients should be referred to the *cerastes*, while Cuvier considered it to be the Egyptian *cobra* (*Naia haje*). Be this, however, as it may, there can be little doubt that the Hebrew name *pethen* is specific, as it is mentioned as distinct from *achshûb*, *shephiphôn*, *tsiphôni*, &c., names of other members of the *Ophidia*.

Oedmann (*Vermisch. Samml.* v. 81) identifies the *pethen* with the *Coluber lebetinus*, Linn., a species described by Forskâl (*Desc. Anim.* p. 15). Rosenmüller (*Not. ad Hieroz.* iii. 156), Dr. Lee (*Heb. Lex.* s. v. פתן), Dr. Harris (*Nat. Hist. of Bible*, art. *Asp*), Col. H. Smith (*Cyc. Bib. Lit.* art. *Serpent*), believe that the *pethen* of Scripture is to be identified with the *Coluber bætan* of Forskâl. Oedmann has no hesitation in establishing an identity between the *C. lebetinus* and the *C. bætan*: but from Forskâl's descriptions it is most probable that the two species are distinct. The whole argument that seeks to establish the identity of the *Coluber bætan* with the *pethen* of Scripture is based entirely upon a similarity of sound. Rosenmüller thinks that the Arabic word *bætan* ought to be written *pætan*, and thinks there can be no doubt that this species represents the *pethen* of Scripture. Oedmann's argument also is based on a similarity of sound in the words, though he adduces an additional proof in the fact that, according to the Swedish naturalist quoted above, the common people of Cyprus bestow the epithet of *kouphé* (κουφή), "deaf," upon the *C. lebetinus*. He does not, however, believe that this species is absolutely deaf, for he says it can hear well. This epithet of deafness attributed to the *C. lebetinus* Oedmann thinks may throw light on the passage in Ps. lviii. 5, about "the deaf adder."

As regards the opinion of Rosenmüller and others who recognize the *pethen* under the *bætan* of Forskâl, it may be stated that, even if the identity is allowed, we are as much in the dark as ever on the subject, for the *Coluber bætan* of Forskâl has never been determined. If *C. bætan* = *C. lebetinus*, the species denoted may be the *Echis arenicola* (*toxicon*) of Egypt (*Catalogue of Snakes in Brit. M.* i. 29). Probably all that naturalists have ever heard of the *C. bætan* is derived from two or three lines of description given by Forskâl. "The whole body is spotted with black and white: it is a foot in length, and of the thickness of two thumbs; oviparous; its bite kills in an instant, and the wounded body swells." The evidence afforded by the *deaf* snake of Cyprus, and adduced in support of his argument by Oedmann, is of no value whatever; for it must be remembered that the audition in all the ophidia is very imperfect, as all the members of this order are destitute of a tympanic cavity. The epithet "deaf," therefore, as far as relates to the power all serpents possess of hearing *ordinary* sounds may reasonably be applied to any snake. Vulgar opinion in this country attributes "deafness" to the adder; but it would be very unreasonable to infer from thence that the adder of this country (*Pelias Berus*) is identical with the "deaf adder" of the 58th Psalm! Vulgar opinion in Cyprus is of no more value in the matter of identification of species than vulgar opinion in England. A preliminary proof, moreover, is necessary for the argument. The snake of Cyprus must be demonstrated to occur in Egypt or the Holy Land — a fact which has never yet been proved, though, as was stated above, the snake of Cyprus (*C. lebetinus*) may be the same as the *Echis arenicola* of North Africa.

Very absurd are some of the explanations which commentators have given of the passage concerning the "deaf adder that stoppeth her ears;" the Rabbi Solomon (according to Bochart, iii. 162) asserts that "this snake becomes deaf when old in one ear; that she stops the other with dust, lest she should hear the charmer's voice." Others maintain that "she applies one ear to the ground and stops the other with her tail." That such errors should have prevailed in former days, when little else but foolish marvels filled the pages of natural history, is not to be wondered at, and no allusion to them would have been made here, if this absurd error of "the adder stopping her ears with her tail" had not been perpetuated in our own day In Bythner's *Lyre of David*, p. 165 (Dee's translation, 1847!), the following explanation of the word *pethen*, without note or comment, occurs: "*Asp*, whose deafness marks the venom of his malice, as though impenetrable even to charms. It is deaf of one ear, and stops the other with dust or its tail, that it may not hear incantations." Dr. Thomson also (*Land and Book*, p. 155, London, 1859!) seems to give credence to the fable when he writes: "There is also current an opinion that the adder will actually stop up his ear with his tail to fortify himself against the influence of music and other charms." It is not, then, needless to observe, in confutation of the above error, that no serpent possesses external openings to the ear.

The true explanation of Ps. lviii. 4 is simply as follows: There are some serpents, individuals of the same species perhaps, which defy all the attempts of the charmer: in the language of Scripture such individuals may be termed *deaf*. The point of the rebuke consists in the fact that the *pethen* was capable of hearing the charmer's song, but refused to do so. The individual case in question was an exception to the rule. If, as some have supposed, the expression "deaf adder" denoted some species that was incapable of hearing, whence it had its specific name, how could there be any force in the comparison which the psalmist makes with wicked men?

Egyptian Cobra. (*Naia haje*.)

Serpents, though comparatively speaking deaf to ordinary sounds, are no doubt capable of hearing the sharp, shrill sounds which the charmer produces either by his voice or by an instrument; and this comparative deafness is, it appears to us *the very*

Digitized by Google

reason why such sounds as the charmer makes produce the desired effect in the subject under treatment. [SERPENT-CHARMING.] As the Egyptian cobra is more frequently than any other species the subject upon which the serpent-charmers of the Bible lands practice their science, as it is fond of concealing itself in walls and in holes (Is. xi. 8), and as it is not improbable that the derivation of the Hebrew word *pethen*[a] has reference to the expanding powers of this serpent's neck when irritated, it appears to us to have a decidedly better claim to represent the *pethen* than the very doubtful species of *Coluber bætan*, which on such slender grounds has been so positively identified with it.

W. H.

ASPAL'ATHUS (ἀσπάλαθος ἀρωμάτων; Comp. πάλαθος: *balsamum*), the name of some sweet perfume mentioned in Ecclus. xxiv. 15, to which Wisdom compares herself: "I gave a sweet smell like cinnamon and aspalathus." The question as to what kind of plant represents the aspalathus of the ancients has long been a puzzling one. From Theocritus (*Id.* iv. 57) we learn that the aspalathus was of a thorny nature, and (from *Id.* xxiv. 87) that the dry wood was used for burning. Pliny (*H. N.* xii. 24) says that aspalathus grows in Cyprus; that it is a white thorny shrub, the size of a moderate tree; that another name for this plant was *erysceptrum* or *sceptrum*, "sceptre," or "red sceptre," a name perhaps which it owed to the fact of the flowers clustering along the length of the branches; but in another place (xxiv. 13) he speaks of *aspalathus* as distinct from the *erysceptrum*, as growing in Spain, and commonly employed there as an ingredient in perfumes and ointments. He states that it was employed also in the washing of wool. Theophrastus (*Hist. Plant.* ix. 7, § 3, ed. Schneider) enumerates *aspalathus* with cinnamon, cassia, and many other articles which were used for ointments, and appears to speak of it as an Eastern production. In *Fr.* iv. 33 he says it is sweet-scented and an astringent. Dioscorides (i. 19) says that the *aspalathus* was used for the purpose of thickening ointment.

It appears that there were at least two kinds or varieties of plants known by the name of *aspalathus*; for all the authorities cited above clearly make mention of two: one was white, inodorous, and inferior; the other had red wood under the bark, and was highly aromatic. The plant was of so thorny a nature that Plato (*Repub.* p. 616 A, ed. Bekker) says cruel tyrants were punished with it in the lower world.

Gerarde (*Herbal*, p. 1625) mentions two kinds of *aspalathus*: *aspal. albicans torulo citreo*, and *aspal. rubens*. "The latter," he says, "is the better of the two: its smell is like that of the rose, whence the name *Lignum Rhodium*, rather than from Rhodes, the place where it is said to grow." The *Lignum Rhodianum* is by some supposed to be the substance indicated by the *aspalathus*; the plant which yields it is the *Convolvulus scoparius* of Linnæus.[b] Dr. Royle (*Cyc. Bib. Lit.* s. v.) is inclined to believe that the bark of a tree of the Himalayan mountains, the *Myrica sapida* of Dr. Wallich, is the article indicated, because in India the term *Darshishan*, which by Avicenna and Serapion are used as the Arabic synonyms of *aspalathus*, is applied to the bark of this tree. If the *aspalathus* of the Apocrypha be identical with the *aspalathus* of the Greeks, it is clear that the locality for the plant must be sought nearer home, for Theocritus evidently mentions the *aspalathus* as if it were familiar to the Greek colonists of Sicily or the south of Italy in its growing state. For other attempts to identify the *aspalathus* see Salmasius, *Hyl. Iat.* cap. lxxxiv.; Dr. Royle, in passage referred to above; Sprengel, *Hist. Rei Herb.* i. 45, 183; but in all probability the term has been applied to various plants.

W. H.

ASPATHA (אַסְפָּתָא: Φασγά; [Alex. FA. Φαγα; Comp. Ἀσφαθά:] *Esphatha*), third son of Haman (Esth. ix. 7).

ASPHAR, THE POOL (λάκκος Ἀσφάρ; [Alex. λ. Ασφαλ: *lacus Asphar*]) in the "wilderness of Thecoe." By this "pool" Jonathan and Simon Maccabæus encamped at the beginning of their struggle with Bacchides (1 Macc. ix. 33; Joseph. *Ant.* xiii. 1, § 2). Is it possible that the name is a corruption of λάκκος Ἀσφαλτίτης?

G.

ASPHAR'ASUS (Ἀσφαράσος: *Mechpeatochor*), 1 Esdr. v. 8. [MISPERETH.]

AS'RIEL (אַשְׂרִיאֵל [*vow of God*]: Ἐσριήλ, Ἰεζιήλ [Vat. -ζει-]; Alex. Εριηλ in Josh.: *Asriel, Esriel*). The son of Gilead, and great-grandson of Manasseh (Num. xxvi. 31; Josh. xvii. 2). He was the founder of the family of the ASRIELITES. The name is erroneously written ASHRIEL in the A. V. of 1 Chr. vii. 14.[c] According to the rendering of the latter passage by the LXX., Asriel was the son of Manasseh by his Syrian concubine.

W. A. W.

AS'RIELITES, THE (הָאַשְׂרִיאֵלִי: ὁ Ἐσριηλί [Vat. -λει]: *Asrielita*). Num. xxvi. 31 [ASRIEL.]

ASS. The five following Hebrew names of the genus *Asinus* occur in the O. T.: *Chamór*, *'Athón*, *'Ayir*, *Pere*, and *'Aród*.

[a] פֶּתֶן, v. comp. inus. *distendere*, whence מִפְתָּן, *limen*, utpote ad conculcandum *expansum*. The Greek πύθων seems to be connected with this word. See Fürst. *Concord.* s. v. The Arab. *bætan* (بَثَن), *planum*, may have reference to *expansion*.

[b] On this subject Sir W. Hooker in a letter writes, 'We must not go to *Convol. scoparius*, a weed that may possess the two needful qualifications. It is peculiar to the Canary Islands. Many plants with fragrant roots are called Rose-roots. Such is the *Lignum aloes*, the lign aloes of Scripture; and there is the ῥοδιαρίζα of Dioscorides, which came from Macedonia. A late learned friend of mine writes, 'This was certainly 'Jupeau's *Rhodiola rosea*, figured as such by Parkinson in his *Theatrum Botanicum*, after Lobel. Soon after the discovery of the Canary Islands this name was transferred to *Convol. scoparius*, and afterwards to several American plants. It is called in the Canary Islands *Lena Noel*, a corruption of *Lignum aloes*, and though now in little request, large quantities of it were formerly exported, and the plant nearly extirpated. The apothecaries sold it both as *Lignum Rhodium* and as the *aspalathus* of Dioscorides; it soon, however, took the latter name, which was handed over to a wood brought from India, though the original plant was a thorny shrub growing on the shores of the Mediterranean, probably *Spartium villosum*, according to Sibthorpe (*Fior. Græc.* vol. vii. p. 69).' "

[c] So in the Venevan version. This accords with the Hebrew in 2 MSS. and one edition cited by Michaelis.

1. *Chamôr* (חֲמוֹר[a]: ὄνος, ὑποζύγιον, γομάρ in 1 Sam. xvi. 20: *asinus*, "ass," "he-ass") denotes the male domestic ass, though the word was no doubt used in a general sense to express any ass whether male or female. The ass is frequently mentioned in the Bible; it was used (*a*) for carrying burdens (1 Sam. xxv. 18; Gen. xlii. 26, xlv. 23; 2 Sam. xvi. 1; 1 Chr. xii. 40; Neh. xiii. 15; 1 Sam xvi. 20). (*b*) for riding (Gen. xxii. 3; Ex. iv. 20; Num. xxii. 21; 1 K. xiii. 23; Josh. xv. 18; Judg. i. 14, v. 10, x. 4, xii. 14; 1 Sam. xxv 20; 2 Sam. xvii. 23, xix. 26; Zech. ix. 9; Matt. xxi. 7): (*c*) for ploughing (Is. xxx. 24, xxxii. 20; Deut. xxii. 10), and perhaps for treading out corn, though there is no clear Scriptural allusion to the fact. In Egypt asses were so employed (Wilkinson's *Anc. Egypt.* iii. 34), and by the Jews, according to Josephus (*Contr. Apion.* ii. § 7): (*d*) for grinding at the mill (Matt. xviii. 6; Luke xvii. 2) — this does not appear in the A. V., but the Greek has μύλος ὀνικός for "millstone": (*e*) for (carrying baggage in) wars (2 K. vii. 7, 10): and, perhaps from the time of David, (*f*) for the procreation of mules (Gen. xxxvi. 24; 1 K. iv. 28; Esth. viii. 10, &c.).

It is almost needless to observe that the ass in eastern countries is a very different animal from what he is in western Europe. There the greatest care is taken of the animal, and much attention is paid to cultivate the breed by crossing the finest specimens; the riding on the ass therefore conveys a very different notion from the one which attaches to such a mode of conveyance in our own country. The most noble and honorable amongst the Jews were wont to be mounted on asses; and in this manner our Lord himself made his triumphant entry into Jerusalem. He came, indeed, "meek and lowly," but it is a mistake to suppose, as many do, that the fact of his riding on the ass had, according to our English ideas, aught to do with his meekness; although thereby, doubtless, he meant to show the peaceable nature of his kingdom, as horses were used only for war purposes.

In illustration of the passage in Judg. v. 10, "Speak ye that ride on white asses," it may be mentioned that Buckingham (*Trav.* p. 389) tells us that one of the peculiarities of Bagdad is its race of white asses, which are saddled and bridled for the conveyance of passengers that they are large and spirited, and have an easy and steady pace. Bokhara is also celebrated for its breed of white asses, which are sometimes more than thirteen hands high; they are imported into Peshawar, and fetch from 80 to 100 rupees each.

In Deut. xxii. 10 "plowing with an ox and an ass together" was forbidden by the law of Moses. Michaelis (*Comment. on the Laws of Moses*, transl. vol. ii p. 392) believes that this prohibition is to be traced to the economic importance of the ox in the estimation of the Jews; that the coupling together, therefore, so valued an animal as the ox with the inferior ass was a dishonor to the former animal; others, Le Clerc for instance, think that this law had merely a symbolical meaning, and that by it we are to understand improper alliances in civil and religious life to be forbidden; he compares 2 Cor. vi. 14, "Be ye not unequally yoked with unbelievers." It is not at all improbable that such a lesson was intended to be conveyed; but we think that the main reason in the prohibition is a physical one, namely, that the ox and the ass could not pull pleasantly together on account of the difference in size and strength; perhaps also this prohibition may have some reference to the law given in Lev. xix. 19.

The expression used in Is. xxx. 24, "The young asses that *ear* the ground," would be more intelligible to modern understandings were it translated the asses that *till* the ground; the word *ear* from *aro* "I till," "I plough," being now obsolete (comp. also 1 Sam. viii. 12). [EAR, EARING.]

Although the flesh of the wild ass was deemed a luxury amongst the Persians and Tartars, yet it does not appear that any of the nations of Canaan used the ass for food. The Mosaic law considered it unclean, as "not dividing the hoof and chewing the cud." In extreme cases, however, as in the great famine of Samaria, when "an ass's head was sold for eighty pieces of silver" (2 K. vi. 25), the flesh of the ass was eaten. Many commentators on this passage, following the LXX., have understood a measure (*a chomer of bread*) by the Hebrew word. Dr. Harris says, — "no kind of extremity could compel the Jews to eat any part of this animal for food:" but it must be remembered that in cases of extreme need parents ate their own offspring (2 K. vi. 29; Ez. v. 10). This argument therefore falls to the ground; nor is there sufficient reason for abandoning the common acceptation of these passages (1 Sam. xvi. 20, xxv. 18), and for understanding a *measure* and not the *animal*. For an example to illustrate 2 K. *l. c.* comp. Plutarch. *Artax.* i. 1023, "An ass's head could hardly be bought for sixty drachmas."[b]

The Jews were accused of worshipping the head of an ass. Josephus (*Contr. Apion.* ii. § 7) very indignantly blames Apion for having the impudence to pretend that the Jews placed an ass's head of gold in their holy place, which the grammarian asserted Antiochus Epiphanes discovered when he spoiled the temple. Plutarch (*Sympos.* iv. ch. 5) and Tacitus (*Hist.* v. §§ 3 and 4) seem to have believed in this slander. It would be out of place here to enter further into this question, as it has no Scriptural bearing, but the reader may find much curious matter relating to this subject in Bochart (*Hierox.* iii. 199 ff.).

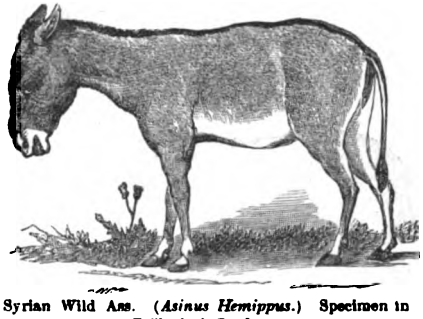
2. *'Athôn* (אָתוֹן[c]: ἡ ὄνος, ὄνος, ὄνος θηλεία, ἡμίονος, ὄνος θηλεία νομάς: *asina, asinus*, "ass," "she-ass"). There can be no doubt that this name represents the common domestic she-ass, nor do we think there are any grounds for believing that the *'athôn* indicates some particular valuable breed which judges and great men only possessed, as Dr. Kitto (*Phys. Hist. Pal.* p. 383), and Dr. Harris (*Nat. Hist. of Bible*, art. *Ass*) have supposed. *'Athôn* in Gen. xii. 16, xlv. 23 is clearly contrasted with *chamôr*. Balaam rode on a she-ass (*'athôn*). The asses of Kish which Saul sought were she-asses. The Shunammite (2 K. iv. 22, 24) rode on one

[a] חֲמוֹר, from root חָמַר, "to be red," from the reddish color of the animal in southern countries. Jerome compares the Spanish *burro, burrico*. In 2 Sam. xix. 27, the word is used as a feminine.

[b] The Talmudists say the flesh of the ass causes avarice in those who eat it; but it cures the avaricious of the complaint (*Zoöl. des Talm.* § 165).

[c] A word of uncertain derivation, usually derived from an unused root, "to be slow," "to walk with

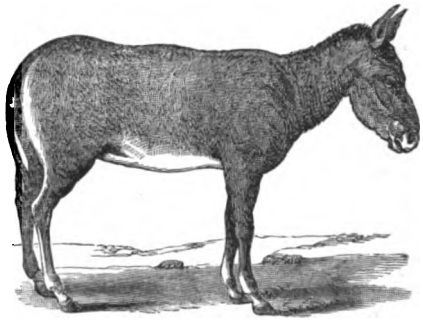
Digitized by Google



when she went to seek Elisha. They were she-asses which formed the especial care of one of David's officers (1 Chr. xxvii. 30). While on the other hand Abraham (Gen. xxii. 3, &c.), Achsah (Josh. xv. 18), Abigail (1 Sam. xxv. 20), the disobedient prophet (1 K. xiii. 23), rode on a *chamór*.

3. *'Ayir* (עַיִר: πῶλος, πῶλος νέος, ὄνος, βοῦς (in Is. xxx. 24): *pullus asinæ, pullus onagri, jumentum, pullus asini*, "foal," "ass colt," "young ass," "colt"), the name of a young ass, which occurs Gen. xlix. 11, xxxii. 15; Judg. x. 4, xii. 14; Job xi. 12; Is. xxx. 6, 24; Zech. ix. 9. In the passages of the books of Judges and Zechariah the *'ayir* is spoken of as being old enough for riding upon; in Is. xxx. 6, for carrying burdens, and in ver 24 for tilling the ground. Perhaps the word *'ayir* is intended to denote an ass rather older than the age we now understand by the term *foal* or *colt;* the derivation "to be spirited" or "impetuous" would then be peculiarly appropriate.[a]

4. *Pere* (פֶּרֶא: ὄνος ἄγριος, ὄνος ἐν ἀγρῷ, ὄναγρος, ὄνος ἐρημίτης, ἄγροικος ἄνθρωπος: *ferus homo*, Vulg.; "wild man," A. V., in Gen. xvi. 12; *onager*, "wild ass"). The name of a species of wild ass mentioned Gen. xvi. 12; Ps. civ. 11; Job vi. 5, xi. 12, xxxix. 5, xxiv. 5; Hos. viii. 9; Jer. ii. 24; Is. xxxii. 14. In Gen. xvi. 12, *Pere Adâm*, a "wild-ass man," is applied to Ishmael and his descendants, a character that is well suited to the Arabs at this day. Hosea (viii. 9) compares Israel to a wild ass of the desert, and Job (xxxix. 5) gives an animated description of this animal, and one which is amply confirmed by both ancient and modern writers.



5. *'Aród* (עָרוֹד,[b] omitted by the LXX. and Vulg., which versions probably supposed *'aród* and *pere* to be synonymous: "wild ass"). The Hebrew word occurs only in Job xxxix. 5, "Who hath sent out the *pere* free, or who hath loosed the bands of the *'aród?*" The Chaldee plural *'arâdaÿh* (עֲרָדַיָּא) occurs in Dan. v. 21. Nebuchadnezzar's "dwelling was with the wild asses." Bochart (*Hieros.* ii. 218) and Rosenmüller (*Sch. in V. T.* l. c.), Lee (*Comment.* on Job *l. c.*), Gesenius (*Thes.* s. v.) suppose *'aród* and *pere* to be identical in meaning. The last-named writer says that *pere* is the Hebrew, and *'aród* the Aramæan; but it is not improbable that the two names stand for different animals.

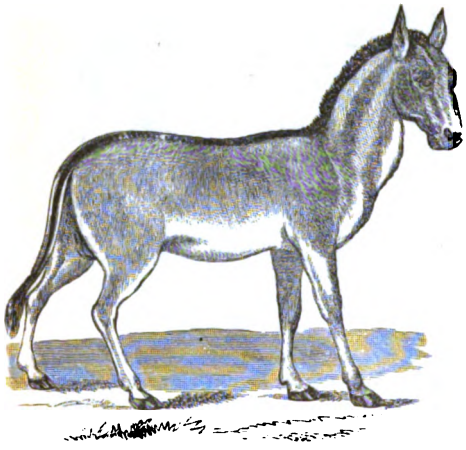
The subject which relates to the different animals known as wild asses has recently received very valuable elucidation from Mr. Blythe in a paper contributed to the *Journal of the Asiatic Society of Bengal* (1859), a reprint of which appears in the October No. of *The Annals and Magazine of Natural History* (1860). This writer enumerates seven species of the division Asinus. In all probability the species known to the ancient Jews are *Asinus hemippus*, which inhabits the deserts of Syria, Mesopotamia, and the northern parts of Arabia; and *Asinus vulgaris* of N. E. Africa, the true onager or aboriginal wild ass, whence the domesticated breed is sprung; probably also the *Asinus onager*, the Koulan or Ghorkhur, which is found in Western Asia from 48° N. latitude southward to Persia, Beluchistan, and Western India, was not unknown to the ancient Hebrews, though in all probability they confounded these species. The *Asinus hemionus* or Dshiggetai, which was separated from *Asinus hemippus* (with which it had long

Syrian Wild Ass. (*Asinus Hemippus.*) Specimen in Zoölogical Gardens

been confounded) by Is. St. Hilaire, could hardly have been known to the Jews, as this animal, which

Ghor-Khur or Koulan. (*Asinus Onager.*) Specimen in British Museum.

is perhaps only a variety of *Asinus onager*, inhabits Thibet, Mongolia, and Southern Siberia, countries with which the Jews were not familiar. We may therefore safely conclude that the *'athón* and *pere* of the sacred writings stand for the different species now discriminated under the names of *Asinus hemippus*, the Assyrian wild ass, *Asinus vulgaris*, the true onager, and perhaps *Asinus onager*, the Koulan or Ghorkhur of Persia and Western India.



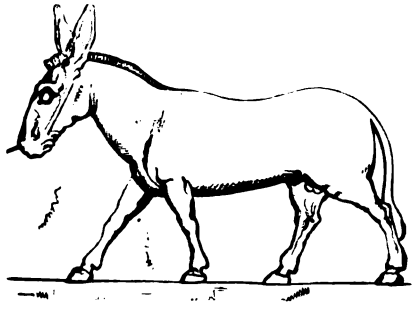
The following quotation from Mr. Blythe's valuable paper is given as illustrative of the Scriptural allusions to wild asses: "To the west of the range of the Ghor-khur lies that of *Asinus hemippus*, or true Hemionus of ancient writers — the particular species apostrophized in the book of Job, and again that noticed by Xenophon. There is a recent account of it by Mr. Layard in *Nineveh and its Remains* (p. 324). Returning from the Sinher, he was riding through the desert to Tel Afer, and there he mistook a troop of them for a body of horse with the Bedouin riders concealed! 'The reader will remember,' he adds, 'that Xenophon mentions these beautiful animals, which he must have seen during his march over these very plains . . "The country," says he, "was a plain throughout,

short steps;' but Fürst (*Heb. Ch. Wört.* s. v.) demurs strongly to this etymology.

[a] From עִיר, *fervere*.

[b] עָרוֹד, from root עָרַד, "to flee," "to be untamed." Bochart thinks the word is onomatopoetic

as even as the sea, and full of wormwood, if any other kind of shrubs or reeds grew there they had all an aromatic smell, but no trees appeared . . . The asses, when they were pursued, having gained ground on the horses, stood still (for they exceeded



Daggetai or Kyang. (*Asinus Hemionus.*) Specimen in Zoölogical Gardens.

them much in speed); and when these came up with them they did the same thing again . . . The flesh of those that were taken was like that of a red deer but more tender" (*Anab.* i. § 5). 'In fleetness,' continues Mr. Layard, 'they equal the gazelle, and to overtake them is a feat which only one or two of the most celebrated mares have been known to accomplish'" (*Annals and Mag. of Nat. Hist.* vol. vi. No. 34. p. 243).

The subjoined wood-cut represents some kind of wild ass depicted on monuments at Persepolis.

Wild Ass. On monuments of Persepolis. (Rawlinson's Herodotus.)

ASSABI'AS ('Ασαβίας; [Vat. Alex. Ald. Σαβίας:] *Hasabias*), 1 Esdr. i. 9. [HASHABIAH.]

ASSALI'MOTH (Σαλιμώθ; [Vat. Σαλειμωθ: Alex. Ald. 'Ασσαλιμώθ:] *Salimoth* (39)), 1 Esdr. viii. 36. [SHELOMITH.]

ASSANI'AS (Σαμίας; [Vat. Ald. 'Ασσαμίας; Alex. Ασαμιας; 2 MSS. 'Ασαβίας:] *Assannas*), 1 Esdr. viii. 54. [HASHABIAH.]

• **ASSARE'MOTH.** This word is given in the margin of the A. V. in 1 Macc. iv. 15 as the Greek correspondent of Gazera in the text. [GAZERA.] The Complutensian and Aldine editions of the Sept., with 6 MSS., read 'Ασσαρημώθ in the passage referred to for Γαζηρών of the Roman edition. 'Ασαρημώθ is also found in the Sept. in Jer. xxxviii. (Heb. xxxi.) 40 as the representative of the Heb. הַשְּׁרֵמוֹת. A.

ASSH'UR. [ASSYRIA.]

ASSHU'RIM (אַשּׁוּרִים: 'Ασσουριείμ; Alex Ασουριμ: *Assurim*). A tribe descended from Dedan, the grandson of Abraham (Gen. xxv. 3). They have not been identified with any degree of certainty. Knobel considers them the same with the Asshur of Ez. xxvii. 23, and connected with southern Arabia. W. A. W.

ASSIDE'ANS ('Ασιδαῖοι; [in 1 Macc. vii. Alex. Ασιδεοι, Sin. Ασειδαιοι:] *Assidæi*, i. e. חֲסִידִים, *the pious*, "puritans;" *οἱ εὐσεβεῖς, οἱ ὅσιοι*), the name assumed by a section of the orthodox Jews (1 Macc. ii. 42 [so Comp. Ald. Alex.], alii [Rom. Sin.] Ἰουδαίων, probably by correction; 1 Macc. vii. 13; 2 Macc. xiv. 6), as distinguished from "the impious" (*οἱ ἀσεβεῖς*, 1 Macc. iii. 8, vi. 21, vii. 5, &c.), "the lawless" (*οἱ ἄνομοι*, 1 Macc. iii. 6, ix. 23, &c.), "the transgressors" (*οἱ παράνομοι*, 1 Macc. i. 11, &c.), that is, the Hellenizing faction. They appear to have existed as a party before the Maccabæan rising, and were probably bound by some peculiar vow to the external observance of the Law (1 Macc. ii. 42, *ἐκουσιάζεσθαι τῷ νόμῳ*). They were among the first to join Mattathias (1 Macc. *l. c.*); and seem afterwards to have been merged in the general body of the faithful (2 Macc. xiv. 6, *οἱ λεγόμενοι τῶν Ἰουδαίων Ἀσιδαῖοι, ὧν ἀφηγεῖται Ἰούδας ὁ Μακκαβαῖος . . .*). When Bacchides came against Jerusalem they used their influence (1 Macc. vii. 13, *πρῶτοι οἱ Ἀσιδ. ἦσαν ἐν υἱοῖς Ἰσραήλ*) to conclude a peace, because "a priest of the seed of Aaron" (Alcimus) was with him, and sixty of them fell by his treachery [ALCIMUS]. The name *Chasidim* occurs frequently in the Psalms (*e. g.* Ps lxxix. 2 = 1 Macc. vii. 17; cxxxii. 9, &c.); and it has been adopted in recent times by a sect of Polish Jews, who take as the basis of their mystical system the doctrines of the Cabalistic book Zohar (Beer, *Ersch und Gruber*, s. v. *Chassidder*).

B. F. W.

AS'SIR (אַסִּיר [*captive*]: 'Ασείρ, 'Ασήρ: *Aser*, *Asir*). 1. Son of Korah (Ex. vi. 24; 1 Chr. vi. 22).

2. Son of Ebiasaph, and a forefather of Samuel (1 Chr. vi. 23, 37).

3. Son of Jeconiah (1 Chr. iii. 17), unless יְכָנְיָה אַסִּיר be translated "Jeconiah the captive" (Bertheau *ad loc.*). G.

AS'SOS or **AS'SUS** ('Ασσος), a town and seaport of the Roman province of ASIA, in the district anciently called Mysia. It was situated on the northern shore of the gulf of ADRAMYTTIUM, and was only about seven miles from the opposite coast of Lesbos, near Methymna (Strab. xiii. p. 618). A good Roman road, connecting the towns of the central parts of the province with Alexandria Troas [TROAS] passed through Assos, the distance between the two latter places being about 20 miles (*Itin. Anton.*). These geographical points illustrate St. Paul's rapid passage through the town as

Digitized by Google

mentioned in Acts xx. 13, 14. The ship in which he was to accomplish his voyage from Troas to Cæsarea [to Ptolemais, Acts xxi. 7] went round Cape Lectum, while he took the much shorter journey by land. Thus he was able to join the ship without difficulty, and in sufficient time for her to anchor off Mitylene at the close of the day on which Troas had been left.

The chief characteristic of Assos was that it was singularly Greek. Fellows found there "no trace of the Romans." Leake says that "the whole gives perhaps the most perfect idea of a Greek city that anywhere exists." The remains are numerous and remarkably well preserved, partly because many of the buildings were of granite. The citadel, above the theatre, commands a glorious view, and must itself have been a noble object from the sea. The Street of Tombs, leading to the Great Gate, is one of the most remarkable features of Assos. Illustrations of the ancient city will be found in Texier, Clarac, Fellows, and Choiseul-Gouffier. It is now utterly desolate. Two monographs on the subject are mentioned by Winer: Quandt, *De Asson. Regione*, 1710; Amnell, *De Ἄσσῳ*, Upsal. 1758.

It is now a matter of curiosity to refer to the interpretation which used to be given to the words ἄσσον παρελέγοντο, in Acts xxvii. 13. In the Vulgate they were rendered "cum sustulissent de Asson," and they were supposed to point to a city of this name in Crete. Such a place is actually inserted by Padre Georgi, in the map which accompanies his *Paulus Naufragus* (Venet. 1730, p. 181). The true sense of the passage was first given by Beza. J. S. H

Assos. The Acropolis.

ASSUE'RUS (Ἀσύηρος [Alex. Ασουηρος: Comp. Ald. Ἀσσούηρος: *Assuerus*]), Tob. xiv. 15. [AHASUERUS.]

AS'SUR (אַשּׁוּר: Ἀσσούρ: [*Assur*]). 1. Ezr. iv 2; Ps. lxxxiii. 8; 2 Esdr. ii. 8; Jud. ii. 14; v. 1; vi. 1, 17; vii. 20, 24; xiii. 15; xiv. 3; xv. 6; xvi. 4. [ASSHUR; ASSYRIA.]

2. (Ἀσούβ; [Ald.] Alex. Ασουρ: *Azius.*) 1 Esdr. v 31 [HARHUR.]

ASSYRIA, ASSHUR (אַשּׁוּר: Ἀσσούρ; Jos. Ἀσσυρία: *Assur*), was a great and powerful country lying on the Tigris (Gen. ii. 14), the capital of which was Nineveh (Gen. x. 11, &c.). It derived its name apparently from Asshur, the son of Shem (Gen. x. 22 [1 Chr. i. 17]), who in later times was worshipped as their chief god by the Assyrians. [Asshur occurs also Gen. x. 11 (probably); Num. xxiv. 22, 24; Ez. xxvii. 23, xxxii. 22; Hos. xiv. 3, as the name of the country or people.] The boundaries of Assyria differed greatly at different periods. Probably in the earliest times it was confined to a small tract of low country between the *Gebel Yakhub* and the Lesser Zab, or *Zab Asfal*, lying chiefly on the left bank of the Tigris. Gradually its limits were extended, until it came to be regarded as comprising the whole region between the Armenian mountains (lat. 37° 30′) upon the north, and upon the south the country about Baghdad (lat. 33° 30′). Eastward its boundary was the high range of Zagros, or mountains of *Kurdistan*; westward, it was, according to the views of some, bounded by the Mesopotamian desert, while, according to others, it reached the Euphrates. Taking the greatest of these dimensions, Assyria may be said to have extended in a direction from N. E. to S. W. a distance of nearly 500 miles, with a width varying from 350 to 100 miles. Its area would thus a little exceed 100,000 square miles, or about equal that of Italy.

1. *General character of the country.* — The country within these limits is of a varied character. On the north and east the high mountain-chains of Armenia and Kurdistan are succeeded by low ranges of limestone hills of a somewhat arid aspect, which detach themselves from the principal ridges, running parallel to them, and occasionally inclosing, between their northern or northeastern flank and the main mountain-line, rich plains and fertile valleys. To these ridges there succeeds at first an

Digitized by Google

undulating zone of country, well watered and fairly productive, which finally sinks down with some suddenness upon the great Mesopotamian plain, the modern district of *El-Jezireh*. This vast flat, which extends in length for 250 miles from the latitude of *Mardin* (37° 20') to that of *Tekrit* (34° 33'), and which is, in places, of nearly equal width, is interrupted only by a single limestone range — a narrow ridge rising abruptly out of the plain; which, splitting off from Zagros in lat. 33° 30', may be traced under the names of *Sarazir*, *Hamrin*, and *Sinjar*, from *Iwan* in Luristan nearly to *Rakkah* on the Euphrates. "From all parts of the plain the Sinjar is a beautiful object. Its limestone rocks, wooded here and there with dwarf oak, are of a rich golden color; and the numberless ravines which furrow its sides form ribs of deep purple shadow" (Layard, *Nineveh and Babylon*, p. 265). Above and below this barrier, stretching southward and westward further than the eye can reach, and extending northward and eastward 70 or 80 miles to the hill-country before mentioned, is an immense level tract, now for the most part a wilderness, scantly watered on the right bank of the Tigris, but abundantly supplied on the left, which bears marks of having been in early times throughout well cultivated and thickly peopled. This plain is not alluvial, and most parts of it are even considerably raised above the level of the rivers. It is covered in spring time with the richest vegetation, presenting to the eye a carpet of flowers, varying in hue from day to day; but as the summer advances it is parched up, and gradually changes to an arid and yellow waste, except along the courses of the rivers. All over this vast flat, on both sides of the Tigris, rise "grass-covered heaps, marking the site of ancient habitations" (Layard, p. 245). Mr. Layard counted from one spot nearly a hundred (*Nineveh and its Remains*, i. 315); from another, above 200 of these lofty mounds (*Nin. and Bab.* p. 245). Those which have been examined have been uniformly found to present appearances distinctly connecting them with the remains of Nineveh. [NINEVEH.] It may therefore be regarded as certain that they belong to the time of Assyrian greatness, and thus they will serve to mark the extent of the real Assyrian dominion. They are numerous on the left bank of the Tigris from *Bavian* to the *Diyaleh*, and on the right they thickly stud the entire country both north and south of the *Sinjar* range, extending eastward beyond the *Khabour* (Layard, chs. xii.-xiv.), northward to *Mardin*, and southward to the vicinity of Baghdad.

2. *Provinces of Assyria.* — Assyria in Scripture is commonly spoken of in its entirety, and unless the *Huzzab* (הֻצַּב) of Nahum (ii. 7) is an equivalent for the Adiabene of the geographers, no name of a district can be said to be mentioned. The classical geographers, on the contrary, divided Assyria into a number of regions — Strabo (xvi. § 1 and § 4) into *Aturia*, *Arbelitis*, *Artacene*, *Apolloniatis*, *Chalonitis*, *Dolomene*, *Calachene*, *Adiabene*, *Mesopotamia*, &c.; Ptolemy (vi. 1) into *Arrapachitis*, *Adiabene*, the *Garamæan* country, *Apolloniatis*, *Arbelitis*, the country of the *Sambatæ*, *Calacine*, and *Sittacene*. These regions appear to be chiefly named from cities, as Arbelitis from Arbela; Calacene (or Calachine) from Calah or Halah (Gen. x. 11; 2 K. xvii. 6); Apolloniatis from Apollonia; Sittacene from Sittace, &c. Adiabene, however, the richest region of all, derived its appellation from the *Zab* (*Diab*) rivers on which it lay as Ammianus Marcellinus informs us (xxiii. 20) Ptolemy (v. 18) made Mesopotamia (which he understood literally as the whole country between the Euphrates and the Tigris) distinct from Assyria, just as the sacred writers distinguish אֲרַם נַהֲרַיִם from אַשּׁוּר. Strabo (xvi. § 1) extended Assyria to the Euphrates, and even across it into Arabia and Syria!

3. *Chief cities.* — The chief cities of Assyria in the time of its greatness appear to have been the following: — Nineveh, which is marked by the mounds opposite Mosul (*Nebbi-Yunus* and *Koyunjik*): Calah or Halah, now *Nimrud*; Asshur, now *Kileh Sherghat*; Sargina or Dur-Sargina, now *Khorsabad*; Arbela, still *Arbil*; Opis, at the junction of the *Diyaleh* with the Tigris; and Sittace, a little further down the latter river, if this place should not rather be reckoned to Babylonia.

4. *Nations bordering on Assyria.* — Towards the north, Assyria bordered on the strong and mountainous region of Armenia, which may have been at times under Assyrian dominion, but was never reckoned an actual part of the country. (See 2 K. xix. 37.) Towards the east her neighbors were originally a multitude of independent tribes, scattered along the Zagros chain, who have their fitting representatives in the modern Kurds and Lurs — the real sovereigns of that mountain-range. Beyond these tribes lay Media, which ultimately subjected the mountaineers, and was thereby brought into direct contact with Assyria in this quarter. On the south, Elam or Susiana was the border-state east of the Tigris, while Babylonia occupied the same position between the rivers. West of the Euphrates was Arabia, and higher up Syria, and the country of the Hittites, which last reached from the neighborhood of Damascus to Anti-Taurus and Amanus.

5. *History of Assyria — original peopling.* — On the subject of the original peopling and early condition of Assyria we have more information than is generally possessed with regard to the first beginnings of nations. Scripture informs us that Assyria was peopled from Babylon (Gen. x 11), and both classical tradition and the monuments of the country agree in this representation. In Herodotus (i. 7), Ninus, the mythic founder of Nineveh, is the son (descendant) of Belus, the mythic founder of Babylon — a tradition in which the derivation of Assyria from Babylon, and the greater antiquity and superior position of the latter in early times are shadowed forth sufficiently. That Ctesias (ap. Diod. Sic. ii. 7) inverts the relation, making Semiramis (according to him, the wife and successor of Ninus) found Babylon, is only one out of ten thousand proofs of the untrustworthy character of his history. The researches recently carried on in the two countries clearly show, not merely by the statements which are said to have been deciphered on the historical monuments, but by the whole character of the remains discovered, that Babylonian greatness and civilization was earlier than Assyrian, and that while the former was of native growth the latter was derived from the neighboring country. The cuneiform writing, for instance, which is rapidly punched with a very simple instrument upon moist clay, but is only with much labor and trouble inscribed by the chisel upon rock, must

Digitized by Google

have been invented in a country where men "had brick for stone" (Gen. xi. 3), and have thence passed to one where the material was unsuited for it. It may be observed also, that while writing occurs in a very rude form in the earlier Babylonian ruins (Loftus's *Chaldæa*, p. 169), and gradually improves in the later ones, it is in Assyria uniformly of an advanced type, having apparently been introduced there after it had attained to perfection.

6. *Date of the foundation of the kingdom.* — With respect to the exact date at which Assyria became a separate and independent country, there is an important difference between classical authorities. Herodotus and Ctesias were widely at variance on this point, the latter placing the commencement of the empire almost a thousand years before the former! Scripture does but little to determine the controversy; that little, however, is in favor of the earlier author. Geographically — as a *country* — Assyria was evidently known to Moses (Gen. ii. 14, xxv. 18; Num. xxiv. 22, 24); but it does not appear in Jewish history as a *kingdom* till the reign of Menahem (ab. B. C. 770). In Abraham's time (B. C. 1900?) it is almost certain that there can have been no Assyrian kingdom, or its monarch would have been found among those who invaded Palestine with Chedorlaomer (Gen. xiv. 1). In the time of the early Judges (B. C. 1400?) Assyria, if it existed, can have been of no great strength; for Chushan-Rishathaim, the first of the foreigners who oppressed Israel (Judg. iii. 8), is master of the whole country between the rivers (*Aram-Naharaim* = "Syria between the two rivers"). These facts militate strongly against the views of Ctesias, whose numbers produce for the founding of the empire the date of B. C. 2182 (Clinton, *F. H.* i. 263). The more modest account of Herodotus is at once more probable in itself, more agreeable to Scripture, and more in accordance with the native writer Berosus. Herodotus relates that the Assyrians were "lords of Asia" for 520 years, when their empire was partially broken up by a revolt of the subject-nations (i. 95). After a period of anarchy, the length of which he does not estimate, the Median kingdom was formed, 179 years before the death of Cyrus, or B. C. 708. He would thus, it appears, have assigned to the foundation of the Assyrian empire a date not very greatly anterior to B. C. 1228. Berosus, who made the empire last 526 years to the reign of Pul (ap. Euseb. *Chron. Can.* i. 4), must have agreed nearly with this view; at least he would certainly have placed the rise of the kingdom within the 13th century. This is, perhaps, the utmost that can be determined with any approach to certainty. If, for convenience' sake, a more exact date be desired, the conjecture of Dr. Brandis has some claim to be adopted, which fixes the year B. C. 1273 as that from which the 526 years of Berosus are to be reckoned (*Rerum Assyriarum Tempora Emendata*, p. 17).

7. *Early kings, from the foundation of the kingdom to Pul.* — The long list of Assyrian kings, which has come down to us in two or three forms, only slightly varied (Clint. *F. H.* i. 267), and which is almost certainly derived from Ctesias, must of necessity be discarded, together with his date for the kingdom. It covers a space of above 2300 years, and bears marks besides of audacious fraud, being composed of names snatched from all quarters, Arian, Semitic, and Greek, — names of gods, names of towns, names of rivers, — and in its estimate of time presenting the impossible average of 34 or 35 years to a reign, and the very improbable phenomenon of reigns in half the instances amounting exactly to a decimal number. Unfortunately we have no authentic list to substitute for the forgery of Ctesias. Berosus spoke of 45 kings as reigning during his period of 526 years, and mentioned all their names (Euseb. l. s. c.); but they have unluckily not been preserved to us. The work of Herodotus on Assyrian history (Herod. i 106 and 184) has likewise entirely perished; and neither Greek nor Oriental sources are available to supply the loss, which has hitherto proved irreparable. Recently the researches in Mesopotamia have done something towards filling up this sad gap in our knowledge; but the reading of names is still so doubtful that it seems best, in the present condition of cuneiform inquiry, to treat the early period of Assyrian history in a very general way, only mentioning kings by name when, through the satisfactory identification of a cuneiform royal designation with some name known to us from sacred or profane sources, firm ground has been reached, and serious error rendered almost impossible.

The Mesopotamian researches have rendered it apparent that the original seat of government was not at Nineveh. The oldest Assyrian remains have been found at *Kileh-Sherghat*, on the right bank of the Tigris, 60 miles south of the later capital, and this place the monuments show to have been the residence of the earliest kings, as well as of the Babylonian governors who previously exercised authority over the country. The ancient name of the town appears to have been identical with that of the country, namely, *Asshur*. It was built of brick, and has yielded but a very small number of sculptures. The kings proved to have reigned there are fourteen in number, divisible into three groups; and their reigns are thought to have covered a space of nearly 350 years, from B. C. 1273 to B. C. 930. The most remarkable monarch of the series was called Tiglath-Pileser. He appears to have been king towards the close of the twelfth century, and thus to have been contemporary with Samuel. He overran the whole country between Assyria Proper and the Euphrates; swept the valley of the Euphrates from south to north, from the borders of Babylon to Mount Taurus; crossed the Euphrates, and contended in northern Syria with the Hittites; invaded Armenia and Cappadocia; and claims to have subdued *forty-two* countries "from the channel of the Lower Zab (*Zab Asfal*) to the Upper Sea of the Setting Sun." All this he accomplished in the first five years of his reign. At a later date he appears to have suffered defeat at the hands of the king of Babylon, who had invaded his territory and succeeded in carrying off to Babylon various idols from the Assyrian temples.

The other monarchs of the *Kileh-Sherghat* series, both before and after Tiglath-Pileser, are comparatively insignificant. The later kings of the series are only known to us as the ancestors of the two great monarchs, Sardanapalus the first, and his son Shalmaneser or Shalmanubar, who were among the most warlike of the Assyrian princes. Sardanapalus the first, who appears to have been the warlike Sardanapalus of the Greeks (Suidas, *s. v.*; comp. Hellan. *Fr.* 158), transferred the seat of government from *Kileh-Sherghat* to *Nimrud* (probably the Scriptural Calah), where he built the first of those magnificent palaces which have recently been

Digitized by Google

exhumed by our countrymen. A great portion of the Assyrian sculptures now in the British Museum are derived from this edifice. A description of the building has been given by Mr. Layard (*Nin. and its Remains*, vol. ii. ch. 11). By an inscription repeated more than a hundred times upon its sculptures, we learn that Sardanapalus carried his arms far and wide through Western Asia, warring on the one hand in Lower Babylonia and Chaldæa, on the other in Syria and upon the coast of the Mediterranean. His son, Shalmaneser or Shalmanubar, the monarch who set up the Black Obelisk, now in the British Museum, to commemorate his victories, was a still greater conqueror. He appears to have overrun Cappadocia, Armenia, *Azerbijan*, great portions of Media Magna, the Kurdish mountains, Babylonia, Mesopotamia, Syria, and Phœnicia; everywhere making the kings of the countries tributary to him. If we may trust the reading of certain names, on which cuneiform scholars appear to be entirely agreed, he came in contact with various Scriptural personages, being opposed in his Syrian wars by Benhadad and Hazael, kings of Damascus, and taking tribute from Jehu, king of Israel. His son and grandson followed in his steps, but scarcely equalled his glory. The latter is thought to be identical with the Biblical Pul, Phul, or Phaloch [PUL], who is the first of the Assyrian kings of whom we have mention in Scripture.

8. *The kings from Pul to Esarhaddon.* — The succession of the Assyrian kings from Pul almost to the close of the empire is rendered tolerably certain, not merely by the inscriptions, but also by the Jewish records. In the 2d book of Kings we find the names of Pul, Tiglath-Pileser, Shalmaneser, Sennacherib, and Esarhaddon, following one another in rapid succession (2 K. xv. 19 and 29, xvii. 3, xviii. 13, xix. 37); and in Isaiah we have the name of "Sargon, king of Assyria" (xx. 1), who is a contemporary of the prophet, and who must evidently therefore belong to the same series. The inscriptions, by showing us that Sargon was the father of Sennacherib, fix his place in the list, and give us for the monarchs of the last half of the 8th and the first half of the 7th century B. C. the (probably) complete list of Tiglath-Pileser II., Shalmaneser II., Sargon, Sennacherib, and Esarhaddon. It is not intended in this place to enter into any detailed account of the actions of these kings, which will be more properly related in the articles specially devoted to them. [PUL, SHALMANESER, SARGON, &c.] A few remarks, however, will be made on the general condition of the empire at this period.

9. *Establishment of the Lower Dynasty.* — It seems to be certain that at, or near, the accession of Pul, a great change of some kind or other occurred in Assyria. Berosus is said to have brought his grand dynasty of 45 kings in 526 years to a close at the reign of Pul (Polyhist. ap. Euseb. I. s. c.), and to have made him the first king of a new series. By the synchronism of Menahem (2 K. xv. 19), the date of Pul may be determined to about B. C. 770. It was only 23 years later, as we find by the Canon of Ptolemy, that the Babylonians considered their independence to have commenced (B. C. 747). Herodotus probably intended to assign nearly to this same era the great commotion which (according to him) broke up the Assyrian empire into a number of fragments, out of which were formed the Median and other kingdoms. These traditions may none of them be altogether trustworthy; but their coincidence is at least remarkable, and seems to show that about the middle of the eighth century B. C. there must have been a break in the line of Assyrian kings, — a revolution, foreign or domestic, — and a consequent weakening or dissolution of the bonds which united the conquered nations with their conquerors.

It was related by Bion and Polyhistor (Agathias, ii. 25), that the original dynasty of Assyrian kings ended with a certain Belochus or Beleûs, who was succeeded by a usurper (called by them Beletaras or Balatorus), in whose family the crown continued until the destruction of Nineveh. The general character of the circumstances narrated, combined with a certain degree of resemblance in the names, — for Belochus is close upon Phaloch, and Beletaras may represent the second element in Tiglath-*Pileser* (who in the inscriptions is called "Tiglath-*Palatsira*"), — induce a suspicion that probably the Pul or Phaloch of Scripture was really the last king of the old monarchy, and that Tiglath Pileser II., his successor, was the founder of what has been called the "Lower Empire." It may be suspected that Berosus really gave this account, and that Polyhistor, who repeated it, has been misreported by Eusebius. The synchronism between the revolution in Assyria and the era of Babylonian independence is thus brought almost to exactness, for Tiglath-Pileser is known to have been upon the throne about B. C. 740 (Clinton, *F. H.* i. 278), and may well have ascended it in B. C. 747.

10. *Supposed loss of the empire at this period.* — Many writers of repute — among them Clinton and Niebuhr — have been inclined to accept the statement of Herodotus with respect to the breaking up of the whole empire at this period. It is evident, however, both from Scripture and from the monuments, that the shock sustained through the domestic revolution has been greatly exaggerated. Niebuhr himself observes (*Vorträge über alte Geschichte*, i. 38) that after the revolution Assyria soon "recovered herself, and displayed the most extraordinary energy." It is plain, from Scripture, that in the reigns of Tiglath-Pileser, Shalmaneser, Sargon, Sennacherib, and Esarhaddon, Assyria was as great as at any former era. These kings all warred successfully in Palestine and its neighborhood; some attacked Egypt (Is. xx. 4); one appears as master of Media (2 K. xvii. 6); while another has authority over Babylon, Susiana, and Elymais (2 K. xvii. 24; Ezr. iv. 9). So far from our observing symptoms of weakness and curtailed dominion, it is clear that at no time were the Assyrian arms pushed further, or their efforts more sustained and vigorous. The Assyrian annals for the period are in the most complete accordance with these representations. They exhibit to us the above-mentioned monarchs as extending their dominions further than any of their predecessors. The empire is continually rising under them, and reaches its culminating point in the reign of Esarhaddon. The statements of the inscriptions on these subjects are fully borne out by the indications of greatness to be traced in the architectural monuments. No palace of the old monarchy equalled, either in size or splendor, that of Sennacherib at Nineveh. No series of kings belonging to it left buildings at all to be compared with those which were erected by Sargon, his son, and his grandson. The magnificent remains at *Koyunjik* and *Khorsabad* belong entirely to these later kings, while those at *Nimrud* are about equally divided between them and their

Digitized by Google

predecessors. It is further noticeable that the writers who may be presumed to have drawn from Berosus, as Polyhistor and Abydenus, particularly expatiated upon the glories of these later kings. Polyhistor said (ap. Euseb. i. 5) that Sennacherib conquered Babylon, defeated a Greek army in Cilicia, and built there Tarsus, the capital. Abydenus related the same facts, except that he substituted for the Greek army of Polyhistor a Greek fleet; and added, that Esarhaddon (his Axerdis) conquered lower Syria and Egypt (*ibid.* i. 9). Similarly Menander, the Tyrian historian, assigned to Shalmaneser an expedition to Cyprus (ap. Joseph. *Ant. Jud.* ix. 14), and Herodotus himself admitted that Sennacherib invaded Egypt (ii. 141). On every ground it seems necessary to conclude that the second Assyrian kingdom was really greater and more glorious than the first; that under it the limits of the empire reached their fullest extent, and the internal prosperity was at the highest.

The statement of Herodotus is not, however, without a basis of truth. It is certain that Babylon, about the time of Tiglath-Pileser's accession, ventured upon a revolt, which she seems afterwards to have reckoned the commencement of her independence [BABYLON]. The knowledge of this fact may have led Herodotus into his error, for he would naturally suppose that when Babylon became free there was a general dissolution of the empire. It has been shown that this is far from the truth; and it may further be observed that, even as regards Babylon, the Assyrian loss was not permanent. Sargon, Sennacherib, and Esarhaddon all exercised full authority over that country, which appears to have been still an Assyrian fief at the close of the kingdom.

11. *Successors of Esarhaddon.* — By the end of the reign of Esarhaddon the triumph of the Assyrian arms had been so complete that scarcely an enemy was left who could cause her serious anxiety. The kingdoms of Hamath, of Damascus, and of Samaria had been successively absorbed; Phœnicia had been conquered; Judæa had been made a feudatory; Philistia and Idumæa had been subjected, Egypt chastised, Babylon recovered, cities planted in Media. Unless in Armenia and Susiana there was no foe left to chastise, and the consequence appears to have been that a time of profound peace succeeded to the long and bloody wars of Sargon and his immediate successors. In Scripture it is remarkable that we hear nothing of Assyria after the reign of Esarhaddon, and profane history is equally silent until the attacks begin which brought about her downfall. The monuments show that the son of Esarhaddon, who was called Sardanapalus by Abydenus (ap. Euseb. i. 9), made scarcely any military expeditions, but occupied almost his whole time in the enjoyment of the pleasures of the chase. Instead of adorning his residence — as his predecessors had been accustomed to do — with a record and representation of his conquests, Sardanapalus II. covered the walls of his palace at Nineveh with sculptures exhibiting his skill and prowess as a hunter. No doubt the military spirit rapidly decayed under such a ruler, and the advent of fresh enemies, synchronizing with this decline, produced the ruin of a power which had for six centuries been dominant in Western Asia.

12. *Fall of Assyria.* — The fall of Assyria, long previously prophesied by Isaiah (x. 5–19), was effected (humanly speaking) by the growing strength and boldness of the Medes. If we may trust Herodotus, the first Median attack on Nineveh took place about the year B. C. 633. By what circumstances this people, who had so long been engaged in contests with the Assyrians, and had hitherto shown themselves so utterly unable to resist them, became suddenly strong enough to assume an aggressive attitude, and to force the Ninevites to submit to a siege, can only be conjectured. Whether mere natural increase, or whether fresh immigrations from the east, had raised the Median nation at this time so far above its former condition, it is impossible to determine. We can only say that, soon after the middle of the seventh century they began to press upon the Assyrians, and that, gradually increasing in strength, they proceeded, about the year B. C. 633, to attempt the conquest of the country. For some time their efforts were unsuccessful; but after a while, having won over the Babylonians to their side, they became superior to the Assyrians in the field, and about B. C. 625, or a little earlier, laid final siege to the capital [MEDIA]. Saracus, the last king, — probably the grandson of Esarhaddon, — made a stout and prolonged defense, but at length, finding resistance vain, he collected his wives and his treasures in his palace, and with his own hand setting fire to the building, perished in the flames. This account is given in brief by Abydenus, who probably follows Berosus; and its outline so far agrees with Ctesias (ap. Diod. ii. 27) as to give an important value to that writer's details of the siege. [NINEVEH.] In the general fact that Assyria was overcome, and Nineveh captured and destroyed, by a combined attack of Medes and Babylonians, Josephus (*Ant. Jud.* x. 5) and the book of Tobit (xiv. 15) are agreed. Polyhistor also implies it (ap. Euseb. i. 5); and these authorities must be regarded as outweighing the silence of Herodotus, who mentions only the Medes in connection with the capture (i. 106), and says nothing of the Babylonians.

13. *Fulfillment of prophecy.* — The prophecies of Nahum and Zephaniah (ii. 13–15) against Assyria were probably delivered shortly before the catastrophe. The date of Nahum is very doubtful [NAHUM], but it is not unlikely that he wrote about B. C. 645, towards the close of the reign of Manasseh. Zephaniah is even later, since he prophesied under Josiah, who reigned from B. C. 639 to 608. If B. C. 625 be the date of the destruction of Nineveh, we may place Zephaniah's prophecy about B. C. 630. Ezekiel, writing about B. C. 584, bears witness historically to the complete destruction which had come upon the Assyrians, using the example as a warning to Pharaoh-Hophra and the Egyptians (ch. xxxi.).

It was declared by Nahum emphatically, at the close of his prophecy, that there should be "no healing of Assyria's bruise" (iii. 19). In accordance with this announcement we find that Assyria never rose again to any importance, nor even succeeded in maintaining a distinct nationality. Once only was revolt attempted, and then in conjunction with Armenia and Media, the latter heading the rebellion. This attempt took place about a century after the Median conquest, during the troubles which followed upon the accession of Darius Hystaspis. It failed signally, and appears never to have been repeated, the Assyrians remaining thenceforth submissive subjects of the Persian empire. They were reckoned in the same satrapy with Babylon (Herod. iii. 92; comp. i. 192), and paid an annual tribute of a thousand talents of silver. In

Digitized by Google

the Persian armies, which were drawn in great part from the subject-nations, they appear never to have been held of much account, though they fought, in common with the other levies, at Thermopylæ, at Cunaxa, at Issus, and at Arbela.

14. *General character of the empire.* — In considering the general character of the Assyrian empire, it is, in the first place, to be noticed, that like all the early monarchies which attained to any great extent, it was composed of a number of separate kingdoms. In the East, conquest has scarcely ever been followed by amalgamation, and in the primitive empires there was not even any attempt at that governmental centralization which we find at a later period in the satrapial system of Persia. As Solomon "reigned over *all the kingdoms* from the river (Euphrates) unto the land of the Philistines and the border of Egypt," so the Assyrian monarchs bore sway over a number of petty kings — the native rulers of the several countries — through the entire extent of their dominions. These native princes — the sole governors of their own kingdoms — were feudatories of the Great Monarch, of whom they held their crown by the double tenure of homage and tribute. Menahem (2 K. xv. 19), Hoshea (*ibid.* xvii. 4), Ahaz (*ibid.* xvi. 8), Hezekiah (*ibid.* xviii. 14), and Manasseh (2 Chr. xxxiii. 11–13), were certainly in this position, as were many native kings of Babylon, both prior and subsequent to Nabonassar; and this system (if we may trust the inscriptions) was universal throughout the empire. It naturally involved the frequent recurrence of troubles. Princes circumstanced as were the Assyrian feudatories would be always looking for an occasion when they might revolt and reëstablish their independence. The offer of a foreign alliance would be a bait which they could scarcely resist, and hence the continual warnings given to the Jews to beware of trusting in Egypt. Apart from this, on the occurrence of any imperial misfortune or difficulty, such for instance as a disastrous expedition, a formidable attack, or a sudden death, natural or violent, of the reigning monarch, there would be a strong temptation to throw off the yoke, which would lead, almost of necessity, to a rebellion. The history of the kings of Israel and Judah sufficiently illustrates the tendency in question, which required to be met by checks and remedies of the severest character. The deposition of the rebel prince, the wasting of his country, the plunder of his capital, a considerable increase in the amount of the tribute thenceforth required, were the usual consequences of an unsuccessful revolt; to which were added, upon occasion, still more stringent measures, as the wholesale execution of those chiefly concerned in the attempt, or the transplantation of the rebel nation to a distant locality. The captivity of Israel is only an instance of a practice long previously known to the Assyrians, and by them handed on to the Babylonian and Persian governments.

It is not quite certain how far Assyria required a religious conformity from the subject people. Her religion was a gross and complex polytheism, comprising the worship of thirteen principal and numerous minor divinities, at the head of the whole of whom stood the chief god, Asshur, who seems to be the deified patriarch of the nation (Gen. x. 22). The inscriptions appear to state that in all countries over which the Assyrians established their supremacy, they set up "the laws of Asshur," and "altars to the Great Gods." It was probably in connection with this Assyrian requirement that Ahaz, on his return from Damascus, where he had made his submission to Tiglath-Pileser, incurred the guilt of idolatry (2 K. xvi. 10–16). The history of Hezekiah would seem, however, to show that the rule, if resisted, was not rigidly enforced; for it cannot be supposed that he would have consented to reëstablish the idolatry which he had removed, yet he certainly came to terms with Sennacherib, and resumed his position of tributary (2 K. xviii. 14). In any case it must be understood that the worship which the conquerors introduced was not intended to supersede the religion of the conquered race, but was only required to be superadded as a mark and badge of subjection.

15. *Its extent.* — With regard to the extent of the empire very exaggerated views have been entertained by many writers. Ctesias took Semiramis to India, and made the empire of Assyria at least co-extensive with that of Persia in his own day. This false notion has long been exploded, but even Niebuhr appears to have believed in the extension of Assyrian influence over Asia Minor, in the expedition of Memnon — whom he considered an Assyrian — to Troy, and in the derivation of the Lydian Heracleids from the first dynasty of Ninevite monarchs (*Alt. Geschicht.* i. 28–9). The information derived from the native monuments tends to contract the empire within more reasonable bounds, and to give it only the expansion which is indicated for it in Scripture. On the west, the Mediterranean and the river Halys appear to have been the boundaries; on the north, a fluctuating line, never reaching the Euxine nor extending beyond the northern frontier of Armenia; on the east, the Caspian Sea and the Great Salt Desert; on the south, the Persian Gulf and the Desert of Arabia. The countries included within these limits are the following: — Susiana, Chaldæa, Babylonia, Media, Matiene, Armenia, Assyria Proper, Mesopotamia, parts of Cappadocia and Cilicia, Syria, Phœnicia, Palestine, and Idumæa. Cyprus was also for a while a dependency of the Assyrian kings, and they may perhaps have held at one time certain portions of Lower Egypt. Lydia, however, Phrygia, Lycia, Pamphylia, Pontus, Iberia, on the west and north, Bactria, Sacia, Parthia, India, — even Carmania and Persia Proper, — upon the east, were altogether beyond the limit of the Assyrian sway, and appear at no time even to have been overrun by the Assyrian armies.

16. *Civilization of the Assyrians.* — The civilization of the Assyrians, as has been already observed, was derived originally from the Babylonians. They were a Semitic race, originally resident in Babylonia (which at that time was Cushite), and thus acquainted with the Babylonian inventions and discoveries, who ascended the valley of the Tigris and established in the tract immediately below the Armenian mountains a separate and distinct nationality. Their modes of writing and building, the form and size of their bricks, their architectural ornamentation, their religion and worship, in a great measure, were drawn from Babylon, which they always regarded as a sacred land — the original seat of their nation, and the true home of all their gods, with the one exception of Asshur. Still, as their civilization developed, it became in many respects peculiar. Their art is of home growth. The alabaster quarries in their neighborhood supplied them with a material unknown to their southern neighbors, on which they could represent

Digitized by Google

far better than upon enamelled bricks, the scenes which interested them. Their artists, faithful and laborious, acquired a considerable power of rendering the human and animal forms, and made vivid and striking representations of the principal occupations of human life. If they do not greatly affect the ideal, and do not, in this branch, attain to any very exalted rank, yet even here their emblematic figures of the gods have a dignity and grandeur which is worthy of remark, and which implies the possession of some elevated feelings. But their chief glory is in the representation of the actual. Their pictures of war, and of the chase, and even sometimes of the more peaceful incidents of human life, have a fidelity, a spirit, a boldness, and an appearance of life, which place them high among realistic schools. Their art, it should be also noted, is progressive. Unlike that of the Egyptians, which continues comparatively stationary from the earliest to the latest times, it plainly advances, becoming continually more natural and less uncouth, more life-like and less stiff, more varied and less conventional. The latest sculptures, which are those in the hunting-palace of the son of Esarhaddon, are decidedly the best. Here the animal-forms approach perfection; and in the striking attitudes, the new groupings, and the more careful and exact drawing of the whole, we see the beginnings of a taste and a power which might have expanded under favorable circumstances into the finished excellence of the Greeks.

The advanced condition of the Assyrians in various other respects is abundantly evidenced alike by the representations on the sculptures and by the remains discovered among their buildings. They are found to have understood and applied the arch; to have made tunnels, aqueducts, and drains; to have used the lever and the roller; to have engraved gems; to have understood the arts of inlaying, enamelling, and overlaying with metals; to have manufactured glass, and been acquainted with the lens; to have possessed vases, jars, bronze and ivory ornaments, dishes, bells, ear-rings, mostly of good workmanship and elegant forms — in a word, to have attained to a very high pitch of material comfort and prosperity. They were still, however, in the most important points barbarians. Their government was rude and inartificial; their religion coarse and sensual; their conduct of war cruel; even their art materialistic, and so debasing; they had served their purpose when they had prepared the East for centralized government, and been God's scourge to punish the people of Israel (Is. x. 5–6); they were, therefore, swept away to allow the rise of that Arian race which, with less appreciation of art, was to introduce into Western Asia a more spiritual form of religion, a better treatment of captives, and a superior governmental organization.

(See for the geography Capt. Jones's paper in the xiv^th^ volume of the *Asiatic Society's Journal* (part 2); Col. Chesney's *Euphrates Expedition*; Mr. Layard's Works; Rich's *Kurdistan*, &c. For the historical views, Rawlinson's *Herodotus*, vol. i.; Brandis's *Rerum Assyriarum Tempora Emendata*; Sir H. Rawlinson's *Contributions to the Asiat. Soc. Journ.* and the *Athenæum*; Bosanquet's *Sacred and Profane Chronology*; M. Oppert's *Rapport : son Excellence M. le Ministre de l'Instruction*; Dr. Hincks's *Contributions to the Dublin University Mag.*; Mr. Vance Smith's *Exposition of the Prophecies relating to Nineveh and Assyria*; and comp. B. G. Niebuhr's *Vorträge über alter Geschichte*, vol. i.; Clinton's *Fasti Hell.*, vol. i.; and M. Niebuhr's *Geschichte Assur's und Babel's.*) G. R.

* The work of Mr. Rawlinson, the writer of the preceding article, is now the classical work on this subject: *The Five Great Monarchies of the Ancient Eastern World; or, the History, Geography, and Antiquities of Chaldæa, Assyria, Babylon, Media, and Persia* (vols. i. to iii. London. 1862–65). For some of the important Biblical connections, Dr. Pusey's *Introduction to Jonah* (pp. 247–54) may be read with advantage. There is a good account of the Assyrian inscriptions, and of the progress made in reading them, as well as other information, by Spiegel, in Herzog's *Real-Encyk.*, art. *Ninive und Assyrien*, vol. x. pp. 361–81, and supplementary article, vol. xx. pp. 219–235. See also the elaborate article on Assyria by Brandis, in the 2d ed. (1866) of the first vol. of Pauly's *Real-Encyclopädie*, where will be found a very full account of the literature of the subject. H.

ASSYRIANS (אַשּׁוּר: Ἀσσύριοι, Ἀσσούρ, υἱοὶ Ἀσσούρ: *Assur, Assyrii, filii Assyriorum*). The inhabitants of Assyria. The name in Hebrew is simply *Asshur*, the same as that of the country, and there appears to be no reason in most cases for translating it as a gentilic (Is. x. 5, 24, xiv. 25, xxxi. 8; Lam. v. 6; Ez. xvi. 28; Jud. xii. 13, &c.) W. A. W.

ASTAROTH (עַשְׁתָּרֹת: Ἀσταρώθ: *Astaroth*), Deut. i. 4. [ASHTAROTH.]

ASTARTE. [ASHTORETH.]

ASTATH (Ἀστάθ: *Ezead*), 1 Esdr. viii. 38. [AZGAD.]

* **ASTROLOGER.** [DIVINATION; MAGI; STAR.]

ASTRONOMY. [MAGI; STAR OF THE WISE MEN.]

ASTYAGES (Ἀστυάγης; Herod. Ἀστυάγας, Ctes. Ἀσπιδᾶς), the last king of the Medes B. C. 595–560, or B. C. 592–558, who was conquered by Cyrus (Bel and Dragon, 1). The name is identified by Rawlinson and Niebuhr (*Gesch Assur's*, p. 32) with Deioces = Ashdahâk (*Arm.*) Ajis Dahâka (*Pers.*), "*the biting snake*," the emblem of the Median power. [DARIUS THE MEDE CYRUS.] B. F. W.

ASUPPIM, and HOUSE OF (הָאֲסַפִּים and בֵּית הָאֲסַפִּים: *olkos Ἐσεφίμ, ὁ Ἐσεφίμ*. [Vat. Εσεφειν, -φειμ: Alex. Ασαφειν, Εσεφειμ:] *in quâ parte domus erat seniorum concilium, ubi erat concilium*), 1 Chr. xxvi. 15, 17, literally "house of the gatherings." Some understand it as a proper name of chambers on the south side of the Temple. Gesenius and Bertheau explain it of certain store-rooms, and Fürst, following the Vulgate, of the council-chambers in the outer court of the Temple in which the elders held their deliberations. The same word in A. V. of Neh. xii. 25, is rendered "thresholds," and is translated "lintels" in the Targum of R. Joseph. W. A. W.

ASYNCRITUS (Ἀσύγκριτος [*incomparable, unlike*]: *Asyncritus*), a Christian at Rome, saluted by St. Paul (Rom. xvi. 14).

ATAD, THE THRESHING-FLOOR OF (גֹּרֶן הָאָטָד = *the floor* (or *trodden space*) *of the thorn* Sam. Vers. אדאר עטדה: Saad. العوسج!

Digitized by Google

ἅλως Ἀτάδ: *area Atad*), a spot "beyond Jordan," at which Joseph and his brethren, on their way from Egypt to Hebron, made their seven days' "great and very sore mourning" over the body of Jacob; in consequence of which we are told it acquired from the Canaanites the new name of Abel-Mitzraim (Gen. l. 10, 11). According to Jerome (*Onom.* s. v. *Areaatad*) it was in his day called Bethgla or Bethacla (Beth-Hogla), a name which he connects with the gyratory dances or races of the funeral ceremony: "locus gyri; eo quod ibi more plangentium circumierint." Beth-Hoglah is known to have lain between the Jordan and Jericho, therefore on the west side of Jordan [BETH-HOGLAH]; and with this agrees the fact of the mention of the Canaanites, "the inhabitants of the land," who were confined to the west side of the river (see amongst others verse 13 of this chapter), and one of whose special haunts was the sunken district "by the 'side' of Jordan" (Num. xiii. 29).

[CANAAN.] The word עֵבֶר, "beyond," although usually signifying the east of Jordan, is yet used for either east or west according to the position of the speaker. [EBER.] That Jerome should have defined the situation as "*trans* Jordanem," at the same time that he explains it as between the river and Jericho, may be accounted for either by the words being a mere quotation from the text, or by some subsequent corruption of copyists. The passage does not survive in Eusebius. G.

AT'ARAH (עַטָּרָה [*a crown*]: Ἀτάρα: [Alex. Ετερα:] *Atara*), a wife of Jerahmeel, and mother of Onam (1 Chr. ii. 26).

ATAR'GATIS (Ἀταργάτις, Strab. xvi. p. 785, Ἀταργατίου δὲ τὴν Ἀθάραν οἱ Ἕλληνες ἐκάλουν), or according to another form of the word DERCETO (Δερκετώ, Strab. *l. c.*; Luc. *de Syria dea*, p. 884 ed. Bened.; Plin. *H. N.* v. 19, *prodigiosa Atargatis Graecis Derceto*; Ov. *Met.* iv. 45, *Dercetis*), a Syrian goddess, represented generally with the body of a woman and the tail of a fish (Luc. *l. c.*; Ovid. *l. c.* comp. DAGON). Her most famous temples were at Hierapolis (Mabug) and Ascalon. Herodotus identified her with *Aphrodite Urania* (i. 105, compared with Diod. Sic. ii. 4). Lucian compared her with Here, though he allowed that she combined traits of other deities (Aphrodite, Rhea, Selene, &c.; see ASHTORETH). Plutarch (*Crass.* 17) says that some regarded her as "Aphrodite, others as Here, others as the cause and natural power which provides the principles and seeds for all things from moisture" (τὴν ἀρχὰς καὶ σπέρματα πᾶσιν ἐξ ὑγρῶν παρασχοῦσαν αἰτίαν καὶ φύσιν). This last view is probably an accurate description of the attributes of the goddess, and explains her fish-like form and popular identification with Aphrodite. Lucian also mentions a ceremony in her worship at Hierapolis which appears to be connected with the same belief, and with the origin of her name. Twice a year water was brought from distant places and poured into a chasm in the temple; because, he adds, according to tradition, the waters of the Deluge were drained away through that opening (*de Syria dea*, p. 883). Compare Burm. ad Ovid. *Met.* iv. 45, where most of the references are given at length; Movers, *Phönic.* i. 584 ff.

There was a temple of Atargatis (Ἀταργατεῖον, Alex. Ατεργ. — 2 Macc. xii. 26) at Karnaïn (Karnaim, 1 Macc. v. 43; i. e. *Ashtaroth-Karnaim* which was destroyed by Judas Maccabæus (1 Macc v. 44).

The name is rightly derived by Michaelis (*Lex Syr.* pp. 975 f.) from Syr. *Targeto*, an opening (*tarag*, he opened). Comp. Movers, *Phönic.* i. 594 f. Others have deduced it, with little probability, from אֲדֶר גַּד, *greatness of fortune* (?), or אַדִּיר דָּג, *great fish*. Gesenius (*Thes.* s. v. דָּגוֹן) suggests Syr. *dargeto* = *dagto*, a fish. It has been supposed that Atargatis was the tutelary goddess of the first Assyrian dynasty (*Derketadæ*, fr. Derketo: Niebuhr, *Gesch. Assur's*, pp. 131, 138), and that the name appears in *Tiglath-* or *Tilgath-*Pileser (*id.* p. 37).

An interesting coin representing Atargatis is engraved and described in the *Philosophical Transactions*, vol. lxi. pp. 346 ff.

AT'AROTH (עֲטָרוֹת, and once עֲטָרֹת = *crowns*: ἡ Ἀταρώθ: *Ataroth*), the name of several places in Palestine both on the E. and W. of Jordan.

1. [Alex. Αταρων in Num. xxxii. 3.] One of the towns in the "land of Jazer and land of Gilead" (Num. xxxii. 3), taken and "built" by the tribe of Gad (xxxii. 34). From its mention with places which have been identified on the N. E. of the Dead Sea near the mountain of *Jebel Attarûs* (عطروس), a connection has been assumed between Ataroth and that mountain. But *Jebel Attarûs* lies considerably to the S. of Heshbon (*Hesbân*), which was in the tribe of Reuben, and which is named apparently as the southernmost limit of Gad (Josh. xiii. 26), so that some other identification is necessary. Atroth-Shophan was probably in the neighborhood of Ataroth; the Shophan serving as a distinction; but for this see ATROTH.

2. [LXX. corrupt in Josh. xvi. 2.] A place on the (South?) boundary of Ephraim and Manasseh (Josh. xvi. 2, 7). The whole specification of this boundary is exceedingly obscure, and it is not possible to say whether Ataroth is or is not the same place as,

3. [In Josh. xvi., Ἀταρὰθ (Vat. Ασταρωθ) καὶ Ἐρώκ (Vat. M. Ερακ, Comp. Ald. Alex. Ἀδδάρ) in Josh. xviii., Μααταρὼβ Ὀρέχ, Vat. Μααταρωθ ορεκ, Alex. Αταρωθ Αδδαρ, Ald. Ἀταρὰθ Ἐδδάρ: *Ataroth Addar.*] ATAROTH-ADAR, or -ADDAR (עַטְרוֹת אַדָּר), on the west border of Benjamin, "near the 'mountain' that is on the south side of the nether Beth-horon" (Josh. xviii. 13). In xvi. 5 it is accurately rendered Ataroth-addar.

In the Onomasticon mention is made of an Atharoth in Ephraim, in the mountains, 4 miles N. of Sebaste: as well as of two places of the name "not far from" Jerusalem. The former cannot be that seen by Robinson (ii. 265), now *Atâra*. Robinson discovered another about 6 miles S. of Bethel (i. 575). This is too far to the E. of Beth-horon to be Ataroth-addar, and too far S. to be that on the boundary of Ephraim (2).

a * See note on ABEL-MIZRAIM. All that the Scripture account states is that Atad was "beyond the Jordan," the point of reckoning being left indeterminate. H.

4. "ATAROTH,[a] THE HOUSE OF JOAB" (*i. e.* Ataroth-beth-Joab), a place (?) occurring in the list of the descendants of Judah (1 Chr. ii. 54; Ἀταρὼθ οἴκου Ἰωάβ [Alex. Ἰωβαβ]: *Coronæ domûs Joab*).[b] G.

ATER (אָטֵר, *bound* [perh. *dumb*]: Ἀτήρ; Alex. Αττηρ in Ezr.: *Ater*). 1. The children of Ater were among the porters or gate-keepers of the Temple who returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 45). They are called in 1 Esdr. v. 28, "the sons of JATAL."

2. The children of Ater of Hezekiah, to the number of ninety-eight, returned with Zerubbabel (Ezr. ii. 16; Neh. vii 21), and were among the heads of the people who signed the covenant with Nehemiah (Neh. x. 17). The name appears in 1 Esdr. v. 15, as ATEREZIAS. W. A. W.

ATEREZI'AS (Ἀτὴρ Ἐζεκίου; [Vat. Αζηρεζεκιου; Wechel Ἀτηρεζίου:] *Aderectis*). A corruption of "Ater of Hezekiah" (1 Esdr. v. 15; comp. Ezr. ii. 16). W. A. W.

ATHACH (עֲתָךְ [*lodging-place*]: Νομβέ; [Vat. Νοο;] Alex. Αθαγ; [Comp. Ἀθδχ:] *Athach*). One of the places in the tribe of Judah, which David and his men frequented during the time of his residence at Ziklag (1 Sam. xxx. 30). As the name does not occur elsewhere, it has been suggested that it is an error of the transcriber for Ether, a town in the low country of Judah (Josh. xv. 42). W. A. W.

ATHA'IAH [3 syl.] (עֲתָיָה: Ἀθαΐα; [Vat. Αθεα: FA. Αθεε;] Alex. Αθαΐας: *Athaïas*). A descendant of Pharez, the son of Judah, who dwelt at Jerusalem after the return from Babylon (Neh. xi. 4), called UTHAI in 1 Chr. ix. 4. W. A. W.

ATHALI'AH (עֲתַלְיָה [*whom Jehovah afflicts*]: Γοθολία: *Athalia*). 1. Daughter of Ahab and Jezebel, married Jehoram the son of Jehoshaphat, king of Judah, and introduced into the S. kingdom the worship of Baal, which had already defiled and overspread the N. After the great revolution by which Jehu seated himself on the throne of Samaria, she killed all the members of the royal family of Judah who had escaped his sword (2 K. x. 14), availing herself probably of her position as *King's Mother* [ASA] to perpetrate the crime. Most likely she exercised the regal functions during Ahaziah's absence at Jezreel (2 K. ix.), and resolved to retain her power, especially after seeing the danger to which she was exposed by the overthrow of the house of Omri and of Baal-worship in Samaria. It was not unusual in those days for women in the East to attain a prominent position, their present degradation being the result of Mohammedanism. Miriam, Deborah, Abigail, are instances from the Bible, and Dido was not far removed from Athaliah, either in birthplace or date, if Carthage was founded B. C. 861 (Joseph. *c. Apion.* i. 18). From the slaughter of the royal house, one infant named Joash, the youngest son of Ahaziah, was rescued by his aunt Jehosheba, daughter of Jehoram (probably by another wife than Athaliah) who had married Jehoiada (2 Chr. xxii. 11) the high-priest (2 Chr. xxiv. 6). The child was brought up under Jehoiada's care, and concealed in the temple for six years, during which period Athaliah reigned over Judah. At length Jehoiada thought it time to produce the lawful king to the people, trusting to their zeal for the worship of God, and loyalty to the house of David, which had been so strenuously called out by Asa and Jehoshaphat. After communicating his design to five "captains of hundreds," whose names are given in 2 Chr. xxiii. 1, and securing the coöperation of the Levites and chief men in the country-towns in case of necessity, he brought the young Joash into the temple to receive the allegiance of the soldiers of the guard. It was customary on the Sabbath for a third part of them to do duty at the palace, while two thirds restrained the crowd of visitors and worshippers who thronged the temple on that day, by occupying the gate of Sur (סוּר, 2 K. xi. 6, called *of the foundation*, יְסוֹד, 2 Chr. xxiii. 5, which Gerlach, *in loco*, considers the right reading in Kings also), and the gate "behind the guard" (*porta quæ est post habitaculum scutariorum*, Vulg.), which seem to have been the N. and S. entrances into the temple, according to Ewald's description of it (*Geschichte*, iii. 306–7). On the day fixed for the outbreak there was to be no change in the arrangement at the palace, lest Athaliah, who did not worship in the temple, should form any suspicions from missing her usual guard, but the latter two thirds were to protect the king's person by forming a long and closely-serried line across the temple, and killing any one who should approach within certain limits. They were also furnished with David's spears and shields, that the work of restoring his descendant might be associated with his own sacred weapons. When the guard had taken up their position, the young prince was anointed, crowned, and presented with the Testimony or Law, and Athaliah was first roused to a sense of her danger by the shouts and music which accompanied the inauguration of her grandson. She hurried into the temple, but found Joash already standing "by a pillar," or more properly *on* it, *i. e.* on the tribunal or throne, apparently raised on a massive column or cluster of columns, which the king occupied when he attended the service on solemn occasions. The phrase in the original is עַל־עַמּוּד, rendered ἐπὶ τοῦ στύλου by the LXX. and *super tribunal* in the Vulgate, while Gesenius gives for the substantive *a stage* or *pulpit*. (Comp. 2 K. xxiii. 3, and Ez. xlvi. 2.) She arrived however too late, and was immediately put to death by Jehoida's commands, without the temple. The only other recorded victim of this happy and almost bloodless revolution, was Mattan the priest of Baal. For the view here given of the details of Jehoiada's plan, see Ewald, *Geschichte*, iii. 574 ff. The latter words of 2 K. xi. 6 in our version, "*that it be not broken down*," are probably wrong: — Ewald translates, "*according to custom*;" Gesenius gives in his Lexicon "*a keeping off*." Clinton's date for Athaliah's usurpation is B. C. 883–877. In modern times the history of Athaliah has been illustrated by the music of Handel and of Mendelssohn, and the stately declamation of Racine. G. E. L. C.

2. (Γοθολία; Alex. Γοθολιας: *Otholia*.) A Benjamite, one of the sons of Jeroham who dwelt at Jerusalem (1 Chr. viii. 26).

3. (Ἀθελία; [Vat. Αθελει;] Alex. Αθλια:

[a] The marginal note to this name in the Bibles of the present day, namely, "Azarites or crowns," &c., is a corruption of Atarites in the edition of 1611.

[b] Rendered in the margin of the A. V "Crowns of the house of Joab."

Athaăa.) One of the Bene-Elam, whose son Jeshaiah with seventy males returned with Ezra in the second caravan from Babylon (Ezr. viii. 7.)
W. A. W.

ATHARI'AS (Ἀταθαρίας: *et Astharas*), a corrupt rendering of הַתִּרְשָׁתָא, THE TIRSHATHA (1 Esdr. v. 40).

ATHENO'BIUS (Ἀθηνόβιος: [*Athenobius*]), an envoy sent by Antiochus VII. Sidetes to Simon, the Jewish high-priest (1 Macc. xv. 28–36). He is not mentioned elsewhere. B. F. W.

ATHE'NIANS (Ἀθηναῖοι: *Athenienses*). Natives of Athens (Acts xvii. 21) [and 22. For the character which Paul ascribed to them, see ATHENS].

ATHENS (Ἀθῆναι: *Athenæ*), the capital of Attica, and the chief seat of Grecian learning and civilization during the golden period of the history of Greece. This city is fully described elsewhere (*Dict. of Gr. and Rom. Geogr.* i. 255 ff.); and an account of it would be out of place in the present work. St. Paul visited it in his journey from Macedonia, and appears to have remained there some time (Acts xvii. 14, 15 ff.; comp. 1 Thess. iii. 1). During his residence there he delivered his memorable discourse on the Areopagus to the "men of Athens" (Acts xvii. 22-31) [AREOPAGUS]. In order to understand the localities mentioned in the sacred narrative, it may be observed that four hills of moderate height rise within the walls of the city. Of these one to the northeast is the celebrated

Plan of Athens, showing the position of the Agora.

Acropolis, or citadel, being a square craggy rock about 150 feet high. Immediately to the west of the Acropolis is a second hill of irregular form, but inferior height, called the Areopagus. To the southwest rises a third hill, the Pnyx, on which the assemblies of the citizens were held; and to the south of the latter is a fourth hill, known as the Museum. The Agora or "market," where St. Paul disputed daily, was situated in the valley between the Acropolis, the Areopagus, the Pnyx, and the Museum, being bounded by the Acropolis on the N. E. and E., by the Areopagus on the N., by the Pnyx on the N. W. and W., and by the Museum on the S. The annexed plan shows the position of the Agora. Many writers have maintained that there were two markets at Athens; and that a second market, usually called the new Agora, existed to the north of the Acropolis. If this were true, it would be doubtful in which of the two markets St. Paul disputed; but since the publication of Forchhammer's treatise on the Topography of Athens, it is generally admitted that there was only one Agora at Athens, namely, the one situated in the valley already described. [The subject is discussed at length in the *Dict. of Geogr.* i. 293 ff.] The remark of the sacred historian respecting the inquisitive character of the Athenians (xvii. 21) is attested by the unanimous voice of antiquity. The great Athenian orator rebukes his countrymen for their love of constantly going about in the market, and asking one another, What news? (περιϊόντες αὐτῶν πυνθάνεσθαι κατὰ τὴν ἀγοράν, λέγεταί τι καινόν; Dem. *Philipp.* i. 43, ed. Reiske). Their natural liveliness was partly owing to the purity and clearness of the atmosphere of Attica, which also allowed them to pass much of their time in the open air.

The remark of St. Paul upon the "superstitious" [A. V.][a] character of the Athenians (xvii. 22) is in like manner confirmed by the ancient writers. Thus Pausanias says that the Athenians surpassed all other states in the attention which they paid to the worship of the gods (Ἀθηναίοις περισσότερόν τι ἢ τοῖς ἄλλοις ἐς τὰ θεῖα ἐστι σπουδῆς, Paus. i. 24, § 3); and hence the city was crowded in every direction with temples, altars, and other sacred buildings. The altar "to the Unknown God," which St. Paul mentions in his address, has been spoken of under ALTAR.

[a] "This rendering is the more unfortunate as it conceals from the reader a remarkable instance of Paul's conciliatory habit in dealing with men when no principle was at stake. The Greek term (δεισιδαιμονεστέρους) is neutral, and means "very religious or "devout." In the same paragraph the rendering should be (instead of *the*) "an unknown God." H.

Digitized by Google

Of the Christian church founded by St. Paul at Athens, we have no particulars in the N. T.; but according to ecclesiastical tradition (Euseb. *H. E.* iii. 4) Dionysius the Areopagite, who was converted by the preaching of the apostle, was the first bishop of the church. [DIONYSIUS.]

ATHLAI [2 syl.] (עָתְלַי [*Jehovah afflicts*]: Θαλί; [Vat. Ζαβουθαλει;] Alex. Οθαλι: *Athalai*). One of the sons of Bebai, who put away his foreign wife at the exhortation of Ezra (Ezr. x. 28). He is called AMATHEIS in 1 Esdr. ix. 29.

W. A. W.

ATIPHA (Ἀτεφά; [Ald. Alex. Ἀτιφά:] *Agisti*), 1 Esdr. v. 32. [HATIPHA.]

ATONEMENT, THE DAY OF (יוֹם הַכִּפֻּרִים: ἡμέρα ἐξιλασμοῦ: *dies expiationum*, and *dies propitiationis*; in the Talmud, יוֹמָא, i. e. *the day*; in Philo, νηστείας ἑορτή, *Lib. de Sept.* vol. v. p. 47, edit. Tauchn.; in Acts xxvii. 9, ἡ νηστεία; in Heb. vii. 27, ἡ ἡμέρα, according to Olshausen and others; but see Ebrard's and Bengel's notes), the great day of national humiliation, and the only one commanded in the Mosaic law. [FASTS.] The mode of its observance is described in Lev. xvi., where it should be noticed that in vv. 3 to 10 an outline of the whole ceremonial is given, while in the rest of the chapter certain points are mentioned with more details. The victims which were offered in addition to those strictly belonging to the special service of the day, and to those of the usual daily sacrifice, are enumerated in Num. xxix. 7–11; and the conduct of the people is emphatically enjoined in Lev. xxiii. 26–32.

II. It was kept on the tenth day of Tisri, that is, from the evening of the ninth to the evening of the tenth of that month, five days before the Feast of Tabernacles. [FESTIVALS.] Some have inferred from Lev. xvi. 1, that the day was instituted on account of the sin and punishment of Nadab and Abihu. Maimonides (*More Nevochim*, xviii.) regards it as a commemoration of the day on which Moses came down from the mount with the second tables of the law, and proclaimed to the people the forgiveness of their great sin in worshipping the golden calf.

III. The observances of the day, as described in the law, were as follows. It was kept by the people as a solemn sabbath (σάββατα σαββάτων, LXX.). They were commanded to set aside all work and to afflict their souls," under pain of being "cut off from among the people." It was on this occasion only that the high-priest was permitted to enter into the Holy of Holies. Having bathed his person and dressed himself entirely in the holy white linen garments, he brought forward a young bullock for a sin-offering and a ram for a burnt-offering, purchased at his own cost, on account of himself and his family, and two young goats for a sin-offering with a ram for a burnt-offering, which were paid for out of the public treasury, on account of the people. He then presented the two goats before the Lord at the door of the tabernacle and cast lots upon them. On one lot לַיהוָה (*i. e.* for *Jehovah*) was inscribed, and on the other לַעֲזָאזֵל (*i. e.* for *Azazel*). He next sacrificed the young bullock as a sin-offering for himself and his family. Taking with him some of the blood of the bullock, he filled a censer with burning coals from the brazen altar, took a handful of incense, and entered into the most holy place. He then threw the incense upon the coals and enveloped the mercy-seat in a cloud of smoke. Then, dipping his finger into the blood, he sprinkled it seven times before the mercy-seat, eastward.[a]

The goat upon which the lot "*for Jehovah*" had fallen was then slain, and the high-priest sprinkled its blood before the mercy-seat in the same manner as he had done that of the bullock. Going out from the Holy of Holies he purified the holy place, sprinkling some of the blood of both the victims on the altar of incense.[b] At this time no one besides the high-priest was suffered to be present in the holy place.

The purification of the Holy of Holies and of the holy place being thus completed, the high-priest laid his hands upon the head of the goat on which the lot "*for Azazel*" had fallen, and confessed over it all the sins of the people. The goat was then led, by a man chosen for the purpose, into the wilderness, into "a land not inhabited," and was there let loose.

The high-priest after this returned into the holy place, bathed himself again, put on his usual garments of office, and offered the two rams as burnt-offerings, one for himself and one for the people. He also burnt upon the altar the fat of the two sin-offerings, while their flesh was carried away and burned outside the camp. They who took away the flesh and the man who had led away the goat had to bathe their persons and wash their clothes as soon as their service was performed.

The accessory burnt-offerings mentioned Num. xxix. 7–11, were a young bullock, a ram, seven lambs, and a young goat. It would seem that (at least in the time of the second temple) these were offered by the high-priest along with the evening sacrifice (see below, V. 7).

It may be seen (as Winer has remarked) that in the special rites of the Day of Atonement there is

[a] See Lev. xvi. 14. The English version, "upon the mercy-seat," appears to be opposed to every Jewish authority. (See Drusius *in loc.* in the *Critici Sacri*.) It has, however, the support of Ewald's authority. The Vulgate omits the clause; the LXX. follows the ambiguity of the Hebrew. The word *eastward* must mean either the direction in which the drops were thrown by the priest, or else *on the east side* of the ark, *i. e.* the side towards the veil. The last clause of the verse may be taken as a repetition of the command, for the sake of emphasis on the number of sprinklings: "And he shall take of the blood of the bullock and sprinkle it before the mercy-seat, on the east; and *seven times* shall he sprinkle the blood with his finger before the mercy-seat.

[b] That the altar of incense was thus purified on the day of atonement we learn expressly from Ex. xxx. 10. Most critics consider that this is what is spoken of in Lev. xvi. 18 and 20. But some suppose that it is the altar of burnt-offerings which is referred to in those verses, the purification of the altar of incense being implied in that of the holy place mentioned in ver. 16. Abenezra was of this opinion (see Drusius *in loc.*). That the expression, "before the Lord," does not necessarily mean within the tabernacle, is evident from Ex. xxix. 11. If the golden altar is here referred to, it seems remarkable that no mention is made in the ritual of the cleansing of the brazen altar. But perhaps the practice spoken of by Josephus and in the Mishna of pouring what remained of the mixed blood at the foot of the large altar, was an ancient one, and was regarded as its purification.

Digitized by Google

natural gradation. In the first place the high-priest and his family are cleansed; then atonement is made by the purified priest for the sanctuary and all contained in it; then (if the view to which reference has been made be correct) for the brazen altar in the court, and lastly, reconciliation is made for the people.

IV. In the short account of the ritual of the day which is given by Josephus (*Ant.* iii. 10, § 3) there are a few particulars which are worthy of notice. His words of course apply to the practice in the second temple, when the ark of the covenant had disappeared. He states that the high-priest sprinkled the blood with his finger seven times on the ceiling and seven times on the floor of the most holy place, and seven times towards it (as it would appear, outside the veil), and round the golden altar. Then going into the court he either sprinkled or poured the blood round the great altar. He also informs us that along with the fat, the kidneys, the top of the liver, and the extremities (*αἱ ἐξοχαί*) of the victims were burned.

V. The treatise of the Mishna, entitled *Yoma*, professes to give a full account of the observances of the day according to the usage in the second temple. The following details appear either to be interesting in themselves or to illustrate the language of the Pentateuch.

1. The high-priest himself, dressed in his colored official garments, used, on the Day of Atonement, to perform all the duties of the ordinary daily service, such as lighting the lamps, presenting the daily sacrifices, and offering the incense. After this he bathed himself, put on the white garments, and commenced the special rites of the day. There is nothing in the Old Testament to render it improbable that this was the original practice.

2. The high-priest went into the Holy of Holies four times in the course of the day: first, with the censer and incense, while a priest continued to agitate the blood of the bullock lest it should coagulate; secondly, with the blood of the bullock; thirdly, with the blood of the goat; fourthly, after having offered the evening sacrifice, to fetch out the censer and the plate which had contained the incense. These four entrances, forming, as they do, parts of the one great annual rite, are not opposed to a reasonable view of the statement in Heb. ix. 7, and that in Josephus, *B. J.* v. 5, § 7. Three of the entrances seem to be very distinctly implied in Lev. xvi. 12, 14, and 15.

3. It is said that the blood of the bullock and that of the goat were each sprinkled *eight* times, once towards the ceiling, and seven times on the door. This does not agree with the words of Josephus (see above, IV.).

4. After he had gone into the most holy place the third time, and had returned into the holy place, the high-priest sprinkled the blood of the bullock eight times towards the veil, and did the same with the blood of the goat. Having then mingled the blood of the two victims together and sprinkled the altar of incense with the mixture, he came into the court and poured out what remained at the foot of the altar of burnt-offering.

5. Most careful directions are given for the preparation of the high-priest for the services of the day. For seven days previously he kept away from his own house and dwelt in a chamber appointed for his use. This was to avoid the accidental causes of pollution which he might meet with in his domestic life. But to provide for the possibility of his incurring some uncleanness in spite of this precaution, a deputy was chosen who might act for him when the day came. In the treatise of the Mishna entitled *Pirke Aroth*, it is stated that no such mischance ever befell the high-priest. But Josephus (*Ant.* xvii. 6, § 4) relates an instance of the high-priest Matthias, in the time of Herod the Great, when his relation Joseph took his place in the sacred office. During the whole of the seven days the high-priest had to perform the ordinary sacerdotal duties of the daily service himself, as well as on the Day of Atonement. On the third day and on the seventh he was sprinkled with the ashes of the red heifer in order to cleanse him in the event of his having touched a dead body without knowing it. On the seventh day he was also required to take a solemn oath before the elders that he would alter nothing whatever in the accustomed rites of the Day of Atonement.[a]

6. Several curious particulars are stated regarding the scapegoat. The two goats of the sin-offering were to be of similar appearance, size, and value. The lots were originally of boxwood, but in later times they were of gold. They were put into a little box or urn, into which the high-priest put both his hands and took out a lot in each, while the two goats stood before him, one at the right side and the other on the left. The lot in each hand belonged to the goat in the corresponding position, and when the lot "*for Azazel*" happened to be in the right hand, it was regarded as a good omen. The high-priest then tied a piece of scarlet cloth on the scapegoat's head, called "the scarlet tongue," from the shape in which it was cut. Maimonides says that this was only to distinguish him, in order that he might be known when the time came for him to be sent away. But in the Gemara it is asserted that the red cloth ought to turn white, as a token of God's acceptance of the atonement of the day, referring to Is. i. 18. A particular instance of such a change, when also the lot "*to Azazel*" was in the priest's right hand, is related as having occurred in the time of Simon the Just. It is further stated that no such change took place for forty years before the destruction of Jerusalem. The prayer which the high-priest uttered over the head of the goat was as follows: "O Lord, the house of Israel, thy people, have trespassed, rebelled, and sinned before thee. I beseech thee, O Lord, forgive now their trespasses, rebellions and sins which thy people have committed, as it is written in the law of Moses, thy servant, saying that in that day there shall be 'an atonement for you to cleanse you that ye may be clean from all your sins before the Lord'" (Gemara on *Yoma*, quoted by Frischmuth). The goat was then goaded and rudely treated by the people till it was led away by the man appointed. As soon as it reached a certain spot which seems to have been regarded as the commencement of the wilderness, a signal was made by some sort of telegraphic contrivance, to the high-priest, who waited for it. The man who led the goat is said to have taken him to the top of a high precipice and thrown him down backwards, so

[a] This, according to the Jerusalem Gemara on *Yoma* (quoted by Lightfoot), was instituted in consequence of an innovation of the Sadducean party, who had directed the high-priest to throw the incense upon the censer outside the veil, and to carry it, smoking, into the Holy of Holies.

Digitized by Google

as to dash him to pieces. If this was not a mistake of the writer of *Yoma*, it must have been, as Spencer argues, a modern innovation. It cannot be doubted that the goat was originally set free. Even if there be any uncertainty in the words of the Hebrew, the rendering of the LXX. must be better authority than the Talmud — καὶ ὁ ἐξαποστέλλων τὸν χίμαρον τὸν διεσταλμένον εἰς ἄφεσιν κ. τ. λ. Lev. xvi. 26.

7. The high-priest, as soon as he had received the signal that the goat had reached the wilderness, read some lessons from the law, and offered up some prayers. He then bathed himself, resumed his colored garments, and offered either the whole or a great part of the accessory offering (mentioned Num. xxix. 7–11) with the regular evening sacrifice. After this he washed again, put on the white garments, and entered the most holy place for the fourth time, to fetch out the censer and the incense-plate. This terminated the special rites of the day.

8. The Mishna gives very strict rules for the fasting of the people. In the law itself no express mention is made of abstinence from food. But it is most likely implied in the command that the people were to "afflict their souls." According to *Yoma*, every Jew (except invalids and children under 13 years of age) is forbidden to eat anything so large as a date, to drink, or to wash from sunset to sunset.

VI. There has been much discussion regarding the meaning of the word Azazel. The opinions which seem most worthy of notice are the following: —

1. It has been regarded as a designation of the goat itself. This view has been most favored by the old interpreters. They in general supposed it to mean *the goat sent away*, or *let loose*. In accordance with this the Vulgate renders it, *Caper emissarius*; Symmachus, ὁ τράγος ἀπερχόμενος; Aquila, ὁ τράγος ἀπολελυμένος; Luther, *der ledige Bock*; the English translators, *the scapegoat*. The LXX. uses the term ὁ ἀποπομπαῖος, applied to the goat itself. Theodoret and Cyril of Alexandria consider the meaning of the Hebrew to be *the goat sent away*, and regard that as the sense of the word used in the LXX. If they were right, ἀποπομπαῖος is, of course, not employed in its ordinary meaning (*Averruncus*). (See Suicer, *s. v.*) It should also be observed that in the latter clause of Lev. xvi. 10 the LXX. renders the Hebrew term as if it was an abstract noun, translating לַעֲזָאזֵל by εἰς τὴν ἀποπομπήν. Buxtorf (*Heb. Lex.*) and Fagius (*Critici Sacri*, in loc.) in accordance with this view of its meaning, derived the word from עֵז, *a goat*, and אָזַל, *to depart*. To this derivation it has been objected by Bochart, Winer, and others, that עֵז denotes a *she-goat*, not a *he-goat*. It is, however, alleged that the word appears to be epicene in Gen. xxx. 33; Lev. iii. 12, and other places. But the application of עֲזָאזֵל to the goat itself involves the Hebrew text in insuperable difficulties. It can hardly be supposed that the prefix which is common to the designation of the two lots should be used in two different meanings. If one expression is to be rendered *for Jehovah*, it would seem that the other must be *for Azazel*, with the preposition in the same sense. If this is admitted, taking Azazel for the goat itself, it does not seem possible to make sense out of Lev. xvi. 10 and 26. In these verses the versions are driven to strange shifts. We have already referred to the inconsistency of the LXX. In the Vulgate and our own version the first clause of ver. 10 stands "cujus (*sc.* hirci sors) autem in caprum emissarium" — "but the goat on which the lot fell to be the scapegoat." In ver. 26 our version reads "And he that let go the goat for the scapegoat," while the Vulgate cuts the knot to escape from the awkward tautology — "ille vero, qui dimiserit caprum emissarium."

2. Some have taken Azazel for the name of the place to which the goat was sent. (*a.*) Abenezra quotes the words of an anonymous writer referring it to a hill near Mount Sinai. Vatablus adopts this opinion (*Critici Sacri*, in Lev. xvi.). (*b.*) Some of the Jewish writers, with Le Clerc, consider that it denotes the cliff to which the goat was taken to be thrown down, according to *Yoma*. (*c.*) Bochart regarded the word as a pluralis fractus signifying *desert places*, and understood it as a general name for any fit place to which the goat might be sent. But Gesenius remarks that the pluralis fractus, which exists in Arabic, is not found in Hebrew.

3. Many of those who have studied the subject most closely take Azazel for a personal being to whom the goat was sent. (*a.*) Gesenius gives to עֲזָאזֵל the same meaning as the LXX. has assigned to it, if ἀποπομπαῖος is to be taken in its usual sense; but the being so designated he supposes to be some false deity who was to be appeased by such a sacrifice as that of the goat. He derives the word from a root unused in Hebrew, but found in Arabic, عَزَلَ, *to remove* or *take away* (*Heb. Lex.* s. v.). Ewald agrees with Gesenius, and speaks of Azazel as a demon belonging to the pre-Mosaic religion. (*b.*) But others, in the spirit of a simpler faith, have regarded him as an evil spirit, or the devil himself. In the book of Enoch the name Azalzel is given to one of the fallen angels, and assuming, with Spencer, that this is a corruption of Azazel, if the book were written, as is generally supposed, by a Jew, about B. C. 40, it represents an old Jewish opinion on the subject. Origen, adopting the word of the LXX., identifies him with the devil: ἔτι τε ἐν τῷ Λευιτικῷ ἀποπομπαῖος ὃν ἡ Ἑβραικὴ γραφὴ ὠνόμασεν Ἀζαζήλ, οὐδεὶς ἕτερος ἦν (*sc.* ἢ ὁ διάβολος) (c. *Cels.* vi. 305, ed. Spenc.). Of modern writers, Spencer and Hengstenberg have most elaborately defended the same opinion. Spencer derives the word from עַז, *fortis*, and אָזַל, explaining it as *cito recedens*, which he affirms to be a most suitable name for the evil spirit. He supposes that the goat was given up to the devil, and committed to his disposal. Hengstenberg affirms with great confidence that Azazel cannot possibly be anything but another name for Satan. He repudiates the conclusion that the goat was in any sense a sacrifice to Satan, and does not doubt that it was sent away laden with the sins of God's people, now forgiven, in order to mock their spiritual enemy in the desert, his proper abode, and to symbolize by its free gambols their exulting triumph. He considers that the origin of the rite was Egyptian, and that the Jews substituted Satan for Typhon, whose dwelling was the desert. The obvious objection to Spencer's view is that the goat

Digitized by Google

formed part of a sin-offering to the Lord, and that it, with its fellow, had been formally presented before the Lord at the door of the Tabernacle. Few, perhaps, will be satisfied with Hengstenberg's mode of meeting this difficulty.[a]

4. An explanation of the word which seems less objectionable, if it is not wholly satisfactory, would render the designation of the lot לַעֲזָאזֵל, "for *complete* sending away." Thus understood, the word would come from עָזַל (the root adopted by Gesenius), being the Pealpal form, which indicates intensity. This view is held by Tholuck (quoted and approved by Thomson), by Bähr, and by Winer.

VII. As it might be supposed, the Talmudists miserably degraded the meaning of the day of atonement. They regarded it as an opportunity afforded them of wiping off the score of their more heavy offenses. Thus *Yoma* (cap. viii.) says, "The day of atonement and death make atonement through penitence. Penitence itself makes atonement for slight transgressions, and in the case of grosser sins it obtains a respite until the coming of the day of atonement, which completes the reconciliation." More authorities to the same general purpose are quoted by Frischmuth (p. 917), some of which seem also to indicate that the peculiar atoning virtue of the day was supposed to rest in the scapegoat.

Philo (*Lib. de Septenario*) regarded the day in a far nobler light. He speaks of it as an occasion for the discipline of self-restraint in regard to bodily indulgence, and for bringing home to our minds the truth that man does not live by bread alone, but by whatever God is pleased to appoint. The prayers proper for the day, he says, are those for forgiveness of sins past and for amendment of life in future, to be offered in dependence, not on our own merits, but on the goodness of God.

It cannot be doubted that what especially distinguished the symbolical expiation of this day from that of the other services of the law, was its broad and national character, with perhaps a deeper reference to the sin which belongs to the nature of man. Ewald instructively remarks that though the least uncleanness of an individual might be atoned by the rites of the law which could be observed at other times, there was a consciousness of secret and indefinite sin pervading the congregation, which was aptly met by this great annual fast. Hence, in its national character, he sees an antithesis between it and the passover, the great festival of social life; and, in its atoning significance, he regards it as a fit preparation for the rejoicing at the ingathering of the fruits of the earth in the feast of tabernacles. Philo looked upon its position in the Jewish calendar in the same light.

In considering the meaning of the particular rites of the day, three points appear to be of a very distinctive character. 1. The white garments of the high-priest. 2. His entrance into the Holy of Holies. 3. The scapegoat. The writer of the Epistle to the Hebrews (ix. 7–25) teaches us to apply the first two particulars. The high-priest himself, with his person cleansed and dressed in white garments, was the best outward type which a living man could present in his own person of that pure and holy One who was to purify His people and to cleanse them from their sins.

But respecting the meaning of the scapegoat, we have no such light to guide us, and (as has been already implied in what has been stated regarding the word Azazel) the subject is one of great doubt and difficulty.

Of those who take Azazel for the Evil Spirit, some have supposed that the goat was a sort of bribe, or retaining fee, for the accuser of men. Spencer, in supposing that it was given up with its load of sin to the enemy to be tormented, made it a symbol of the punishment of the wicked; while, according to the strange notion of Hengstenberg, that it was sent to mock the devil, it was significant of the freedom of those who had become reconciled to God.

Some few of those who have held a different opinion on the word Azazel, have supposed that the goat was taken into the wilderness to suffer there vicariously for the sins of the people. But it has been generally considered that it was dismissed to signify the carrying away of their sins, as it were, out of the sight of Jehovah.[b]

If we keep in view that the two goats are spoken of as parts of one and the same sin-offering, and that every circumstance connected with them appears to have been carefully arranged to bring them under the same conditions up to the time of the casting of the lots, we shall not have much difficulty in seeing that they form together but one symbolical expression. Why there were two individuals instead of one may be simply this — that a single material object could not, in its nature, symbolically embrace the whole of the truth which was to be expressed. This is implied in the reasoning of the author of the Epistle to the Hebrews on the office and sacrifice of Christ (Heb. ix.). Hence some, regarding each goat as a type of Christ, supposed that the one which was slain represented his death, and that the goat set free signified his resurrection. (Cyril, Bochart, and others, quoted by Spencer.) But we shall take a simpler, and perhaps a truer view, if we look upon the slain goat as setting forth the act of sacrifice, in giving up its own life for others "to Jehovah," in accordance with the requirements of the Divine law; and the goat which carried off its load of sin "for complete removal," as signifying the cleansing influence of faith in that sacrifice. Thus in his degree the devout Israelite might have felt the truth of the Psalmist's words, "As far as the east is from the west, so far hath he removed our transgressions from us." But for us the whole spiritual truth has been revealed in historical fact, in the life, death, and resurrection of Him who was made sin for us, who died for us, and who rose again for our justification. This Mediator, it was necessary, should "in some unspeakable manner unite death and life" (Maurice on Sacrifice, p. 85).

(Spencer, *De Legibus Hebræorum Ritualibus*, lib. iii. Dissertatio viii.; Lightfoot's *Temple Service*,

[a] "In support of the view that Azazel denotes an evil spirit, or Satan, see also Bush, *Azazel*, etc. in the *Amer. Bibl. Repos.* July, 1842, 2d ser., viii. 116–186; Diestel, *Sat-Typhon, Asahel und Satan*, in the *Zeitschr. f. d. hist. Theol.*, 1860, xxx. 159–217; and Valhinger, art. *Azazel* in Herzog's *Real-Encykl.*, vol. i. A.

[b] In the similar part of the rite for the purification of the leper (Lev. xiv. 6, 7), in which a live bird was set free, it must be evident that the bird signified the carrying away of the uncleanness of the sufferer in precisely the same manner.

ATROTH (עַטְרוֹת [*crowns*]: *Etroth*), a city of Gad, named with Aroer and Jaazer (Num. xxxii. 35). No doubt the name should be taken with that following it, Shophan; the addition serving to distinguish this place from the Ataroth in the same neighborhood. The A. V. follows the Vulgate, *Etroth et Sophan*. In the LXX. it is altogether omitted. G.

* The A. V. makes two places (Atroth, Shophan, but not connected by *and* as by *et* in the Vulg.); but that they should be taken together (Atroth-Shophan) is evident from the construct form of the first, and from the analogy of Atroth-Adar (Josh. xviii. 13) and Atroth-beth-Joab (1 Chr. ii. 54). In both these last cases the A. V. has inaccurately Ataroth for Atroth. [ATAROTH.] H.

ATTAI [2 syl.] (עַתַּי [*opportune*, Ges.]: Ἐθθί; [Vat. Εθθει;] Alex. Ιεθθι, Ιεθθει: *Ethei*). 1. Grandson of Sheshan the Jerahmeelite through his daughter Ahlai, whom he gave in marriage to Jarha his Egyptian slave (1 Chr. ii. 35, 36). His grandson Zabad was one of David's mighty men (1 Chr. xi. 41).

2. (Ἰεθθί; [Vat. Εθοι;] Alex. Εθθει: *Ethi*.) One of the lion-faced warriors of Gad, captains of the host, who forded the Jordan at the time of its overflow, and joined David in the wilderness (1 Chr. xii. 11).

3. (Ἰεττθί; [Vat. Ιεθθει;] Alex. Ιεθθι: *Ethai*.) Second son of Kiug Rehoboam by Maachah the daughter of Absalom (2 Chr. xi. 20).

W. A. W.

ATTALI'A (Ἀτταλεία: [*Attalia*]), a coast-town of Pamphylia, mentioned only very casually in the New Testament (Acts xiv. 25), as the place from which Paul and Barnabas sailed on their return to Antioch from their missionary journey into the inland parts of Asia Minor. It does not appear that they made any stay, or attempted to preach the gospel in Attalia. This city, however, though comparatively modern at that time, was a place of considerable importance in the first century, and has continued to exist till now. Its name since the twelfth century has been *Satalia*, a corruption of which the crusading chronicler, William of Tyre, gives a curious explanation.

Attalus Philadelphus, king of Pergamus, ruled over the western part of the peninsula from the N. to the S., and was in want of a port which should be useful for the trade of Egypt and Syria, as Troas was for that of the Ægean. Thus Attalia was built and named after the monarch. All its remains are characteristic of the date of its foundation.

There has been considerable doubt concerning the exact position of Attalia. There is a discrepancy even between Strabo and Ptolemy, the former placing it to the W. of the river Catarrhactes, the latter to the E. This may probably be accounted for by the peculiar character of this river, the calcareous waters of which are continually making changes in the channels. Beaufort thought that the modern *Satalia* is the ancient Olbia, and that *Laara* is the true Attalia. Forbiger, after Mannert, is inclined to identify the two places. But Spratt and Forbes found the true Olbia further to the west, and have confirmed Leake's opinion, that Attalia is where the modern name would lead us to expect to find it. (Beaufort's *Karamania;* Spratt and Forbes's *Lycia*.) J. S. H.

ATTALUS (Ἄτταλος, a Macedonian name of uncertain origin), the name of three kings of Pergamus who reigned respectively B. C. 241–197, 159–138 (Philadelphus), 138–133 (Philometor). They were all faithful allies of the Romans (Liv. xlv. 13); and the last appointed the Romans his heirs. It is uncertain whether the letters sent from Rome in favor of the Jews (1 Macc. xv. 22) were addressed to Attalus II. (Polyb. xxv. 6, xxxi. 9, xxxii. 3, 5, 8, &c., 25 f.; Strab. xiii. 4; Just. xxxv. 1, xxxvi. 4, 5; App. *Mith.* 62) or Attalus III., as their date falls in B. C. 139–8 [LUCIUS], about the time when the latter succeeded his uncle. Josephus quotes a decree of the Pergamenes in favor of the Jews (*Ant.* xiv. 10, § 22) in the time of Hyrcanus, about B. C. 112: comp. Apoc. ii. 12–17. B. F. W.

ATTHARA'TES (Ἀθαράτης: *Atharathes*), 1 Esdr. ix. 49 (comp. Neh. viii. 9), a corruption of "the Tirshatha;" comp. ATHARIAS.

AU'GIA (Αὐγία: om. in Vulg.). The daughter of Berzelus, or Barzillai, according to 1 Esdr. v. 38. Her descendants by Addus were among the priests whose genealogy could not be substantiated after the return from Babylon. The name does not occur either in Ezra or Nehemiah.

AUGUSTUS CÆSAR (Αὐγοῦστος Καῖσαρ), the first Roman emperor, during whose reign Christ was born (Luke ii. 1 ff.). He was born A. U. C. 691, B. C. 63. His father was Caius Octavius; his mother Atia, daughter of Julia the sister of C. Julius Cæsar. He bore the same name as his father, Caius Octavius. He was principally educated, having lost his father when young, by his great uncle Julius Cæsar. After his murder, the young Octavius came into Italy as Caius Julius Cæsar Octavianus, being by his uncle's will adopted into the Gens Julia as his heir. He was taken into the Triumvirate with Antony and Lepidus, and after the removal of the latter divided the empire with Antony, taking the West for his share. But there was no real concord between them, and the compact resulted in a struggle for the supreme power, which was terminated in favor of Octavianus by the decisive naval battle of Actium, B. C. 31 (Suet. *Octav.* 17; Dion Cass. l. 15 ff.; Vell. Pater ii. 85). On this victory he was saluted Imperator by the senate; and on his offering afterwards to resign the chief power, they conferred on him the title Augustus (B. C. 27.) He managed with consummate tact and skill to consolidate the power conferred on him, by leaving the names and rights of the principal state officers intact, while by degrees he united them all in his own person. The first link binding him to N. T. history is his treatment of Herod after the battle of Actium. That prince, who had espoused Antony's side, found himself pardoned, taken into favor and confirmed, nay even increased in his power (Joseph. *Ant.* xv

Digitized by Google

3, § 5 ff.; 7, § 3; 10, § 3). In gratitude Herod built him a temple of marble near the source of the Jordan (*Ant.* xv. 10, § 3), and was through life the fast friend of the imperial family. After Herod's death in A. D. 4, Augustus divided his dominions almost exactly according to his dying directions, among his sons (*Ant.* xvii. 11, § 4); but was soon obliged to exile one of them [ARCHELAUS], and attach his portion, Judæa and Samaria, to the province of Syria (*Ant.* xvii. 13, § 2). Augustus died at Nola in Campania, Aug. 19 A. U. C. 767, A. D. 14, in his 76th year (Suet. *Octav.* 99 f.; Dion Cass. lvi. 29 ff.; Joseph. *Ant.* xviii. 3, § 2, *B. J.* 11, 9, § 1). Long before his death he had associated Tiberius with him in the empire (Suet. *Tiber.* 21; Tacit. *Ann.* 1, 3). See, for a more complete notice, the article AUGUSTUS in the Dictionary of Biography and Mythology. H. A.

* Augustus adopted Tiberius as his successor several years before his death; but according to the best chronologists it was not till A. D. 12, *i. e.* about two years before his death (A. D. 14), that he admitted Tiberius to a share in the government. For the details of the computation, see Greswell's *Dissertations*, i. 344 ff.; Sepp's *Leben Christi*, i. 106 ff.; and Anger *de temporum ratione*, p. 12 f. on Luke iii. 1. For a summary of the facts, see *Life of our Lord* by Mr. S. J. Andrews, pp. 22–28.

Augustus occurs twice as one of the imperial titles in Acts xxv. 21, 25 (A. V. after the Latin for Σεβαστός), where it is used of Nero, the emperor to whom Paul appealed when arraigned before Festus. The Roman Senate conferred this title on Octavius in the first instance (Suet. *Octav.* 7), but it was applied also to his successors (Suet. *Tiber.* 26). H.

AUGUSTUS' BAND (Acts xxvii. 1). [ARMY, p. 164.]

AURA'NUS (τὸν Αὔρανος), leader of a riot at Jerusalem (2 Macc. iv. 40). In the Vatican [Roman edition of the] LXX. and Vulgate the name is rendered τὸν τύραννος, *quidam tyrannus*.

AUTE'AS (Αὐτάλας: Vulg. omits), name of a Levite (Esdr. ix. 48). [HODIJAH.]

A'VA (עַוָּא = Avva: Αὶά; [Comp. Αουάν:] *Avah*), a place in the empire of Assyria, from which colonies were brought to repeople the cities of Samaria after the deportation of the Jews (2 K. xvii. 24). From the names in connection with which it is introduced, it would appear to be the same place with Ivah. [IVAH.] It has been suggested to be identical with Ahava. For other suppositions see Winer, *sub voce*.

AV'ARAN (Αὐαράν: *Abaron*), surname of Eleazar, brother of Judas Maccabæus (1 Macc. ii. 5). [For the meaning of this surname see ELEAZAR 8.]

A'VEN (אָוֶן, *nothingness*: [τὸν Ὦν: *idolum*]). The "plain of Aven" [*marg.* Bikath-aven] (בִּקְעַת־אָוֶן) is mentioned by Amos (i. 5) in his denunciation of Aram (Syria) and the country to the N. of Palestine. It has not been identified with certainty. Michaelis (notes on Amos) heard from a native of Damascus of a valley near that city called Un, and he quotes a Damascene proverb referring thereto; but the information was at best suspicious, and has not been confirmed, although the neighborhood of Damascus has been tolerably well explored by Burckhardt (App. iv.) and by Porter. The prophet, however, would seem to be alluding to some principal district of the country of equal importance with Damascus itself, and so the LXX. have understood it, taking the letters as pointed אָוֹן and expressing it in their version as πεδίον Ὦν. By this they doubtless intend the great plain of Lebanon, Cœle-Syria, in which the renowned idol temple of Baalbek or Heliopolis was situated, and which still retains the very same name by which Amos and Joshua designated it, *el-Bûka'a*. The application of Aven as a term of reproach or contempt to a flourishing idol sanctuary, and the play or paronomasia therein contained, is quite in keeping with the manner of Amos and of Hosea. The latter frequently applies the very same word to Bethel. [BETHAVEN.]

2. In Hos. x. 8, "the high places of Aven" (בָּמוֹת אָוֶן: βωμοὶ Ὦν: *excelsa idoli*), the word is clearly a contraction of Beth-aven, that is Bethel (comp. iv. 15, &c.).

3. In this manner are pointed, in Ex. xxx. 17, the letters of the name which is elsewhere given as On, אוֹן, the sacred city of Heliopolis or On, in Egypt. [ON.] (The LXX. and Vulgate both render it accordingly, Ἡλιούπολις, *Heliopolis*.) The intention of the prophet is doubtless to play upon the name in the same manner as Amos and Hosea. See above, 1. G.

A'VIM, A'VIMS, or A'VITES[a] (הָעַוִּים = the Avvim: οἱ Εὐαῖοι, the word elsewhere used by the LXX. for Hivites: *Hevæi*). 1. An early but perhaps not an aboriginal[b] people among the inhabitants of Palestine, whom we meet with in the S. W. corner of the sea-coast, whither they may have made their way northwards from the Desert (Stanley, *Sinai and Pal.* App. § 83). The only notice of them which has come down to us is contained in a remarkable fragment of primeval history preserved in Deut. ii. 23. Here we see them "dwelling in 'the' villages" (or nomad encampments — *Chatzerim*) in the S. part of the *Shefelah*, or great western lowland, "as far as Gaza." In these rich possessions they were attacked by the invading Philistines, "the Caphtorim which came forth out of Caphtor," and who after "destroying" them and "dwelling in their stead," appear to have pushed them further north. This must be inferred from the terms of the passage in Josh. xiii. 2, 3, the enumeration of the rest of the land still remaining to be conquered. Beginning[c] from "Sihor, which is before Egypt," probably the *Wady-el-Arish*, the list proceeds northwards along the lowland plains of the sea-

[a] It is characteristic of the looseness of the A. V. that this name is given differently each time it occurs, and that they are all inaccurate.

[b] According to Ewald (*Geschichte*, i. 310) and Bertheau, the Avvim were an *Urvolk* of Palestine proper. They may have been so, but there is nothing to prove it, while the mode of their dwellings points rather to the desert as their origin.

[c] The punctuation of this passage in our Bibles is not in accordance with the Hebrew text, which has a full stop at Geshuri (ver. 2), thus: "This is the land that yet remaineth, all the borders of the Philistines and all the Geshurite From Sihor even to the border of Ekron northward, is counted to the Canaanite" &c.

Digitized by Google

coast, through the five lordships of the Philistines — all apparently taken in their order from S. to N. — till we reach the Avvim,[a] as if they had been driven up out of the more southerly position which they occupied at the date of the earlier record, into the plains of Sharon.

Nothing more is told us of this ancient people, whose very name is said[b] to signify "ruin." Possibly a trace of their existence is to be found in the town "Avim" (accurately, as in the other cases, 'the Avvim') which occurs among the cities of Benjamin (Josh. xviii. 23), and which may have preserved the memory of some family of the extinct people driven up out of their fertile plains to take refuge in the wild hills of Bethel; just as in the "Zemaraim" of the preceding verse we have probably a reminiscence of the otherwise forgotten Zemarites [ZEMARAIM]. But on the other hand it is possible that the word in this place is but a variation or corruption of the name of Ai. [AI.]

The inhabitants of the north-central districts of Palestine (Galileans) were in later times distinguished by a habit of confounding the gutturals, as, for instance, ע with א (see Lightfoot, *Chor. Cent.* ch. 87; Buxtorf, *Lex. Talm.* גליל). Is it possible that חִוִּי, *Hivite*, is a variation, arising from this cause, of עַוִּי, *Avite*, and that this people were known to the Israelites at the date of the conquest by the name of Hivites? At any rate it is a curious fact that both the LXX. and Jerome, as we have seen above, identified the two names, and also that the town of ha-Avvim was in the actual district of the Hivites, in the immediate neighborhood of Gibeon, Chephirah, and their other chief cities (Josh. ix. 7, 17, compared with xviii. 23–27).

The name of the Avvim has been derived from Avva (Ava), or Ivvah (Ivah), as if they had migrated thence into Palestine; but there is no argument for this beyond the mere similarity of the names.[c]

2. The people of Avva, among the colonists who were sent by the king of Assyria to re-inhabit the depopulated cities of Israel (2 K. xvii. 31). They were idolaters, worshipping gods called Nibhaz and Tartak. [AVA.] G.

[a] It is remarked above (No. 1) that Avim (Josh. xviii. 23) may be the same as Ai (which see). Dr. Thomson, author of *The Land and the Book*, has discovered a site east of Bethel which the natives of that region call *Wadi Ay* (وَادِي أَيّ), the letter Alif being substituted for the letter "Ain" of the old Hebrew name. C. V. A. VAN DYCK.

AVITH (עֲוִית: Γεθθαίμ, [Alex. Γεθθαιμ, in Gen.; in 1 Chr., Γεθαιμ, Vat. Γεθθαιμ, Alex. Γεθθαμ: *Avith*]), the city of Hadad ben-Bedad, one of the kings of Edom before there were kings in Israel (Gen. xxxvi. 35; 1 Chr. i. 46; in the latter passage the Text (*Chetib*) has עִיוֹר, which in the *Keri* is corrected to agree with the reading in Genesis). The name may be compared with *el Ghoweitheh* (الغويثة), a "chain of low hills," mentioned by Burckhardt (375) as lying to the E. of the district of *Kerek* in Moab (Knobel, *Genesis*, 257). G.

AWL (מַרְצֵעַ: ὀπήτιον: *subula*), a tool of which we do not know the ancient form. The only notice of it is in connection with the custom of boring the ear of the slave (Ex. xxi. 6; Deut. xv. 17). W. L. B.

AXE. Seven Hebrew words are rendered "axe" in the A. V.

1. גַּרְזֶן, *Garzen*, from a root signifying "to cut or sever," as "hatchet," from "hack," corresponds to the Lat. *securis*. It consisted of a head of iron (comp. Is. x. 34), fastened, with thongs or otherwise, upon a handle of wood, and so liable to slip off (Deut. xix. 5; 2 K. vi. 5). It was used for felling trees (Deut. xx. 19), and also for shaping the wood when felled, perhaps like the modern adze (1 K. vi. 7).

Egyptian Axe. — (British Museum.)

2. חֶרֶב, *Chereb*, which is usually translated "sword," is used of other cutting instruments, as a "knife" (Josh. v. 2) or razor (Ez. v. 1), or a tool for hewing or dressing stones (Ez. xx. 25), and is once rendered "axe" (Ez. xxvi. 9), evidently denoting a weapon for destroying buildings, a pick-axe.

3. בַּשְׁתִּיל, *Cashtil*, occurs but once (Ps. lxxvii. 6), and is evidently a later word, denoting a large axe. It is also found in the Targum of Jer. xlvi. 22.

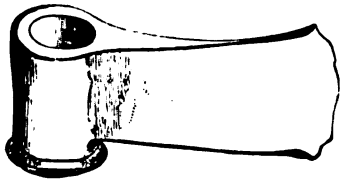
4. מַגְזֵרָה, *Magzérâh* (2 Sam. xii. 31), and

5. מְגֵרָה, *Mégérâh* (1 Chr. xx. 3), are found in the description of the punishments inflicted by David upon the Ammonites of Rabbah. The latter word is properly "a saw," and is apparently an error of the transcriber for the former.

6. מַעֲצָד, *Ma'atsâd*, rendered "axe" in the margin of Is. xliv. 12, and Jer. x. 3, was an instrument employed both by the iron-smith and the carpenter, and is supposed to be a curved knife or bill, smaller than

7. קַרְדֹּם, *Kardôm*, a large axe used for felling trees (Judg. ix. 48; 1 Sam. xiii. 20, 21; Ps. lxxiv. 5; Jer. xlvi. 22). The words 1, 5, and 7 have an etymological affinity with each other, the idea of cutting being that which is expressed by their roots.

The "battle-axe," מַפֵּץ, *mappêts* (Jer. li. 20), was probably, as its root indicates, a heavy mace or



[a] It is perhaps worth notice, where every syllable has some significance, that while "the Gazathite the Ekronite," are all in the singular, "the Avvim" is plural.

[b] Gesenius, *Thesaurus*, p. 1000. Lengerke's explanation of it, as "dwellers in the lowlands," is not obvious nor does he specify any derivation.

[c] See Lengerke's confident hypothesis (*Kenaan*, p 183), for which, as is often the case, he does not condescend to give the shadow of a reason.

naul, like that which gave his surname to ' harles *Martel*. W. A. W.

Assyrian Axe. — (British Museum.)

AZ'AEL ('Αζαήλος; [Ald. 'Αζαήλ:] *Ezelus*), name of a man (1 Esdr. ix. 14). [ASAHEL].

AZAE'LUS ('Αζαήλος; [Alex. Αζαηλ:] *Dielus*), an Israelite in the time of Esdras: the name is probably merely a repetition of that preceding it (1 Esdr. ix. 34).

A'ZAL (Atzel, אָצֵל, but from the emphatic accent אָצֵל, Atzal: 'Ιασδῆ; Alex. [Comp. Ald.] 'Ασαήλ: *usque ad proximum*), a name only occurring in Zech. xiv. 5. It is mentioned as the limit to which the "ravine" or cleft (גַּיְא) of the Mount of Olives will extend when "Jehovah shall go forth to fight." The whole passage of Zechariah is a highly poetical one: and several commentators agree with Jerome in taking Azal as an appellative, and not a proper name. G.

AZALI'AH (אֲצַלְיָהוּ [*whom Jehovah has spared*]: 'Εζελίας, 'Εσελία; [Vat. Ελιας, Σελια;] Alex. [Εσσελιας in 1 K.] Σελια in 2 Chr.: *Aslia, Eselias*). The father of Shaphan the scribe in the reign of Josiah (2 K. xxii. 3; 2 Chr. xxxiv. 8). W. A. W.

AZANI'AH (אֲזַנְיָה [*whom Jehovah hears*]: 'Αζανία [Vat. -νει-]: *Azanias*). The father or immediate ancestor of Jeshua the Levite in the time of Nehemiah (Neh. x. 9).' W. A. W.

AZA'PHION ('Ασσαπφιώθ; [Vat. Ασσαφειωθ; Alex. Ασαφφιωθ; Ald. 'Ασαπφιών:] *Sephegus*), 1 Esdr. v. 33. Possibly a corruption of SOPHERETH.

AZ'ARA ('Ασαρά: *Attre*), one of the "servants of the temple" (1 Esdr. v. 31). No corresponding name can be traced in the parallel list in Ezra.

AZAR'AEL (the same name as the succeeding one; עֲזַרְאֵל: 'Οζιήλ; [Vat. Alex. FA.[1] -ζει-; Comp. 'Εζριήλ:] *Azareel*), a Levite musician (Neh. xii. 36). [The A. V. ed. 1611, following the Bishops' Bible, incorrectly reads "Asarael."]

AZA'REEL (עֲזַרְאֵל [*whom God helps*]: Οζριήλ; [Vat. -ρει-; Ald.] Alex. 'Ελιήλ; [Comp. Αζαρήλ:] *Azareel*). 1. A Korhite who joined David in his retreat at Ziklag (1 Chr. xii. 6).

2. ('Ασριήλ; [Vat. Αζαρια;] Alex. Εζριηλ.) A Levite musician of the family of Heman in the time of David, 1 Chr. xxv. 18: called UZZIEL in xxv. 4.

3. ('Αζαριήλ; [Vat. Αζαραηλ;] Alex. Εζριηλ: *Ezrihel.*) Son of Jeroham, and prince of the tribe of Dan when David numbered the people (1 Chr. xxvii. 22).

4. ('Εζριήλ: [Vat. Εζερηλ:] *Ezrel.*) One of the sons of Bani, who put away his foreign wife on the remonstrance of Ezra (Ezr. x. 41): apparently the same as ESHII, 1 Esdr. ix. 34.

5. ('Ευδριήλ; [Comp. Ald. 'Εσριήλ; Alex. Εζριηλ:] *Azreel.*) Father, or ancestor, of Maasiai or Amashai, a priest who dwelt in Jerusalem after the return from Babylon (Neh. xi. 13; comp. 1 Chr. ix. 12). W. A. W.

AZARI'AH[a] (עֲזַרְיָה and עֲזַרְיָהוּ: 'Αζαρίας: *Azarias; whom God hath helped*). It is a common name in Hebrew, and especially in the families of the priests of the line of ELEAZAR, whose name has precisely the same meaning as AZARIAH. It is nearly identical, and is often confounded with Ezra as well as with Zerahiah and Seraiah. The principal persons who bore this name were: —

1. Son of Ahimaaz (1 Chr. vi. 9). He appears from 1 K. iv. 2, to have succeeded Zadok, his grandfather, in the high-priesthood, in the reign of Solomon, Ahimaaz having died before Zadok. [AHIMAAZ.] To him, it can scarcely be doubted, instead of to his grandson, Azariah, the son of Johanan, belongs the notice in 1 Chr. vi. 10, "He it is that executed the priest's office in the temple that Solomon built at Jerusalem," meaning that he officiated at the consecration of the temple, and was the first high-priest that ministered in it. The other interpretation which has been put upon these words, as alluding to the Azariah who was high-priest in Uzziah's reign, and resisted the king when he attempted to offer incense, is quite unsuited to the words they are meant to explain, and utterly at variance with the chronology. For this Azariah of 1 Chr. vi. 10 precedes Amariah, the high-priest in Jehoshaphat's reign, whereas Uzziah was king five reigns after Jehoshaphat. Josephus merely mentions Azarias as the son and successor of Ahimaaz.

2. [Rom. 'Οφνία; Vat. Οφνεια.] A chief officer of Solomon's, the son of Nathan, perhaps David's grandson (1 K. iv. 5.)

3. (עֲזַרְיָהוּ, עֻזִּיָּהוּ in 2 K. xv. 6 [*whom Jehovah helps*]: Αζαρίας: *Azarias.*) Tenth king of Judah, more frequently called UZZIAH (2 K. xiv. 21, xv. 1, 6, 7, 8, 17, 23. 27; 1 Chr. iii. 12).

4. [Vat. M. Ζαρεια, H. -ας; Alex. Αζαρια.] Son of Ethan, of the sons of Zerah, where, perhaps, Zerahiah is the more probable reading (1 Chr. ii. 8).

5. Son of Jehu of the family of the Jerahmeelites and descended from Jarha the Egyptian slave of Sheshan (1 Chr. ii. 38, 39). He was probably one of the captains of hundreds in the time of Athaliah mentioned in 2 Chr. xxiii. 1; and there called the son of Obed. This fact assigns the compilation of the genealogy in 1 Chr. ii. 36–41 to the reign of Hezekiah.

6. The son of Johanan, 1 Chr. vi. 10, 11. He must have been high-priest in the reigns of Abijah and Asa, as we know his son Amariah was in the days of Jehoshaphat, the son of Asa. It does not appear what part he took in Asa's zealous reformation (2 Chr. xv.), nor whether he approved the stripping of the house of God of its treasures to induce Benhadad to break his league with Baasha king of Israel, as related 2 Chr. xvi., for his name and his office are never alluded to in the history of Asa's reign, either in the book of Kings or Chronicles. The active persons in the religious movement of the times were the king himself and the

a * The original article has here been combined with that in the *Concise Dictionary*. H.

Digitized by Google

two prophets, Azariah the son of Oded, and Hanani. The silence concerning Azariah, the high-priest, is, perhaps, rather unfavorable than otherwise to his religious character. His name is almost lost in Josephus's list of the high-priests. Having lost, as we saw in the article AMARIAH, its termination AΣ, which adhered to the following name, it got by some process transformed into Ισος.

7. Another Azariah is inserted between Hilkiah, in Josiah's reign, and Seraiah, who was put to death by Nebuchadnezzar, in 1 Chr. vi. 13. But Josephus does not acknowledge him, making Seraiah the son of Hilkiah, and there seems to be scarcely room for him. It seems likely that he may have been inserted to assimilate the genealogy to that of Ezr. vii. 1, where, however, the Seraiah and Azariah are probably neither of them the high-priests of those names.

8. Son of Zephaniah, a Kohathite, and ancestor of Samuel the prophet (1 Chr. vi. 36). Apparently the same as UZZIAH in ver. 24.

9. Azariah, the son of Oded (2 Chr. xv. 1), called simply Oded in ver. 8, was a remarkable prophet in the days of king Asa, and a contemporary of Azariah the son of Johanan the high-priest, and of Hanani the seer. He powerfully stirred up the spirit of Asa, and of the people of Judah and Benjamin, in a brief but pithy prophecy, which has been preserved, to put away all idolatrous worship, and to restore the altar of the one true God before the porch of the temple. Great numbers of Israelites from Ephraim, and Manasseh, and Simeon, and all Israel, joined in the national reformation, to the great strengthening of the kingdom; and a season of rest and great prosperity ensued. Oded, the prophet in the days of Ahaz, may probably have been a descendant of Azariah.

10. Son of Jehoshaphat king of Judah (2 Chr. xxi. 2).

11. (עֲזַרְיָהוּ.) Another son of Jehoshaphat, and brother of the preceding (2 Chr. xxi. 2).

12. [Οχοζίας, Vat. -ζει-: *Ochozias.*] At 2 Chr. xxii. 6, Azariah is a clerical error for Ahaziah.

13. (עֲזַרְיָה.) Son of Jeroham, and one of the captains of Judah in the time of Athaliah (2 Chr. xxiii. 1).

14. The high-priest in the reign of Uzziah, king of Judah, whose name, perhaps from this circumstance, is often corrupted into Azariah (2 K. xiv. 21, xv. 1, 6, 7, 8, &c.). The most memorable event of his life is that which is recorded in 2 Chr. xxvi. 17–20. When king Uzziah, elated by his great prosperity and power, "transgressed against the Lord his God, and went into the temple of the Lord to burn incense upon the altar of incense," Azariah the priest, accompanied by eighty of his brethren, went in boldly after him, and withstood him. With unflinching faithfulness, and a high sense of his own responsibility as ruler of the House of God, he addressed the king with the well-merited reproof — "It appertaineth not unto thee, Uzziah, to burn incense unto the Lord, but to the priests the sons of Aaron, that are consecrated to burn incense: go out of the sanctuary, for thou hast trespassed: neither shall it be for thine honor from the Lord God." And it is added that when Azariah the chief priest and all the priests looked upon him, behold he was leprous in his forehead, and they thrust him out from thence; yea, himself hasted to go out, because the Lord had smitten him." Uzziah was a leper unto the day of his death, and, as such, was never able again to go to the Lord's House, which he had so presumptuously invaded. Azariah was contemporary with Isaiah the prophet, and with Amos and Joel, and doubtless witnessed the great earthquake in Uzziah's reign (Am. i. 1; Zech. xiv. 5). He is not mentioned in Josephus's list. Ἰούηλος occurs instead possibly the name of the *prophet* inadvertently substituted for that of the *high-priest*. Neither is he in the priestly genealogy of 1 Chr. vi.

15. [Rom. Οὐδελας; Vat. Ουδεια.] Son of Johanan, one of the captains of Ephraim in the reign of Ahaz (2 Chr. xxviii. 12), who sent back the captives and spoil that were taken in the invasion of Judah by Pekah.

16. [Vat. Alex. Ald. Ζαχαρίας.] A Kohathite, father of Joel in the reign of Hezekiah (2 Chr. xxix. 12).

17. [Vat. Ζαχαριας.] A Merarite, son of Jehalelel, in the time of Hezekiah, contemporary with the son of the preceding (2 Chr. xxix. 12).

18. The high-priest in the days of Hezekiah (2 Chr. xxxi. 10–13). He appears to have coöperated zealously with the king in that thorough purification of the temple and restoration of the temple-services which was so conspicuous a feature in Hezekiah's reign. He especially interested himself in providing chambers in the house of the Lord in which to stow the tithes and offerings and consecrated things for the use of the priests and Levites, and in appointing overseers to have the charge of them. For the attendance of priests and Levites, and the maintenance of the temple-services, depended entirely upon the supply of such offerings, and whenever the people neglected them the priests and Levites were forced to disperse themselves to their villages, and so the house of God was deserted (comp. Neh. x. 35–39, xii. 27–30, 44–47). His name seems to be corrupted into Νηρίας in Josephus. He succeeded Urijah, who was high-priest in the reign of Ahaz. Who his successor was is somewhat uncertain. He is not, any more than the preceding, included in the genealogy of 1 Chr. vi.

19. [Vat. Alex. FA. Αζαρια.] Son of Maaseiah, who repaired part of the wall of Jerusalem in the time of Nehemiah (Neh. iii. 23, 24).

20. (Ἀζαρία; Alex. Αζαρεα.) One of the leaders of the children of the province who went up from Babylon with Zerubbabel (Neh. vii. 7). Elsewhere called SERAIAH (Ezr. ii. 2) and ZACHARIAS (1 Esdr. v. 8).

21. [Rom. Vat. Alex. FA. omit; Ald. Ἀζαρίας.] One of the Levites who assisted Ezra in instructing the people in the knowledge of the law (Neh. viii 7). Called AZARIAS in 1 Esdr. ix. 43.

22. [In Neh. x., Ἀζαρία, Comp. -ας, FA. Ζαχαρια; in Neh. xii., Vat. FA. Ζαχαριας.] One of the priests who sealed the covenant with Nehemiah (Neh. x. 2), and probably the same with the Azariah who assisted in the dedication of the city wall (Neh. xii. 33).

23. (Ἀζαρίας.) JEZANIAH (Jer. xliii. 2).

24. The original name of Abed-nego (Dan. i. 6, 7, 11, 19). He appears to have been of the seed royal of Judah, and for this reason selected, with Daniel and his other two companions, for Nebuchadnezzar's especial service. The three children, as they were called, were remarkable for their beauty, and wisdom, and knowledge, and intelligence. They were no less remarkable for their

Digitized by Google

piety, their strict adherence to the law of Moses, and the steadfastness of their faith, even unto death, and their wonderful deliverance.

A. C. H. and W. A. W.

AZARI'AS ('Αζαρίας: *Azarias*). 1. (1 Esdr. ix. 21) = UZZIAH, Ezr. x. 21.

2. (1 Esdr. ix. 43) = URIJAH, Neh. viii. 4.

3. (Alex. Αζαρειας: 1 Esdr. ix. 48) = AZARIAH, Neh. viii. 7.

4. (*Azareus.*) Priest in the line of Esdras (2 Esdr. i. 1), elsewhere AZARIAH and EZERIAS.

5. (*Azarias.*) Name assumed by the angel Raphael (Tob. v. 12, vi. 6, 13, vii. 8, ix. 2).

6. A captain in the army of Judas Maccabæus (1 Macc. v. 18, 56, 60). W. A. W.

A'ZAZ (עָזָז [*strong*]: 'Αζούζ; [Vat.] Alex. Οζους; [Comp. 'Αζάζ:] *Azaz*). A Reubenite, father of Bela (1 Chr. v. 8). W. A. W.

* **AZA'ZEL** stands in the margin of the A. V. (Lev. xvi. 8) for "scape-goat" in the text. See ATONEMENT, THE DAY OF, under III. and VI. H.

AZAZI'AH (עַזַזְיָהוּ [*whom Jehovah strengthens*]: 'Οζίας; [Vat. FA. Οζειας:] *Ozaziu*). 1. A Levite musician in the reign of David, appointed to play the harp in the service which attended the procession by which the ark was brought up from the house of Obed-edom (1 Chr. xv. 21).

2. [Vat. Οζειας.] The father of Hosea, prince of the tribe of Ephraim when David numbered the people (1 Chr. xxvii. 20).

3. ([Vat. Οζειας:] Alex. Οζαζας: *Azarias.*) One of the Levites in the reign of Hezekiah, who had charge of the tithes and dedicated things in the Temple under Cononiah and Shimei (2 Chr. xxxi. 13). W. A. W.

AZBAZ'ARETH ('Ασβακαφάς [Vat. -φαθ; Ald. Alex. 'Ασβασαρέθ:] *Asbazareth*), king of the Assyrians, probably a corruption of Esar-haddon (1 Esdr. v. 69). [The A. V. ed. 1611 reads, more correctly, "Asbazareth."]

AZ'BUK (עַזְבּוּק: 'Αζαβούχ; Alex. Αζβουχ: *Azbuc*). Father or ancestor of Nehemiah the prince of part of Bethzur (Neh. iii. 16). W. A. W.

AZE'KAH (עֲזֵקָה, from a root signifying to dig or till the ground,[a] see Gesen. *s. v.*: 'Αζηκά, once 'Ιαζηκά: *Azeca*), a town of Judah, with dependent villages ("daughters") lying in the *Shefelah* or rich agricultural plain, a situation quite in accordance with the derivation of the name given above. It is named with Adullam, Shaaraim, and other places known to have been in that locality (Josh. xv. 35; 2 Chr. xi. 9; Neh. xi. 30), but is most clearly defined as being near Shochoh (that is the northern one) [SHOCHOH] (1 Sam. xvii. 1). Joshua's pursuit of the Canaanites after the battle of Beth-horon extended to Azekah (Josh. x. 10, 11). Between Azekah and Shochoh, an easy step out of their own territory, the Philistines encamped before the battle in which Goliath was killed (1 Sam. xvii. 1). It was among the cities fortified by Rehoboam (2 Chr. xi. 9), was still standing at the time of the invasion of the kings of Babylon (Jer. xxxiv. 7), and is mentioned as one of the places re-occupied by the Jews after their return from captivity (Neh. xi. 30).

The position of Azekah has not yet been recognized. The above passages would seem to show that it must have been to the N. of the *Shefelah*, near Beth-horon; but by Eusebius and Jerome it is spoken of as lying between (ἀνὰ μέσον) Eleutheropolis and Jerusalem, *i. e.* further S. and in the mountains of Judah. Perhaps like Shochoh, Aphek, &c., there were more than one place of the name. Schwarz (p. 102) would identify it with "Tell Ezakaria" (*Zakariya* on Robinson's Map, 1856) not far from *Ain-shems*, and very possibly correctly. G.

A'ZEL (אָצֵל, in pause אָצֶל: 'Εσήλ; [Comp 'Ασήλ; Sin. in 1 Chr. ix. Εσαηλ:] *Asel*), a descendant of Saul (1 Chr. viii. 37, 38, ix. 43, 44).

A'ZEM (עָצֶם, when not emphasized עֶצֶם [*a bone*]: 'Ασόμ, 'Ιασόν; [Alex. Ασεμ, Ασομ:] *Asem, Esem*), a city in the extreme south of Judah (Josh. xv. 29), afterwards allotted to Simeon (xix. 3). Elsewhere it is EZEM. G.

AZEPHU'RITH, or more properly ARSIPHURITH ['Αρσιφουρίθ; Vat. Αρσειφουρειθ; Alex. Αρσιφουρειθ], a name which in the LXX. of 1 Esdr. v. 16 occupies the place of Jorah in Ezr. ii. 18, and of Hariph in Neh. vii. 24. It is altogether omitted in the Vulgate. Burrington conjectures that it may have originated in a combination of these two names corrupted by the mistakes of transcribers. The second syllable in this case probably arose from a confusion of the uncial Σ with Ε. W. A. W.

AZE'TAS ('Αζηνάν; [Ald.] Alex. 'Αζητάς: *Zelas*). The name of a family which returned with Zorobabel according to 1 Esdr. v. 15, but not mentioned in the catalogues of Ezra and Nehemiah. W. A. W.

AZ'GAD (עַזְגָּד: 'Ασγάδ: [Vat. Ezr. viii. 12, Ασταδ;] Alex. Αβγαδ, Αζγαδ, Αγεταδ: *Azgad*). The children of Azgad, to the number of 1222 (2322 according to Neh. vii. 17) were among the laymen who returned with Zerubbabel (Ezr. ii. 12). A second detachment of 110, with Johanan at their head, accompanied Ezra in the second caravan (Ezr. viii. 12). With the other heads of the people they joined in the covenant with Nehemiah (Neh. x. 15). The name appears as SADAS in 1 Esdr. v. 13, and the number of the family is there given 3222. In 1 Esdr. viii. 38, it is written ASTATH. W. A. W.

AZI'A ('Οζίας; [Vat. -ζει-; Alex. Ιοζίας; Ald 'Αζίας:] *Ozius*), a "servant of the temple" (1 Esdr. v. 31), elsewhere called UZZA.

AZI'EI (2 Esdr. i. 2), one of the ancestors of Esdras, elsewhere called AZARIAH and EZIAS.

A'ZIEL (עֲזִיאֵל: 'Οζιήλ [Vat. FA. -ζει-] *Oziel*), a Levite (1 Chr. xv. 20). The name is a shortened form of JAAZIEL (יַעֲזִיאֵל), which occurs in ver. 18 of same chapter.

AZI'ZA (עֲזִיזָא [*strong*]: 'Οζίζά; [Vat. M Οζεια:] *Aziza*). A layman of the family of Zattu, who had married a foreign wife after the return from Babylon (Ezr. x. 27); called SARDEUS in 1 Esdr. ix. 28. W. A. W.

[a] The verb occurs only in Is. v. 2, where it is rendered in the A. V "fenced;" but by Gesenius in his *Lexicon*, "grub thin um."

AZMA'VETH (עַזְמָוֶת [*strong unto death, Ges.*]: Ἀσμώθ [Vat.[1] Ἀσβωθ], Ἀζβών; Alex. Ἀζμωθ in 1 Chr.: *Azmaveth, Azmoth*). 1. One of David's mighty men, a native of Bahurim (2 Sam. xxiii. 31; 1 Chr. xi. 33), and therefore probably a Benjamite.

2. (Ἀσμώθ, Γαζμώθ; [Vat. Σαλμων, Γαζαωθ;] Alex. Ἀζμωθ: *Azmoth.*) A descendant of Mephibosheth, or Merib-baal (1 Chr. viii. 36, ix. 42. [In 1 Chr. viii. 36 the A. V. ed. 1611, etc. reads "Asmaveth," following the Bishops' Bible.]

3. (Ἀσμώθ; Alex. Ἀζμωθ.) The father of Jeziel and Pelet, two of the skilled Benjamite slingers and archers who joined David at Ziklag (1 Chr. xii. 3), perhaps identical with 1. It has been suggested that in this passage "sons of Azmaveth" may denote natives of the place of that name.

4. Overseer of the royal treasures in the reign of David (1 Chr. xxvii. 25.) W. A. W.

AZMA'VETH (עַזְמָוֶת: Ἀζμώθ: [Vat. in Ezr., Ασμωθ:] *Azmaveth*), a place to all appearance in Benjamin, being named with Anathoth, Kirjath-jearim and other towns belonging to that tribe. Forty-two of the *Bene-Azmaveth* returned from the captivity with Zerubbabel (Ezr. ii. 24). The "sons of the singers" seem to have settled round it (Neh. xii. 29). The name elsewhere occurs as BETH-AZMAVETH. Azmaveth does not make its appearance in the lists in Joshua, but the name was borne by several Benjamites of the kindred of Saul (1 Chr. viii. 36, ix. 42, xii. 3; in the last passage Bene-A. may merely denote natives of the place, especially as natives of Anathoth, Gibeah, &c. are mentioned in the same verse). G.

AZ'MON (עַצְמֹן or עָצְמוֹן [*strong*]: Ἀσεμωνᾶ, Σελμωνά; [Alex. once Ασελμωνα:] *Asemona*), a place named as being on the S. boundary of the Holy Land, apparently near the torrent of Egypt (*Wadi el-Arish*) (Num. xxxiv. 4, 5; Josh. xv. 4). It has not yet been identified. It is mentioned by Eusebius and Jerome (*Onom.*), but evidently was not actually known to them. G.

* Mr. Williams (*Holy City*, i. 462) would identify Azmon with *Aseimeh*, of which he speaks as west of *Kudeis* (Kedesh). Dr. Robinson in tracing the southern boundary of Judah (as laid down in Josh. xv. 1–4) makes no account of this proposed identification (*Phys. Geogr.* p. 17). Knobel remarks (*Exeget. Handb.* xiii. 414) that the name reminds us of the *'Azâzimeh*, an Arab tribe well known in that part of the desert (Rob. *Res.* i. 196). H.

AZ'NOTH-TA'BOR (אַזְנוֹת תָּבוֹר: Ἀθθαβώρ; [Alex.] Ἀζανωθ Θαβωρ: *Azanotthabor*) = *the ears* (*i. e.* possibly *the summits*) *of Tabor*, one of the landmarks of the boundary of Naphtali (Josh. xix. 34). The town, if town it be, or the reason for the expression contained in the name, has hitherto escaped recognition. By Eusebius (under Ἀζαναθθθ) it is mentioned as lying in the plain in the confines of Dio-cæsarea.

For the use of the word אֹזֶן = *ear*, comp. UZZEN-SHERAH; and for the metaphor involved in the name, comp. CHISLOTH TABOR. G.

A'ZOR (Ἀζώρ: *Azor*), son of Eliakim in the line of our Lord (Matt. i. 13, 14).

AZO'TUS. [ASHDOD.]

AZO'TUS, MOUNT (Ἀζώτου ὄρος, or Ἀζωτος ὄρος: *mons Azoti*). In the fatal battle in which Judas Maccabæus fell, he broke the right wing of Bacchides' army, and pursued them to Mount Azotus (1 Macc. ix. 15). Josephus calls it Aza, or Azara, according to many MSS., which Ewald finds in a mountain west of Birzeit, under the form Atara, the Philistine Ashdod being out of the question. W. A. W.

AZ'RIEL (עַזְרִיאֵל [*help of God*]: om. in Vat. MS. [rather, in the Rom. ed.; Vat. Εσδριηλ; Comp. Ἐζριήλ]; Alex. Ιεζριηλ: *Ezriel*). 1. The head of a house of the half-tribe of Manasseh beyond Jordan, a man of renown (1 Chr. v. 24).

2. (Ὀζιήλ; [Vat. Εσρειηλ:] *Ozriel.*) A Naphtalite, ancestor of Jerimoth the head of the tribe at the time of David's census (1 Chr. xxvii. 19); called UZZIEL in two Heb. MSS., and apparently in the LXX.

3. (Ἐσριήλ; Alex. Εσζριηλ: *Ezriel.*) The father of Seraiah, an officer of Jehoiakim (Jer xxxvi. 26). W. A. W.

AZ'RIKAM (עַזְרִיקָם [*help against the enemy*]: Ἐζρικάμ; [Vat. Εζρεικαν;] Alex. Εσρικαμ: *Ezricam*). 1. A descendant of Zerubbabel, and son of Neariah of the royal line of Judah (1 Chr. iii. 23).

2. ([Vat. Εζρεικαι, Εσδρεικαν;] Alex. Ἐζρικαμ.) Eldest son of Azel, and descendant of Saul (1 Chr. viii. 38, ix. 44).

3. ([Vat. Εσρεικαν, Εζερει;] in Neh. Ἐσρικάμ; Alex. Ἐζρι: *Azaricam.*) A Levite, ancestor of Shemaiah who lived in the time of Nehemiah (1 Chr. ix. 14; Neh. xi. 15).

4. (Ἐζρικάν; [Vat. Εγδρεικαν; Comp. Ἐσρικάμ.]) Governor of the house, or prefect of the palace to king Ahaz, who was slain by Zichri, an Ephraimite hero, in the successful invasion of the southern kingdom by Pekah, king of Israel (2 Chr. xxviii. 7). W. A. W.

AZU'BAH (עֲזוּבָה [*ruins*]: Γαζουβά; Alex. [once] Αζουβα: *Azuba*). 1. Wife of Caleb, son of Hezron (1 Chr. ii. 18, 19).

2. (Ἀζουβά [Vat. in 1 K. Αζαεβα]). Mother of king Jehoshaphat (1 K. xxii. 42; 2 Chr. xx. 31). W. A. W.

A'ZUR, properly **AZ'ZUR** (עַזּוּר [*helper*]: Ἀζώρ: *Azur*). 1. A Benjamite of Gibeon, and father of Hananiah the false prophet (Jer. xxviii. 1). Hitzig suggests that he may have been a priest, as Gibeon was one of the priestly cities.

2. (עַזּוּר: Ἐζερ; Alex. Ιαζερ.) Father of Jaazaniah, one of the princes of the people against whom Ezekiel was commanded to prophesy (Ez. xi. 1). W. A. W.

AZU'RAN (Ἀζαρού; Alex. Αζουρου; [Ald Ἀζουράν:] *Azoroc*). The sons of Azuran are enumerated in 1 Esdr. v. 15, among those who returned from Babylon with Zorobabel, but there is no corresponding name in the catalogues of Ezra and Nehemiah. Azuran may perhaps be identical with Azzur in Neh. x. 17. W. A. W.

AZ'ZAH (עַזָּה [*strong*]: Γάζη, Γάζα: *Gaza*) The more accurate rendering of the name of the well-known Philistine city, Gaza (Deut. ii. 23; 1 K. iv 24; Jer. xxv. 20). [GAZA.] W. A. W.

AZ'ZAN (עַזָּן [perh. *sharp*, Fürst]: Ὀζά: *Ozan*). The father of Paltiel, prince of the tribe

Digitized by Google

of Issachar, who represented his tribe in the division of the promised land (Num. xxxiv. 26).

W. A. W.

AZ'ZUR (עַזּוּר [*helper*]: Ἀζούρ; [Vat. Ἀδουρ; Ald. Ἀζζούρ:] *Azur*). One of the heads of the people who signed the covenant with Nehemiah (Neh. x. 17). The name is probably that of a family, and in Hebrew is the same as is elsewhere represented by AZUR. W. A. W.

B.

BA'AL (בַּעַל: Βάαλ: *Baal*), the supreme male divinity of the Phœnician and Canaanitish nations, as ASHTORETH was their supreme female divinity. Both names have the peculiarity of being used in the plural, and it seems certain that these plurals designate not (as Gesenius, *Thes.* s. vv., maintained) statues of the divinities, but different modifications of the divinities themselves. That there were many such modifications of Baal is certain from the fact that his name occurs with numerous adjuncts, both in the O. T. and elsewhere, as we shall have occasion to notice hereafter. The plural Baalim is found frequently alone (*e. g.* Judg. ii. 11, x. 10; 1 K. xviii. 18; Jer. ix. 14; Hos. ii. 17), as well as in connection with Ashtoreth (Judg. x. 6; 1 Sam. vii. 4) and with Asherah, or, as our version renders it, "the groves" (Judg. iii. 7; 2 Chr. xxxiii. 3). There is no difficulty in determining the meaning of the name, since the word is in Hebrew a common noun of frequent occurrence, having the meaning *Lord*, not so much, however, in the sense of Ruler as of *Master*, *Owner*, *Possessor*. The name of the god, whether singular or plural, is always distinguished from the common noun by the presence of the article (הַבַּעַל, הַבְּעָלִים), except when it stands in connection with some other word which designates a peculiar modification of Baal. In the Chaldaic form the word becomes shortened into בְּעֵל, and, thence dropping the guttural, בֵּל, BEL, which is the Babylonian name of this god (Buxtorf, *Lex. Chald. et Talm.*, Gesen., Fürst, Movers; the identity of the two words is, however, doubted by Rawlinson, *Herod.* i. 318).

There can be no doubt of the very high antiquity of the worship of Baal. We find his worship established amongst the Moabites and their allies the Midianites in the time of Moses (Num. xxii. 41), and through these nations the Israelites were seduced to the worship of this god under the particular form of Baal-Peor (Num. xxv. 3 ff.; Deut. iv. 3). Notwithstanding the fearful punishment which their idolatry brought upon them in this instance, the succeeding generation returned to the worship of Baal (Judg. ii. 10–13), and with the exception of the period during which Gideon was judge (Judg. vi. 26 ff., viii. 33) this form of idolatry seems to have prevailed amongst them up to the time of Samuel (Judg. x. 10; 1 Sam. vii. 4), at whose rebuke the people renounced the worship of Baalim. Two centuries pass over before we hear again of Baal in connection with the people of Israel, though we can scarcely conclude from this silence that his worship was altogether abandoned. We know that in the time of Solomon the service of many gods of the surrounding nations was introduced, and particularly that of Ashtoreth, with which Baal is so frequently connected. However this may be, the worship of Baal spread greatly, and together with that of Asherah became the religion of the court and people of the ten tribes under Ahab, king of Israel, in consequence of his marriage with Jezebel (1 K. xvi. 31–33; xviii. 19, 22). And though this idolatry was occasionally put down (2 K. iii. 2, x. 28) it appears never to have been permanently or effectually abolished in that kingdom (2 K. xvii. 16). In the kingdom of Judah also Baal-worship extensively prevailed. During the short reign of Ahaziah and the subsequent usurpation of his mother Athaliah, the sister of Ahab, it appears to have been the religion of the court (2 K. viii. 27; comp. xi. 18), as it was subsequently under Ahaz (2 K. xvi. 3; 2 Chr. xxviii. 2), and Manasseh (2 K. xxi. 3).

The worship of Baal amongst the Jews appears to have been appointed with much pomp and ceremonial. Temples were erected to him (1 K. xvi. 32; 2 K. xi. 18); his images were set up (2 K. x. 26); his altars were very numerous (Jer. xi. 13), were erected particularly on lofty eminences (1 K. xviii. 20), and on the roofs of houses (Jer. xxxii. 29); there were priests in great numbers (1 K. xviii. 19), and of various classes (2 K. x. 19); the worshippers appear to have been arrayed in appropriate robes (2 K. x. 22); the worship was performed by burning incense (Jer. vii. 9) and offering burnt-sacrifices, which occasionally consisted of human victims (Jer. xix. 5). The officiating priests danced with frantic shouts around the altar, and cut themselves with knives to excite the attention and compassion of the god (1 K. xviii. 26–28; comp. Lucian, *De Syria dea*, 50; Tert. *Apol.* 9; Lucan, i. 565; Tibull. i. 6, 47).

Throughout all the Phœnician colonies we continually find traces of the worship of this god, partly in the names of men such as Adher-bal, Asdrubal, Hanni-bal, and still more distinctly in Phœnician inscriptions yet remaining (Gesen. *Mon. Phœn.* passim). Nor need we hesitate to regard the Babylonian Bel (Is. xlvi. 1) or Belus (Herod. i. 181), as essentially identical with Baal, though perhaps under some modified form. Rawlinson distinguishes between the second god of the first triad of the Assyrian pantheon, whom he names provisionally Bel-Nimrod, and the Babylonian Bel whom he considers identical with Merodach (*Herod.* i. 594 ff.; 627 ff.).

The same perplexity occurs respecting the connection of this god with the heavenly bodies as we have already noticed in regard to Ashtoreth. Creuzer (*Symb.* ii. 413) and Movers (*Phön.* i. 180) declare Baal to be the Sun-god; on the other hand, the Babylonian god is identified with Zeus by Herodotus, and there seems to be no doubt that Bel-Merodach is the planet Jupiter (Rawlinson, *Herod.* l. c.). It is quite likely that in the case of Baal as well as of Ashtoreth the symbol of the god varied at different times and in different localities. Indeed the great number of adjuncts with which the name of Baal is found is a sufficient proof of the diversity of characters in which he was regarded, and there must no doubt have existed a corresponding diversity in the worship. It may even be a question whether in the original notion of Baal there was reference to any of the heavenly bodies, since the derivation of the name does not in this instance, as it does in the case of Ashtoreth point directly to them. If we separate the name Baal from idolatry, we seem, according to its mean

Digitized by Google

ng, to obtain simply the notion of Lord and Proprietor of all. With this the idea of productive power is naturally associated, and that power is as naturally symbolized by the sun, whilst on the other hand the ideas of providential arrangement and rule, and so of prosperity, are as naturally suggested by the word, and in the astral mythology these ideas are associated with the planet Jupiter. In point of fact we find adjuncts to the name of Baal answering to all these notions, *e. g.* Βεελσάμην, *Balsamen* (Plaut. *Pœn.* v. 2, 67) = בַּעַל־שָׁמַיִן, "Lord of the heavens;" בַּעַל־חָמָן, Baal-Hamon (Gesen. *Mon. Phœn.* 349), the Sun-Baal, and similarly the name of a city in the O. T. בַּעַל־הָמוֹן (Cant. viii. 11); בַּעַל־גָּד, Baal-Gad, the name of a city (Josh. xi. 17), Baal the Fortune-bringer, which god may be regarded as identical with the planet Jupiter (Gesen. *Thes.* Fürst). Many more compounds of Baal in the O. T. occur, and amongst them a large number of cities, which are mentioned below. We shall first mention those names of men and of gods in which Baal is the first element. It may be noted before proceeding to specify the particular compounds of Baal that the word standing alone occurs in the O. T. in two [three] instances as the name of a man (1 Chr. v. 5, viii. 30, [ix. 36]). Fürst considers that in these instances the latter element of the word is dropped.

1. BA'AL-BE'RITH (בַּעַל בְּרִית: [τῷ Βάαλ διαθήκην,] Βααλβερίθ; [Alex. τον Βααλ Βεερ εις διαθηκην, Βααλ διαθηκης: *Baal fœdus,*] *Baal-berit*). This form of Baal was worshipped at Shechem by the Israelites after the death of Gideon (Judg. viii. 33, ix. 4). The name signifies the *Covenant-Baal*, and has been compared with the Greek Ζεὺς ὅρκιος or the Latin *Deus fidius*. The meaning, however, does not seem to be the god who presides over covenants, but the god who comes into covenant with the worshippers. In Judg. ix. 46 he is called אֵל בְּרִית. We know nothing of the particular form of worship paid to this god.

2. BA'AL-ZE'BUB (בַּעַל זְבוּב: Βάαλ μυῖα: *Beelzebub*), the form of Baal worshipped at Ekron (2 K. i. 2, 3, [6,] 16). The meaning of the name is *Baal* or *Lord of the fly*. Though such a designation of the god appears to us a kind of mockery, and has consequently been regarded as a term of derision (Selden, *De Diis Syris*, p. 375), yet there seems no reason to doubt that this was the name given to the god by his worshippers, and the plague of flies in hot climates furnishes a sufficient reason for the designation. Similarly the Greeks gave the epithet ἀπόμυιος to Zeus (Pausan. v. 14, § 2; Clem. Alex. *Protrept.* ii. 38), and Pliny (xxix. 6, 34, init.) speaks of a Fly-god *Myiodes*. The name occurs in the N. T. in the well-known form BEELZEBUB [properly Beelzebul].

3. BA'AL-HA'NAN (בַּעַל חָנָן, *Baal is gracious*: Βαλλενάν, Βαλαεννάρ; [Alex. Βαλαεννων:] *Balnan*: comp. יְהוֹחָנָן, Ἰωάννης, *Jehovah is gracious*). (1.) The name of one of the early kings of Edom (Gen. xxxvi. 38, 39; 1 Chr. i. 49, 50).

(2.) (Βαλλαναάν, [Vat. Βαλαναs; Alex. Βαλλανα; Comp. Βαλαανάν].) The name of one of David's officers, who had the superintendence of his olive and sycamore plantations (1 Chr. xxvii. 28). He was of the town of Gederah (Josh. xv. 36) or Beth-Gader (1 Chr. ii. 51), and from his name we may conjecture that he was of Canaanitish, not Jewish origin.

4. BA'AL-PE'OR (בַּעַל פְּעוֹר: Βεελφεγώρ: *Beelphegor*). We have already referred to the worship of this god. The narrative (Num. xxv.) seems clearly to show that this form of Baal-worship was connected with licentious rites. Without laying too much stress on the Rabbinical derivation of the word פְּעוֹר, *hiatus*, i. e. "aperire hymenem virgineum," we seem to have reason to conclude that this was the nature of the worship. Baal-peor was identified by the Rabbins and early fathers with Priapus (see the authorities quoted by Selden, *De Diis Syris*, i. 4, 302 ff., who, however, dissents from this view). This is, moreover, the view of Creuzer (ii. 411), Winer, Gesenius, Fürst, and almost all critics. The reader is referred for more detailed information particularly to Creuzer's *Symbolik* and Movers's *Phönizier*. F. W. G.

BA'AL (בַּעַל), *geographical*. This word occurs as the prefix or suffix to the names of several places in Palestine. Gesenius has expressed his opinion (*Thes.* p. 225 *a*) that in these cases it has no reference to any worship of the god Baal, at the particular spot, but merely expresses that the place "possesses" or contains something special denoted by the other part of the name, the word Baal bearing in that case a force synonymous with that of BETH. Without being so presumptuous as to contradict this conclusion, some reasons may (with considerable hesitation) be mentioned for reconsidering it.

(*a.*) Though employed in the Hebrew Scriptures to a certain extent metaphorically, and there certainly with the force of "possession" or "ownership," — as a "lord of hair" (2 K. i. 8), "lord of dreams" (Gen. xxxvii. 19), &c., Baal never seems to have become a naturalized Hebrew word, but frequently occurs so as to betray its Canaanite origin and relationship. Thus it is several times employed to designate the inhabitants of towns either certainly or probably heathen, but rarely if ever those of one undoubtedly Hebrew. It is applied to the men of Jericho before the conquest (Josh. xxiv. 11); to the men of Shechem, the ancient city of Hamor the Hivite, who rose to recover the rights of Hamor's descendants long after the conquest of the land (Judg. ix. 2–51, with Ewald's commentary, *Gesch.* ii. 445–7), and in the account of which struggle, the distinction between the בַּעֲלֵי שְׁכֶם of Shechem, and the אַנְשֵׁי — the Hebrew relations of Abimelech — is carefully maintained. It is used for the men of Keilah, a place on the western confines of Judah, exposed to all the attacks and the influences of the surrounding heathen (1 Sam. xxiii. 11, 12), for Uriah the Hittite (2 Sam. xi. 26), and for others (Is. xvi. 8, &c.). Add to this the consideration that if Baal forms part of the name of a person we are sure to find the name mentioned with some Hebrew alteration, as Jerub-besheth for Jerub-baal, Mephibosheth for Merib-baal, Ish-bosheth for Esh-baal, and others. In Hos. ii. 16 a remarkable instance is preserved of the distinction, noticed above in connection with the record of the revolt at Shechem, between the hea-

Digitized by Google

then *Baal* and the Hebrew *Ish* — "at that day, saith Jehovah, men shall call Me 'Ishi,' and shall call Me no more 'Baali,'" both words having the sense of "my husband."

(*b.*) Such places called by this name or its compounds as can be identified, and several of which existed at the time of the conquest, were either near Phœnicia, as Baal-gad, Baal-hermon, Belmarkos (of later times); or in proximity to some other acknowledged seat of heathen worship, as Baal-meon and Bamoth-Baal, near the infamous seat of Baal-peor; or Kirjath-Baal and Baal-tamar, which were in the district containing the early and famous sanctuaries and high places of Gibeon and Bethel.

(*c.*) On more than one occasion Baal forms part of the names of places which we elsewhere discover to have been elevated spots, spots in which the worship of the Canaanites delighted. Thus Baal-hermon is elsewhere called "Mount B." and Baal-Perazim is (very probably) "Mount P." Baalath-beer too is called in the parallel lists Ramath (*i. e.* "height"). Compare the Vulgate rendering of Baalah in 1 Chr. xiii. 6, ad *collem* Cariathiarim.

(*d.*) There is the consideration of the very deep significance with which the name of Baal must always have been invested both for the Israelites and for their predecessors in the country; for those who venerated and those who were commanded to hate him. Surely this significance must have been sufficient to prevent that portentous name from becoming a mere alternative for a term which, like Beth, was in the commonest daily use.

The places in the names of which Baal forms a part are as follows: —

1. BA'AL [Βδαλ; Vat. Βαλαρ: *Baal*], a town of Simeon, named only in 1 Chr. iv. 33, and which from the parallel list in Josh. xix. seems to have been identical with BAALATH-BEER.

2. BA'ALAH (בַּעֲלָה [fem. *possessor*, i. e. of a town = *city* or *state*, Ges.]: Βδαλ; [in Josh. xv. 9, Vat. Ιεβααλ for εἰς Βδαλ; 11, ἐπὶ λίβα, Alex.] Βαλά: *Baala*).

(*a.*) Another name for KIRJATH-JEARIM, or KIRJATH-BAAL, the well-known town, now *Kuriet el Enab*. It is mentioned in Josh. xv. 9, 10; 1 Chr. xiii. 6 (εἰς πόλιν Δαυίδ; *ad collem Cariathiarim*). In Josh. xv. 11, it is called Mount (הַר) Baalah, and in xv. 60, and xviii. 14, Kirjath-Baal. From the expression "Baalah, which is Kirjath-jearim" (comp. "Jebusi, which is Jerusalem," xviii. 28), it would seem as if Baalah were the earlier or Canaanite appellation of the place. In 2 Sam. vi. 2, the name occurs slightly altered as "Baale of Judah" (בַּעֲלֵי יְהוּדָה), ἀπὸ τῶν ἰχόντων Ἰούδα, *de viris Juda*).

(*b.*) [Βαλά; Ald. Alex. Βααλά.] A town in the south of Judah (Josh. xv. 29), which in xix. 3 is called BALAH, and in the parallel list (1 Chr. iv. 29) BILHAH.

3. BA'ALATH (בַּעֲלַת: [Γεβεελάν, Βαλαάθ, om. in 1 K.; Vat. in 2 Chr. Βαλαα; Alex. Βαλααν, Βαλαθ, Βαλααs: *Balaath*, 1 K.] *Baalath*), a town of Dan named with Gibbethon, Gath-rimmon, and other Philistine places (Josh. xix. 44). It is possible that the same town is referred to in 1 K. ix. 18 and 2 Chr. viii. 6 (Βαλαάθ). See Joseph. *Ant.* viii. 6, § 1.

4. BA'ALATH-BE'ER (בַּעֲלַת בְּאֵר, *Baal of the well* = Holy-well: Βαλέκ; [Vat.[1] Βαρεκ; Alex. Βααλ Θερηρραμμωθ; Ald. Βαλέθ Βηραμμώθ; Comp. Βααλάθ Βηραθμώθ:] *Baalath-Beer*), a town among those in the south part of Judah, given to Simeon; and which also bore the name of RAMATH-NEGEB, or "the heights of the South" (Josh. xix. 8). In another list it appears in the contracted form of BAAL. [See 1.]

Other sacred wells in this parched region were the Beer-lahai-roi, the "well of the vision of God:" and Beer-sheba, the "well of the oath."

5. BA'AL-GAD (בַּעַל גָּד: Βαλαγάδ; [Ald Alex. Βαλγάδ; Comp. Βααλγάδ; in Josh. xiii. 5, Γαλγάλ, Comp. Βαελγάδ; xii. 7, Vat. M. Βαλαγαδδα:] *Baalgad*), a place evidently well known at the time of the conquest of Palestine, and as such used to denote the most northern (Josh. xi. 17, xii. 7) or perhaps northwestern (xiii. 5, Hamath being to the extreme northeast) point to which Joshua's victories extended. It was in all probability a Phœnician or Canaanite sanctuary of Baal under the aspect of Gad, or Fortune. [GAD.] No trace of its site has yet been discovered. The words "the plain (בִּקְעָה) of Lebanon" would lead to the supposition that it lay in the great plain between the two ranges of Lebanon and Anti-Lebanon, which is still known by the same Hebrew word *el-Bûkâ'a*; and it has accordingly been identified by Iken and others with Baalbec (Rob. iii. 519). But against this are the too great distance of Baalbec to the north, and the precise expression of the text — "under Mount Hermon" (Jerome: ad radices montis Hermon). The conjecture of Schwarz (p. 60), supported by Robinson with his usual care, is, that the modern representative of Baalgad is *Banias*, a place which long maintained a great reputation as the sanctuary of Pan. [CÆSAREA PHILIPPI.]

6. BA'AL-HA'MON (בַּעַל הָמוֹן, *Baal of multitude*: Βεελαμών: *ea quæ habet populos*), a place at which Solomon had a vineyard, evidently of great extent (Cant. viii. 11). The only possible clue to its situation is the mention in Judith viii. 3, of a Belamôn or Balamôn ([Rom. Βελαμών; Vat. Alex.] Βαλαμων; [Comp. Ald. Βαλαμώ: *Bethulia*:] A. V. BALAMO) near Dothaim; and therefore in the mountains of Ephraim, not far north of Samaria. If so, this vineyard may have been in one of the "fat valleys" of the "drunkards of Ephraim, who are overcome with wine," to which allusion is made in Is. xxviii. 1.

7. BA'AL-HA'ZOR (בַּעַל חָצוֹר, *Baal's village*: Βελασώρ; [Vat. Βαιλασωρ;] Alex. Βεθλασωρ; [Comp. Βααλασώρ:] *Baalhasor*), a place "'by' Ephraim" (עִם־אֶפְרַיִם), where Absalom appears to have had a sheep-farm, and where Amnon was murdered (2 Sam. xiii. 23).

8. MOUNT BA'AL-HER'MON (הַר בַּעַל חֶרְמוֹן, ([τὸ ὄρος τοῦ Ἀερμών, Alex. τ. ὀ. τ. Βαλαερμων, Comp. Ald. τ. ὀ. τ. Βαὰλ Ἑρμών *mons Baal-Hermon*,] Judg. iii. 3), and simply Baal-hermon ([Βαὰλ Ἑρμών, Vat.[1] Βαιλειμ: *Baal Hermon*,] 1 Chr. v. 23)). This is usually considered as a distinct place from Mount Hermon but the only apparent ground for so doing is the statement in the latter of the above passages "unto

Digitized by Google

Baal-hermon, and Senir, and a Mount Hermon;" but it is quite possible that the conjunction rendered "and" may be here, as often elsewhere, used as an expletive, — "unto Baal-hermon, even Senir, even Mount Hermon." Perhaps this derives some color from the fact, which we know, that this mountain had at least three names (Deut. iii. 9). May not Baal-hermon have been a fourth, in use among the Phœnician worshippers of Baal, one of whose sanctuaries, Baal-gad, was at the foot of this very mountain?

9. Ba'al-me'on (בַּעַל מְעוֹן: ἡ Βεελμεών; [in 1 Chr., Βεελμασσών; Ald. Alex. Βεελμαών; Comp. Βεελμεών; in Ez., most MSS. om.:] *Baal-meon*, [*Beelmeon*]), one of the towns which were "built" by the Reubenites (Num. xxxii. 38), and to which they "gave other names." Possibly the "Beth," which is added to the name in its mention elsewhere, and which sometimes superseded the "Baal" of the original name, is one of the changes referred to. [Beth-baal-meon: Beth-meon.] It is also named in 1 Chr. v. 8, and on each occasion with Nebo. In the time of Ezekiel it was Moabite, and under that prosperous dominion had evidently become a place of distinction, being noticed as one of the cities which are the "glory of the country" (Ez. xxv. 9). In the days of Eusebius and Jerome (*Onom.* Balmen) it was still a "vicus maximus" called Balmano, 9 miles distant from Heshbon ('Ιέβους, *Esbus*), near the "mountain of the hot springs," and reputed to be the native place of Elisha.

* The site is still known. "Taking a sweep on the fine turf to the southeast" (from *Heshbon*), says Mr. Tristram (*Land of Israel*, p. 540), "we passed by the ruins of *Ma'in* (Baal-meon), situated on a mamelon exactly like Heshbon, and due east of *Nebbah*, shapeless and featureless, at which a cursory glance was sufficient." H.

10. Ba'al-per'azim (בַּעַל פְּרָצִים: *Baal-pharasim*), the scene of a victory of David over the Philistines, and of a great destruction of their images, and so named by him in a characteristic passage of exulting poetry — "'Jehovah hath burst (פָּרַץ) upon mine enemies before me as a burst (פֶּרֶץ) of waters.' Therefore he called the name of that place 'Baal-perazim,'" i. e bursts or destructions (2 Sam. v. 20; 1 Chr. xiv. 11). The place and the circumstance appear to be again alluded to in Is. xxviii. 21, where it is called *Mount* P. Perhaps this may point to the previous existence of a high place or sanctuary of Baal at this spot, which would lend more point to David's exclamation (see Gesenius, *Jes.* 844). The LXX. render the name in its two occurrences, respectively Ἐπάνω διακοπῶν, and Διακοπὴ φαρασίν: [Vat. -ρι-; in 1 Chr. xiv. 11a Βαὰλ Φαρασίν, Alex. -σειν; Vat. Φααλ Φαθσειμ:] the latter an instance of retention of the original word and its explanation side by side; the former uncertain.

11. Ba al-shal'isha (בַּעַל שָׁלִשָׁה: Βαιθαρισά; [Vat. M. Βαιθαρεισα, H. Βαιθσαρεισα; Alex.2] Βαθσαρι, [Alex.1 Βαθσαρισα; Comp. Βαὰλ Σαλισά:] *Baalsalisa*), a place named only in 2 K. iv. 42; apparently not far from Gilgal (comp. v. 38). It was possibly situated in the district, or "land" of the same name. [Shalisha.]

12. Ba'al-ta'mar (בַּעַל תָּמָר, *sanctuary of the palm*: Βαὰλ Θαμάρ: *Baalthamar*), a place named only in Judg. xx. 33, as near Gibeah of Benjamin. The palm-tree (תָּמָר) of Deborah (iv. 5) was situated somewhere in the locality, and is possibly alluded to (Stanley, 145, 6). In the days of Eusebius it was still known under the altered name of Βηθθαμάρ; but no traces of it have been found by modern travellers. G.

13. Ba'al-ze'phon (בַּעַל צְפוֹן, *place of Zephon*: Βεελσεπφών, Βεελσεπφών; [Alex. Βεελσεφων:] *Beelsephon*), a place in Egypt near where the Israelites crossed the Red Sea (Ex. xiv. 2, 9; Num. xxxiii. 7). From the position of Goshen and the indications afforded by the narrative of the route of the Israelites, we place Baal-zephon on the western shore of the Gulf of Suez, a little below its head, which at this time was about 30 or 40 miles northward of the present head. [Goshen; Red Sea, Passage of]. Its position with respect to the other places mentioned with it is clearly indicated. The Israelites encamped before or at Pi-hahiroth, between Migdol and the sea, before Baal-zephon, according to Ex. (xiv. 2, 9), while in Num. Pi-hahiroth is described as being before Baal-zephon, and it is said that when the people came to the former place they pitched before Migdol (Num. xxxiii. 7); and again, that afterwards they departed from before Pi-hahiroth, here in Heb. Hahiroth (v. 8). Migdol and Baal-zephon must therefore have been opposite to one another, and the latter behind Pi-hahiroth with reference to the Israelites. Baal-zephon was perhaps a well-known place, if, as seems likely, it is always mentioned to indicate the position of Pi-hahiroth, which we take to be a natural locality [Red Sea, Passage of; Pi-hahiroth]. The name has been supposed to mean "place of Typhon," or "sacred to Typhon," an etymology approved by Gesenius (*Thes.* s. v.). Zephon would well enough correspond in sound to Typhon, had we any ground for considering the latter name to be either Egyptian or Semitic, but as we have not, the conjecture is a very bold one. Were, however, Typhon an Egyptian word, we could not consider Zephon in Baal-zephon to be its Hebrew transcription, inasmuch as it is joined with the Hebrew form בַּעַל. We would rather connect Baal-zephon, as a Hebrew compound, with the root צָפָה, as if it were named from a watch-tower on the frontier like the neighboring מִגְדֹּל, "the tower." It is noticeable that the name of the son of Gad called Ziphion צְפִיוֹן in Gen. (xlvi. 16) is written Zephon צְפוֹן in Num. (xxvi. 15). The identifications of Baal-zephon that have been proposed depend upon the supposed meaning "place of Typhon." Forster (*Epp. ad Mich.*, pp. 28, 29) thinks it was Heroopolis, Ἡρώων πόλις, which some, as Champollion (*L'Égypte sous les Pharaons*, ii. 87 ff.) consider, wrongly, to be the same as Avaris, the stronghold of the Hycsos, both which places were connected with Typhon (Steph. B. s. v. Ἡρώ; Manetho, ap. Joseph. c. *Apion.* i. 26). Avaris cannot be Heroopolis, for geographical reasons. (Comp., as to the site of Avaris, Brugsch, *Geographische*

a The "unto" in the A. V. is interpolated, though not so marked.

Inschriften, i. 86 ff.; as to that of Heroopolis, Lepsius, *Chron. d. Ægypt.* i. 344 ff., and p. 342, against the two places being the same.)

R. S. P.

BA'AL (בַּעַל: Ἰωήλ; Alex. Βααλ: *Baal*). 1. A Reubenite, whose son or descendant Beerah was carried off by the invading army of Assyria under Tiglath-Pileser (1 Chr. v. 5).

2. (Βάαλ; [Vat. M. 1 Chr. viii. 30, Βααλακεμ]). The son of Jehiel, father or founder of Gibeon, by his wife Maachah; brother of Kish, and grandfather of Saul (1 Chr. viii. 30, ix. 36).

W. A. W.

BA'ALAH. [BAAL, No. 2.]

BA'ALATH. [BAAL, Nos. 3, 4.]

BA'ALE OF JUDAH. [BAAL, No. 2, *a*.]

* **BAALI** (בַּעֲלִי: Βααλείμ: *Baali*), as employed in Hos. ii. 16, has a twofold sense: first, *my Baal*, the name of the principal god of the Canaanites; and, second, *my lord*, as applied by a woman to her husband (Ex. xxi. 22; 2 Sam. xi. 26). The passage is: "And it shall be at that day, saith the Lord, that thou shalt call me Ishi, and shalt call me no more Baali." The time is coming, the prophet would say, when Israel shall utterly renounce his idolatry, and so far from going after heathen gods, shall not even take upon his lips so much as a word that would revive even a thought of the old idolatry which had been so base a violation of the covenant of marriage between Jehovah and his people. See the next verse (17th) which confirms this view. Consult Manger (*Comment. in Libr. Hos.* p. 132), and Pusey (*Minor Prophets*, Part I. p. 19). The A. V. (*marg.*) translates both terms (*my husband: my lord*). The Vulgate translates the former (*meus vir*), but does not translate the latter. H.

BA'ALIM. [BAAL.]

BA'ALIS (בַּעֲלִיס: Βελεισσα: [Vat. FA.s Βελεισα; Alex. -λι-:] *Baalis*), king of the Bene-Ammon (*βασιλεὺς υἱὸς Ἀμμών*) at the time of the destruction of Jerusalem by Nebuchadnezzar (Jer. xl. 14).

BA'ANA (בַּעֲנָא [*son of affliction*]: Βαανά, [Alex.] Βαανα: *Bana*), the name of several men. 1. The son of Ahilud, Solomon's commissariat officer in Jezreel and the north of the Jordan valley (1 K. iv. 12).

2. [(Βαανά: *Baana.*) The father of Zadok, one of those who repaired the wall of Jerusalem after the captivity] (Neh. iii. 4).

3. [Βαανά: Vulg. corrupt.] (1 Esdr. v. 8.) BAANAH, 4.]

BA'ANAH (בַּעֲנָה [= בַּעֲנָא, see above]: Βααναά; [Vat. in 2 Sam. iv. 5, 9, Βααμ; 6, Βαμμα:] *Baana*). 1. Son of Rimmon, a Benjamite, who with his brother Rechab murdered Ish-bosheth. For this they were killed by David, and their mutilated bodies hung up over the pool at Hebron (2 Sam. iv. 2, 5, 6, 9).

2. [Alex. Βααναα, Βαανα; Rom. Vat. in 1 Chr. Νοοζά; in 2 Sam. om.] A Netophathite, father of Heleb or Heled, one of David's mighty men (2 Sam. xxiii. 29; 1 Chr. xi. 30).

3. (Accurately Baana, בַּעֲנָא: Βαανά; [Alex. Βαανας:] *Baana*), son of Hushai, Solomon's commissariat officer in Asher (1 K. iv. 16).

4. A man who accompanied Zerubbabel on his return from the captivity (Ezr. ii. 2; Neh. vii. 7). Possibly the same person is intended in Neh. x. 27. [BAANA, 3.]

BAANI'AS (Βαναίας; [Vat. M.] Alex. Βαναιας; [Wechel Βααναίας:] *Bannas*). BENAIAH, of the sons of Pharosh (1 Esdr. ix. 26; comp. Ezr. x. 25).

BA'ARA (בַּעֲרָא [*brutish*]: Βααδά; [Vat. Ιβααδα;] Alex. Βααρα: *Bara*), one of the wives of Shaharaim, a descendant of Benjamin (1 Chr. viii. 8).

BAASE'IAH [4 syl.] (בַּעֲשֵׂיָה [*work of Jehovah*]: Βααλα; [Vat. Μααναι:] *Baasia*), a Gershonite Levite, one of the forefathers of Asaph the singer (1 Chr. vi. 40 [25]).

BA'ASHA (בַּעְשָׁא [in some eds. בַּעֲשָׁא]: Βαασά; Joseph. Βασάνης: *Baasa*), third sovereign of the separate kingdom of Israel, and the founder of its second dynasty. The name, according to Gesenius, is from a root *to be wicked*, but this would seem impossible unless it has been altered [ABIJAH], and Calmet suggests that it may mean *in the work*, from בְּ *in*, and עָשָׂה *to make*, or *he who seeks* בָּעָה and *lays waste* שָׁאָה. Baasha was son of Ahijah of the tribe of Issachar, and conspired against King Nadab, son of Jeroboam, when he was besieging the Philistine town of Gibbethon, and killed him with his whole family. He appears to have been of humble origin, as the prophet Jehu speaks of him as having been "exalted out of the dust" (1 K. xvi. 2). In matters of religion his reign was no improvement on that of Jeroboam; he equally forgot his position as king of the nation of God's election, and was chiefly remarkable for his persevering hostility to Judah. It was probably in the 13th year of his reign [ASA] that he made war on its king Asa, and began to fortify Ramah as an ἐπιτείχισμα against it. He was defeated by the unexpected alliance of Asa with Benhadad I. of Damascus, who had previously been friendly to Baasha. Benhadad took several towns in the N. of Israel, and conquered lands belonging to it near the sources of Jordan. Baasha died in the 24th year of his reign, and was honorably buried in the beautiful city of Tirzah (Cant. vi. 4), which he had made his capital. The dates of his accession and death according to Clinton (*F. H* i. 321) are B. C. 953 and B. C. 931 (1 K. xv. 27, xvi 7; 2 Chr. xvi. 1–6). G. E. L. C.

* Fürst derives the name from an obsolete root (existing in Arabic) = *valor, boldness*. H.

BA'BEL, BAB'YLON, &c. (בָּבֶל: Βαβυλών: [*Babel, Babylon*]) is properly the capital city of the country which is called in Genesis *Shinar* (שִׁנְעָר) and in the later Scriptures *Chaldæa*, or the land of the Chaldæans: (כַּשְׂדִּים). The name is connected in Genesis with the Hebrew root בָּלַל, "*confundere*," "because the Lord did there confound the language of all the earth" (Gen. xi. 9); but the native etymology is *Bab-il*, "the gate of the god *Il*," or perhaps more simply "the gate of God;" and this no doubt was the original intention of the appellation as given by Nimrod, though the other sense came to be attached to it after the confusion of tongues. Probably a temple was the

Digitized by Google

first building raised by the primitive nomads, and in the gate of this temple justice would be administered in early times (comp. 2 Sam. xix. 8), after which houses would grow up about the gate, and in this way the name would readily pass from the actual portal of the temple to the settlement. According to the traditions which the Greeks derived from the Babylonians in Alexander's age the city was originally built about the year B. C. 2230. The architectural remains discovered in southern Babylonia, taken in conjunction with the monumental records, seem to indicate that it was not at first the capital, nor, indeed, a town of very great importance. It probably owed its position at the head of Nimrod's cities (Gen. x. 10) to the power and preëminence whereto it afterwards attained rather than to any original superiority that it could boast over the places coupled with it. *Erech*, *Ur*, and *Ellasar*, appear to have been all more ancient than Babylon, and were capital cities when *Babil* was a provincial village. The first rise of the Chaldæan power was in the region close upon the Persian Gulf, as Berosus indicated by his fish-god Oannes, who brought the Babylonians civilization and the arts out of the sea (ap. Syncell. p. 28, B.). Thence the nation spread northwards up the course of the rivers, and the seat of government moved in the same direction, being finally fixed at Babylon, perhaps not earlier than about B. C. 1700.

1. *Topography of Babylon — Ancient descriptions of the city.* — The descriptions of Babylon which have come down to us in classical writers are derived chiefly from two sources, the works of Herodotus and of Ctesias. These authors were both of them eye-witnesses of the glories of Babylon — not, indeed, at their highest point, but before they had greatly declined — and left accounts of the city and its chief buildings, which the historians and geographers of later times were, for the most part, content to copy. The description of Herodotus is familiar to most persons. According to this, the city, which was built on both sides of the Euphrates, formed a vast square, inclosed within a double line of high walls, the extent of the outer circuit being 480 stades, or about 56 miles. The entire area included would thus have been about 200 square miles. Herodotus appears to imply that this whole space was covered with houses, which, he observes, were frequently three or four stories high. They were laid out in straight streets crossing each other at right angles, the cross streets leading to the Euphrates being closed at the river end with brazen gates, which allowed or prevented access to the quays wherewith the banks of the Euphrates were lined along its whole course through the city. In each division of the town, Herodotus says, there was a fortress or stronghold, consisting in the one case of the royal palace, in the other of the great temple of Belus. This last was a species of pyramid, composed of eight square towers placed one above the other, the dimensions of the basement tower being a stade — or above 200 yards — each way. The height of the temple is not mentioned by Herodotus. A winding ascent, which passed round all the towers, led to the summit, on which was placed a spacious ark or chapel, containing no statue, but regarded by the natives as the habitation of the god. The temple stood in a sacred precinct two stades (or 400 yards) square, which contained two altars for burnt-offerings and a sacred ark or chapel, wherein was the golden image of Bel. The two portions of the city were united by a bridge, composed of a series of stone piers with movable platforms of wood stretching from one pier to another. Such are the chief features of the description left us by Herodotus (i. 178-186).

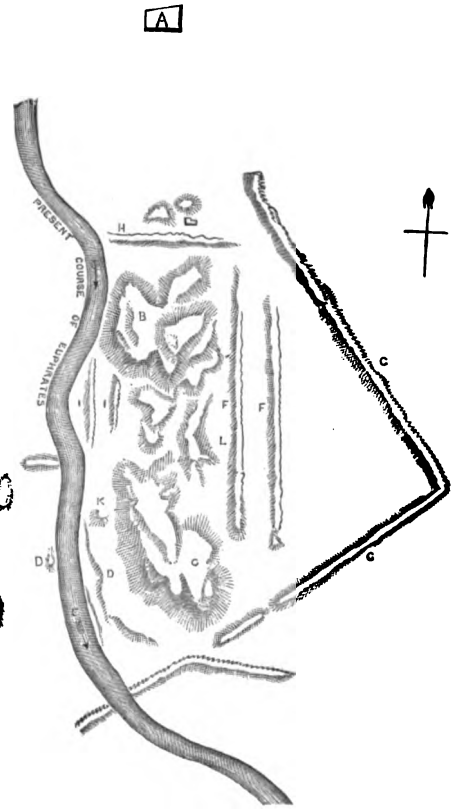
According to Ctesias (ap. Diod. Sic. ii. 7, ff.) the circuit of the city was not 480 but 360 stades — which is a little under 42 miles. It lay, he says, on both sides of the Euphrates, and the two parts were connected together by a stone bridge five stades (above 1000 yards) long, and 30 feet broad, of the kind described by Herodotus. At either extremity of the bridge was a royal palace, that in the eastern city being the more magnificent of the two. It was defended by a triple *enceinte*, the outermost 60 stades, or 7 miles round; the second, which was circular, 46 stades, or 4½ miles; and the third 20 stades, or 2½ miles. The height of the second or middle wall was 300 feet, and its towers were 420 feet. The elevation of the innermost circuit was even greater than this. The walls of both the second and the third inclosure were made of colored brick, and represented hunting scenes — the chase of the leopard and the lion — with figures, male and female, regarded by Ctesias as those of Ninus and Semiramis. The other palace was inferior both in size and magnificence. It was inclosed within a single *enceinte*, 30 stades, or 3½ miles in circumference, and contained representations of hunting and battle scenes as well as statues in bronze, said to be those of Ninus, Semiramis, and Jupiter Belus. The two palaces were joined, not only by the bridge, but by a tunnel under the river! Ctesias's account of the temple of Belus has not come down to us. We may gather however, that he represented its general character in much the same way as Herodotus, but spoke of it as surmounted by three statues, one of Bel, 40 feet high, another of Rhea, and a third of Juno or Beltis. He seems further to have described elaborately the famous "hanging gardens" of Nebuchadnezzar (Diod. Sic. ii. 10) but the description, as reported by Diodorus, is not very intelligible. It appears that they were a square of 400 feet each way, and rose in terraces, the topmost terrace being planted with trees of all kinds, which grew to a great size.

In examining the truth of these descriptions, we shall most conveniently commence from the outer circuit of the town. All the ancient writers appear to agree in the fact of a district of vast size, more or less inhabited, having been inclosed within lofty walls, and included under the name of Babylon. With respect to the exact extent of the circuit they differ. The estimate of Herodotus and of Pliny (*H. N.* vi. 26) is 480 stades, of Strabo (xvi. i, § 5) 385, of Q. Curtius (v. 1 § 26) 368, of Clitarchus (ap. Diod. Sic. ii. 7) 365, and of Ctesias (ap. eund.) 360 stades. It is evident that here we have merely the moderate variations to be expected in independent measurements, except in the first of the numbers. Setting this aside, the difference between the greatest and the least of the estimates is little more than ½ per cent.[a] With this near agreement on the part of so many authors, it is the more surprising that in the remaining case we should find the great difference of one third more, or 33½ per cent. Perhaps the true explanation is that Herodotus spoke of the *outer* wall, which could be traced

[a] If the estimate of Ctesias be regarded as 100, that of Clitarchus will be . . . 100·1923
" Q. Curtius 100·2
" Strabo 100·694; but
" Herodotus 133·3

Digitized by Google

in his time, while the later writers, who never speak of an inner and an outer barrier, give the measurement of Herodotus's *inner* wall, which may have alone remained in their day. This is the opinion of M. Oppert, who even believes that he has found traces of both inclosures, showing them to have been really of the size ascribed to them. This conclusion is at present disputed, and it is the more general belief of those who have examined the ruins with attention that no vestiges of the ancient walls are to be found, or at least, that none have as yet been discovered. Still it is impossible to doubt that a line of wall inclosing an enormous area originally existed. The testimony to this effect is too strong to be set aside, and the disappearance of the wall is easily accounted for, either by the constant quarrying, which would naturally have commenced with it (Rich, *First Mem.* p. 44), or by the subsidence of the bulwark into the moat from which it was raised. Taking the lowest estimate of the extent of the circuit, we shall have for the space within the rampart an area of above 100 square miles; nearly five times the size of London! It is evident that this vast space cannot have been entirely covered with houses. Diodorus confesses (ii. 9, *ad fin.*) that but a small part of the enclosure was inhabited in his own day, and Q. Curtius (v. 1. § 27) says that as much as nine-tenths consisted, even in the most flourishing times, of gardens, parks, paradises, fields, and orchards.



With regard to the height and breadth of the walls there is nearly as much difference of statement as with regard to their extent. Herodotus makes the height 200 royal cubits, or 337½ feet; Ctesias 50 fathoms, or 300 feet; Pliny and Solinus 200 royal feet; Strabo 50 cubits, or 75 feet. Here there is less appearance of independent measurements than in the estimates of length. The two original statements seem to be those of Herodotus and Ctesias, which only differ accidentally, the latter having omitted to notice that the royal scale was used The later writers do not possess fresh data; they merely soften down what seems to them an exaggeration — Pliny and Solinus changing the cubits of Herodotus into feet, and Strabo the fathoms of Ctesias into cubits. We are forced then to fall back on the earlier authorities, who are also the only eye-witnesses; and surprising as it seems, perhaps we must believe the statement, that the vast inclosed space above mentioned was surrounded by walls which have well been termed "artificial mountains," being nearly the height of the dome of St. Paul's! (See Grote's *Greece*, vol. iii. p. 397, and, on the other side, Mure's *Lit. of Greece*; vol. iv. p. 546.) The ruined wall of Nineveh was, it must be remembered, in Xenophon's time 150 feet high (*Anab.* iii. 4, § 10), and another wall which he passed in Mesopotamia was 100 feet (*ibid.* ii. 4, § 12).

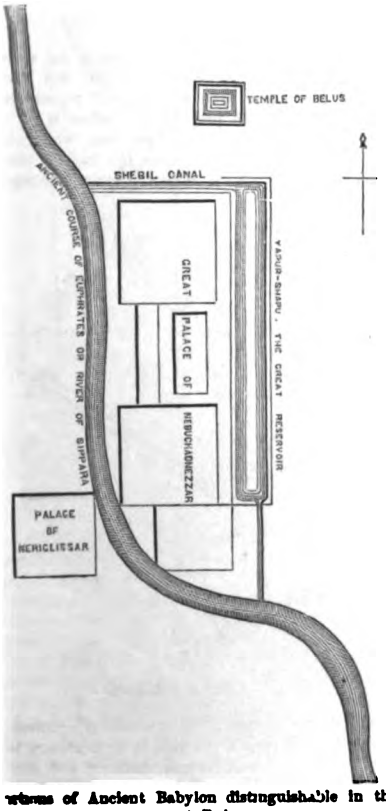
The estimates for the thickness of the wall are the following: — Herodotus, 50 royal cubits, or nearly 85 feet; Pliny and Solinus 50 royal, or about 60 common feet; and Strabo, 32 feet. Here again Pliny and Solinus have merely softened down Herodotus; Strabo, however, has a new number. This may belong properly to the inner wall, which, Herodotus remarks (i. 181), was of less thickness than the outer.

According to Ctesias the wall was strengthened with 250 towers, irregularly disposed, to guard the weakest parts (Diod. Sic. ii. 7); and according to Herodotus it was pierced with a hundred gates which were made of brass, with brazen lintels and side-posts (i. 179). The gates and walls are alike mentioned in Scripture, the height of the one and the breadth of the other being specially noticed (Jer. li. 58; comp. l. 15, and li. 53).

Herodotus and Ctesias both relate that the banks of the river as it flowed through the city were on each side ornamented with quays. The stream has probably often changed its course since the time of Babylonian greatness, but some remains of a quay or embankment (E) on the eastern side of the stream still exist, upon the bricks of which is read the name of the last king. The two writers also agree as to the existence of a bridge, and describe it very similarly. Perhaps a remarkable mound (K) which interrupts the long flat valley — evidently the ancient course of the river — closing in the principal ruins on the west, may be a trace of this structure.

2. *Present state of the Ruins.*— Before seeking to identify the principal buildings of ancient Baby-

Present State of the Ruins of Babylon



lon with the ruins near Hillah, which are universally admitted to mark the site, it is necessary to give an account of their present character and condition, which the accompanying plan will illustrate.

About five miles above *Hillah*, on the opposite or left bank of the Euphrates, occur a series o-

Digitized by Google

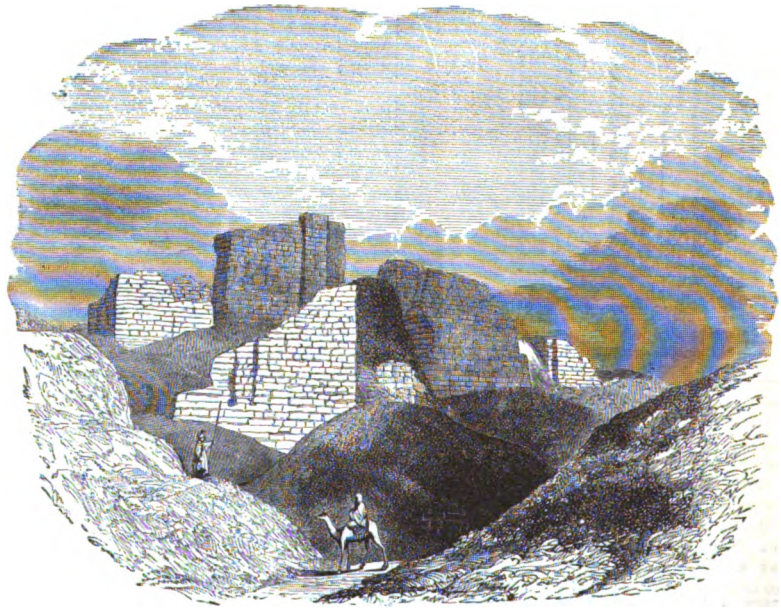
artificial mounds of enormous size, which have been recognized in all ages as probably indicating the site of the capital of southern Mesopotamia. They consist chiefly of "three great masses of building — the high pile of unbaked brickwork called by Rich 'Mujellibe,' but which is known to the Arabs as '*Babil*' (A); the building denominated the '*Kasr*' or palace (B); and a lofty mound (C), upon which stands the modern tomb of *Amrám-ibn-'Alí*" (Loftus's *Chaldæa*, p. 17). Besides these principal masses the most remarkable features are two parallel lines of rampart (F F) bounding the chief ruins on the east, some similar but inferior remains on the north and west (I I and H), an embankment along the river-side (E), a remarkable isolated heap (K) in the middle of a long valley, which seems to have been the ancient bed of the stream, and two long lines of rampart (G G) meeting at a right angle, and with the river forming an irregular triangle, within which all the ruins on this side (except *Babil*) are inclosed. On the west, or right bank, the remains are very slight and scanty. There is the appearance of an inclosure, and of a building of moderate size within it (D), nearly opposite the great mound of *Amram*; but otherwise, unless at a long distance from the stream, this side of the Euphrates is absolutely bare of ruins.

Scattered over the country on both sides of the Euphrates, and reducible to no regular plan, are a number of remarkable mounds, usually standing

Ruins of Ancient Babylon distinguishable in the present Ruins.

single, which are plainly of the same date with the great mass of ruins upon the river-bank. Of these, by far the most striking is the vast ruin called the *Birs-Nimrud*, which many regard as the tower of Babel, situated about six miles to the S. W. of Hillah, and almost that distance from the Euphrates at the nearest point. This is a pyramidical mound, crowned apparently by the ruins of a tower, rising to the height of 153½ feet above the level of the plain, and in circumference somewhat more than 2000 feet. As a complete description of it is given under the next article [BABEL, TOWER OF] no more need be said of it here. There is sufficient reason to believe from the inscriptions discovered on the spot, and from other documents of the time of Nebuchadnezzar, that it marks the site of Borsippa, and was thus entirely beyond the limits of Babylon (Beros. *Fr.* 14).

3. *Identification of sites.* — On comparing the existing ruins with the accounts of the ancient writers, the great difficulty which meets us is the position of the remains almost exclusively on the left bank of the river. All the old accounts agree in representing the Euphrates as running through the town, and the principal buildings as placed on the opposite sides of the stream. In explanation of this difficulty it has been urged, on the one hand, that the Euphrates having a tendency to run off to the right has obliterated all trace of the buildings in this direction (Layard's *Nin. and Bab* p. 493); on the other, that by a due extension of the area of Babylon it may be made to include the *Birs-Nimrud*, and that thus the chief existing remains will really lie on the opposite banks of the river (Rich, *Second Memoir*, p. 32; Ker Porter, *Travels*, ii. 383). But the identification of the *Birs* with Borsippa completely disposes of this latter theory; while the former is unsatisfactory, since we can scarcely suppose the abrasion of the river to have entirely removed all trace of such gigantic buildings as those which the ancient writers describe. Perhaps the most probable solution is to be found in the fact that a large canal (called *Shebil*) intervened in ancient times between the *Kasr* mound (B) and the ruin now called *Babil* (A), which may easily have been confounded by Herodotus with the main stream. This would have had the two principal buildings upon opposite sides; while the real river, which ran down the long valley to the west of the *Kasr* and *Amrám* mounds, would also have separated (as Ctesias related) between the greater and the lesser palace. If this explanation be accepted as probable, we may identify the principal ruins as follows: — 1. The great mound of *Babil* will be the ancient temple of Belus. It is an oblong mass, composed chiefly of unbaked brick, rising from the plain to the height of 140 feet, flattish at the top, in length about 200 and in breadth about 140 yards. This oblong shape is common to the temples, or rather temple-towers, of lower Babylonia, which seem to have had nearly the same proportions. It was originally coated with fine burnt brick laid in an excellent mortar, as was proved by Mr. Layard (*Nin. and Bab.* pp. 503-5); and was no doubt built in stages, most of which have crumbled down, but which may still be in part concealed under the rubbish. The statement of Berosus (*Fr.* 14), that it was rebuilt by Nebuchadnezzar, is confirmed by the fact that all the inscribed bricks which have been found in it bear the name of that king. It formed the tower of the temple and was surmounted by a chapel, but



Digitized by Google

he main shrine, the altars, and no doubt the residences of the priests, were at the foot, in a sacred precinct. 2. The mound of the *Kasr* will mark the site of the great Palace of Nebuchadnezzar. It is an irregular square of about 700 yards each way, and may be regarded as chiefly formed of the old palace-platform (resembling those at Nineveh, Susa, and elsewhere), upon which are still standing certain portions of the ancient residence whereto the name of "*Kasr*" or "Palace" especially attaches. The walls are composed of burnt bricks of a pale yellow color and of excellent quality, bound together by a fine lime cement, and stamped with the name and titles of Nebuchadnezzar. They

View of Babil, from the West.

"contain traces of architectural ornament — piers, buttresses, pilasters, &c." (Layard, p. 506); and in the rubbish at their base have been found slabs inscribed by Nebuchadnezzar and containing an account of the building of the edifice, as well as a few sculptured fragments and many pieces of enamelled brick of brilliant hues. On these last portions of figures are traceable, recalling the statements of Ctesias (ap. Diod. Sic.) that the brick walls of the palace were colored and represented hunting-scenes. No plan of the palace is to be made out from the existing remains, which are tossed in apparent confusion on the highest point of the mound. 3. The mound of *Amrâm* is thought

View of the Kasr.

Digitized by Google

by M. Oppert to represent the "hanging gardens" of Nebuchadnezzar; but this conjecture does not seem to be a very happy one. The mound is composed of poorer materials than the edifices of that prince, and has furnished no bricks containing his name. Again, it is far too large for the hanging-gardens, which are said to have been only 400 feet. each way. The *Amrám* mound is described by Rich as an irregular parallelogram, 1100 yards long by 800 broad, and by Ker Porter as a triangle, the sides of which are respectively 1400, 1100, and 850 feet. Its dimensions therefore very greatly exceed those of the curious structure with which it has been identified. Most probably it represents the ancient palace, coeval with Babylon itself, of which Nebuchadnezzar speaks in his inscriptions as adjoining his own more magnificent residence. It is the only part of the ruins from which bricks have been derived containing the names of kings earlier than Nebuchadnezzar; and is therefore entitled to be considered the most ancient of the existing remains. 4. The ruins marked DD on either side of the Euphrates, together with all the other remains on the right bank, may be considered to represent the lesser Palace of Ctesias, which is said to have been connected with the greater by a bridge across the river, as well as by a tunnel under the channel of the stream (!). The old course of the Euphrates

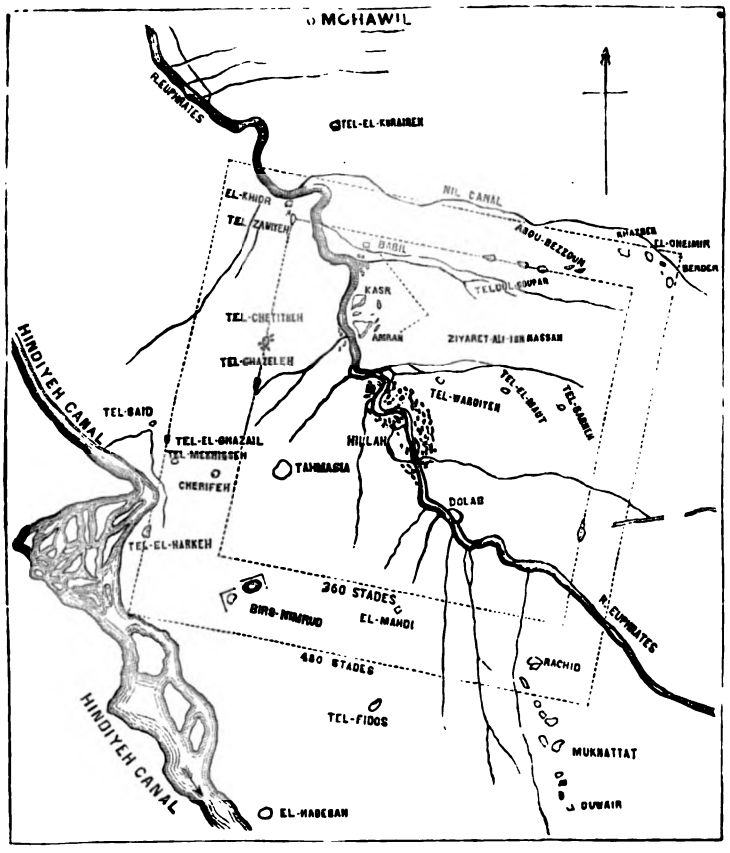


Chart of the country round Babylon, with limits of the ancient City, according to Oppert.

seems to have been a little east of the present one, passing between the two ridges marked I I, and then closely skirting the mound of *Amrám*, so as to have both the ruins marked D upon its right bank. These ruins are of the same date and style. The bricks of that on the left bank bear the name of Neriglissar; and there can be little doubt that this ruin, together with those on the opposite side of the stream, are the remains of a palace built by him. Perhaps (as already remarked) the mound K may be a remnant of the ancient bridge. 5. The two long parallel lines of embankment on the east (F F in the plan) which form so striking a feature in the remains as represented by Porter and Rich, but which are ignored by M. Oppert, may either be the lines of an outer and inner inclosure, of which Nebuchadnezzar speaks as defenses of his palace; or they may represent the embankments of an enormous reservoir, which is often mentioned by that monarch as adjoining his palace towards the east. 6. The embankment (E) is composed of bricks marked with the name of Labynetus or *Nabunit*, and is undoubtedly a portion of the work which Berosus ascribes to the last king (*Fr.* 14).

The most remarkable fact connected with the magnificence of Babylon, is the poorness of the material with which such wonderful results were produced. The whole country, being alluvial, was

Digitized by Google

entirely destitute of stone, and even wood was scarce and of bad quality, being only yielded by the palm-groves which fringed the courses of the canals and rivers. In default of these, the ordinary materials for building, recourse was had to the soil of the country — in many parts an excellent clay — and with bricks made from this, either sun-dried or baked, the vast structures were raised, which, when they stood in their integrity, provoked comparison with the pyramids of Egypt, and which even in their decay excite the astonishment of the traveller. A modern writer has noticed as the true secret of the extraordinary results produced, "the unbounded command of naked human strength" which the Babylonian monarchs had at their disposal (Grote's *Hist. of Greece*, vol. iii. p. 401); but this alone will not account for the phenomena, and we must give the Babylonians credit for a genius and a grandeur of conception rarely surpassed, which led them to employ the labor whereof they had the command in works of so imposing a character. With only "brick for stone," and at first only "slime (חֵמָר) for mortar" (Gen. xi. 3), they constructed edifices of so vast a size that they still remain at the present day among the most enormous ruins in the world, impressing the beholder at once with awe and admiration.

4. *History of Babylon.* — The history of Babylon mounts up to a time not very much later than the Flood. The native historian seems to have possessed authentic records of his country for above 2000 years before the conquest by Alexander (Beros. *Fr.* 11); and Scripture represents the "beginning of the kingdom" as belonging to the time of Nimrod, the grandson of Ham and the great-grandson of Noah (Gen. x. 6–10). Of Nimrod no trace has been found in the Babylonian remains, unless he is identical with the god Bel of the Babylonian Pantheon, and so with the Greek Belus, the hero-founder of the city. This identity is possible, and at any rate the most ancient inscriptions appear to show that the primitive inhabitants of the country were really Cushite, *i. e.* identical in race with the early inhabitants of Southern Arabia and of Ethiopia. The seat of government at this early time was, as has been stated, in lower Babylonia, Erech (*Warka*) and Ur (*Mugheir*) being the capitals, and Babylon (if built) being a place of no consequence. The country was called Shinár (שִׁנְעָר), and the people the *Akkadim* (comp. *Accad* of Gen. x. 10). Of the art of this period we have specimens in the ruins of *Mugheir* and *Warka*, the remains of which date from at least the 20th century before our era. We find the use of kiln-baked as well as of sun-dried bricks already begun; we find writing practiced, for the bricks are stamped with the names and titles of the kings; we find buttresses employed to support buildings, and we have probable indications of the system of erecting lofty buildings in stages. On the other hand, mortar is unknown, and the bricks are laid either in clay or in bitumen (comp. Gen. xi. 3); they are rudely moulded, and of various shapes and sizes; sun-dried bricks predominate, and some large buildings are composed entirely of them; in these reed-matting occurs at intervals, apparently used to protect the mass from disintegration. There is no trace of ornament in the erections of this date, which were imposing merely by their size and solidity.

The first important change which we are able to trace in the external condition of Babylon, is its subjection, at a time anterior to Abraham, by the neighboring kingdom of Elam or Susiana. Berosus spoke of a first Chaldæan dynasty consisting of eleven kings, whom he probably represented as reigning from B. C. 2234 to B. C. 1976. At the last mentioned date he said there was a change, and a new dynasty succeeded, consisting of 49 kings, who reigned 458 years (from B. C. 1976 to B. C. 1518). It is thought that this transition may mark the invasion of Babylonia from the East, and the establishment of Elamitic influence in the country, under Chedorlaomer (Gen. xiv.), whose representative appears as a conqueror in the inscriptions. Amraphel, king of Shinar, and Arioch, king of Ellasar (*Larsa*), would be tributary princes whom Chedorlaomer had subjected, while he himself may have become the founder of the new dynasty, which, according to Berosus, continued on the throne for above 450 years. From this point the history of Babylon is almost a blank for above twelve centuries. Except in the mention of the plundering of Job by the Chaldæans (Job i. 17), and of the "goodly Babylonish garment" which Achan coveted (Josh. vii. 21), Scripture is silent with regard to the Babylonians from the time of Abraham to that of Hezekiah. Berosus covered this space with three dynasties; one (which has been already mentioned) of 49 Chaldæan kings, who reigned 458 years; another of 9 Arab kings, who reigned 245 years; and a third of 49 Assyrian monarchs, who held dominion for 526 years; but nothing beyond this bare outline has come down to us on his authority concerning the period in question. The monumental records of the country furnish a series of names, the reading of which is very uncertain, which may be arranged with a good deal of probability in chronological order, apparently belonging to the first of these three dynasties. Of the second no traces have been hitherto discovered. The third would seem to be identical with the Upper Dynasty of Assyria, of which some account has been given in a former article [ASSYRIA]. It would appear then as if Babylon, after having had a native Chaldæan dynasty which ruled for 224 years (Brandis, p. 17), and a second dynasty of Elamitic Chaldæans who ruled for a further period of 458 years, fell wholly under Semitic influence, becoming subject first to Arabia for two centuries and a half, and then to Assyria for above five centuries, and not regaining even a qualified independence till the time marked by the close of the Upper and the formation of the Lower Assyrian empire. This is the conclusion which seems naturally to follow from the abstract which is all that we possess of Berosus: and doubtless it is to a certain extent true. But the statement is too broad to be exact; and the monuments show that Babylon was at no time absorbed into Assyria, or even for very many years together a submissive vassal. Assyria, which she had colonized during the time of the second or great Chaldæan dynasty, to which she had given letters and the arts, and which she had held in subjection for many hundred years, became in her turn (about B. C. 1270) the predominant Mesopotamian power, and the glory of Babylon in consequence suffered eclipse. But she had her native kings during the whole of the Assyrian period, and she frequently contended with her great neighbor, being sometimes even the aggressor. Though much sunk from her former greatness, she continued to be the second power in Asia; and retained a vitality which

Digitized by Google

at a later date enabled her to become once more the head of an empire.

The line of Babylonian kings becomes exactly known to us from the year B. C. 747. An astronomical work of the geographer Ptolemy has preserved to us a document, the importance of which for comparative chronology it is scarcely possible to exaggerate. The "Canon of Ptolemy," as it is called, gives us the succession of Babylonian monarchs, with the exact length of the reign of each, from the year B. C. 747, when Nabonassar mounted the throne, to B. C. 331, when the last Persian king was dethroned by Alexander. This document, which from its close accordance with the statements of Scripture always vindicated to itself a high authority in the eyes of Christian chronologers, has recently been confirmed in so many points by the inscriptions that its authentic character is established beyond all possibility of cavil or dispute. As the basis of all accurate calculation for oriental dates previous to Cyrus, it seems proper to transcribe the earlier portion of it in this place. [The dates B. C. are added for convenience sake.]

	Years.	N. E.	B. C.
Nabonassar	14	1	747
Nadius	2	15	733
Chinzinus and Porus	5	17	731
Elulæus	5	22	726
Mardocempalus	12	27	721
Arcæanus	5	39	709
First interregnum	2	44	704
Belibus	3	46	702
Aparanadius	6	49	699
Regibelus	1	55	693
Mesesimordacus	4	56	692
Second interregnum	8	60	688
Asaridanus	13	68	680
Saosduchinus	20	81	667
Cinneladanus	22	101	647
Nabopolassar	21	123	625
Nebuchadnezzar	43	144	604
Iloarudamus	2	187	561
Neriglissolassarus	4	189	559
Nabonadius	17	193	555
Cyrus	9	210	538

Of Nabonassar, the first king in Ptolemy's list, nothing can be said to be known except the fact, reported by Berosus, that he destroyed all the annals of his predecessors for the purpose of compelling the Babylonians to date from himself (*Fr.* 11 a). It has been conjectured that he was the husband, or son, of Semiramis, and owed to her his possession of the throne. But of this theory there is at present no proof. It rests mainly upon a synchronism obtained from Herodotus, who makes Semiramis a Babylonian queen, and places her five generations (167 years) before Nitocris, the mother of the last king. The Assyrian discoveries have shown that there was a Semiramis about this time, but they furnish no evidence of her connection with Babylon, which still continues uncertain. The immediate successors of Nabonassar are still more obscure than himself. Absolutely nothing beyond the brief notation of the Canon has reached us concerning Nadius (or Nabius), Chinzinus (or Chindirus) and Porus or Elulæus, who certainly cannot be the Tyrian king of that name mentioned by Menander (ap. Joseph. *Ant. Jud.* ix. 14, § 2). Mardocempalus, on the contrary, is a monarch to whom great interest attaches. He is undoubtedly the Merodach-Baladan, or Berodach-Baladan [MERODACH-BALADAN] of Scripture, and was a personage of great consequence, reigning himself twice the first time for 12 years, contemporaneously with the Assyrian king Sargon, and the second time for six months only, during the first year of Sennacherib; and leaving a sort of hereditary claim to his sons and grandsons, who are found to have been engaged in hostilities with Esar-haddon and his successor. His dealings with Hezekiah sufficiently indicate the independent position of Babylon at this period, while the interest which he felt in an astronomical phenomenon (2 Chr. xxxii. 31) harmonizes with the character of a native Chaldæan king which appears to belong to him. The Assyrian inscriptions show that after reigning 12 years Merodach-Baladan was deprived of his crown and driven into banishment by Sargon, who appears to have placed Arcæanus (his son?) upon the throne as viceroy, a position which he maintained for five years. A time of trouble then ensued, estimated in the Canon at two years, during which various pretenders assumed the crown, among them a certain Hagisa, or Acises, who reigned for about a month, and Merodach-Baladan, who held the throne for half a year (Polyhist. ap. Euseb.). Sennacherib, bent on reëstablishing the influence of Assyria over Babylon, proceeded against Merodach-Baladan (as he informs us) in his first year, and having dethroned him, placed an Assyrian named *Belîb*, or Belibus, upon the throne, who ruled as his viceroy for three years. At the end of this time, the party of Merodach-Baladan still giving trouble, Sennacherib descended again into Babylonia, once more overran it, removed *Belîb*, and placed his eldest son — who appears in the Canon as Aparanadius — upon the throne. Aparanadius reigned for six years, when he was succeeded by a certain Regibelus, who reigned for one year; after which Mesesimordacus held the throne for four years. Nothing more is known of these kings, and it is uncertain whether they were viceroys, or independent native monarchs. They were contemporary with Sennacherib, to whose reign belongs also the second interregnum, extending to eight years, which the Canon interposes between the reigns of Mesesimordacus and Asaridanus. In Asaridanus critical eyes long ago detected Esar-haddon, Sennacherib's son and successor; and it may be regarded as certain from the inscriptions that this king ruled in person over both Babylonia and Assyria, holding his court alternately at their respective capitals. Hence we may understand how Manasseh, his contemporary, came to be "carried by the captains of the king of Assyria *to Babylon*," instead of to Nineveh, as would have been done in any other reign. [ESAR-HADDON.] Saosduchinus and Ciniladanus (or Cinneladanus), his brother (Polyhist.), the successors of Asaridanus, are kings of whose history we know nothing. *Probably* they were viceroys under the later Assyrian monarchs, who are represented by Abydenus (ap. Euseb.) as retaining their authority over Babylon up to the time of the last siege of Nineveh.

With Nabopolassar, the successor of Cinneladanus, and the father of Nebuchadnezzar, a new era in the history of Babylon commences. According to Abydenus, who probably drew his information from Berosus, he was appointed to the government of Babylon by the last Assyrian king, at the moment when the Medes were about to make their final attack; whereupon, betraying the trust reposed in him, he went over to the enemy, arranged

Digitized by Google

a marriage between his son Nebuchadnezzar and the daughter of the Median leader, and joined in the last siege of the city. [NINEVEH.] On the success of the confederates (B. C. 625) Babylon became not only an independent kingdom, but an empire; the southern and western portions of the Assyrian territory were assigned to Nabopolassar in the partition of the spoils which followed on the conquest, and thereby the Babylonian dominion became extended over the whole valley of the Euphrates as far as the Taurus range, over Syria, Phœnicia, Palestine, Idumæa, and (perhaps) a portion of Egypt. Thus, among others, the Jews passed quietly and almost without remark, from one feudal head to another, exchanging dependency on Assyria for dependency on Babylon, and continuing to pay to Nabopolassar the same tribute and service which they had previously rendered to the Assyrians. Friendly relations seem to have been maintained with Media throughout the reign of Nabopolassar, who led or sent a contingent to help Cyaxares in his Lydian war, and acted as mediator in the negotiations by which that war was concluded (Herod. i. 74). At a later date hostilities broke out with Egypt. Neco, the son of Psamatik I., about the year B. C. 608, invaded the Babylonian dominions on the southwest, and made himself master of the entire tract between his own country and the Euphrates (2 K. xxiii. 29, and xxiv. 7). Nabopolassar was now advanced in life, and not able to take the field in person (Beros. *Fr.* 14). He therefore sent his son, Nebuchadnezzar, at the head of a large army, against the Egyptians, and the battle of Carchemish, which soon followed, restored to Babylon the former limits of her territory (comp. 2 K. xxiv. 7 with Jer. xlvi. 2–12). Nebuchadnezzar pressed forward and had reached Egypt, when news of his father's death recalled him; and hastily returning to Babylon, he was fortunate enough to find himself, without any struggle, acknowledged king (B. C. 604).

A complete account of the works and exploits of this great monarch — by far the most remarkable of all the Babylonian kings — will be given in a later article. [NEBUCHADNEZZAR.] It is enough to note in this place that he was great both in peace and in war, but greater in the former. Besides recovering the possession of Syria and Palestine, and carrying off the Jews after repeated rebellions into captivity, he reduced Phœnicia, besieged and took Tyre, and ravaged, if he did not actually conquer, Egypt. But it was as the adorner and beautifier of his native land — as the builder and restorer of almost all her cities and temples — that this monarch obtained that great reputation which has handed down his name traditionally in the East, on a par with those of Nimrod, Solomon, and Alexander, and made it still a familiar term in the mouths of the people. Probably no single man ever left behind him as his memorial upon the earth one half the amount of building which was erected by this king. The ancient ruins and the modern towns of Babylonia are alike built almost exclusively of his bricks. Babylon itself, the capital, was peculiarly the object of his attention. It was here that, besides repairing the walls and restoring the temples, he constructed that magnificent palace, which, with its triple inclosure, its hanging gardens, its plated pillars, and its rich ornamentation of enamelled brick, was regarded in ancient times as one of the seven wonders of the world (Strab. xvi. 1, § 5.)

Nebuchadnezzar died B. C. 561, having reigned for 43 years, and was succeeded by Evil-Merodach, his son, who is called in the Canon Illoarudamus This prince, who "in the year that he began to reign did lift up the head of Jehoiachin, king of Judah, out of prison" (2 K. xxv. 27), was murdered, after having held the crown for two years only, by Neriglissar, his brother-in-law. [EVIL-MERODACH.] Neriglissar — the Nerigassolassar of the Canon — is (apparently) identical with the "Nergal-shar-ezer, Rab-Mag" of Jeremiah (xxxix. 3, 13–14). He bears this title, which has been translated "chief of the Magi" (Gesenius), or "chief priest" (Col. Rawlinson), in the Inscriptions, and calls himself the son of a "king of Babylon." Some writers have considered him identical with "Darius the Mede" (Larcher, Conringius, Bouhier); but this is improbable [DARIUS THE MEDE], and he must rather be regarded as a Babylonian of high rank, who having married a daughter of Nebuchadnezzar raised his thoughts to the crown, and finding Evil-Merodach unpopular with his subjects, murdered him and became his successor. Neriglissar built the palace at Babylon, which seems to have been placed originally on the right bank of the river. He was probably advanced in life at his accession, and thus reigned but four years, though he died a natural death, and left the crown to his son, Laborosoarchod. This prince, though a mere lad at the time of his father's decease, was allowed to ascend the throne without difficulty: but when he had reigned nine months, he became the victim of a conspiracy among his friends and connections, who, professing to detect in him symptoms of a bad disposition, seized him, and tortured him to death. Nabonidus (or Labynetus), one of the conspirators, succeeded; he is called by Berosus "a certain Nabonidus, a Babylonian" (ap. Joseph. c. *Ap.* i. 21), by which it would appear that he was not a member of the royal family; and this is likewise evident from his inscriptions, in which he only claims for his father the rank of "Rab-Mag." Herodotus seems to have been mistaken in supposing him (i. 188) the son of a great queen, Nitocris, and (apparently) of a former king, Labynetus (Nebuchadnezzar?). Indeed it may be doubted whether the Babylonian Nitocris of Herodotus is really a historical personage. His authority is the sole argument for her existence, which it is difficult to credit against the silence of Scripture, Berosus, the Canon, and the Babylonian monuments. She may perhaps have been a wife of Nebuchadnezzar; but in that case she must have been wholly unconnected with Nabonidus, who certainly bore no relation to that monarch.

Nabonidus, or Labynetus (as he was called by the Greeks), mounted the throne in the year B. C. 555, very shortly before the war broke out between Cyrus and Crœsus. He entered into alliance with the latter of these monarchs against the former, and had the struggle been prolonged would have sent a contingent into Asia Minor. Events proceeded too rapidly to allow of this; but Nabonidus had provoked the hostility of Cyrus by the mere fact of the alliance, and felt at once that sooner or later he would have to resist the attack of an avenging army. He probably employed his long and peaceful reign of 17 years in preparations against the dreaded foe, executing the defensive works which Herodotus ascribes to his mother (i. 185), and accumulating in the town abundant

Digitized by Google

stores of provisions (*ib.* c. 190). In the year B. C. 539 the attack came. Cyrus advanced at the head of his irresistible hordes, but wintered upon the Diyaleh or Gyndes, making his final approaches in the ensuing spring. Nabonidus appears by the inscriptions to have shortly before this associated with him in the government of the kingdom his son, Bel-shar-ezer or Belshazzar; on the approach of Cyrus, therefore, he took the field himself at the head of his army, leaving his son to command in the city. In this way, by help of a recent discovery, the accounts of Berosus and the book of Daniel — hitherto regarded as hopelessly conflicting — may be reconciled. [BELSHAZZAR.] Nabonidus engaged the army of Cyrus, but was defeated and forced to shut himself up in the neighboring town of Borsippa (marked now by the *Birs-Nimrud*), where he continued till after the fall of Babylon (Beros. ap. Joseph. c. *Ap.* i. 21). Belshazzar guarded the city, but over-confident in its strength kept insufficient watch, and recklessly indulging in untimely and impious festivities (Dan. v.), allowed the enemy to enter the town by the channel of the river (Herod. i. 191; Xen. *Cyrop.* vii. 7). Babylon was thus taken by a surprise, as Jeremiah had prophesied (li. 31) — by an army of Medes and Persians, as intimated 170 years earlier by Isaiah (xxi. 1-9), and as Jeremiah had also foreshown (li. 39), during a festival. In the carnage which ensued upon the taking of the town, Belshazzar was slain (Dan. v. 30). Nabonidus, on receiving the intelligence, submitted, and was treated kindly by the conqueror, who not only spared his life, but gave him estates in Carmania (Beros. *ut supra;* comp. Abyd. *Fr.* 9).

Such is the general outline of the siege and capture of Babylon by Cyrus, as derivable from the fragments of Berosus, illustrated by the account in Daniel and reduced to harmony by aid of the important fact, obtained recently from the monuments, of the relationship between Belshazzar and Nabonidus. It is scarcely necessary to remark that it differs in many points from the accounts of Herodotus and Xenophon; but the latter of these two writers is in his Cyropædia a mere romancer, and the former is very imperfectly acquainted with the history of the Babylonians. The native writer, whose information was drawn from authentic and contemporary documents, is far better authority than either of the Greek authors, the earlier of whom visited Babylon nearly a century after its capture by Cyrus, when the tradition had doubtless become in many respects corrupted.

According to the book of Daniel, it would seem as Babylon was taken on this occasion, not by Cyrus, king of Persia, but by a Median king, named Darius (v. 31). The question of the identity of this personage with any Median or Babylonian king known to us from profane sources, will be discussed hereafter. [DARIUS THE MEDE.] It need only be remarked here that Scripture does not really conflict on this point with profane authorities; since there is sufficient indication, from the terms used by the sacred writer, that "Darius the Mede," whoever he may have been, was not the real conqueror nor king who ruled in his own right, but a monarch intrusted by another with a certain delegated authority (see Dan. v. 31, and ix. 1).

With the conquest by Cyrus commenced the decay and ruin of Babylon. The "broad walls" were then to some extent "broken down" (Beros. ap. Jer. 14) and the "high gates" probably "burnt with fire" (Jer. li. 58). The defenses, that is to say, were ruined; though it is not to be supposed that the laborious and useless task of entirely demolishing the gigantic fortifications of the place was attempted, or even contemplated, by the conqueror. Babylon was weakened, but it continued a royal residence, not only during the life-time of Darius the Mede, but through the entire period of the Persian empire. The Persian kings held their court at Babylon during the larger portion of the year; and at the time of Alexander's conquests it was still the second, if not the first, city of the empire. It had, however, suffered considerably on more than one occasion subsequent to the time of Cyrus. Twice in the reign of Darius (Behist. Ins.), and once in that of Xerxes (Ctes. *Pers.* § 22), it had risen against the Persians, and made an effort to regain its independence. After each rebellion its defenses were weakened, and during the long period of profound peace which the Persian empire enjoyed from the reign of Xerxes to that of Darius Codomannus they were allowed to go completely to decay. The public buildings also suffered grievously from neglect. Alexander found the great temple of Belus in so ruined a condition that it would have required the labor of 10,000 men for two months even to clear away the rubbish with which it was encumbered (Strab. xvi. 1, § 5). His designs for the restoration of the temple and the general embellishment of the city were frustrated by his untimely death, and the removal of the seat of empire to Antioch under the Seleucidæ gave the finishing blow to the prosperity of the place. The great city of Seleucia, which soon after arose in its neighborhood, not only drew away its population but was actually constructed of materials derived from its buildings (Plin. *H. N.* vi. 30). Since then Babylon has been a quarry from which all the tribes in the vicinity have perpetually derived the bricks with which they have built their cities, and (besides Seleucia) Ctesiphon, Al Modain, Baghdad, Kufa, Kerbelah, Hillah, and numerous other towns, have risen from its ruins. The "great city," "the beauty of the Chaldees' excellency," has thus emphatically "become heaps" (Jer. li. 37) — she is truly "an astonishment and a hissing, without an inhabitant." Her walls have altogether disappeared — they have "fallen" (Jer. li. 44), been "thrown down" (l. 15), been "broken utterly" (li. 58). "A drought is upon her waters" (l. 38); for the system of irrigation, on which in Babylonia fertility altogether depends, has long been laid aside; "her cities" are everywhere "a desolation" (li. 43), her "land a wilderness;" "wild beasts of the desert" (jackals) "lie there," and "owls dwell there" (comp. Layard, *Nin. and Bab.* p. 484, with Is. xiii. 21-22, and Jer. l. 39): the natives regard the whole site as haunted, and neither will the "Arab pitch tent, nor the shepherd fold sheep there" (Is. xiii. 20).

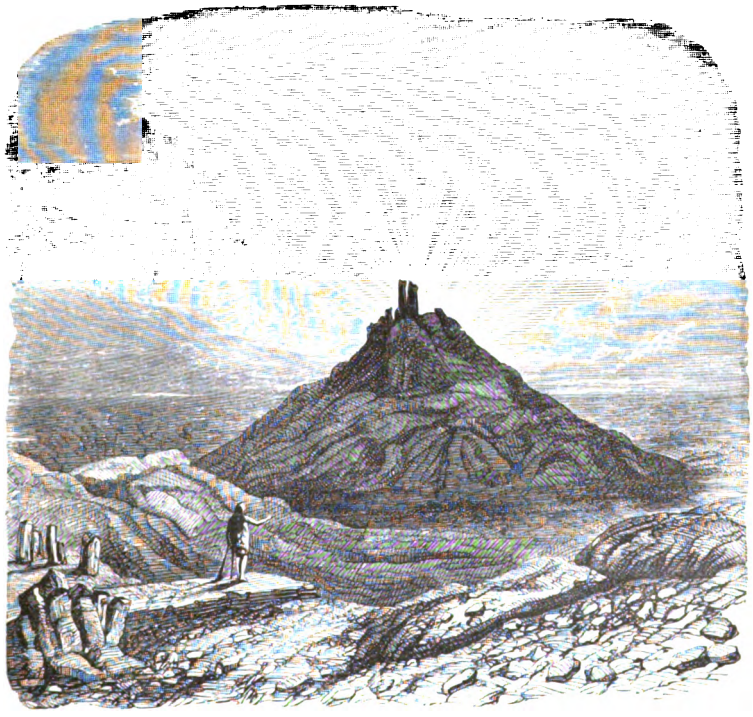
and Profane Chronology; and Rawlinson's Herodotus, vol. i. Essays vi. and viii. G. R.

* As a fitting close to this article we subjoin from Prof. Rawlinson's new volume (*Monarchies of the Ancient Eastern World*, iii. 516–18) his account of the capture of Babylon by Cyrus, which so remarkably fulfilled the Hebrew predictions: — "When all was prepared, Cyrus determined to wait for the arrival of a certain festival, during which the whole population were wont to engage in drinking and revelling, and then silently in the dead of night to turn the water of the river and make his attack. All fell out as he hoped and wished. The festival was even held with greater pomp and splendor than usual; for Belshazzar, with the natural insolence of youth, to mark his contempt for the besieging army, abandoned himself wholly to the delights of the season, and himself entertained a thousand lords in his palace. Elsewhere the rest of the population was occupied in feasting and dancing. Drunken riot and mad excitement held possession of the town: the siege was forgotten; ordinary precautions were neglected. Following the example of their king, the Babylonians gave themselves up for the night to orgies in which religious frenzy and drunken excitement formed a strange and revolting medley.

"Meanwhile, outside the city, in silence and darkness, the Persians watched at the two points where the Euphrates entered and left the walls. Anxiously they noted the gradual sinking of the water in the river-bed; still more anxiously they watched to see if those within the walls would observe the suspicious circumstances and sound an alarm through the town. Should such an alarm be given, all their labors would be lost. . . . But as they watched no sounds of alarm reached them — only a confused noise of revel and riot, which showed that the unhappy townsmen were quite unconscious of the approach of danger.

"At last shadowy forms began to emerge from the obscurity of the deep river-bed, and on the landing-places opposite the river gates scattered clusters of men grew into solid columns, — the undefended gateways were seized, — a war-shout was raised, — the alarm was taken and spread, — and swift runners started off to 'show the King of Babylon that his city was taken at one end.' In the darkness and confusion of the night a terrible massacre ensued. The drunken revellers could make no resistance. The king, paralyzed with fear at the awful handwriting on the wall, which too late had warned him of his peril, could do nothing even to check the progress of the assailants, who carried all before them everywhere. Bursting into the palace, band of Persians made their way to the presence f the monarch and slew him on the scene of is impious revelry. Other bands carried fire and sword through the town. When morning came, Cyrus found himself undisputed master of the city." H.

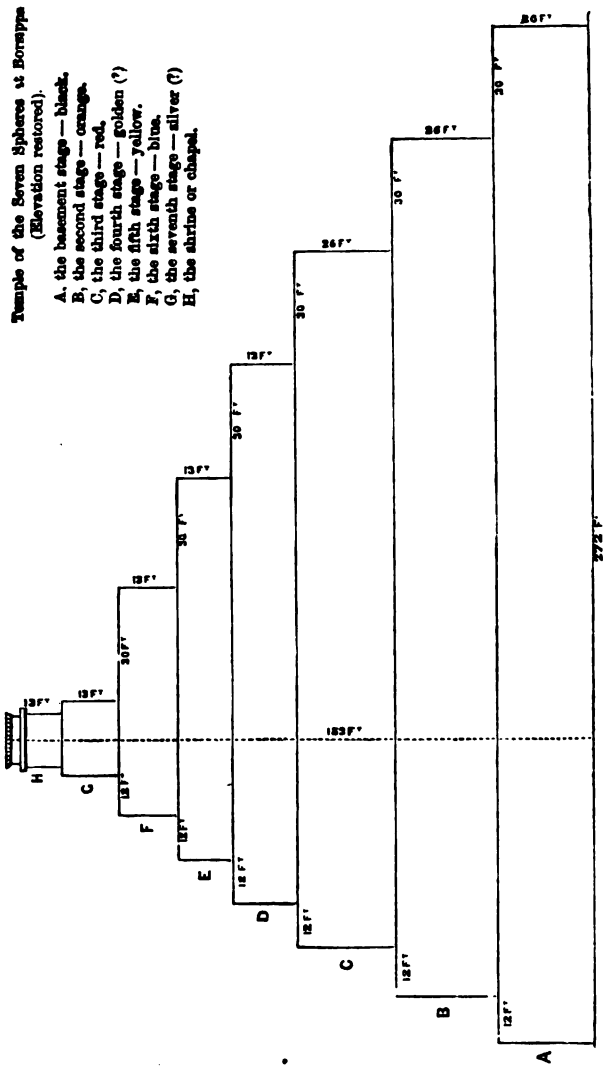


BABEL, TOWER OF. The "tower of Babel" is only mentioned once in Scripture (Gen. xi. 4-9), and then as incomplete. No reference to it appears in the prophetic denunciations of the punishments which were to fall on Babylon for her pride. It is therefore quite uncertain whether the building ever advanced beyond its foundations. As, however, the classical writers universally in their descriptions of Babylon gave a prominent place to a certain tower-like building, which they called the temple (Herod., Diod. Sic., Arrian, Plin &c.), or the tomb (Strabo) of Belus, it has generally been supposed that the tower was in course of time finished, and became the principal temple of the Chaldæan metropolis. Certainly this may have been the case; but while there is some evidence against there is none in favor of it. A Jewish tradition, recorded by Bochart (*Phaleg*, i. 9), declared that fire fell from heaven, and split the tower through to its foundation; while Alexander Polyhistor (*Fr.* 10) and the other profane writers who noticed the tower (as Abydenus, *Frs.* 5 and 6), said that it had been blown down by the winds. Such authorities therefore as we possess, represent the building as destroyed soon after its erection. When the Jews, however, were carried captive into Babylonia, struck with the vast magnitude and peculiar character of certain of the Babylonian temples, they imagined that they saw in them, not merely buildings similar in type and mode of construction to the "tower" (מִגְדָּל) of their Scriptures, but in this or that temple they thought to recognize the very tower itself. The predominant opinion was in favor of the great temple of Nebo at Borsippa, the modern *Birs-Nimrud*, although the distance of that place from Babylon is an insuperable difficulty in the way of the identification. Similarly when Christian travellers first began to visit the Mesopotamian ruins, they generally attached the name of "the tower of Babel" to whatever mass, among those beheld by them, was the loftiest and most imposing. Rawulf in the 16th century found the "tower of Babel" at *Felugiah*, Pietro della Valle in the 18th identified it with the ruin *Babil* near *Hillah*, while early in the present century Rich and Ker Porter revived the Jewish notion, and argued for its identity with the *Birs*. There are in reality no real grounds either for identifying the tower with the Temple of Belus, or for supposing that any remains of it long survived the check which the builders received, when they were "scattered abroad upon the face of the earth," and "left off to build the city" (Gen. xi. 8). All then that can be properly attempted by the modern critic is to show (1.) what was the probable type and character of the building; and (2.) what were the materials and manner of its construction.

With regard to the former point, it may readily be allowed that the *Birs-Nimrud*, though it cannot be the tower of Babel itself, which was at Babylon (Gen. xi. 9), yet, as the most perfect representative of an ancient Babylonian temple-tower, may well be taken to show, better than any other ruin, the probable shape and character of the edifice. This building appears, by the careful examinations recently made of it, to have been a sort of oblique pyramid built in seven receding stages. "Upon a platform of crude brick, raised a few feet above the level of the alluvial plain, was built of burnt brick the first or basement stage — an exact square, 272 feet each way, and 26 feet in perpendicular height Upon this stage was erected a second, 230 feet each way, and likewise 26 feet high; which, however was not placed exactly in the middle of the first, but considerably nearer to the southwestern end which constituted the back of the building. The other stages were arranged similarly — the third being 188 feet, and again 26 feet high; the fourth 146 feet square, and 15 feet high; the fifth 104 feet square, and the same height as the fourth; the

Digitized by Google

sixth 62 feet square, and again the same height and the seventh 20 feet square and once more the same height. On the seventh stage there was probably placed the ark or tabernacle, which seems to have been again 15 feet high, and must have nearly, if not entirely, covered the top of the seventh story. The entire original height, allowing three feet for the platform, would thus have been 156 feet, or, without the platform, 153 feet. The whole formed a sort of oblique pyramid, the gentler slope facing the N. E., and the steeper inclining to the S. W. On the N. E. side was the grand entrance, and here stood the vestibule, a separate building, the débris from which having joined those from the temple itself, fill up the intermediate space, and very remarkably prolong the mound in this direction" (Rawlinson's *Herodotus*, vol. ii. pp. 582-3). The *Birs* temple, which was called the "Temple of the Seven Spheres," was ornamented with the planetary colors (see the plan), but this was most likely a peculiarity. The other chief features of it seem to have been common to most, if not all, of the Babylonian temple-towers. The feature of stages is found in the temples at *Warka* and *Mugheir* (Loftus's *Chaldæa*, pp. 129 and 168) which belonged to very primitive times (B. C. 2230); that of the emplacement, so that the four angles face the four cardinal points, is likewise common to those ancient structures; while the square form is universal. On the other hand it may be doubted whether so large a number of stages was common. The *Mugheir* and *Warka* temples have no more than two, and probably never had more than three, or at most, four stages. The great temple of Belus at Babylon (*Babil*) shows only one stage: though, according to the best authorities, it too was a sort of pyramid (Herod., Strabo). The height of the *Birs* is 153½ feet, that of *Babil* 140 (?), that of the *Warka* temple 100, that of the temple at *Mugheir* 50 feet. Strabo's statement that the tomb of Belus was a stade (606 feet) in height would thus seem to be a gross exaggeration. Probably no Babylonian tower ever equalled the Great Pyramid, the original height of which was 480 feet.



With regard to the materials used in the tower, and the manner of its construction, more light is to be obtained from the *Warka* and *Mugheir* buildings than from the *Birs*. The *Birs* was rebuilt from top to bottom by Nebuchadnezzar, and shows

Temple of Birs-Nimrud of Borsippa.

the mode of construction prevalent in Babylon at the best period; the temples at *Warka* and *Mugheir* remain to a certain extent in their primitive condition, the upper stories alone having been renovated. The *Warka* temple is composed entirely of sun-dried bricks, which are of various shapes and sizes; the cement used is mud; and reeds are largely employed in the construction. It is a building of the most primitive type, and exhibits a ruder style of art than that which we perceive from Scripture to have obtained at the date of the tower. Burnt bricks were employed in the composition of the tower (Gen. xi. 3), and though perhaps it is somewhat doubtful what the *chemar* (חֵמָר) used for mortar may have been (see Fresnel in *Journ. Asiatique* for June, 1853, p. 9), yet on the whole it is most probable that bitumen (which abounds

Digitized by Google

in Babylonia) is the substance intended. Now the lower basement of the *Mugheir* temple exhibits this combination in a decidedly primitive form. The burnt bricks are of small size and of an inferior quality; they are laid in bitumen: and they face a mass of sun-dried brick, forming a solid wall outside it, ten feet in thickness. No reeds are used in the building. Writing appears on it, but of an antique cast. The supposed date is B. C. 2300 — a little earlier than the time commonly assigned to the building of the tower. Probably the erection of the two buildings was not separated by a very long interval, though it is reasonable to suppose that of the two the tower was the earlier. If we mark its date, as perhaps we are entitled to do, by the time of Peleg, the son of Eber, and father of Reu (see Gen. x. 25), we may perhaps place it about B. C. 2500.

It is not necessary to suppose that any real idea of "scaling heaven" was present to the minds of those who raised either the Tower of Babel, or any other of the Babylonian temple-towers. The expression used in Genesis (xi. 4) is a mere hyperbole for great height (comp. Deut. i. 28; Dan. iv. 11, &c.), and should not be taken literally. Military defense was probably the primary object of such edifices in early times: but with the wish for this may have been combined further secondary motives, which remained when such defense was otherwise provided for. Diodorus states that the great tower of the temple of Belus was used by the Chaldæans as an observatory (ii. 9), and the careful emplacement of the Babylonian temples with the angles facing the four cardinal points would be a natural consequence, and may be regarded as a strong confirmation, of the reality of this application. M. Fresnel has recently conjectured that they were also used as sleeping-places for the chief priests in the summer-time (*Journ. Asiatique*, June, 1853, pp 529–31). The upper air is cooler, and is free from the insects, especially mosquitos, which abound below; and the description which Herodotus gives of the chamber at the top of the Belus tower (i. 181) goes far to confirm this ingenious view. G. R.

BA'BI (Βαβί; [Vat. Βαηρ;] Alex. Βηβαι *Beer*), 1 Esdr. viii. 37. [BEBAI.]

BABYLON. [BABEL.]

BABYLON (Βαβυλών: *Babylon*). The occurrence of this name in 1 Pet. v. 13 has given rise to a variety of conjectures, which may be briefly enumerated.

1. That Babylon tropically denotes Rome. In support of this opinion is brought forward a tradition recorded by Eusebius (*H. E.* ii. 15), on the authority of Papias and Clement of Alexandria, to the effect that 1 Peter was composed at Rome. Œcumenius and Jerome both assert that Rome was figuratively denoted by Babylon. Although this opinion is held by Grotius, Lardner, Cave, Whitby, Macknight, Hales, and others, it may be rejected as improbable. There is nothing to indicate that the name is used figuratively, and the subscription to an epistle is the last place we should expect to find a mystical appellation.

Digitized by Google

2. Cappellus and others take Babylon, with as little reason, to mean Jerusalem.

3. Bar-Hebræus understands by it the house in Jerusalem where the Apostles were assembled on the Day of Pentecost.

4. Others place it on the Tigris, and identify it with Seleucia or Ctesiphon, but for this there is no evidence. The two theories which remain are worthy of more consideration.

5. That by Babylon is intended the small fort of that name which formed the boundary between Upper and Lower Egypt. Its site is marked by the modern *Baboul* in the Delta, a little north of Fostat, or old Cairo. According to Strabo it derived its name from some Babylonian deserters who had settled there. In his time it was the headquarters of one of the three legions which garrisoned Egypt. Josephus (*Ant.* ii. 15, § 1) says it was built on the site of Letopolis, when Cambyses subdued Egypt. That this is the Babylon of 1 Pet. is the tradition of the Coptic Church, and is maintained by Le Clerc, Mill, Pearson, and others. There is, however, no proof that the Apostle Peter was ever in Egypt, and a very slight degree of probability is created by the tradition that his companion Mark was bishop of Alexandria.

The most natural supposition of all is that by Babylon is intended the old Babylon of Assyria, which was largely inhabited by Jews at the time in question (Joseph. *Ant.* xv. 3, § 1; Philo, *De Virt.* p. 1023, ed. Franc. 1691). The only argument against this view is the negative evidence from the silence of historians as to St. Peter's having visited the Assyrian Babylon, but this cannot be allowed to have much weight. Lightfoot's remarks are very suggestive. In a sermon preached at St. Mary's, Cambridge (*Works*, ii. 1144, Eng. folio ed.), he maintained that Babylon of Assyria is intended, because "it was one of the greatest knots of Jews in the world," and St. Peter was the minister of the circumcision. Again, he adds, "Bosor (2 Pet. ii. 15) speaks Peter in Babylon," it being the Chaldee or Syriac pronunciation of Pethor in Num. xxii. 5. This last argument has not, perhaps, much weight, as the same pronunciation may have characterized the dialect of Judæa. Bentley gave his suffrage in favor of the ancient Babylon, quoting Joseph. *c. Ap.* i. 7 (*Crit. Sacr.* p. 81, ed. Ellis).

W. A. W.

* The writer above has mentioned English names only. Of German writers who hold that the Babylon of Assyria is meant (1 Pet. v. 13), are Steiger (on Pet. *Einl.* p. 23); De Wette (*Exeg. Handb.* in loc.); Winer (*Realw.* i. 124); Credner (*Einl. in das N. T.*, p. 643); Bleek (*Einl. in das N. T.*, p. 567); Neander (*Pflanzung*, ii. 590); Fronmüller (on 1 Peter in Lange's *Bibelwerk*, p. 44), and others. Neander thinks that the wife of Peter (συνεκλεκτή) is meant (1 Pet. v. 13), and not the church in Babylon. H.

BABYLON, in the Apocalypse, is the symbolical name by which Rome is denoted (Rev. xiv. 8, xvii., xviii.). The power of Rome was regarded by the later Jews as that of Babylon by their forefathers (comp. Jer. li. 7 with Rev. xiv. 8), and hence, whatever the people of Israel be understood to symbolize, Babylon represents the antagonistic principle. [REVELATION.] W. A. W.

BABYLONIANS (בְּנֵי־בָבֶל, בָּבְלִאָ: Βαβυλώνιοι: *Babylonii, filii Babylonis*). The inhabitants of Babylon, a race of Shemitic origin, who were among the colonists planted in the cities of Samaria by the conquering Assyrians (Ezr. iv 9). At a later period, when the warlike Chaldæans acquired the predominance in the 7th cent. B. C., the names Chaldæan and Babylonian became almost synonymous (Ez. xxiii. 14, 15; comp. Is. xlviii. 14, 20). W. A. W.

BABYLONISH GARMENT, literally (אַדֶּרֶת שִׁנְעָר: ψιλὴ ποικίλη: *pallium coccineum*) "robe of Shinar" (Josh. vii. 21). An ample robe, probably made of the skin or fur of an animal (comp. Gen. xxv. 25), and ornamented with embroidery, or perhaps a variegated garment with figures inwoven in the fashion for which the Babylonians were celebrated. Josephus (*Ant.* v. 1, § 10) describes it as "a royal mantle (χλαμύδα βασίλειον), all woven with gold." Tertullian (*De Habitu muliebri*, c. i.) tells us that while the Syrians were celebrated for dyeing, and the Phrygians for patchwork, the Babylonians inwove their colors. For this kind of tapestry work they had a great reputation (Pliny viii. 74: *Colores diversos picturæ intexere Babylon maxime celebravit, et nomen imposuit*). Compare also Martial (*Ep.* viii. 28):

> Non ego prætulerim Babylonica picta superbe
> Texta, Semiramia quæ variantur acu;

and the *Babylonia peristromata* of Plautus (*Stich.* ii. 2, 54; see also Joseph *B. J.* vii. 5, § 5; Plut. *M. Cato*, iv. 5). Perhaps some of the trade in these rich stuffs between Babylon and the Phœnicians (Ez. xxvii. 24) passed through Jericho, as well as the gold brought by the caravans of Sheba which they may have left in exchange for the products of its fertile soil (Josh. vii. 21). [JERICHO.] Rashi has a story that the king of Babylon had a palace at Jericho, probably founded on the fact that the robe of the king of Nineveh (Jon. iii. 6) is called אַדֶּרֶת, *addereth*. In the *Bereshith Rabb.* (§ 85, fol. 75, 2, quoted by Gill) it is said that the robe was of Babylonian purple. Another story in the same passage is that the king of Babylon had a deputy at Jericho who sent him dates, and the king in return sent him gifts, among which was a garment of Shinar. Kimchi (on Josh. vii. 21) quotes the opinions of R. Chanina bar R. Isaac that the Babylonish garment was of Babylonian purple, of Rab that it was a robe of fine wool, and of Shemuel that it was a cloak washed with alum, which we learn from Pliny (xxxv. 52) was used in dyeing wool. W. A. W.

BA'CA, THE VALLEY OF (עֵמֶק הַבָּכָא: κοιλὰς τοῦ κλαυθμῶνος [Alex. -μονος]: *Vallis lacrymarum*), a valley somewhere in Palestine, through which the exiled Psalmist sees in vision the pilgrims passing in their march towards the sanctuary of Jehovah at Zion (Ps. lxxxiv. 6). The passage seems to contain a play, in the manner of Hebrew poetry, on the name of the trees (בְּכָאִים; MULBERRY) from which the valley probably derived its name, and the "tears" (בְּכִי) shed by the pilgrims in their joy at their approach to Zion. These tears were so abundant as to turn the dry valley in which the Bacaim trees delighted (Niebuhr, quoted by Winer, *s. v.*) into a springy or marshy place (מַעְיָן). That the valley was a

Digitized by Google

real locality is most probable, from the use of the definite article before the name (Gesen. *Thes.* p. 205). A valley of the same name (وادي البكا) still exists in the Sinaitic district (Burck. p. 619).

The rendering of the Targum is Gehenna, *i. e.* the Ge-Hinnom or ravine below Mount Zion. This locality agrees well with the mention of Bacaim trees in 2 Sam. v. 23. G.

* This valley, according to the general view of interpreters (Hengstenberg, Tholuck, Hupfeld) is not an actual, but an idealized place. Human life is a pilgrimage (Gen. xlvii. 9), and those who serve God and have faith in Him, bear cheerfully its hardships. His people find cause for thanksgiving and joy under circumstances the most adverse and trying (2 Cor. vi. 4–10; Philip. iv. 6, 7). The later lexicographers (Dietrich, Fürst) discard the old etymology, and derive בָּכָא from the verb בָּכָא, *to flow out, trickle*. Hupfeld finds no allusion to the mulberry tree (which complicates needlessly the idea), but only a mark of the concinnity of the figure: the bitter tears become to us as it were fountains of sweet water (*Die Psalmen*, ii. 429). Dr. Robinson has a note against the idea of a proper name in this passage (*Phys. Geogr.* p. 124). The "valley of the shadow of death" (Ps. xxiii. 4) is no doubt a similar expression. H.

BACCHIDES (Βακχίδης), a friend of Antiochus Epiphanes (Joseph. *Ant.* xii. 10, § 2) and governor of Mesopotamia (*ἐν τῷ πέραν τοῦ ποταμοῦ*, 1 Macc. vii. 8; Joseph. *l. c.*), who was commissioned by Demetrius Soter to investigate the charges which Alcimus preferred against Judas Maccabæus. He confirmed Alcimus in the high priesthood, and having inflicted signal vengeance on the extreme party of the Assidæans [ASSIDEANS] he returned to Antioch. After the expulsion of Alcimus and the defeat and death of Nicanor he led a second expedition into Judæa. Judas Maccabæus fell in the battle which ensued at Laisa (B. C. 161); and Bacchides reëstablished the supremacy of the Syrian faction (1 Macc. ix. 25, *οἱ ἀσεβεῖς ἄνδρες*; Joseph. *Ant.* xiii. 1, § 1). He next attempted to surprise Jonathan, who had assumed the leadership of the national party after the death of Judas; but Jonathan escaped across the Jordan. Bacchides then placed garrisons in several important positions, and took hostages for the security of the present government. Having completed the pacification of the country[a] (Joseph. *Ant.* xiii. 1, 5) he returned to Demetrius (B. C. 160). After two years he came back at the request of the Syrian faction, in the hope of overpowering Jonathan and Simon, who still maintained a small force in the desert; but meeting with ill success, he turned against those who had induced him to undertake the expedition, and sought an honorable retreat. When this was known by Jonathan he sent envoys to Bacchides and concluded a peace (B. C. 158) with him, acknowledging him as governor under the Syrian king, while Bacchides pledged himself not to enter the land again, a condition which he faithfully observed (1 Macc. vii. ix.; Joseph. *Ant.* xii. 10, 11; xiii. 1). B. F. W.

[a] In 1 Macc. ix. 57, his return seems to be referred to the death of Alcimus.

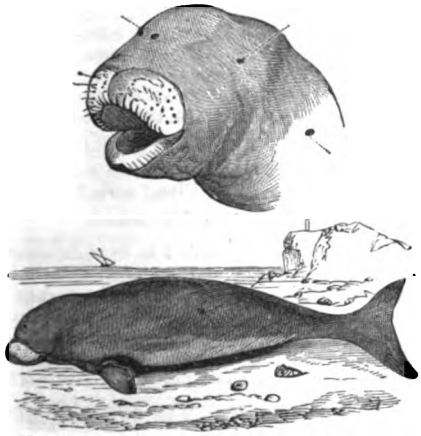
BACCHU'RUS (Βακχοῦρος: *Zoaarus*), one of the "holy singers" (*τῶν ἱεροψαλτῶν*) who had taken a foreign wife (1 Esdr. ix. 24). No name corresponding with this is traceable in the parallel list in Ezra.

BAC'CHUS. [DIONYSUS.]

BACE'NOR (Βακήνωρ: *Bacenor*), apparently a captain of horse in the army of Judas Maccabæus (2 Macc. xii. 35). Or possibly *τοῦ Βακήνορος* may have been the title of one of the Jewish companies or squadrons.

BACH'RITES, THE (הַבַּכְרִי: LXX. omits [in most MSS.; Comp. ὁ Βεχερί]: *fam. Becheritarum*), the family of BECHER, son of Ephraim (Num. xxvi. 35). [BERIAH.]

BADGER-SKINS (עֹרֹת תְּחָשִׁים, *ôróth tĕchâshîm*; תַּחַשׁ, *tachash* (Ex. xvi. 10): δέρματα ὑακίνθινα; Ald. ed. ἰάνθινα; Comp. ὑάνθινα, al. πεπυρωμένα in Ex. xxv. 5; Alex. δέρματα ἅγια in Ex. xxxv. 7; ὑάκινθος; Aq. and Sym. *ἰάνθινα* in Ez. xvi. 10: *pelles ianthinæ, ianthinus*). The Hebrew *tachash*, which the A. V. renders *badger*, occurs in connection with '*ôr*, *ôróth* ("skin," "skins"), in Ex. xxv. 5, xxvi. 14, xxxv. 7, 23, xxxvi. 19; Num. iv. 6, 8, 11, 12, 14, 25. In Ez. xvi. 10 *tachash* occurs without *ôróth*, and is mentioned as the substance out of which women's shoes were made; in the former passages the *tachash skins* are named in relation to the tabernacle, ark, &c., and appear to have formed the exterior covering of these sacred articles. There is much obscurity as to the meaning of the word *tachash*. The ancient versions seem nearly all agreed that it denotes not an animal, but a color, either black or sky-blue; amongst the names of those who adopt this interpretation are Bochart (*Hieroz.* ii. 887), Rosenmüller (*Schol. ad V. T.*, Ex. xxv. 5; Ez. xvi. 10), Bynæus (*de Calceis Hebræorum*, lib. i. ch. 3), Scheuchzer (*Phys. Sacr.* in Ex. xxv. 5), Parkhurst (*Heb. Lex.* s. v.), who observes that "an outermost covering for the tabernacle of azure or sky-blue was very proper to represent the sky or azure boundary of the system." Some versions as the German of Luther and the A. V., led apparently by the Chaldee,[b] and perhaps by a certain similarity of sound between the words *tachash*, *taxus*, *dachs*, have supposed that the badger (*mel taxus*) is denoted; but this is clearly an error, for the badger is not found in the Bible lands. Others, as Gesner and Harenberg (in *Museo Brem.* ii. 312), have thought that some kind of wolf, known by the Greek name *θώς* and the Arabic *Shaghul*, is intended.[c] Hasæus (in *Dissert. Philolog. Sylloge*, diss. ix. § 17) and Büsching, in his preface to the Epitome of Scheuchzer's *Physica Sacra*, are of opinion that *tachash* denotes a cetacean animal, the *Trichechus manatus* of Linnæus which, however, is only found in America and the West Indies. Others with Sebald Rau (*Comment. de iis quæ ex Arab. in usum Tabernac. fuerunt repetita*, Traj. ad Rhen. 1753, ch. ii.) are in favor of *tachash* representing some kind of seal (*Phoca vitulina*, Linn.). Dr. Geddes (*Crit. Rem.* Ex. xxv 5) is of the same opinion. Gesenius understands



[b] סַמְנוּנָא, "*taxus*, sic dictus quia gaudet et superbit in coloribus multis" (Buxtorf, *Lex. Rab* s. v.).

[c] "The *θώς* of the Greeks is certainly the jackal" (*Canis Aureus*).

Digitized by Google

some "kind of seal or badger, or other similar (!) creature." Of modern writers Dr. Kitto (*Pict. Bible* on Ex. xxv. 5) thinks that *tachash* denotes some clean animal, as in all probability the skin of an unclean animal would not have been used for the sacred coverings. Col. H. Smith (*Cyc. Bib. Lit.* [1st ed.] art. *Badger*), with much plausibility, conjectures that *tachash* refers to some ruminant of the Aigocerine or Damaline groups, as these animals are known to the natives under the names of *pacasse*, *thacasse* (varieties, he says, of the word *tachash*), and have a deep gray, or slaty (*hyaginus*) colored skin. Dr. Robinson on this subject (*Bib. Res.* i. 171) writes: "The superior of the convent at Sinai procured for me a pair of the sandals usually worn by the Bedawin of the peninsula, made of the thick skin of a fish which is caught in the Red Sea. The Arabs around the convent called it *Tún*, but could give no farther account of it than that it is a large fish, and is eaten. It is a species of Halicore, named by Ehrenberg[a] (*Symb. Phys. Mammal.* ii.) *Halicora Hemprichii*. The skin is clumsy and coarse, and might answer very well for the external covering of the tabernacle which was constructed at Sinai, but would seem hardly a fitting material for the ornamental sandals belonging to the costly attire of high-born dames in Palestine, described by the prophet Ezekiel" (xvi. 10).

It is difficult to understand why the ancient versions have interpreted the word *tachash* to mean a color, an explanation which has, as Gesenius remarks, no ground either in the etymology or in the cognate languages. Whatever is the substance indicated by *tachash*, it is evident from Ex. xxxv. 23, that it was some material in frequent use amongst

Halicore Tabernaculi, with enlarged drawing of the head.

the Israelites during the Exodus, and the construction of the sentences where the name occurs (for the word *órôth*, "skins," is always, with one exception, repeated with *tachash*), seems to imply that the skin of some animal and not a color is denoted by it. The Arabic *duchas* or *tuchas* denotes a dolphin, but in all probability is not restricted in its application, but may refer to either a seal or a cetacean.[b] The skin of the *Halicore*, from its hardness, would be well suited for making soles for shoes; and it is worthy of remark that the Arabs near Cape Mussendum apply the skin of these animals for a similar purpose (Col. H. Smith, *l. c.*). The *Halicore Tabernaculi* is found in the Red Sea, and was observed by Rüppell (*Mus. Senck.* i. 113, *t.* 6), who gave the animal the above name, on the coral banks of the Abyssinian coast. Or perhaps *tachash* may denote a seal, the skin of which animal would suit all the demands of the Scriptural allusions. Pliny (*H. N.* ii. 55) says seal-skins were used as coverings for tents; but it is quite impossible to come to any satisfactory conclusion in an attempt to identify the animal denoted by the Hebrew word. W. H.

BAG is the rendering of several words in the Old and New Testaments. 1. (חֲרִיטִים: θύλακος: *saccus.*) *Chărîtim*, the "bags" in which Naaman bound up the two talents of silver for Gehazi (2 K. v. 23), probably so called, according to Gesenius, from their long, cone-like shape. The word only occurs besides in Is. iii. 22 (A. V. "crisping-pins"), and there denotes the reticules carried by the Hebrew ladies.

2. (כִּיס: μάρσιππος, μαρσύπιον: *sacculus, saccellus.*) *Cîs*, a bag for carrying weights (Deut. xxv. 13; Prov. xvi. 11; Mic. vi. 11), also used as a purse (Prov. i. 14; Is. xlvi. 6).

3. (כְּלִי: κάδιον: *pera.*) *Cêli*, translated "bag" in 1 Sam. xvii. 40, 49, is a word of most general meaning, and is generally rendered "vessel" or "instrument." In Gen. xlii. 25, it is the "sack" in which Jacob's sons carried the corn which they brought from Egypt; and in 1 Sam. ix. 7, xxi. 5, it denotes a bag or wallet for carrying food (A. V. "vessel"; comp. Jud. x. 5, xiii. 10, 15). The shepherd's "bag" which David had seems to have been worn by him as necessary to his calling, and was probably, from a comparison of Zech. xi. 15, 16 (where A. V. "instruments" is the same word), for the purpose of carrying the lambs which were unable to walk, or were lost, and contained materials for healing such as were sick and binding up those that were broken (comp. Ez. xxxiv. 4, 16).

4. (צְרוֹר: ἔνδεσμος, δεσμός: *succulus.*) *Tsĕrôr*, properly a "bundle" (Gen. xlii. 35; 1 Sam. xxv. 29), appears to have been used by travellers for carrying money during a long journey (Prov vii. 20; Hag. i. 6; comp. Luke xii. 33· Tob. ix. 5). In such "bundles" the priests bound up the money which was contributed for the restoration of the Temple under Jehoiada (2 K. xii. 10, A. V. "put up in bags"). The "bag" (γλωσσόκομον: *loculi*) which Judas carried was probably a small box or chest (John xii. 6, xiii. 29). The Greek

[a] According to Ehrenberg, the Arabs on the coast call this animal *Naba* and *Lottûm*. Arabian naturalists applied the term *ensan alma*, "man of the sea," to this creature.

[b] Rosenmüller (*Schol. in V. T.* on Ex. xxv. 5) questions the use of the Arabic words دخس (*duchas*) and تخس (*tuchas*), as applying to the dolphin or the seal promiscuously. The common Arabic name for the dolphin is دلفين (*dulfin*). Perhaps, therefore, *duchas* and *tuchas* had a wide signification. The Hebrew תַּחַשׁ is of obscure origin.

Digitized by Google

word is the same as that used in the LXX. for "chest" in 2 Chr. xxiv. 8, 10, 11, and originally signified a box used by musicians for carrying the mouth-pieces of their instruments. W. A. W.

BA'GO (Βαγώ; [Vat. Βανι; Alex.] Βαγο: Vulg. omits), 1 Esdr. viii. 40. [BIGVAI.]

BAGO'AS (Βαγώας: [Old Lat.] *Bagoas*, [Vulg.] *Vagao*), Jud. xii. 11, [13.] The name is said to be equivalent to eunuch in Persian (Plin. *H. N.* xiii. 4, 9). Comp. Burmann ad *Ovid. Am.* ii. 2, 1. B. F. W.

BAG'OI [3 syl.] (Βαγοί [Vat. Βοσαι]: *Zoroar*), 1 Esdr. v. 14. [BIGVAI.]

BAHARU'MITE, THE. [BAHURIM.]

BAHU'RIM (בָּחֻרִים and בָּחוּרִים [*young men*, or *warriors*]: Βαρακίμ [2 Sam. iii. 16, elsewhere Βαουρίμ; Vat. 2 Sam. iii. 16, Βαρακει; xvi. 5, xix. 16, Βαουρειμ: xvii. 18, Βαορειμ; 2 K. ii. 8, Βαθουρειμ (and so Alex.)]; Alex. [elsewhere] Βαουρειμ; Joseph. Βαχουρής and Βαουρίν: *Bahurim*), a village, the slight notices remaining of which connect it almost exclusively with the flight of David. It was apparently on or close to the road leading up from the Jordan valley to Jerusalem. Shimei the son of Gera resided here (1 K. ii. 8), and from the village, when David having left the "top of the mount" behind him was making his way down the eastern slopes of Olivet into the Jordan valley below, Shimei issued forth, and running along (Joseph. διατρέχων) on the side or "rib" of the hill over against the king's party, flung his stones and dust and foul abuse (2 S. xvi. 5), with a virulence which is to this day exhibited in the East towards fallen greatness, however eminent it may previously have been. Here in the court of a house was the well in which Jonathan and Ahimaaz eluded their pursuers (xvii. 18). In his account of the occurrence, Josephus (*Ant.* vii. 9, § 7) distinctly states that Bahurim lay off the main road (παῖδες ἐκτραπέντες τῆς ὁδοῦ), which agrees well with the account of Shimei's behavior. Here Phaltiel, the husband of Michal, bade farewell to his wife when on her return to King David at Hebron (2 Sam. iii. 16). Bahurim must have been very near the south boundary of Benjamin, but it is not mentioned in the lists in Joshua, nor is any explanation given of its being Benjamite, as from Shimei's residing there we may conclude it was. In the Targum Jonathan on 2 Sam. xvi. 5, we find it given as Almon (עַלְמוֹן). But the situation of Almon (see Josh. xxi. 18) will not at all suit the requirements of Bahurim. Dr. Barclay conjectures that the place lay where some ruins still exist close to a *Wady Ruweby*, which runs in a straight course for 3 miles from Olivet directly towards Jordan, offering the nearest, though not the best route (Barclay, 563, 4).

AZMAVETH "the Barhumite" (הַבַּרְחֻמִי: ὁ Βαρδιαμίτης; [Vat. Βαραιαμειτης;] Alex. Βαρωμειτης: [*de Beromi*] 2 Sam. xxiii. 31), or "the Baharumite" (הַבַּחֲרוּמִי: ὁ Βαρωμί; [Vat. Βεερμειν; Alex. Βαρσαμι: *Bauramites*] 1 Chr. xi. 33), one of the heroes of David's guard, is the only native of Bahurim that we hear of except Shimei. G.

BA'JITH (הַבַּיִת, with the definite article, "the house"), referring not to a place of this name, but to the "temple" of the false gods of Moab, as opposed to the "high places" in the same sentence (Is. xv. 2, and compare xvi. 12) The allusion has been supposed to be to Beth-Baal meon, or Beth-diblathaim, which are named in Jer xlviii. 22, as here, with Dibon and Nebo. But this is mere conjecture, and the conclusion of Gesenius is as above (*Jesaia*, ad loc.); LXX. ἀνεῖσθε ἐφ' ἑαυτούς: *Ascendit domus.* G.

BAKBAK'KAR (בַּקְבַּקַּר [perh. *wasting of the mount*]: Βακβακάρ [Vat. Βακαρ:] *Bacbacar*), a Levite, apparently a descendant of Asaph (1 Chr. ix. 15).

BAK'BUK (בַּקְבּוּק [*bottle*]: Βακβούκ; [Vat. Βακκουκ, Βακβου:] *Bacbuc*). "Children of Bakbuk" were among the Nethinim who returned from captivity with Zerubbabel (Ezr. ii. 51; Neh. vii. 53). [The name corresponds to ACUB, 1 Esdr. v. 31.]

BAKBUKI'AH (בַּקְבֻּקְיָה [*wasting from Jehovah*]: LXX. omits [in most MSS., but FA.^{3} Βακβακιας, Βακβαϊας; Comp. Βοκχείας, Βακβακίας: *Becbecia*]). 1. A Levite in the time of Nehemiah (Neh. xi. 17. xii. 9).

2. [FA.^{3} Comp. Βακβακιας.] A Levite porter, apparently a different person from the preceding (Neh. xii. 25).

BAKING. [BREAD.]

BA'LAAM (בִּלְעָם, *i. e.* Bileam: Βαλαάμ, Joseph. Βάλαμος: *Balaam*), a man endowed with the gift of prophecy, introduced in Numbers (xxii. 5) as the son of Beor. He belonged to the Midianites, and perhaps as the prophet of his people possessed the same authority that Moses did among the Israelites. At any rate he is mentioned in conjunction with the five kings of Midian, apparently as a person of the same rank (Num. xxxi. 8; cf. xxxi. 16). He seems to have lived at Pethor, which is said at Deut. xxiii. 4, to have been a city of Mesopotamia (אֲרַם נַהֲרַיִם). He himself speaks of being "brought from Aram out of the mountains of the East" (Num. xxiii. 7). The reading, therefore, בְּנֵי עַמּוֹ, instead of בְּנֵי עַמּוֹ, which at Num. xxii. 5 is found in some MSS., and is adopted by the Samaritan, Syriac, and Vulgate versions, need not be preferred, as the Ammonites do not appear to have ever extended so far as the Euphrates, which is probably the river alluded to in this place. The name Balaam, according to Gesenius [and Fürst] is compounded of בַּל and עַם, "non-populus, fortasse i. q. peregrinus;" according to Vitringa it is בַּעַל and עַם, *the lord of the people*; according to Simonis, בָּלַע and עַם, *the destruction of the people.* There is a Bela, the son of Beor, mentioned Gen. xxxvi 32, as the first king of Edom. Balaam is called in 2 Pet. ii. 15, "the son of Bosor:" this Lightfoot (*Works*, vii. 80) thinks a Chaldaism for Beor, and infers that St. Peter was then in Babylon. Balaam is one of those instances which meet us in Scripture, of persons dwelling among heathens, but possessing a certain knowledge of the one true God. He was endowed with a greater than ordinary knowledge of God; he was possessed

Digitized by Google

of high gifts of intellect and genius; he had the intuition of truth, and could see into the life of things, — in short, he was a poet and a prophet. Moreover, he confessed that all these superior advantages were not his own, but derived from God, and were his gift. And thus, doubtless, he had won for himself among his contemporaries far and wide a high reputation for wisdom and sanctity. It was believed that he whom he blessed was blessed, and he whom he cursed was cursed. Elated, however, by his fame and his spiritual elevation, he had begun to conceive that these gifts *were* his own, and that they might be used to the furtherance of his own ends. He could make merchandise of them, and might acquire riches and honor by means of them. A custom existed among many nations of antiquity of devoting enemies to destruction before entering upon a war with them. At this time the Israelites were marching forward to the occupation of Palestine: they were now encamped in the plains of Moab, on the east of Jordan, by Jericho. Balak, the king of Moab, having witnessed the discomfiture of his neighbors, the Amorites, by this people, entered into a league with the Midianites against them, and dispatched messengers to Balaam with the rewards of *divination* in their hands. We see from this, therefore, that Balaam was in the habit of using his wisdom as a trade, and of mingling with it devices of his own by which he imposed upon others, and perhaps partially deceived himself. When the elders of Moab and Midian told him their message, he seems to have had some misgivings as to the lawfulness of their request, for he invited them to tarry the night with him, that he might learn how the Lord would regard it. These misgivings were confirmed by the express prohibition of God upon his journey. Balaam reported the answer, and the messengers of Balak returned. The king of Moab, however, not deterred by this failure, sent again more and more honorable princes to Balaam, with the promise that he should be promoted to very great honor upon complying with his request. The prophet again refused, but notwithstanding invited the embassy to tarry the night with him, that he might know what the Lord would say unto him further; and thus by his importunity he extorted from God the permission he desired, but was warned at the same time that his actions would be overruled according to the Divine will. Balaam therefore proceeded on his journey with the messengers of Balak. But God's anger was kindled at this manifestation of determined self-will, and the angel of the Lord stood in the way for an adversary against him. The words of the Psalmist, "Be ye not like to horse and mule which have no understanding, whose mouths must be held with bit and bridle, lest they fall upon thee," had they been familiar to Balaam, would have come home to him with most tremendous force; for never have they received a more forcible illustration than the comparison of Balaam's conduct to his Maker with his treatment of his ass, affords us. The wisdom with which the ractable brute was allowed to "speak with man's voice," and "forbid" the untractable "madness of he prophet," is palpable and conspicuous. He was taught, moreover, that even she had a spiritual perception to which he, though a prophet, was a stranger; and when his eyes were opened to behold the angel of the Lord, "he bowed down his head and fell flat on his face." It is hardly necessary o suppose, as some do, among whom are Hengstenberg and Leibnitz, that the event here referred to happened only in a trance or vision, though such an opinion might seem to be supported by the fact that our translators render the word נֹפֵל in xxiv. 4, 16, "*falling into a trance*," whereas no other idea than that of simple *falling* is conveyed by it. St. Peter refers to it as a real historical event: "the dumb ass, speaking with man's voice, forbad the madness of the prophet" (2 Pet. ii. 16). We are not told *how* these things happened, but that they *did* happen, and that it pleased God thus to interfere on behalf of His elect people, and to bring forth from the genius of a self-willed prophet, who thought that his talents were his own, strains of poetry bearing upon the destiny of the Jewish nation and the church at large, which are not surpassed throughout the Mosaic records. It is evident that Balaam, although acquainted with God, was desirous of throwing an air of mystery round his wisdom, from the instructions he gave Balak to offer a bullock and a ram on the seven altars he everywhere prepared for him; but he seems to have thought, also, that these sacrifices would be of some avail to change the mind of the Almighty, because he pleads the merit of them (xxiii. 4), and after experiencing their impotency to effect such an object, "he went no more," we are told, "to seek for enchantments" (xxiv. 1). His religion, therefore, was probably such as would be the natural result of a general acquaintance with God not confirmed by any covenant. He knew Him as the fountain of wisdom, how to worship Him he could merely guess from the customs in vogue at the time. Sacrifices had been used by the patriarchs; to what extent they were efficient could only be surmised. There is an allusion to Balaam in the prophet Micah (vi. 5), where Bishop Butler thinks that a conversation is preserved which occurred between him and the king of Moab upon this occasion. But such an opinion is hardly tenable, if we bear in mind that Balak is nowhere represented as consulting Balaam upon the acceptable mode of worshipping God, and that the directions found in Micah are of quite an opposite character to those which were given by the son of Beor upon the high places of Baal. The prophet is recounting "the righteousness of the Lord" in delivering His people out of the hand of Moab under Balak, and at the mention of his name the history of Balaam comes back upon his mind, and he is led to make those noble reflections upon it which occur in the following verses. "The doctrine of Balaam" is spoken of in Rev. ii. 14, where an allusion has been supposed to Νικόλαος, the founder of the sect of the Nicolaitans, mentioned in v. 15, these two names being probably similar in signification. Though the utterance of Balaam was overruled so that he could not curse the children of Israel, he nevertheless suggested to the Moabites the expedient of seducing them to commit fornication. The effect of this is recorded in ch. xxv. A battle was afterwards fought against the Midianites, in which Balaam sided with them, and was slain by the sword of the people whom he had endeavored to curse (Num. xxxi. 8). (Comp. Bishop Butler's *Sermons*, serm.' vii.; Ewald, *Gesch. des Volkes Israel*, ii. 277.) S. L.

* There are but two views that can well be taken of this miracle of "the dumb ass speaking." Did God exert such an influence upon the beast that it saw his messenger which men did not see, and

Digitized by Google

without a reasoning mind distinctly uttered the words of a rational being? or did God exert such an influence upon Balaam that the reproof of the messenger of God and the beast on which he rode sounded in his ears and sunk into his heart? In either case the occurrences were realities to Balaam, and were the result of a direct interposition of God, more *palpable* on the former, but not less *real* on the latter supposition.

The arguments for the subjective view (as represented by Tholuck, Hengstenberg and others) on Balaam are the following: 1. The usual manner in which God revealed himself in that age was by visions and dreams, and we have no evidence that he ever revealed himself otherwise to Balaam, whilst in the first two cases he waited until after night, the proper season for visions and dreams, before he gave his answer. 2. No astonishment is indicated at the communication of the ass, or respect such as we should naturally expect to be exhibited to such a messenger of God. On the other hand he says in his impatience, "Because thou hast mocked me, I would there were a sword in my hand, for now would I kill thee." 3. At the time of the revelation, Balaam's two servants (Num. xxii. 22) and probably the Moabitish messengers (xxii. 35) were with him, and yet they do not seem to have been cognizant of any communication to the external senses of Balaam. 4. Balaam himself did not perceive the messenger of God which proved so formidable an obstruction to the ass until after its expostulation, and God had opened his eyes. Compare similar language as preparatory to a vision, or internal illumination, in 2 K. vi. 17; Ps. cxix. 18.

In opposition to this view it may be said: (*a.*) "This occurs in a Historical Book, and unless it is expressly stated, we should not interpret these occurrences as seen in vision." But we reply, that God so often revealed himself in visions, and they were so unquestionably relied upon, that the authors of the Historical Books of the Bible do not consider it necessary to state in what way a particular revelation is made. Compare Gen. xxii. 3; xxviii. 12 ff., xxxii. 2, and many other passages. (*b.*) "We cannot draw the line of demarkation between what was seen in vision, and what occurred before the eyes of all." It is not necessary that we should do this; one mode is as *real* as the other; it is enough when what is narrated belongs to the sphere of ordinary experience, that we then understand it of external events. (*c.*) "The language in Num. xxii. 28, as well as in 2 Pet. ii. 16, implies a direct oral communication." But it is not necessary to so interpret it. There was a direct communication in the way of reproof from God to Balaam, and it matters little whether God put the sound of words into the mouth of the dumb beast, or into the ears of Balaam as coming from the beast.

R. D. C. R.

* The sin of Balaam was one of peculiar aggravation, and is characterized as such in 2 Pet. ii. 15, 16, and Jude 11. To see his conduct in its true light, we must call to mind the geography of the scene. This professed servant and prophet of Jehovah was standing at the time on one of the summits of the Abarim beyond the Jordan, from which Moses was permitted to behold the Land of Promise just before his death. For the range of view under the eye of the spectator from that position, see under NEBO (Amer. ed.). Standing there, Balaam was on a mount consecrated to pagan worship and thronged with idolaters. On his left hand he sees the dark waters of the Dead Sea with its black and desolate shores, which were recognized among all the eastern tribes as a monument of God's wrath against the impious and ungodly. On the right he sees the land of the Amorites, whom Jehovah had just overthrown as proof of His power and purpose to destroy the wicked and to give the victory to His people. In the valley of the Jordan lies spread out before him the camp of Israel, divided according to their tribes, in the midst of which is seen the tabernacle of God, above which hangs the pillar of cloud; while in the distance beyond the camp his eyes rest upon the land which he knew to be promised to the people of Israel. Yet even in this situation, amid so much adapted to show him how fearful a thing it is to sin against the Infinite One, he dared, for the reward with which Balak tempted his avarice, to abuse his office as a holy prophet and to attempt, once and again, to call down curses on those whom God had blessed. How much more vivid is our conception of Balaam's apostasy and guilt, when we thus place ourselves in imagination where he stood in that critical hour of his moral history!

In support of the internal or subjective interpretation, the reader may consult Herder, *Geist der Ebr. Poesie*, i. 237; Tholuck's *Vermischte Schriften*, i. 406–432; Hengstenberg's *Geschichte Bileams u. seine Weissagungen* (Berlin, 1842); and *Prophecies of Balaam* (*Bibl. Sacr.* iii. 347–378, and 699–743). Kurtz maintains the outward or literal view (*Geschichte des A. Bundes*, ii. 477–489).

Later exegetical helps for the study of Balaam's prophecies: Keil and Delitzsch in their *Commentary on the Pentateuch*, iii. 176–202 (Clark's Library); Knobel, *Exeget. Handb.* xiii. 121–148; Bunsen's *Bibelwerk*, i. 261–265; and Wordsworth's *Holy Bible, with Notes and Introductions*, Part II. 159–164 (London, 1864).

Dean Stanley has grouped together with fine effect the characteristic points of this "grandest of all the episodes introduced into the Mosaic narrative" (*History of the Jewish Church*, i. 209–218). Bishop Hall has some good practical reflections on Balaam's character and prophecies (*Contemplations on Historical Passages of the O. and N. T.*, book vii. 4). Keble's noble hymn (*Christian Year: Second Sunday after Easter*) should not be overlooked. The "sculptor's hand" has graphically bodied forth both the sin of the apostate and the warning from it for others, in the lines:

> "No sun or star so bright
> In all the world of light
> That they should draw to Heaven his downward eye;
> He hears th' Almighty's word,
> He sees the Angel's sword,
> Yet low upon the earth his heart and treasure lie."

H.

BA'LAC (ὁ Βαλάκ: *Balac*), Rev. ii. 14. [BALAK.]

BAL'ADAN. [MERODACH-BALADAN.]

BA'LAH (בָּלָה: Βαλά [Alex. Βελβαλα]: *Bala*), Josh. xix. 3. [BAAL, *Geogr.* No. 2, *b.*]

BA'LAK (בָּלָק: Βαλάκ: *Balac*), son of Zippor, king of the Moabites, at the time when the children of Israel were bringing their journeyings in the wilderness to a close. According to Gesenius the name signifies *inanis, vacuus*. Balak entered into a league with Midian and hired Balaam to curse the Israelites; but his designs were frustrated in the manner recorded in Num. xxii.–xxiv.

Digitized by Google

He is mentioned also at Josh. xxiv 9; Judg. xi. 25; Mic. vi. 5. [BALAAM.] S. L.

* Balak's name signifies not *inanis, vacuus*, but in the active sense one who makes empty or desolate, "a waster," "spoiler"; a complimentary title such as a king or conqueror might bear. The writer above quotes Gesenius in his *Thesaur.* i. 214; but in his other works Gesenius defines the name in the other way. See his *Hebr. u. Chald. Handw.* (1835): Hoffmann's Latin ed. 1847; and Dietrich's ed. 1863. Fürst adopts the same explanation (i. 194). The last book of the Bible mentions Balak once more, and presents him in the same character as the dupe and instrument of Balaam in leading the people of Israel into gross idolatry and licentiousness (Rev. ii. 14). H.

BAL'AMO. [Jud. viii. 3.] [BAAL, *Geogr.* No. 6.]

BALANCE. Two Hebrew words are thus translated in the A. V.

1. מֹאזְנַיִם. *mózĕnayim* (LXX. ζυγόν, Vulg. *statera*), the dual form of which points to the double scales, like Lat. *bilanx*. The balance in this form was known at a very early period. It is found on the Egyptian monuments as early as the time of Joseph, and we find allusions to its use in the story of the purchase of the cave of Machpelah (Gen. xxiii. 16) by Abraham. Before coinage was introduced it was of necessity employed in all transactions in which the valuable metals were the mediums of exchange (Gen. xliii. 21; Ex. xxii. 17; 1 K. xx. 39; Esth. iii. 9; Is. xlvi. 6; Jer. xxxii. 10, &c.). The weights which were used were at first probably stones, and from this the word "stone" continued to denote any weight whatever, though its material was in later times lead (Lev. xix. 36; Deut. xxv. 13, 15; Prov. xi. 1, xx. 10. 23; Zech. v. 8). These weights were carried in a bag (Deut. xxv. 13; Prov. xvi. 11) suspended from the girdle (Chardin, *Voy.* iii. 422), and were very early made the vehicles of fraud. The habit of carrying two sets of weights is denounced in Deut. xxv. 13 and Prov. xx. 10, and the necessity of observing strict honesty in the matter is insisted upon in several precepts of the Law (Lev. xix. 36; Deut. xxv. 13). But the custom lived on, and remained in full force to the days of Micah (vi. 11), and even to those of Zechariah, who appears (ch. v.) to pronounce a judgment against fraud of a similar kind. The earliest weight to which reference is made is the קְשִׂיטָה, *kĕsîṭâh* (Gen. xxxiii. 19; Josh. xxiv. 32; Job xlii. 11), which in the margin of our version is in two passages rendered "lambs," while in the text it is "piece of money." It may have derived its name from being in the shape of a lamb. We know that weights in the form of bulls, lions, and antelopes were in use among the ancient Egyptians and Assyrians. [MONEY, I. 3.] By means of the balance the Hebrews appear to have been able to weigh with considerable delicacy, and for this purpose they had weights of extreme minuteness, which are called metaphorically "the small dust of the balance" (Is. xl. 15). The "little grain" ῥοπή of the balance in Wisd. xi. 22 is the small weight which causes the scale to turn. In this passage, as in 2 Macc. ix. 8. the Greek word ἀστραγξ, rendered "balance," was originally applied to the whole pan alone.

2. קָנֶה, *kâneh* (ζυγόν: *statera*), rendered "balance" in Is. xlvi. 6, is the word generally used for a measuring-rod, like the Greek κανών, and like it too denotes the tongue or beam of a balance.

פֶּלֶס, *peles*, rendered "weight" (Prov. xvi. 11, LXX. ῥοπή) and "scales" (Is. xl. 12, LXX. σταθμός) is said by Kimchi (on Is. xxvi. 7) to be properly the *beam* of the balance. In his Lexicon he says it is the part in which the tongue moves, and which the weigher holds in his hand. Gesenius (*Thes.* s. v.) supposed it was a steelyard, but there is no evidence that this instrument was known to the Hebrews. Of the material of which the balance was made we have no information.

Sir G. Wilkinson describes the Egyptian balance as follows: — "The beam passed through a ring suspended from a horizontal rod, immediately above and parallel to it; and when equally balanced, the ring, which was large enough to allow the beam to play freely, showed when the scales were equally poised, and had the additional effect of preventing the beam tilting when the goods were taken out of one and the weights suffered to remain in the other. To the lower part of this ring a small plummet was fixed, and this being touched by the hand and found to hang freely, indicated, without the necessity of looking at the beam, that the weight was just" (*Anc. Eg.* ii. 240).

The expression in Dan. v. 27, "thou art weighed in the balances, and art found wanting," has been supposed to be illustrated by the custom of weighing the Great Mogul on his birthday in the presence of his chief grandees. The ceremony is described in a passage from Sir Thomas Roe's *Voyage in India*, quoted in Taylor's Calmet, *Frag.* 186: "The scales in which he was thus weighed, were plated with gold, and so the beam on which they hung by great chains, made likewise of that most precious metal. The king, sitting in one of them was weighed first against silver coin, which immediately after was distributed among the poor; then was he weighed against gold: after that against jewels (as they say); but I observed (being there present with my lord ambassador) that he was weighed against three several things, laid in silken bags, on the contrary scale. By his weight (of which his physicians yearly keep an exact account) they presume to guess of the present state of his body; of which they speak flatteringly, however they think it to be." It appears, however, from a consideration of the other metaphorical expressions in the same passage of Daniel that the weighing in balances is simply a figure, and may or may not have reference to such a custom as that above described. Many examples of the use of the same figure of speech among Orientals are given in Roberts's *Oriental Illustrations*, p. 502.

W. A. W.

BALAS'AMUS (Βαλσαμος [Ald. Βαλδασμος]: *Balsamus*), in 1 Esdr. ix. 43. The corresponding name in the list in Ezra is MAASEIAH.

BALDNESS (קָרְחָה: φαλάκρωσις, φαλάκρωμα· and in Lev. xiii. 43, φαλάντωμα). There are two kinds of baldness, namely, artificial and natural. The latter seems to have been uncommon, since it exposed people to public derision, and is perpetually alluded to as a mark of squalor and misery (2 K. ii. 23 Is. iii. 24, "instead of well-set hair, baldness, and burning instead of beauty." Is. xv. 2; Jer. xlvii. 5; Ez. vii. 18, &c. For this reason it seems to have been included under the λειχήν and

Digitized by Google

φαρά (Lev. xxi. 20, LXX.) which were disqualifications for priesthood. A man bald on the back of the head is called קָרַח, φαλακρός, LXX., Lev. xiii. 40, and if forehead-bald, the word used to describe him is גִּבַּחַ, ἀναφαλαντίας, LXX., Lev. xiii. 41 (*recalvaster*). (Gesen. *s. vv.*) In Lev. xiii. 29 ff., very careful directions are given to distinguish *Bohak*, "a plague upon the head and beard" (which probably is the Mentagra of Pliny, and is a sort of leprosy), from mere natural baldness which is pronounced to be clean, v. 40 (Jahn, *Arch. Bibl.* § 189). But this shows that even natural baldness subjected men to an unpleasant suspicion. It was a defect with which the Israelites were by no means familiar, since Αἰγυπτίους ἂν τις ἐλαχίστους ἴδοιτο φαλακροὺς πάντων ἀνθρώπων, says Herod. (iii. 12); an immunity which he attributes to their constant shaving. They adopted this practice for purposes of cleanliness, and generally wore wigs, some of which have been found in the ruins of Thebes. Contrary to the general practice of the East, they only let the hair grow as a sign of mourning (Herod. ii. 36), and shaved themselves on all joyous occasions: hence in Gen. xli. 14 we have an undesigned coincidence. The same custom obtains in China, and among the modern Egyptians, who shave off all the hair except the shoosheh, a tuft on the forehead and crown of the head (Wilkinson, *Anc. Egypt.* iii. 359 ff.; Lane, *Mod. Egypt.* i. ch. 1).

Baldness was despised both among Greeks and Romans. In *Il.* ii. 219, it is one of the defects of Thersites; Aristophanes (who was probably bald himself, *Pax*, 767, *Eq.* 550) takes pride in not joining in the ridicule against it (οὐδ' ἔσκωψεν τοὺς φαλακρούς, *Nub.* 540). Cæsar was said "calvitii deformitatem iniquissime ferre," and he generally endeavored to conceal it (Suet. *Cæs.* 45; comp. *Dom.* 18).

Artificial baldness marked the conclusion of a Nazarite's vow (Acts xviii. 18; Num. vi. 9), and was a sign of mourning ("quasi calvitio luctus levaretur," Cic. *Tusc. Disp.* iii. 26). It is often alluded to in Scripture; as in Mic. i. 16; Am. viii. 10; Jer. xlvii. 5, &c.; and in Deut. xiv. 1, the reason for its being forbidden to the Israelites is their being "a holy and peculiar people." (Cf. Lev. xix. 27, and Jer. ix. 26, marg.) The practices alluded to in the latter passages were adopted by heathen nations (*e. g.* the Arabs, &c.) in honor of various gods. Hence the expression τροχοκουρίδες. The Abantes (ὄπιθεν κομοῶντες), and other half-civilized tribes, shaved off the forelocks, to avoid the danger of being seized by them in battle. (See also Herod. ii. 36, i. 82.) F. W. F.

BALM (צֳרִי, *tzŏrí*; צְרִי, *tzĕrí*: ῥητίνη: *resina*) occurs in Gen. xxxvii. 25 as one of the substances which the Ishmaelites were bringing from Gilead to take into Egypt; in Gen. xliii. 11, as one of the presents which Jacob sent to Joseph; in Jer. viii. 22, xlvi. 11, li. 8, where it appears that the balm of Gilead had a medicinal value; in Ex. xxvii. 17 (margin, "rosin") as an article of commerce imported by Judah into Tyre.

Many attempts have been made to identify the *tzŏrí* by different writers, not one of which, however, can be considered conclusive. The Syriac version in Jer. viii. 22, and the Samaritan in Gen. xxxvii. 25, suppose *cera*, "wax," to be meant; others, as the Arabic version in the passages cited in Genesis, conjecture *theriaca*, a medical compound of great supposed virtue in serpent bites. Of the same opinion is Castell (*Lex. Hept.* s. v. צרי). Luther and the Swedish version have "salve," "ointment," in the passages in Jeremiah; but in Ez. xxvii. 17 they read "mastic." The Jewish Rabbis, Junius and Tremellius, Deodatius, &c., have "balm" or "balsam," as the A. V. (Celsius, *Hierob.* ii. 180) identifies the *tzŏrí* with the mastic-tree (*Pistacia lentiscus*).

Rosenmüller (*Bibl. Bot.* 169) believes that the pressed juice of the fruit of the *zuckum*-tree (*Elæagnus angustifolius*, Linn. [?]), or narrow-leaved oleaster, is the substance denoted;[a] but the same author, in another place (*Schol. in Gen.* xxxvii. 25), mentions the balsam of Mecca (*Amyris opobalsamum*, Linn.), referred to by Strabo (xvi. 778) and Diodorus Siculus (ii. 132), as being probably the *tzŏrí* (see Kitto, *Phys. Hist. Pal.* p. 273; Hasselquist, *Travels*, p. 293). Dr. Royle (Kitto's *Cycl. Bib. Lit.*) is unable to identify the *tzŏrí* with any of the numerous substances that have been referred to it.

Josephus (*Ant.* viii. 6, § 7) mentions a current opinion amongst the Jews, that the queen of Sheba first introduced the balsam into Judæa, having made Solomon a present of a root. If this be so — but perhaps it was merely a tradition — the *tzŏrí* cannot be restricted to represent the produce of this tree, as the word occurs in Genesis, and the plant was known to the patriarchs as growing in the hilly district of Gilead.

Hasselquist has given a description of the true balsam-tree of Mecca. He says that the exudation from the plant "is of a yellow color, and pellucid. It has a most fragrant smell, which is resinous balsamic, and very agreeable. It is very tenacious or glutinous, sticking to the fingers, and may be drawn into long threads. I have seen it at a Turkish surgeon's, who had it immediately from Mecca, described it, and was informed of its virtues; which are, first, that it is the best stomachic they know, if taken to three grains, to strengthen a weak stomach; secondly, that it is a most excellent and capital remedy for curing wounds, for if a few drops are applied to the fresh wound, it cures it in a very short time" (*Travels*, p. 293).

The trees which certainly appear to have the best claim for representing the Scriptural *tzŏrí* — supposing, that is, that any one particular tree is denoted by the term — are the *Pistacia lentiscus* (mastic), and the *Amyris opobalsamum*, Linn., the *Balsamodendron opobalsamum*, or *Gileadense* of modern botanists (Balm of Gilead). One argument in favor of the first-named tree rests upon the fact that its name in Arabic (*dseri*, *dseru*) is identical with the Hebrew; and the Arabian naturalists have attributed great medicinal virtues to the resin afforded by this tree (Dioscor. i. 90, 91; Plin. xxiv. 7; Avicenna, edit. Arab. pp. 204 and 277, in Celsius). The *Pistacia lentiscus* has been recorded to occur at Joppa both by Rauwolf and Pococke (Strand. *Flor. Palæst.* No. 561). The derivation of the word from a root, "to flow forth,"[b] is opposed to the theory which identifies the pressed oil of the

[a] From Maundrell's description of the *zuckum* Dr. Hooker unhesitatingly identifies it with *Balanites Ægyptiaca*, which he saw abundantly at Jericho.

[b] צָרַר, "to flow as a wound from a cleft." The cognate Syriac and Arabic have a similar meaning.

Digitized by Google

zuckum (*Balanites Ægyptiaca* [?]) with the *tzŏri*, although this oil is in very high esteem amongst the Arabs, who even prefer it to the balm of Mecca, as being more efficacious in wounds and bruises (see Mariti, ii. 353, ed. Lond.). Maundrell (*Journey from Alep. to Jerus.*, p. 86), when near the Dead Sea, saw the *zuckum*-tree. He says it is a thorny bush with small leaves, and that "the fruit both in shape and colour resembles a small unripe walnut. The kernels of this fruit the Arabs bray in a mortar, and then, putting the pulp into scalding water, they skim off the oyl which rises to the top: this oyl they take inwardly for bruises, and apply it outwardly to green wounds. I procured a bottle of it, and have found it upon some small tryals a very healing medicine." "This," says Dr. Robinson (*Bib. Res.* ii. 231), "is the modern balsam or oil of Jericho." Perhaps, after all, the *tzŏri* does not refer to an exudation from any particular tree, but was intended to denote any kind of resinous substance which had a medicinal value. The *tzŏri*, then, may represent the gum of the *Pistacia lentiscus*, or that of the *Balsamodendron opobalsamum*. [SPICES; MASTIC.] Compare Winer, *Biblisch. Realwört.* s. v., for numerous references from ancient and modern writers on the subject of the balm or balsam-tree, and Hooker's *Kew Garden Misc.* i. 257. W. H.

BALNU'US (Βαλνοῦος [Vat. Βαλνους]: *Bonnus*), 1 Esdr. ix. 31. [BINNUI.]

BALTHA'SAR (Βαλτάσαρ: *Balthasar*), Bar. i. 11, 12. [BELSHAZZAR.]

BA'MAH (בָּמָה, *a high place*). Though frequently occurring in the Bible to denote the elevated spots or erections on which the idolatrous rites were conducted [HIGH-PLACE], this word appears in its Hebrew form only in one passage (Ez. xx. 29), very obscure, and full of the paronomasia so dear to the Hebrew poets, so difficult for us to appreciate: "What is the high-place (הַבָּמָה) whereunto ye hie (הַבָּאִים)? and the name of it is called Bamah (בָּמָה) unto this day." (LXX. τί ἐστιν ἀβαμὰ καὶ ἐπεκάλεσαν τὸ ὄνομα αὐτοῦ Αβαμά [Vat. Ald. Αβανά; Alex. Αββανα: Vulg. *excelsum*].) Ewald (*Propheten*, 286) pronounces this verse to be an extract from an older prophet than Ezekiel. G.

* Ewald's idea of a quotation is purely conjectural. The passage is certainly obscure. Hävernick understands "the height" as referring to the place of the tabernacle or of the temple, to which the people prone to idolatry through successive ages had been accustomed to apply (down to the prophet's time = "unto this day") the same name, with very much the same feeling, which they applied to the high places of their idol worship (see his *Comm. üb. den Propheten Ezechiel*, p. 316). Professor Fairbairn says: Jehovah "gave the name Bamah to every place of their worship, and held by that as the proper name; for the worship was essentially of a polluted and heathenish character (*Ezekiel and his Prophecy*, p. 211, 2d ed.). Umbreit would find a sarcasm in the expression: "Truly you go not *up*, but *down* when you repair to your 'high place'! Thus the term (בָּמָה) ever in the mouth of the backsliding Israelites became a perpetual reminder of their abominable treachery against the gracious God who would draw them upward, on a very different height, to himself" (*Comm. üb. die Propheten*, iii. 115, ed. 1843). The word after all is really appellative rather than a proper name (A. V H.

BA'MOTH (בָּמוֹת [*heights*]: Βαμώθ: *Bamoth*). A halting-place of the Israelites in the Amorite country on their march to Canaan (Num. xxi. 19, 20). It was between Nahaliel and Pisgah, north of the Arnon. Eusebius (*Onomast.*) calls it "Baboth, a city of the Amorite beyond Jordan on the Arnon, which the children of Israel took." Jerome adds that it was in the territory of the Reubenites. Knobel identifies it with "the high places of Baal" (Num. xxii. 41), or Bamoth Baal, and places it on the modern *Jebel Attârûs*, the site being marked by stone heaps which were observed both by Seetzen (ii. 342) and Burckhardt (*Syria*, p. 370). W. A. W.

BA'MOTH-BA'AL (בָּמוֹת־בַּעַל, *high places of Baal*: Βαμὼν Βαάλ [Alex. Comp. Ald. Βαμὼθ Βαάλ]: *Bamothbaal*), a sanctuary of Baal in the country of Moab (Josh. xiii. 17), which is probably mentioned in the Itinerary in Num. xxi. 19, under the shorter form of Bamoth, or Bamoth-in-the-ravine (20), and again in the enumeration of the towns of Moab in Is. xv. 2. In this last passage the word is translated in the A. V. "the high places," as it is also in Num. xxii. 41, where the same locality is doubtless referred to.[a] Near to Bamoth was another place bearing the name of the same divinity, — BAAL-MEON, or BETH-BAAL-MEON. G.

BAN (Βαενδν [Alex. Ald. Βάν]: *Tubal*), a name in a very corrupt passage (1 Esdr. v. 37); it stands for TOBIAH in the parallel lists in Ezra and Nehemiah.

BANA'IAS [3 syl.] (Βαναίας: *Baneas*) 1 Esdr. ix. 35. [BENAIAH.]

BA'NI (בָּנִי [*built*, perh. *having posterity*]), the name of several men. 1. A Gadite, one of David's mighty men (2 Sam. xxiii. 36; LXX. [ed. Rom.] translate, Πολυδυνάμεως υἱὸς Γαλααδί [Vat. -δει; Alex. πολλυς δυναμεως υιος Γαδδι; Comp. Βανὶ ὁ Γαδί: *Bonni de Gadi*]).

2. [Βανί; Vat. Βανει; Alex. Βαανι: *Boni*.] A Levite of the line of Merari, and forefather to Ethan (1 Chr. vi. 46).

3. [Βουνί; Vat. Alex. om.: *Bonni*.] A man of Judah of the line of Pharez (1 Chr. ix. 4).

4. [Βανουί, Βανί, etc.: *Bani*.] "Children of Bani" returned from captivity with Zerubbabel (Ezr. ii. 10; Neh. x. 14; Ezr. x. 29, 34; 1 Esdr. v. 12). [BINNUI, MANI, and MAANI.]

5. [Βανουί: *Bani*.] An Israelite "of the sons of Bani" (Ezr. x. 38). [BANNUS.]

6. [Βανί; Vat. Alex. Βανει: *Benni*.] A Levite (Neh. iii. 17).

7. [Βαναίας, etc.: *Bani*.] A Levite (Neh. viii 7; ix. 4; LXX transl. καὶ οἱ υἱοὶ Καδμιήλ, 4 x. 13). [ANUS.]

8. Another Levite (Neh. ix. 4; LXX. [ed Rom.] transl. υἱοὶ Χωνεί [Vat. om.: Comp Ald. Alex. Χαν-νί: *Bani*]).

[a] It will be observed that our Translators have, in Num. xxiii 3, rendered by "high place" a totally different word (שְׁפִי) which is devoid of the special meaning of "Bamoth."

Digitized by Google

9. [Βανί; Vat. Alex. Βανει: *Bani.*] Another Levite, of the sons of Asaph (Neh. xi. 22).

BA'NID (Βανίας [Vat. -νεν]; Alex. Βανι; [Ald. Βανιδ:] *Bania*), 1 Esdr. viii. 36. This represents a name which has apparently escaped from the present Hebrew text (see Ezr. viii. 10).

BANNAIA [3 syl.] (Ζαβαννᾶιος [Vat. -ους]; Alex. Βαννᾶιους; [Ald. Βαννᾶα:] *Bannus*), 1 Esdr. ix. 33. The corresponding name in the list in Ezra is ZABAD.

* **BANNER.** [ENSIGN.]

BAN'NUS (Βαννοῦς: *Baneas*), 1 Esdr. ix. 34. [BANI, or BINNUI.]

BANQUETS. These, among the Hebrews, were not only a means of social enjoyment, but were a part of the observance of religious festivity. At the three solemn festivals, when all the males appeared before the Lord, the family also had its domestic feast, as appears from the place and the share in it to which "the widow, the fatherless, and the stranger" were legally entitled (Deut. xvi. 11). Probably, when the distance allowed, and no inconvenience hindered, both males and females went up (*e. g.* to Shiloh, 1 Sam. i. 9) together, to hold the festival. These domestic festivities were doubtless to a great extent retained, after laxity had set in as regards the special observance by the male sex (Neh. viii. 17). Sacrifices, both ordinary and extraordinary, as amongst heathen nations (Ex. xxxiv. 15; Judg. xvi. 23), included a banquet, and Eli's sons made this latter the prominent part. The two, thus united, marked strongly both domestic and civil life. It may even be said that some sacrificial recognition, if only in pouring the blood solemnly forth as before God, always attended the slaughter of an animal for food. The firstlings of cattle were to be sacrificed and eaten at the sanctuary if not too far from the residence (1 Sam. ix. 13; 2 Sam. vi. 19; Ex. xxii. 29, 30; Lev. xix. 5, 6; Deut. xii. 17, 20, 21, xv. 19–22). From the sacrificial banquet probably sprang the ἀγαπή; as the Lord's supper, with which it for a while coalesced, was derived from the Passover. Besides religious celebrations, such events as the weaning a son and heir, a marriage, the separation or reunion of friends, and sheepshearing, were customarily attended by a banquet or revel (Gen. xxi. 8, xxix. 22, xxxi. 27, 54; 1 Sam. xxv. 2, 36; 2 Sam. xiii. 23). At a funeral, also, refreshment was taken in common by the mourners, and this might tend to become a scene of indulgence, but ordinarily abstemiousness seems on such occasions to have been the rule. The case of Archelaus is not conclusive, but his inclination towards alien usages was doubtless shared by the Herodianizing Jews (Jer. xvi. 5–7; Ez. xxiv. 17; Hos. ix. 4; Eccl. vii. 2; Joseph. *de B. J.* ii. 1). Birthday-banquets are only mentioned in the cases of Pharaoh and Herod (Gen. xl. 20; Matt. xiv. 6). A leading topic of prophetic rebuke is the abuse of festivals to an occasion of drunken revelry, and the growth of fashion in favor of drinking parties. Such was the invitation typically given by Jeremiah to the Rechabites (Jer. xxxv. 5). The usual time of the banquet was the evening, and to begin early was a mark of excess (Is. v. 11; Eccl. x. 16). The slaughtering of the cattle, which was the preliminary of a banquet, occupied the earlier part of the same day (Prov. ix. 2; Is. xxii. 13; Matt. xxii. 4). The most essential materials of the banqueting-room, next to the viands and wine, which last was often drugged with spices (Prov. ix. 2; Cant. viii. 2), were perfumes ointments, garlands or loose flowers, white or brilliant robes, after these, exhibitions of music, singers and dancers, riddles, jesting, and merriment (Is. xxviii. 1; Wisd. ii. 6–8; 2 Sam. xix. 35; Is. xxv. 6, v. 12; Judg. xiv. 12; Neh. viii. 10; Eccl. x 19; Matt. xxii. 11; Am. vi. 5, 6; Luke xv. 25). Seven days was a not uncommon duration of a festival, especially for a wedding, but sometimes fourteen (Tob. viii. 19; Gen. xxix. 27; Judg. xiv. 12); but if the bride were a widow, three days formed the limit (Buxtorf, *de Conviv. Hebr.*). The reminder sent to the guests (Luke xiv. 17) was, probably, only usual in princely banquets on a large scale, involving protracted preparation. "Whether the slaves who bade the guests had the office (as the *vocatores* or *invitatores* among the Romans) of pointing out the places at table and naming the strange dishes. must remain undecided." (Winer, s. v. *Gastmahle.*) There seems no doubt that the Jews of the O. T. period used a common table for all the guests. In Joseph's entertainment a ceremonial separation prevailed, but there is no reason for supposing a separate table for each, as is distinctly asserted in Tosephot *Tr. Berach.* c. vi. to have been usual (Buxtorf, *l. c.*). The latter custom certainly was in use among the ancient Greeks and Germans (Hom. *Od.* xxiii., xxii. 74; Tac. *Germ.* 22). and perhaps among the Egyptians (Wilkinson, ii. 202, engravings). But the common phrase to "sit at table," or "eat at any one's table," shows the originality of the opposite usage. The posture at table in early times was sitting (סָבַב, יָשַׁב, to sit *round*, 1 Sam. xvi. 11, xx. 5, 18), and the guests were ranged in order of dignity (Gen. xliii. 33; 1 Sam. ix. 22; Joseph. *Ant.* xv. 2, § 4): the words which imply the recumbent posture (ἀνακλίνειν, ἀναπίπτειν, or ἀνακεῖσθαι) belong to the N. T. The separation of the women's banquet was not a Jewish custom (Esth. i. 9). Portions or messes were sent from the entertainer to each guest at table, and a double or even five-fold share when peculiar distinction was intended, or a special part was reserved (1 Sam. i. 5; Gen. xliii. 34; 1 Sam. ix. 23, 24). Portions were similarly sent to poorer friends direct from the banquet-table (Neh. viii. 10; Esth. ix. 19, 22). The kiss on receiving a guest was a point of friendly courtesy (Luke vii. 45). Perfumes and scented oils were offered for the head, beard, and garments. It was strictly enjoined by the Rabbis to wash both before and after eating, which they called the מים ראשונים and מים אחרונים: but washing the feet seems to have been limited to the case of a guest who was also a traveller.

In religious banquets the wine was mixed, by rabbinical regulation, with three parts of water, and four short forms of benediction were pronounced over it. At the passover four such cups were mixed, blessed, and passed round by the master of the feast (ἀρχιτρίκλινος). It is probable that the character of this official varied with that of the entertainment; if it were a religious one, his office would be quasi-priestly; if a revel, he would be the mere συμποσιάρχης or *arbiter bibendi*. BAPTISM (βάπτισμα). I. It is well known that ablution or bathing was common in most ancient nations as a preparation for prayers and sacrifice, or as expiatory of sin. The Egyptian priests, in order to be fit for their sacred offices, bathed twice in the day and twice in the night (Herod. ii. 37). The Greeks and Romans used to bathe before sacrifice (*Eo lavatum, ut sacrificem*, Plaut. *Aulular.* iii 6. 43) and before prayer —

"Hæc sanctè ut poscas, Tiberino in gurgite mergis
Mane caput bis terque, et noctem flumine purgas."
Pers. *Sat.* ii. 15.

At the celebration of the Eleusinian mysteries, on the second day of the greater mysteries, the *mystæ* went in solemn procession to the sea-coast, where they were purified by bathing (see *Dict. of Gr. and Rom. Antiq.* p. 453). But, above all, when pollution of any kind had been contracted, as by the being stained with blood in battle, purification by water was thought needful before acts of devotion could be performed or any sacred thing be taken in hand (see Soph. *Ajax*, 665; Virg. *Æn.* ii. 719, &c.). Even the crime of homicide is said to have been expiated by such means.

"Omne nefas omnemque mali purgamina causam
Credebant nostri tollere posse senes.
.
Ah! nimium faciles, qui tristia crimina cædis
Fluminea tolli posse putetis aquâ."
Ovid, *Fasti*, ii. 35, 36, 45, 46.

There is a natural connection in the mind between the thought of physical and that of spiritual pollution. In warm countries this connection is probably even closer than in colder climates; and hence the frequency of ablution in the religious rites throughout the East.

II. The history of Israel and the Law of Moses abound with such lustrations. When Jacob was returning with his wives and children to Bethel, he enjoined his household to "put away all their strange gods, and to be clean, and change their garments" (Gen. xxxv. 2). When the Almighty was about to deliver the Ten Commandments to Moses in the sight of the people of Israel, he commanded Moses to "sanctify them to-day and to-morrow, and let them wash their clothes" (Ex. xix. 10). After the giving of that Law all kinds of ceremonial pollutions required purification by water. He that ate that which died of itself was to wash his clothes and to bathe his flesh (Lev. xvii. 15); he that touched man or woman who was separated for any legal uncleanness, or who touched even their garments or their bed, was to wash his clothes and bathe himself in water (see Lev. xv.; comp. Deut. xxiii. 10); he that touched a dead body was to be unclean till even, and wash his flesh with water (Lev. xxii. 4, 6); he that let go the scapegoat or that burned the skin of the bullock sacrificed for a sin-offering, was to wash his clothes and bathe his flesh in water (Lev. xvi. 26, 28); he that gathered the ashes of the red heifer was to wash his clothes and be unclean till the evening (Num. xix. 10). Before great religious observances such purifications were especially solemn (see John xi. 55). And in the later times of the Jewish history there appear to have been public baths and buildings set apart for this purpose, one of which was probably the pool of Bethesda with its five porches mentioned in John v. 2 (see Spencer, *De Legg. Heb.*

It was natural that, of all people, the priests most especially should be required to purify themselves in this manner. At their consecration Aaron and his sons were brought to the door of the tabernacle and washed with water (Ex. xxix. 4); and whenever they went into the sanctuary they were enjoined to wash their hands and their feet in the laver, which was between the altar and the tabernacle, "that they died not" (Ex. xxx. 20). In Solomon's temple there were ten lavers to wash the things offered for the burnt-offering, and a molten sea for the ablution of priests (2 Chr. iv. 2, 6). The consecration of the high-priest deserves especial notice. It was first by baptism, then by unction, and lastly by sacrifice (Ex. xxix. 4, xl. 12–15; Lev. viii.).

The spiritual significance of all these ceremonial washings was well known to the devout Israelite. "I will wash my hands in innocency," says the Psalmist, "and so will I compass thine altar" (Ps. xxvi. 6). "Wash me thoroughly from mine iniquity, and cleanse me from my sin." "Wash me and I shall be whiter than snow" (Ps. li. 2, 7; comp. lxxiii. 13). The prophets constantly speak of pardon and conversion from sin under the same figure. "Wash you, make you clean" (Is. i. 16). "When the Lord shall have washed away the filth of the daughter of Zion" (iv. 4). "O Jerusalem, wash thine heart from wickedness" (Jer. iv. 14). "In that day there shall be a fountain opened to the house of David and to the inhabitants of Jerusalem for sin and for uncleanness" (Zech. xiii. 1). The significant manner in which Pilate washed his hands, declaring himself innocent of the blood of Jesus, was an expressive picturing to the people in forms rendered familiar to their minds from the customs of their law.

From the Gospel history we learn that at that time ceremonial washings had been greatly multiplied by traditions of the doctors and elders (see Mark vii. 3, 4), and the testimony of the Evangelist is fully borne out by that of the later writings of the Jews. The most important and probably one of the earliest of these traditional customs was the baptizing of proselytes. There is an universal agreement among later Jewish writers that all the Israelites were brought into covenant with God by circumcision, baptism, and sacrifice,[a] and that the same ceremonies were necessary in admitting proselytes. Thus Maimonides (*Issure Biah*, cap. 13), "Israel was admitted into covenant by three things, namely, by circumcision, baptism, and sacrifice. Circumcision was in Egypt, as it is said, 'None uncircumcised shall eat of the passover.' Baptism was in the wilderness before the giving of the Law, as it is said, 'Thou shalt sanctify them to-day and to-morrow, and let them wash their garments.'" And he adds, "So, whenever a Gentile desires to enter into the covenant of Israel, and place himself under the wings of the Divine Majesty, and take the yoke of the Law upon him, he must be circumcised, and baptized, and bring a sacrifice; or if it be a woman, she must be baptized and bring a sacrifice." The same is abundantly testified by earlier writers, as by the Jerusalem and Babylonian Talmud, although no reference to this custom can be found in Philo, Josephus, or the Targum of Onkelos. Its earliest mention appears to be in the Targum of Jonathan on Ex. xii. 44.

[a] במילה וטבילה והרבו

'Thou shalt circumcise him and baptize him."[a] It should be added, that men, women, and children, were all baptized, and either two or three witnesses were required to be present.[b] Some modern writers — Lardner, Ernesti, De Wette, Meyer, Paulus, and others — have doubted or denied that this baptism of proselytes had been in use among the Jews from times so early as those of the Gospel; but it is highly improbable that, after the rise of Christianity, the Jews should have adopted a rite so distinctively Christian as baptism had then become. The frequent use of religious ablution, as enjoined by the Law, had certainly become much more frequent by the tradition of the elders. The motive which may have led to the addition of baptism to the first commanded circumcision is obvious, — circumcision applied only to males, baptism could be used for the admission of female proselytes also. Moreover, many nations bordering upon Canaan, and amongst whom the Jews were afterwards dispersed, such as the Ishmaelites and the Egyptians, were already circumcised, and therefore converts from among them could not be admitted to Judaism by circumcision. There seems, indeed, no good reason to doubt that the custom which may so naturally have grown out of others like it, and which we find prevailing not long after the Christian era, had really prevailed from the period of the Captivity, if not, as many think, from times of still more remote antiquity (see Bengel, *Ueber das Alter der Jüd. Proselytentaufe*, Tubing., 1814, quoted by Kuinoel on Matt. iii. 6).

III. *The Baptism of John.* — These usages of the Jews will account for the readiness with which all men flocked to the baptism of John the Baptist. The teaching of the prophets by outward signs was familiar to the minds of the Israelites. There can be no question but that there was at this period a general expectation of the Messiah's kingdom, an expectation which extended beyond Judæa and prevailed throughout all the east ("Oriente toto," Sueton. *Vespas.* c. iv.). Conquest had made Judæa a province of Rome, and the hope of deliverance rested on the promises of the Redeemer. The last words of Malachi had foretold the coming of the Angel of the Covenant, the rising of the Sun of Righteousness, to be preceded by the prophet Elijah, to turn the hearts of the fathers to the children and of the children to the fathers (Mal. iii. 1, iv. 2, 5). The Scribes therefore taught that "Elias must first come" (Matt. xvii. 10: for this expectation of Elias among the Rabbins, see Lightfoot, *Harmony* on John i. 21, vol. iv. p. 402; Wetstein on Matt. xi. 13). And so, when John preached and baptized, the people, feeling the call to repentance, came to him as to one who was at the same time reproving them for their sins, and giving hope of freedom from the afflictions which their sins had brought upon them. He proclaimed the near approach of the kingdom of heaven — a phrase taken from Dan. ii. 44, vii. 14, in use also among the Jews in later times (see Wetstein and Lightfoot, *H. H.* on Matt. iii. 2) — and preached a baptism of repentance "for the remission of sins" Mark i. 4). They readily coupled in their own minds the necessity of repentance and the expectation of the Messiah, according to a very prevalent belief that the sins of Israel delayed the coming of Christ and that their repentance would hasten it. John's baptism, corresponding with the custom of cleansing by water from legal impurity and with the baptism of proselytes from heathenism to Judaism, seemed to call upon them to come out from the unbelieving and sinful habits of their age, and to enlist themselves into the company of those who were preparing for the manifestation of the deliverance of Israel.

Naturally connected with all this was an expectation and "musing" whether John himself "were the Christ or not" (Luke iii. 15); and when he denied that he was so, the next question which arose was whether he were Elias (John i. 21). But when he refused to be called either Christ or Elias, they asked, "Why, then, baptizest thou?" (John i. 25.) It was to them as a preparation for a new state of things that John's baptism seemed intelligible and reasonable. If he were not bringing them into such a state or making them ready for it, his action was out of place and unaccountable.

There has been some uncertainty and debate as to the nature of John's baptism and its spiritual significance. It appears to have been a kind of transition from the Jewish baptism to the Christian. All ceremonial ablutions under the Law pictured to the eye that inward cleansing of the heart which can come only from the grace of God, and which accompanies forgiveness of sins. So John's baptism was a "baptism of repentance for remission of sins" (*βάπτισμα μετανοίας εἰς ἄφεσιν ἁμαρτιῶν*, Mark i. 4); it was accompanied with confession (Matt. iii. 6); it was a call to repentance; it conveyed a promise of pardon; and the whole was knit up with faith in Him that should come after, even Christ Jesus (Acts xix. 4). It was such that Jesus himself deigned to be baptized with it, and perhaps some of his disciples received no other baptism but John's until they received the special baptism of the Holy Ghost on the great day of Pentecost. Yet John himself speaks of it as a mere baptism with water unto repentance, pointing forward to Him who should baptize with the Holy Ghost and with fire (Matt. iii. 11). And the distinction between John's baptism and Christian baptism appears in the case of Apollos who, though "instructed in the way of the Lord," the faith of Jesus Christ, and fervent in spirit, speaking and teaching diligently the things of the Lord, yet knew only the baptism of John; "whom when Aquila and Priscilla had heard, they took him unto them, and expounded unto him the way of God more perfectly" (Acts xviii. 26, 27). Even more observable is the case of the disciples at Ephesus, mentioned Acts xix. 1–6. They were evidently numbered among Christians, or they would not have been called disciples, *μαθηταί*. But when they were asked if they had received the Holy Ghost since they had believed, they said that they had not even heard if there was a Holy Ghost, an answer which may have signified either that they knew not as yet the Christian doctrine of the personality of the Spirit of God, not having been baptized in the name of the Trinity, or that they had

[a] Full information on this subject will be found in Lightfoot, on Matt. iii. 6, *Works*, xi. 53; Hammond on St. Matt. iii. 6; Schoettgen, *H. H.*; Wetstein on Matt. iii. 6; Buxtorf, *Lex. Chald. et Rabbin.* s. v. טבל; Godwyn, *Moses and Aaron*, bk. i. c. 8; Selden, *De Jure Nat. et Gent.* ii. 25; Wall, *Hist. of Inf. Baptism*, Introduct.; Kuinoel on Matt. iii. 6.

heard nothing of the visible coming of the Spirit in the miraculous gifts of tongues and prophecy. At all events their answer at once suggested to St. Paul that there must have been some defect in their baptism; and when he discovers that they had been baptized only unto John's baptism, he tells them that John baptized only with a baptism of repentance, "saying unto the people that they should believe on Him which should come after him, that is on Jesus Christ. When they heard this they were baptized in the name of the Lord Jesus, and when Paul had laid his hands upon them the Holy Ghost came on them, and they spake with tongues and prophesied." A full discussion of this history would lead, perhaps, too far from the ground of Biblical exegesis and land us in the region of dogmatic theology. Yet we cannot but draw from it the inference that there was a deeper spiritual significance in Christian baptism than in John's baptism, that in all probability for the latter there was only required a confession of sins, a profession of faith in the Messiah, and of a desire for repentance and conversion of heart (*μετάνοια*), but that for the former there was also a confession of faith in the Father, the Son, and the Holy Ghost (comp. Matt. xxviii. 19); that after Christian baptism there was the laying on of the Apostles' hands and the consequent effusion of the Holy Ghost manifested by miraculous gifts (comp. Acts viii. 17); that though Christian baptism was never repeated, yet baptism in the name of Christ was administered to those who had received John's baptism, with probably the exception of such as after John's baptism had been baptized at Pentecost with the Holy Ghost and with fire.

On the whole it may appear obvious to conclude that, as John was a greater prophet than any that before him had been born of woman, and yet the least in the kingdom of heaven was greater than he, so his baptism surpassed in spiritual import all Jewish ceremony, but fell equally short of the sacrament ordained by Christ.

IV. *The Baptism of Jesus.* — Plainly the most important action of John as a baptist was his baptizing of Jesus. John may probably not have known at first that Jesus was the Christ (see John i. 31). He knew Him doubtless as his kinsman in the flesh, and as one of eminently holy life; but the privacy of the youth of Jesus, and the humility of his carriage may have concealed, even from those nearest to Him, the dignity of his person. Yet, when He came to be baptized, John would have prevented Him, saying, "I have need to be baptized of Thee, and comest Thou to me?" He knew that his own mission was from God, and that it was to call sinners to repentance, warning them to flee from the wrath to come, and to prepare for the kingdom of God; but he was so conscious of the superior holiness of the Lord Jesus, that he thought it unfit that Jesus should submit to baptism from him. The answer of Jesus, "Suffer it to be so now, for so it becometh us to fulfill all righteousness," may probably have meant that our Lord, who had taken on Him the form of a servant, and was born under the Law, was desirous of submitting to every ordinance of God (*ἵνα πᾶσαν δικαιοσύνην = πάντα τὰ δικαιώματα τοῦ Θεοῦ*). He had been circumcised in his infancy; He had been subject to his mother and Joseph; He would now go through the transitional dispensation, being baptized by John in preparation for the kingdom.

No doubt it was his will in the first place, by so submitting to baptism, to set to his seal to the teaching and the ministry of John. Again, as He was to be the Head of his Church and the Captain of our salvation, He was pleased to undergo that rite which He afterwards enjoined on all his followers. And, once more, his baptism consecrated the baptism of Christians forever; even as afterwards his own partaking of the Eucharist gave still further sanction to his injunction that His disciples ever after should continually partake of it. But, beyond all this, his baptism was his formal setting apart for his ministry, and was a most important portion of his consecration to be the High Priest of God. He was just entering on the age of thirty (Luke iii. 23), the age at which the Levites began their ministry and the rabbis their teaching. It has already been mentioned that the consecration of Aaron to the high-priesthood was by *baptism*, *unction*, and *sacrifice* (see Lev. viii. 1). All these were undergone by Jesus. First He was baptized by John. Then, just as the high-priest was anointed immediately after his baptism, so when Jesus had gone up out of the water, the heavens were opened unto Him, and the Spirit of God descended upon Him (Matt. iii. 16); and thus, as St. Peter tells us, "God anointed Jesus of Nazareth with the Holy Ghost and with power" (Acts x. 38). The sacrifice indeed was not till the end of his earthly ministry, when He offered up the sacrifice of Himself; and then at his resurrection and ascension He fully took upon Him the office of priesthood, entering into the presence of God for us, pleading the efficacy of his sacrifice, and blessing those for whom that sacrifice was offered. Baptism, therefore, was the beginning of consecration; unction was the immediate consequent upon the baptism; and sacrifice was the completion of the initiation, so that He was thenceforth perfected, or fully consecrated as a Priest for evermore (*εἰς τὸν αἰῶνα τετελειωμένος*, Heb. vii. 28; see Jackson *on the Creed*, book ix. sect. i. ch. i.).

In this sense, therefore, Christ "came by water" (1 John v. 6); for at baptism He came to his offices of a Priest and an Evangelist; He came forth, too, from the privacy of his youth to manifest Himself to the world. But He came "not by water only," as the Cerinthians, and before them the Nicolaitans, had said (Iren. iii. 11), but by blood also. He had come into the world by birth of the Virgin Mary; He came forth to the world by the baptism of John. Both at his birth and at his baptism the Spirit announced Him to be the Son of God. Thus came He not by baptism only, but by baptism and birth. His birth, his baptism, and the Holy Spirit at both of them, were the three witnesses testifying to the one truth (*εἰς τὸ ἕν*, v. 8), namely, that Jesus was the Son of God (v. 5).

V. *Baptism of the Disciples of Christ.* Whether our Lord ever baptized has been doubted. The only passage which may distinctly bear on the question is John iv. 1, 2, where it is said "that Jesus made and baptized more disciples than John, though Jesus himself baptized not, but his disciples." We necessarily infer from it, that, as soon as our Lord began his ministry, and gathered to Him a company of disciples, He, like John the Baptist, admitted into that company by the administration of baptism. Normally, however, to say the least of it, the administration of baptism was by the hands of his disciples. Some suppos

that the first-called disciples had all received baptism at the hands of John the Baptist, as must have pretty certainly been the case with Andrew (see John . 35, 37, 40); and that they were not again baptized with water after they joined the company of Christ Others believe that Christ himself baptized some few of his earlier disciples, who were afterwards authorized to baptize the rest. But in any case the words above cited seem to show that the making disciples and the baptizing them went together; and that baptism was, even during our Lord's earthly ministry, the formal mode of accepting his service and becoming attached to his company.

After the resurrection, when the Church was to be spread and the Gospel preached, our Lord's own commission conjoins the making of disciples with their baptism. The command, "Make disciples of all nations by baptizing them" (Matt. xxviii. 19), is merely the extension of his own practice, "Jesus made disciples and baptized them" (John iv. 1).[a] The conduct of the Apostles is the plainest comment on both; for so soon as ever men, convinced by their preaching, asked for guidance and direction, their first exhortation was to repentance and baptism, that thus the convert should be at once publicly received into the fold of Christ (see Acts ii. 38, viii. 12, 36, ix. 18, x. 47, xvi. 15, 33, &c.).

Baptism then was the initiatory rite of the Christian Church, as circumcision was the initiatory rite of Judaism. The contrast between them is plain: the one was a painful and dangerous, the other is a simple and salutary rite. Circumcision seemed a suitable entrance upon a religion which was a yoke of bondage; baptism is a natural introduction to a law of liberty; and as it was light and easy, like the yoke of Christ, so was it comprehensive and expansive. The command was unlimited, "Make disciples of all nations by baptizing them." The arms of mercy were extended to receive the world. The "Desire of all nations" called all nations to accept his service. Baptism therefore was a witness to Christ's reception of all men — to God's love for all his creatures. But again, as circumcision admitted to the Jewish covenant — to the privileges and the responsibility attaching to that covenant, so baptism, which succeeded it, was the mode of admission to the Christian covenant, to its graces and privileges, to its duties and service. It was to be the formal taking up of the yoke of Christ, the accepting of the promises of Christ. The baptized convert became a Christian as the circumcised convert had become a Jew; and as the circumcised convert had contracted an obligation to obey all the ordinances of Moses, but therewith a share in all the promises to the seed of Abraham, so the baptized convert, while contracting all the responsibility of Christ's service, had a share too in all the promises of God in Christ.

It is obviously difficult to draw out the teaching of the New Testament on the rite of baptism and its significance, without approaching too near to the regions of controversy. We shall endeavor therefore merely to classify the passages which refer to it, and to exhibit them in their simplest form, and to let them speak their own language.

[a] Μαθητεύσατε πάντα τὰ ἔθνη βαπτίζοντες αὐτούς (Matt. xxviii. 19), compared with μαθητὰς ποιεῖ καὶ βαπτίζει (John iv. 1).

VI. *The Types of Baptism.* — 1. St. Peter (1 Pet. iii. 21) compares the deliverance of Noah in the Deluge to the deliverance of Christians in baptism. The passage is not without considerable difficulty, though its general sense is pretty readily apparent. The apostle had been speaking of those who had perished "in the days of Noah when the ark was a-preparing, in which few, that is eight souls, were saved by water." According to the A. V., he goes on, "The like figure whereunto baptism doth now save us." The Greek, in the best MSS., is Ὃ καὶ ὑμᾶς ἀντίτυπον νῦν σώζει βάπτισμα. Grotius well expounds ἀντίτυπον by ἀντίστοιχον, "accurately corresponding." The difficulty is in the relative ὅ. There is no antecedent to which it can refer except ὕδατος, "water;" and it seems as if βάπτισμα must be put in apposition with ὅ, and as in explanation of it. Noah and his company were saved by water, "which water also, that is the water of baptism, correspondingly saves us." Even if the reading were ᾧ, it would most naturally refer to the preceding ὕδατος. Certainly it could not refer to κιβωτοῦ, which is feminine. We must then probably interpret, that, though water was the instrument for destroying the disobedient, it was yet the instrument ordained of God for floating the ark, and so for saving Noah and his family; and it is in correspondence with this that water also, namely, the water of baptism, saves Christians. Augustine, commenting on these words, writes that "the events in the days of Noah were a figure of things to come, so that they who believe not the Gospel, when the Church is building, may be considered as like those who believed not when the ark was preparing; whilst those who have believed and are baptized (*i. e.* are saved by baptism) may be compared to those who were formerly saved in the ark by water" (*Epist.* 164, tom. ii. p. 579). "The building of the ark," he says again, "was a kind of preaching." "The waters of the Deluge presignified baptism to those who believed — punishment to the unbelieving" (*Ib.*).

It would be impossible to give any definite explanation of the words, "baptism doth *save* us," without either expressing a theological opinion or exhibiting in detail different sentiments. The apostle, however, gives a caution which no doubt itself may have need of an interpreter, when he adds, "not the putting away the filth of the flesh, but the answer (ἐπερώτημα) of a good conscience towards God." And probably all will agree that he intended here to warn us against resting on the outward administration of a sacrament, with no corresponding preparation of the conscience and the soul. The connection in this passage between baptism and "the resurrection of Jesus Christ" may be compared with Col. ii. 12.

2. In 1 Cor. x. 1, 2, the passage of the Red Sea and the shadowing of the miraculous cloud are treated as types of baptism. In all the early part of this chapter the wanderings of Israel in the wilderness are put in comparison with the life of the Christian. The being under the cloud and the passing through the sea resemble baptism; eating manna and drinking of the rock are as the spiritual food which feeds the Church; and the different temptations, sins, and punishments of the Israelites on their journey to Canaan are held up as a warning to the Corinthian Church. It appears that the Rabbins themselves speak of a baptism in the cloud (see Wetstein *in h. l.*, who quotes Pirke R. Eliezer 44; see also Schoettgen *in h. l.*) The passage from

Digitized by Google

he condition of bondmen in Egypt was through the Red Sea, and with the protection of the luminous cloud. When the sea was passed, the people were no longer subjects of Pharaoh; but were, under the guidance of Moses, forming into a new commonwealth, and on their way to the promised land. It is sufficiently apparent how this may resemble the enlisting of a new convert into the body of the Christian Church, his being placed in a new relation, under a new condition, in a spiritual commonwealth, with a way before him to a better country, though surrounded with dangers, subject to temptations, and with enemies on all sides to encounter in his progress.[a]

3. Another type of, or rather a rite analogous to, baptism, was circumcision. St. Paul (Col. ii. 11) speaks of the Colossian Christians as having been circumcised with a circumcision made without hands, when they were buried with Christ in baptism, in which they were also raised again with Him (*ἐν ᾧ περιετμήθητε συνταφέντες αὐτῷ ἐν τῷ βαπτίσματι*. "The aorist participle, as so often, is contemporary with the preceding past verb." — Alford *in h. l.* The obvious reason for the comparison of the two rites is, that circumcision was the entrance to the Jewish Church and the ancient covenant, baptism to the Christian Church and to the new covenant; and perhaps also, that the spiritual significance of circumcision had a resemblance to the spiritual import of baptism, namely, "the putting off the body of the sins of the flesh," and the purification of the heart by the grace of God. St. Paul therefore calls baptism the circumcision made without hands, and speaks of the putting off of the sins of the flesh by Christian circumcision (*ἐν τῇ περιτομῇ τοῦ Χριστοῦ*), *i. e.* by baptism.

4. Before leaving this part of the subject we ought perhaps to observe that in more than one instance *death* is called a baptism. In Matt. xx. 22, Mark x. 39, our Lord speaks of the cup which He had to drink, and the baptism that He was to be baptized with; and again in Luke xii. 50, "I have a baptism to be baptized with." It is generally thought that baptism here means an inundation of sorrows; that, as the baptized went down into the waters, and water was to be poured over him, so our Lord meant to indicate that He himself had to pass through "the deep waters of affliction" (see Kuinoel on Matt. xx. 22; Schleusner, *s. v.* *βαπτίζω*). "To baptize" was used as synonymous with "to overwhelm;" and accordingly in after times martyrdom was called a baptism of blood. But the metaphor in this latter case is evidently different; and in the above words of our Lord baptism is used without any qualification, whereas in passages adduced from profane authors we always find some words explanatory of the mode of the immersion.[b] Is it not then probable that some deeper significance attaches to the comparison of death, especially of our Lord's death, to baptism when we consider too that the connection of baptism with the death and resurrection of Christ is so much insisted on by St. Paul? (See below.)

VII. *Names of Baptism.* — From the types of baptism referred to in the New Testament, we may perhaps pass to the various names by which baptism seems to be there designated.

1. "Baptism" (*βάπτισμα*: the word *βαπτισμός* occurs only three times, namely, Mark vii. 8; Heb. vi. 2, ix. 10). The verb *βαπτίζειν* (from *βάπτειν*, to dip) is the rendering of טָבַל by the LXX. in 2 K. v. 14; and accordingly the Rabbins used טְבִילָה for *βάπτισμα*. The Latin Fathers render *βαπτίζειν* by *tingere* (*e. g.* Tertull. *adv. Prax.* c. 26, "Novissimè mandavit ut tingerent in Patrem Filium et Spiritum Sanctum"); by *mergere* (as Ambros. *De Sacramentis*, lib. ii. c. 7, "Interrogatus es, Credis in Deum Patrem Omnipotentem? Dixisti, Credo; et mersisti, hoc est sepultus es"), by *mergitare* (as Tertullian, *De Coronâ Militis*, c. 3, "Dehinc ter mergitamur"); see Suicer, *s. v.* *ἀναδύω*. By the Greek Fathers, the word *βαπτίζειν* is often used frequently figuratively, for to immerse or overwhelm with sleep, sorrow, sin, &c. Thus *ὑπὸ μέθης βαπτιζόμενος εἰς ὕπνον*, buried in sleep through drunkenness. So *μυρίαις βαπτιζόμενος φρόντισιν*, absorbed in thought (Chrysost.). *Ταῖς βαρυτάταις ἁμαρτίαις βεβαπτισμένοι*, overwhelmed with sin (Justin M.). See Suicer, *s. v.* *βαπτίζω*. Hence *βάπτισμα* properly and literally means *immersion*.[c]

2. "The Water" (*τὸ ὕδωρ*) is a name of baptism which occurs in Acts x. 47. After St. Peter's discourse, the Holy Spirit came visibly on Cornelius and his company; and the apostle asked, "Can any man forbid the water, that these should not be baptized, who have received the Holy Ghost?" In ordinary cases the water had been first administered, after that the Apostles laid on their hands, and then the Spirit was given. But here the Spirit had come down manifestly, before the administration of baptism; and St. Peter argued, that no one could then reasonably withhold baptism (calling it "the water") from those who had visibly received that of which baptism was the sign and seal. With this phrase, *τὸ ὕδωρ*, "the water," used of baptism, compare "the breaking of bread" as a title of the Eucharist, Acts ii. 42.

3. "The Washing of Water" (*τὸ λουτρὸν τοῦ ὕδατος*, "the bath of the water"), is another Scriptural term, by which baptism is signified. It occurs Eph. v. 26. The whole passage runs, "Husbands love your own wives, as Christ also loved the church and gave himself for it, that He might sanctify and cleanse it by the washing of

[a] The Fathers consider the baptism of the sea and the cloud to be as a type of baptism, that the sea represented the water, and the cloud represented the Spirit. (Greg. Nas. *Orat.* xxxix. 634: *ἐβάπτισε Μωϋσῆς, ἀλλ' ἐν ὕδατι, καὶ πρὸ τούτου ἐν νεφέλῃ καὶ ἐν θαλάσσῃ, τυπικῶς δὲ τοῦτο ἦν, ὡς καὶ Παύλῳ δοκεῖ· ἡ θάλασσα τοῦ ὕδατος, ἡ νεφέλη τοῦ Πνεύματος.* See Suicer, *s. v.* *βάπτισμα*.) Εἰς τὸν Μωσῆν is, according to some, by the ministry of Moses; or, according to others, under the guidance of Moses (as Chrysost., Theophylact, and others, *in h. l.*). Most plainly, however, and in the opinion of the most weighty commentators, both ancient and modern, it means "into the religion and law of Moses," who was the mediator of the old Covenant. "Baptised into Moses," therefore, is antithetical to the expression, "baptised into Christ," Rom. vi. 3, Gal. iii. 27.

[b] As, "His mersere malis." — Virg. *Æn.* vi. 512.
Τῇ συμφορᾷ βεβαπτισμένον. — Heliodor. *Æthiop.* ii. 3.

[c] It is unquestionable, however, that in Mark vii. 4 *βαπτίζεσθαι* is used where immersion of the whole body is not intended. See Lightfoot, *in loc.* [For the opposite opinion, see De Wette *in loc.* (*Exeget. Handb.* i. 200), and Meyer *in loc.* (*Komm. üb. d. N. T.* ed. 1864). See especially Fritzsche, *Evang. Marci*, p. 264 ff.]

Digitized by Google

water with the word" (*Ἵνα αὐτὴν ἁγιάσῃ καθαρίσας τῷ λουτρῷ τοῦ ὕδατος ἐν ῥήματι*, "that He might sanctify it, having purified it by the [well-known] laver of the water in the word," Ellicott). There appears clearly in these words a reference to the bridal bath; but the allusion to baptism is clearer still, baptism of which the bridal bath was an emblem, a type or mystery, signifying to us the spiritual union betwixt Christ and His Church. And as the bride was wont to bathe before being presented to the bridegroom, so washing in the water is that initiatory rite by which the Christian Church is betrothed to the Bridegroom, Christ.

There is some difficulty in the construction and interpretation of the qualifying words, *ἐν ῥήματι*, "by the word." According to the more ancient interpretation they would indicate, that the outward rite of washing and bathing is insufficient and unavailing, without the added potency of the Word of God (comp. 1 Pet. iii. 21, "Not the putting away the filth of the flesh," &c.); and as the *λουτρὸν τοῦ ὕδατος* had reference to the bridal bath, so there might be an allusion to the *words* of betrothal. The bridal bath and the words of betrothal typified the water and the words of baptism. On the doctrine so expressed the language of Augustine is famous: "Detrahe verbum, et quid est aqua nisi aqua? Accedit verbum ad elementum, et fit sacramentum" (*Tract.* 80 *in Johan.*). Yet the general use of *ῥῆμα* in the New Testament and the grammatical construction of the passage seem to favor the opinion, that the Word of God preached to the Church, rather than the words made use of in baptism, is that accompaniment of the laver, without which it would be imperfect (see Ellicott, *ad h. l.*).

4. "The washing of regeneration" (*λουτρὸν παλιγγενεσίας*, "the bath of regeneration") is a phrase naturally connected with the foregoing. It occurs Tit. iii. 5. All ancient and most modern commentators have interpreted it of baptism. Controversy has made some persons unwilling to admit this interpretation; but the question probably should be, not as to the significance of the phrase, but as to the degree of importance attached in the words of the apostle to that which the phrase indicates. Thus Calvin held that the "bath" meant baptism; but he explained its occurrence in this context by saying, that "Baptism is to us the seal of salvation which Christ hath obtained for us." The current of the apostle's reasoning is this. He tells Titus to exhort the Christians of Crete to be submissive to authority, showing all meekness to all men: "for we ourselves were once foolish, erring, serving our own lusts; but when the kindness of God our Saviour, and his love toward man appeared, not by works of righteousness which we performed, but according to his own mercy He saved us, by (through the instrumentality of) the bath of regeneration, and the renewing of the Holy Ghost (*διὰ λουτροῦ παλιγγενεσίας καὶ ἀνακαινώσεως Πνεύματος ἁγίου*), which He shed on us abundantly through Jesus Christ our Saviour, that, being justified by his grace, we might be made heirs of eternal life through hope (or according to hope, *κατ' ἐλπίδα*)." The argument is, that Christians should be kind to all men, remembering that they themselves had been formerly disobedient, but that by God's free mercy in Christ they had been transplanted into a better state, even a state of salvation (*ἔσωσεν ἡμᾶς*); and *that* by means of the bath of regeneration and the renewal of the Holy Spirit. If, according to the more ancient and common interpretation, the laver means baptism, the whole will seem pertinent. Christians are placed in a new condition, made members of the Church of Christ, by baptism, and they are renewed in the spirit of their minds by the Holy Ghost. One question naturally arises in this passage. Does *ἀνακαινώσεως* depend on *λουτροῦ*, or on *διά*? If we adopt the opinion of those who make it, with *παλιγγενεσίας*, dependent on *λουτροῦ*, which is the rendering of the Vulgate, we must understand that the renewal of the Holy Ghost is a grace corresponding with, and closely allied to, that of regeneration, and so immediately coupled with it. But it seems the more natural construction to refer *ἀνακαινώσεως* Π. ἁ. to *διά*, if it were only that the relative, which connects with the verse following, belongs of necessity to *Πνεύματος*. Dean Alford, adopting the latter construction, refers the "washing" to the laver of baptism, and the "renewing" to the actual effect, that inward and spiritual grace of which the laver is but the outward and visible sign. Yet it is to be considered, whether it be not novel and unknown in Scripture or theology to speak of *renewal* as the spiritual grace, or thing signified, in baptism. There is confessedly a connection between baptism and *regeneration*, whatever that connection may be. But "the renewal of the Holy Ghost" has been mostly in the language of theologians (is it not also in the language of Scripture?) treated as a further, perhaps a more gradual process in the work of grace, than the first breathing into the soul of spiritual life, called regeneration or new birth.

There is so much resemblance, both in the phraseology and in the argument, between this passage in Titus and 1 Cor. vi. 11, that the latter ought by all means to be compared with the former. St. Paul tells the Corinthians, that in their heathen state they had been stained with heathen vices; "but," he adds, "ye were washed" (lit. ye washed or bathed yourselves, *ἀπελούσασθε*), "but ye were sanctified, but ye were justified in the name of the Lord Jesus Christ, and by the Spirit of our God." It is generally believed that here is an allusion to the being baptized in the name of the Lord Jesus Christ; though some connect "sanctified" and "justified" as well as "washed," with the words "in the name," &c. (see Stanley, *in loc.*). But, however this may be, the reference to baptism seems unquestionable.

Another passage containing very similar thoughts, clothed in almost the same words, is Acts xxii. 16, where Ananias says to Saul of Tarsus, "Arise, and be baptized, and wash away thy sins, calling upon the name of the Lord" (*ἀναστὰς βάπτισαι καὶ ἀπόλουσαι τὰς ἁμαρτίας σου, ἐπικαλεσάμενος τὸ ὄνομα αὐτοῦ*). See by all means Calvin's *Commentary* on this passage.

5. "Illumination" (*φωτισμός*). It has been much questioned whether *φωτίζεσθαι*, "enlightened," in Heb. vi. 4, x. 32, be used of baptism or not. Justin Martyr, Clement of Alexandria, and almost all the Greek Fathers, use *φωτισμός* as a synonym for *baptism*. The Syriac version, the most ancient in existence, gives this sense to the word in both the passages in the Epistle to the Hebrews. Chrysostom, Theodoret, Theophylact, and other Greek commentators so interpret it; and they are followed by Ernesti, Michaelis, and many mod

Digitized by Google

an interpreters of the highest authority (Wetstein cites from *Orac. Sibyll.* i. βδατι φωτίζεσθαι). On the other hand, it is now very commonly alleged that the use is entirely ecclesiastical, not Scriptural, and that it arose from the undue esteem for baptism in the primitive Church. It is impossible to enter into all the merits of the question here. If the usage be Scriptural, it is to be found only in the two passages in Hebrews above mentioned; but it may perhaps correspond with other figures and expressions in the New Testament. The patristic use of the word may be seen by referring to Suicer, *s. v.* φωτισμός, and to Bingham, *E. A.* bk. xi. ch. i. § 4. The rationale of the name, according to Justin Martyr, is, that the catechumens before admission to baptism were instructed in all the principal doctrines of the Christian faith, and hence "this laver is called illumination, because those who learn these things are illuminated in their understanding" (*Apol.* ii. 94). But, if this word be used in the sense of baptism in the Epistle to the Hebrews, as we have no mention of any training of catechumens in the New Testament, we must probably seek for a different explanation of its origin. It will be remembered that φωταγωγία was a term for admission into the ancient mysteries. Baptism was without question the initiatory rite in reference to the Christian faith (cf. τρία βαπτίσματα μιᾶς μυήσεως, *Can. Apost.* i.). Now, that Christian faith is more than once called by St. Paul the Christian "mystery." The "mystery of God's will" (Eph. i. 9), "the mystery of Christ" (Col. iv. 3; Eph. iii. 4), "the mystery of the Gospel" (Eph. vi. 19), and other like phrases are common in his epistles. A Greek could hardly fail to be reminded by such language of the religious mysteries of his own former heathenism. But, moreover, seeing that "in Him are hid all the treasures of wisdom and knowledge," it seems highly probable, that in three memorable passages St. Paul speaks, not merely of the Gospel or the faith, but of Christ himself, as the great Mystery of God or of godliness. (1.) In Col. i. 27 we read, "the glory of this mystery, which is Christ in you," τοῦ μυστηρίου τούτου, ὅς ἐστιν Χριστὸς ἐν ὑμῖν. (2.) In Col. ii. 2, Lachmann, Tregelles, and Ellicott, as we think on good grounds, adopt the reading τοῦ μυστηρίου τοῦ Θεοῦ, Χριστοῦ, rightly compared by Bp. Ellicott with the preceding passage occurring only four verses before it, and interpreted by him, "the mystery of God, even Christ." (3.) And it deserves to be carefully considered, whether the above usage in Colossians does not suggest a clear exposition of 1 Tim. iii. 16, ὁ τῆς εὐσεβείας μυστήριον ὃς ἐφανερώθη κ. τ. λ. for, if Christ be the "Mystery of God," He may well be called also the "Mystery of godliness;" and the masculine relative is then easily intelligible, as being referred to Χριστός understood and implied in μυστήριον: for, in the words of Hilary, "Deus Christus est Sacramentum."

But, if all this be true, as baptism is the initiatory Christian rite, admitting us to the service of God and to the knowledge of Christ, it may not improbably have been called φωτισμός and afterwards φωταγωγία, as having reference, and as admitting to the *mystery* of the Gospel, and to Christ himself, who is the *Mystery* of God.

VIII. — From the names of baptism we must now pass to a few of the more prominent passages, not already considered, in which baptism is referred to.

1. The passage in John iii. 5 — "Except a man be born of water and of the Spirit, he cannot enter into the kingdom of God" — has been a well-established battle-field from the time of Calvin. Hooker's statement, that for the first fifteen centuries no one had ever doubted its application to baptism, is well known (see *Eccl. Pol.* v. lix.). Zuinglius was probably the first who interpreted it otherwise. Calvin understood the words "of water and of the Spirit" as a ἓν διὰ δυοῖν, "the washing or cleansing of the Spirit" (or rather perhaps "by the Spirit"), "who cleanses as water," referring to Matt. iii. 11. ("He shall baptize you with the Holy Ghost and with fire") as a parallel usage. Stier (*Words of the Lord Jesus*, in h. l.) observes that Lücke has rightly said that we may regard this interpretation by means of a ἓν διὰ δυοῖν, which erroneously appealed to Matt. iii. 11, as now generally abandoned. Stier, moreover, quotes with entire approbation the words of Meyer (on John iii. 5): — "Jesus speaks here concerning a spiritual baptism, as in chap. vi. concerning a spiritual feeding; in both places, however, with reference to their visible auxiliary means." That our Lord probably adopted expressions familiar to the Jews in this discourse with Nicodemus, may be seen by reference to Lightfoot, *H. H.* in loc.

2. The prophecy of John the Baptist just referred to, namely, that our blessed Lord should baptize with the Holy Ghost and with fire (Matt. iii. 11), may more properly be interpreted by a ἓν διὰ δυοῖν. Bengel well paraphrases it: — "*Spiritus Sanctus*, quo Christus baptizat, igneam vim habet; atque ea vis ignea etiam conspicua fuit oculis hominum" (Acts ii. 3). The Fathers, indeed, spoke of a threefold baptism with fire: first, of the Holy Ghost in the shape of fiery tongues at Pentecost; secondly, of the fiery trial of affliction and temptation (1 Pet. i. 7); thirdly, of the fire which at the last day is to try every man's works (1 Cor. iii. 13). It is, however, very improbable that there is any allusion to either of the last two in Matt. iii. 11. There is an antithesis in John the Baptist's language between his own lower mission and the Divine authority of the Saviour. John baptized with a mere earthly element, teaching men to repent, and pointing them to Christ; but He that should come after, ὁ ἐρχόμενος, was empowered to baptize with the Holy Ghost and with fire. The water of John's baptism could but wash the body; the Holy Ghost, with which Christ was to baptize should purify the soul as with fire.

3. Gal. iii. 27: "For as many as have been baptized into Christ have put on Christ." In the whole of this very important and difficult chapter, St. Paul is reasoning on the inheritance by the Church of Christ of the promises made to Abraham. Christ — *i. e.* Christ comprehending his whole body mystical — is the true seed of Abraham, to whom the promises belong (ver. 16). The Law, which came after, could not disannul the promises thus made. The Law was fit to restrain (or perhaps rather to *manifest*) transgression (ver. 23). The Law acted as a pedagogue, keeping us for, and leading us on to, Christ, that He might bestow on us freedom and justification by faith in Him (ver. 24). But after the coming of faith we are no longer, like young children, under a pedagogue, but we are free, as heirs in our Father's house (ver. 25; comp. ch. iv. 1–5). "For ye all are God's sons (filii emancipati, not παῖδες, but *υἱοί*, Bengel and Ellicott) through the faith in

Digitized by Google

Christ Jesus. For as many as have been baptized into Christ, have put on (clothed yourselves in) Christ (see Schoettgen on Rom. xiii. 14). In Him is neither Jew nor Greek, neither bond nor free, neither male nor female; for all ye are one in Christ Jesus" (ver. 26–28). The argument is plain. All Christians are God's sons through union with the Only-begotten. Before the faith in Him came into the world, men were held under the tutelage of the Law, like children, kept as in a state of bondage under a pedagogue. But after the preaching of the faith, all who are baptized into Christ clothe themselves in Him; so they are estemmed as adult sons of his Father, and by faith in Him they may be justified from their sins, from which the Law could not justify them (Acts xiii. 39). The contrast is between the Christian and the Jewish church: one bond, the other free; one infant, the other adult. And the transition-point is naturally that when by baptism the service of Christ is undertaken, and the promises of the Gospel are claimed. This is represented as putting on Christ, and in Him assuming the position of full-grown men. In this more privileged condition there is the power of obtaining justification by faith, a justification which the Law had not to offer.

4. 1 Cor. xii. 13: "For by one Spirit (*or* in one spirit, ἐν ἑνὶ πνεύματι) we were all baptized into one body, whether Jews or Greeks, whether bond or free, and were all made to drink of one Spirit." The resemblance of this passage to the last is very clear. In the old dispensation there was a marked division between Jew and Gentile: under the Gospel there is one body in Christ. As in Gal. iii. 16, Christ is the seed (τὸ σπέρμα), so here He is the body (τὸ σῶμα), into which all Christians become incorporated. All distinctions of Jew and Gentile, bond and free, are abolished. By the grace of the same Spirit (or perhaps "in one spirit" of Christian love and fellowship (comp. Eph. ii. 18), without division or separate interests) all are joined in baptism to the one body of Christ, his universal church. Possibly there is an allusion to both sacraments. "We were baptized into one body, we were made to drink of one Spirit (ἓν Πνεῦμα ἐποτισθημεν: Lachm. and Tisch. omit εἰς). Both our baptism and our partaking of the cup in the communion are tokens and pledges of Christian unity. They mark our union with the one body of Christ, and they are means of grace, in which we may look for one Spirit to be present with blessing (comp. 1 Cor. x. 3, 17; see Waterland *on the Eucharist*, ch. x., and Stanley on 1 Cor. xii. 13).

5. Rom. vi. 4 and Col. ii. 12, are so closely parallel that we may notice them together. As the apostle in the two last-considered passages views baptism as a joining to the mystical body of Christ, so in these two passages he goes on to speak of Christians in their baptism as buried with Christ in his death, and raised again with Him in his resurrection.[a] As the natural body of Christ was laid in the ground and then raised up again, so His mystical body, the Church, descends in baptism into the waters, in which also (ἐν ᾧ, sc. βαπτίσματι, Col. ii. 12) it is raised up again with Christ, through "faith in the mighty working of God, who raised Him from the dead." Probably, as in the former passages St. Paul had brought forward baptism as the symbol of Christian unity, so in those now before us he refers to it as the token and pledge of the spiritual death to sin and resurrection to righteousness; and moreover of the final victory over death in the last day, through the power of the resurrection of Christ. It is said that it was partly in reference to this passage in Colossians that the early Christians so generally used trine immersion, as signifying thereby the three days in which Christ lay in the grave (see Suicer, *s. v.* ἀναβύω, II. a).

IX. *Recipients of Baptism.* — The command to baptize was co-extensive with the command to preach the Gospel. All nations were to be evangelized; and they were to be made disciples, admitted into the fellowship of Christ's religion, by baptism (Matt. xxviii. 19). Whosoever believed the preaching of the Evangelists was to be baptized, his faith and baptism placing him in a state of salvation (Mark xvi. 16). On this command the Apostles acted; for the first converts after the ascension were enjoined to repent and be baptized (Acts ii. 37). The Samaritans who believed the preaching of Philip were baptized, men and women (Acts viii. 12). The Ethiopian eunuch, as soon as he professed his faith in Jesus Christ, was baptized (Acts viii. 37, 38). Lydia listened to the things spoken by Paul, and was baptized, she and her house (Acts xvi. 15). The jailer at Philippi, the very night on which he was convinced by the earthquake in the prison, was baptized, he and all his, straightway (Acts xvi. 33).

All this appears to correspond with the general character of the Gospel, that it should embrace the world, and should be freely offered to all men. "Him that cometh unto me I will in no wise cast out" (John vi. 37). Like the Saviour himself, Baptism was sent into the world "not to condemn the world, but that the world might be saved" (John iii. 17). Every one who was convinced by the teaching of the first preachers of the Gospel, and was willing to enroll himself in the company of the disciples, appears to have been admitted to baptism on a confession of his faith. There is no distinct evidence in the New Testament that there was in those early days a body of catechumens gradually preparing for baptism, such as existed in the ages immediately succeeding the Apostles, and such as every missionary church has found it necessary to institute. The Apostles, indeed, frequently insist on the privileges of being admitted to the fellowship of Christ's Church in the initiatory sacrament, and on the consequent responsibilities of Christians; and these are the grounds on which subsequent ages have been so careful in preparing adults for baptism. But perhaps the circumstances of the Apostles' age were so peculiar as to account for this apparent difference of principle. Conviction at that time was likely to be sudden and strong; the church was rapidly forming; the Apostles had the gift of discerning spirits. All this led to the admission to baptism with but little formal preparation for it. At all events it is evident that the spirit of our Lord's ordinance was comprehensive, not exclusive; that all were invited to come, and that all who were willing to come were graciously received.

The great question has been, whether the invitation extended, not to adults only, but to infants also. The universality of the invitation, Christ's declaration concerning the blessedness of infants and their fitness for his kingdom (Mark x. 14) the admission of infants to circumcision and to the

[a] "Mersio in baptismate, vel certè aqua superfusa, sepulturam refert" (Bengel).

Digitized by Google

baptism of Jewish proselytes, the mention of whole households, and the subsequent practice of the Church, have been principally relied on by the advocates of infant baptism. The silence of the New Testament concerning the baptism of infants, the constant mention of faith as a prerequisite or condition of baptism, the great spiritual blessings which seem attached to a right reception of it, and the responsibility entailed on those who have taken its obligations on themselves, seem the chief objections urged against pædobaptism. But here, once more, we must leave ground which has been so extensively occupied by controversialists.

X. *The Mode of Baptism.* — The language of the New Testament and of the primitive fathers sufficiently points to immersion as the common mode of baptism. John the Baptist baptized in the river Jordan (Matt. iii.). Jesus is represented as "coming up out of the water" (ἀναβαίνων ἀπὸ τοῦ ὕδατος) after his baptism (Mark i. 10).[a] Again, John is said to have baptized in Ænon because there was much water there (John iii. 23; see also Acts viii. 36). The comparison of baptism to burying and rising up again (Rom. vi.; Col. ii.) has been already referred to as probably derived from the custom of immersion (see Suicer, *s. v.* ἀναβύω; Schoettgen, in Rom. vi.; Vossius, *De Baptismo*, Diss. i. thes. vi.). On the other hand, it has been noticed that the family of the jailer at Philippi were all baptized in the prison on the night of their conversion (Acts xvi. 33), and that the three thousand converted at Pentecost (Acts ii.) appear to have been baptized at once: it being hardly likely that in either of these cases immersion should have been possible. Moreover the ancient church, which mostly adopted immersion, was satisfied with affusion in case of clinical baptism — the baptism of the sick and dying.

Questions and Answers. — In the earliest times of the Christian Church, we find the catechumens required to renounce the Devil (see Suicer, *s. v.* ἀποτάσσομαι) and to profess their faith in the Holy Trinity and in the principal articles of the Creed (see Suicer, i. 653). It is generally supposed that St. Peter (1 Pet. iii. 21), where he speaks of the "answer (or questioning, ἐπερώτημα) of a good conscience toward God" as an important constituent of baptism, refers to a custom of this kind as existing from the first (see however, a very different interpretation in Bengelii *Gnomon*). The "form of sound words" (2 Tim. i. 13) and the "good profession professed before many witnesses" (1 Tim. vi. 12) may very probably have similar significance.

XI. *The Formula of Baptism.* — It should seem from our Lord's own direction (Matt. xxviii. 19) that the words made use of in the administration of baptism should be those which the church has generally retained, "I baptize thee in the name f the Father, and of the Son, and of the Holy Ghost:" yet, wherever baptism is mentioned in the Acts of the Apostles, it is only mentioned as in "the name of the Lord Jesus," or "in the name of the Lord" (Acts ii. 38, viii. 16, x. 48, xix. 5). The custom of the primitive church, as far as we can learn from the primitive Fathers, was always to baptize in the names of the three Persons of the Trinity (see Suicer, *s. v.* βαπτίζω); and there is little doubt that the expressions in the Book of Acts mean only that those who were baptized with Christian baptism were baptized into the faith of Christ, into the death of Christ, not that the form of words was different from that enjoined by our Lord in St. Matthew.

Sponsors. — There is no mention of sponsors in the N. T., though there is mention of the "questioning" (ἐπερώτημα). In very early ages of the Church, sponsors (called ἀνάδοχοι, *sponsores*, *susceptores*) were in use both for children and adults. The mention of them first occurs in Tertullian — for infants in the *De Baptismo* (c. 18), for adults, as is supposed, in the *De Coronâ Militis* (c. 3: "Inde susceptî lactis et mellis concordiam prægustamus." See Suicer, *s. v.* ἀναδέχομαι). In the Jewish baptism of proselytes, two or three sponsors or witnesses were required to be present (see above, Lightfoot on Matt. iii. 6). It is so improbable that the Jews should have borrowed such a custom from the Christians, that the coincidence can hardly have arisen but from the Christians continuing the usages of the Jews.

XII. *Baptism for the Dead.* — 1 Cor. xv. 29. "Else what shall they do who are baptized for the dead (ὑπὲρ τῶν νεκρῶν), if the dead rise not at all? Why are they then baptized for the dead" (or, "*for them?*" Lachmann and Tisch. read αὐτῶν).

1. Tertullian tells us of a custom of vicarious baptism (*vicarium baptisma*) as existing among the Marcionites (*De Resur. Carnis*, c. 48; *Adv. Marcion.* lib. v. c. 10); and St. Chrysostom relates of the same heretics, that, when one of their catechumens died without baptism, they used to put a living person under the dead man's bed, and asked whether he desired to be baptized; the living man answering that he did, they then baptized him in place of the departed (Chrys. *Hom.* xl. in 1 Cor. xv.). Epiphanius relates a similar custom among the Cerinthians (*Hæres.* xxviii.), which, he said, prevailed from fear that in the resurrection those should suffer punishment who had not been baptized. The Cerinthians were a very early sect; according to Irenæus (iii. 11), some of their errors had been anticipated by the Nicolaitans, and St. John is said to have written the early part of his Gospel against those errors; but the Marcionites did not come into existence till the middle of the 2d century. The question naturally occurs, Did St. Paul in 1 Cor. xv. 29 allude to a custom of this kind, which even in his days had begun to prevail among heretics and ignorant persons? If so, he no doubt adduced it as an *argumentum ad hominem*. "If the dead rise not at all, what benefit do they expect who baptize vicariously for the dead?" The very heretics, who, from their belief that matter was incorrigibly evil, denied the possibility of a glorious resurrection, yet showed by their superstitious practices that the resurrection was to be expected; for, if there be no resurrection, their baptism for the dead would lose all its significance. It is truly said, that such accommodations to the opinions of others are not uncommon in the writings of St. Paul (comp. Gal. iv. 21–31; and see Stanley, *ad h. l.*). St. Ambrose (in 1 ad Cor. xv.) seems to have acquiesced in this interpretation. His words are, "The Apostle adduces the example

[a] With ἀπό in Mark i. 10 (T. R.), as quoted above, would be only "from"; but Lachmann, Tischendorf and Tregelles read ἐκ there, which would agree with ἐκ being used there). See also Acts viii. 39, where the A. V. errs in just the opposite way. W.

Digitized by Google

of those who were so secure of the future resurrection that they even baptized for the dead, when by accident death had come unexpectedly, fearing that the unbaptized might either not rise or rise to evil." Perhaps it may be said, that the greater number of modern commentators have adopted this, as the simplest and most rational sense of the apostle's words. And — which undoubtedly adds much to the probability that vicarious baptism should have been very ancient — we learn from Lightfoot (on 1 Cor. xv.) that a custom prevailed among the Jews of vicarious ablution for such as died under any legal uncleanness.

It is, however, equally conceivable, that the passage in St. Paul gave rise to the subsequent practice among the Marcionites and Cerinthians. Misinterpretation of Scriptural passages has undoubtedly been a fertile source of superstitious ceremony, which has afterwards been looked on as having resulted from early tradition. It is certain that the Greek Fathers, who record the custom in question, wholly reject the notion that St. Paul alluded to it.

2. Chrysostom believes the apostle to refer to the profession of faith in baptism, part of which was, "I believe in the resurrection of the dead," πιστεύω εἰς νεκρῶν ἀνάστασιν. "In this faith," he says, "we are baptized. After confessing this among other articles of faith, we go down into the water. And reminding the Corinthians of this, St. Paul says, If there be no resurrection, why art thou then baptized for the dead, *i. e.* for the dead bodies (τί καὶ βαπτίζῃ ὑπὲρ τῶν νεκρῶν; τουτέστι, τῶν σωμάτων)? For in this faith thou art baptized, believing in the resurrection of the dead" (*Hom.* xl. in 1 Cor. xv.; cf. *Hom.* xiii. *in Epist. ad Corinth.*). St. Chrysostom is followed, as usual, by Theodoret, Theophylact, and other Greek commentators. Indeed, he had been anticipated by Tertullian among the Latins (*Adv. Marcion.* lib. v. c. 10), and probably by Epiphanius among the Greeks (*Hæres.* xxviii.).

The former of the two interpretations above mentioned commends itself to us by its simplicity; the latter by its antiquity, having almost the general consent of the primitive Christians in its favor (see Suicer, i. 642); though it is somewhat difficult, even with St. Chrysostom's comment, to reconcile it wholly with the natural and grammatical construction of the words. In addition to the above, which seem the most probable, the variety of explanations is almost endless. Among them the following appear to deserve consideration.

3. "What shall they do, who are baptized when death is close at hand?" Epiphan. *Hæres.* xxviii. 3, where according to Bengel ὑπέρ will have the sense of *near, close upon.*

4. "Over the graves of the martyrs." That such a mode of baptism existed in after ages, see Euseb. *H. E.* iv. 15; August. *De Civ. Dei*, xx. 9. Vossius adopted this interpretation; but it is very unlikely that the custom should have prevailed in the days of St. Paul.

5. "On account of a dead Saviour;" where an enallage of number in the word νεκρῶν must be understood. See Rosenmüller, *in loc.*

6. "What shall they gain, who are baptized for the sake of the dead in Christ?" *i. e.* that so the πλήρωμα of believers may be filled up (comp. Rom. xi. 12, 25; Heb. xi. 40). that "God may complete the number of his elect, and hasten his kingdom." See Olshausen, *in loc.*

7. "What shall they do, who are baptized in the place of the dead?" *i. e.* who, as the ranks of the faithful are thinned by death, come forward to be baptized, that they may fill up the company of believers. See also Olshausen as above, who appears to hesitate between these last two interpretations.

On the subject of Baptism, of the practice of the Jews, and of the customs and opinions of the early Christians with reference to it, much information is to be found in Vossius, *De Baptismo*; Suicer, *s. vv.* ἀναβύω, βαπτίζω, ἀναδέχομαι, κλινικός, &c.; Wetstein, as referred to above; Bingham, *Eccl. Ant.* bk. xi.; Vicecomes, *Dissertationes*, lib. i.; Lightfoot, *Hor. Hebr.*; and Schoettgen, *Hor. Hebr.*, as referred to above. E. H. B.

* The most elaborate recent work on baptism is J. W. F. Höfling's *Das Sakrament der Taufe*, 2 Bde. Erlangen, 1846–48. See also the art. *Taufe* (by Steitz) in Herzog's *Real-Encykl.* xv. 428–485. References to the controversial literature on the subject cannot well be given here. The essay, however, of Dr. T. J. Conant, *The Meaning and Use of Baptizein philologically and historically investigated*, published as an Appendix to his revised version of the Gospel of Matthew (New York, Amer. Bible Union, 1860), and also issued separately, deserves mention for its copious collection of passages from ancient authors. A.

Supplement to Baptism.

The "Laying on of Hands" was considered in the ancient church as the "Supplement of Baptism."

I. Imposition of hands is a natural form by which benediction has been expressed in all ages and among all people. It is the act of one superior either by age or spiritual position towards an inferior, and by its very form it appears to bestow some gift, or to manifest a desire that some gift should be bestowed. It may be an evil thing that is symbolically bestowed, as when guiltiness was thus transferred by the high-priest to the scapegoat from the congregation (Lev. xvi. 21); but, in general, the gift is of something good which God is supposed to bestow by the channel of the laying on of hands. Thus, in the Old Testament, Jacob accompanies his blessing to Ephraim and Manasseh with imposition of hands (Gen. xlviii. 14); Joshua is ordained in the room of Moses by imposition of hands (Num. xxvii. 18; Deut. xxxiv. 9); cures seem to have been wrought by the prophets by imposition of hands (2 K. v. 11); and the high-priest, in giving his solemn benediction, stretched out his hands over the people (Lev. ix. 22).

The same form was used by our Lord in blessing and occasionally in healing, and it was plainly regarded by the Jews as customary or befitting (Matt. xix. 13; Mark viii. 23, x. 16). One of the promises at the end of St. Mark's Gospel to Christ's followers is that they should cure the sick by laying on of hands (Mark xvi. 18); and accordingly we find that Saul received his sight (Acts ix. 17) and Publius's father was healed of his fever (Acts xxviii. 8) by imposition of hands.

In the Acts of the Apostles the nature of the gift or blessing bestowed by the Apostolic imposition of hands is made clearer. It is called the gift of the Holy Ghost (viii. 17, xix. 6). This gift of the Holy Ghost is described as the fulfillment of Joel's prediction — "I will pour out my Spirit upon all flesh, and your sons and your daughters shall prophesy, and your young men shall see visions

Digitized by Google

and your old men shall dream dreams; and on my servants and on my handmaidens I will pour out in those days of my Spirit, and they shall prophesy" (ii. 17, 18, and 38). Accordingly visible supernatural powers were the result of this gift — powers which a Simon Magus could see, the capacity of bestowing which he could covet and propose to purchase (viii. 18). In the case of the Ephesian disciples these powers are stated to be, Speaking with tongues and Prophesying (xix. 6). Sometimes they were granted without the ceremony of imposition of hands, in answer to Apostolic prayer (iv. 31), or in confirmation of Apostolic preaching (x. 44). But the last of these cases is described as extraordinary (xi. 17), and as having occurred in an extraordinary manner for the special purpose of impressing a hardly-learned lesson on the Jewish Christians by its very strangeness.

By the time that the Epistle to the Hebrews was written we find that there existed a practice and doctrine of imposition of hands, which is pronounced by the writer of the Epistle to be one of the first principles and fundamentals of Christianity, which he enumerates in the following order: — (1.) The doctrine of Repentance; (2.) of Faith; (3.) of Baptisms; (4.) of Laying on of Hands; (5.) of the Resurrection; (6.) of Eternal Judgment (Heb. vi. 1, 2). Laying on of Hands in this passage can mean only one of three things — Ordination, Absolution, or that which we have already seen in the Acts to have been practiced by the Apostles, imposition of hands for the gift of the Holy Ghost on the baptized. The meaning of Ordination is excluded by the context. We have no proof of the existence of the habitual practice of Absolution at this period nor of its being accompanied by the laying on of hands. Everything points to that laying on of hands which, as we have seen, immediately succeeded baptism in the Apostolic age, and continued to do so in the ages immediately succeeding the Apostles.

The Christian dispensation is specially the dispensation of the Spirit. He, if any, is the Vicar whom Christ deputed to fill his place when He departed (John xvi. 7). The Spirit exhibits himself not only by his gifts, but also, and still more, by his graces. His gifts are such as those enumerated in the Epistle to the Corinthians: "the gift of healing, of miracles, of prophecy, of discerning of spirits, of divers kinds of tongues, of interpretation of tongues" (1 Cor. xii. 10). His graces are, "love, joy, peace, long-suffering, gentleness, goodness, faith, meekness, temperance" (Gal. v. 22, 23): the former are classed as the extraordinary, the latter as the ordinary gifts of the Spirit.

It was the will of the Spirit to bestow his gifts at different times, as well as in different ways and on different persons at the same time (1 Cor. xii. 6). His extraordinary gifts were poured out in great abundance at the time when the Christian Church was being instituted. At no definite moment, but gradually and slowly, these extraordinary gifts were withheld and withdrawn. When the Church was now contemplated as no longer in course of formation, but as having been now brought into being, his miracles of power ceased to be wrought (see Trench, *On the Miracles*, Introduction, and Jeremy Taylor, *On Confirmation*). But He continued his miracles of grace. His ordinary gifts never ceased being dispensed through the Church, although after a time the extraordinary gifts were found no longer.

With the Apostolic age, and with the age succeeding the Apostles, we may suppose that the consequences of the imposition of hands which manifested themselves in visible works of power (Acts viii., xix.) ceased. Nevertheless the practice of the imposition of hands continued. Why? Because, in addition to the visible manifestation of the Spirit his invisible working was believed to be thereby increased, and his divine strength therein imparted. That this was the belief in the Apostolic days themselves may be thus seen. The ceremony of imposition of hands was even then habitual and ordinary. This may be concluded from the passage already quoted from Heb. vi. 2, where Imposition is classed with Baptisms as a fundamental: it may possibly also be deduced (as we shall show to have been believed) from 2 Cor. i. 21, 22, compared with Eph. i. 13, iv. 30; 1 John ii 20; and it may be certainly inferred from subsequent universal practice. But although all the baptized immediately after their baptism received the imposition of hands, yet the extraordinary gifts were not given to all. "Are all workers of miracles? have all the gifts of healing? do all speak with tongues? do all interpret?" (1 Cor. xii. 29). The men thus endowed were, and must always have been, few among many. Why, then, and with what results, was imposition of hands made a general custom? Because, though the visible gifts of the Spirit were bestowed only on those on whom He willed to bestow them, yet there were diversities of gifts and operations (*ib.* 11). Those who did not receive the visible gifts might still receive, in some cases, a strengthening and enlightenment of their natural faculties. "To one is given by the Spirit the word of wisdom, to another the word of knowledge by the same Spirit" (*ib.* 8); while all in respect to whom no obstacle existed might receive that grace which St. Paul contrasts with and prefers to the "best gifts," as "more excellent" than miracles, healing, tongues, knowledge and prophesying (*ib.* 31), greater too than "faith and hope" (xiii. 13). This is the grace of "charity," which is another name for the ordinary working of the Holy Spirit in the heart of man. This was doubtless the belief on which the rite of Imposition of Hands became universal in the Apostolic age, and continued to be universally observed in the succeeding ages of the Church. There are numberless references or allusions to it in the early Fathers. There is a possible allusion to it in Theophilus Antiochenus, A. D. 170 (*Ad Autol* l. i. c. 12, al. 17). It is spoken of by Tertullian, A. D. 200 (*De Bapt.* c. viii.; *De Resurr. Carn.* c. viii.); by Clement of Alexandria, A. D. 200 (*apud* Euseb. l. iii. c. 17); by Origen, A. D. 210 (*Hom.* vii. *in Ezek.*); by Cyprian, A. D. 250 (*Ep.* pp. 70, 73); by Firmilian, A. D. 250 (*apud* Cypr. *Ep.* p. 75, § 8); by Cornelius, A. D. 260 (*apud* Euseb. l. vi. c. 43); and by almost all of the chief writers of the 4th and 5th centuries. Cyprian (*loc. cit.*) derives the practice from the example of the Apostles recorded in Acts viii. Firmilian, Jerome, and Augustine refer in like manner to Acts xix. "The Fathers," says Hooker, "everywhere impute unto it that gift or grace of the Holy Ghost, not which maketh us first Christian men, but, when we are made such, assisteth us in all virtue, armeth us against temptation and sin. . . . The Fathers therefore, being thus persuaded, held confirmation as an ordinance Apostolic, always profitable in God's Church, although not always accompanied with equal largeness of those external effects which

Digitized by Google

gave it countenance at the first" (*Eccl. Pol.* v. 66, 4).

II. *Time of Confirmation.* — Originally Imposition of Hands followed immediately upon Baptism, so closely as to appear as part of the baptismal ceremony or a supplement to it. This is clearly stated by Tertullian (*De Bapt.* vii, viii.), Cyril (*Catech. Myst.* iii. 1), the author of the Apostolical Constitutions (vii. 43), and all early Christian writers; and hence it is that the names σφραγίς, χρῖσμα, *sigillum*, *signaculum*, are applied to Baptism as well as to Imposition of Hands. (See Euseb. *H. E.* iii. 23; Greg. Naz. *Or.* p. 40; Herm. *Past.* iii. 9, 16; Tertull. *De Spectac.* xxiv.) Whether it were an infant or an adult that was baptized, confirmation and admission to the Eucharist immediately ensued. This continued to be the general rule of the Church down to the ninth century, and is the rule of the Eastern Churches to the present time. The way in which the difference in practice between East and West grew up was the following. It was at first usual for many persons to be baptized together at the great Festivals of Easter, Pentecost, and Epiphany in the presence of the bishop. The bishop then confirmed the newly-baptized by prayer and imposition of hands. But by degrees it became customary for presbyters and deacons to baptize in other places than the cathedrals and at other times than at the great festivals. Consequently, it was necessary either to give to presbyters the right of confirming, or to defer confirmation to a later time, when it might be in the power of the bishop to perform it. The Eastern Churches gave the right to the presbyter, reserving only to the bishop the composition of the chrism with which the ceremony is performed. The Western Churches retained it in the hands of the bishop. (See *Conc. Carthag.* iii. can. 36 and iv. can. 36; *Conc. Tolet.* i. can. 20; *Conc. Autissiodor.* can. 6; *Conc. Bracar.* i. can. 36 and ii. can. 4; *Conc. Eliber.* can. 38 and 77.) Tertullian says that it was usual for the bishop to make expeditions (*excurrat*) from the city in which he resided to the villages and remote spots in order to lay his hands on those who had been baptized by presbyters and deacons, and to pray for the gift of the Holy Spirit upon them (*Cont. Lucif.* iv.). The result was that, in the West, men's minds became accustomed to the severance of the two ceremonies which were once so closely joined — the more, as it was their practice to receive those who had been heretically or schismatically baptized, not by rebaptism, but only by imposition of hands and prayer. By degrees the severance became so complete as to be sanctioned and required by authority. After a time this appendix or supplement to the sacrament of baptism became itself erected into a separate sacrament by the Latin Church.

III. *Names of Confirmation.* — The title of "Confirmatio" is modern. It is not found in the early Latin Christian writers, nor is there any Greek equivalent for it: for τελείωσις answers rather to "consecratio" or "perfectio," and refers rather to baptism than confirmation. The ordinary Greek word is χρῖσμα, which, like the Latin "unctio," expresses the gift of the Holy Spirit's grace. In this general sense it is used in 1 John ii. 20, "Ye have an *unction* from the Holy One," and in 2 Cor. i. 21, "He which hath *anointed* us is God, who hath also sealed us and given the earnest of the Spirit in our hearts." So early a writer as Tertullian not only mentions the act of anointing as being in use at the same time with the imposition of hands (*De Bapt.* vii. and viii.), but he speaks of it as being "de pristina disciplina," even in his day. It is certain, therefore, that it must have been introduced very early, and it has been thought by some that the two Scriptural passages above quoted imply its existence from the very beginning. (See Chrysostom, Hilary, Theodoret, *Comm. in loc.* and Cyril *in Catech.* 3.)

Another Greek name is σφραγίς. It was so called as being the consummation and seal of the grace given in baptism. In the passage quoted from the Epistle to the Colossians "sealing" by the Spirit is joined with being "anointed by God." A similar expression is made use of in Eph. i. 13, "In whom also after that ye believed ye were *sealed* with that Holy Spirit of promise;" and again, "the Holy Spirit of God, whereby ye are *sealed* unto the day of redemption" (Eph. iv. 30). The Latin equivalents are *sigillum*, *signaculum*, and (the most commonly used Latin term) *consignatio*. Augustine (*De Trin.* xv. 26) sees a reference in these passages to the rite of confirmation.

IV. *Definitions of Confirmation.* — The Greek Church does not refer to Acts viii., xix., and Heb. vi. for the origin of confirmation so much as to 1 John ii. and 2 Cor. i. Regarding it as the consummation of baptism she condemns the separation which has been effected in the West. The Russian Church defines it as "a mystery in which the baptized believer, being anointed with holy chrism in the name of the Holy Ghost, receives the gifts of the Holy Ghost for growth and strength in the spiritual life" (*Longer Catechism*). The Latin Church defines it as "unction by chrism (accompanied by a set form of words), applied by the Bishop to the forehead of one baptized, by means of which he receives increase of grace and strength by the institution of Christ" (Liguori after Bellarmine). The English Church (by implication) as "a rite by means of which the regenerate are strengthened by the manifold gifts of the Holy Ghost the Comforter, on the occasion of their ratifying the baptismal vow" (*Confirmation Service*). Were we to criticise these definitions, or to describe the ceremonies belonging to the rite in different ages of the Church, we should be passing from our legitimate sphere into that of a Theological Dictionary.

BARABBAS (Βαραββᾶς, בַּר־אַבָּא, son of

Ἀββᾶ, see Simonis *Onom. N. T.* 38), a robber (λῃστής, John xviii. 40), who had committed murder in an insurrection (Mark xv. 7; Luke xxiii. 19) in Jerusalem, and was lying in prison at the time of the trial of Jesus before Pilate. When the Roman governor, in his anxiety to save Jesus, proposed to release him to the people in accordance with the custom that he should release one prisoner to them at the Passover, the whole multitude cried out, Αἶρε τοῦτον, ἀπόλυσον δὲ ἡμῖν τὸν Βαραββᾶν: which request was complied with by Pilate. According to many [*five*, two of them *a secunda manu*] of the cursive, or later MSS. in Matt. xxvii. 17, his name was Ἰησοῦς Βαραββᾶς; Pilate's question there running, τίνα θέλετε ἀπολύσω ὑμῖν; Ἰησοῦν Βαραββᾶν, ἢ Ἰησοῦν τὸν λεγόμενον Χριστόν; and this reading is supported by the Armenian version, and cited by Origen (on Matt. vol. v. 35). It has in consequence been admitted into the text by Fritzsche and Tischendorf.[a] But the contrast in ver. 20, "that they should ask Barabbas, and destroy Jesus," seems fatal to it. H. A.

BAR'ACHEL (בָּרַכְאֵל [*whom God has blessed*]: Βαραχιήλ: *Barachel*), "the Buzite," father of Elihu (Job xxxii. 2, 6). [BUZ.]

* **BARACHI'AH**, Zech. i. 1, 7, A.V. ed. 1611, and other early editions. BERECHIAH 7.

BARACHI'AS [Βαραχίας: *Barachias*], Matt. xxiii. 35. [ZACHARIAS.]

BA'RAK (בָּרָק, *lightning*, as in Ex. xix. 16: Βαράκ, LXX.: [*Barac*, Vulg.:] comp. the family name of Hannibal, Barca = "fulmen belli"), son of Abinoam of Kedesh, a refuge-city in Mount Naphthali, was incited by Deborah, a prophetess of Ephraim, to deliver Israel from the yoke of Jabin. Jabin ("prudent") was probably the dynastic name of those kings of northern Canaan, whose capital city was Hazor on Lake Merom. Sisera, his general and procurator, oppressed a promiscuous population at Harosheth. Accompanied, at his own express desire, by Deborah, Barak led his rudely-armed force of 10,000 men from Naphthali and Zebulon to an encampment on the summit of Tabor, where the nine hundred iron chariots of Jabin would be useless. At a signal given by the prophetess, the little army, seizing the opportunity of a providential storm (Joseph. v. 5, § 4) and a wind that blew in the faces of the enemy, boldly rushed down the hill, and utterly routed the unwieldy host of the Canaanites in the plain of Jezreel (Esdraelon), "the battle field of Palestine" (Stanley, *S. & P.* p. 331). From the prominent mention of Taanach (Judg. v. 19, "sandy soil") and of the river Kishon, it is most likely that the victory was partly due to the suddenly swollen waves of that impetuous torrent (χειμάρρους, LXX.), particularly its western branch called Megiddo. The victory was decisive, Harosheth taken (Judg. iv. 16), Sisera murdered, and Jabin ruined. A peace of 40 years ensued, and the next danger came from a different quarter. The victors composed a splendid epinician ode in commemoration of their deliverance (Judg. v.).

It is difficult to decide the date of Barak. He appears to have been a contemporary of Shamgar (Judg. v. 6). If so, he could not have been so much as 178 years after Joshua, where he is generally placed. Lord A. Hervey supposes the narrative to be a repetition of Josh. xi. 1–12 (*Genealogies*, p. 228 ff.). A great deal may be said for this view; the names Jabin and Hazor; the mention of subordinate kings (Judg. v. 19: cf. Josh. xi. 2 ff.); the general locality of the battle the prominence of chariots in both narratives, and especially the name Misrephoth-maim, which seems to mean "burning by the waters," as in the marg. of the A. V., and not "the flow of waters." Many chronological difficulties are also thus removed, but it is fair to add that in Stanley's opinion (*S. & P.*, p. 392, note) there are geographical difficulties in the way. (Ewald, *Gesch. des Volkes Israel*; Lord A. Hervey, *Genealogies*, pp. 225–246 ff.) [DEBORAH.] F. W. F.

* The means we have at present for illustrating the local scene of Barak's victory over Sisera impart a new interest to the narrative, and furnish a remarkable testimony to its accuracy. Though the song of Deborah and Barak was written thousands of years ago, so many of the places mentioned in it have survived to our time and been identified that this battle-field lies now mapped out before us on the face of the country almost as distinctly as if we were reading the account of a contemporary event. Dr. Thomson, who has had his home for a quarter of a century almost in sight of Tabor, at the foot of which the battle was fought, has given a living picture of the movements of the hostile armies, and of the localities referred to, showing that nearly all these still exist and bear their ancient names, and occur precisely in the order that the events of the narrative presuppose. The passage is too long for citation (*Land and Book*, i. 141-144), but will be found to illustrate strikingly the topographical accuracy of Scripture. Stanley has given a similar description (*Sin. and Pal.* p. 331, Amer. ed.). We have monographs on the song of the conquerors (Judg. v.) from Hollmann, *Comment. philol.-crit.* (Lips. 1818); Böttcher, *Aehrenlese zum Alt. Test.* (p. 16 ff.); Gumpach, *Alttestamentliche Studien* (Heidelberg, 1852); and Sack, *Lieder in den historischen Bücher des A. T.* (1864). The exegetical articles (embracing translation and notes) of Dr. Robinson (*Bibl. Repos.* i. 568-612) and of Prof. Robbins (*Bibl. Sacra*, xii. pp. 597-642) are elaborate and valuable. The Commentaries on Judges (those of Studer, Keil, Bertheau, Cassel) give special prominence to the explanation of this remarkable ode. There is a spirited though free translation of the song in Milman's *History of the Jews*, i. pp. 292-295 (Amer. ed.). H.

BARBARIAN (βάρβαρος). Πᾶς μὴ Ἕλλην βάρβαρος is the common Greek definition, quoted by Serv. *ad Virg. Æn.* ii. 504; and in this strict sense the word is used in Rom. i. 14, "I am debtor both to Greeks and barbarians;" where Luther used the term "Ungrieche," which happily expresses its force. Ἕλληνες καὶ βάρβαροι is the constant division found in Greek literature, but Thucydides (i. 3) points out that this distinction is subsequent to Homer, in whom the word does not occur, although he terms the Carians βαρβαρόφωνοι (*Il.* ii. 867, where Eustathius connects the other form Κάρβανος with Κάρ). At first, according to Strabo (xiv. p. 662), it was only used κατ' ὀνοματοποιΐαν

[a] * Tischendorf adopted this reading in his *second* Leipsic edition (1849), but rejected it in his *seventh* edition (1859), and in the eighth, now (1867) in course of publication, assigning his reasons at considerable length. See also Tregelles's *Account of the Printed Text of the Greek N. T.*, pp. 194–196 A

ἐπὶ τῶν δυσκατάρων καὶ σκληρῶν καὶ τραχέως λαλούντων, and its generic use was subsequent. It often retains this primitive meaning, as in 1 Cor. xiv. 11 (of one using an unknown tongue), and Acts xxviii. 4 (of the Maltese, who spoke a Punic dialect). So too Æsch. *Agam.* 2013, χελιδόνος δίκην Ἄγνωτα φωνὴν βάρβαρον κεκτημένη: and even of one who spoke a patois, ἅτε Λέσβιος ὢν καὶ ἐν φωνῇ βαρβάρῳ τεθραμμένος, Plat. *Protag.* 341 c (it is not so strong a word as παλίγλωσσος, Donaldson, *Crat.* § 88); and the often quoted line of Ov. *Trist.* v. 10, 37,—

"Barbarus hic ego sum *quia non intelligor ulli*."

The ancient Egyptians (like the modern Chinese) had an analogous word for all τοὺς μὴ σφίσιν ὁμογλώσσους, Herod. ii. 158; and βάρβαρος is used in the LXX. to express a similar Jewish distinction. Thus in Ps. cxiii. 1, λαὸς βάρβαρος is used to translate לֹעֵז, "peregrino sermone utens" (Schleusn. *Thes.* s. v.), which is also an onomatopœian from לָעַג, to stammer. In 1 Cor. v. 13, 1 Tim. iii. 7, we have οἱ ἔξω, and Matt. vi. 32, τὰ ἔθνη, used Hebraistically for גּוֹיִם, אֻמִּים (in very much the same sort of sense as that of βάρβαροι) to distinguish all other nations from the Jews; and in the Talmudists we find Palestine opposed to אַרְצוֹת, just as Greece was to Barbaria or ἡ βάρβαρος: (cf. Cic. *Fin.* ii. 15; Lightfoot, *Centuria Chorogr. ad init.*) And yet so completely was the term βάρβαρος accepted, that even Josephus and Philo scruple as little to reckon the Jews among them (*Ant.* xi. 7, § 1, &c.), as the early Romans did to apply the term to themselves ("Demophilus scripsit, Marcus vertit barbare;" Plaut. *Asin.* prol. 10). Very naturally the word after a time began to involve notions of cruelty and contempt (θηρὸς βαρβάρου, 2 Macc. iv. 25, xv. 2, &c.), and then the Romans excepted themselves from the scope of its meaning (Cic. *de Rep.* i. 37, § 68). Afterwards only the savage nations were called barbarians; though the Greek Constantinopolitans called the Romans "barbarians" to the very last. (Gibbon, c. 51, vi. 351, ed. Smith; Winer, *s. v.*) F. W. F.

* **BARBAROUS** (βάρβαροι), as employed in Acts xxviii. 2 (A V.), means "foreign," a sense now obsolete, and designates there the Melitæans as speaking a different language from the Greeks. The inhabitants of Melita (*Malta*), were a Phœnician race and spoke the Punic, *i. e.* Phœnician, as spoken at Carthage. A misunderstanding of the term rendered "barbarous" in Acts xxviii. 2 led Coleridge to deny that the Melitæans could be meant there, because they were highly civilized. The "no little kindness" which "the barbarous people showed" to the wrecked mariners obliges us to acquit them of any want of humanity. "Barbarians" (see above) would be less inexact, but leans now towards the same objectionable meaning. H.

BARHU'MITE, THE. [BAHURIM.]

BARI'AH (בָּרִיחָ [*a bolt*]: Βεδδί; [Vat. Μαρει,] Alex. Βερια: *Baria*), one of the sons of Shemaiah, a descendant of the royal family of Judah (1 Chr. iii. 22).

BAR-JE'SUS. [ELYMAS.]

BAR-JO'NA. [PETER.]

BARKOS (בַּרְקוֹס [*painter*]: Βαρκός, [Vat. Βαρκους; in Neh.] Βαρκουέ, [Alex. Βαρκους:] *Bercos*). "Children of Barkos" were among the Nethinim who returned from the captivity with Zerubbabel (Ezr. ii. 53; Neh. vii. 55).

BARLEY (שְׂעֹרָה, *se'ôrâh*: κριθή: *hordeum*) the well-known useful cereal, mention of which is made in numerous passages of the Bible. Pliny (*H. N.* xviii. 7) states that barley is one of the most ancient articles of diet. It was grown by the Egyptians (Ex. ix. 31; Herod. ii. 77; Diodor. i. 34; Plin. xxii. 25); and by the Jews (Lev. xxvii. 16; Deut. viii. 8; Ruth ii. 17, &c.), who used it for baking into bread, chiefly amongst the poor (Judg. vii. 13; 2 K. iv. 42; John vi. 9, 13); for making into bread by mixing it with wheat, beans, lentiles, millet, &c. (Ez. iv. 9); for making into cakes (Ez. iv. 12); as fodder for horses (1 K. iv. 28). Compare also Juvenal (viii. 154); and Pliny (*H. N.* xviii. 14; xxviii. 21), who states that though barley was extensively used by the ancients, it had in his time fallen into disrepute and was generally used as fodder for cattle only. Soninni says that barley is the common food for horses in the East. Oats and rye were not cultivated by the Jews, and perhaps not known to them. [RYE.] (See also Kitto, *Phys. H. of Pal.* 214.) Barley is mentioned in the *Mishna* as the food of horses and asses.

The barley harvest is mentioned Ruth i. 22, ii. 23; 2 Sam. xxi. 9, 10. It takes place in Palestine in March and April, and in the hilly districts as late as May; but the period of course varies according to the localities where the corn grows. Mariti (*Trav.* 416) says that the barley in the plain of Jericho begins to ripen in April. Niebuhr (*Besch. von Arab.* p. 160) found barley ripe at the end of March in the fields about Jerusalem. The barley harvest always precedes the wheat harvest, in some places by a week, in others by fully three weeks (Robinson, *Bib. Res.* ii. 99, 278). In Egypt the barley is about a month earlier than the wheat; whence its total destruction by the hail-storm (Ex. ix. 31). Barley was sown at any time between November and March, according to the season. Niebuhr states that he saw a crop near Jerusalem ripe at the end of March, and a field which had been just newly sown. Dr. Kitto adduces the authority of the Jewish writers as an additional proof of the above statement (*Phys. H. Pal.* 229). This answers to the winter and spring-sown wheat of our own country; and though the former is generally ripe somewhat earlier than the latter, yet the harvest-time of both is the same. Thus it was with the Jews: the winter and spring-sown barley were usually gathered into the garners about the same time; though of course the *very late* spring-sown crops must have been gathered in some time after the others.

Major Skinner (*Adventures in an Overland Journey to India*, i. 330) observed near Damascus a field newly sown with barley, which had been submitted to submersion similar to what is done to rice-fields. Dr. Royle (Kitto's *Cycl. Bib. Lit.* art. "Barley") with good reason supposes that this explains Is. xxxii. 20: "Blessed are ye that sow beside all waters;" and demurs to the explanation which many writers have given, namely, that allusion is made to the mode in which *rice* is cultivated. We cannot, however, at all agree with this writer, that the passage in Eccl. xi. 1 has any reference to irriga-

Digitized by Google

tion of newly sown barley-fields. Solomon in the context is enforcing obligations to liberality of that especial nature which looks not for a recompense: as Bishop Hall says, "Bestow thy beneficence on those from whom there is no probability of a return of kindness." It is clear that, if allusion is made to the mode of culture referred to above, either in the case of rice or barley, the force and moral worth of the lesson is lost; for the motive of such a sowing is expectation of an abundant return. The meaning of the passage is surely this: "Be liberal to those who are as little likely to repay thee again, as bread or corn cast into the pool or the river is likely to return again unto thee." Barley, as an article of human food, was less esteemed than wheat. [BREAD.] Compare also Calpurnius (*Ecl.* iii. 84), Pliny (*H. N.* xviii. 7), and Livy (xxvii. 13), who tells us that the Roman cohorts who lost their standards were punished by having barley bread given them instead of wheaten. The Jews according to *Tract. Sanhedr.* c. 9, § 5, had the following law: "Si quis loris cæsus reciderit jussu judicum arcæ inditus *hordeo cibatur*, donec venter ejus rumpatur." That barley bread is even to this day little esteemed in Palestine, we have the authority of modern travellers to show. Dr. Thomson (*Land and Book*, p. 449) says "nothing is more common than for these people to complain that their oppressors have left them nothing but *barley bread* to eat." This fact is important as serving to elucidate some passages in Scripture. Why, for instance, was *barley* meal, and not the ordinary meal-offering of *wheat* flour, to be the jealousy-offering (Num. v. 15)? Because thereby is denoted the low reputation in which the implicated parties were held. The homer and a half of barley, as part of the purchase-money of the adulteress (Hos. iii. 2), has doubtless a similar typical meaning. With this circumstance in remembrance, how forcible is the expression in Ezekiel (xiii. 19), "Will ye pollute me among my people for handfuls of *barley*?" And how does the knowledge of the fact aid to point out the connection between Gideon and the barley-cake, in the dream which the "man told to his fellow" (Judg. vii. 13). Gideon's "family was poor in Manasseh — and he was the least in his father's house;" and doubtless the Midianites knew it. Again, the Israelites had been oppressed by Midian for the space of seven years. Very appropriate, therefore, is the dream and the interpretation thereof. The despised and humble Israelitish deliverer was as a mere vile barley-cake in the eyes of his enemies. On this passage Dr. Thomson remarks, "If the Midianites were accustomed in their extemporaneous songs to call Gideon and his band "*cakes of barley bread*," as their successors the haughty Bedawin often do to ridicule their enemies, the application would be all the more natural." That barley was cultivated abundantly in Palestine is clear from Deut. viii. 8; 2 Chr. ii. 10, 15.

The cultivated barleys are usually divided into "two-rowed" and "six-rowed" kinds. Of the first the *Hordeum distichum*, the common summer barley of England, is an example; while the *H. hexastichum*, or winter barley of farmers, will serve to represent the latter kind. The kind usually grown in Palestine is the *H. distichum*. It is too well known to need further description.[a] W. H.

BARNABAS (בַּר־נַבּא: Βαρνάβας: [*Barnabas*], a name signifying *υἱὸς παρακλήσεως*, "son of prophecy," or "exhortation" (or, but not so probably, "consolation," as A. V.), given by the Apostles (Acts iv. 36) to JOSEPH (or Joses, as the Rec. Text), a Levite of the island of Cyprus, who was early a disciple of Christ (according to Euseb. *H. E.* i. 12, and Clem. Alex. *Strom.* ii. 176 Sylb., one of the Seventy), and in Acts (*l. c.*) is related to have brought the price of a field which he had sold, and to have laid it at the feet of the Apostles. In Acts ix. 27, we find him introducing the newly-converted Saul to the Apostles at Jerusalem, in a way which seems to imply previous acquaintance between the two. On tidings coming to the church at Jerusalem that men of Cyprus and Cyrene had been, after the persecution which arose about Stephen, preaching the word to Gentiles at Antioch, Barnabas was sent thither (Acts xi. 19–26), and being a good man, and full of the Holy Ghost, he rejoiced at seeing the extension of the grace of God, and went to Tarsus to seek Saul, as one specially raised up to preach to the Gentiles (Acts xxvi. 17). Having brought Saul to Antioch, he was sent, together with him, to Jerusalem, upon a prophetic intimation of a coming famine, with relief to the brethren in Judæa (Acts xi. 30). On their return to Antioch, the two, being specially pointed out by the Holy Ghost (Acts xiii. 2) for the missionary work, were ordained by the church and sent forth (A. D. 45). From this time, though not of the number of the Twelve, Barnabas and Paul enjoy the title and dignity of apostles. Their first missionary journey is related in Acts xiii., xiv.; it was confined to Cyprus and Asia Minor. Some time after their return to Antioch (A. D. 47 or 48), they were sent (A. D. 50) with some others, to Jerusalem, to determine with the Apostles and Elders the difficult question respecting the necessity of circumcision for the Gentile converts (Acts xv. 1 ff.). On that occasion, Paul and Barnabas were recognized as the Apostles of the uncircumcision. After another stay in Antioch on their return, a variance took place between Barnabas and Paul on the question of taking with them, on a second missionary journey, John Mark, sister's son to Barnabas (Acts xv. 36 ff.). "The contention was so sharp that they parted asunder;" and if we may judge from the hint furnished by the notice that Paul was commended by the brethren to the grace of God, it would seem that Barnabas was in the wrong. He took Mark, and sailed to Cyprus, his native island. And here the Scripture notices of him cease: those found in Gal. ii. 1, 9, 13, belong to an earlier period;[b] see above. From 1 Cor. ix. 6, we infer that Barnabas was a married man; and from Gal. *l. c.*, and the circumstances of the dispute with Paul, his character seems not to have possessed that thoroughness of purpose and determination which was found in

[a] The Hebrew word שִׂעֹרָה is derived from יָעַר, *terrere*; so called from the long, rough awns which are attached to the husk. Similarly, *hordeum* is from *horrere*.

[b] The notice of Barnabas in Gal. ii. 13 was *later*, if we place Paul's rebuke of Peter (Gal. ii. 11) in the interval between the apostle's second and third missionary journey, Acts xviii. 23 (Neander, *Pflanzung*, i 351; Baumgarten, *Apostelgesch.* ii. 351 and others) As to character, some of the Germans compare Barnabas with Melancthon and Paul with Luther. H

the great Apostle. As to his further labors and death, traditions differ. Some say that he went to Milan, and became first bishop of the church there: the Clementine Homilies make him to have been a disciple of our Lord himself, and to have preached in Rome and Alexandria, and converted Clement of Rome: the Clementine Recognitions, to have preached in Rome, even during the life-time of our Lord. There is extant an apocryphal work, probably of the fifth century, *Acta et Passio Barnabæ in Cypro*, which relates his second missionary journey to Cyprus, and his death by martyrdom there; and a still later encomium of Barnabas, by a Cyprian monk Alexander, which makes him to have been brought up with St. Paul under Gamaliel, and gives an account of the pretended finding of his body in the time of the Emperor Zeno (474–490). We have an Epistle in 21 chapters called by the name of Barnabas. Of this, the first four chapters and a half are extant only in a barbarous Latin version; the rest in the original Greek.[a] Its authenticity has been defended by some great names; and it is quoted as the work of Barnabas by Clem. Alex. (seven times), by Origen (thrice), and its authenticity, but not its authority, is allowed by Euseb. (*H. E.* iii. 25) and Jerome (*Catal. Scriptor. Ecclesiast.* c. 6: see Pearson, *Vindiciæ Ignatianæ*, pt. i. c. 4). But it is very generally given up now, and the Epistle is believed to have been written early in the second century. The matter will be found concisely treated by Hefele, in the prolegomena to his edition of the Apostolic Fathers, 1 vol. 8vo., Tübingen, 1847; and more at length in his volume, *Das Sendschreiben des Ap. Barnabas, &c.*, Tübingen, 1840; and in Heberle's article in Herzog's Cyclopædia. [See also Norton's *Genuineness of the Gospels*, 2d ed., vol. i. Add. Notes, pp. ccl.–cclviii., Cambr. 1846, and Donaldson's *Hist. of Christian Literature and Doctrine*, i. 201–211, Lond. 1864. — A.] H. A.

BARO'DIS (Βαροδὶς [Vat. Alex. -δεις]: *Rahotis*), a name inserted in the list of those "servants of Solomon" who returned with Zerubbabel (1 Esdr. v. 34). There is no corresponding name in the list of Ezra or Nehemiah.

* **BARREL.** The Hebrew word (כַּד : ὑδρία: *hydria*) so rendered in 1 K. xvii. 12, 14, 16, xviii. 33, is everywhere else translated PITCHER, which see. In the passages referred to, "pail" (*Eimer*, De Wette) would be a better rendering than "barrel"; Coverdale and Sharpe have "pitcher." A.

BAR'SABAS. [JOSEPH BARSABAS; JUDAS BARSABAS.]

BARTACUS (Βαρτάκος: *Bezax*), the father of Apame, the concubine of king Darius (1 Esdr. iv. 29). "The admirable" (ὁ θαυμαστός) was probably an official title belonging to his rank. The Syriac version has ‏ܒܙܟ‏, a name which recalls that of Artachæas (Ἀρταχαίης), who is named by Herodotus (vii. 22, 117) as being in a high position in the Persian army under Xerxes, and a special favorite of that king (Simonis, *Onom.*; Smith's *Dict. of Biog.* i. 369).

BARTHOL'OMEW (Βαρθολομαῖος, *i. e.* בַּר תַּלְמַי, *son of Talmai*: comp. the LXX [Θολαμί, Θολμί; Alex.] Θολμαι, Θολομαι, Josh xv. 14, 2 Sam. xiii. 37, and Θολομαῖος, Joseph *Ant.* xx. 1, § 1: *Bartholomæus*), one of the Twelve Apostles of Christ (Matt. x. 3; Mark iii. 18; Luke vi. 14; Acts i. 13). His own name nowhere appears in the three first Gospels; and it has been not improbably conjectured that he is identical with Nathanael (John i. 45 ff.). Nathanael there appears to have been first brought to Jesus by Philip; and in the three first catalogues of the Apostles (cited above) Bartholomew and Philip appear together. It is difficult also to imagine, from the place assigned to Nathanael in John xxi. 2, that he can have been other than an apostle. If this may be assumed, he was born at Cana of Galilee; and is said to have preached the gospel in India (Euseb. *H. E.* v. 10, Jerome, *Vir. Illust.* 36), meaning thereby, probably, Arabia Felix (Ἰνδοὶ οἱ καλούμενοι εὐδαίμονες, Sophron.), which was sometimes called India by the ancients (Mosheim, *De Rebus Christ. ante Constant. M. Commentarii*, p. 206). Some allot Armenia to him as his mission-field, and report him to have been there flayed alive and then crucified with his head downwards (Assemann. *Bibl. Or.* iii. 2, 20). H. A.

BARTIMÆ'US [A. V. Bartime'us] (Βαρτιμαῖος, *i. e.* בַּר טִמַאי, *son of Timai*), a blind beggar of Jericho who (Mark x. 46 ff.) sat by the wayside begging as our Lord passed out of Jericho on his last journey to Jerusalem. Notwithstanding that many charged him to hold his peace, he continued crying, "Jesus, thou son of David, have mercy on me!" Being called, and his blindness miraculously cured, on the ground of his faith, by Jesus, he became thenceforward a disciple. Nothing more is known of him. H. A.

* The account of this miracle as related by all the Synoptists is comparatively full (Matt. xx. 29–34; Mark x. 46–52; Luke xviii. 35–43). In point of vividness of description and moral suggestiveness it is hardly surpassed by any similar narrative in the Gospel. For the circumstances under which the miracle was performed and its import as a symbol of the spiritual relations which men sustain to Christ as the great Healer, the remarks of Trench (*Miracles of our Lord*, pp. 11–15, 341 ff., Amer. ed.) deserve to be read. Westcott classes it among "the miracles of personal faith" so signally exemplified here, both in its degree and its reward (*Introduct. to the Study of the Gospels*, p. 467, Amer. ed.). See also his *Characteristics of the Gospel Miracles*, pp. 48–59. Le Clerc's rule explains the apparent discrepancy that Matthew speaks of two blind men as healed at this time, but Mark and Luke of only one: "Qui plura narrat, pauciora complectitur; qui pauciora memorat, plura non negat." It has been thought more difficult to explain how Luke should seem to say that Jesus was approaching Jericho when he performed the cure, while Matthew and Mark say that he performed it as he was leaving Jericho. One reply to this statement is that Jesus may have healed two blind men, one before he entered the city and the other on his departure from it; the former being the instance that Luke mentions, the latter that

[a] * The recently discovered *Codex Sinaiticus*, published by Tischendorf in 1862 and 1863, contains the entire epistle in Greek. The portion supplied by the *Codex Sinaiticus* is given literally in the second edition of Dressel's *Patrum Apost. Opera*, Lips 1863, and is critically edited, with the rest of the epistle, in Hilgenfeld's *Novum Test. extra Canonem receptum*, fasc. ii., Lips. 1866. A.

Digitized by Google

which Mark mentions, while Matthew speaks of the two cases together. So Wieseler (*Synopse der vier Evang.* p. 332) and Ebrard (*Kritik der Evang. Geschich.* p. 467 ff., 2te Aufl.). Neander (note in his *Leben Jesu Christi*, p. 614, 4te Aufl.) inclines to the same view. It is possible also, as Bengel suggests (*Gnomon N. T.* i. 140), that Bartimæus having failed in his first application when Jesus arrived at Jericho, renewed his request the next day in company with another blind man, as Jesus left the house of Zaccheus and the city on his way to Jerusalem. Two additional words in Luke xviii. 38, "And (*on the morrow*) he cried" &c., would thus conciliate the two accounts perfectly; and, really, the confessedly fragmentary character of the narratives allows us, without violence, to suppose that omission. Trench favors this last explanation. H.

BA'RUCH (בָּרוּךְ, *blessed* = *Benedict*: Βαρούχ; Joseph. Βαρούχος: *Baruch*). 1. Son of Neriah, the friend (Jer. xxxii. 12), amanuensis (Jer. xxxvi. 4 ff.; 32) and faithful attendant of Jeremiah (Jer. xxxvi. 10 ff.; Joseph. *Ant.* x. 6, § 2; B. C. 603), in the discharge of his prophetic office. He was of a noble family (Joseph. *Ant.* x. 9, § 1, ἐξ ἐπισήμου σφόδρα οἰκίας; comp. Jer. li. 59; Bar. i. 1, *De tribu Simeon*, Vet. Lat.), and of distinguished acquirements (Joseph. *l. c.* τῇ πατρῴᾳ γλώττῃ διαφερόντως πεπαιδευμένος); and his brother Seraiah held an honorable office in the court of Zedekiah (Jer. li. 59). His enemies accused him of influencing Jeremiah in favor of the Chaldæans (Jer. xliii. 3; cf. xxxvii. 13); and he was thrown into prison with that prophet, where he remained till the capture of Jerusalem B. C. 586 (Joseph. *Ant.* x. 9, § 1). By the permission of Nebuchadnezzar he remained with Jeremiah at Maspatha (Joseph. *l. c.*); but was afterwards forced to go down to Egypt with "the remnant of Judah that were returned from all nations" (Jer. xliii. 6; Joseph. *Ant.* x. 9, § 6). Nothing is known certainly of the close of his life. According to one tradition he remained in Egypt till the death of Jeremiah, and then retired to Babylon, where he died in the 12th year after the destruction of Jerusalem (Bertholdt, *Einl.* 1740 p.). Jerome, on the other hand, states "on the authority of the Jews" (*Hebræi tradunt*), that Jeremiah and Baruch died in Egypt "before the desolation of the country by Nabuchodonosor" (*Comm. in Is.* xxx. 6, 7, p. 405). [JEREMIAH.] B. F. W.

2. The son of Zabbai, who assisted Nehemiah in rebuilding the walls of Jerusalem (Neh. iii. 20).

3. A priest, or family of priests, who signed the covenant with Nehemiah (Neh. x. 6).

4. The son of Col-hozeh, a descendant of Perez, or Pharez, the son of Judah (Neh. xi. 5).

BA'RUCH, THE BOOK OF, is remarkable as the only book in the Apocrypha which is formed on the model of the Prophets; and though it is wanting in originality, it presents a vivid reflection of the ancient prophetic fire. It may be divided into two main parts, i.–iii. 8, and iii. 9–end. The first part consists of an introduction (i. 1–14), followed by a confession and prayer (i. 15–iii. 8). The second part opens with an abrupt address to Israel (iii. 9–iv. 30), pointing out the sin of the people in neglecting the divine teaching of Wisdom (iii. 9–iv. 8), and introducing a noble lament of Jerusalem over her children, through which hope still gleams (iv. 9–30). After this the tone of the book again changes suddenly, and the writer addresses Jerusalem in words of triumphant joy, and paints in the glowing colors of Isaiah the return of God's chosen people and their abiding glory (iv. 30–v. 9).

1. The book at present exists in Greek, and in several translations which were made from the Greek. The two classes into which the Greek MSS. may be divided do not present any very remarkable variations (Fritzsche, *Einl.* § 7); but the Syro-Hexaplaric text of the Milan MS., of which a complete edition is at length announced, is said to contain references to the version of Theodotion (Eichhorn, *Einl. in die Apoc. Schrift.* p. 388 n.), which must imply a distinct recension of the Greek, if not an independent rendering of an original Hebrew text. Of the two Old Latin versions which remain, that which is incorporated in the Vulgate is generally literal; the other (Carus, Rom. 1688; Sabatier) is more free. The vulgar Syriac and Arabic follow the Greek text closely (Fritzsche, *l. c.*).

2. The assumed author of the book is undoubtedly the companion of Jeremiah, though Jahn denied this; but the details are inconsistent with the assumption. If the reading in i. 1 be correct (ἔτει; De Wette *conj.* μηνί, *Einl.* § 321 a; comp. 2 K. xxv. 8), it is impossible to fix "*the fifth year*" in such a way as to suit the contents of the book, which exhibits not only historical inaccuracies but also evident traces of a later date than the beginning of the Captivity (iii. 9 ff., iv. 22 ff.; i. 3 ff. Comp. 2 K. xxv. 27).

3. The book was held in little esteem among the Jews (Hieron. *Præf. in Jerem.* p. 834 . . . *nec habetur apud Hebræos*; Epiph. *de mens.* οὐ κεῖνται ἐπιστολαὶ (Βαρούχ) παρ' Ἑβραίοις); though it is stated in the Greek text of the Apostolical Constitutions that it was read, together with the Lamentations, "on the tenth of the month Gorpiæus" *i. e.* the day of Atonement; *Const. Ap.* v. 20, 1) But this reference is wanting in the Syriac version (Bunsen, *Anal. Ante-Nic.* ii. 187), and the assertion is unsupported by any other authority. There is no trace of the use of the book in the New Testament, or in the Apostolic Fathers, or in Justin But from the time of Irenæus it was frequently quoted both in the East and in the West, and generally as the work of Jeremiah (IREN. *Adv. Hær.* v. 35, 1, *significavit Jeremias*, Bar. iv. 36–v.; TERTULL. *c. Gnost.* 8, *Hieremiæ*, Bar. (Epist.) vi. 3 ff.; CLEM. *Pæd.* i. 10, § 91, διὰ Ἱερεμίου, Bar. iv. 4; id. *Pæd.* ii. 3, § 36, θεία γραφή, Bar. iii. 16-19; ORIG. ap. Euseb. *H. E.* vi. 25; Ἱερεμίας σὺν θρήνοις καὶ τῇ ἐπιστολῇ (?); CYPR. *Test. Lib.* ii. 6, *apud Hieremiam*, Bar. iii. 35, &c.). It was, however, "obelized" throughout in the LXX. as deficient in the Hebrew (*Cod. Chis.* ap. *Daniel*, &c., Romæ, 1772, p. xxi.). On the other hand it is contained as a separate book in the Pseudo-Laodicene Catalogue, and in the Catalogues of Cyril of Jerusalem, Athanasius, and Nicephorus; but it is not specially mentioned in the Conciliar catalogues of Carthage and Hippo, probably as being included under the title Jeremiah. (Comp [ATHAN.] *Syn. S. Script.* ap. Credner, *Zur Gesch des Kan.* 138. HILAR. *Prol. in Psalm.* 15.) It is omitted by those writers who reproduced in the main the Hebrew Canon (*e. g.* Melito, Gregory Nazianzen, Epipnanius). Augustine quotes the words of Baruch (iii. 16) as attributed "more commonly to Jeremiah" (*quidam . . . scriba ejus attribue-*

Digitized by Google

runt . . . sed Jeremiæ celebratius habetur. de Civ. xviii. 33), and elsewhere uses them as such (*c. Faust.* xii. 43). At the Council of Trent Baruch was admitted into the Romish Canon; but the Protestant churches have unanimously placed it among the Apocryphal books, though Whiston maintained its authenticity (*l. c.* infra).

4. Considerable discussion has been raised as to the original language of the book. Those who advocated its authenticity generally supposed that it was first written in Hebrew (Huet, Dereser, &c.; but Jahn is undecided: Bertholdt, *Einl.* 1755), and this opinion found many supporters (Bendtsen, Grüneberg, Movers, Hitzig, De Wette, *Einl.* § 323). Others again have maintained that the Greek is the original text (Eichhorn, *Einl.* 388 ff.; Bertholdt, *Einl.* 1757; Hävernick, ap. De Wette, *l. c.*). The truth appears to lie between these two extremes. The two divisions of the book are distinguished by marked peculiarities of style and language. The Hebraic character of the first part (i.–iii. 8) is such as to mark it as a translation and not as the work of a Hebraizing Greek: *e. g.* . 14, 15, 22, ii. 4, 9, 25, iii. 8; and several obscurities seem to be mistranslations: *e. g.* i. 2, 8, ii. 18, 29. The second part, on the other hand, which is written with greater freedom and vigor, closely approaches the Alexandrine type. And the imitations of Jeremiah and Daniel which occur throughout the first part (cf. i. 15–18 = Dan. ix. 7–10; ii. 1, 2 = Dan. ix. 12, 13; ii. 7–19 = Dan. ix. 13–18) give place to the tone and imagery of the Psalms and Isaiah.

5. The most probable explanation of this contrast is gained by supposing that some one thoroughly conversant with the Alexandrine translation of Jeremiah, perhaps the translator himself (Hitzig, Fritzsche), found the Hebrew fragment which forms the basis of the book already attached to the writings of that prophet, and wrought it up into its present form. The peculiarities of language common to the LXX. translation of Jeremiah and the first part of Baruch seem too great to be accounted for in any other way (for instance the use of δεσμάτης, ἀποστολή, βόμβησις (βομβεῖν), ἀποικισμός, μάννα, ἀποστρέφειν (*neut.*), ἐργάζεσθαί τινι, ὄνομα ἐπικαλεῖσθαι ἐπί τινι), and the great discrepancy which exists between the Hebrew and Greek texts as to the arrangement of the later chapters of Jeremiah, increases the probability of such an addition having been made to the canonical prophecies. These verbal coincidences cease to exist in the second part, or become very rare; but this also is distinguished by characteristic words: *e. g.* ὁ αἰώνιος, ὁ ἅγιος, ἐπάγειν. At the same time the general unity (even in language, *e. g.* χαρμοσύνη) and coherence of the book in its present form point to the work of one man. (Fritzsche, *Einl.* § 5; Hitzig, *Psalm.* ii. 119; Ewald, *Gesch. d. Volkes Isr.* iv. 232 n.) Bertholdt appears to be quite in error (*Einl.* 1743, 1762) in assigning iii. 1–8 to a separate writer (De Wette, *Einl.* § 322).

6. There are no certain data by which to fix the time of the composition of Baruch. Ewald (*l. c.* p. 230 ff.) assigns it to the close of the Persian period; and this may be true as far as the Hebrew portion is concerned; but the present book must be placed considerably later, probably about the time of the war of liberation (c. B. C. 160), or somewhat earlier.

7 *The Epistle of Jeremiah*, which, according to the authority of some Greek MSS., stands in the English version as the 6th chapter of Baruch, is the work of a later period. It consists of a rhetorical declamation against idols (comp. Jer. x. xxix.) in the form of a letter addressed by Jeremiah "to them which were to be led captive to Babylon." The letter is divided into clauses by the repetition of a common burden: *they are no gods; fear them not* (vv. 16, 23, 29, 66); *how can a man think or say that they are gods?* (vv. 40, 44, 56, 64). The condition of the text is closely analogous to that of Baruch; and the letter found the same partial reception in the Church. The author shows an intimate acquaintance with idolatrous worship, and this circumstance, combined with the purity of the Hellenistic dialect, points to Egypt as the country in which the epistle was written. There is no positive evidence to fix its date, for the supposed reference in 2 Macc. ii. 2 is more than uncertain; but it may be assigned with probability to the first century B. C.

8. A Syriac first Epistle of Baruch "to the nine and a half tribes" (comp. 2 Esdr. xiii. 40, Vers. Arab.) is found in the London and Paris Polyglotts. This is made up of commonplaces of warning, encouragement, and exhortation. Fritzsche (*Einl.* § 8) [with whom Davidson agrees (*Introd. to the O. T.* iii. 424)] considers it to be the production of a Syrian monk. It is not found in any other language. Whiston (*A Collection of Authentic Records*, &c. London, 1727, i. 1 ff., 25 ff.) endeavored to maintain the canonicity of this epistle as well as that of the Book of Baruch.

B. F. W.

* The "First Epistle of Baruch" has also been published in Lagarde's *Libri Vet. Test. Apocr. Syriace*, Berl. 1861, and a Latin translation (taken from the London Polyglott) may be found in Fabricius's *Cod. pseudepigr. V. T.*, ii. 145 ff. Ginsburg, in the 3d ed. of Kitto's *Cyclop. of Bibl. Lit.*, gives a full analysis of the epistle, and expresses his surprise that this "interesting relic" of antiquity has been so unjustly neglected. He supposes it to have been written by a Jew about the middle of the second century B. C.

A.

BAR'ZELAI [3 syl.], 1 Esdr. v. 38, marg [but BERZELUS in the text. See ADDUS].

BARZIL'LAI [3 syl.] (בַּרְזִלַּי, *iron*: Βερζελλί [Vat. Alex. -λει; in Ezr., Βερζελλαί, etc.; in Neh., Alex. Βερζελλαΐ]: *Berzellai*). 1. A wealthy Gileadite who showed hospitality to David when he fled from Absalom (2 Sam. xvii. 27). On the score of his age, and probably from a feeling of independence, he declined the king's offer of ending his days at court (2 Sam. xix. 32–39). David before his death recommended his sons to the kindness of Solomon (1 K. ii. 7). [The descendants of his daughter, who married into a priestly family, were unable, after the Captivity, to prove their genealogy (Ezr. ii. 61; Neh. vii. 63 See 1 Esdr. v. 38).]

2. A Meholathite, whose son Adriel married Michal, Saul's daughter (2 Sam. xxi. 8).

R. W. B.

BAS'ALOTH (Βασαλέμ; [Alex. Βασλωθ [Ald. Βασαλέθ:] *Phasaleth*) 1 Esdr. v. 31 [BAZLITH.]

BAS'CAMA (ἡ Βασκεμα: Jos. Βασκά: *Basama*), a place in Gilead (εἰς τὴν Γαλααδῖτιν) where Jonathan Maccabæus was killed by Trypho, and

Digitized by Google

from which his bones were afterwards disinterred and conveyed to Modin by his brother Simon (1 Macc. xiii. 23; Joseph. *Ant.* xiii. 6, § 6). No trace of the name has yet been discovered. G.

BA'SHAN (almost invariably with the definite article, הַבָּשָׁן: Βασάν: *Basan*), a district on the east of Jordan. It is not, like Argob and other districts of Palestine, distinguished by one constant designation, but is sometimes spoken of as the "land of Bashan" (אֶרֶץ הַבָּשָׁן, 1 Chr. v. 11; and comp. Num. xxi. 33, xxxii. 33), and sometimes as "all Bashan" (כָּל־הַבָּשָׁן; Deut. iii. 10, 13; Josh. xii. 5, xiii. 12, 30), but most commonly without any addition. It was taken by the children of Israel after their conquest of the land of Sihon from Arnon to Jabbok. They "turned" from their road over Jordan and "went up by the way of Bashan" — probably by very much the same route as that now followed by the pilgrims of the Hájj and by the Romans before them — to Edrei on the western edge of the *Lejah*. [EDREI.] Here they encountered Og king of Bashan, who "came out" probably from the natural fastnesses of Argob, only to meet the entire destruction of himself, his sons, and all his people (Num. xxi. 33-35; Deut. iii. 1-3). Argob, with its 60 strongly fortified cities, evidently formed a principal portion of Bashan (Deut. iii. 4, 5), though still only a portion (13), there being besides a large number of unwalled towns (5). Its chief cities were Ashtaroth (*i. e.* Beeshterah, comp. Josh. xxi. 27 with 1 Chr. vi. 71), Edrei, Golan, Salcah, and possibly Mahanaim (Josh. xiii. 30). Two of these cities, namely, Golan and Beeshterah, were allotted to the Levites of the family of Gershom, the former as a "city of refuge" (Josh. xxi. 27; 1 Chr. vi. 71).

The limits of Bashan are very strictly defined. It extended from the "border of Gilead" on the south to Mount Hermon on the north (Deut. iii. 3, 10, 14; Josh. xii. 5; 1 Chr. v. 23), and from the Arabah or Jordan valley on the west to Salchah (*Sulkhad*) and the border of the Geshurites, and the Maacathites on the east (Josh. xii. 3-5; Deut. iii. 10). This important district was bestowed on the half-tribe of Manasseh (Josh. xiii. 29-31), together with "half Gilead." After the Manassites had assisted their brethren in the conquest of the country west of the Jordan, they went to their tents and to their cattle in the possession which Moses had given them in Bashan (xxii. 7, 8). It is just named in the list of Solomon's commissariat districts (1 K. iv. 13). And here, with the exception of one more passing glimpse, closes the history of Bashan as far as the Bible is concerned. It vanishes from our view until we meet with it as being devastated by Hazael in the reign of Jehu (2 K. x. 33). True the "oaks" of its forests and the wild cattle of its pastures — the "strong bulls of Bashan" — long retained their proverbial fame (Ez. xxvii. 6; Ps. xxii. 12), and the beauty of its high downs and wide sweeping plains could not but strike now and then the heart of a poet (Am. iv. 1; Ps. lxviii. 15; Jer. l. 19; Mic. vii. 14), but history it has none; its very name seems to have given place as quickly as possible to one which had a connection with the story of the founder of the nation (Gen. xxxi. 47-48), and therefore more claim to use. Even so early as the time of the conquest, "Gilead" seems to have begun to take the first place as the designation of the country beyond the Jordan, a place which it retained afterwards to the exclusion of Bashan (comp. Josh. xxii. 9, 15, 32; Judg. xx. 1; Ps. lx. 7, cviii. 8; 1 Chr. xxvii. 21 2 K. xv. 29). Indeed "Bashan" is most frequently used as a mere accompaniment to the name of Og, when his overthrow is alluded to in the national poetry.

After the Captivity, Bashan is mentioned as divided into four provinces — Gaulanitis, Auranitis, Trachonitis, and Batanæa. Of these four, all but the third have retained almost perfectly their ancient names, the modern *Lejah* alone having superseded the Argob and Trachonitis of the Old and New Testaments. The province of *Jaulan* is the most western of the four; it abuts on the sea of Galilee and the lake of Merom, from the former of which it rises to a plateau nearly 3000 feet above the surface of the water. This plateau, though now almost wholly uncultivated, is of a rich soil, and its N. W. portion rises into a range of hills almost everywhere clothed with oak forests (Porter, ii. 259). No less than 127 ruined villages are scattered over its surface. [GOLAN.]

The *Hauran* is to the S. E. of the last named province and S. of the *Lejah*; like *Jaulan*, its surface is perfectly flat, and its soil esteemed amongst the most fertile in Syria. It too contains an immense number of ruined towns, and also many inhabited villages. [HAURAN.]

The contrast which the rocky intricacies of the *Lejah* present to the rich and flat plains of the Hauran and the *Jaulan* has already been noticed. [ARGOB.]

The remaining district, though no doubt much smaller in extent than the ancient Bashan, still retains its name, modified by a change frequent in the Oriental languages. *Ard-el-Bathanyeh* lies on the east of the *Lejah* and the north of the range of *Jebel Hauran* or *ed Druze* (Porter, ii. 57). It is a mountainous district of the most picturesque character, abounding with forests of evergreen oak, and with soil extremely rich; the surface studded with towns of very remote antiquity, deserted it is true, but yet standing almost as perfect as the day they were built.

For the boundaries and characteristics of these provinces, and the most complete researches yet published into this interesting portion of Palestine, see Porter's *Damascus*, vol. ii. [and his *Giant Cities of Bashan*, 1860]. G.

* We have a valuable work for information concerning some parts of Bashan in the *Reisebericht üb. Hauran u. die Trachonen* by Dr. John Wetzstein, Prussian Consul at Damascus (Berlin, 1860). He explored especially that region of almost fabulous wonders, *El-Lejah*, the supposed ARGOB, and by his testimony fully confirms the accounts of other travellers. An excellent map (drawn by Kiepert) accompanies the book, showing, in addition to the names of places, the roads ancient and modern and various geographical features, as *Wadys* or valleys, streams, lakes, and mountains. He paid special attention to the inscriptions (Semitic, Greek, and Latin) found there in great numbers, some of which are copied in this volume. It contains also illustrations (woodcuts) of the architectural remains of this district.

It should be mentioned that Dr. Wetzstein dissents from the view of the great body of scholars that *El-Lejah* (his orthography is *Legâ*) is the Argob of Scripture. His reasons for doing so are mainly negative in their character, and are outweighed by

Digitized by Google

those on the other side. He thinks the country could never have been subjugated by the Hebrews. He states as proof of the inaccessibility and strength of this almost impregnable position that Ibrahim Pasha, whose armies made Constantinople itself tremble, in 1838 stormed the place defended by only 5000 men for 6 months, sacrificed 20,000 regular troops, and was obliged at last to withdraw, wholly baffled in his attempt. But the Bible represents the conquests of Moses on the east of the Jordan as confessedly extraordinary (Deut. xxxi. 4: Josh. ii. 10, ix. 10. &c.). If it be necessary to insist on that consideration, we must say that the success of the Hebrew arms could not be doubtful in a warfare in which they stood under a leadership guided and upheld by divine cooperation. He argues also that the territory conquered by the Hebrews on the east of the Jordan could not have included the present *El-Lejah*, and hence that Argob must be sought elsewhere. But the boundaries of the Hebrew territory beyond the Jordan are vaguely described: they were not the same at all periods, and it is going beyond our knowledge to affirm that they could not at the time of the first Hebrew invasion have embraced the region of Argob. For the positive grounds on which the identification of *El-Lejah* with Argob rests, see under ARGOB and CHEBEL.

The Prussian Consul mentions a striking fact in illustration of the fertility of the country assigned to Reuben, Gad, and the half-tribe of Manasseh, and of its adaptation to the wants of a nomadic and pastoral people such as many of these Hebrews were (Num. xxxii. 1–5, 33). He says (*Reisebericht*, p. 82) that the provinces there of *Kanêtra* and *Golân* are the best watered and richest for pasturage not only of Perœa but of all Syria; so that the wandering tribes of nomads alone feed there more than 300,000 camels six months in the year; while, as ascertained from the bureau of tax-registration at Damascus, 42 other Bedouin tribes range there (*nomadisiren*) during the *entire* year. Hence the agricultural population have for centuries been driven away and the cities once found in that quarter lie now in ruins. H.

BA'SHAN-HA'VOTH-JA'IR, a name given to Argob after its conquest by Jair (Deut. iii. 14). [HAVOTH-JAIR.]

BASH'EMATH, or BAS'MATH (בָּשְׂמַת, *fragrant*: Βασεμάθ [etc.]: *Basemath*). 1. Daughter of Ishmael, the last married of the three wives of Esau (Gen. xxxvi. 3, 4, 13), from whose son, Reuel, four tribes of the Edomites were descended. When first mentioned she is called Mahalath (Gen. xxviii. 9); whilst, on the other hand, the name Bashemath is in the narrative (Gen. xxvi. 34) given to another of Esau's wives, the daughter of Elon the Hittite. It is remarkable that all Esau's wives receive different names in the genealogical table of the Edomites (Gen. xxxvi.) from those by which they have been previously mentioned in the history. The diversity will be best seen by placing the names side by side: —

Genealogy (Gen. xxxvi. 2, 3).	Narrative (Gen. xxvi. 34; xxviii. 9).
1. Adah, d. of Elon.	2. Bashemath, d. of Elon.
2. Aholibamah, d. of Anah.	1. Judith, d. of Beeri.
3. Bashemath, d. of Ishmael.	3. Mahalath, d. of Ishmael.

Whatever be the explanation of this diversity of names, there is every reason for supposing that they refer to the same persons respectively; and we may well conclude with Hengstenberg that the change of all the names cannot have arisen from accident and further, that the names in the genealogical table, which is essentially an Edomitish document, are those which these women respectively bore as the wives of Esau (Hengstenberg, *Auth. d. Pent.* ii 277, Eng. transl. ii. 226). This view is confirmed by the fact that the Seirite wife, who is called Judith in the narrative, appears in the genealogical account under the name of AHOLIBAMAH, a name which appears to have belonged to a district of Idumea (Gen. xxxvi. 41). The only ground for hesitation or suspicion of error in the text is the occurrence of this name Bashemath both in the narrative and the genealogy, though applied to different persons. The Samaritan text seeks to remove this difficulty by reading Mahalath instead of Bashemath in the genealogy. We might with more probability suppose that this name (Bashemath) has been assigned to the wrong person in one or other of the passages; but if so it is impossible to determine which is erroneous.

2. [Βασεμμάθ; Alex. Μασεμαθ.] A daughter of Solomon and wife of one of his officers, called in A. V. BASMATH (1 K. iv. 15). F. W. G.

* According to the Masoretic pointing, the name in English in all the passages should be Basemath; for the sibilant is שׂ and not שׁ. The Bishops' Bible has Basemath, except in 1 K. iv. 15, where it is Basmath, as in A. V. H.

BASIN. (1.) מִזְרָק: φιάλη: *phiala*; from זָרַק, *to scatter* (Ges. p. 434); often in A. V. *bowl*. (2.) אַגָּן: κρατήρ: *crater*. (3.) כְּפוֹר: *crater*; in A. V. sometimes *cup*, from כָּפַר, *cover*, a cup with a lid. (4.) סַף, wrongly in LXX. (Ex. xii. 22) θύρα, and in Vulg. *limen* (Ges. p. 965)

1. Between the various vessels bearing in the A. V. the names of basin, bowl, charger, cup and dish, it is scarcely possible now to ascertain the precise distinction, as very few, if any remains are known up to the present time to exist of Jewish earthen or metal ware, and as the same words are variously rendered in different places. We can only conjecture as to their form and material from the analogy of ancient Egyptian or Assyrian specimens of works of the same kind, and from modern Oriental vessels for culinary or domestic purposes. Among the smaller vessels for the Tabernacle or Temple-service, many must have been required to receive from the sacrificial victims the blood to be sprinkled for purification. Moses, on the occasion of the great ceremony of purification in the wilderness, put half the blood in "the basins" (מִזְרָקֹת, or bowls, and afterwards sprinkled it on the people (Ex. xxiv. 6, 8, xxix. 21; Lev. i. 5, 15, iii. 2, 8, 13, iv. 5, 34, viii. 23, 24, xiv. 14, 25, xvi. 15, 19, Heb. ix. 19). Among the vessels cast in metal, whether gold, silver, or brass, by Hiram for Solomon besides the laver and great sea, mention is made of basins, bowls, and cups. Of the first (מִזְרָקִים, marg. *bowls*) he is said to have made 100 (2 Chr iv. 8; 1 K. vii. 45, 46. Cf. Ex. xxv. 29 and 1 Chr xxviii. 14, 17). Josephus, probably with great exaggeration, reckons of φιάλαι and σπονδεῖα, 20,000 in gold and 40,000 in silver, besides an equal number in each metal of κρατῆρες, for the

Digitized by Google

offerings of flour mixed with oil (*Ant.* viii. 3 §§ 7, 8. Comp. Birch, *Hist. of Pottery*, i. 102).

2. The "basin" from which our Lord washed the disciples' feet, νιπτήρ, was probably deeper and larger than the hand-basin for sprinkling, סִיר (Jer. lii. 18), which, in A. V. "caldrons," Vulg. *lebetes*, is by the Syr. rendered basins for washing the feet (John xiii. 5). (Schleusner, Drusius.) [WASHING OF FEET AND HANDS.]

H. W. P.

BASKET. The Hebrew terms used in the description of this article are as follows: (1.) סַל, so called from the *twigs* of which it was originally made, specially used as the Greek κανοῦν (Hom. *Od.* iii. 442), and the Latin *canistrum* (Virg. *Æn.* i. 701) for holding bread (Gen xl. 16 ff.; Ex. xxix. 3, 23; Lev. viii. 2, 26, 31; Num. vi. 15, 17, 19). The form of the Egyptian bread-basket is delineated in Wilkinson's *Anc. Egypt.* iii. 22?, after the specimens represented in the tomb of Rameses III.

Egyptian Baskets. (From Wilkinson.)

These were made of gold (comp. Hom. *Od.* x. 355), and we must assume that the term *sal* passed from its strict etymological meaning to any vessel applied to the purpose. In Judg. vi. 19, meat is served up in a *sal*, which could hardly have been of wicker-work. The expression סַלֵּי חֹרִי (Gen. xl. 16) is sometimes referred to the material of which the baskets were made (καναῖ βαΐνιναι, Symm.), or the white color of the peeled sticks, or lastly to their being "full of holes" (A. V. margin), *i. e. open work* baskets. (2.) סַלְסִלּוֹת, a word of kindred origin, applied to the basket used in gathering grapes (Jer. vi. 9). (3.) סַנְאָה, in which the first

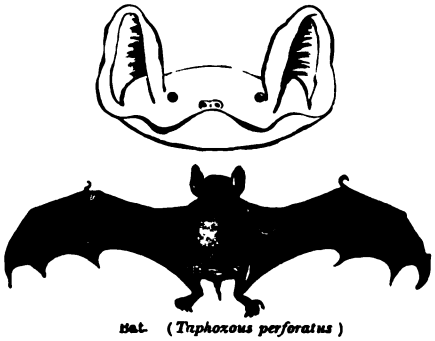
Egyptian Baskets. (From Wilkinson.)

fruits of the harvest were presented (Deut. xxvi. 2, 4). From its being coupled with the kneading-bowl (A. V. "store"; Deut. xxviii 5, 17), we may infer that it was also used for household purposes, perhaps to bring the corn to the mill. The equivalent term in the LXX. for this and the preceding Hebrew words is κάραλλος, which specifically means a basket that tapers downwards (κόφινος ὀξὺς τὰ κάτω, Suid.), similar to the Roman *corbis* This shape of basket appears to have been familiar to the Egyptians (Wilkinson, ii. 401). (4.) כְּלוּב, so called from its similarity to a bird-cage or trap (κάραλλος is used in the latter sense in Ecclus. xi. 30), probably in regard to its having a lid: it was used for carrying fruit (Am. viii. 1, 2); the LXX. gives ἄγγος; Symm. more correctly κάλαθος; the Vulg. *uncinus*. (5.) דּוּד, used like the Greek κάλαθος (LXX.) for carrying fruit (Jer. xxiv. 1, 2), as well as on a larger scale for carrying clay to the brick-yard (Ps. lxxxi. 6; κόφινος, LXX.; *pots*, A. V.), or for holding bulky articles (2 K. x. 7; κάραλλος, LXX.): the shape of this basket and the mode of carrying it usual among the brick-makers in Egypt is delineated in Wilkinson, ii. 99, and aptly illustrates Ps. lxxxi. 6.

The name Sallai (Neh. xi. 8, xii. 20) seems to indicate that the manufacture of baskets was a recognized trade among the Hebrews.

In the N. T baskets are described under the three following terms, κόφινος, σπυρίς, and σαργάνη. The last occurs only in 2 Cor. xi. 33, in describing St. Paul's escape from Damascus: the word properly refers to anything twisted like a rope (Æsch. *Suppl.* 791) or any article woven of rope (πλέγμα τι ἐκ σχοινίου, Suid.); fish-baskets specially were so made (ἀπὸ σχοινίου πλεγμάτιον εἰς ὑποδοχὴν ἰχθύων, Etym. Mag.). With regard to the two former words, it may be remarked that κόφινος is exclusively used in the description of the miracle of feeding the five thousand (Matt. xiv. 20, xvi. 9; Mark vi. 43; Luke ix. 17; John vi. 13), and σπυρίς in that of the four thousand (Matt. xv. 37; Mark viii. 8); the distinction is most definitely brought out in Mark viii. 19, 20. The σπυρίς is also mentioned as the means of St. Paul's escape (Acts ix. 25). The difference between these two kinds of baskets is not very apparent. Their construction appears to have been the same; for κόφινος is explained by Suidas as ἀγγεῖον πλεκτόν, while σπυρίς is generally connected with σπεῖρα. The σπυρίς (*sporta*, Vulg.) seems to have been most appropriately used of the provision basket, the Roman *sportula*. Hesychius explains it as τὸ τῶν πυρῶν ἄγγος; compare also the expression δεῖπνον ἀπὸ σπυρίδος (Athen. viii. 17). The κόφινος seems to have been generally larger. According to Etym. Mag. it is βαθὺ καὶ κοῖλον χώρημα; as used by the Romans (Colum. xi. 3, p. 460) it contained manure enough to make a portable hot-bed [*Dict. of Ant.*, COPHINUS]: in Rome itself it was constantly carried about by the Jews (*quorum cophinus fenumque supellex*, Juv. iii. 14, vi. 542 Greswell (*Diss.* viii. pt. 4) surmises that the use of the *cophinus* was to sleep in, but there is little to support this.

W. L. B.



BAS'MATH (בָּשְׂמַת [*fragrant*]: ἡ Βασεμμάθ [Alex. Μασεμαθ]: *Basemath*), a daughter of Solomon, married to Ahimaaz, one of his commissariat officers (1 K. iv. 15). [BASHEMATH.]

BAS'SA (Βασσαί; Alex. [Ald.] Βάσσα: Vulg not recognizable), 1 Esdr. v. 16. [BEZAI.]

BAS'TAI [2 syl.] (Βασθαΐ: *Hastan*), 1 Esdr v. 13. [BESAI.]

BAT (עֲטַלֵּף, *'atallêph*: νυκτερίς: *vesper tilio*). There is no doubt whatever that the A V

is correct in its rendering of this word: the derivation of the Hebrew name,[a] the authority of the old versions, which are all agreed upon the point,[b] and the context of the passages where the Hebrew word occurs, are conclusive as to the meaning. It is true that in the A. V. of Lev. xi. 19, and Deut. xiv. 18, the *'atalléph* closes the lists of "*fowls* that shall not be eaten;" but it must be remembered that the ancients considered the bat to partake of the nature of a bird, and the Hebrew *óph*, "fowls,"

Bat. (*Taphozous perforatus*)

which literally means "a wing," might be applied to any winged creature: indeed this seems clear from Lev. xi. 20, where, immediately after the *'atalléph* is mentioned, the following words, which were doubtless suggested by this name, occur: "All fowls that creep, going upon all four, shall be an abomination unto you." Besides the passages cited above, mention of the bat occurs in Is. ii. 20: "In that day a man shall cast his idols of silver and his idols of gold to the moles and to the bats:" and in Baruch vi. 22 [or Epist. of Jer. 22], in the passage that so graphically sets forth the vanity of the Babylonish idols: "Their faces are blacked through the smoke that cometh out of the temple; upon their bodies and heads sit *bats*, swallows, and birds, and the cats also."

Bat. (*Rhinolophus tridens.*)

Bats delight to take up their abode in caverns and dark places. Several species of these animals are found in Egypt, some of which occur doubtless in Palestine. *Molossus Ruppellii*, *Vespertilio pipistrellus* var. *Ægyptius*, *V. auritus* var. *Ægypt.* *Taphozous perforatus*, *Nycteris Thebaica*, *Rhinopoma microphyllum*, *Rhinolophus tridens*, occur in the tombs and pyramids of Egypt.

Many travellers have noticed the immense numbers of bats that are found in caverns in the East, and Layard says that on the occasion of a visit to a cavern these noisome beasts compelled him to retreat (*Nineveh and Babylon*, p. 307). To this day these animals find a congenial lurking abode "amidst the remains of idols and the sculptured representations of idolatrous practices" (*Script. Nat. H.* p. 8): thus forcibly attesting the meaning of the prophet Isaiah's words. Bats belong to the order *Cheiroptera*, class *Mammalia*. W. H.

BASTARD. Among those who were excluded from entering the congregation, that is, from intermarrying with pure Hebrews (Selden, *Table Talk*, s. v. "Bastard"), even to the tenth generation, was the *mamzér* (מַמְזֵר, A. V. "bastard"), who was classed in this respect with the Ammonite and Moabite (Deut. xxiii. 2). The term is not, however, applied to any illegitimate offspring, born out of wedlock, but is restricted by the Rabbins to the issue of any connection within the degrees prohibited by the Law. A *mamzér*, according to the Mishna (*Yebamoth*, iv. 13), is one, says R. Akiba, who is born of relations between whom marriage is forbidden. Simeon the Temanite says, it is every one whose parents are liable to the punishment of "cutting off" by the hands of Heaven; R. Joshua, every one whose parents are liable to death by the house of judgment, as, for instance, the offspring of adultery. The ancient versions (LXX., Vulg., Syr.), add another class, the children of a harlot, and in this sense the term *mamzer* or *manser* survived in Pontifical law (Selden, *De Succ. in Bon. Defunct.*, c. iii.):

"Manseribus scortum, sed mocha nothis dedit ortum"

The child of a *goi*, or non-Israelite, and a *mamzér* was also reckoned by the Talmudists a *mamzér*, as was the issue of a slave and a *mamzér*, and of a *mamzér* and female proselyte. The term also occurs in Zech. ix. 6, "a bastard shall dwell in Ashdod," where it seems to denote a foreign race of mixed and spurious birth. Dr. Geiger infers from this passage that *mamzér* specially signifies the issue of such marriages between the Jews and the women of Ashdod as are alluded to in Neh. xiii. 23, 24, and applies it exclusively to the Philistine bastard. W. A. W.

BATH, BATHING. This was a prescribed part of the Jewish ritual of purification in cases of accidental, leprous, or ordinary uncleanness (Lev. xv. *pass.*, xvi. 28, xxii. 6; Num. xix. 7, 19; 2 Sam. xi. 2, 4; 2 K. v. 10); as also after mourning which always implied defilement, e. g. Ruth iii. 3; 2 Sam. xii. 20. The high-priest at his inauguration (Lev. xiii. 6) and on the day of atonement, once before each solemn act of propitiation (xvi. 4, 24), was also to bathe. This the rabbis have multiplied into *ten* times on that day. Maimon. (*Constit. de Vasis Sanct.* v. 3) gives rules for the strict privacy of the

[a] From עָטַל = غطل (*ghatal*), "the night was dark," and עוּף "flying": νυκτερίς, from νύξ, "night": *vespertilio*, from "vesper," the evening. *Bat*, perhaps, from *blatta*, *blacta* (see Wedgwood, *Diet Engl. Etymol.*).

[b] With the exception of the Syriac, which has طَوْسَا (*t'vaso*), "a peacock."

Digitized by Google

high-priest in bathing. There were bath-rooms in the later Temple over the chambers *Abtines* and *Happarvah* for the priests use (Lightfoot, *Descr. of Temp.* p. 24). A bathing-chamber was probably included in houses even of no great rank in cities from early times (2 Sam. xi. 2); much more in those of the wealthy in later times; often in gardens (Susan. 15). With this, anointing was customarily joined; the climate making both these essential alike to health and pleasure, to which luxury added the use of perfumes (Susan. 17; Jud. x. 3; Esth. ii. 12). The "pools," such as that of Siloam, and Hezekiah's (Neh. iii. 15, 16; 2 K. xx. 20; Is. xxii. 11; John ix. 7), often sheltered by porticoes (John v. 2), are the first indications we have of public bathing accommodation. Ever since the time of Jason (Prideaux, ii. 168) the Greek usages of the bath probably prevailed, and an allusion in Josephus (λουσόμενος στρατιωτικώτερον, *B. J.* i. 17, § 7) seems to imply the use of the bath (hence, no doubt, a public one, as in Rome) by legionary soldiers. We read also of a castle luxuriously provided with a volume of water in its court, and of a Herodian palace with spacious pools adjoining, in which the guests continued swimming, &c. in very hot weather from noon till dark (Joseph. *Ant.* xii. 4, § 11, xv. 3, § 3). The hot baths of Tiberias, or more strictly of Emmaus (Euseb. *Onomast.* Αἰθάμ, query Αἰμάθ? Bonfrerius) near it, and of Callirrhoe, near the Eastern shore of the Dead Sea, were much resorted to. (Reland, i. 46; Joseph. *Ant.* xviii. 2, xvii. 6, § 5, *B. J.* i. 33, § 5; Amm. Marcell. xiv. 8; Stanley, 373, 295.) The parallel customs of ancient Egypt, Greece, and Rome, are too well known to need special allusion. (See *Dict. of Gr. and Rom. Ant.*, art. *Balneæ*). H. H.

* The N. T. passages should be noticed. In John xiii. 10 (where λελουμένος is opposed to νίψασθαι) there is an unquestioned reference to the practice of bathing, especially before partaking of the Passover meal. For λουτρόν in Eph. v. 26 and Tit. iii. 5, variously rendered as "bath" or "bathing," see BAPTISM IV. 3, 4; and Meyer and Ellicott on those passages. Whether βαπτίσωνται in Mark vii. 4 refers to bathing the body after coming from market (De Wette, Meyer), or washing by immersion what has been purchased and brought from market (Lange, Bleek), is a point about which interpreters differ. As to the means for bathing which the Jews anciently possessed in the tanks and reservoirs within and around Jerusalem, and which to some extent the inhabitants of that city possess at present, see *Waters*, under JERUSALEM. The traveller in the East finds the synagogues of the modern Jews, *e. g.* those at *Safed* in Galilee, furnished with large bathing rooms for the performance of the washings which they practice in connection with their worship. The synagogues at Jerusalem have a similar arrangement. H.

BATH. [MEASURES.]

BATH-RAB'BIM, THE GATE OF (שַׁעַר בַּת־רַבִּים), one of the gates of the ancient city of Heshbon, by (עַל) which were two "pools,"[a] whereto Solomon likens the eyes of his beloved (Cant. vii. 4 [5]). The "Gate of Bath-rabbim" at Heshbon would, according to the Oriental custom, be the gate pointing to a town of that name. The only place in this neighborhood at all resembling Bath-rabbim in sound is Rabbah (*Ammân*), but the one tank of which we gain any intelligence as remaining at *Heshân*, is on the opposite (S.) side[b] of the town to *Ammân* (Porter, *Handbook*, p. 298). Future investigations may settle this point. The LXX. and Vulg. translate: ἐν πύλαις θυγατρὸς πολλῶν; *in portâ filiæ multitudinis.* G.

BATH'SHEBA [*rather* Bath-she'ba] (בַּת־שֶׁבַע, 2 Sam. xi. 3, &c.; also called Bath-shua, בַּת־שׁוּעַ, in 1 Chr. iii. 5: Βηρσαβεέ; [Alex. Βηθσαβεε in 2 Sam. and 1 K. i. 11;] Joseph. Βεεθσαβή: [*Bethsabee;*] i. e. *daughter of an oath*, or, *daughter of seven*, sc. *years*), the daughter of Eliam (2 Sam. xi. 3), or Ammiel (1 Chr. iii. 5), the wife of Ahithophel (2 Sam. xxiii. 34), the wife of Uriah the Hittite. It is probable that the enmity of Ahithophel towards David was increased, if not caused, by the dishonor brought by him upon his family in the person of Bathsheba. The child which was the fruit of her adulterous intercourse with David died: but after marriage she became the mother of four sons, Solomon (Matt. i. 6), Shimea, Shobab, and Nathan. When, in David's old age, Adonijah, an elder son by Haggith, attempted to set aside in his own favor the succession promised to Solomon, Bathsheba was employed by Nathan to inform the king of the conspiracy (1 K. i. 11, 15, 23). After the accession of Solomon, she, as queen-mother, requested permission of her son for Adonijah to take in marriage Abishag the Shunammite. This permission was refused, and became the occasion of the execution of Adonijah (1 K. ii. 24, 25). [DAVID.] Bathsheba was said by Jewish tradition to have composed and recited Prov. xxxi. by way of admonition or reproof to her son Solomon, on his marriage with Pharaoh's daughter. Calmet, *Dict.* s. v.; Corn. a Lapid. *on Prov.* xxxi. H. W. P.

BATH-SHU'A (בַּת־שׁוּעַ [*daughter of an oath*]: Vat. and Alex. η Βηρσαβεε: *Bethsabee*), a variation of the name of Bathsheba, mother of Solomon, occurring only in 1 Chr. iii. 5. It is perhaps worth notice that Shua was a Canaanite name (comp. 1 Chr. ii. 3, and Gen. xxxviii. 2, 12 — where "Bath-shua" is really the name of Judah's wife), while Bathsheba's original husband was a Hittite.

BATH-ZACHARI'AS (quasi בֵּית זְכַרְיָה [*house of Z.*]: Βαιθζαχαρία; Alex. and Joseph. Βεθζαχαρία: *Bethzachara*), a place, named only 1 Macc. vi. 32, 33, to which Judas Maccabæus marched from Jerusalem, and where he encamped for the relief of Bethsura (Bethzur) when the latter was besieged by Antiochus Eupator. The two places were seventy stadia apart (Joseph. *Ant.* xii. 9, § 4), and the approaches to Bathzacharia were intricate and confined — στενῆς οὔσης τῆς παρόδου (Joseph. *B. J.* i. 1, § 5, and comp. the passage cited above, from which it is evident that Josephus knew the spot). This description is met in every respect by the modern *Beit Sakâriyeh*, which has been discovered by Robinson at nine miles north of *Beit sûr*, "on an almost isolated promontory or

[a] The "fish-pools" of the A. V. is from *piscinæ* of the Vulg. The Hebrew word Berecah is simply a pool or tank.

[b] * Tristram (*Land of Israel*, p. 540) makes it bear southeast of *Heshân*. H

tell, jutting out between two deep valleys, and connected with the high ground south by a low neck between the heads of the valleys, the neck forming the only place of access to what must have been an almost impregnable position" (Rob. iii. 283, 284). The place lies in the entangled country west of the Hebron road, between four and five miles south of Bethlehem. [BETHZUR] G.

* **BATTLE-AXE** (Jer. li. 20). [AXE, 7; MAUL.]

* **BATTLEMENT.** [HOUSE.]

BA'VAI [2 syl.] (בָּוָי [of Persian origin, Ges.]: Βεβεί; [Vat. Βεδει; Comp. Βαβαΐ:] *Bavai*), son of Henadad, ruler (שַׂר) of the "district" (פֶּלֶךְ) of Keilah in the time of Nehemiah (Neh. iii. 18).

BAY-TREE (אֶזְרָח,[a] *ezrâch*: κέδρος τοῦ Λιβάνου: *cedrus Libani*). It is difficult to see upon what grounds the translators of the A. V. have understood the Hebrew word of Ps. xxxvii. 35 to signify a "bay-tree": such a rendering is entirely unsupported by any kind of evidence. Most of the Jewish doctors understand by the term *ezrâch* "a tree which grows in its own soil"—one that has never been transplanted; which is the interpretation given in the margin of the A. V. Some versions, as the Vulg. and the Arabic, follow the LXX., which reads "cedar of Lebanon," mistaking the Hebrew word for one of somewhat similar form.[b] Celsius (*Hierob.* i. 194) agrees with the author of the sixth Greek edition, which gives αὐτόχθων (*indigena*, "one born in the land") as the meaning of the Hebrew word: with this view Rabbi Solomon and Hammond (*Comment. on Ps.* xxxvii.) coincide. Dr. Royle (Kitto's *Cycl. Bib. Lit.* art. "Ezrach") suggests the Arabic *Ashruk*, which he says is described in Arabic works on Materia Medica as a tree having leaves like the *ghar* or "bay-tree." This opinion must be rejected as unsupported by any authority.

Perhaps no tree whatever is intended by the word *ezrâch*, which occurs in several passages of the Hebrew Bible, and signifies "a native," in contradistinction to "a stranger," or "a foreigner." Comp. Lev. xvi. 29: "Ye shall afflict your souls whether it be one of your own country (הָאֶזְרָח, *hâezrâch*) or a stranger that sojourneth among you." The epithet "green," as Celsius has observed, is by no means the only meaning of the Hebrew word; for the same word occurs in Dan. iv. 4, where Nebuchadnezzar uses it of himself: "I was *flourishing* in my palace." In all other passages where the word *ezrâch* occurs, it evidently is spoken of *a man* (Cels. *Hierob.* i. 196). In support of this view we may observe that the word translated "in great power"[c] more literally signifies "to be formidable," or "to cause terror," and that the word which the A. V. translates "spreading himself,"[d] more properly means to "make bare." The passage then might be thus paraphrased: "I have seen the wicked a terror to others, and behaving with barefaced audacity, just as some proud native of the land." In the Levitical Law the oppression of the stranger was strongly forbidden, perhaps therefore some reference to such acts of oppression is made in these words of the psalmist. W. H

BAZ'LITH (בַּצְלִית [*a stripping, nakedness*]). "Children of B." were amongst the NETHINIM who returned with Zerubbabel (Neh. vii. 54). In Ezr. ii. 52, the name is given as BAZLUTH (בַּצְלוּת [which means the same]). LXX. in both places Βασαλώθ; [but Vat. in Ezr. Βασαδαε, in Neh. Βασαωθ:] *Besluth*. [BASALOTH.]

BAZ'LUTH (בַּצְלוּת: Βασαλώθ; [Vat. Βασαδαε:] *Besluth*). BAZLITH (Ezr. ii. 52).

BDELLIUM (בְּדֹלַח, *bedôlach*: ἄνθραξ, κρύσταλλον: *bdellium*), a precious substance, the name of which occurs in Gen. ii. 12, with "gold" and "onyx stone," as one of the productions of the land of Havilah, and in Num. xi. 7, where *manna* is in color compared to *bdellium*. There are few subjects that have been more copiously discussed than this one, which relates to the nature of the article denoted by the Hebrew word *bedôlach*; and it must be confessed that notwithstanding the labor bestowed upon it, we are still as much in the dark as ever, for it is quite impossible to say whether *bedôlach* denotes a mineral, or an animal production, or a vegetable exudation. Some writers have supposed that the word should be written *berôlach* (*beryl*), instead of *bedôlach*, as Wahl (in *Descr. Asiæ*, p. 856) and Hartmann (*de Mulier. Hebraic.* iii. 96), but *beryl*, or *aqua marine*, which is only a pale variety of emerald, is out of the question, for the bdellium was white (Ex. xvi. 31, with Num. xi. 7), while the beryl is yellow or red, or faint blue; for the same reason the ἄνθραξ ("carbuncle") of the LXX. (in Gen. *l. c.*) must be rejected; while κρύσταλλον ("crystal") of the same version, which interpretation is adopted by Reland (*de Situ Paradisi*, § 12), is mere conjecture. The Greek, Venetian, and the Arabic versions, with some of the Jewish doctors, understand "pearls" to be intended by the Hebrew word; and this interpretation Bochart (*Hieroz.* iii. 592) and Gesenius accept; on the other hand the Gr. versions of Aquila, Theodotion, and Symmachus, Josephus (*Ant.* iii. 1, § 6), Salmasius (*Hyl. Iatri.* p. 181), Celsius (*Hierob.* i. 324), Sprengel (*Hist. Rei Herb.* i. 18, and *Comment. in Dioscor.* i. 80), and a few modern writers believe, with the A. V., that *bedôlach* = bdellium, *i. e.* an odoriferous exudation from a tree which is, according to Kæmpfer (*Amæn. Exot.* p. 668) the *Borassus flabelliformis*, Linn., of Arabia Felix; compare Pliny (*H. N.* xii. 9, § 19), where a full description of the tree and the gum is given. The aromatic gum, according to Dioscorides (i. 80) was called μάδελκον or βόλχον; and according to Pliny *brochon*, *malacha*, *maldacon*, names which seem to be allied to the Hebrew *bedôlach*. Plautus (*Curc.* i. 2, 7) uses the word *bdellium*.

As regards the theory which explains *bedôlach* by "pearls," it must be allowed that the evidence in its favor is very inconclusive; in the first place it assumes that Havilah is some spot on the Persian Gulf where pearls are found, a point however, which is fairly open to question; and secondly, it must be

[a] From זָרַח, *ortus est (Sol)*

[b] אֶרֶז.

[c] עָרִיץ.

[d] מִתְעָרֶה. See the Hebrew Lexicons, s. vv.

Digitized by Google

remembered that there are other Hebrew words for "pearls," namely, *Dar*,[a] and according to Bochart, *Peninim*,[b] though there is much doubt as to the meaning of this latter word.

The fact that *eben*, "a stone," is prefixed to *shóham*, "onyx," and not to *bedólach*, seems to exclude the latter from being a mineral; nor do we think it a sufficient objection to say "that such a production as bdellium is not valuable enough to be classed with gold and precious stones," for it would be easy to prove that resinous exudations were held in very high esteem by the ancients, both Jews and Gentiles; and it is more probable that the sacred historian should mention, as far as may be in a few words, the *varied* productions, vegetable as well as mineral, of the country of which he was speaking, rather than confine his remarks to its mineral treasures, and since there is a similarity of form between the Greek βδέλλιον, or μάδελκον, and the Hebrew *bedólach*, and as this opinion is well supported by authority, the balance of probabilities appears to us to be in favor of the translation of the A. V., though the point will probably always be left an open one.[c] W. H.

BEALI'AH (בְּעַלְיָה, remarkable as containing the names of both Baal and Jah: Βααλιά; [Vat. FA. Βαδαια; Alex. Βααδια:] *Bualia*;) a Benjamite, who went over to David at Ziklag (1 Chr. xii. 5).

BE'ALOTH (בְּעָלוֹת, the plur. fem. form of Baal: Βαλμαωθ; Alex. Βαλωθ: *Baloth*), a town in the extreme south of Judah (Josh. xv. 24).

BE'AN, CHILDREN [SONS] OF (*υἱοὶ Βαάν*; Joseph. *υἱοὶ τοῦ Βαάνου*: *filii Bean*), a tribe, apparently of predatory Bedouin habits, retreating into "towers" (πύργους) when not plundering, and who were destroyed by Judas Maccabæus (1 Macc. v. 4). The name has been supposed to be identical with BEON; but in the absence of more information this must remain mere conjecture, especially as it is very difficult to tell from the context whether the residence of this people was on the east or west of Jordan. G.

BEANS (פּוֹל,[d] *pól*: κύαμος: *faba*). There appears never to have been any doubt about the correctness of the translation of the Hebrew word. *Beans* are mentioned with various other things in 2 Sam. xvii. 28, as having been brought to David at the time of his flight from Absalom, and again in Ez. iv. 9, *beans* are mentioned with "barley, lentiles, millet, and fitches," which the prophet was ordered to put into one vessel to be made into bread. Pliny (*H. N.* xviii. 12) also states that beans were used for a similar purpose. Beans are cultivated in Palestine, which country grows many of the leguminous order of plants, such as lentils, kidney-beans, vetches, &c. Beans are in blossom in Palestine in January; they have been noticed in flower at Lydda on the 23d, and at Sidon and Acre even earlier (Kitto, *Phys. H. Palest.* 215); they continue in flower till March. In Egypt beans are sown in November and reaped in the middle of February; but in Syria the harvest is later. Dr. Kitto (*ibid.* 319) says that the "stalks are cut down with the scythe, and these are afterwards cut and crushed to fit them for the food of cattle; the beans when sent to market are often deprived of their skins by the action of two small mill-*stones* (if the phrase may be allowed) of clay dried in the sun." Dr. Shaw (*Travels*, i. 257, 8vo ed. 1808) says that in Northern Africa beans are usually full podded at the beginning of March, and continue during the whole spring; that they are "boiled and stewed with oil and garlic, and are the principal food of persons of all distinctions."

Herodotus (ii. 37) states that the Egyptian priests abhor the sight of beans, and consider them impure, and that the people do not sow this pulse at all, nor indeed eat what grows in their country; but a passage in Diodorus implies that the abstinence from this article of food was not general. The remark of Herodotus, therefore, requires limitation. The dislike which Pythagoras is said to have maintained for beans has been by some traced to the influence of the Egyptian priests with that philosopher (see Smith's *Dict. of Gr. and Rom. Biog.* art. "Pythagoras").

Hiller (*Hierophyt.* ii. 130), quoting from the *Mishna*, says that the high-priest of the Jews was not allowed to eat either eggs, cheese, flesh, bruised beans (*fabas fresas*), or lentils on the day before the sabbath.

The bean (*Vicia faba*) is too well known to need description; it is cultivated over a large portion of the old world from the north of Europe to the south of India; it belongs to the natural order of plants called *Leguminosæ*. W. H.

BEAR (דֹּב,[e] Heb. and Ch., or דּוֹב, *dôb*: ἄρκτος, ἄρκος, λύκος in Prov. xxviii. 15; μέριμνα Prov. xvii. 12, as if the word were דְּאָב: *ursus*, *ursa*). This is without doubt the Syrian bear (*Ursus Syriacus*), which to this day is met with occasionally in Palestine. Ehrenberg says that this bear is seen only on one part of the summit of Lebanon, called *Mackmel*, the other peak, *Gebel Sanin*, being strangely enough free from these animals. The Syrian bear is more of a frugivorous habit than the brown bear (*Ursus arctos*), but when pressed with hunger it is known to attack men and animals; it is very fond of a kind of chick-pea (*Cicer arietinus*), fields of which are often laid waste by its devastations. The excrement of the Syrian bear, which is termed in Arabic, *Bar-ed-dub*, is sold in Egypt and Syria as a remedy in ophthalmia; and the skin is of considerable value. Most recent writers are silent respecting any species of bear in Syria, such as Shaw, Volney, Hasselquist, Burckhardt, and Schulz. Seetzen, however, notices a report of the existence of a bear in the province of Hasbeiya on Mount Hermon. Kleder supposed this bear must be the *Ursus arctos*, for

[a] דַּר, Heb.; ﺩُﺭّ, Arab.

[b] פְּנִינִים.

[c] The derivation of בְּדֹלַח is doubtful. First's etymology from בָּדַל, *manare*, *fluere*, "to distill," from root דַּל or טַל (Greek βδάλλ-ειν) is in favor of the bdellium.

[d] פּוֹל, from פָּלַל, "to roll," in allusion to its form. Lat. *bulla*; Dutch, *bol*, "a bean." The Arabic word فُول, *fûl*, is identical. Gesen. *Thes.* s. v

[e] דֹּב, from דָּבַב, *lente incedere*; but Bochart conjectures an Arabic root = "to be hairy." Fosskâl (*Descr. Ara.* p. iv.) mentions the ﺩُﺏّ, *dubb*, amongst the Arabian fauna. Is this the *Ursus arctos*?

Digitized by Google

which opinion, however, he seems to have had no authority; and a recent writer, Dr. Thomson (*Land and Book*, p. 573), says that the Syrian bear is still found on the higher mountains of this country, and that the inhabitants of Hermon stand in great fear of him. Hemprich and Ehrenberg (*Symbolæ Phys.* pt. i.) inform us that during the summer months these bears keep to the snowy parts of Lebanon but descend in winter to the villages and gardens. It is probable also that at this period in former days they extended their visits to other

Syrian Bear (*Ursus Syriacus*).

parts of Palestine; for though this species was in ancient times far more numerous than it is now, yet the snowy summits of Lebanon were probably always the summer home of these animals.[a] Now we read in Scripture of bears being found in a wood between Jericho and Bethel (2 K. ii. 24); it is not improbable, therefore, that the destruction of the forty-two children who mocked Elisha took place some time in the winter, when these animals inhabited the low lands of Palestine.

The ferocity of the bear when deprived of its young is alluded to in 2 Sam. xvii. 8; Prov. xvii. 12; Hos. xiii. 8; its attacking flocks in 1 Sam. xvii. 34, &c.; its craftiness in ambush in Lam. iii. 10, and that it was a dangerous enemy to man we learn from Am. v. 19. The passage in Is. lix. 11, would be better translated, "we *groan* like bears," in allusion to the animal's plaintive groaning noise (see Bochart, *Hieroz.* ii. 135; and Hor. *Ep.* xvi. 51, "circumgemit ursus ovile"). The bear is mentioned also in Rev. xiii. 2; in Dan. vii. 5; Wisd. xi. 17; Ecclus. xlvii. 3. W. H.

BEARD (זָקָן: πώγων: *barba*). Western Asiatics have always cherished the beard as the badge of the dignity of manhood, and attached to it the importance of a feature. The Egyptians, on the contrary, sedulously, for the most part, shaved the hair of the face and head, and compelled their slaves to do the like. Herodotus (i. 36) mentions it as a peculiarity of the Egyptians, that they let the beard grow in mourning, being at all other times shaved. Hence Joseph, when released from prison, "shaved his beard" to appear before Pharaoh (Gen. xli. 14). It was, however, the practice among the Egyptians to wear a false beard made of plaited hair, and of a different form according to the rank of the persons, private individuals being represented with a small beard, scarcely two inches long, kings with one of considerable length, square at the bottom, and gods with one turning up at the end (Wilkinson, *Anc. Egypt.* suppl. plate 77 part 2). The enemies of the Egyptians, including probably many of the nations of Canaan, Syria, and Armenia, &c., are represented nearly always bearded. On the tomb of Beni Hassan is represented a train of foreigners with asses and cattle, who all have short beards, as have also groups of various nations on another monument.

Beards. Egyptian, from Wilkinson (top row). Of other nations from Rosellini and Layard (bottom row).

Egyptians of low caste or mean condition are represented sometimes, in the spirit of caricature, apparently with beards of slovenly growth (Wilkinson, ii. 127). In the Ninevite monuments is a series of battle-views from the capture of Lachish by Sennacherib, in which the captives have beards very like some of those in the Egyptian monuments.

There is, however, an appearance of conventionalism both in Egyptian and Assyrian treatment of the hair and beard on monuments, which prevents our accepting it as characteristic. Nor is it possible to decide with certainty the meaning of the precept (Lev. xix. 27, xxi. 5) regarding the "corners of the beard." It seems to imply something in which the cut of a Jewish beard had a ceremonial difference from that of other western Asiatics; and on comparing Herod. iii. 8 with Jer. ix. 26, xxv. 23, xlix. 32, it is likely that the Jews retained the hair on the sides of the face between the ear and eye (κρόταφοι), which the Arabs and others shaved away. Size and fullness of beard are said to be regarded, at the present day, as a mark of respectability and trustworthiness. The beard is the object of an oath, and that on which blessings or shame are spoken of as resting (D'Arvieux, *Mœurs et Coutumes des Arabes*). The custom was and is to shave or pluck it and the hair out in mourning (Is. l. 6, xv. 2; Jer. xli. 5, xlviii. 37; Ezr. ix. 3; Bar. vi. 31 [or Epist. Jer. 31]); to neglect it in seasons of permanent affliction (2 Sam. xix. 24), and to regard any insult to it as the last outrage which enmity can inflict. Thus David resented the treatment of his ambassadors by Hanun (2 Sam. x. 4); so the people of God are figuratively spoken of as "beard" or "hair" which he will shave with "the razor, the king of Assyria" (Is. vii. 20). The beard was the object of salutation, and under this show of friendly reverence

[a] *Mr. Tristram not only found "the tracks of bears" in the snow, on the sides of Hermon (*Land of Israel*, p. 607), but even in *Wady Hamâm* (see Banias), on the west side of the lake of Galilee, saw to his surprise "a brown Syrian bear clumsily but rapidly clamber down the rocks and cross the ravine" (p 447). H.

Digitized by Google

...and beguiled Amasa (2 Sam. xx. 9). The dressing, trimming, anointing, &c. of the beard, was performed with much ceremony by persons of wealth and rank (Ps. cxxxiii. 2). The removal of the beard was a part of the ceremonial treatment proper to a leper (Lev. xiv. 9). There is no evidence that the Jews compelled their slaves to wear beards otherwise than they wore their own; although the Romans, when they adopted the fashion of shaving, compelled their slaves to cherish their hair and beard, and let them shave when manumitted (Liv. xxxiv. 52, xlv. 44). H. H.

BEAST. The representative in the A. V. of the following Hebrew words: בְּהֵמָה, בְּעִיר, חַיָּה (חֵיוָא, Chald.).

1. *Behêmâh* (בְּהֵמָה:[a] *τὰ τετράποδα, τὰ κτήνη, τὰ θηρία. jumentum, bestia, animantia, pecus:* "beast," "cattle," A. V.), which is the general name for "domestic cattle" of any kind, is used also to denote "any large quadruped," as opposed to fowls and creeping things (Gen. vii. 2, vi. 7, 20; Ex. ix. 25; Lev. xi. 2; 1 K. iv. 33; Prov. xxx. 30, &c.); or for "beasts of burden," horses, mules, etc., as in 1 K. xviii. 5, Neh. ii. 12, 14, etc.; or the word may denote "wild beasts," as in Deut. xxxii. 24, Hab. ii. 17, 1 Sam. xvii. 44. [BEHEMOTH, *note;* OX.]

2. *Bĕ'ir* (בְּעִיר: *τὰ φορεῖα, τὰ κτήνη: jumentum:* "beast," "cattle") is used either collectively of "all kinds of cattle," like the Latin *pecus* (Ex. xxii. 4; Num. xx. 4, 8, 11; Ps. lxxviii. 48), or specially of "beasts of burden" (Gen. xlv. 17). This word has a more limited sense than the preceding, and is derived from a root, בָּעַר, "to pasture."

3. *Chayyâh* (חַיָּה: *θηρίον, ζῶον, θήρ, τετράπους, κτῆνος, ἑρπετόν, θηριδίωτος, βρωτός: fera, animantia, animal:* "beast," "wild beast." This word, which is the feminine of the adjective חַי, "living," is used to denote any animal. It is, however, very frequently used specially of "wild beast," when the meaning is often more fully expressed by the addition of the word הַשָּׂדֶה (*hassâdeh*, wild beast), "of the field" (Ex. xxiii. 11; Lev. xxvi. 22; Deut. vii. 22; Hos. ii. 14, xiii. 8; Jer. xii. 9, &c.). Similar is the use of the Chaldee חֵיוָא (*cheyvâ*).[b] W. H.

BE'BAI [2 syl.] (בֵּבַי [Pehlevi, *fatherly*]: [In Ezr.,] Βαβαΐ, [Vat. Βαβει, Alex. Βαβαι; in Neh.,] Βηβΐ, Βεβαΐ, [etc.; in 1 Esdr. Βηβαΐ, *Zebes*:] *Bebai*).

1. "Sons of Bebai," 623 (Neh. 628) in number, returned from Babylon with Zerubbabel (Ezr. ii. 11; Neh. vii. 16; 1 Esdr. v. 13), and at a later period twenty-eight more, under Zechariah the son of Bebai, returned with Ezra (Ezr. viii. 11). Four of this family had taken foreign wives (Ezr. x. 28; 1 Esdr. ix. 29). The name occurs also among those who sealed the covenant (Neh. x. 15) [BABI.]

2. (Βαβί [Vat. Alex. Βαβει].) Father of Zechariah, who was the leader of the twenty-eight men of his tribe mentioned above (Ezr. viii. 11).

BE'BAI [2 syl.] (Alex. [Comp. Ald.] Βηβαΐ; [Sin. Αβελβαιμ;] Vat. omits; Vulg. omits), a place named only in Jud. xv. 4. It is possibly a mere repetition of the name Chobai occurring next to it.

BE'CHER (בֶּכֶר: [in Gen.] Βοχόρ, [Alex. Χοβωρ; in Num., Comp. Βεχέρ, the others omit; in 1 Chr., Βαχίρ, Alex. Βοχορ, Vat. Αβαχει in ver. 8, in ver. 6 omits:] *Bechor*, [in Num. *Becher:*] *first-born*, but according to Gesen. a *young camel*, which Simonis also hints at, *Onom.* p. 399).

1. The second son of Benjamin, according to the list both in Gen. xlvi. 21, and 1 Chr. vii. 6; but omitted in the list of the sons of Benjamin in 1 Chr. viii. 1, as the text now stands. No one, however, can look at the Hebrew text of 1 Chr. viii. 1, בִּנְיָמִן הוֹלִיד אֶת־בֶּלַע בְּכוֹרוֹ אַשְׁבֵּל without at least suspecting that בְּכוֹרוֹ, *his first-born*, is a corruption of בֶּכֶר, *Becher*, and that the suffix וֹ is a corruption of ו, and belongs to the following אַשְׁבֵּל, so that the genuine sense in that case would be, *Benjamin begat Bela, Becher, and Ashbel*, in exact agreement with Gen. xlvi. 21. The enumeration, the second, the third, etc., must then have been added since the corruption of the text. There is, however, another view which may be taken, namely, that 1 Chr. viii. 1 is right, and that in Gen. xlvi. 21 and 1 Chr. viii. 8, בֶּכֶר, as a proper name, is a corruption of בְּכֹר, first-born, and so that Benjamin had no son of the name of Becher. In favor of this view it may be said that the position of Becher, immediately following Bela the first-born in both passages, is just the position it would be in if it meant "first-born;" that *Becher* is a singular name to give to a second son; and that the discrepance between Gen. xlvi. 21, where *Ashbel* is the third son, and 1 Chr. viii. 1, where he is expressly called *the second*, and the omission of Ashbel in 1 Chr. vii. 6, would all be accounted for on the supposition of בְּכֹר having been accidentally taken for a proper name, instead of in the sense of "first-born." It may be added further that in 1 Chr. viii. 38, the same confusion has arisen in the case of the sons of Azel, of whom the second is in the A. V. called *Bocheru*, in Hebrew בְּכֹרוֹ, but which in the LXX. is rendered *πρωτότοκος αὐτοῦ*, and another name, Ἀσά, added to make up the six sons of Azel. And that the LXX. are right in their rendering is made highly probable by the very same form being repeated in ver. 39, "*and the sons of Eshek his brother were Ulam his first-born*, בְּכֹרוֹ, *Jehush the second*," &c. The support too which Becher as a proper name derives from the occurrence of the same name in Num. xxvi. 35, is somewhat weakened by the fact that Bered (Βαρδᾶ, LXX.) is substituted for Becher in 1 Chr. vii. 20, and that it is omitted

[a] From the unused root בָּהַם, "to be dumb."

[b] The word צִיִּים is translated by the A. V. "wild beasts of the desert" in Is. xiii. 21, xxxiv. 14; Jer. l. [illegible]

[c] The root is צָיָה, "to be dry;" whence צִי, "a desert;" צִיִּים = "any dwellers in a dry or desert region," jackals, hyenas, &c. Bochart is wrong in limiting the word to mean "wild cats" (*Hieroz.* II. [illegible]).

Digitized by Google

altogether in the LXX. version of Num. xxvi. 35. Moreover, which is perhaps the strongest argument of all, in the enumeration of the Benjamite families in Num. xxvi. 38, there is no mention of Becher or the Bachrites, but Ashbel and the Ashbelites immediately follow Bela and the Belaites. Notwithstanding, however, all this, the first supposition was, it can scarcely be doubted, substantially the true one. Becher was one of Benjamin's three sons, Bela, Becher, Ashbel, and came down to Egypt with Jacob, being one of the fourteen descendants of Rachel who settled in Egypt, namely, Joseph and his two sons Manasseh and Ephraim, Benjamin and his three sons above named, Gera, Naaman, Ehi (אֵחִי, alias אֲחִירָם, Ahiram, Num. xxvi. 38, and אֲחִרַח, Aharah, 1 Chr. viii. 1, and perhaps אֲחוֹחַ and אֲחִיָּה, ver. 4 and 7), and Ard (אַרְד, but in 1 Chr. viii. 3, אַדָּר, Addar), the sons of Bela, Muppim (otherwise Shuppim, and Shephuphan, 1 Chr. vii. 12, 15, viii. 5; but Shupham, Num. xxvi. 39) and Huppim (Huram, 1 Chr. viii. 5, but Hupham, Num. xxvi. 39), apparently the sons of Ahiram or Ehi (Aher, 1 Chr. vii. 12), and Rosh, of whom we can give no account, as there is no name the least like it in the parallel passages, unless perchance it be for Josah (יוֹעֵשׁ), a son of Becher, 1 Chr. vii. 8.[a] And so, it is worthy of observation, the LXX. render the passage, only that they make Ard the son of Gera, great-grandson therefore to Benjamin, and make all the others sons of Bela. As regards the posterity of Becher, we have already noticed the singular fact of there being no family named after him at the numbering of the Israelites in the plains of Moab, as related in Num. xxvi. But the no less singular circumstance of there being a *Becher*, and a family of *Bachrites*, among the sons of Ephraim (ver. 35), seems to supply the true explanation. The slaughter of the sons of Ephraim by the men of Gath, who came to steal their cattle out of the land of Goshen, in that border affray related in 1 Chr. vii. 21, had sadly thinned the house of Ephraim of its males. The daughters of Ephraim must therefore have sought husbands in other tribes, and in many cases must have been heiresses. It is therefore highly probable that Becher,[b] or his heir and head of his house, married an Ephraimitish heiress, a daughter of Shuthelah (1 Chr. vii. 20, 21), and so that his house was reckoned in the tribe of Ephraim, just as Jair, the son of Segub, was reckoned in the tribe of Manasseh (1 Chr. ii. 22; Num. xxxii. 40, 41). The time when Becher first appears among the Ephraimites, namely, just before the entering into the promised land, when the people were numbered by genealogies for the express purpose of dividing the inheritance equitably among the tribes, is evidently highly favorable to this view. (See Num. xxvi. 52–56, xxvii.). The junior branches of Becher's family would of course continue in the tribe of Benjamin. Their names, as given in 1 Chr. vii. 8, were Zemira, Joash, Eliezer, Elioënai, Omri, Jerimoth, and Abiah; other branches possessed the fields round Anathoth and Alameth, called Alemeth vi. 60, and Almon Josh. xxi. 18. Which of the above were Becher's own sons, and which were grandsons, or more remote descendants, is perhaps impossible to determine. But the most important of them, as being ancestor to king Saul, and his great captain Abner (2 Sam. iii. 37), the last-named Abiah, was, it seems, literally Becher's son. The generations appear to have been as follows: Becher — Abiah (Aphiah, 1 Sam. ix. 1) — Bechorath[c] — Zeror — Abiel (Jehiel, 1 Chr. ix. 35) — Ner — Kish — Saul. Abner was another son of Ner, brother therefore to Kish, and uncle to Saul. Abiel or Jehiel seems to have been the first of his house who settled at Gibeon or Gibeah (1 Chr. viii. 29, ix. 35), which[d] perhaps he acquired by his marriage with Maachah, and which became thenceforth the seat of his family, and was called afterwards Gibeah of Saul (1 Sam. xi. 4; Is. x. 29). From 1 Chr. viii. 6 it would seem that before this Gibeon or Geba had been possessed by the sons of Ehud (called Abihud ver. 3) and other sons of Bela. But the text appears to be very corrupt.

Another remarkable descendant of Becher was Sheba the son of Bichri, a Benjamite, who headed the formidable rebellion against David described in 2 Sam. xx.; and another, probably, Shimei the son of Gera of Bahurim, who cursed David as he fled from Absalom (2 Sam. xvi. 5), since he is said to be "a man of the family of the house of Saul." But if so, Gera must be a different person from the Gera of Gen. xlvi. 21 and 1 Chr. viii. 3. Perhaps therefore מִשְׁפָּחָה is used in the wider sense of *tribe*, as Josh. vii. 17, and so the passage may only mean that Shimei was a Benjamite. In this case he would be a descendant of Bela.

From what has been said above it will be seen how important it is, with a view of reconciling apparent discrepancies, to bear in mind the different times when different passages were written, as well as the principle of the genealogical divisions of the families. Thus in the case before us we have the tribe of Benjamin described (1.) as it was about the time when Jacob went down into Egypt; (2.) as it was just before the entrance into Canaan; (3.) as it was in the days of David: and (4.) as it was eleven generations after Jonathan and David, *i. e.* in Hezekiah's reign. It is obvious how in these later times many new heads of houses, called *sons of Benjamin*, would have sprung up, while older ones, by failure of lines, or translation into other tribes, would have disappeared. Even the non-appearance of Becher in 1 Chr. viii. 1 may be accounted for on this principle, without the necessity for altering the text.

2. Son of Ephraim, Num. xxvi. 35, called Bered 1 Chr. vii. 20. Same as the preceding.

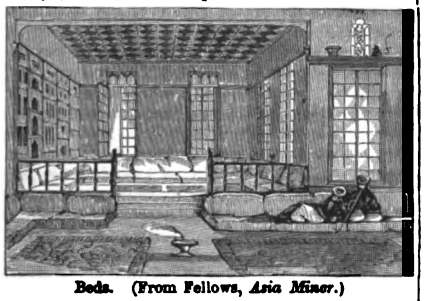
A. C. H.

BECHO'RATH (בְּכוֹרַת) [*first-born*]: Βεχίρ [Vat. -χειρ]; Alex. Βεχωραθ: *Bechorath*), son of Aphiah, or Abiah, and grandson of Becher according to 1 Sam. ix. 1; 1 Chr. vii. 8. [BECHER.]

A. C. H.

[a] We are more inclined to think it is a corruption of רֹם, or רֹאשׁ, and belongs to the preceding אֲחִי, Ehi, as *Ahiram* is certainly the right name, as appears by Num. xxvi. 38.

[b] This view suggests the possibility of Becher being really the first-born of Benjamin, but having forfeited his birthright for the sake of the Ephraimitish inheritance.



[c] It is possible that Bechorath may be the same person as Becher, and that the order has been accidentally inverted.

[d] Comp. 1 Chr. viii. 14, viii. 5, 6, 29, ix. 35.

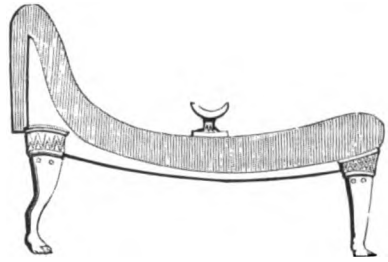
BECTILETH, THE PLAIN OF (τὸ πεδίον Βαικτιλαίθ [Vat. -τει-]; Alex. Βεικτελεθ. [and so Sin.ca; Sin.1 Βαιτουλια]: Syr. ܒܝܬ ܡܩܛܠܐ = *house of slaughter*), mentioned in Jud. ii. 21, as lying between Nineveh and Cilicia. The name has been compared with Βακταϊαλλά, a town of Syria named by Ptolemy; Bactiali in the Peutinger Tables, which place it 21 miles from Antioch. The most important plain in this direction is the Bekaa, or valley lying between the two chains of Lebanon. And it is possible that Bectileth is a corruption of that well-known name: if indeed it be a historical word at all. G.

BED and BED-CHAMBER. We may distinguish in the Jewish bed five principal parts:—(1.) the substratum; (2.) the covering; (3.) the pillow; (4.) the bedstead or analogous support for 1.; (5.) the ornamental portions.



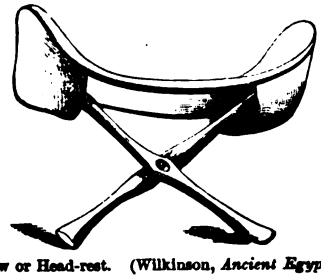
Beds. (From Fellows, *Asia Minor.*)

1. This substantive portion of the bed was limited to a mere mat, or one or more quilts.

2. A quilt finer than those used in 1. In summer a thin blanket or the outer garment worn by day (1 Sam. xix. 13) sufficed. This latter, in the case of a poor person, often formed both 1. and 2. and that without a bedstead. Hence the law provided that it should not be kept in pledge after sunset, that the poor man might not lack his needful covering (Deut. xxiv. 13).

3. The only material mentioned for this, is that which occurs 1 Sam. xix. 13, and the word used is of doubtful meaning, but seems to signify some fabric woven or plaited of goat's hair. It is clear, however, that it was something hastily adopted to serve as a pillow, and is not decisive of the ordinary use. In Ez. xiii. 18 occurs the word כְּסָת (προσκεφάλαιον, LXX.), which seems to be the proper term. Such pillows are common to this day in the East, formed of sheep's fleece or goat's skin, with a stuffing of cotton, &c. We read of a "pillow" [rower's cushion; see SHIP, 13.] also, in the boat in which our Lord lay asleep (Mark iv. 38) as he crossed the lake. The block of stone such as Jacob used, covered perhaps with a garment, was not unusual among the poorer folk, shepherds, &c.

4. The bedstead was not always necessary, the divan, or platform along the side or end of an Oriental room, sufficing as a support for the bedding. (See preceding cut.) Yet some slight and portable frame seems implied among the senses of the word מִטָּה, which is used for a "bier" (2 Sam. iii. 31), and for the ordinary bed (2 K. iv. 10), for the litter on which a sick person might be carried (1 Sam. xix. 15), for Jacob's bed of sickness (Gen. xlvii 31), and for the couch on which guests reclined at a banquet (Esth. i. 6). Thus it seems the comprehensive and generic term. The proper word for a bedstead appears to be עֶרֶשׂ, used Deut. iii. 11, to describe that on which lay the giant Og, whose vast bulk and weight required one of iron.



Bed and Head-rest. (Wilkinson, *Ancient Egyptians.*)

5. The ornamental portions, and those which luxury added, were pillars and a canopy (Jud. xiii. 9); ivory carvings, gold and silver (Joseph. *Ant.* xii. 21, 14), and probably mosaic work, purple and fine linen, are also mentioned as constituting parts of beds (Esth. i. 6; Cant. iii. 9, 10) where the word אַפִּרְיוֹן, LXX. φορεῖον, seems to mean "a litter" (Prov. vii. 16, 17; Amos vi. 4). So also are perfumes.

There is but little distinction of the *bed* from sitting furniture among the Orientals, the same article being used for nightly rest, and during the day. This applies both to the divan and bedstead in all its forms, except perhaps the litter. There was also a garden-watcher's bed, מְלוּנָה, rendered variously in the A. V. "cottage" and "lodge," which seems to have been slung like a hammock, perhaps from the trees (Is. i. 8, xxiv. 20).

Josephus (*Ant.* xii. 4, 11) mentions the bed chambers in the Arabian palace of Hyrcanus.

Pillow or Head-rest. (Wilkinson, *Ancient Egyptians.*)

The ordinary furniture of a bed-chamber in private life is given in 2 K. iv. 10. The "bed-chamber" in the temple where Joash was hidden, was, as Calmet suggests (*Dict. of Bib.*, art. *Beds*), probably a store-chamber for keeping beds, not a mere bedroom, and thus better adapted to conceal the fugitives (2 K. xi. 2; 2 Chr. xxii. 11. חֲדַר הַמִּטּוֹת "chamber of beds," not the usual חֲדַר מִשְׁכָּב "chamber of reclining," Ex. viii. 3 and *passim*.

The position of the bed-chamber in the most remote and secret parts of the palace seems marked in the passages Ex. viii. 3; 2 K. vi. 12. H. H.

BEDAD (בְּדַד [*separation*]: Βαράδ; [Comp

Βαδάδ:] *Badad*), the father of one of the kings of Edom, "Hadad ben-Bedad" (Gen. xxxvi. 35; 1 Chr. i. 46).

* **BEDA'IAH** (3 syl.), Ezr. x. 35. [BEDEIAH.]

BE'DAN (בְּדָן [*servile*, Ges.]: [Βαράκ:] *Badan*). 1. Mentioned 1 Sam. xii. 11, as a Judge of Israel between Jerubbaal (Gideon) and Jephthah. As no such name occurs in the book of Judges, various conjectures have been formed as to the person meant, most of which are discussed in Pole (*Synopsis*, in loc.). Some maintain him to be the Jair mentioned in Judg. x. 3, who, it must then be supposed, was also called Bedan to distinguish him from the older Jair, son of Manasseh (Num. xxxii. 41), a Bedan being actually named among the descendants of Manasseh in 1 Chr. vii. 17. The Chaldee Paraphrast reads Samson for Bedan in 1 Sam. xii. 11, and many suppose Bedan to be another name for Samson, either a contraction of Ben-Dan (the son of Dan or Danite), or else meaning *in* or *into Dan* (בְּ) with a reference to Judg. xiii. 25. Neither explanation of the word is very probable, or defended by any analogy, and the order of the names does not agree with the supposition that Bedan is Samson, so that there is no real argument for it except the authority of the Paraphrast. The LXX., Syr., and Arab. all have Barak, a very probable correction except for the order of the names. Ewald suggests that it may be a false reading for Abdon. After all, as it is clear that the book of Judges is not a complete record of the period of which it treats, it is possible that Bedan was one of the Judges whose names are not preserved in it, and so may perhaps be compared with the Jael of Judg. v. 6, who was probably also a Judge, though we know nothing about the subject except from Deborah's song. The only objection to this view is, that as Bedan is mentioned with Gideon, Jephthah, and Samuel, he would seem to have been an important Judge, and therefore not likely to be omitted in the history. The same objection applies in some degree to the views which identify him with Abdon or Jair, who are but cursorily mentioned. G. E. L. C.

2. (Βαδάμ; [Vat. (Ουλαμ) βαδαμ;] Alex. Βαδαν.) Son of Ulam, the son of Gilead (1 Chr. vii. 17). W. A. W.

BEDE'IAH [3 syl.] (עִבְדְיָה [*servant of Jehovah*]: Βαδαΐα; [Vat. Βαραια:] *Badaias*), one of the sons of Bani, in the time of Ezra, who had taken a foreign wife (Ezr. x. 35). [The A. V. ed. 1611, etc., reads Bedaiah.]

BEE (דְּבוֹרָה,[a] *debórah*: μέλισσα, μελισσών: *apis*). Mention of this insect occurs in Deut. i. 44, "The Amorites which dwelt in that mountain came out against you, and chased you as bees do;" in Judg. xiv. 8, "There was a swarm of bees and honey in the carcase of the lion;" in Ps. cxviii. 12, "They compassed me about like *bees*;" and in Is. vii. 18, "It shall come to pass in that day that the Lord shall hiss for the fly that is in the uttermost parts of the rivers of Egypt, and for the *bee* that is in the land of Assyria." That Palestine abounded in bees is evident from the description of that land by Moses, for it was a land "flowing with milk and honey;" nor is there any reason for supposing that this expression is to be understood otherwise than in its literal sense. Modern travellers occasionally allude to the bees of Palestine Dr. Thomson (*Land and Book*, p. 299) speaks of immense swarms of bees which made their home in a gigantic cliff of Wady Kurn. "The people of M'alia, several years ago," he says, "let a man down the face of the rock by ropes. He was entirely protected from the assaults of the bees, and extracted a large amount of honey; but he was so terrified by the prodigious swarms of bees that he could not be induced to repeat the exploit." This forcibly illustrates Deut. xxxii. 13, and Ps. lxxxi. 16, as to "honey out of the stony rock," and the two passages out of the Psalms and Judges quoted above, as to the fearful nature of the attacks of these insects when irritated.

Maundrell (*Trav.* p. 66) says that in passing through Samaria he perceived a strong smell of honey and of wax; and that when he was a mile from the Dead Sea he saw bees busy among the flowers of some kind of saline plant. Mariti (*Trav.* iii. 139) assures us that bees are found in great multitudes amongst the hills of Palestine, and that they collect their honey in the hollows of trees and in clefts of rocks; (comp. *Land and Book*, p. 566). That bees are reared with great success in Palestine, we have the authority of Hasselquist (*Trav.* p. 236) and Dr. Thomson (*ib.* p. 253) to show.

English naturalists, however, appear to know but little of the species of bees that are found in Palestine. Dr. Kitto says (*Phys. H. Pal.* p. 421) there are two species of bees found in that country, *Apis longicornis*, and *Apis mellifica*. *A. longicornis*, however, which = *Eucera longicor.*, is a European species; and though Klug and Ehrenberg, in the *Symbola Physica*, enumerate many Syrian species, and amongst them some species of the genus *Eucera*, yet *E. longicor.* is not found in their list. Mr. F. Smith, our best authority on the Hymenoptera, is inclined to believe that the honey-bee of Palestine is distinct from the honey-bee (*A. mellifica*) of this country. And when it is remembered that the last-named writer has described as many as seventeen species of true honey-bees (the genus *Apis*), it is very probable that the species of our own country and of Palestine are distinct. There can be no doubt that the attacks of bees in Eastern countries are more to be dreaded than they are in more temperate climates. Swarms in the East are far larger than they are with us, and, on account of the heat of the climate, one can readily imagine that their stings must give rise to very dangerous symptoms. It would be easy to quote from Aristotle, Ælian, and Pliny, in proof of what has been stated; but let the reader consult Mungo Park's *Travels* (ii. 37, 38) as to the incident which occurred at a spot he named "Bees' Creek" from the circumstance. Compare also Oedmann (*Vermisch. Samml.* pt. vi. c. 20). We can well, therefore, understand the full force of the Psalmist's complaint, "They came about me like bees."[b]

[a] From דָּבַר, *autime duxit; coëgit* (*examen*). Ges. Thes. s. v.

[b] It is very curious to observe that in the passage Deut. i. 44, the Syriac version, the Targum of Onkelos, and an Arabic MS., read, "Chased you as bees that are smoked;" showing how ancient the custom is of taking bees' nests by means of smoke. Constant allusion is made to this practice in classical authors. Wasps' nests were taken in the same way. See Bochart (*Hieroz.* iii. 360).

Digitized by Google

The passage about the swarm of bees and honey in the lion's carcase (Judg. xiv. 8) admits of easy explanation. The lion which Samson slew had been dead some little time before the bees had taken up their abode in the carcase, for it is expressly stated that "after a time," Samson returned and saw the bees and honey in the lion's carcase, so that "if," as Oedmann has well observed, "any one here represents to himself a corrupt and putrid carcase, the occurrence ceases to have any true similitude, for it is well known that in these countries at certain seasons of the year the heat will in the course of twenty-four hours so completely dry up the moisture of dead camels, and that without their undergoing decomposition, that their bodies long remain, like mummies, unaltered and entirely free from offensive odor." To the foregoing quotation we may add that very probably the ants would help to consume the carcase, and leave perhaps in a short time little else than a skeleton. Herodotus (v. 114) speaks of a certain Onesilus who had been taken prisoner by the Amathusians and beheaded, and whose head having been suspended over the gates, had become occupied by a swarm of bees; compare also Aldrovandus (*De Insect.* i. 110). Dr. Thomson (*Land and Book*, p. 566) mentions this occurrence of a swarm of bees in a lion's carcase as an extraordinary thing, and makes an unhappy conjecture, that perhaps "hornets," *debabir* in Arabic, are intended, "if it were known," says he, "that they manufactured honey enough to meet the demands of the story." It is known, however, that hornets do *not* make honey, nor do any of the family *Vespidæ*, with the exception, as far as has been hitherto observed, of the Brazilian *Nectarina mellifica*. The passage in Is. vii. 18, "the Lord shall hiss for the bee that is in the land of Assyria," has been understood by some to refer to the practice of "calling out the bees from their hives by a hissing or whistling sound to their labor in the fields, and summoning them again to return" in the evening (Harris, *Nat. H. of Bible*, art. *Bee*). Bochart (*Hieroz.* iii. 358) quotes from Cyril, who thus explains this passage, and the one in Is. v. 26. Columella, Pliny, Ælian, Virgil, are all cited by Bochart in illustration of this practice; see numerous quotations in the *Hierozoicon*. Mr. Denham (in Kitto's *Cyc. Bib. Lit.* art. *Bee*) makes the following remarks on this subject: — "No one has offered any proof of the existence of such a custom, and the idea will itself seem sufficiently strange to all who are acquainted with the habits of bees." That the custom existed amongst the ancients of calling swarms to their hives, must be familiar to every reader of Virgil,

"Tinnitusque cie, et Martis quate cymbala circum,"

and it is curious to observe that this practice has continued down to the present day. Many a cottager believes the bees will more readily swarm if he beats together pieces of tin or iron. As to the real use in the custom, this is quite another matter; but no careful entomologist would hastily adopt any opinion concerning it.

In all probability however, the expression in Isaiah has reference, as Mr. Denham says, "to the custom of the people in the East of calling the attention of any one by a significant *hiss*, or rather *hist*."

The LXX. has the following eulogium on the bee in Prov. vi. 8: "Go to the bee, and learn how diligent she is, and what a noble work she produces, whose labors kings and private men use for their health; she is desired and honored by all, and though weak in strength, yet since she values wisdom, she prevails." This passage is not found in any Hebrew copy of the Scriptures: it exists, however in the Arabic, and it is quoted by Origen, Clemens Alexandrinus, Jerome, and other ancient writers. As to the proper name, see DEBORAH.

The bee belongs to the family *Apidæ*, of the *Hymenopterous* order of insects. W. H.

* On this subject of bees in Palestine, Mr. Tristram furnishes important testimony (*Land of Israel*, pp. 86, 87). After speaking of "bee-keeping" in that country, carried so far that almost "every house possesses a pile of bee-hives in its yard," he adds respecting the number of wild bees as follows: "The innumerable fissures and clefts of the limestone rocks, which everywhere flank the valleys, afford in their recesses secure shelter for any number of swarms, and many of the Bedouin, particularly in the wilderness of Judæa, obtain their subsistence by bee-hunting, bringing into Jerusalem jars of that wild honey on which John the Baptist fed in the wilderness and which Jonathan had long before unwittingly tasted, when the comb had dropped on the ground from the hollow of the tree in which it was suspended. The visitor to the Wady Kurn, when he sees the busy multitudes of bees about its clefts, cannot but recall to mind the promise, 'With honey out of the stony rock would I have satisfied thee.' There is no epithet of the land of promise more true to the letter, even to the present day, than this, that it was 'a land flowing with milk and honey.'" H.

BEELI'ADA (בְּעֶלְיָדָע = *known by Baal*: Ἐλιαδέ; [Vat. FA. Βαλεγδαε;] Alex. Βαλλιαδα: *Bauliada*), one of David's sons, born in Jerusalem (1 Chr. xiv. 7). In the lists in Samuel the name is ELIADA, El being substituted for Baal.

BEEL'SARUS (Βεελσάρος: *Beelsaro*), 1 Esdr. v. 8. [BILSHAN.]

BEELTETH'MUS (Βεέλτεθμος; Alex. [Βαελτεθμος,] Βεελτεμωθ: *Balthemus*), an officer of Artaxerxes residing in Palestine (1 Esdr. ii. 16, 25). The name is a corruption of בַּעַל טְעַם = *lord of judgment*, A. V. "chancellor;" the title of Rehum, the name immediately before it (Ezr. iv. 8).

BEEL'ZEBUL (Βεελζεβούλ: *Beelzebub*), the title of a heathen deity, to whom the Jews ascribed the sovereignty of the evil spirits (Matt. x. 25, xii. 24; Mark iii. 22; Luke xi. 15 ff.). The correct reading is without doubt *Beelzebul*, and not *Beelzebub* [A. V.] as given in the Syriac, the Vulg., and some other versions; the authority of the MSS. is decisive in favor of the former, the alteration being easily accounted for by a comparison with 2 K. i. 2, to which reference is made in the passages quoted. [BAAL, p. 207, No. 2.] Two questions present themselves in connection with this subject (1.) How are we to account for the change of the final letter of the name? (2.) On what grounds did the Jews assign to the Baal-zebub of Ekron the peculiar position of ὁ ἄρχων τῶν δαιμονίων? The sources of information at our command for the answer of these questions are scanty. The names are not found elsewhere. The LXX. translates Baal-zebub Βάαλ μυῖα, as also does Josephus (*Ant.* ix 2, § 1); and the Talmudical writers are silent on the subject.

Digitized by Google

1. The explanations offered in reference to the change of the name may be ranged into two classes, according as they are based on the *sound* or the *meaning* of the word. The former proceeds on the assumption that the name Beelzebub was offensive to the Greek ear, and that the final letter was altered to avoid the double *b*, just as Habakkuk became in the LXX. Ἀμβακούμ (Hitzig, *Vorbemerk.* in Habakkuk), the choice of *l*, as a substitute for *b*, being decided by the previous occurrence of the letter in the former part of the word (Bengel, *Gnomon* in Matt. x. 25, comparing Μελχόλ in the LXX. as = Michal). It is, however, by no means clear why other names, such as Magog, or Eldad, should not have undergone a similar change. We should prefer the assumption, in connection with this view, that the change was purely of an accidental nature, for which no satisfactory reason can be assigned. The second class of explanations carries the greatest weight of authority with it. These proceed on the ground that the Jews intentionally changed the pronunciation of the word, so as either to give a significance to it adapted to their own ideas, or to cast ridicule upon the idolatry of the neighboring nations, in which case we might compare the adoption of Sychar for Sychem, Beth-aven for Beth-el. The Jews were certainly keenly alive to the significance of names, and not unfrequently indulged in an exercise of wit, consisting of a play upon the meaning of the words, as in the case of Nabal (1 Sam. xxv. 25), Abraham (Gen. xvii. 5), and Sarah (Gen. xvii. 15). Lightfoot (*Exercitations*, Matt. xii. 24) adduces instances from the Talmudical writers of opprobrious puns applied to idols. The explanations, which are thus based on etymological grounds, branch off into two classes; some connect the term with זְבוּל, *habitation*, thus making Beelzebul = οἰκοδεσπότης (Matt. x. 25), *the lord of the dwelling*, whether as the "prince of the power of the air" (Eph. ii. 2), or as the prince of the lower world (Paulus, quoted by Olshausen, *Comment.* in Matt. x. 25), or as inhabiting human bodies (Schleusner, *Lex.* s. v.), or as occupying a mansion in the seventh heaven, like Saturn in Oriental mythology (Movers, *Phönix.* i. 260, quoted by Winer, *Realwört.* art. *Beelzebub*; comp. Michaelis, *Suppl. ad Lex.* p. 205, for a similar view). Others derive it from זֶבֶל, *dung* (a word, it must be observed, not in use in the Bible itself, but frequently occurring in Talmudical writers), thus making Beelzebul, literally, *the lord of dung*, or *the dunghill*; and in a secondary sense, as *zebel* was used by the Talmudical writers as = *idol* or *idolatry* (comp. Lightfoot, *Exercit.* Matt. xii. 24; Luke xi. 15), *the lord of idols*, *prince of false gods*, in which case it = ἄρχων τῶν δαιμονίων. It is generally held that the former of these two senses is more particularly referred to in the N. T. (Carpzov. *Appar.* p. 498, comparing the term גִּלּוּלִים as though connected with גַּל, *dung*; Olshausen, *Comment.* in Matt. x. 25). The latter, however, is adopted by Lightfoot and Schleusner. We have lastly to notice the ingenious conjecture of Hug (as quoted by Winer) that the fly, under which Baal-zebub was represented, was the *Scarabæus pilularius* or *dunghill beetle*, in which case Baal-zebub and Beelzebul might be used indifferently.

2. The second question hinges to a certain extent on the first. The reference in Matt. x. 25 [xii. 24] may have originated in a fancied resemblance between the application of Ahaziah to Baal-zebub, and that of the Jews to our Lord for the ejection of the unclean spirits. As no human remedy availed for the cure of this disease, the Jews naturally referred it to some higher power and selected Baal-zebub as the heathen deity to whom application was made in case of severe disease. The title ἄρχων τῶν δαιμονίων may have special reference to the nature of the disease in question, or it may have been educed from the name itself by a fancied or real etymology. It is worthy of special observation that the notices of Beelzebul are exclusively connected with the subject of demoniacal possession, a circumstance which may account for the subsequent disappearance of the name. W. L. B.

BEER (בְּאֵר = *well*: τὸ φρέαρ: *puteus*).

1. One of the latest halting-places of the Israelites, lying beyond the Arnon, and so called because of the well which was there dug by the "princes" and "nobles" of the people, and is perpetuated in a fragment of poetry (Num. xxi. 16–18).[a] This is possibly the BEER-ELIM, or "well of heroes," referred to in Is. xv. 8. The "wilderness" (מִדְבָּר) which is named as their next starting point in the last clause of verse 18, may be that before spoken of in 13, or it may be a copyist's mistake for מִמַּתָּנָה. It was so understood by the LXX., who read the clause, καὶ ἀπὸ φρέατος — "and from the well," *i. e.* "from Beer."

According to the tradition of the Targumists — a tradition in part adopted by St. Paul (1 Cor. x. 4) — this was one of the appearances, the last before the entrance on the Holy Land, of the water which had "followed" the people, from its first arrival at Rephidim, through their wanderings. The water — so the tradition appears to have run — was granted for the sake of Miriam, her merit being that, at the peril of her life, she had watched the ark in which lay the infant Moses. It followed the march over mountains and into valleys, encircling the entire camp, and furnishing water to every man at his own tent door. This it did till her death (Num. xx. 1), at which time it disappeared for a season, apparently rendering a special act necessary on each future occasion for its evocation. The striking of the rock at Kadesh (Num. xx. 10) was the first of these; the digging of the well at Beer by the staves of the princes, the second. Miriam's well at last found a home in a gulf or recess in the sea of Galilee, where at certain seasons its water flowed and was resorted to for healing purposes (Targums Onkelos, and Ps. Jon. Num. xx. 1, xxi. 18, and also the quotations from the Talmud in Lightfoot on John v. 4 [and Wetstein on 1 Cor. x. 4]).

2. A place to which Jotham, the son of Gideon, fled for fear of his brother Abimelech (Judg. ix. 21). There is nothing in the text or elsewhere to indicate its position (LXX. Vat. Βαιήρ; the Alex.

[a] There is no connection between the "gathering" in ver. 16 and that in xx. 8. From the A. V. it might be inferred that the former passage referred to the event described in the latter; but the two words rendered "gather" are radically different, — הָקְהֵל in xx., אָסַף in xxi.

entirely alters the passage — καὶ ἐπορεύθη ἐν ὁδῷ καὶ ἔφυγεν εἰς Ῥαμά; Vulg. *in Bera*). G.

* Some have thought this second Beer to be the same as Beeroth (which see), to which the objection is that Jotham would not have been secure in a place so near Shechem. Dr. Robinson heard of a deserted village *el-Bireh* near the border of the plain of Philistia, of course much more remote from Shechem, and affording an opportunity of ready escape thence into the desert if necessary; and he inquires whether Beer may not possibly have been there (*Res.* ii. 132). A name like this must have been given to many places. H.

BEERA (בְּאֵרָא [*a well*]: Βεηρά; [Vat. Βαιαλα:] *Bera*), son of Zophah, of the tribe of Asher (1 Chr. vii. 37).

BEERAH (בְּאֵרָה [*a well*]: Βεήλ; Alex. Βεηρα: *Beera*), prince (נָשִׂיא) of the Reubenites, carried away by Tiglath-Pileser (1 Chr. v. 6).

BEER-ELIM (בְּאֵר אֵלִים, *well of heroes*: φρέαρ τοῦ Αἰλείμ [Sin. Αιλιμ, Comp. Alc. Ἐλείμ]: *puteus Elim*), a spot named in Is. xv. 8 as on the "border of Moab," apparently the south, Eglaim being at the north end of the Dead Sea. The name points to the well dug by the chiefs of Israel on their approach to the promised land, close by the "border of Moab" (Num. xxi. 16; comp. 13), and such is the suggestion of Gesenius (*Jesaia*, 533). [BEER, 1.] Beer-elim was probably chosen by the Prophet out of other places on the boundary on account of the similarity between the sound of the name and that of יְיַלֵּלָה — the "howling" which was to reach even to that remote point (Ewald, *Proph.* i. 233). G.

BEERI (בְּאֵרִי, *fontanus*, Gesen.; *illustrious*, Fürst:[a] [Βεάχ, Alex.] Βεηρ, Gen., Βεηρεί, Hos.: *Beeri*). 1. The father of Judith, one of the wives of Esau (Gen. xxvi. 34). There need be no question that Judith, daughter of Beeri, is the same person as is called in the genealogical table (Gen. xxxvi. 2) Aholibamah, daughter of Anah, and consequently Beeri and Anah must be regarded as names of the same person. There is the further difficulty that Beeri is spoken of as a Hittite, whilst Anah is called a Horite and also a Hivite, and we have thus three designations of race given to the same individual. It is stated under ANAH that Hivite is most probably to be regarded as an error of transcription for Horite. With regard to the two remaining names the difficulty does not seem to be formidable. It is agreed on all hands that the name Horite (חֹרִי) signifies one who dwells in a hole or cave, a Troglodyte: and it seems in the highest degree probable that the inhabitants of Mount Seir were so designated because they inhabited the numerous caverns of that mountainous region. The name therefore does not designate them according to their race, but merely according to their mode of life, to whatever race they might belong. Of their race we know nothing except indeed what the conjunction of these two names in reference to the same individual may teach us: and from this case we may fairly conclude that these Troglodytes or Horites belonged in part at least to the widely extended Canaanitish tribe of the Hittites. On this supposition the difficulty vanishes, and each of the accounts gives us just the information we might expect. In the narrative, where the stress is laid on Esau's wife being of the race of Canaan, her father is called a Hittite; whilst in the genealogy, where the stress is on Esau's connection by marriage with the previous occupants of Mount Seir, he is most naturally and properly described under the more precise term Horite.

2. Father of the prophet Hosea (Hos. i. 1). F. W. G.

BEER-LAHAI-ROI (בְּאֵר לַחַי רֹאִי *well of the living and seeing [God]*: φρέαρ οὗ ἐνάπιον εἶδον; τὸ φρέαρ τῆς ὁράσεως: *puteus viventis et videntis me*), a well, or rather a living spring[b] (A. V. *fountain*, comp. Gen. xvi. 7), between Kadesh and Bered, in the wilderness, "in the way to Shur," and therefore in the "south country" (Gen. xxiv. 62), which, according to the explanation of the text, was so named by Hagar because God saw her (רֹאִי) there (Gen. xvi. 14). From the fact of this etymology not being in agreement with the formation of the name, it has been suggested (Ges. *Thes.* 175) that the origin of the name is Lechi (comp. Judg. xv. 9, 19). It would seem, however, that the Lechi of Samson's adventure was much too far north to be the site of the well Lachai-roi.

By this well Isaac dwelt both before and after the death of his father (Gen. xxiv. 62, xxv. 11). In both these passages the name is given in the A. V. as "the well Lahai-roi."

Mr. Rowland announces the discovery of the well Lahai-roi at *Moyle* or *Moilahi*, a station on the road to Beer-sheba, 10 hours south of *Ruheibeh*; near which is a hole or cavern bearing the name of *Beit Hagar* (Ritter, *Sinai*, 1086, 7); but this requires confirmation.

This well is not to be confounded with that near which the life of Ishmael was preserved on a subsequent occasion (Gen. xxi. 19) and which, according to the Moslem belief, is the well *Zem-zem* at Mecca. G.

BEEROTH (בְּאֵרוֹת, *wells*: Βηρώτ, Βεηρωθά, Βηρώθ: *Beroth*) one of the four cities of the Hivites who deluded Joshua into a treaty of peace with them, the other three being Gibeon, Chephirah, and Kirjath-Jearim (Josh. ix. 17). Beeroth was with the rest of these towns allotted to Benjamin (xviii. 25), in whose possession it continued at the time of David, the murderers of Ishbosheth being named as belonging to it (2 Sam. iv. 2). From the notice in this place (verse 2, 3) it would appear that the original inhabitants had been forced from the town, and had taken refuge at Gittaim (Neh xi. 33), possibly a Philistine city.

Beeroth is once more named with Chephirah and Kirjath-Jearim in the list of those who returned from Babylon (Ezr. ii. 25; Neh. vii. 29; 1 Esdr. v. 19). [BEROTH.]

Beeroth was known in the times of Eusebius, and his description of its position (*Onom. Beeroth*, with the corrections of Reland, 618, 9; Rob. i. 452, note) agrees perfectly with that of the modern *el-Bireh*, which stands at about 10 miles north of

[a] According to Fürst, *Erklärer*, "explainer" (not "illustrious" as represented above). F.

[b] One of the very few cases in which the two words עַיִן, *Ain*, a living spring, and בְּאֵר, *Beer* an artificial well, are applied to the same thing.

Jerusalem by the great road to *Nâblus*, just below a ridge which bounds the prospect northwards from the Holy city (Rob. i. 451, 2; ii. 262). No mention of Beeroth beyond those quoted above is found in the Bible, but one link connecting it with the N. T. has been suggested, and indeed embodied in the traditions of Palestine, which we may well wish to regard as true, namely, that it was the place at which the parents of "the child Jesus" discovered that he was not among their "company" (Luke ii. 43-45). At any rate the spring of *el-Bireh* is even to this day the customary resting-place for caravans going northward, at the end of the first day's journey from Jerusalem (Stanley, 215; Lord Nugent, ii. 112; Schubert in Winer, *s. v.*).

Besides Rimmon, the father of Baanah and Rechab, the murderers of Ishbosheth [2 Sam. iv. 2, 5, 9] we find Nahari "the Beerothite" (הַבְּאֵרֹתִי: Βηθωραῖος; [Vat.^{2} Alex. Βηρωθαιος:] 2 Sam. xxiii. 37), or "the Berothite" (הַבֵּרֹתִי: ὁ Βηρωθί; [Alex. Βηρωθ,] 1 Chr. xi. 39), one of the "mighty men" of David's guard. G.

* As liable to less molestation from the Samaritans, especially when the object of going to Jerusalem was to keep the festivals (comp. Luke ix. 53), it may be presumed that the Galilean caravans would usually take the longer route through Perœa; and hence in returning they would be likely to make the first day's halt near the eastern foot of the Mount of Olives (about 2 miles). It is not customary in the East to travel more than 1 or 2 hours the first day; and in this instance they would encamp earlier still, because to go further would have been to encounter the night-perils of the desert between Jerusalem and Jericho. The συνοδία (Luke ii. 44) shows that the holy family travelled in a caravan. Books of travel abundantly illustrate this custom as to the extent of the first day's journey. See, for example, Maundrell's *Journey from Aleppo to Jerusalem* (1697) p. 1; Richardson's *Travels along the Mediterranean*, ii. 174; Beldam's *Recollections of Scenes in the East*, i. 281; Miss Martineau's *Eastern Life*, ii. 194; Burckhardt's *Reisen in Syrien*, i. 113.[a] It is not surprising, under such circumstances, that Jesus was not missed till the close of this first brief day. The time to Beeroth (*Bireh*) would be greater, but not so great as to make the separation a cause of anxiety to the parents; and so much the less, as one of the objects of stopping so soon was to see whether the party was complete — whether all had arrived at the place of rendezvous. On this incident, see *Life of our Lord*, by Mr. Andrews, p. 103. H.

BEE'ROTH OF THE CHILDREN OF JA'AKAN (בְּאֵרֹת בְּנֵי־יַעֲקָן: Βηρὼθ υἱῶν Ἰακίμ; [Vat.] Alex. Ἰακειμ: *Beroth filiorum Jacan*), the wells of the tribe of Bene-Jaakan, which formed one of the halting-places of the Israelites in the desert (Deut. x. 6). In the lists in Num. xxxiii., the name is given as BENE-JAAKAN only. G.

BEE'ROTHITE. [BEEROTH.]

BE'ER-SHE'BA (בְּאֵר שָׁבַע, בְּאֵר שֶׁבַע, *well of swearing*, or *of seven*: Φρέαρ ὁρκισμοῦ, and Φρέαρ τοῦ ὅρκου, in Genesis; Βηρσαβεέ in Joshua and later books; Jos. Βηρσουβαί· ὄρκιον δὲ φρέαρ λέγοιτο ἄν: *Bersabee*), the name of one of the oldest places in Palestine, and which formed, according to the well-known expression, the southern limit of the country.

There are two accounts of the origin of the name.[b] 1. According to the first, the well was dug by Abraham, and the name given, because there he and Abimelech the king of the Philistines "sware" (נִשְׁבְּעוּ) both of them (Gen. xxi. 31). But the compact was ratified by the setting apart of "seven ewe lambs;" and as the Hebrew word for "seven" is שֶׁבַע, *Sheba*, it is equally possible that this is the meaning of the name. It should not be overlooked that here, and in subsequent earlier notices of the place, it is spelt *Beer-shaba* (בְּאֵר שָׁבַע).

2. The other narrative ascribes the origin [or reaffirmation] of the name to an occurrence almost precisely similar, in which both Abimelech the king of the Philistines, and Phichol his chief captain, are again concerned, with the difference that the person on the Hebrew side of the transaction is Isaac instead of Abraham (Gen. xxvi. 31-33). Here there is no reference to the "seven" lambs, and we are left to infer the derivation of Shibeah (שִׁבְעָה, not "Shebah," as in the A. V.) from the mention of the "swearing" (נִשְׁבְּעוּ) in ver. 31.

If we accept the statement of verse 18 as referring to the same well as the former account, we shall be spared the necessity of inquiring whether these two accounts relate to separate occurrences, or refer to one and the same event, at one time ascribed to one, at another time to another of the early heroes and founders of the nation. There are at present on the spot two principal wells, and five smaller ones. They are among the first objects encountered on the entrance into Palestine from the south, and being highly characteristic of the life of the Bible, at the same time that the identity of the site is beyond all question, the wells of Beer-sheba never fail to call forth the enthusiasm of the traveller.

The two principal wells — apparently the only ones seen by Robinson — are on or close to the northern bank of the *Wady es-Seba'*. They lie just a hundred yards apart, and are so placed as to be visible from a considerable distance (Bonar, *Land of Prom.* 1). The larger of the two, which lies to the east, is, according to the careful measurements of Dr. Robinson, 12½ feet diam., and at the time of his visit (Apr. 12) was 44½ feet to the surface of the water: the masonry which incloses the well reaches downward for 28½ feet.

The other well is 5 feet diam. and was 42 feet to the water. The curb-stones round the mouth of both wells are worn into deep grooves by the action of the ropes of so many centuries, and "look as if frilled or fluted all round." Round the larger well there are nine, and round the smaller five large stone troughs — some much worn and broken, others nearly entire, lying at a distance of 10 or 12 feet from the edge of the well. There were formerly ten of these troughs at the larger well. The circle

a * Dr. Friedr. Strauss in his *Helon's Wallfahrt nach Jerusalem* (i. 63) with the accuracy so characteristic of that charming work, makes the first day's journey of the pilgrims but 1½ hour, after starting from Alexandria on their march. H.

b * Two accounts, one probably of the origin, and the other of a renewal, of the name, after a long interval. H.

Digitized by Google

ground is carpeted with a sward of fine short grass with crocuses and lilies (Bonar, 5, 6, 7). The water is excellent, the best, as Dr. R. emphatically records, which he had tasted since leaving Sinai.

The five lesser wells — apparently the only ones seen by Van de Velde — are according to his account and the casual notice of Bonar, in a group in the bed of the wady, not on its north bank, and at so great a distance from the other two that the latter were missed by Lieut. V.

On some low hills north of the large wells are scattered the foundations and ruins of a town of moderate size. There are no trees or shrubs near the spot. So much for the actual condition of Beer-sheba.

After the digging of the well Abraham planted a "grove" (אֶשֶׁל, *'eshel*) as a place for the worship of Jehovah, and here he lived until the sacrifice of Isaac, and for a long time afterwards, xxi. 23 — xxii. 1, 19. Here also Isaac was dwelling at the time of the transference of the birthright from Esau to Jacob (xxvi. 33, xxviii. 10), and from the patriarchal encampment round the wells of his grandfather, Jacob set forth on the journey to Mesopotamia which changed the course of his whole life. Jacob does not appear to have revisited the place until he made it one of the stages of his journey down to Egypt. He then halted there to offer sacrifice to "the God of his father," doubtless under the sacred grove of Abraham.

From this time till the conquest of the country we lose sight of B., only to catch a momentary glimpse of it in the lists of the "cities" in the extreme south of Judah (Josh. xv. 28) given to the tribe of Simeon (xix. 2; 1 Chr. iv. 28). Samuel's sons were judges in Beer-sheba (1 Sam. viii. 2), its distance no doubt precluding its being among the number of the "holy cities" (LXX. τοῖς ἡγιασμένοις πόλεσι) to which he himself went in circuit every year (vii. 16). By the times of the monarchy it had become recognized as the most southerly place of the country. Its position as the place of arrival and departure for the caravans trading between Palestine and the countries lying in that direction would naturally lead to the formation of a town round the wells of the patriarchs, and the great Egyptian trade begun by Solomon must have increased its importance. Hither Joab's census extended (2 Sam. xxiv. 7; 1 Chr. xxi. 2), and here Elijah bade farewell to his confidential servant (יְהוָה נַעֲרוֹ) before taking his journey across the desert to Sinai (1 K. xix. 3). From Dan to Beer-sheba (Judg. xx. 1, &c.), or from Beer-sheba to Dan (1 Chr. xxi. 2; comp. 2 Sam. xxiv. 2), now became the established formula for the whole of the promised land; just as "from Geba to B." (2 K. xxiii.), or "from B. to Mount Ephraim" (2 Chr. xix. ' was that for the southern kingdom after the ısruption. After the return from the Captivity ,he formula is narrowed still more, and becomes from B. to the Valley of Hinnom" (Neh. xi. 30).

One of the wives of Ahaziah, king of Judah, Zibiah mother of Joash, was a native of Beer-sheba (2 K. xii. 1; 2 Chr. xxiv. 1). From the incidental references of Amos, we find that, like Bethel and Gilgal, the place was at this time the seat of an idolatrous worship, apparently connected in some intimate manner with the northern kingdom (Am. v. 5, viii. 14). But the allusions are so slight that nothing can be gathered from them, except that in the latter of the two passages quoted above we have perhaps preserved a form of words or an adjuration used by the worshippers, "Live the 'way' of Beer-sheba!"[a] After this, with the mere mention that Beer-sheba and the villages round it ("daughters") were re-inhabited after the Captivity (Neh. xi. 30), the name dies entirely out of the Bible records; like many other places, its associations are entirely confined to the earlier history, and its name is not even once mentioned in the New Testament.

But though unheard of, its position insured a continued existence to Beer-sheba. In the time of Jerome it was still a considerable place (*oppidum*. Quæst. ad Gen. xvii. 30; or *vicus grandis*, Onom.), the station of a Roman præsidium; and later it is mentioned in some of the ecclesiastical lists as an episcopal city under the Bishop of Jerusalem (Reland, p. 620). Its present condition has been already described. It only remains to notice that the place retains its ancient name as nearly similar in sound as an Arabic signification will permit — *Bîr es-Sebâ* — the "well of the lion," or "of seven.' G.

BEESH'TERAH (בְּעֶשְׁתְּרָה: ἡ Βοσορά, Alex. Βεεθαρα; [Comp. Ald. Βεεσθερά:] *Bosra*), one of the two cities allotted to the sons of Gershom, out of the tribe of Manasseh beyond Jordan (Josh. xxi. 27). By comparison with the parallel list in 1 Chr. vi. 71, Beeshterah appears to be identical with Ashtaroth. In fact the name is considered by Gesenius as merely a contracted form of Beth-Ashtaroth, the house of A. (*Thes.* 196; comp. 175). [Bosor.] G.

BEETLE. See *Chargôl* (חַרְגֹּל), *s. v.* Locust.

BEHEADING. [Punishments.]

BEHE'MOTH (בְּהֵמוֹת:[b] θηρία: *Behemoth*). This word has long been considered one of the *dubia vexata* of critics and commentators, some of whom, as Vatablus, Druisius, Grotius (*Crit. Sac. Annot. ad Job.* xl.), Pfeiffer (*Dubia vexata S S.*, p. 594, Dresd. 1679), Castell (*Lex. Hept.* p. 292), A. Schultens (*Comment. in Job* xl.), Michaelis[c] (*Suppl. ad Lex. Heb.* No. 208), have understood thereby the elephant; while others, as Bochart (*Hieroz.* iii. 705), Ludolf (*Hist. Æthiop.* i. 11), Shaw (*Trav.* ii. 299, 8vo. Lond.), Scheuchzer (*Phys. Sac.* on Job xl.), Rosenmüller (*Not. ad Bochart. Hieroz.* iii. 705, and *Schol. ad Vet. Test.* in Job xl.), Taylor (*Appendix to Calmet's Dict. Bibl.* No. lxv.), Harmer (*Observations*, ii. 319),

[a] There is a correspondence worth noting between the word "way" or "manner" in this formula (הַדֶּרֶךְ, literally "the road"), and the word ἡ ὁδός, "the way" (A. V. incorrectly "that way"), by which the new religion is designated in the Acts of the Apostles (see ix. 2 &c.).

[b] Bochart, Gesenius, Fürst, Jablonski, and others, are disposed to assign to this word an Egyptian origin, *Pehemous*, or *Pehemout*, i. e. *bos maximus*. Bochart, and Gesenius after him, believe the word is the *plural majestatis* of בְּהֵמָה. Rosenmüller's objection to the Coptic origin of the word is worthy of observation, — that, if this was the case, the LXX. interpreters would not have given θηρία as its representative.

[c] Michaelis translates בְּהֵמוֹת by *jumenta*, and thinks the name of the elephant has dropped out "Mihi videtur nomen elephantis forte פִּיל excidisse."

Digitized by Google

Gesenius (*Thes.* s. v. בְּהֵמוֹת), Fürst (*Concord. Heb.* s. v.), and English commentators generally, believe the hippopotamus to be denoted by the origina. word. Other critics, amongst whom is Lee (*Comment. on Job* xl., and *Lex. Heb.* s. v. בְּהֵמוֹר), consider the Hebrew term as a plural noun for "cattle" in general; it being left to the reader to apply to the Scriptural allusions the particular animal, which may be, according to Lee, "either the horse or wild ass or wild bull"(!);[a] compare also Reiske, *Conjecturæ in Job.* p. 167. Dr. Mason Good (*Book of Job literally translated*, p. 473, Lond. 1712) has hazarded a conjecture that the *behemoth* denotes some extinct pachyderm like the mammoth, with a view to combine the characteristics of the hippopotamus and elephant, and so to fulfill all the Scriptural demands; compare with this Michaelis (*Sup. ad Lex. Heb.* No. 208), and Hasæus (in *Dissertat. Syllog.* No. vii. § 37 and § 38, p. 506), who rejects with some scorn the notion of the identity of behemoth and mammoth. Dr. Kitto (*Pict. Bib.* Job xl.) and Col. Hamilton Smith (Kitto's *Cycl. Bib. Lit.*, art. *Behemoth*), from being unable to make *all* the Scriptural details correspond with any one particular animal, are of opinion that behemoth is a plural term, and is to be taken "as a poetical personification of the great pachydermata generally, wherein the idea of hippopotamus is predominant." The term *behemoth* would thus be the counterpart of *leviathan*, the animal mentioned next in the book of Job; which word, although its signification in that passage is restricted to the crocodile, does yet stand in Scripture for a python, or a whale, or some other huge monster of the deep. [LEVIATHAN.] We were at one time inclined to coincide with this view, but a careful study of the whole passage (Job xl. 15–24) has led us to the full conviction that the hippopotamus alone is the animal denoted, and that *all* the details descriptive of the behemoth accord entirely with the ascertained habits of that animal.[b]

Gesenius and Rosenmüller have remarked that, since in the first part of Jehovah's discourse (Job

Hippopotamus amphibius.

xxxviii., xxxix.) *land animals and birds* are mentioned, it suits the general purpose of that discourse better to suppose that *aquatic or amphibious* creatures are spoken of in the last half of it; and that since the leviathan, by almost universal consent, denotes the crocodile, the behemoth seems clearly to point to the hippopotamus, his associate in the Nile. Harmer (*Observ.* ii. 319) says "there is a great deal of beauty in the ranging the descriptions of the behemoth and the leviathan, for in the Mosaic pavement the people of an Egyptian barque are represented as darting spears or some such weapons at one of the river-horses, as another of them is pictured with two sticking near his shoulders. It was then a customary thing with the old Egyptians thus to attack these animals (see also Wilkinson, *Anc. Egypt.* iii. 71); if so, how beautiful is the arrangement: there is a most happy gradation; after a grand but just representation of the terribleness of the river-horse, the Almighty is represented as going on with his expostulations something after this manner: — 'But dreadful as this animal is, barbed irons and spears have sometimes prevailed against him; but what wilt thou do with the crocodile? Canst thou fill his skin with barbed irons?'" &c., &c. In the *Lithostrotum Prænestinum*, to which Mr. Harmer refers, there are two crocodiles, associates of three river-horses, which are represented without spears sticking in them, though they seem to be within shot.

It has been said that some parts of the description in Job cannot apply to the hippopotamus: the 20th verse for instance, where it is said, "the mountains bring him forth food." This passage, many writers say, suits the elephant well, but cannot be applied to the hippopotamus, which is never seen on mountains. Again, the 24th verse — "his nose pierceth through snares" — seems to be spoken of the trunk of the elephant, "with its extraordinary delicacy of scent and touch, rather than to the obtuse perceptions of the river-horse." In answer to the first objection it has been stated, with great reason, that the word *hârim* (הָרִים) is not necessarily to be restricted to what we understand commonly by the expression "mountains." In the Prænestine pavement alluded to above, there are to be seen here and there, as Mr. Harmer has observed, "hillocks rising above the water." In Ez. xliii. 15 (margin), the altar of God, only ten cubits high and fourteen square, is called "the mountain of God." "The eminences of Egypt, which appear as the inundation of the Nile decreases, may undoubtedly be called *mountains* in the poetical language of Job." But we think there is no occasion for so restricted an explanation. The hippopotamus, as is well known, frequently leaves the water and the river's bank as night approaches, and makes inland excursions for the sake of the pasturage, when he commits sad work among the growing crops (Hasselquist, *Trav.* p. 188). No doubt he might be often observed on the hill-sides near the spots frequented by him. Again, it must be remembered that the "mountains" are mentioned by way of contrast to the natural habits of aquatic animals generally, which never go far from the water and the banks of the river: but the behemoth, though passing much of his time in the water and in "the covert of the reed and fens," eateth grass like cattle, and feedeth on the hill-sides in company with the beasts of the field.[c] There is much beauty in the passages which contrast the habits of the hippopotamus, an amphibious animal,

[a] Most disappointing are the arguments of the late Professor Lee as to "Behemoth" and "Leviathan," both critically and zoölogically.

[b] See Dr. Conant's note (*Translation of Job*, p. 155) in accordance with this opinion. H.

[c] A recent traveller in Egypt, the Rev. J. L. Errington, writes to us — "The valley of the Nile in Upper Egypt and Nubia is in parts so very narrow that the mountains approach within a few hundred yards, and even less, to the river's bank; the hippopotamus therefore might well be said to get its food from the mountains, on the sides of which it would grow."

Digitized by Google

with those of herbivorous land-quadrupeds: but if the elephant is to be understood, the whole description is comparatively speaking tame.

With respect to the second objection, there is little doubt that the marginal reading is nearer the Hebrew than that of the text. "Will any take him in his sight, or bore his nose with a gin?" Perhaps this refers to leading him about alive with a ring in his nose, as, says Rosenmüller, "the Arabs are accustomed to lead camels," and we may add the English to lead bulls, "with a ring passed through the nostrils." The expression in verse 17, "he bendeth his tail like a cedar," has given occasion to much discussion; some of the advocates for the elephant maintaining that the word *zánáb* (זָנָב) may denote either extremity, and that here the elephant's trunk is intended. The parallelism, however, clearly requires the posterior appendage to be signified by the term. The expression seems to allude to the stiff, unbending nature of the animal's tail, which in this respect is compared to the trunk of a strong cedar which the wind scarcely moves.

The description of the animal's lying under "the shady trees," amongst the "reeds" and willows, is peculiarly applicable to the hippopotamus.[a] It has been argued that such a description is equally applicable to the elephant; but this is hardly the case, for though the elephant is fond of frequent ablutions, and is *frequently* seen near water, yet the *constant* habit of the hippopotamus, as implied in verses 21, 22, seems to be especially made the subject to which the attention is directed. The whole passage (Job xl. 15–24) may be thus literally translated: —

"Behold now behemoth, whom I made with thee;[b] he eateth grass[c] like cattle.

"Behold now, his strength is in his loins, and his power in the muscles of his belly.

"He bendeth his tail like a cedar: the sinews of his thighs interweave one with another.

"His bones[d] are as tubes of copper; his (solid) bones each one[e] as a bar of forged iron.

"He is (one of) the chief of the works of God; his Maker hath furnished him with his scythe (tooth).[f]

"For the hills bring him forth abundant food, and all the beasts of the field have their pastime there.

"Beneath the shady trees[g] he lieth down, in the covert of the reed, and fens.[h]

"The shady trees cover him with their shadow; the willows of the stream surround him.

"Lo! the river swelleth proudly against him, yet he is not alarmed: he is securely confident though a Jordan[i] burst forth against his mouth.

"Will any one capture him when in his sight?[k] will any one bore his nostril in the snare?"

[a] "At every turn there occurred deep, still pools, and occasional sandy islands densely clad with lofty reeds. Above and beyond these reeds stood trees of immense age, beneath which grew a rank kind of grass on which the sea-cow delights to pasture" (G. Cumming, p. 297).

[b] עִמָּךְ Bochart says, "near thee," *i. e.* not far from thy own country. Gesenius and Rosenmüller translate the word "pariter atque te." Cary (*note* on *l. c.*) understands it "at the same time as I made thee."

חָצִיר, "grass," not "hay," as the Vulg. has it, and some commentators: it is from the Arabic حَصَرَ, "to be green." The Hebrew word occurs in Num. xi. 5, in a limited sense, to denote "leeks."

[d] עֲצָמָיו seems to refer here to the bones of the legs more particularly; the marrow bones.

[e] גִּידָיו perhaps here denotes the rib bones, as is proveable from the singular number גִּיד הַנָּשֶׁה which appears to be distributive and thereby emphatic. See Rosenmüll. *Schol.* in *l. c.*

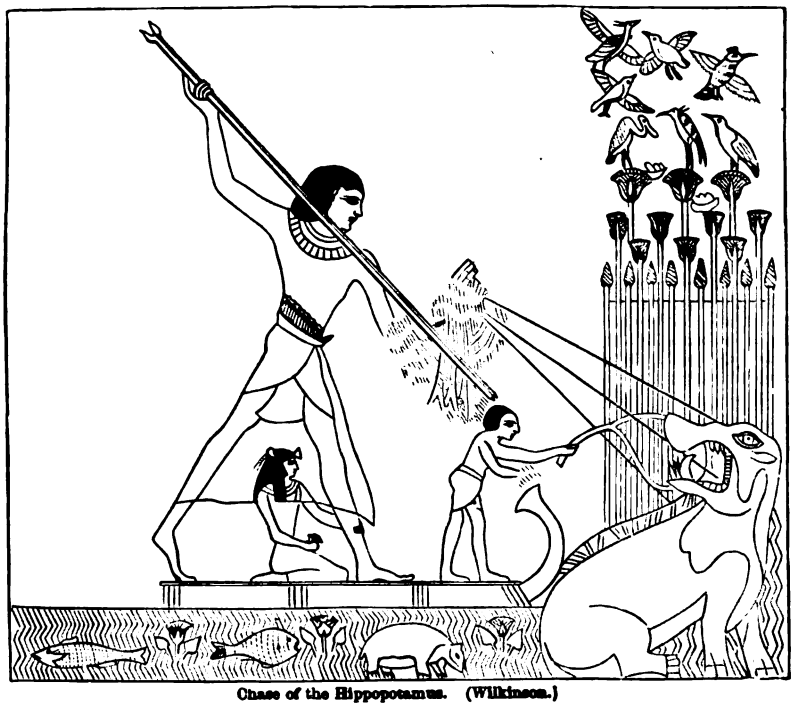
[f] "With these apparently combined teeth the hippopotamus can cut the grass as neatly as if it were mown with the scythe, and is able to sever, as if with shears, a tolerably stout and thick stem" (Wood's *Nat. Hist.* i. 762). חַרְבּוֹ perhaps = the Greek ἄρπη. See Bochart (iii. 722), who cites Nicander (*Theriac.* 365) as comparing the tooth of this animal to a scythe. The next verse explains the purpose and use of the "scythe" with which God has provided his creature; namely, in order that he may eat the grass of the hills.

[g] תַּחַת־צֶאֱלִים: ὑπὸ πανσοβενὰ δένδρα: *sub umbra*. A. Schultens, following the Arabic writers Saadias and Abulwalid, was the first European commentator to propose "the lotus-tree" as the signification of the Hebrew יְאֵאל, which occurs only in this and the following verse of Job. He identifies the Hebrew word with the Arabic ضَال, which according to some authorities is another name for the سِدْر (*sidr*), the lotus of the ancient "lotophagi," *Zizyphus lotus*. It would appear, however, from Abu'lfidli, cited by Celsius (*Hierob.* ii. 191), that the *Dhâl* is a species distinct from the *Sidr*, which latter plant was also known by the names *Salam* and *Nabk*. Sprengel identifies the *Dhâl* with the Jujube-tree (*Zizyphus vulgaris*). But even if it were proved that the צֵאל and the ضَال were identical, the explanation of the ضَال by Freytag, "Arbor quæ remota a fluminibus nonnisi pluviâ rigatur, *aliis* lotus, Kam. Dj." does not warrant us in associating the tree with the reeds and willows of the Nile. Gesenius, strange to say, supposes the reeds, out of which numerous birds are flying in the subjoined woodcut from Sir G. Wilkinson's work, and which are apparently intended to represent the *papyrus* reeds, to be the lote lilies. His words are "At any rate, on a certain Egyptian monument which represents the chase of the hippopotamus, I observe this animal concealing himself in a wood of water-lotuses — *in loti aquaticæ sylvâ*" (Wilkinson, *Manners and Customs*, iii. 71). We prefer the rendering of the A. V. "shady trees;" and so read the Vulg., Kimchi, and Aben Ezra, the Syriac and the Arabic, with Bochart Rosenmüller takes יְאֵלִים, "more Aramæo pro יְלָלִים, ut יְמָאֵם pro יְמָסֵם supra vii. 5, et Ps. lviii. 8" (*Schol. ad Job.* xl. 21).

[h] See woodcut. Compare also Bellonius, quoted by Bochart: "Vivit arundinibus et cannis sacchari et follis papyri herbæ."

[i] יַרְדֵּן, from יָרַד, "to descend." The name of Jordan is used poetically for any river, as the Greek poets use Ida for any mountain and Acheloüs for any water (Rosenmüll. *Schol.*), or perhaps in its original meaning, as simply a "rapid river." (See Stanley, *S & P.* § 37.) This verse seems to refer to the inundation of the Nile.

[k] This seems to be the meaning implied. Compare it the case of *Leviathan*, ch. xli. 2, 5; but see also Cary's rendering "He receiveth it (the river) up to his eyes.



Digitized by Google

This description agrees in every particular with the hippopotamus, which we fully believe to be the representative of the behemoth of Scripture.

According to the Talmud, Behemoth is some huge land-animal which daily consumes the grass off a thousand hills; he is to have at some future period a battle with leviathan. On account of his grazing on the mountains, he is called "the bull of the high mountains." (See Lewysohn, *Zool. des Talmuds*, p. 355.) "The 'fathers,' for the most part," says Cary (Job, p. 402) "surrounded the object with an awe equally dreadful, and in the behemoth here, and in the leviathan of the next chapter, saw nothing but mystical representations of the devil; others again have here pictured to themselves some hieroglyphic monster that has no real existence; but these wild imaginations are surpassed by that of Bolducius, who in the behemoth actually beholds Christ!"

The skin of the hippopotamus is cut into whips by the Dutch colonists of S. Africa, and the monuments of Egypt testify that a similar use was made of the skin by the ancient Egyptians (*Anc. Egypt.* iii. 73). The inhabitants of S. Africa hold the flesh of the hippopotamus in high esteem; it is said to be not unlike pork.

The hippopotamus belongs to the order *Pachydermata*, class *Mammalia*. W. H.

Chase of the Hippopotamus. (Wilkinson.)

BE'KAH. [Weights.]

BEL. [Baal.]

BEL AND DRAGON. [Daniel, Apocryphal additions to.]

BE'LA (בֶּלַע: Βαλά, and Βαλέ, and Βαλάκ, Gen. xiv. 2, 8: *Bela; a swallowing up*, or *destruction*. In the *Liber Nom. Hebr.*, in St. Jerome's works, tom. ii., it is corrupted to Ζαλαί, in the Cod. Reg.; but in the Cod. Colbert. it is written Βάλλα,[a] and interpreted *καταποντισμός* (see Ps. lv. (liv.) 9, Sept.). Jerome appears to confound it with בָּעַל, where he renders it "*habens*, sive *devorans*;" and with בָּלָה, where he says, "Balla, *absorpta* sive *inveterata*").

1. [Βαλάκ: *Bala.*] One of the five cities of the plain which was spared at the intercession of Lot, and received the name of Zoar (צוֹעַר), *smallness*, i. e. *a little one* (Gen. xiv. 2, xix. 22). It lay on the southern extremity of the Dead Sea, on the frontier of Moab and Palestine (Jerome on Is. xv.), and on the route to Egypt; the connection in which it is found, Is. xv. 5; Jer. xlviii. 34; Gen. xiii. 10. We first read of Bela in Gen. xiv. 2, 8, where it is named with Sodom, Gomorrha, Admah, and Zeboiim, as forming a confederacy under their respective kings, in the vale of Siddim, to resist the supremacy of the king of Shinar and his associates. It is singular that the king of Bela is the only one of the five whose name is not given, and this suggests the probability of *Bela* having been his own name, as well as the name of his city, which may have been so called from him. The tradition of the Jews was that it was called *Bela* from having been repeatedly engulfed by earthquakes; and in the passage Jer. xlviii. 34, "From Zoar even unto Horonaim (have they uttered their voice) as a heifer[b] of three years old," and Is. xv. 5, they

[a] Βαλλά is also the LXX.'s version of *Bera*, Gen. xiv. 2

[b] There can be no doubt that in both passages the cry of the distressed Moabites is compared to the lowing

absurdly fancied an allusion to its destruction by three earthquakes (Jerome, *Quæst. Heb. in Gen.* xiv.). There is nothing improbable in itself in the supposed allusion to the *swallowing up* of the city by an earthquake, which בָּלַע exactly expresses (Num. xvi. 30); but the repeated occurrence of בָּלַע, and words compounded with it, as names of men, rather favors the notion of the city having been called *Bela* from the name of its founder. This is rendered yet more probable by *Bela* being the name of an Edomitish king in Gen. xxxvi. 32. For further information see De Saulcy's *Narrative*, i. 457–481, and Stanley's *S. & P.* 285. [ZOAR.]

2. [Βαλάκ: *Bela, Bile* in 1 Chr.] Son of Beor, who reigned over Edom in the city of Dinhabah, eight generations before Saul, king of Israel, or about the time of the Exodus. Bernard Hyde, following some Jewish commentators (Simon. *Onomast.* 142, note), identifies this Bela with Balaam the son of Beor; but the evidence from the name does not seem to prove more than identity of family and race. There is nothing whatever to guide us as to the age of Beor, or Bosor, the founder of the house from which Bela and Balaam sprung. As regards the name of Bela's royal or native city Dinhabah, which Fürst and Gesenius render "place of plunder," it may be suggested whether it may not possibly be a form of דַּהֲבָה, the Chaldee for *gold*, after the analogy of the frequent Chaldee resolution of the dageah forte into nun. There are several names of places and persons in Idumea which point to gold as found there — as DIZAHAB, Deut. i. 1, "place of gold;" MEZAHAB, "waters of gold," or "gold-streams," Gen. xxxvi. 39.[a] Compare Dehebris, the ancient name of the Tiber, famous for its yellow waters. If this derivation for Dinhabah be true, its Chaldee form would not be difficult to account for, and would supply an additional evidence of the early conquests of the Chaldees in the direction of Idumea. The name of Bela's ancestor Beor, בְּעֹר, is of a decidedly Chaldee or Aramæan form, like Peor פְּעֹר, Pethor פְּתוֹר, Rehob רְחֹב, and others; and we are expressly told that Balaam the son of Beor dwelt in Pethor, which is by the river of the land of the children of his people, *i. e.* the river Euphrates; and he himself describes his home as being in Aram (Num. xxii. 5, xxiii. 7). Saul again, who reigned over Edom after Samlah, came from Rehoboth by the river Euphrates (Gen. xxxvi. 37). We read in Job's time of the Chaldæans making incursions into the land of Uz, and carrying off the camels, and slaying Job's servants (Job i. 17). In the time of Abraham we have the king of Shinar apparently extending his empire so as to make the kings on the borders of the Dead Sea his tributaries, and with his confederates extending his conquests into the very country which was afterwards the land of Edom (Gen. xiv. 6). Putting all this together, we may conclude with some confidence that Bela the son of Beor, who reigned over Edom, was a Chaldæan by birth, and reigned in Edom by conquest. He may have been contemporary with Moses and Balaam. Hadad, of which name there were two kings (Gen. xxxvi. 35, 39), is probably another instance of an Aramæan king of Edom, as we find the name Benhadad as that of the kings of Syria, or Aram, in later history (1 K. xx.). Compare also the name of Hadad-ezer, king of Zobah, in the neighborhood of the Euphrates (2 Sam. viii. 3, &c.). The passage Gen. xxxvi. 31–39, is given in duplicate 1 Chr. i. 43–51.

3. [Βαλά, Βαλέ, etc.: *Bela*]. Eldest son of Benjamin, according to Gen. xlvi. 21,[b] Num. xxvi. 38, 1 Chr. vii. 6, viii. 1, and head of the family of the Belaites. The houses of his family, according to 1 Chr. viii. 3–5, were Addar, Gera, Abihud (read *Ehud* אֵהוּד for אֲבִיהוּד), Abishua, Naaman, Ahoah, Shupham, and Harам. Of these Ehud is the most remarkable. The exploit of Ehud the son of Gera, who shared the peculiarity of so many of his Benjamite brethren, in being left-handed (Judg. xx. 16), in slaying Eglon the king of Moab, and delivering Israel from the Moabitish yoke, is related at length Judg. iii. 14–30. The greatness of the victory subsequently obtained may be measured by the length of the rest of 80 years which followed. It is perhaps worth noticing that as we have Husham by the side of Bela among the kings of Edom, Gen. xxxvi. 34, so also by the side of Bela, son of Benjamin, we have the Benjamite family of Hushim (1 Chr. vii. 12), sprung apparently from a foreign woman of that name, whom a Benjamite took to wife in the land of Moab (1 Chr. viii. 8–11). [BECHER.]

4. [Βαλέκ; Alex. Βαλε: *Bala.*] Son of Ahaz, a Reubenite (1 Chr. v. 8). It is remarkable that his country too was "in Aroer, even unto Nebo and Baal-meon; and eastward he inhabited unto the entering in of the wilderness from the river Euphrates" (8, 9). A. C. H.

BE'LAH. [BELA, 3.]

BE'LAITES, THE (הַבָּלְעִי: ὁ Βαλί; [Vat. Alex. -λει: *Belaitæ*]), Num. xxvi. 38. [BELA, 3.]

BELEMUS (Βήλεμος: *Balsamus*), 1 Esdr. ii. 16. [BISHLAM.]

BE'LIAL. The translators of our A. V., following the Vulgate, have frequently treated the word בְּלִיַּעַל as a proper name, and given it in the form *Belial*, in accordance with 2 Cor. vi. 15 This is particularly the case where it is connected with the expressions אִישׁ, *man of*, or בֶּן *son of*: in other instances it is translated *wicked* or some equivalent term (Deut. xv. 9; Ps. xli. 8, ci. 3 Prov. vi. 12, xvi. 27, xix. 28; Nah. i. 11, 15). There can be no question, however, that the word is not to be regarded as a proper name in the O. T.; its meaning is *worthlessness*, and hence *recklessness, lawlessness*. Its etymology is uncertain: the first part בְּלִי = *without*; the second part has been variously connected with יוּל, *yoke*, as in the Vulg. (Judg. xix. 22) *Belial, id est absque jugo*, in the sense of *unbridled, rebellious*; with עָלָה, *to ascend*, as = *without ascent*, that is, *of the lowest condition*; and lastly with יָעַל, *usefulness* = *without*

of a heifer whose calf has been taken from her The ך of comparison is very frequently omitted in Hebrew poetry.

[a] In מְדִינַת הָעֲבָה, "the golden city," Is. xiv. 4, the reading is doubtful (Gesen. *in* v.).

[b] In A. V. "Belah," the ע being rendered by ה Comp. SHUAH [3]; HEZRON, 2].

worthlessness, that is, *good for nothing* (Gesen. *Thesaur.* p. 209): the latter appears to be the most probable, not only in regard to sense, but also as explaining the unusual fusion of the two words, the ו at the end of the one and at the beginning of the other leading to a *crasis*, originally in the pronunciation, and afterwards in the writing. The expression *son* or *man of Belial* must be understood as meaning simply a worthless, lawless fellow (παράνομος, LXX.): it occurs frequently in this sense in the historical books (Judg. xix. 22, xx. 13; 1 Sam. i. 16, ii. 12, x. 27, xxv. 17, 25, xxx. 22; 2 Sam. xvi. 7, xx. 1; 1 K. xxi. 10; 2 Chr. xiii. 7), and only once in the earlier books (Deut. xiii. 13). The adjunct אִישׁ is occasionally omitted, as in Sam. xxiii. 6, and Job xxxiv. 18, where בְּלִיַּעַל stands by itself, as a term of reproach. The later Hebrews used βακά and μωρέ in a similar manner (Matt. v. 22): the latter is perhaps the most analogous; in 1 Sam. xxv. 25, Nabal (נָבָל = μωρός) is described as a man of Belial, as though the terms were equivalent.

In the N. T. the term appears in the form Βελίαρ and not Βελίαλ, as given in the A. V. The change of λ into ρ was common; we have an instance even in Biblical Hebrew מַזָּרוֹת (Job xxxviii. 32) for מַזָּלוֹת 2 K. xxiii. 5); in Chaldee we meet with חַרְצָא for חַלְצִים, and various other instances; the same change occurred in the Doric dialect (φαῦρος for φαῦλος), with which the Alexandrine writers were most familiar. The term as used in 2 Cor. vi. 15 is generally understood as an appellative of Satan, as the personification of all that was bad: Bengel (*Gnomon* in loc.) explains it of Antichrist, as more strictly the opposite of Christ (*omnem colluviem antichristianam notare videtur*). W. L. B.

BELLOWS (מַפֻּחַ: φυσητήρ, LXX.). The word occurs only in Jer. vi. 29, "The bellows are burned;" where their use is to heat a smelting furnace. They were known even in the time of Moses, and perhaps still earlier, since the operations of a foundry would be almost impossible without them. A picture of two different kinds of bellows, both of highly ingenious construction, may be found in Wilkinson, *Anc. Egypt.* iii. 338. "They consisted," he says, "of a leather, secured and fitted into a frame, from which a long pipe extended for carrying the wind to the fire. They were worked

Egyptian Bellows. (F. Cailliard, *Recherches sur les Arts des Anciens Egyptiens.*)

by the feet, the operator standing upon them, with one under each foot, and pressing them alternately while he pulled up each exhausted skin with a string he held in his hand. In one instance we observe from the painting, that when the man left the bellows, they were raised as if inflated with air and this would imply a knowledge of the valve The pipes even in the time of Thothmes III., [supposed to be] the contemporary of Moses, appear to have been simply of reed, tipped with a metal point to resist the action of the fire."

Bellows of an analogous kind were early known to the Greeks and Romans. Homer (*Il.* xviii. 470) speaks of 20 φῦσαι in the forge of Hephaestos, and they are mentioned frequently by ancient authors (*Dict. of Ant.*, art. *Follis*). Ordinary hand-bellows, made of wood and kid's-skin, are used by the modern Egyptians, but are not found in the old paintings. They may however have been known, as they were to the early Greeks. F. W. F.

BELLS. There are two words thus translated in the A. V., namely, פַּעֲמוֹן, Ex. xxviii. 33 (from פָּעַם, *to strike*; κώδωνες, LXX.), and מְצִלּוֹת, Zech. xiv. 20 (τὸ ἐπὶ τὸν χαλινὸν τοῦ ἵππου, LXX.; A. V., marg. "bridles," from צָלַל, *to strike*).

In Ex. xxviii. 33 the bells alluded to were the golden ones, according to the Rabbis 72 in number (Winer, s. v. *Schellen*), which alternated with the three-colored pomegranates round the hem of the high-priest's ephod. The object of them was "that his sound might be heard when he went in unto the holy place, and when he came out, that he die not" (Ex. xxviii. 35), or "that as he went there might be a sound, and a noise made that might be heard in the temple, for a memorial to the children of his people" (Ecclus. xlv. 9). No doubt they answered the same purpose as the bells used by the Brahmins in the Hindoo ceremonies, and by the Roman Catholics during the celebration of mass (comp. Luke i. 21). To this day bells are frequently attached, for the sake of their pleasant sound, to the anklets of women. [ANKLET.] The little girls of Cairo wear strings of them round their feet (Lane, *Mod. Egypt.* ii. 370, and at Koojar, Mungo Park saw a dance "in which many performers assisted, all of whom were provided with little bells fastened to their legs and arms."

In Zech. xiv. 20 "bells of the horses" (where our marg. Vers. follows the LXX.) is probably a wrong rendering. The Hebrew word is almost the same as מְצִלְתַּיִם "a pair of cymbals," and as they are supposed to be inscribed with the words "Holiness unto the Lord," it is more probable that they are not bells, but "concave or flat pieces of brass, which were sometimes attached to horses for the sake of ornament" (Jahn, *Arch. Bibl.* § 96). Indeed they were probably the same as the שַׁרְסְרִים, μηνίσκοι (Is. iii. 18; Judg. viii. 21), *lunulæ* of gold, silver, or brass used as ornaments, and hung by the Arabians round the necks of their camels, as we still see them in England on the harness of horses. They were not only ornamental, but useful, as their tinkling tended to enliven the animals: and in the caravans they thus served the purpose of our modern sheep-bells. The comparison to the κώδωνες used by the Greeks to test horses seems out of place; and hence Archbishop Secker's explanation of the verse as meaning that

Digitized by Google

war-horses would become useless, and their trappings would be converted to sacred purposes, is untenable. The general meaning, as obvious from the context, is that true religion will then be universally professed. F. W. F.

BELMA'IM (Βελθέμ; [Vat.] Alex. Βελβαιμ; [Sin. Αβελβαιμ; Comp. Βελματμ:] *Belma*), a place which, from the terms of the passage, would appear to have been south of Dothaim (Jud. vii. 3). Possibly it is the same as BELMEN, though whether this is the case, or indeed whether either of them ever had any real existence, it is at present impossible to determine. [JUDITH.] The Syriac has Abel-mechola. G.

BEL'MEN ([Rom. Comp.] Βελμέν; [Sin.] Alex. Βελμαιν; [Vat. Βαιλμαιν]: Vulg. omits), a place named amongst the towns of Samaria as lying between Beth-horon and Jericho (Jud. iv. 4). The Hebrew name would seem to have been Abel-maim; but the only place of that name in the O. T. was far to the north of the locality here alluded to. [ABEL-MAIM.] The Syriac version has Abel-meholah, which is more consistent with the context. [ABEL-MEHOLAH; BELMAIM.] G.

BELSHAZ'ZAR (בֶּלְשַׁאצַּר, Dan. v. 1, and בֶּלְטְשַׁאצַּר, vii. 1: Βαλτάσαρ [Alex. Βαρτασαρ in Dan. v. 1]: *Baltasar*), the last king of Babylon. According to the well-known scriptural narrative, he was warned of his coming doom by the handwriting on the wall which was interpreted by Daniel, and was slain during a splendid feast in his palace. Similarly Xenophon (*Cyrop.* vii. 5, 3) tells us that Babylon was taken by Cyrus in the night, while the inhabitants were engaged in feasting and revelry, and that the king was killed. On the other hand the narratives of Berosus in Josephus (*c. Apion.* i. 20) and of Herodotus (i. 184 ff.) differ from the above account in some important particulars. Berosus calls the last king of Babylon Nabonnedus or Nabonadius (*Nabu-nit* or *Nabonahit*, i. e. *Nebo blesses*, or *makes prosperous*), and says that in the 17th year of his reign Cyrus took Babylon, the king having retired to the neighboring city of Borsippus or Borsippa (Birs-i-Nimrud), called by Niebuhr (*Lect. on Anc. Hist.* xii.) "the Chaldæan Benares, the city in which the Chaldæans had their most revered objects of religion, and where they cultivated their science." Being blockaded in that city, Nabonnedus surrendered, his life was spared, and a principality or estate given to him in Carmania, where he died. According to Herodotus the last king was called Labynetus, a name easy to reconcile with the Nabonnedus of Berosus, and the Nabannidochus of Megasthenes (Euseb. *Præp. Evang.* ix. 41). Cyrus, after defeating Labynetus in the open field, appeared before Babylon, within which the besieged defied attack and even blockade, as they had walls 300 feet high, and 75 feet thick, forming a square of 15 miles to a side, and had stored up previously several years' provision. But he took the city by drawing off for a time the waters of the Euphrates, and then marching in with his whole army along its bed, during a great Babylonian festival, while the people, feeling perfectly secure, were scattered over the whole city in reckless amusement. These discrepancies have lately been cleared up by the discoveries of Sir Henry Rawlinson; and the histories of profane writers, far from contradicting the Scriptural narrative, are shown to explain and confirm it. In 1854 he deciphered the inscriptions on some cylinders found in the ruins of Um-Qeer (the ancient Ur of the Chaldees), containing memorials of the works executed by Nabonnedus. From these inscriptions it appears that the eldest son of Nabonnedus was called Bel-shar-ezar and admitted by his father to a share in the government. This name is compounded of Bel (the Babylonian god), Shar (*a king*), and the same termination as in Nabopolassar, Nebuchadnezzar, &c., and is contracted into Belshazzar, just as Neriglissar (again with the same termination) is formed from Nergal-sharezar. In a communication to the Athenæum, No. 1377, Sir Henry Rawlinson says, "we can now understand how Belshazzar, as joint king with his father, may have been governor of Babylon, when the city was attacked by the combined forces of the Medes and Persians, and may have perished in the assault which followed; while Nabonnedus leading a force to the relief of the place was defeated, and obliged to take refuge in Borsippa, capitulating after a short resistance, and being subsequently assigned, according to Berosus, an honorable retirement in Carmania." In accordance with this view we arrange the last Chaldæan kings as follows:—Nebuchadnezzar, his son Evil-merodach, Neriglissar, Laborosoarchod (his son, a boy, killed in a conspiracy), Nabonnedus or Labynetus, and Belshazzar. Herodotus says that Labynetus was the son of Queen Nitocris; and Megasthenes (Euseb. *Chr. Arm.* p. 60) tells us that he succeeded Laborosoarchod, but was not of his family. Ναβαννίδοχον ἀποδεικνῦσι βασιλέα, προσήκοντά οἱ οὐδέν. In Dan. v. 2, Nebuchadnezzar is called the father of Belshazzar. This of course need only mean grandfather or ancestor. Now Neriglissar usurped the throne on the murder of Evil-merodach (Beros. *ap.* Joseph. *Apion.* i.): we may therefore well suppose that on the death of his son Laborosoarchod, Nebuchadnezzar's family was restored in the person of Nabonnedus or Labynetus, possibly the son of that king and Nitocris, and father of Belshazzar. The chief objection to this supposition would be that if Neriglissar married Nebuchadnezzar's daughter (Joseph. *c. Apion.* i. 21) [20, Didot's ed.], Nabonnedus would through her be connected with Laborosoarchod. This difficulty is met by the theory of Rawlinson (*Herod.* Essay viii. § 25), who connects Belshazzar with Nebuchadnezzar through his mother, thinking it probable that Nabu-nahit, whom he does not consider related to Nebuchadnezzar, would strengthen his position by marrying the daughter of that king, who would thus be Belshazzar's maternal grandfather. A totally different view is taken by Marcus Niebuhr (*Geschichte Assur's und Babel's seit Phul*, p. 91), who considers Belshazzar to be another name for Evil-merodach, the son of Nebuchadnezzar. He identifies their characters by comparing Dan. v. with the language of Berosus about Evil-merodach, προστὰς τῶν πραγμάτων ἀνόμως καὶ ἀσελγῶς. He considers that the capture of Babylon described in Daniel, was not by the Persians, but by the Medes, under Astyages (i. e. Darius the Mede), and that between the reigns of Evil-merodach or Belshazzar, and Neriglissar, we must insert a brief period during which Babylon was subject to the Medes. This solves a difficulty as to the age of Darius (Dan. v. 31; cf. Rawlinson, Essay iii § 11), but most people will probably prefer the actual facts discovered by Sir Henry Rawlinson to the theory (though doubtless

Digitized by Google

very ingenious) of Niebuhr. On Rawlinson's view, Belshazzar died B. C. 538, on Niebuhr's B. C. 550.
G. E. L. C.

BELTESHAZ'ZAR. [DANIEL.]

BEN (בֵּן [*son*]: LXX. omits: *Ben*), a Levite "of the second degree," one of the porters appointed by David to the service of the ark (1 Chr. xv. 18).

BENA'IAH [3 syl.] (בְּנָיָה and בְּנָיָהוּ = *built by Jah*: Βαναίας: *Banaïas*), the name of several Israelites: —

1. BENAIAHU; the son of Jehoiada the chief priest (1 Chr. xxvii. 5), and therefore of the tribe of Levi, though a native of Kabzeel (2 Sam. xxiii. 20; 1 Chr. xi. 22), in the south of Judah; set by David (1 Chr. xi. 25) over his body-guard of Cherethites and Pelethites (2 Sam. viii. 18; 1 K. i. 38; 1 Chr. xviii. 17; 2 Sam. xx. 23) and occupying a middle rank between the first three of the Gibborim, or "mighty men," and the thirty "valiant men of the armies" (2 Sam. xxiii. 22, 23; 1 Chr. xi. 25, xxvii. 6; and see Kennicott, *Diss.* p. 177). The exploits which gave him this rank are narrated in 2 Sam. xxiii. 20, 21; 1 Chr. xi. 22. He was captain of the host for the third month (1 Chr. xxvii. 5).

Benaiah remained faithful to Solomon during Adonijah's attempt on the crown (1 K. i. 8, 10), a matter in which he took part in his official capacity as commander of the king's body-guard (1 K. i. 32. 38, 44); and after Adonijah and Joab had both been put to death by his hand, he was raised by Solomon into the place of the latter as commander-in-chief of the whole army (ii. 35, iv. 4).

Benaiah appears to have had a son, called after his grandfather, Jehoiada, who succeeded Ahithophel about the person of the king (1 Chr. xxvii. 34). But this is possibly a copyist's mistake for "Benaiah the son of Jehoiada."

2. [Vat. Alex. om. in 2 Sam.; Vulg. in 2 Sam. and 1 Chr. xi. *Banaia.*] BENAIAH the PIRATHONITE; an Ephraimite, one of David's thirty mighty men (2 Sam. xxiii. 30; 1 Chr. xi. 31), and the captain of the eleventh monthly course (1 Chr. xxvii. 14).

3. [In 1 Chr. xv. 18, Βαναΐα.] BENAIAHU; a Levite in the time of David, who "played with a psaltery on Alamoth" (1 Chr. xv. 18, 20, xvi. 5).

4. [1 Chr. xv. 24, Βαναΐα; Vat. Alex. FA. Βανα.] BENAIAHU; a priest in the time of David, appointed to blow the trumpet before the ark (1 Chr. xv. 24, xvi. 6).

5. [Vat. om.] BENAIAH; a Levite of the sons of Asaph (2 Chr. xx. 14).

6. [Vat. Θανα βανιας.] BENAIAHU; a Levite in the time of Hezekiah, one of the "overseers (פְּקִידִים) of offerings" (2 Chr. xxxi. 13).

7. [Vat. om.; Alex. Βανια: *Banaia.*] BENAIAH; one of the "princes" (נְשִׂיאִים) of the families of Simeon (1 Chr. iv. 36).

8. BENAIAH; four laymen in the time of Ezra who had taken strange wives. [Βανία: Vulg. 1, *Banea*; 3, *Baneas*; 4, *Banaia.*] 1 (Ezr. x. 25). [BAANIAS.] 2 (Ezr. x. 30). [NAIDUS.] 3 (Ezr. x. 35), and 4 (x. 43). [BANAIAS.]

9. BENAIAHU; father of Pelatiah, "a prince of the people" in the time of Ezekiel (xi. 1, 13).

BEN-AM'MI (בֶּן־עַמִּי, *son of my kindred*), the son of the younger daughter of Lot, and the progenitor of the Ammonites (Gen. xix. 38). The reading of the LXX. and Vulgate differs from the Hebrew text by inserting the name of Ammon as well as the exclamation which originated it: καὶ ἐκάλεσε τὸ ὄνομα αὐτοῦ Ἀμμὰν λέγουσα Τὸ. γένους μου [Alex. Αμμαν ο υιος του γενους μου] *Ammon, id est filius populi mei.*

BEN'E-BE'RAK (בְּנֵי־בְרַק [*sons of lightning* or *of Barak*]: Βαναβακάρ; Alex. Βαννβαραμ: *et Bane et Barach*: Syr. ܒܢܝ ܒܪܩ), one of the cities of the tribe of Dan, mentioned only in Josh. xix. 45. The paucity of information which we possess regarding this tribe (omitted entirely from the lists in 1 Chr. ii.–viii., and only one family mentioned in Num. xxvi.) makes it impossible to say whether the "sons of Berak" who gave their name to this place belonged to Dan, or were, as we may perhaps infer from the name, earlier settlers dispossessed by the tribe. The reading of the Syriac, Baal-debac, is not confirmed by any other version. By Eusebius the name is divided (comp. Vulg.), and Βαραχαί is said to have been then a village near Azotus. No trace has been found of it.
G.

* Knobel (*Josua*, p. 471) identifies it with *Ibn Abrak*, an hour's distance from *el-Yehúdiyeh* (Jehud), according to Scholz (*Reise*, p. 256). A.

BEN'E-JA'AKAN (בְּנֵי יַעֲקָן, *children* [*sons*] *of Jaakan* [perh. *sagacious, wise*, Fürst]: Βαναλα; Alex. Βανικαν: *Benejaacan*), a tribe who gave their name to certain wells in the desert which formed one of the halting-places of the Israelites on their journey to Canaan. [BEEROTH BENE-JAAKAN.] In Num. xxxiii. 31, 32, the name is given in the shortened form of Bene-jaakan. The tribe doubtless derived its name from Jaakan, the son of Ezer, son of Seir the Horite (1 Chr. i. 42), whose name is also given in Genesis as Akan. [AKAN; JAKAN.]

The situation of these wells has not been yet identified. In the time of Eusebius (*Onom. Beroth fil. Jacin*, Ἰακείμ) the spot was shown 10 miles from Petra on the top of a mountain. Robinson suggests the small fountain *et-Taiyibeh*, at the bottom of the Pass *er-Rubdy* under Petra, a short distance from the Arabah. The word Beeroth, however, suggests not a spring but a group of artificial wells.

In the Targ. Ps. Jon. the name is given in Numbers as Aktha, בֵּירֵי עַקְתָא.
G.

BEN'E-KE'DEM (בְּנֵי קֶדֶם, *the children* [*sons*] *of the East*), an appellation given to a people, or to peoples, dwelling to the east of Palestine. It occurs in the following passages of the O. T.: (1.) Gen. xxix. 1, "Jacob came into the land of the people of the East," in which was therefore reckoned Haran. (2.) Job i. 3, Job was "the greatest of all the men of the East" [JOB]. (3.) Judg. vi. 3, 33, vii. 12, viii. 10. In the first three passages the Bene-Kedem are mentioned together with the Midianites and the Amalekites; and in the fourth the latter peoples seem to be included in this common name: "Now Zebah and Zalmunna [were] in Karkor, and their hosts with them, about fifteen thousand [men], all that were left of all the hosts of the children of the East." In the events to which these passages of Judges relate, we find a

Digitized by Google

curious reference to the language spoken by these eastern tribes, which was understood by Gideon and his servant (or one of them) as they listened to the talk in the camp; and from this it is to be inferred that they spoke a dialect intelligible to an Israelite: an inference bearing on an affinity of race, and thence on the growth of the Semitic languages. (4.) 1 K. iv. 30, "Solomon's wisdom excelled the wisdom of all the children of the East country." (5.) Is. xi. 14; Jer. xlix. 28; Ez. xxv. 4, 10. From the first passage it is difficult to deduce an argument, but the other instances, with their contexts, are highly important. In Ezekiel, Ammon is delivered to the "men of the East," and its city Rabbah is prophesied to become "a stable for *camels*, and the Ammonites a couching-place for *flocks*;" referring, apparently, to the habits of the wandering Arabs; while "palaces" and "dwellings," also mentioned and thus rendered in the A. V., may be better read "*camps*" and "*tents*." The words of Jeremiah strengthen the supposition just mentioned: "Concerning Kedar, and concerning Hazor, which Nebuchadrezzar king of Babylon shall smite, thus saith the Lord, Arise ye, go up to Kedar, and spoil the men of the East. Their *tents* and their *flocks* shall they take away: they shall take to themselves their *curtains* [i. e. *tents*], and all their vessels, and their *camels*."

Opinions are divided as to the extension of the appellation of Bene-Kedem; some (as Rosenmüller and Winer) holding that it came to signify the Arabs generally. From a consideration of the passages above cited, and that which makes mention of the land of Kedem, Gen. xxv. 6 [ISHMAEL], we think (with Gesenius) that it primarily signified the peoples of the Arabian deserts (east of Palestine and Lower Egypt), and chiefly the tribes of Ishmael and of Keturah, extending perhaps to Mesopotamia and Babylonia (to which we may suppose Kedem to apply in Num. xxiii. 7, as well as in Is. ii. 6); and that it was sometimes applied to the Arabs and their country generally. The only positive instance of this latter signification of Kedem occurs in Gen. x. 30, where "Sephar, a mount of the *East*," is by the common agreement of scholars situate in Southern Arabia [ARABIA; SEPHAR].

In the O. T. עֲרָב, with its conjugate forms, seems to be a name of the peoples otherwise called Bene-Kedem, and with the same limitations. The same may be observed of ἡ ἀνατολή in the N. T. (Matt. ii. 1 ff.). אֶרֶץ בְּנֵי קֶדֶם, בְּנֵי קֶדֶם, אֶרֶץ קֶדֶם, and יְדֵם (in the passages above referred to), are translated by the LXX. and in the Vulg., and sometimes transcribed (Κεδέμ) by the former; except LXX. in 1 K. iv. 30, and LXX. and Vulg. in Is. ii. 6, where they make Kedem to relate to ancient time. E. S. P.

BENHA'DAD [more correctly BEN-HADAD] (בֶּן־הֲדַד, *son of Hadad*: υἱὸς Ἀδερ: *Benadad*), the name of three kings of Damascus. *Hadad* or *Adad* was a Syrian god, probably the Sun (Macrob. *Saturnalia*, i. 23), still worshipped at Damascus in the time of Josephus (*Ant.* ix. 4, 6), and from it several Syrian names are derived, as Hadadezer, i. e. *Hadad has helped*. The "*son of Hadad*," therefore, means worshipper of Hadad. Damascus, after having been taken by David (2 Sam. viii. 5, 6), was delivered from subjection to his successor by Rezon (1 K. xi. 24), who "was an adversary to Israel all the days of Solomon."

BENHADAD I. was either son or grandson to Rezon, and in his time Damascus was supreme in Syria, the various smaller kingdoms which surrounded it being gradually absorbed into its territory. Benhadad must have been an energetic and powerful sovereign, and his alliance was courted both by Baasha of Israel and Asa of Judah. He finally closed with the latter on receiving a large amount of treasure, and conquered a great part of the N. of Israel, thereby enabling Asa to pursue his victorious operations in the S. From 1 K. xx. 34, it would appear that he continued to make war upon Israel in Omri's time, and forced him to make "streets" in Samaria for Syrian residents. [AHAB.] This date is B. C. 950.

BENHADAD II., son of the preceding, and also king of Damascus. Some authors call him *grandson*, on the ground that it was unusual in antiquity for the son to inherit the father's name. But Benhadad seems to have been a religious title of the Syrian kings, as we see by its reappearance as the name of Hazael's son, Benhadad III. Long wars with Israel characterized the reign of Benhadad II., of which the earlier campaigns are described under AHAB. His power and the extent of his dominion are proved by the thirty-two vassal kings who accompanied him to his first siege of Samaria. Some time after the death of Ahab, probably owing to the difficulties in which Jehoram of Israel was involved by the rebellion of Moab, Benhadad renewed the war with Israel, and after some minor attempts which were frustrated by Elisha, attacked Samaria a second time, and pressed the siege so closely that there was a terrible famine in the city, and atrocities were committed to get food no less revolting than those which Josephus relates of the siege of Jerusalem by Titus. But when the Syrians were on the very point of success, they suddenly broke up in the night in consequence of a sudden panic, under which they fancied that assistance was coming to Israel from Egypt or some Canaanitish cities as Tyre or Ramoth. Jehoram seems to have followed up this unhoped-for deliverance by successful offensive operations, since we find from 2 K. ix. 1 that Ramoth in Gilead was once more an Israelitish town. [AHAB.] Soon after Benhadad fell sick, and sent Hazael, one of his chief officers, with vast presents, to consult Elisha, who happened to be in Damascus, as to the issue of his malady. Elisha replied that the sickness was not a mortal one, but that still he would certainly die, and he announced to Hazael that he would be his successor, with tears at the thought of the misery which he would bring on Israel. On the day after Hazael's return Benhadad was murdered, but not, as is commonly thought from a cursory reading of 2 K. viii. 15, by Hazael. Such a supposition is hardly consistent with Hazael's character, would involve Elisha in the guilt of having suggested the deed, and the introduction of Hazael's name in the latter clause of ver. 15 can scarcely be accounted for, if he is also the subject of the first clause. Ewald, from the Hebrew text and a general consideration of the chapter (*Gesch des V. I.* iii. 523, *note*), thinks that one or more of Benhadad's own servants were the murderers: Calmet (*Fragm.* vii.) believes that the wet cloth which caused his death, was intended to effect his cure. This view he supports by a reference to Bruce's *Travels*, iii. 33. Hazael succeeded him perhaps because he had no natural heirs, and with

Digitized by Google

him expired the dynasty founded by Rezon. Benhadad's death was about B. C. 890, and he must have reigned some 30 years.

BENHADAD III., son of the above-mentioned Hazael, and his successor on the throne of Syria. His reign was disastrous for Damascus, and the vast power wielded by his father sank into insignificance. In the striking language of Scripture, "Jehoahaz [the son of Jehu] besought the Lord, and the Lord hearkened unto him, for he saw the oppression of Israel, because the king of Syria oppressed them; and the Lord gave Israel a savior" (2 K. xiii. 4, 5). This savior was Jeroboam II. (cf. 2 K. xiv. 27), but the prosperity of Israel began to revive in the reign of his father Jehoash, the son of Jehoahaz. When Benhadad succeeded to the throne of Hazael, Jehoash, in accordance with a prophecy of the dying Elisha, recovered the cities which Jehoahaz had lost to the Syrians, and beat him in Aphek (2 K. xiii. 17) in the plain of Esdraelon, where Ahab had already defeated Benhadad II. [AHAB.] Jehoash gained two more victories, but did not restore the dominion of Israel on the E. of Jordan. This glory was reserved for his successor. The date of Benhadad III. is B. C. 840. His misfortunes in war are noticed by Amos i. 4.

G. E. L. C.

BEN-HA'IL (בֶּן־חַיִל, *son of the host*, i. e. *warrior: Benhail*), one of the "princes" (שָׂרִים) whom king Jehoshaphat sent to teach in the cities of Judah (2 Chr. xvii. 7). The LXX. translates, *τοὺς ἡγουμένους αὐτοῦ καὶ τοὺς υἱοὺς τῶν δυνατῶν.*

BEN-HA'NAN (בֶּן־חָנָן [*son of the merciful*]: *υἱὸς Φανέ*; Alex. [*υἱος*] *Ανανι: filius Hanan*), son of Shimon, in the line of Judah (1 Chr. iv. 20).

BENI'NU (בִּנֵינוּ [*our son*]: *Βανουαΐ*; [Vat. FA. *Βενιαμειν*;] Alex. *Βανουαιαΐ*; [Ald. *Βανουναΐ*; Comp. *Βανουνέ*:] *Baninu*), a Levite; one of those who sealed the covenant with Nehemiah (Neh. x. 13 [14]).

BEN'JAMIN (בִּנְיָמִין: *Βενιαμίν, Βενιαμείν: Benjamin*). 1. The youngest of the children of Jacob, and the only one of the thirteen (if indeed there were not more: comp. "all his daughters," Gen. xxxvii. 35, xlvi. 7), who was born in Palestine. His birth took place on the road between Bethel and Bethlehem, a short distance — "a length of earth" — from the latter, and his mother Rachel died in the act of giving birth to him, naming him with her last breath Ben-oni, "son of my sorrow" (comp. 1 Sam. iv. 19–22). This was by Jacob changed into Benjamin (*Binyamin*) (Gen. xxxv. 16–18).

The name is worthy some attention. From the terms of the story it would appear to be implied that it was bestowed on the child in opposition to the desponding, and probably ominous, name given him by his dying mother, and on this assumption it has been interpreted to mean "Son of the right hand," *i. e.* fortunate, dexterous, *Felix;* as if בֶּן־יָמִין. This interpretation is inserted in the text of the Vulgate and the margin of the A. V. and has the support of Gesenius (*Thes.* 219). On the other hand the Samaritan Codex gives the name in an altered form as בני ימ, son of days, *i. e.* son of my old age (comp. Gen. xliv. 20), which is accepted by Philo, Aben-Ezra, and others. Both these interpretations are of comparatively late date, and it is notorious that such explanatory glosses are not only often invented long subsequently to the original record, but are as often at variance with the real meaning of that record. The meaning given by Josephus — *διὰ τὴν ἐπ' αὐτῷ γενομένην ὀδύνην τῇ μητρί* (*Ant.* i. 21, § 3) — is completely different from either of the above. However this may be, the name is not so pointed as to agree with any interpretation founded on "son of" — being בֶּן, and not בֶּן־. Moreover in the adjectival forms of the word the first syllable is generally suppressed, as בְּנֵי־יְמִינִי or בְּנֵי הַיְמִינִי, *i. e.* "sons of Yemini," for sons of Benjamin; אִישׁ יְמִינִי, "man of Yemini," for man of Benjamin (1 Sam. ix. 1; Esth. ii. 5); אֶרֶץ יְמִינִי, land of Yemini for land of Benjamin (1 Sam. ix. 4); as if the patriarch's name had been originally יָמִין, Yamin (comp. Gen. xlvi. 10), and that of the tribe Yeminites. These adjectival forms are carefully preserved in the LXX. [In Judg. iii. 15 and 1 Sam. ix. 1 the A. V. reads in the margin "son of Jemini," and "son of a man of Jemini."]

Until the journeys of Jacob's sons and of Jacob himself into Egypt we hear nothing of Benjamin, and as far as he is concerned those well-known narratives disclose nothing beyond the very strong affection entertained towards him by his father and his whole-brother Joseph, and the relation of fond endearment in which he stood, as if a mere darling child (comp. Gen. xliv. 20), to the whole of his family. Even the harsh natures of the elder patriarchs relaxed towards him. But Benjamin can hardly have been the "lad" which we commonly imagine him to be, for at the time that the patriarchs went down to reside in Egypt, when "every man with his house went with Jacob," ten sons are ascribed to Benjamin, — a larger number than to any of his brothers, — and two of these, from the plural formation of their names, were themselves apparently families (Gen. xlvi. 21).[a]

And here, little as it is, closes all we know of the life of the patriarch himself; henceforward the history of Benjamin is the history of the tribe. And up to the time of the entrance on the Promised Land that history is as meagre as it is afterwards full and interesting. We know indeed that shortly after the departure from Egypt it was the smallest tribe but one (Num. i. 36; comp. verse 1); that during the march its position was on the west of the tabernacle with its brother tribes of Ephraim and Manasseh (Num. ii. 18–24). We have the names of the "captain" of the tribe, when it set forth on its long march (Num. ii. 22); of the "ruler" who went up with his fellows to spy out the land (xiii. 9); of the families of which the tribe consisted when it was marshalled at the great halt in the plains of Moab by Jordan-Jericho (Num. xxvi. 38–41, 63), and of the "prince" who was chosen to assist in the dividing of the land (xxxiv. 21). These are indeed preserved to us. But there is nothing to indicate what were the characteristics and behavior of the tribe which sprang from the orphan darling of his father and brothers. No touches of personal biography like those with which

[a] According to other lists, some of these "children would seem to have been grandchildren (comp. Num xxvi. 38–41; 1 Chr. vii. 6–12, viii. 1).

Digitized by Google

are are favored concerning Ephraim (1 Chr. vii 20–23): no record of zeal for Jehovah like Levi (Ex. xxxii. 26): no evidence of special bent as in the case of Reuben and Gad (Num. xxxii.). The only foreshadowing of the tendencies of the tribe which was to produce Ehud, Saul, and the perpetrators of the deed of Gibeah, is to be found in the prophetic gleam which lighted up the dying Jacob, "Benjamin shall ravin as a wolf: in the morning he shall devour the prey, and at night he shall divide the spoil" (Gen. xlix. 27).

The proximity of Benjamin to Ephraim during the march to the Promised Land was maintained in the territories allotted to each. Benjamin lay immediately to the south of Ephraim and between him and Judah. The situation of this territory was highly favorable. It formed almost a parallelogram, of about 26 miles in length by 12 in breadth. Its eastern boundary was the Jordan, and from thence it extended to the wooded district of Kirjath-jearim, a point about eight miles west of Jerusalem, while in the other direction it stretched from the valley of Hinnom, under the "Shoulder of the Jebusite" on the south, to Bethel on the north. Thus Dan intervened between Benjamin and the Philistines, while the communications with the valley of the Jordan were in their own power. On the south the territory ended abruptly with the steep slopes of the hill of Jerusalem; on the north it melted imperceptibly into the possessions of the friendly Ephraim. The smallness of this district, hardly larger than the county of Middlesex [Eng.], was, according to the testimony of Josephus, compensated for by the excellence of the land (διὰ τὴν τῆς γῆς ἀρετήν, *Ant.* v. 1).[a] In the degenerate state of modern Palestine few traces remain of this excellence. But other and more enduring natural peculiarities remain, and claim our recognition, rendering this possession one of the most remarkable among those of the tribes.

(1.) The general level of this part of Palestine is very high, not less than 2000 feet above the maritime plain of the Mediterranean on the one side, or than 3000 feet above the deep valley of the Jordan on the other, besides which this general level or plateau is surmounted, in the district now under consideration, by a large number of eminences — defined, rounded hills — almost every one of which has borne some part in the history of the tribe. Many of these hills carry the fact of their existence in their names. Gibeon, Gibeah, Geba or Gaba, all mean "hill;" Ramah and Ramathaim, "eminence;" Mizpeh, "watch-tower;" while the "ascent of Beth-horon," the "cliff Rimmon," the "pass of Michmash" with its two "teeth of rock," all testify to a country eminently broken and hilly.

The special associations which belong to each of these eminences, whether as sanctuary or fortress, many of them arising from the most stirring incidents in the history of the nation, will be best examined under the various separate heads.

(2.) No less important than these eminences are the torrent beds and ravines by which the upper country breaks down into the deep tracts on each side of it. They formed then, as they do still, the only mode of access from either the plains of Philistia and of Sharon on the west, or the deep valley of the Jordan on the east[b] — the latter steep and precipitous in the extreme, the former more gradual in their declivity. Up these western passes swarmed the Philistines on their incursions during the times of Samuel and of Saul, driving the first king of Israel right over the higher district of his own tribe to Gilgal in the hot recesses of the Arabah, and establishing themselves over the face of the country from Michmash to Ajalon. Down these same defiles they were driven by Saul after Jonathan's victorious exploit, just as in earlier times Joshua had chased the Canaanites down the long hill of Beth-horon, and as centuries after the forces of Syria were chased by Judas Maccabæus (1 Macc. iii. 16–24).

The passes on the eastern side are of a much more difficult and intricate character than those on the western. The principal one, which, now unfrequented, was doubtless in ancient times the main ascent to the interior, leaves the Arabah behind the site of Jericho, and breaking through the barren hills with many a wild bend and steep slope, extends to and indeed beyond the very central ridge of the table-land of Benjamin, to the foot of the eminence on which stand the ruins of *Bîreh*, the ancient Beeroth. At its lower part this valley bears the name of *Wady Fûwâr*, but for the greater part of its length it is called *Wady Suweinit*. It is the main access, and from its central ravine branch out side valleys, conducting to Bethel, Michmash, Gibeah, Anathoth, and other towns. After the fall of Jericho this ravine must have stood open to the victorious Israelites, as their natural inlet to the country. At its lower end must have taken place the repulse and subsequent victory of Ai, with the conviction and stoning of Achan, and through it Joshua doubtless hastened to the relief of the Gibeonites, and to his memorable pursuit of the Canaanites down the pass of Beth-horon, on the other side of the territory of Benjamin.

Another of these passes is that which since the time of our Saviour has been the regular road between Jericho and Jerusalem, the scene of the parable of the Good Samaritan.

Others lie further north by the mountain which bears the traditional name of Quarantania; first up the face of the cliff, afterwards less steep, and finally leading to Bethel or Taiyibeh, the ancient Ophrah (Rob. i. 570).

These intricate ravines may well have harbored the wild beasts, which, if the derivation of the names of several places in this locality are to be trusted, originally haunted the district — *zeboim*, hyenas (1 Sam. xiii. 18), *shual* and *shualbim*, foxes or jackals (Judg. i 35; 1 Sam. xiii. 17), *ajalon*, gazelles.[c]

[a] A trace of the pasture lands may be found in the mention of the "herd" (1 Sam. xi. 5); and possibly others in the names of some of the towns of Benjamin: as hap-Parah, "the cow;" Zelah-ha-eleph, "the ox-rib" (Josh. xviii. 28, 28).

[b] It is perhaps hardly fanciful to ask if we may not account in this way for the curious prevalence among the names of the towns of Benjamin of the titles of tribes. Ha-Avvim, the Avites; Zemaraim, the Zemarites; ha-Ophni, the Ophnite; Chephar ha-Ammonai, the village of the Ammonites; ha-Jebusi, the Jebusite, — are all among the names of places in Benjamin; and we can hardly doubt that in these names is preserved the memory of many an ascent of the wild tribes of the desert from the sultry and open plains of the low level to the fresh air and secure fastnesses of the upper district.

[c] The subject of the connection between the topography of Benjamin and the events which took place there is treated in the most admirable manner in the 4th chapter of Mr. Stanley's *Sinai and Palestine*.

Digitized by Google

Such were the limits and such the character of the possession of Benjamin as fixed by those who originally divided the land. But it could not have been long before they extended their limits, since in the early lists of 1 Chr. viii. we find mention made of Benjamites who built Lod and Ono, and of others who were founders of Aijalon (12, 13), all which towns were beyond the spot named above as the westernmost point in their boundary. These places too were in their possession after the return from the Captivity (Neh. xi. 35).

The contrast between the warlike character of the tribe and the peaceful image of its progenitor has been already noticed. That fierceness and power are not less out of proportion to the smallness of its numbers and of its territory. This comes out in many scattered notices. (*a.*) Benjamin was the only tribe which seems to have pursued archery to any purpose, and their skill in the bow (1 Sam. xx. 20, 36; 2 Sam. i. 22; 1 Chr. viii. 40, xii. 2; 2 Chr. xvii. 17) and the sling (Judg. xx. 16) are celebrated. (*b.*) When, after the first conquest of the country, the nation began to groan under the miseries of a foreign yoke, it is to a man of Benjamin, Ehud the son of Gera, that they turn for deliverance. The story seems to imply that he accomplished his purpose on Eglon with less risk, owing to his proficiency in the peculiar practice of using his left hand, a practice apparently confined to Benjamites, though by them greatly employed (Judg. iii. 15, and see xx. 16; 1 Chr. xii. 2). (*c.*) Baanah and Rechab, "the sons of Rimmon the Beerothite of the children of Benjamin," are the only Israelites west of the Jordan named in the whole history as captains of marauding predatory "bands" (גְּדוּדִים), and the act of which they were guilty — the murder of the head of their house — hardly needed the summary vengeance inflicted on them by David to testify the abhorrence in which it must have been held by all Orientals however warlike. (*d.*) The dreadful deed recorded in Judg. xix. though repelled by the whole country, was unhesitatingly adopted and defended by Benjamin with an obstinacy and spirit truly extraordinary. Of their obstinacy there is a remarkable trait in 1 Sam. xxii. 7–18. Though Saul was not only the king of the nation, but the head of the tribe, and David a member of a family which had as yet no claims on the friendship of Benjamin, yet the Benjamites resisted the strongest appeal of Saul to betray the movements of David, and after those movements had been revealed by Doeg the Edomite (worthy member — as he must have seemed to them — of an accursed race!) they still firmly refused to lift a hand against those who had assisted him.

And yet — to return to the deed of Gibeah — in one or two of the expressions of that antique and simple narrative — the phrase "Benjamin my brother" — the anxious inquiry, "what shall we do for wives for them that remain?" — and the entreaty to be favorable to them "for our sakes" — we seem to hear as it were an echo of those terms of fond affection which have given the son of Rachel's grief so distinct a place in our minds.

That frightful transaction was indeed a crisis in the history of the tribe: the narrative undoubtedly is intended to convey that the six hundred who took refuge in the cliff Rimmon, and who were afterwards provided with wives partly from Jabesh Gilead (Judg. xxi. 10), partly from Shiloh (xxi. 21), were the only survivors. A long interval must have elapsed between so abject a condition and the culminating point at which we next meet with the tribe.[a]

Several circumstances may have conduced to its restoration to that place which it was now to assume. The Tabernacle was at Shiloh in Ephraim during the time of the last Judge; but the Ark was in Benjamin at Kirjath-jearim. Ramah, the official residence of Samuel, and containing a sanctuary greatly frequented (1 Sam. ix. 12, &c.), — Mizpeh, where the great assemblies of "all Israel" took place (1 Sam. vii. 5), — Bethel, perhaps the most ancient of all the sanctuaries of Palestine, and Gibeon, specially noted as "the great high place" (2 Chr. i. 3), were all in the land of Benjamin. These must gradually have accustomed the people who resorted to these various places to associate the tribe with power and sanctity, and they tend to elucidate the anomaly which struck Saul so forcibly, "that all the desire of Israel" should have been fixed on the house of the smallest of its tribes (1 Sam. ix. 21).

The struggles and contests which followed the death of Saul arose from the natural unwillingness of the tribe to relinquish its position at the head of the nation, especially in favor of Judah. Had it been Ephraim, the case might have been different, but Judah had as yet no connection with the house of Joseph, and was besides the tribe of David, whom Saul had pursued with such unrelenting enmity. The tact and sound sense of Abner, however, succeeded in overcoming these difficulties, though he himself fell a victim in the very act of accomplishing his purpose, and the proposal that David should be "king over Israel" was one which "seemed good to the whole house of Benjamin," and of which the tribe testified its approval, and evinced its good faith, by sending to the distant capital of Hebron a detachment of 3000 men of the "brethren of Saul" (1 Chr. xii. 29). Still the insults of Shimei and the insurrection of Sheba are indications that the soreness still existed, and we do not hear of any cordial coöperation or firm union between the two tribes until a cause of common quarrel arose at the disruption, when Rehoboam assembled "all the house of Judah with the tribe of Benjamin to fight against the house of Israel, to bring the kingdom again to the son of Solomon" (1 K. xii. 21; 2 Chr. xi. 1). Possibly the seal may have been set to this by the fact of Jeroboam having just taken possession of Bethel, a city of Benjamin, for the calf-worship of the northern kingdom[b] (1 K. xii. 29). On the other hand Rehoboam fortified and garrisoned several cities of Benjamin, and wisely dispersed the members of his own family through them (2 Chr. xi. 10–12). The alliance was further strengthened by a covenant solemnly undertaken (2 Chr. xv. 9), and by the employment

very much of the above article is drawn from that source.

[a] A fair argument in favor of the received chronology of the book of Judges may be drawn from this circumstance — since no shorter period would have been sufficient for the tribe to have recovered [from] such almost total extermination, and to have reached the numbers and force indicated in the lists of 1 Chr xii. 1–8, vii. 6–12, viii. 1–40.

[b] Bethel, however, was on the very boundary line and centuries before this date was inhabited by both Ephraimites and Benjamites (Judg. xix. 16).

Digitized by Google

of Benjamites in high positions in the army of Judah (2 Chr. xvii 17). But what above all must have contributed to strengthen the alliance was the fact that the Temple was the common property of both tribes. True, it was founded, erected, and endowed by princes of "the house of Judah," but the city of "the Jebusite" (Josh. xviii. 28), and the whole of the ground north of the Valley of Hinnom, was in the lot of Benjamin. In this latter fact is literally fulfilled the prophecy of Moses (Deut. xxxiii. 12): Benjamin "dwelt between" the "shoulders" of the ravines which encompass the Holy City on the west, south, and east (see a good treatment of this point in Blunt's *Undes. Coincidences*, pt. II. § xvii.).

Henceforward the history of Benjamin becomes merged in that of the southern kingdom. That the tribe still retained its individuality is plain from the constant mention of it in the various censuses taken of the two tribes, and on other occasions, and also from the lists of the men of Benjamin who returned with Zerubbabel (Ezr. ii.; Neh. vii.) and took possession of their old towns (Neh. xi. 31–35). At Jerusalem the name must have been always kept alive, if by nothing else, by the name of "the high gate of Benjamin" (Jer. xx. 2). [JERUSALEM.]

But though the tribe had thus given up to a certain degree its independent existence, it is clear that the ancient memories of their house were not allowed to fade from the recollections of the Benjamites. The genealogy of Saul, to a late date, is carefully preserved in the lists of 1 Chr. (viii. 33–40, ix. 39–44); the name of Kish recurs as the father of Mordecai (Esth. ii. 5), the honored deliverer of the nation from miseries worse than those threatened by Nahash the Ammonite. But it was reserved for a greater than these to close the line of this tribe in the sacred history. The royal name once more appears, and "Saul who also is called Paul" has left on record under his own hand that he was "of the stock of Israel, of the tribe of Benjamin." It is perhaps more than a mere fancy to note how remarkably the chief characteristics of the tribe are gathered up in his one person. There was the fierceness, in his persecution of the Christians; and there were the obstinacy and persistence, which made him proof against the tears and prayers of his converts, and "ready not to be bound only, but also to die for the name of the Lord Jesus" (Acts xxi. 12, 13). There were the force and vigor to which natural difficulties and confined circumstances formed no impediment; and lastly, there was the keen sense of the greatness of his house, in his proud reference to his forefather "Saul the son of Cis, a man of the tribe of Benjamin."

Be this as it may, no nobler hero could be found to close the rolls of the worthies of his tribe — no prouder distinction could be desired for Benjamin than that of having produced the first judge of its nation, the first king, and finally, when Judaism gave place to Christianity, the great Apostle of the Gentiles.

2. [Βενιαμίν; Vat. Alex. -μειν.] A man of the tribe of Benjamin, son of Bilhan, and the head of a family of warriors (1 Chr. vii. 10).

3. [Βενιαμίν; Vat. Alex. FA. -μειν.] One of the "sons of Harim;" an Israelite in the time of Ezra, who had married a foreign wife (Ezr. x. 32).

G.

BEN'JAMIN, HIGH GATE, OR GATE, OF (שַׁעַר בִּ֫נְיָמִין), Jer. xx. 2, xxxvii. 13, xxxviii. 7; Zech. xiv. 10. [JERUSALEM.]

* **BEN'JAMITE** (בִּנְיָמִינִי, Judg. xix. 16; 1 Sam. ix. 21, xxii. 7; 2 Sam. xvi. 11; 1 K. ii. 8; 1 Chr. xxvii. 12; Ps. vii., title; with the article, הַבִּנְיָמִינִי, Judg. iii. 15; 2 Sam. xvi. 11, xix. 16 (Heb. 17); LXX. *υἱὸς τοῦ Ἰεμενί, τ. Ἰεμιναίου, τ. Ἰεμινί, υἱὸς Βενιαμίν*, etc.; Vulg. *filius Jemini*; — בֶּן־אִישׁ יְמִינִי, *υἱὸς ἀνδρὸς Ἰεμιναίου, filius viri Jemini*, 1 Sam. ix. 1; — אִישׁ יְמִינִי, *ἀνὴρ ὁ Ἰεμινί*, etc., *vir Jemineus*, etc., 2 Sam. xx 1: Esth. ii. 5; — בִּנְיָמִין, *Βενιαμίν*, etc., *Benjamin*, etc., Judg. xx. 35, 36, 40, 43; — יְמִינִי, Ἰεμίν, Vat. Ιακειμ, Alex. *ο Ιεμειναιος, Jemini*, 1 Sam. ix. 4), an appellation of the descendants of Benjamin. On the Hebrew forms noted above, see BENJAMIN, p. 276. A.

BE'NO (בְּנוֹ [*his son*]: LXX. translates *υἱοῦ*: *Benno*), a Levite of the sons of Merari (1 Chr. xxiv. 26, 27).

BEN-O'NI (בֶּן־אוֹנִי, *son of my sorrow*, or *of my strength*, i. e. of *my last effort*, Hiller, *Onom.* 300, &c.: *υἱὸς ὀδύνης μου*: *Benoni, id est filius doloris mei*), the name which the dying Rachel gave to her newly-born son, but which by his father was changed into BENJAMIN (Gen. xxxv. 18).

BEN-ZO'HETH (בֶּן־זוֹחֵת: *υἱοὶ Ζωάθ*; Alex. [*υἱοι*] *Ζωχαθ*: *Benzoheth*), a name occurring among the descendants of Judah (1 Chr. iv. 20). The passage appears to be a fragment, and as if the name of a son of the Zoheth just mentioned had originally followed. A. V. follows Vulgate.

BE'ON (בְּעֹן: *Βαιάν*; Alex. *βαμα*: *Beon*), a place on the east of Jordan (Num. xxxii. 3), doubtless a contraction of BAAL-MEON (comp. ver. 38).

BE'OR (בְּעוֹר [*a torch*]: *Βεώρ*; [Alex. in 1 Chr. *Βαιωρ*:] *Beor*). 1. The father of BELA, one of the early Edomite kings (Gen. xxxvi. 32; 1 Chr. i. 43).

2. [Vat. *Βαιωρ, Βεωρ.*] Father of Balaam (Num. xxii. 5, xxiv. 3, 15; xxxi. 8; Josh. xiii. 22, xxiv. 9; Mic. vi. 5). He is called BOSOR in the N. T. [BELA.]

BE'RA (בֶּרַע [*son, or in evil = wicked*]: Vat. [Rom.] and Alex. *Βαλλά*; Joseph. *Βαλλάς*: *Bara*), king of Sodom at the time of the invasion of the five kings under Chedorlaomer (Gen. xiv. 2; also 17 and 21).

BERA'CHAH (בְּרָכָה [*blessing*]: *Βερχία*, [Vat. FA. *Βερχεια*; Alex. *βαραχια*:] *Baracha*), a Benjamite, one of "Saul's brethren," who attached himself to David at Ziklag (1 Chr. xii. 3).

BERA'CHAH, VALLEY OF (עֵמֶק בְּרָכָה [*valley of blessing*]: *Κοιλὰς Εὐλογίας*: *vallis benedictionis*), a valley (Joseph. *τινα κοῖλον καὶ φαραγγώδη τόπον*) in which Jehoshaphat and his people assembled to "bless" Jehovah after the overthrow of the hosts of Moabites, Ammonites, and Mehunim who had come against them, and which from that fact acquired its name of "the valley of blessing" (2 Chr. xx. 26). The place is remarkable as furnishing one of the latest instances

Digitized by Google

in the O. T. of a name bestowed in consequence of an occurrence at the spot.

The name of *Bereikût* (بريكوت) still survives, attached to ruins in a valley of the same name lying between *Tekû'a* and the main road from Bethlehem to Hebron, a position corresponding accurately enough with the locality of the battle as described in 2 Chr. xx. (Rob. iii. 275: the discovery is due to Wolcott; see Ritter, *Jordan*, 635.) It must not be confounded with Caphar-barucha, now probably *Beni Naim*, an eminence on very high ground, 3 or 4 miles east of Hebron, commanding an extensive view of the Dead Sea, and traditionally the scene of Abraham's intercession for Sodom. The tomb of Lot has been shown there since the days of Mandeville (see Reland, 685; Rob. i. 489–91). G.

BERACHI'AH (בְּרַכְיָהוּ, Berechiahu [*Jehovah will bless*]: Βαραχία: *Barachia*), a Gershonite Levite, father of Asaph the singer (1 Chr. vi. 39). [The name is written "Berechiah" in some eds. of the A. V. See BERECHIAH 6.]

BERA'IAH [3 syl.] (בְּרָאיָה [*whom I created*]: Βαραΐα: *Baraia*), son of Shimhi, a chief man of Benjamin (1 Chr. viii. 21).

BERE'A (Βεροία: [*Berœa*]). 1. A city of Macedonia, to which St. Paul retired with Silas and Timotheus, in the course of his first visit to Europe, on being persecuted in Thessalonica (Acts xvii. 10), and from which, on being again persecuted by emissaries from Thessalonica, he withdrew to the sea for the purpose of proceeding to Athens (*ib.* 14, 15). The community of Jews must have been considerable in Berea, and their character is described in very favorable terms (*ib.* 11). Sopater, one of St. Paul's missionary companions, was from this place (Βεροιαῖος, Acts xx. 4). He accompanied the apostle on his return from the second visit to Europe (*ib.*); and he appears to have previously been with him, in the course of that second visit, at Corinth, when he wrote the Epistle to the Romans (Rom. xvi. 21).

Berea, now called *Verria* or *Kara-Verria*, is fully described by Leake (*Northern Greece*, vol. iii. 290 ff.), and by Cousinéry (*Voyage dans la Macédoine*, i. 69 ff.). Situated on the eastern slope of the Olympian mountain-range, with an abundant supply of water, and commanding an extensive view of the plain of the Axius and Haliacmon, it is regarded as one of the most agreeable towns in Rumili, and has now 15,000 or 20,000 inhabitants. A few ancient remains, Greek, Roman, and Byzantine, still exist here. Two roads are laid down in the Itineraries between Thessalonica and Berea, one passing by Pella.[a] St. Paul and his companions may have travelled by either of them. Two roads also connect Berea with Dium, one passing by Pydna. It was probably from Dium that St. Paul sailed to Athens, leaving Silas and Timotheus behind; and possibly 1 Thess. iii. 2 refers to a journey of Timotheus from Berea, not from Athens. [TIMOTHY.] The coin in *Akerman's Numismatic Illustrations of the N. T.* p. 46, is erroneously assigned to the Macedonian Berea, and belongs to the following.

2. [Vulg. om.] The modern *Aleppo*, mentioned in 2 Macc. xiii. 4 in connection with the invasion of Judæa by Antiochus Eupator, as the scene of the miserable death of Menelaus. This seems to be the city in which Jerome says that certain persons lived who possessed and used St. Matthew's Hebrew Gospel (*De Vir. Illust.* c. 3).

3. [BE'REA] (Βερέα: [*Berea*]), a place in Judæa, apparently not very far from Jerusalem, where Bacchides, the general of Demetrius, encamped shortly before the engagement in which Judas Maccabæus was slain (1 Macc. ix. 4. See Joseph. *Ant.* xii. 11, § 1). J. S. H.

BERECHI'AH (בְּרֶכְיָה and בְּרֶכְיָהוּ [*Jehovah will bless*]: Βαραχία; [Vat. Βαραχαι:] *Barachias*). 1. One of the sons of Zerubbabel, and a descendant of the royal family of Judah (1 Chr. iii. 20).

2. [Vat. Neh. iii. 30, Βαρχεια, vi. 18, Βαραχεια.] A man mentioned as the father of Meshullam who assisted in rebuilding the walls of Jerusalem (Neh. iii. 4, 30; vi. 18).

3. [Vat. Βαραχει; Alex. Βαραχιας: *Barachia.*] A Levite of the line of Elkanah (1 Chr. ix. 16).

4. [*Barachias.*] A doorkeeper for the ark (1 Chr. xv. 23).

5. [Βαραχίας; Vat. Ζαχαριας.] Berechiahu, one of the chief men of the tribe of Ephraim in time of king Ahaz (2 Chr. xxviii. 12).

6. Berechiahu, father of Asaph the singer (1 Chr. xv. 17). [BERACHIAH.]

7. [Βαραχίας.] Berechiahu, father of Zechariah the prophet (Zech. i. 1, also 7). [Here A V. ed. 1611 reads "Barachiah."] G.

BE'RED (בֶּרֶד [*hail*]: Βαρδδ: *Barad*). 1. A place in the south of Palestine, between which and Kadesh lay the well Lachai-roi (Gen. xvi. 14). The name is variously given in the ancient versions: Peshito, *Gadar*, ? = Gerar; Arab. *Jared*, يرد, probably a mere corruption of the Hebrew name; Onkelos, *Chagra*, חַגְרָא (elsewhere employed in the Targums for "Shur;" can it be connected with Hagar, הָגָר, הַגְרִי?): Ps.-Jonathan, *Chalutza*, חַלוּצָא, *i. e.* the Elusa, Ἔλουσα of Ptolemy and the ecclesiastical writers, now *el-Khâlasah*, on the Hebron road, about 12 miles south of Beer-sheba (Rob. i. 201, 2; Stewart, 205; Reland, 755). We have the testimony of Jerome (*Vita S. Hilarionis*) that Elusa was called by its inhabitants *Barec*, which would be an easy corruption of Bered, ר being read for ד. Chalutza is the name elsewhere given in the Arabic version for "Shur" and for "Gerar."

2. [Vat. om.: *Bared.*] A son or descendant of Ephraim (1 Chr. vii. 20), possibly identical with Becher in Num. xxvi. 35, by a mere change of letters (ברד for בכר). G.

BERENI'CE. [BERNICE.]

a * The "Notes on Macedonia" (*Bibl. Sacr.* xi. 880) by the late Rev. Edward M. Dodd, who was a missionary at Thessalonica, describe minutely the route between that city and Berea. The population of Berea is overstated in the article above. Mr. Dodd says that it is "6000; about 200 Jews, 1500 Turks, and the remainder Greeks. They have one synagogue, 1 mosques, and 60 Greek churches" (which last, I should be said, except 3 or 4, are not ἐκκλησίαι properly so called, but ἐκκλησίδια as the modern Greeks term them, *i. e.* chapels or shrines). H.

BE'RI (בֵּרִי [*fountain*]: Βαρίν: [Vat. Σαδρει; Alex. Βαρι; Comp. Βηρεί] *Beri*), son of Zophah, of the tribe of Asher (1 Chr. vii. 36).

BERI'AH (בְּרִיעָה, *in evil*, or *a gift*, see No. 2: Βαριά: *Beria, Brie*). 1. A son of Asher (Gen. xlvi. 17; Num. xxvi. 44, 45), from whom descended the "family of the Beriites," בְּרִיעִי, Βαριαί [Alex. Βαραι], *familia Briesitarum* (Num. xxvi. 44).

2. [Βεριά; Alex. Βαρια: *Beria.*] A son of Ephraim, so named on account of the state of his father's house when he was born. "And the sons of Ephraim: Shuthelah, and Bered his son, and Tahath his son, and Eladah his son, and Tahath his son, and Zabad his son, and Shuthelah his son, and Ezer, and Elead, whom the men of Gath [that were] born in [that] land slew" [*lit.* "and the men . . . slew them"], "because they came down to take away their cattle. And Ephraim their father mourned many days, and his brethren came to comfort him. And when he went in to his wife, she conceived, and bare a son, and he called his name Beriah, because it went evil with his house" [*lit.* "because evil" or "a gift" "was to his house:" כִּי בְּרָעָה הָיְתָה בְּבֵיתוֹ, ὅτι ἐν κακοῖς ἐγένετο ἐν οἴκῳ μου, LXX.: "eo quod in malis domus ejus ortus esset," Vulg.] (1 Chr. vii. 20–23). With respect to the meaning of the name, Gesenius prefers the rendering "in evil" to "a gift," as probably the right one. In this case בְּרָעָה in the explanation would be, according to him, רָעָה with *Beth essentiæ* (*Thes.* s. v.). It must be remarked, however, that the supposed instances of *Beth essentiæ* being prefixed to the subject in the O. T. are few and inconclusive, and that it is disputed by the Arabian grammarians if the parallel "redundant Bé" of the Arabic be ever so used (comp. *Thes.* pp. 174, 175, where this use of "redundant Bé" is too arbitrarily denied). The LXX. and Vulg. indicate a different construction, with an additional variation in the case of the former ("my house" for "his house"), so that the rendering "in evil" does not depend upon the construction proposed by Gesenius. Michaelis suggests that בְּרָעָה may mean a spontaneous gift of God, beyond expectation and the law of nature, as a son born to Ephraim now growing old might be called (*Suppl.* pp. 224, 225). In favor of this meaning, which, with Gesenius, we take in the simple sense of "gift," it may be urged, that it is unlikely that four persons would have borne a name of an unusual form, and that a case similar to that here supposed is found in the naming of Seth (Gen. iv. 25). This short notice is of no slight historical importance; especially as it refers to a period of Hebrew history respecting which the Bible affords us no other like information. The event must be assigned to the time between Jacob's death and the beginning of the oppression. The indications that guide us are, that some of Ephraim's sons must have attained to manhood, and that the Hebrews were still free. The passage is full of difficulties. The first question is: What sons of Ephraim were killed? The persons mentioned do not all seem to be his sons. Shuthelah occupies the first place, and a genealogy of his descendants follows as far as a second Shuthelah, the words "his son" indicating a direct descent, as Houbigant (ap. Barrett, *Synopsis in loc.*) remarks, although he very needlessly proposes conjecturally to omit them. A similar genealogy from Beriah to Joshua is given in 1 Chr. vii. 25–27. As the text stands, there are but three sons of Ephraim mentioned before Beriah — Shuthelah, Ezer, and Elead — all of whom seem to have been killed by the men of Gath, though it is possible that the last two are alone meant, and the first of whom is stated to have left descendants. In the enumeration of the Israelite families in Numbers four of the tribe of Ephraim are mentioned, sprung from his sons Shuthelah, Becher, and Tahan, and from Eran, son or descendant of Shuthelah (xxvi. 35, 36). The second and third families are probably those of Beriah and a younger son, unless the third is one of Beriah, called after his descendant Tahan (1 Chr. vii. 25); or one of them may be that of a son of Joseph, since it is related that Jacob determined that sons of Joseph who might be born to him after Ephraim and Manasseh should "be called after the name of their brethren in their inheritance" (Gen. xlviii. 6). See however BECHER. There can be no doubt that the land in which the men of Gath were born is the eastern part of Lower Egypt, if not Goshen itself. It would be needless to say that they were born in their own land. At this time very many foreigners must have been settled in Egypt, especially in and about Goshen. Indeed Goshen is mentioned as a non-Egyptian country in its inhabitants (Gen. xlvi 34), and its own name as well as nearly all the names of its cities and places mentioned in the Bible, save the cities built in the oppression, are probably Semitic. In the book of Joshua, Shihor, the Nile, here the Pelusiac branch, is the boundary of Egypt and Canaan, the Philistine territories apparently being considered to extend from it (Josh. xiii. 2, 3). It is therefore very probable that many Philistines would have settled in a part of Egypt so accessible to them and so similar in its population to Canaan as Goshen and the tracts adjoining it. Or else these men of Gath may have been mercenaries like the Cherethim (in Egyptian Shayratana) who were in the Egyptian service at a later time, as in David's, and to whom lands were probably allotted as to the native army. Some suppose that the men of Gath were the aggressors, a conjecture not at variance with the words used in the relation of the cause of the death of Ephraim's sons, since we may read "when (כִּי) they came down," &c., instead of "because," &c. (Bagster's *Bible, in loc.*), but it must be remembered that this rendering is equally consistent with the other explanation. There is no reason to suppose that the Israelites at this time may not have sometimes engaged in predatory or other warfare. The warlike habits of Jacob's sons are evident in the narrative of the vengeance taken by Simeon and Levi upon Hamor and Shechem (Gen. xxxiv. 25–29), and of their posterity in the account of the fear of that Pharaoh who began to oppress them lest they should, in the event of war in the land, join with the enemies of his people, and by fighting against them get them out of the country (Ex. i. 8–10). It has been imagined, according to which side was supposed to have acted the aggressor, that the Gittites descended upon the Ephraimites in a predatory excursion from Palestine, or that the Ephraimites made a raid into Palestine. Neither of these explanations is consistent with sound criti-

Digitized by Google

sism, because the men of Gath are said to have been born in the land, that is, to have been settled in Egypt, as already shown, and the second one, which is adopted by Bunsen (*Egypt's Place*, i. 177, 178), is inadmissible on the ground that the verb used, יָרַד, "he went down," or "descended," is applicable to going into Egypt, but not to coming from it. The Rabbinical idea that these sons of Ephraim went to take the Promised Land needs no refutation. (For these various theories see *Poli Synopsis* in loc.)

3. [Βεριά; Vat. Βεριγα, Βαρειγα; Alex. Βαριγα: *Baria.*] A Benjamite. He and his brother Shema were ancestors of the inhabitants of Ajalon, and expelled the inhabitants of Gath (1 Chr. viii. 13, 16).

4. [Βεριά; Alex. ver. 10 omits, ver. 11 Βαρια: *Baria.*] A Levite (1 Chr. xxiii. 10, 11).

R. S. P.

BERITES. [BERIAH, 1.]

BE'RITES, THE (הַבְּרִים [*the wells*, i. e. people of]: ἐν Χαρρί [Vat. Alex. -ρει]), a tribe or people who are named with Abel and Beth-maachah — and who were therefore doubtless situated in the north of Palestine — mentioned only as having been visited by Joab in his pursuit after Sheba the son of Bichri (2 Sam. xx. 14). The expression is a remarkable one, "all the Berites" (כָּל־הַבֵּרִי; comp. "all the Bithron"). The Vulgate has a different reading — omnesque viri electi congregati fuerant — apparently reading for הַבְּרִים by an easy transposition and change of letters בָּחוּרִים, i. e. *the young men*, and this is in Ewald's opinion the correct reading (*Gesch.* iii. 249, *note*).

G.

BE'RITH, THE GOD (אֵל בְּרִית [i. e. *of the covenant:* Βαιθηλβεριθ; Vat. Βαιθηρβεριθ; Alex. Βααλ διαθηκης: *deus Berith*]), Judg. ix. 46. [BAAL-BERITH, p. 207.]

BERNI'CE and BERENI'CE (Βερνίκη, [*victorious*], also in Joseph.: *Bernice* = Φερενίκη, see Sturz, *Dial. Maced.* p. 31; the form *Beronice* is also found), the eldest daughter of Herod Agrippa I. (Acts xii. 1, &c.). She was first married to her uncle Herod, king of Chalcis (Joseph. *Ant.* xix. 5, § 1), and after his death (A. D. 48) she lived under circumstances of great suspicion with her own brother Agrippa II. (Joseph. *Ant.* xx. 7, 3; Juvenal *Sat.* vi. 156 ff.), in connection with whom she is mentioned Acts xxv. 13, 23, xxvi. 30, as having visited Festus on his appointment as Procurator of Judæa. She was a second time married, to Polemon, king of Cilicia, but soon left him, and returned to her brother (Joseph. *ibid.*). She afterwards became the mistress of Vespasian (Tacit. *Hist.* ii. 81), and of his son Titus (Sueton. *Tit.* 7).

H. A.

BERO'DACH BAL'ADAN [בְּרֹאדַךְ בִּלְאֲדָן: Μαρωδαχ Βαλαδάν (Vat. Βαλδαν); Alex. Μερωδαχ B.; Comp. Βαρωδὰχ B.: *Berolach Baladan*], 2 K. xx. 12. [MERODACH-BALADAN.]

BE'ROTH (Βηρώγ; [Vat. Βηρογ; Ald.] Alex. Βηρωθ), 1 Esdr. v. 19. [BEEROTH.]

BERO'THAH, BERO'THAI [3 syl.] בְּרוֹתָה, בְּרוֹתַי: [In Ez., Vat. Alex. corrupt; Ald. Βηρωθά. Comp. Βερωθά:] *Berotha, Ber. &c.*) The first of these two names, each of which occurs once only, is given by Ezekiel (xlvii. 16) in connection with Hamath and Damascus as forming part of the northern boundary of the promised land. The second is mentioned (2 Sam. viii. 8) as the name of a city of Zobah taken by David, also in connection with Hamath and Damascus. The slightness of these references makes it impossible to identify the names with any degree of probability, or even to decide whether they refer to the same locality or not. The well known city *Beirût* (Berytus) naturally suggests itself as identical with one at least of the names; but in each instance the circumstances of the case seem to require a position further east, since Ezekiel places Berothah between Hamath and Damascus, and David's war with the king of Zobah led him away from the sea-coast towards the Euphrates (2 Sam. viii. 3). In the latter instance the difficulty is increased by the Hebrew text reading in 1 Chr. xviii. 8, CHUN instead of Berothai, and by the fact that both in Samuel and Chronicles the Greek translators, instead of giving a proper name, translate by the phrase ἐκ τῶν ἐκλεκτῶν πόλεων, clearly showing that they read either the same text in each passage, or at least words which bore the same sense. Fürst regards Berothah and Berothai as distinct places, and identifies the first with Berytus. Mislin (*Saints Lieux*, i. 244) derives the name from the wells (*Beeroth*), which are still to be seen bored in the solid rock at *Beirût*.

F. W. G.

BE'ROTHITE, THE (1 Chr. xi. 39). [BEEROTH.]

BERYL (תַּרְשִׁישׁ *tarshish:* χρυσόλιθος, Θαρσεὶς, ἄνθραξ, λίθος ἄνθρακος: *chrysolithus, hyacinthus, mare*) occurs in Ex. xxviii. 20, xxxix. 13; Cant. v. 14; Ez. i. 16, x. 9, xxviii. 13; Dan. x. 6. The *tarshish* was the first precious stone in the fourth row of the high-priest's breastplate. In Ezekiel's vision "the appearance of the wheels and their work was like unto the color of a *tarshish*;" it was one of the precious stones of the king of Tyre; the body of the man whom Daniel saw in his vision was like the *tarshish*.

It is impossible to say with any degree of certainty what precious stone is denoted by the Hebrew word; Luther reads the "turquoise;" the LXX. supposes either the "chrysolite" or the "carbuncle" (ἄνθραξ); Onkelos and the Jerusalem Targum have *kerum jama*, by which the Jews appear to have understood "a white stone like the froth of the sea," which Braun (*de Vest. Sacer.* ii. c. 17) conjectures may be the "opal." For other opinions, which are, however, mere conjectures, see the chapter of Braun just quoted.

It is generally supposed that the *tarshish* derives its name from the place so called, respecting the position of which see TARSHISH. Josephus (*Ant.* iii. 7, § 5) and Braun (*l. c.*) understand the *chrysolite* to be meant; not, however, the *chrysolite* of modern mineralogists, but the *topaz;* for it certainly does appear that by a curious interchange of terms the ancient chrysolite is the modern topaz, and the ancient topaz the modern chrysolite (see Plin. *H. N.* xxxvii. 8; Hill on Theophrastus, *De Lapid.*; King's *Antique Gems*, p. 57), though Bellermann, *Die Urim und Thummim*, p. 62, Berlin 1824) has advanced many objections to this opinion and has maintained that the topaz and the chrysolite of the ancients are identical with the gems now

Digitized by Google

so called. Braun, at all events, uses the term *chrysolithus* to denote the topaz, and he speaks of its brilliant golden color. There is little or nothing in the passages where the *tarshish* is mentioned to lead us to anything like a satisfactory conclusion as to its identity, excepting in Cant. v. 14, where we do seem to catch a glimmer of the stone denoted: "His hands are orbs of gold adorned with the tarshish stone." This seems to be the correct rendering of the Hebrew. The orbs or rings of gold, as Cocceius has observed, refer not to rings on the fingers, but to the fingers themselves, as they gently press upon the thumb and thus form the figure of an orb or a ring. The latter part of the verse is the causal expletive of the former. It is not only said in this passage that the hands are called orbs of gold, but the reason why they are thus called is immediately added — specially on account of the beautiful chrysolites with which the hands were adorned (Braun, *de V. S.* ii. 13). Pliny says of the *chrysolithos*, "it is a transparent stone with a refulgence like that of gold." Since then the *golden stone*, as the name imports, is admirably suited to the above passage in Canticles, and would also apply, though in a less degree, to the other Scriptural places cited; as it is supported by Josephus, and conjectured by the LXX. and Vulg.; the ancient *chrysolite* or the modern yellow *topaz* appears to have a better claim than any other gem to represent the *tarshish* of the Hebrew Bible, certainly a better claim than the *beryl* of the A. V., a rendering which appears to be unsupported by any kind of evidence. W. H.

BERZE'LUS (Φαηζελδαΐος; Alex. Ζορζελλεος; [Ald. Βερζελλαΐος:] *Phargoleu*), 1 Esdr. v. 38. [BARZILLAI.]

BE'SAI [2 syl.] (בֵּסַי [*conqueror*, Fürst]: Βασί, Βησί; [Vat. -σει; Alex. Βασι, Βησει:] *Besee*, [*Besai*]). "Children of Besai" were among the Nethinim who returned to Judæa with Zerubbabel (Ezr. ii. 49; Neh. vii. 52). [BASTAI.]

BESODE'IAH [3 syl.] (בְּסוֹדְיָה [*intimate of Jehovah*]: Βασωδία; [Vat. Βαδια; FA.] Αβδεια: *Besodia*), father of Meshullam, and one of the repairers of the wall of Jerusalem (Neh. iii. 6).

BE'SOR, THE BROOK (נַחַל הַבְּשׂוֹר): χειμάρρους τοῦ Βοσόρ; [1 Sam. xxx. 21, Vat. Βεωας, Alex. Βεχωρ:] *torrens Besor*), a torrent-bed or wady in the extreme south of Judah, of which mention occurs only in 1 Sam. xxx. 9, 10, 21. It is plain from the conditions of the narrative that it must have been south of Ziklag, but hitherto the situation of neither town nor wady has been identified with any probability. The name may signify "fresh" or "cool" (Fürst). G.

* Dr. Robinson holds that the Brook Besor, in all probability, is the *Wady 'Ar'ārah*, the southeastern branch of *Wady es-Seba'*, running from Aroer to Beersheba. For the grounds of this opinion, see his *Phys. Geography*, pp. 121–123. Dietrich supposes Besor to mean *grassy, verdant* (Gesen. *Wörterb.* 6te Aufl.). H.

* **BESTEAD** (from the Anglo Saxon *stede*, a place: comp. our *instead*, *homestead*, &c.), found only in Is. viii. 21 (A. V.), means "placed" or "situated" (well or ill), and hence accompanied as Is., as above, by "harily," *i. e.* severely, the two words together give the sense of נִקְשֶׁה, namely, "brought into difficulty" or "distress." Eastwood and Wright's *Bible Word-Book* (p. 62) illustrates this archaism from the older English writers. H.

BE'TAH (בֶּטַח [*confidence*]: ἡ Μετεβδα, quasi מִפְּטָבַח; Alex. η Μασβαχ; [Vat. η Μασβαα; Comp. Βατδα:] *Bete*), a city belonging to Hadadezer, king of Zobah, mentioned with Berothai as having yielded much spoil of brass to David (2 Sam. viii. 8). In the parallel account, 1 Chr. xviii. 8, the name is called, by an inversion of letters, Tibchath. Ewald (*Gesch.* ii. 195) pronounces the latter to be the correct reading, and compares it with Tebach (Gen. xxii. 24). G.

BETA'NE (Βετάνη; [Vat. Βαιτανη; Sin. Βατανη;] Alex. Βλιτανη, *i. e.* prob. Βαιτανη: Vulg. omits), a place apparently south of Jerusalem (Jud i. 9), and possibly identical with Βηθανίν of Eusebius (*Onom.* Ἀρί, *Ain*), two miles from the Terebinth of Abraham and four from Hebron. This has been variously identified with *Beth-anoth*, *Beit 'Ainûn*, and *Betineh* or Ecbatana in Syria, placed by Pliny (v. 17) on Carmel (Winer, s. v. *Betane*). Bethany is inadmissible from the fact of its unimportance at the time, if indeed it existed at all. G.

BETEN (בֶּטֶן [*belly* or *womb*]: Βαιθόκ; Alex. Βατνε; [Comp. Βεθέν:] *Beten*), one of the cities on the border of the tribe of Asher (Josh. xix. 25, only). By Eusebius (*Onom.* Βατναί) it is said to have been then called Bebeten, and to have lain eight miles east of Ptolemias. No other trace of its existence has been discovered elsewhere. G.

BETH (בַּיִת, according to Gesenius (*Thes.* and *Lex.*), from a root, בּוּת, to pass the night, or from בָּנָה, to build, as δόμος, *domus*, from δέμω), the most general word for a house or habitation. Strictly speaking it has the force of a settled, stable dwelling, as in Gen. xxxiii. 17, where the building of a "house" marks the termination of a stage of Jacob's wanderings (comp. also 2 Sam. vii. 2, 6, and many other places); but it is also employed for a dwelling of any kind, even for a tent, as in Gen. xxiv. 32, where it must refer to the tent of Laban; also Judg. xviii. 31, 1 Sam. i. 7, to the tent of the tabernacle, and 2 K. xxiii. 7, where it expresses the textile materials (A. V. "hangings") for the tents of Astarte. From this general force the transition was natural to a house in the sense of a family, as Ps. cvii. 41, "families" (Prayer-Book, "households"), or a pedigree, as Ezr. ii. 59. In 2 Sam. xiii. 7, 1 K. xiii. 7, and other places, it has the sense of "home," *i. e.* "to the house." Beth also has some collateral and almost technical meanings, similar to those which we apply to the word "house," as in Ex. xxv. 27 for the "places" or sockets into which the bars for carrying the table were "housed;" and others.

Like *Ædes* in Latin and *Dom* in German, Beth has the special meaning of a temple or house of worship, in which sense it is applied not only to the tabernacle (see above) or temple of Jehovah (1 K. iii. 2, vi. 1, &c.), but to those of false gods — Dagon (Judg. xvi. 27; 1 Sam. v. 2), Rimmon (2 K. v. 18), Baal (2 K. x. 21), Nisroch (2 K. xix. 37), and other gods (Judg. ix. 27). "Bajith" in Is. xv. 2 is really ha-Bajith = "the Temple" — meaning some well-known idol fane in Moab [BAJITH.]

Digitized by Google

Beth is more frequently employed in commutation with other words to form the names of places than either Kirjath, Hatzer, Beer, Ain, or any other word. A list of the places compounded with Beth is given below in alphabetical order; but in addition to these it may be allowable here to notice two, which, though not appearing in that form in the A. V., yet do so in the LXX., probably with greater correctness.

BETH-E'KED (בֵּית עֵקֶד: [Βαιθακάθ; Alex. Βαιθακαδ:] *camera pastorum*), the "shearing-house," at the pit or well (בּוֹר) of which the forty-two brethren of Ahaziah were slain by Jehu (2 K. x. 12). It lay between Jezreel and Samaria according to Jerome (*Onom.*), 15 miles from the town of Legio, and in the plain of Esdraelon.

BETH-HAG'GAN (בֵּית הַגָּן [*house of the garden*]: Βαιθγάν; [Vat. Βαιθαν; Comp. Βαιθαγάν:] *Domus horti*), A. V. "the garden-house" (2 K. ix. 27), one of the spots which marked the flight of Ahaziah from Jehu. It is doubtless the same place as EN-GANNIM, "spring of gardens," the modern *Jenín*, on the direct road from Samaria northward, and overlooking the great plain (Stanley, p. 349, note). G.

BETHAB'ARA (Βηθαβαρά, quasi בֵּית עֲבָרָה, *house of ford* or *ferry:* [*Bethania*]), a place beyond Jordan, πέραν τοῦ Ἰορ., in which, according to the Received Text of the N. T., John was baptizing (John i. 28), apparently at the time that he baptized Christ (comp. ver. 29, 39, 35). If the reading of the Received Text be the correct one, Bethabara may be identical with Beth-barah, the ancient ford of Jordan, of which the men of Ephraim took possession after Gideon's defeat of the Midianites [BETH-BARAH]; or, which seems more likely, with Beth-nimrah, on the east of the river, nearly opposite Jericho. [BETH-NIMRAH.] But the oldest MSS. (A B) and the Vulgate[a] have not Bethabara but Bethany, a reading which Origen (*ad loc.*) states to have obtained in almost all the copies of his time, σχέδον πάντα τὰ ἀντίγραφα, though altered by him in his edition of the Gospel on topographical grounds. In favor of Bethabara are, (*a.*) the extreme improbability of so familiar a name as Bethany being changed by copyists into one so unfamiliar as Bethabara, while the reverse — the change from an unfamiliar to a familiar name — is of frequent occurrence. (*b.*) The fact that Origen, while admitting that the majority of MSS. were in favor of Bethany, decided, notwithstanding, for Bethabara. (*c.*) That Bethabara was still known in the days of Eusebius (*Onomasticon*, s. v.), and greatly resorted to by persons desirous of baptism (*vitali gurgite baptizantur*).

Still the fact remains that the most ancient MSS. have "Bethany," and that name has been accordingly restored to the text by Lachmann, Tischendorf, and other modern editors. At this distance of time, and in the absence of any careful research on the east of Jordan, it is impossible to decide on evidence so slight and conflicting. It must not be overlooked that, if Bethany be accepted, the definition "beyond Jordan" still remains, and therefore another place must be intended than the well-known residence of Lazarus. G.

[a] In the *Onomasticon*, however, Jerome has Bethabara.

* It has been claimed that Bethabara or Bethany must have been one of the upper crossing-places of the Jordan, not far south of the Sea of Tiberias, and not so low down as opposite Jericho, because Jesus went thence to Galilee (John i. 44) in a single day (Stanley, *Sin. and Pal.* p 305). But this depends on how we are to reckon the "third day" in John ii. 1; for unless we count the day of Christ's calling the first disciples (John i. 35) as the first, and that of the marriage at Cana as "the third" (ii. 1), there may have been three or more days spent on the journey. But instead of its occupying one day only, the third day may have been the third after the arrival in Galilee, or according to Lücke (*Evang. des Johannes*, i. 467), the third from the calling of Nathanael (John i. 46). With either of these last computations we must place Bethabara much further south than any ford near the south end of the Galilean sea. It stands, on Kiepert's *Wandkarte von Palästina*, off against the upper part of the plain of Jericho.

It confers additional interest on Bethabara, if, as many suppose, it was the place where Jesus himself was baptized. If τὸ πρῶτον in John x. 40 means that when John began his career as the baptizer, he baptized first at Bethabara beyond the Jordan; and if the desert of Judæa lay in part on the east of the Jordan so as to embrace Bethabara, then Jesus may have received his baptism there; for John came at first baptizing in "the wilderness of Judæa" (Matt. iii. 1), and Jesus, without any intimation of a change of place, is said to have come and been baptized in the Jordan (Matt. iii. 13). But against this conclusion stands the fact that the wilderness (ἔρημος) of Judæa lay in all probability wholly on the west of the Jordan and the Dead Sea. See JUDÆA, WILDERNESS OF (Amer. ed.). Further, τὸ πρῶτον may signify only "at the first," referring in a general way to this place beyond the Jordan, where Jesus spent some of the last months or weeks of his life, as the same place where John had *formerly* baptized. H.

BETH-A'NATH (בֵּית עֲנָת [*house of answer*, sc. *to prayer*]: Βαιθαμέ, Βαιθανάχ, Βαιθενέθ; [Alex. Βαιναβαθ, Βαιθενεθ, Βεθενεκ:] *Bethanath*), one of the "fenced cities" of Naphtali, named with Beth-shemesh (Josh. xix. 38); from neither of them were the Canaanites expelled (Judg. i. 33). By Eusebius and Jerome (*Onom.* s. v. Ἀνείρ. Βαθμά, Βηθαναθά) it is spoken of as a village called Batanæa, 15 miles eastward of Cæsarea (Diocæsarea, or Sepphoris), and reputed to contain medicinal springs, λουτρὰ ἰάσιμα. Nothing, however, is known to have been discovered of it in modern times. G.

BETH-A'NOTH (בֵּית עֲנוֹת [*house of echo*, Fürst]: Βαιθανάμ; [Alex. Βαιθανωθ; Comp. Ald Βηθανάθ:] *Bethanoth*), a town in the mountainous district of Judah, named with Halhul, Beth-zur and others, in Josh. xv. 59 only. It is very probably the modern *Beit 'Ainún*, the remains of which, near to those of *Halhúl* and *Beit Súr*, were discovered by Wolcott and visited by Robinson (iii 281). G.

BETH'ANY (quasi בֵּית תְּיָנִי, *house of dates* [or from בֵּית עֲנִיָּה, *house of sorrow*] Βηθανία: *Bethania*), a village which, scanty as are the notices of it contained in Scripture, is more in

Digitized by Google

mately associated in our minds than perhaps any other place with the most familiar acts and scenes of the last days of the life of Christ. It was at Bethany that He raised Lazarus from the dead, and from Bethany that He commenced his "triumphal entry" into Jerusalem. It was his nightly resting place during the time immediately preceding his passion; and here, at the houses of Martha and Mary and of Simon the leper, we are admitted to view Him, more nearly than elsewhere, in the circle of his domestic life.

Though it was only at a late period of the life of our Lord that his connection with Bethany commenced, yet this is fully compensated for by its having been the scene of his very last acts on earth. It was somewhere here, on these wooded slopes beyond the ridge of Olivet, that the Apostles stood when they last beheld his figure, as, with "uplifted hands" — still, to the very moment of disappearance, "blessing" them — He was "taken up" into the "cloud" which "received" and hid Him from their "steadfast" gaze, the words still ringing in their ears, which prove that space and time are no hinderance to the connection of Christians with their Lord — "Lo! I am with you always, even to the end of the world."

The little information we possess about Bethany is entirely gathered from the N. T., neither the O. T. nor the Apocrypha having apparently any allusion to it.[a] It was situated "at" (πρός) the Mount of Olives (Mark xi. 1; Luke xix. 29), about fifteen stadia from Jerusalem (John xi. 18), on or near the usual road from Jericho to the city (Luke xix. 29, comp. 1; Mark xi. 1, comp. x. 46), and close by and west (?) of another village called BETHPHAGE, the two being several times mentioned together.

There never appears to have been any doubt as to the site of Bethany, which is now known by a name derived from Lazarus—*el-'Azarîyeh*[b] (العازرية). It lies on the eastern slope of the Mount of Olives, fully a mile beyond the summit, and not very far from the point at which the road to Jericho begins its more sudden descent towards the Jordan valley (Lindsay, p. 91, and De Saulcy, p. 120). The spot is a woody hollow more or less planted with fruit-trees, — olives, almonds, pomegranates, as well as oaks and carobs; the whole lying below a secondary ridge or hump, of sufficient height to shut out the village from the summit of the mount (Rob. i. 431, 432; Stanley, p. 189; Bonar, pp. 38–9).

From a distance the village is, to use the emphatic words of the latest published description, "remarkably beautiful" — "the perfection of retirement and repose" — "of seclusion and lovely peace" (Bonar, pp. 139, 230, 310, 337; and see Lindsay, p. 69). It is difficult to reconcile these glowing descriptions with Mr. Stanley's words (p. 189), or with the impression which the present writer derived from the actual view of the place. Possibly something of the difference is due to the different time of year at which the visits were made.

El-'Azarîyeh itself is a ruinous and wretched village, a "wild mountain hamlet" of "some twenty families," the inhabitants of which display even less than the ordinary eastern thrift and industry (Rob. i. 432; Stanley, p. 189; Bonar, p. 310). In the village are shown the traditional sites of the house and tomb of Lazarus; the former the remains of a square tower, apparently of old date, though certainly not of the age of the kings of Judah, to which De Saulcy assigns it (p. 128) — the latter a deep vault excavated in the limestone rock, the bottom reached by 26 steps. The house of Simon the leper is also exhibited. As to the real age and character of these remains there is at present no information to guide us.

Schwarz maintains *el-'Azarîyeh* to be AZAL; and would fix Bethany at a spot which, he says, the Arabs call Beth-hanan, on the Mount of Offense above Siloam (pp. 263, 135).

These traditional spots are first heard of in the 4th century, in the *Itinerary* of the Bourdeaux Pilgrim, and the *Onomasticon* of Eusebius and Jerome; and they continued to exist, with certain varieties of buildings and of ecclesiastical establishments in connection therewith, down to the 16th century, since which the place has fallen gradually into its present decay. This part of the history is well given by Robinson (i. 432–3). By Mandeville and other mediæval travellers the town is spoken of as the "Castle of Bethany," an expression which had its origin in *castellum* being employed in the Vulgate as the translation of κώμη in John xi. 1.

N.B. The derivation of the name of Bethany given above — that of Lightfoot and Reland — is doubtless more correct than the one proposed by Simonis (*Onom.* s. v.), namely, בֵּית עֲנִיָּה, *locus depressionis*, which has no special applicability to this spot more than any other, while it lacks the correspondence with Bethphage, "House of *Figs*," and with the "Mount of *Olives*," which gives so much color to this derivation, although it is true that the dates have disappeared, and the figs and olives alone are now to be found in the neighborhood of Bethany. This has been well brought out by Stanley (*S. & P.* pp. 186, 187). It may also be remarked that the use of the Chaldee word חִינְנֵי, for the fruit of the date-palm, is consistent with the late period at which we first hear of Bethany.

G.

* The etymology is still unsettled. The various conjectures are stated by Arnold in Herzog's *Real-Encyk.* ii. 116. The one that he prefers makes it the Chaldee or Aramæan עֲנִיָּא עֵירָא (Buxt. *Lex. Chald.* col. 1631 f.), i. e. *domus miseri*, "house of the afflicted." Origen, Theophylact and others express a similar idea in their οἶκος ὑπαχοῆς, as if related to עָנָה, i. e., where the prayer of the needy is heard and answered.

H.

* BETHANY BEYOND THE JORDAN (according to the true text in John i. 28). For this, see BETHABARA.

H.

[a] It has been suggested (Hitzig, *Jesaia*) that the word rendered "poor" in the A. V. of Is. x. 30 (עֲנִיָּה) — "poor Anathoth" — is an abbreviated form of the name of Bethany, as Nimrah is of Beth-nimrah, &c.; but apart from any other difficulty, there is the serious one that Bethany does not lie near the other places mentioned in the passage, and is quite out of the line of Sennacherib's advance.

[b] The Arabic name is given above from Robinson. Lord Lindsay, however, denies that this is correct, and asserts, after frequently hearing it pronounced, that the name is *Lazarieh*.

BETH-AR'ABAH (בֵּית הָעֲרָבָה, *house of the desert*: Βαιθαραβά, Θαραβαδμί; [Alex. in Josh. xv. 6] Βηθαραβα: *Betharaba*), one of the six cities of Judah which were situated down in the Arabah, *i. e.* the sunk valley of the Jordan and Dead Sea ("wilderness," Josh. xv. 61), on the north border of the tribe, and apparently between Bethhoglah and the high land on the west of the Jordan valley (xv. 6). It is also included in the list of the towns of Benjamin (xviii. 22. Βαιθαβαρά, Vat. [Alex. Βαιθαραβα]). G.

BETH-A'RAM (accurately BETH-HARAM, בֵּית הָרָם: [Θαργαί, Vat. -γαει; Alex. Βηθαραμ:] *Betharam*), one of the towns of Gad on the east of Jordan, described as in "the valley" (הָעֵמֶק, not to be confounded with the Arabah or Jordan valley), Josh. xiii. 27, and no doubt the same place as that named BETH-HARAN in Num. xxxii. 36. No further mention is found of it in the Scriptures; but Eusebius and Jerome (*Onomast.*) report that in their day its appellation (*a Syris dicitur*) was Bethramtha, Βηθραμφθά (see also the quotations from the Talmud in Schwarz, p. 231; the Syriac and other versions, however, have all Beth-haran, with no material variation), and that, in honor of Augustus, Herod had named it Libias (Λιβιάς). Josephus's account is that Herod (Antipas), on taking possession of his tetrarchy, fortified Sepphoris and the city (πόλις) of Betharamphtha, building a wall round the latter, and calling it Julias in honor of the wife of the emperor. As this could hardly be later than B. C. 1 — Herod the Great, the predecessor of Antipas, having died in B. C. 4 — and as the empress Livia did not receive her name of Julia until after the death of Augustus, A. D. 14, it is probable that Josephus is in error as to the new name given to the place, and speaks of it as having originally received that which it bore in his own day. It is curious that he names Libias long before (*Ant.* xiv. 1, § 4) in such connection as to leave no doubt that he alludes to the same place. Under the name of Amathus he again mentions it (*Ant.* xvii. 10, § 6; comp. *B. J.* ii. 4, § 2), and the destruction of the royal palaces there by insurgents from Perœa.

Ptolemy gives the locality of Libias as 31° 26′ at. and 67° 10′ long. (Ritter, *Jordan*, p. 573); and Eusebius and Jerome (*Onomasticon*) state that it was five miles south of Bethnabran, or Bethamnaran (*i. e.* Beth-nimrah?). This agrees with the position of the *Wady Seir*, or *Sîr*, which falls into the Ghôr opposite Jericho, and half way between *Wady Hesbân* and *Wady Shoaib*. No one appears to have explored this valley. Seetzen heard that it contained a castle and a large tank in masonry (*Reisen*, 1854, ii. 318). These may turn out to be the ruins of Libias. G.

BETH-AR'BEL (בֵּית אַרְבֵּאל: ἐκ τοῦ οἴκου τοῦ Ἱεροβοάμ; Alex. Ἱεροβααλ), named only in Hos. x. 14, as the scene of a sack and massacre by Shalman (Shalmaneser). No clew is given to its position; it may be the ancient stronghold of ARBELA in Galilee, or (as conjectured by Hitzig) another place of the same name near Pella, of which mention is made by Eusebius in the *Onomasticon*. In the Vulgate Jerome has translated the name to mean "e domo ejus qui judicavit Baal," *i. e.* Jerubbaal (יְרֻבַּעַל) or Gideon, understanding Salman as Zalmunna, and the whole passage as a reference to Judg. viii. G.

* The weight of opinion is in favor of identifying also this Arbel with the *Irbid* which represents the Greek Arbela in 1 Macc. ix. 2, between Tiberias and Sepphoris (Robinson iii. 281; Raumer's *Palästina*, p. 108; Ritter's *Erdkunde*, viii. 2, 328, Porter, *Handb.* p. 418). Travellers who turn to the left inland from the shore of Gennesaret, after proceeding a short distance beyond *Mejdel* (Magdala) in ascending the hills to *Safed* have before them the site of Arbela at the entrance into *Wady Hamâm* (valley of Doves), just back of the remarkable caverns which appear there in the face of the almost perpendicular rocks, reaching the height of 1,500 feet (Tristram, *Land of Israel*, p. 446). In addition to the name so well preserved (though the change of *l* to *d* is not common) it is distinctly implied in the prophet's associating it with "the fortresses" deemed so impregnable, that Arbela (Hos. x. 14) was a place of great natural security, which we find to be so eminently true of this *Irbid* or Arbela at the mouth of *Wady Hamâm*. For a description of the site see *Land and Book*, ii. 114. On the contrary Ewald knows that the prophet's Arbel was the famous city of that name on the Tigris, which Shalman, an Assyrian king otherwise unknown, had destroyed a short time before Hosea wrote (*Prophet. des A. Bundes*, i. 157). Dr. Pusey (*M. Prophets*, i. 69) thinks an Arbel must be meant near the middle of the plain of Jezreel (*Onomast.* s. v.), chiefly because he infers from 2 K. x. 14 that the Galilean Arbel must have been already in the power of the Assyrians before Shalman's invasion referred to by Hosea. But it is difficult, with so meagre a history, either to fix the time of Shalman's invasion or to trace the line of the conqueror's march through the country. The name is variously explained. According to Gesenius it signifies "House of God's ambush," *i. e.* a place made strong by His hand rather than man's. Simonis (*Onomast.* p. 494) comes nearer still to this import of the name: = "Lustrum Dei, *i. e.* maximum et inaccessum" (from אָרַב, *covert, haunt*). Fürst derives it from אָרַב, *to join together*, as huts in a row, hence *El's* (God's) *village* or court, *i. e.* sacred to him. H.

BETH-A'VEN (בֵּית אָוֶן, *house of naught*, i. e. *badness:* [Josh. xviii. 12] Βαιθάν, Alex. Βηθαυν: *Bethaven*) a place on the mountains of Benjamin, east of Bethel (Josh. vii. 2, Βαιθήλ [Alex. Βηθαυν], xviii. 12), and lying between that place and Michmash (1 Sam. xiii. 5; also xiv. 23, τὴν Βαμάθ, [Alex. Βηθαυν]. In Josh. xviii. 12, the "wilderness" (*Midbar* = pasture-land) of Bethaven is mentioned. In 1 Sam. xiii. 5 the reading of the LXX. is Βαιθωρών [Comp. Βαιθαβέν], Bethhoron; but if this be correct, another Beth-horon must be intended than that commonly known which was much further to the west. In Hos. iv. 15, v. 8, x. 5 [οἶκος Ὤν, but Alex. Hos. iv. 15 οἶκος τῆς ἀδικίας, and so Vat. marg.], the name is transferred, with a play on the word very characteristic of this prophet, to the neighboring Beth-el — once the "house of God," but then the house of idols, of "naught." G.

BETH-AZMA'VETH (בֵּית עַזְמָוֶת: Βηθασμάθ; [Alex. Βηθ:] *Bethasmoth*). Under this name is mentioned, in Neh. vii. 28 only, the town

Digitized by Google

of Benjamin which is elsewhere called AZMAVETH, and BETHSAMOS.

Mr. Finn [formerly English consul at Jerusalem] proposes to identify Azmaveth with *Hizmeh*, a village on the hills of Benjamin to the S. E. of *Jeba*. G.

BETH-BA'AL-ME'ON[a] (בֵּית בַּעַל מְעוֹן: οἶκος Μεελβάθ; Alex. οἶκος Βελμεων: *oppidum Baalmaon*), a place in the possessions of Reuben, on the "Mishor" or downs (A. V. "plain") east of Jordan (Josh. xiii. 17). At the Israelites' first approach its name was BAAL-MEON (Num. xxxii. 38, or in its contracted form, BEON, xxxii. 3), to which the Beth was possibly a Hebrew addition. Later it would seem to have come into possession of Moab, and to be known either as Beth-meon (Jer. xlviii. 23) or Baal-meon (Ez. xxv. 9). The name is still attached to a ruined place of considerable size (*beträchtlich*, Seetzen), a short distance to the S. W. of *Hesbân*, and bearing the name of "the fortress of *Ma'în*" (حصن ميعون), according to Burckhardt (865), or *Maûn*, according to Seetzen (*Reisen*, i. 408), which appears to give its appellation to the *Wadi Zerka Maein* (*ibid.* 402). G.

BETH-BA'RAH (בֵּית עֲבָרָה quasi בֵּית עֲבָרָה, *house of passage*, or, *of the ford*: Βαιθηρά; [Comp. Ald. Βαιθβηρά:] *Bethbera*), named only in Judg. vii. 24, as a point apparently south of the scene of Gideon's victory, which took place at about Bethshean, and to which point "the waters" (הַמַּיִם) were "taken" by the Ephraimites against Midian. What these "waters" were, is not clear, probably the wadies and streams which descend from the highlands of Ephraim; it is very plain that they were distinct from the Jordan, to which river no word but its own distinct name is ever applied. Beth-barah derives its chief interest from the possibility that its more modern representative may have been Bethabara where John baptized [BETHABARA]; but there is not much in favor of this beyond their similarity in sound. The pursuit of the Midianites can hardly have reached so far south as Bethabara, which was accessible to Judæa and Jerusalem and all the "region round about" (ἡ περίχωρος; *i. e.* the oasis of the South Jordan at Jericho).

If the derivation of the name given above be correct, Beth-barah was probably the chief ford of the district, and may therefore have been that by which Jacob crossed on his return from Mesopotamia, and at which Jephthah slew the Ephraimites. G.

BETH-BA'SI (Βαιθβασί; [Sin. Βαιθβασσει, Βαιθβασσει; Alex. Βεθβασι:] *Bethbessen*), a town which from the mention of its decays (τὰ καθῃρημένα) must have been originally fortified, lying in the desert (τῇ ἐρήμῳ), and in which Jonathan and Simon Maccabæus took refuge from Bacchides (1 Macc. ix. 62, 64). Josephus (*Ant.* xiii. 1, § 5) has Βηθελαγά (Beth-hogla), but a reading of the passage quoted by Reland (632) presents the more probable form of Beth-keziz. Either alternative fixes the situation as in the Jordan valley not far from Jericho. [KEZIZ, VALLEY OF.] G.

[a] It is possible that the name contains a trace of the tribe or nation of Meon, — the Maonites or Mehunim. [MAON; MEHUNIM.]

BETH-BIR'EI (בֵּית בִּרְאִי [*house of my creation*]: οἶκος Βαρουσεωρίμ (by inclusion of the next name); [Vat. οικ. Βραουμ; Alex. οικ. Βαρουμ:] *Bethberai*), a town of Simeon (1 Chr. iv 31), which by comparison with the parallel list in Josh. xix. appears to have had also the name of BETH-LEBAOTH. It lay to the extreme south, with Beersheba, Hormah, &c. (comp. Josh. xv. 32, Lebaoth) G.

BETH-CAR' (בֵּית כָּר, *house of lambs*: Βαιθχόρ, Alex. Βελχορ: *Bethchar*), a place named as the point to which the Israelites pursued the Philistines from Mizpeh on a memorable occasion (1 Sam. vii. 11), and therefore west of Mizpeh. From the unusual expression "under Beth-car" (מִתַּחַת בֵּת), it would seem that the place itself was on a height, with the road at its foot. Josephus (*Ant.* vi. 2, § 2) has μέχρι Κοππαίων, and goes on to say that the stone Ebenezer was set up at this place to mark it as the spot to which the victory had extended. [EBEN-EZER.] G.

BETH-DA'GON (בֵּית דָּגוֹן, *house of Dagon* Βαγαδιήλ; Alex. Βηθδαγων: *Bethdagon*).

1. A city in the low country (*Shefelah*) of Judah (Josh. xv. 41), and therefore not far from the Philistine territory, with which its name implies a connection. From the absence of any conjunction before this name, it has been suggested that it should be taken with the preceding, "Gederoth-Beth-dagon;" in that case probably distinguishing Gederoth from the two places of similar name in the neighborhood. Caphardagon existed as a very large village between Diospolis (Lydda) and Jamnia in the time of Jerome (*Onom.* s. v.) A *Beit Dejan* has been found by Robinson between Lydda and Jaffa, but this is too far north, and must be another place.

2. A town apparently near the coast, named as one of the landmarks of the boundary of Asher (Josh. xix. 27; בֵּית דָּגֹן, Βαιθεγενθὼ [Alex. Βηθδαγων]). The name and the proximity to the coast point to its being a Philistine colony.

3. In addition to the two modern villages noticed above as bearing this ancient name, a third has been found by Robinson (iii. 298) a few miles east of *Nâbulus*. There can be no doubt that in the occurrence of these names we have indications of the worship of the Philistine god having spread far beyond the Philistine territory. Possibly these are the sites of towns founded at the time when this warlike people had overrun the face of the country to "Michmash eastward of Beth-aven" on the south, and Gilboa on the north — that is, to the very edge of the heights which overlook the Jordan valley — driving "the Hebrews over Jordan into the land of Gad and Gilead" (1 Sam. xiii. 5–7; comp. 17, 18, xxix. 1, xxxi. 1). G.

BETH-DIBLATHA'IM (בֵּית דִּבְלָתָיִם, *house of the double cake* (of figs): [Vat. M.' οἶκος Δαιβλαθαιμ; [Rom. οἰκ. Δαιθλαθαλμ; Alex. FA οικ. Δεβλαθαιμ:] *domus Deblathaim*), a town of Moab (Jer. xlviii. 22), apparently the place elsewhere called ALMON-DIBLATHAIM. G.

* **BETH-E'DEN**, Amos i. 5, marg. [EDEN, 2.]

BETHEL [properly BETH-EL] (בֵּית אֵל, *house of God*: Βαιθήλ [etc.;] Joseph. Βηθήλ,

Digitized by Google

Βεθηλ πόλις: *Bethel*). 1. A well-known city and holy place of central Palestine.

Of the origin of the name of Bethel there are two accounts extant. (1.) It was bestowed on the spot by Jacob under the awe inspired by the nocturnal vision of God, when on his journey from his father's house at Beersheba to seek his wife in Haran (Gen. xxviii. 19). He took the stone which had served for his pillow and put (יָשֶׂם) it for a pillar, and anointed it with oil; and he "called the name of 'that place' (הַמָּקוֹם הַהוּא) Bethel; but the name of 'the city' (הָעִיר) was called Luz at the first."

The expression in the last paragraph of this account is curious, and indicates a distinction between the "city" and the "place" — the early Canaanite "city" Luz, and the "place," as yet a mere undistinguished spot, marked only by the "stone," or the heap (Joseph. τοῖς λίθοις συμφορουμένοις), erected by Jacob to commemorate his vision.

(2.) But according to the other account,[a] Bethel received its name on the occasion of a blessing bestowed by God upon Jacob after his return from Padan-aram; at which time also (according to this narrative) the name of Israel was given him. Here again Jacob erects (עָבַד) a "pillar of stone," which, as before, he anoints with oil (Gen. xxxv. 14, 15). The key of this story would seem to be the fact of God's "speaking" with Jacob. "God went up from him in the place where He 'spake' with him" — "Jacob set up a pillar in the place where He 'spake' with him," and "called the name of the place where God spake[b] with him Bethel."

Whether these two narratives represent distinct events, or, as would appear to be the case in other instances in the lives of the patriarchs, are different representations of the one original occasion on which the hill of Bethel received its consecration, we know not, nor indeed does it concern us to know. It is perhaps worth notice that the prophet Hosea — in the only reference which the Hebrew Scriptures contain to this occurrence — had evidently the second of the two narratives before him, since in a summary of the life of Jacob he introduces it in the order in which it occurs in Genesis — laying full and characteristic stress on the key-word of the story: "He had power over the angel and prevailed; he wept and made supplication unto Him; He found him in Bethel, and there He *spake* with us, even Jehovah God of hosts" (Hos. xii. 4, 5).

Early as is the date involved in these narratives, yet, if we are to accept the precise definition of Gen. xii. 8, the name of Bethel would appear to have existed at this spot even before the arrival of Abram in Canaan: he removed from the oaks of Moreh to "the' mountain on the east of Bethel," with "Bethel on the west and Hai on the east." Here he built an altar; and hither he returned from Egypt with Lot before their separation (xiii. 3, 4). See Stanley, *S. & P.* 218.

In one thing, however, the above narratives all agree, — in omitting any mention of town or buildings at Bethel at that early period, and in drawing a marked distinction between the "city" of Luz and the consecrated "place" in its neighborhood (comp. besides the passages already quoted, Gen. xxxv. 7). Even in the ancient chronicles of the conquest the two are still distinguished (Josh. xvi. 1, 2); and the appropriation of the name of Bethel to the city appears not to have been made till still later, when it was taken by the tribe of Ephraim; after which the name of Luz occurs no more (Judg. i. 22–26). If this view be correct, there is a strict parallel between Bethel and Moriah, which (according to the tradition commonly followed) received its consecration when Abraham offered up Isaac, but did not become the site of an actual sanctuary till the erection of the Temple there by Solomon. [MORIAH.]

The intense significance of the title bestowed by Jacob on the place of his vision — "House of God" — and the wide extent to which that appellation has been adopted in all languages and in spite of the utmost diversities of belief, has been well noticed by Mr. Stanley (220–1). It should not be overlooked how far this has been the case with the actual name; the very syllables of Jacob's exclamation, forming, as they do, the title of the chief sanctuary of the Mohammedan world — the Beit-allah of Mecca — while they are no less the favorite designation of the meanest conventicles of the humblest sects of Protestant Christendom.

On the other hand, how singular is the fact — if the conclusions of etymologists are to be trusted (Spencer, *de Leg. Hebr.* 444; Bochart, *Canaan*, ii. 2) — that the awful name of Bethel should have lent its form to the word by which was called one of the most perplexing of all the perplexing forms assumed by the idolatry of the heathen — the Baitulia, the λίθοι ἔμψυχοι, or living stones, of the ancient Phœnicians. Another opportunity will occur for going more at length into this interesting subject [STONES]; it will be sufficient here to say that the Baitulia seem to have preserved the erect position of their supposed prototype, and that the worship consisted of anointing them with oil (Arnobius, *adv. Gentes*, i. 39).

The actual stone of Bethel itself was the subject of a Jewish tradition, according to which it was removed to the second Temple, and served as the pedestal for the ark. It survived the destruction of the Temple by the Romans, and was resorted to by the Jews in their lamentations (Reland, *Pal.* 638). [TEMPLE, THE SECOND.]

After the conquest Bethel is frequently heard of In the troubled times when there was no king in Israel, it was to Bethel that the people went up in their distress to ask counsel of God (Judg. xx. 18. 26, 31, xxi. 2: in the A. V. the name is translated "house of God"). Here was the ark of the covenant under the charge of Phinehas the grandson of Aaron, with an altar and proper appliances for the offering of burnt-offerings and peace-offerings (xx. 26–28, xxi. 4); and the unwonted mention of a regular road or causeway as existing between it

[a] * The two accounts relate to different journeys of Jacob when he stopped at Bethel. The origin of the name, in the fullness of its meaning, was not one but two-fold. The accounts really differ only in this, that the expressive name which the patriarch gave to the place on his setting out for Padan-aram he had occasion to renew and emphasize on his return to Bethel, because God again appeared to him there and granted to him still more signal manifestations of his presence and favor (Gen. xxxv. 14, 15). E.

[b] The word is the same (דִּבֶּר) in all three cases though in the A. V. it is rendered "talked" in the two former.

Digitized by Google

and the great town of Shechem is doubtless an indication that it was already in much repute. Later than this we find it named as one of the holy cities to which Samuel went in circuit, taking equal rank with Gilgal and Mizpeh (1 Sam. vii. 16).

Doubtless, although we are not so expressly told, it was this ancient reputation, combined with its situation on the extreme south frontier of his new kingdom, and with the hold which it must have had on the sympathies both of Benjamin and Ephraim — the former's by lot, and the latter's by conquest — that made Jeroboam choose Bethel as the depository of the new false worship which was to seal and consummate the division between the ten tribes and the two.

Here he placed one of the two calves of gold, and built a "house of high places" and an altar of incense, by which he himself stood to burn, as we see him in the familiar picture of 1 K. xiii. Towards the end of Jeroboam's life Bethel fell into the hands of Judah (2 Chr. xiii. 19), whence it was probably recovered by Baasha (xvi. 1). It then remains unmentioned for a long period. The worship of Baal, introduced by the Phœnician queen of Ahab (1 K. xvi. 31), had probably alienated public favor from the simple erections of Jeroboam to more gorgeous shrines (2 K. x. 21, 22). Samaria had been built (1 K. xvi. 24), and Jezreel, and these things must have all tended to draw public notice to the more northern part of the kingdom. It was during this period that Elijah visited Bethel, and that we hear of "sons of the prophets" as resident there (2 K. ii. 2, 3), two facts apparently incompatible with the active existence of the calf-worship. The mention of the bears so close to the town (ii. 23, 25), looks too as if the neighborhood were not much frequented at that time. But after his destruction of the Baal worship throughout the country, Jehu appears to have returned to the simpler and more national religion of the calves, and Bethel comes once more into view (2 K. x. 29). Under the descendants of this king the place and the worship must have greatly flourished, for by the time of Jeroboam II., the great-grandson of Jehu, the rude village was again a royal residence with a "king's house" (Am. vii. 13); there were palaces both for "winter" and "summer," "great houses" and "houses of ivory" (iii. 15), and a very high degree of luxury in dress, furniture, and living (vi. 4–6). The one original altar was now accompanied by several others (iii. 14, ii. 8); and the simple "incense" of its founder had developed into the "burnt-offerings" and "meat-offerings" of "solemn assemblies," with the fragrant "peace-offerings" of "fat beasts" (v. 21, 22).

How this prosperity came to its doom we are not told. After the desolation of the northern kingdom by the king of Assyria, Bethel still remained an abode of priests, who taught the wretched colonists "how to fear Jehovah," "the God of the land" (2 K. xvii. 28, 27). The buildings remained till the time of Josiah, by whom they were destroyed: and in the account preserved of his reforming iconoclasm we catch one more glimpse of the altar of Jeroboam, with its last loathsome fire of "dead men's bones" burning upon it, the altar and high-place surviving in their archaic antiquity amidst the successive additions of later votaries, like the wooden altar of Becket at Canterbury, which continued in its original simplicity through all the subsequent magnificence of the church in which he was murdered (Stanley, *Canterbury*, 184). Not the least remarkable of these later works was the monument (הַנָּבִיא : στήλη), evidently a conspicuous erection, of the "man of God," who proclaimed the ultimate downfall of this idolatrous worship at its very outset, and who would seem to have been at a later date canonized as it were by the votaries of the very idolatry which he denounced. "Woe unto you! for ye build the sepulchres of the prophets, and your fathers killed them."

But, in any case, the fact of the continued existence of the tomb of this protester through so many centuries of idolatry illustrates very remarkably the way in which the worship of Jehovah and the false worship went on side by side at Bethel. It is plain from several allusions of Amos that this was the case (v. 14, 22); and the fact before noticed of prophets of Jehovah being resident there, and of the friendly visits even of the stern Elijah; of the relation between the "man of God from Judah" and the "lying prophet" who caused his death of the manner in which Zedekiah the son of Chenaanah, a priest of Baal, resorts to the name of Jehovah for his solemn adjuration, and lastly of the way in which the denunciations of Amos were tolerated and he himself allowed to escape, — all these point to a state of things well worthy of investigation. In this connection, too, it is curious that men of Bethel and Ai returned with Zerubbabel (Ezr. ii. 28; Neh. vii. 32); and that they returned to their native place whilst continuing their relations with Nehemiah and the restored worship (Neh. xi. 31). In the Book of Esdras the name appears as BETOLIUS. In later times Bethel is only named once, amongst the strong cities in Judæa which were repaired by Bacchides during the struggles of the times of the Maccabees (1 Macc ix. 50).

Bethel receives a bare mention from Eusebius and Jerome in the *Onomasticon*, as 12 miles from Jerusalem on the right hand of the road to Sichem, and here its ruins still lie under the scarcely altered name of *Beitin*. They cover a space of "three or four acres," and consist of "very many foundations and half-standing walls of houses and other buildings." "The ruins lie upon the front of a low hill between the heads of two hollow wadies which unite and run off into the main valley *es-Suweinit*" (Rob. i. 448–9). Dr. Clarke, and other travellers since his visit, have remarked on the "stony" nature of the soil at Bethel, as perfectly in keeping with the narrative of Jacob's slumber there. When on the spot little doubt can be felt as to the localities of this interesting place. The round mount S. E. of Bethel must be the "mountain" on which Abram built the altar, and on which he and Lot stood when they made their division of the land (Gen. xii. 7, xiii. 10). It is still thickly strewn to its top with stones formed by nature for the building of "altar" or sanctuary. As the eye turns involuntarily eastward, it takes in a large part of the plain of the Jordan opposite Jericho; distant it is true, but not too distant to discern in that clear atmosphere the lines of verdure that mark the brooks which descend from the mountains beyond the river and fertilize the plain even in its present neglected state. Further south lies, as in a map, fully half of that sea which now covers the once fertile oasis of the "cities of the plain," and which in those days was as "the garden of the Lord, even as the land of Egypt." Eastward again of this mount, at about the same distance on the left that

Digitized by Google

Bethel is on the right, overlooking the *Wady Suweinit*, is a third hill crowned by a remarkably desolate-looking mass of gray debris, the most perfect heap of ruin to be seen even in that country of ruins. This is *Tell er-Rijmeh*, "the mound of the heap," agreeing in every particular of name, aspect, and situation, with AI.

An admirable passage on the history of Bethel will be found in Stanley (217–223).

2. [In Josh., Rom. Vat. Alex. omit; Comp. Ald. Βαιθήλ.] A town in the south part of Judah, named in Josh. xii. 16 and 1 Sam. xxx. 27. The collocation of the name in these two lists is decisive against its being the well-known Bethel. In the latter case the LXX. read Βαιθσούρ, *i. e.* Beth-zur [but Comp. Alex. Βαιθήλ]. By comparison of the lists of the towns of Judah and Simeon (Josh. xv. 30, xix. 4; 1 Chr. iv. 30), the place appears under the names of CHESIL, BETHUL, and BETHUEL.

G.

* It is remarkable that a place so prominent as Bethel (1) in the O. T. should be unnamed in the New; and yet it continued to exist in the time of Christ, for Josephus (*B. J.* iv. 9, § 9) relates its capture by Vespasian on his march from Tiberius to Jerusalem. The Saviour must have passed within sight of it (perhaps at other times, but certainly) on his journey from Judæa to Galilee, when he stopped at Jacob's well near Sychar (John iv. 3 ff.), and must have been near it when he retired to Ephraim (John xi. 54) after the raising of Lazarus; but there is no evidence that he ever turned aside to go to the place itself. After the notice of Bethel in the *Onomasticon* (above referred to) it disappeared from history, and for ages its location was unknown to the people of western countries. It is an instance of what is true of so many of the ancient places in the Bible, namely, that after having been last mentioned in the Scriptures they were unheard of, till geographers and tourists in our own day have traversed the land, and on asking the inhabitants to tell them the names of their towns and villages have had the old Scripture names given back to them from the mouths of the people. It is but just to add that the identification of *Beitin* with the ancient Bethel seems to be due to the missionary Nicolayson, in 1836. (*Jewish Intelligence*, Feb. 1837, p. 38.) Dr. Robinson (*Researches*, iii. 267 ff.) argues the question at length whether *Beitin* may not also be the Bether which was the scene of the great battle between the Jewish leader Bar-cochba, *Son of a Star*, and Hadrian, a battle so terribly disastrous to the Jews. The supposition (Williams, *Holy City*, ii. p. 212) that this Bether is the ridge near *Bittîr*, 2½ hours southwest of Jerusalem, he regards as without any sufficient foundation.

The sojourn of Abraham and Lot with their flocks and herds in this region (Gen. xiii. 1 ff.) implies that it was very fertile and well suited to their pastoral occupations. The writer can testify that it maintains still its ancient character in this respect. The cattle which he saw there surpassed in number and size any that he saw at any one time in any other place. Springs abound; and a little to the west, toward *Jufna*, the Roman Gophna, was a flooded meadow, which as late as 28th of April was almost large enough to be called a lake. On the hill-top just east of Bethel, where Abraham and Lot agreed to separate from each other, the eye catches a sight which is quite startling: we see not only the course of the Jordan stretching north and south, readily traced by the waving line of verdure along its banks, but its waters broken and foaming as they roll over some of the many cascades, almost cataracts, for which the river is remarkable. Lieutenant Lynch, who floated down the Jordan from the Lake of Galilee to the Dead Sea, ascertained that the river in its intermediate passage rushes over not fewer than 27 violent rapids, as well as many others less precipitous. It is interesting to be reminded that sepulchres are found at the present day in the rocky heights around Bethel. See *Sinai und Golgotha*, von F. A. Strauss, p. 371. Stanley also (*Sin. and Pal.* p. 147, Am. ed.) speaks of "the excavations" which the traveller sees in approaching this place, in which the dead of so many past generations have been buried. It was from such recesses, no doubt, that king Josiah, in his zeal for the worship of Jehovah, dug up the bones of the old idolaters who had lived at Bethel, which he burned on the altar of the golden calf in order by this act of pollution to mark his abhorrence of such idolatry, and to render the place infamous forever. There is nothing very remarkable in the situation or scenery of Bethel to impress the observer; and the hold which it acquired on the religious veneration of the Hebrews presupposes some such antecedent history as that related of the patriarchs in the book of Genesis.

H.

BETH'ELITE, THE (1 K. xvi. 34). [BETHEL.]

BETH-E'MEK (בֵּית הָעֵמֶק, *house of the valley*: Βαιθμέ; Alex. Βηθαεμεκ: *Bethemec*), a place on or near the border of Asher, on the north side of which was the ravine of Jiphthah-el (Josh. xix. 27). Robinson has discovered an *'Amkah* about 8 miles to the N. E. of *Akka*; but if his identification of *Jefât* with Jiphthah-el be tenable, the site of Beth-emek must be sought for further south than *Amkah* (Rob. iii. 103, 107–8).

G.

BETHER, THE MOUNTAINS OF (הָרֵי בָתֶר: ὄρη κοιλωμάτων: *Bether*, and *Bethel* [?]), Cant. ii. 17. There is no clue to guide us to what mountains are intended here.

For the site of Bether, so famous in the post-biblical history of the Jews, see Reland, 639, 640; Rob. iii. 267–271.

G.

* Bether, says Gesenius, signifies *section*, a piece cut off, and describes apparently a region consisting of hills and valleys, and at the same time craggy, precipitous. Fürst defines the term in the same way. The scene of Solomon's Song being laid on Mount Lebanon, we may suppose Bether to have been in that region whose physical aspects so well agree with the etymology, though that trait belongs, of course, to many other parts of Palestine. This Bether has probably no connection with that of the later Jewish history; see addition to BETHEL.

H.

BETHESDA (Βηθεσδά, as if חֶסֶד בֵּית, *house of mercy*, or בֵּית אֶשְׁדָּא, *place of the flowing of water*: Euseb. Βηζαβδ: *Bethsaida*), the Hebrew name of a reservoir or tank (κολυμβήθρα, *i. e.* a swimming-pool), with five "porches" (στοαί) close upon the sheep-gate or "market" (ἐπὶ τῇ προβατικῇ — it will be observed that the word "market" is supplied) in Jerusalem (John v 2).

Digitized by Google

the porches — *i. e.* cloisters or colonnades[a] — were extensive enough to accommodate a large number of sick and infirm people, whose custom it was to wait there for the "troubling of the water."

Eusebius — though unfortunately he gives no clue to the situation of Bethesda — describes it in the *Onomasticon* as existing in his time as two pools (*ἐν ταῖς λίμναις διδύμοις*), the one supplied by the periodical rains, while the water of the other was of a reddish color (*πεφοινιγμένον*), due, as the tradition then ran, to the fact that the flesh of the sacrifices was anciently washed there before offering, on which account the pool was also called *προβατική*. See, however, the comments of Lightfoot on this view, in his *Exercit. on S. John*, v. 2. Eusebius's statement is partly confirmed by the Bourdeaux Pilgrim (A. D. 333), who mentions in his *Itinerary* "twin fish-pools, having five porches, which are called Bethsaida" (quoted in Barclay, 299).

The large reservoir called the *Birket Israil*, within the walls of the city, close by the St. Stephen's gate, and under the northeast wall of the Haram area, is generally considered to be the modern representative of Bethesda. This tradition reaches back certainly to the time of Sæwulf, A. D. 1102, who mentions it under the name of Bethsaida (*Early Trav.* 41). It is also named in the *Cites de Jherusalem*, A. D. 1187 (sect. vii.; Rob. ii. 562), and in more modern times by Maundrell and all the later travellers.

The little that can be said on the subject goes rather to confirm than to invalidate this tradition. On the one hand, (1.) the most probable position of the sheep-gate is at the northeast part of the city [JERUSALEM]. On the other hand, the *Birket Israil* exhibits none of the marks which appear to have distinguished the water of Bethesda in the records of the Evangelist and of Eusebius. (2.) The construction of the *Birkeh* is such as to show that it was originally a water-reservoir,[b] and not, as has been suggested, the moat of a fortress (Rob. i. 293–4, iii. 243); (3.) there is certainly a remarkable coincidence between the name as given by Eusebius, Bezatha, and that of the northeast suburb of the city at the time of the Gospel history — Bezetha; and (4.) there is the difficulty that if the *Birket Israil* be not Bethesda, which of the ancient "pools" does it represent?

One other proposed identification must be noticed, namely, that of Dr. Robinson (i. 342–3), who suggests the "fountain of the Virgin," in the valley of the Kedron, a short distance above the Pool of Siloam. In favor of this are its situation, supposing the sheep-gate to be at the southeast of the city, as Lightfoot, Robinson, and others suppose, and the strange intermittent "troubling of the water" caused by the periodical ebbing and flowing of the supply. Against it are the confined size of the pool, and the difficulty of finding room for the five stoæ. (See Barclay's detailed account, *City*, &c. 516–524, and 325–6.) G.

BETH-E'ZEL (בֵּית הָאֵצֶל, *house of firmness* (?): *οἶκος ἐχόμενος αὐτῆς*: *domus vicina*), a place named only in Mic. i. 11. From the context it was doubtless situated in the plain of Philistia G.

* Gesenius defines the name as "fixed dwelling;" and the point of the expression in Mic. i. 11 seems to turn on that meaning. "They who abide, strong though they be, shall not furnish an abiding place." See Pusey's *Minor Prophets*, iii. 300. In some versions (Sept. Vulg. Luth.) the expression, instead of being treated as a proper name, is rendered *house by the side*, i. e. *the one next*. H.

BETH-GA'DER (בֵּית גָּדֵר, if not in pause, Geder, גֶּדֵר [*house of the wall*]: Βεθγεδώρ; Vat. Βαιθγαδων; Alex.] Βαιθγεδωρ: *Bethgader*), doubtless a place, though it occurs in the genealogies of Judah as if a person (1 Chr. ii. 51). Possibly the same place as GEDER (Josh. xii. 13). G.

BETH-GA'MUL (בֵּית גָּמוּל, *house of the weaned*, Gesen. *Lex.*, but may it not be "house of camel"?: *οἶκος* Γαιμώλ; Alex. Γαμωλα: *Bethgamul*), a town of Moab, in the *mishor* or downs east of Jordan (A. V. "plain country," Jer. xlviii. 23, comp. 21); apparently a place of late date, since there is no trace of it in the earlier lists of Num. xxxii. 34–38, and Josh. xiii. 16–20. A place called *Um el-Jemâl* is said to exist a few miles south of *Busrah* in the Haurân (Burckh. 106; Kiepert's map in Rob. 1857); but this is much too far to the N. E. to suit the requirements of the text. In a country of nomadic tribes this latter name would doubtless be a common one. G.

BETH-HAC'CEREM[c] [*Heb.* -hacce'rem] (בֵּית הַכֶּרֶם, *house of the vine*: [in Neh.,] Βηθαχχαρίμ, [Vat. Βηθαχαμ; Alex.] Βηθαχχαρμα; [in Jer., Βαιθαχαρμά, Sin. Βεθθαχαρμα, Alex. Βηθθαχαρ:] *Bethacharam*, [*Bethacarem*]), a town which, like a few other places, is distinguished by the application to it of the word *pelec*, פֶּלֶךְ, A. V. "part" (Neh. iii. 14). It had then a "ruler" called שַׂר. From the other mention of it (Jer. vi. 1) we find that it was used as a beacon-station, and that it was near Tekoa. By Jerome (*Comm.* Jer. vi.) a village named *Bethacharma* is said to have been on a mountain between Tekoa and Jerusalem, a position in which the eminence known as the Frank mountain (Herodium) stands conspicuous; and this has accordingly been suggested as Beth-haccerem (Pococke, Rob. i. 480). The name is at any rate a testimony to the early fruitfulness of this part of Palestine.

Karem (Καρέμ) is one of the towns added in the LXX. to the Hebrew text of Josh. xv. 60, as in the mountains of Judah, in the district of Bethlehem. G.

BETH-HA'RAN (בֵּית הָרָן: ἡ Βαιθαράν; [Alex. Βαιθαρρα:] *Betharan*), one of the "fenced cities" on the east of Jordan, "built" by the Gadites (Num. xxxii. 36). It is named with Beth-nimrah, and therefore is no doubt the same place as BETH-ARAM (accurately Beth-haram), Josh.

[a] Cloisters or colonnades round artificial tanks are common in the East. One example is the *Taj bowree*, in the set of drawings of Beejapore now publishing by the East India Company.

[b] The photographs, woodcuts, and careful statements of Salzmann, are conclusive on this point.

[c] This name deserves notice as one of the very few instances in which the translators of the A. V. have retained the definite article, which in the original so frequently occurs in the middle of compound proper names.

Digitized by Google

xiii. 27. The name is not found in the lists of the towns of Moab in either Isaiah, Jeremiah, or Ezekiel. G.

BETH-HOG'LA, and -HOG'LAH (בֵּית חָגְלָה, *house of partridge*, Gesen.; though Jerome gives another interpretation, *locus gyri*, reading the name בֵּית עֶגְלָה, and connecting it with the funeral races or dances at the mourning for Jacob [ATAD]: Βαιθαγλαδμ, [θάλασσα,] Βεθεγαώ; [Alex. Βαιθαλα,] Βαιθαλαγα, [Βηθαγλα:] *Bethagla*), a place on the border of Judah (Josh. xv. 6) and of Benjamin (xviii. 19), to which latter tribe it was reckoned to belong (xviii. 21). A magnificent spring and a ruin between Jericho and the Jordan still bear the names of *'Ain-hajla* and *Kûsr Hajla*, and are doubtless on or near the old site (Rob. i. 544–6). The LXX. reading, Βαιθαγλαδμ, may point to En-eglaim, a place which was certainly near this locality. G.

BETH-HO'RON (בֵּית חוֹרוֹן, or in contracted form בֵּית חֹרוֹן, and once בֵּית חֹרֹן, *house of caverns* or *holes:* Βαιθωρών, [etc.:] *Bethoron*), the name of two towns or villages, an "upper" (בֵּית הָעֶלְיוֹן) and a "nether" (בֵּית הַתַּחְתוֹן), (Josh. xvi. 3, 5; 1 Chr. vii. 24), on the road from Gibeon to Azekah (Josh. x. 10, 11) and the Philistine Plain (1 Macc. iii. 24). Beth-horon lay on the boundary-line between Benjamin and Ephraim (Josh. xvi. 3, 5, and xviii. 13, 14), was counted to Ephraim (Josh. xxi. 22; 1 Chr. vii. 24), and given to the Kohathites (Josh. xxi. 22; 1 Chr. vi. 68 [53]).

The road connecting the two places is memorable in sacred history as the scene of two of the most complete victories achieved by the Jewish arms: that of Joshua over the five kings of the Amorites (Josh. x.; Ecclus. xlvi. 6), and that of Judas Maccabæus over the forces of Syria under Seron (1 Macc. iii. 13–24). Later still the Roman army under Cestius Gallus was totally cut up at the same spot (Joseph. *B. J.* ii. 19, §§ 8, 9).

There is no room for doubt that the two Beth-horons still survive in the modern villages of *Beit-'ûr* (بيت عور) *et-Tahta* and *el-Fôka*, which were first noticed by Dr. Clarke, and have been since visited by Dr. Robinson, Mr. Stanley, and others. Besides the similarity of the name, and the fact that the two places are still designated as "upper" and "lower," all the requirements of the narrative are fulfilled in this identification. The road is still the direct one from the site which must have been Gibeon (*el-Jîb*), and from Michmash (*Mûkhmâs*) to the Philistine plain on the one hand, and Antipatris (Joseph. *B. J.* ii. 19, § 9) on the other. On the mountain which lies to the southward of the nether village is still preserved the name (*Y'âlo*) and the site of Ajalon, so closely connected with the proudest memories of Beth-horon; and the long "descent" between the two remains unaltered from what it was on that great day "which was like no day before or after it."

The importance of the road on which the two Beth-horons are situated, the main approach to the interior of the country from the hostile districts on both sides of Palestine — Philistia and Egypt on the west, Moab and Ammon on the east — at once explains and justifies the frequent fortification of these towns at different periods of the history (1 K. ix. 17; 2 Chr. viii. 5; 1 Macc. ix. 50; Jud. iv. 4, 5). This road — still, as in ancient times, "the great road of communication and heavy transport between Jerusalem and the sea-coast" (Rob. ii. 252), though a route rather more direct, known as the "Jaffa road," is now used by travellers with light baggage — leaves the main north road at *Tuleil el-F'ûl*, 3½ miles from Jerusalem, due west of Jericho. Bending slightly to the north, it runs by the modern village of *el-Jîb*, the ancient Gibeon, and then proceeds by the Beth-horons in a direct line due west to *Jimzu* [GIMZO] and *Lûdd* [LYDDA], at which it parts into three, diverging north to *Caphar-Saba* [ANTIPATRIS], south to Gaza, and west to *Jaffa* [JOPPA].

From Gibeon to the Upper Beth-horon is a distance of about 4 miles of broken ascent and descent. The ascent, however, predominates, and this therefore appears to be the "going up" to Beth-horon which formed the first stage of Joshua's pursuit.[a] With the upper village the descent commences; the road rough and difficult even for the mountain-paths of Palestine; now over sheets of smooth rock flat as the flagstones of a London pavement; now over the upturned edges of the limestone strata; and now amongst the loose rectangular stones so characteristic of the whole of this district. There are in many places steps cut, and other marks of the path having been artificially improved. But though rough, the way can hardly be called "precipitous;" still less is it a ravine (Stanley, p. 208), since it runs for the most part along the back of a ridge or water-shed dividing wadies on either hand. After about three miles of this descent, a slight rise leads to the lower village standing on its mamelon — the last outpost of the Benjamite hills, and characterized by the date-palm in the enclosure of the village mosque. A short and sharp fall below the village, a few undulations and the road is amongst the *dûra* of the great corn-growing plain of Sharon.

This rough descent from the upper to the lower *Beit'ûr* is the "going down to Beth-horon" of the Bible narrative. Standing on the high ground of the upper village, and overlooking the wild scene, we may feel assured that it was over this rough path that the Canaanites fled to their native lowlands.

In a remarkable fragment of early history (1 Chr. vii. 24) we are told that both the upper and lower towns were built by a woman of Ephraim, Sherah, who in the present state of the passage appears as a grand-daughter of the founder of her tribe, and also as a direct progenitor of the great leader with whose history the place is so closely connected. G.

BETH-JESHIMOTH, or -JESIMOTH (בֵּית הַיְשִׁמוֹת; in Numbers, הַיְשִׁמוֹת, *house of the wastes:* Αλσιμώθ, [etc.:] Alex. Ασιμωθ, [etc.:] *Bethsimoth, Bethiesimoth*), a town or place east of Jordan, in the "deserts" (עַרְבֹת) of Moab; that

[a] The statements of Dr. Robinson and Mr. Stanley on this point are somewhat at variance; but although the road from Gibeon to *Beit'ûr et-Tahta* is by no means a uniform rise, yet the impression is certainly that of an ascent; and *Beit'ûr*, though perhaps no higher than the ridge between it and Gibeon, yet looks higher, because it is so much above everything beyond it.

Digitized by Google

a, on the lower level at the south end of the Jordan valley (Num. xxxiii. 49); and named with Ashdoth-pisgah and Beth-peor. It was one of the limits of the encampment of Israel before crossing the Jordan. Later it was allotted to Reuben (Josh. xii. 3, xiii. 20), but came at last into the hands of Moab, and formed one of the cities which were "the glory of the country" (Ez. xxv. 9). Schwarz (p. 228) quotes "a *Beth-Jisimuth* as still known at the northeasternmost point of the Dead Sea, half a mile from the Jordan;" but this requires confirmation. G.

BETH-LEB'AOTH (בֵּית לְבָאוֹת, *house of lionesses:* Βαθαρώθ; Alex. Βαιθαλβαθ: *Bethlebaoth*), a town in the lot of Simeon (Josh. xix. 6), and therefore in the extreme south of Judah (xv. 32, Lebaoth), probably in the wild country to which its name bears witness. In the parallel list in 1 Chr. iv. 31 the name is given BETH-BIREI. G.

BETH'-LEHEM (בֵּית לֶחֶם = *house of bread:* Βηθλεέμ: *Bethlehem*). 1. One of the oldest towns in Palestine, already in existence at the time of Jacob's return to the country. Its earliest name was EPHRATH or EPHRATAH (see Gen. xxxv. 16, xlviii. 7; Josh. xv. 60, LXX.), and it is not till long after the occupation of the country by the Israelites that we meet with it under its new name of Bethlehem. Here, as in other cases (comp. Beth-meon, Beth-diblathaim, Beth-peor), the "Beth" appears to mark the bestowal of a Hebrew appellation; and if the derivations of the Lexicons are to be trusted, the name in its present shape appears to have been an attempt to translate the earlier Ephratah into Hebrew language and idiom, just as the Arabs have in their turn, with a further slight change of meaning, converted it into *Beit-lahm* (house of flesh).

However this may be, the ancient name lingered as a familiar word in the mouths of the inhabitants of the place (Ruth i. 2, iv. 11; 1 Sam. xvii. 12), and in the poetry of the Psalmists and Prophets (Ps. cxxxii. 6; Mic. v. 2) to a late period. [EPHRATH.] In the genealogical lists of 1 Chr. it recurs, and Ephrath appears as a person — the wife of Caleb and mother of Hur (חוּר) (ii. 19, 51, iv. 4); the title of "father of Bethlehem" being bestowed both on Hur (iv. 4) and on Salma, the son of Hur (ii. 51, 54). The name of Salma recalls a very similar name intimately connected with Bethlehem, namely, the father of Boaz, Salmah (שַׂלְמָה, Ruth iv. 20; A. V. "Salmon") or Salmon (שַׂלְמוֹן, verse 21). Hur is also named in Ex. xxxi. 2 and 1 Chr. ii. 20, as the father of Uri the father of Bezaleel. In the East a trade or calling remains fixed in one family for generations, and if there is any foundation for the tradition of the Targum, that Jesse the father of David was "a weaver of the veils of the sanctuary" [a] (Targ. Jonathan on 2 Sam. xxi. 19), he may have inherited the accomplishments and the profession of his art om his forefather, who was "filled with the Spirit God," "to work all manner of works," and amongst them that of the embroiderer and the weaver (Ex. xxxv. 35).[b]

After the conquest Bethlehem appears under its own name Beth-lehem-judah (Judg. xvii. 7; 1 Sam. xvii. 12; Ruth i. 1, 2), possibly, though hardly probably, to distinguish it from the small and remote place of the same name in Zebulun. As the Hebrew text now stands, however, it is omitted altogether from the list of the towns of Judah in Joshua xv. though retained by the LXX. in the eleven names which they insert between verses 59 and 60. Among these it occurs between Theko (Tekoa), Θεκώ (comp. 1 Chr. iv. 4, 5), and Phagor (? Peor, Φαγώρ). This omission from the Hebrew text is certainly remarkable, but it is quite in keeping with the obscurity in which Bethlehem remains throughout the whole of the sacred history. Not to speak of the later event which has made the name of Bethlehem so familiar to the whole Christian and Mussulman world, it was, as the birthplace of David, the scene of a most important occurrence to ancient Israel. And yet from some cause or other it never rose to any eminence, nor ever became the theatre of any action or business. It is difficult to say why Hebron and Jerusalem, with no special associations in their favor, were fixed on as capitals, while the place in which the great ideal king, the hero and poet of the nation, drew his first breath and spent his youth remained an "ordinary Judæan village." No doubt this is in part owing to what will be noticed presently — the isolated nature of its position; but that circumstance did not prevent Gibeon, Ramah, and many other places situated on eminences from becoming famous, and is not sufficient to account entirely for such silence respecting a place so strong by nature, commanding one of the main roads, and the excellence of which as a military position may be safely inferred from the fact that at one time it was occupied by the Philistines as a garrison (2 Sam. xxiii. 14; 1 Chr. xi. 16).

Though not named as a Levitical city, it was apparently a residence of Levites, for from it came the young man Jonathan, the son of Gershom, who became the first priest of the Danites at their new northern settlement (Judg. xvii. 7, xviii. 30), and from it also came the concubine of the other Levite whose death at Gibeah caused the destruction of the tribe of Benjamin (xix. 1–9).

The book of Ruth is a page from the domestic history of Bethlehem; the names, almost the very persons, of the Bethlehemites are there brought before us; we are allowed to assist at their most peculiar customs, and to witness the very springs of those events which have conferred immortality on the name of the place. Many of these customs were doubtless common to Israel in general, but one thing must have been peculiar to Bethlehem. What most strikes the view, after the charm of the general picture has lost its first hold on us, is the intimate connection of the place with Moab. Of the origin of this connection no record exists, no hint of it has yet been discovered, but it continued in force for at least a century after the arrival of Ruth, till the time when her great grandson could find no more secure retreat for his parents from the fury of Saul, than the house of the king

[a] At the date of the visit of Benjamin of Tudela, here were still "twelve Jews, *dyers* by profession, living at Beth-lehem" (Benj. of Tudela, *Asher*, i. 75).

[b] May not this elucidate the allusions to the "weaver's beam" (whatever the "beam" may be) which occur in the accounts of giants or mighty men slain by David or his heroes, but not in any unconnected with him.

Digitized by Google

of Moab at Mizpeh (1 Sam. xxii. 3, 4). But whatever its origin, here we find the connection in full vigor. When the famine occurs, the natural resource is to go to the country of Moab and "continue there;" the surprise of the city is occasioned not at Naomi's going, but at her return. Ruth was "not like" the handmaidens of Boaz — some difference of feature or complexion there was doubtless which distinguished the "children of Lot" from the children of Abraham, Isaac, and Jacob; but yet she gleans after the reapers in the field without molestation or remark, and when Boaz in the most public manner possible proclaims his intention of taking the stranger to be his wife, no voice of remonstrance is raised, but loud congratulations are expressed, the parallel in the life of Jacob occurs at once to all, and a blessing is invoked on the head of Ruth the Moabitess, that she may be like the two daughters of the Mesopotamian Nahor, "like Rachel and like Leah, who did build the house of Israel." This, in the face of the strong denunciations of Moab contained in the Law is, to say the least, very remarkable.[a]

The elevation of David to the kingdom does not appear to have affected the fortunes of his native place. The residence of Saul acquired a new title specially from him, by which it was called even down to the latest time of Jewish history (2 Sam. xxi. 6; Joseph. *B. J.* v. 2. § 1, Γαβαθσαουλή), but David did nothing to dignify Bethlehem, or connect it with himself. The only touch of recollection which he manifests for it, is that recorded in

Bethlehem.

the well-known story of his sudden longing for the water of the well by the gate of his childhood (2 Sam. xxiii. 15).

The few remaining casual notices of Bethlehem in the Old Testament may be quickly enumerated. It was fortified by Rehoboam (2 Chr. xi. 6). By the time of the Captivity, the Inn of Chimham by (אֵצֶל = "close to") Bethlehem, appears to have become the recognized point of departure for travellers to Egypt (Jer. xli. 17) — a caravanserai or khan (גֵּרוּת: see Stanley, App. § 90), perhaps the identical one which existed there at the time of our Lord (*καταλυμα*), like those which still exist all over the east at the stations of travellers. Lastly, "Children of Bethlehem," to the number of 123, returned with Zerubbabel from Babylon (Ezr. ii. 21; Neh. vii. 26).

In the New Testament Bethlehem retains its distinctive title of Bethlehem-judah[b] (Matt. ii. 1, 5), and once, in the announcement of the angels, the "city of David"[c] (Luke ii. 4; and comp. John vii. 42; *κώμη*: *castellum*). Its connection with the history of Christ is too familiar to all to need any notice here: the remark should merely be made that as in the earlier history less is recorded of the place after the youth of David than before, so in the later nothing occurs after the birth of our Lord to indicate that any additional importance or interest was fastened on the town. In fact, the passages just quoted, and the few which follow, exhaust the references to it in the N. T. (Matt. ii. 6, 8, 16; Luke ii. 15).

After this nothing is heard of it till near the middle of the 2d century, when Justin Martyr speaks of our Lord's birth as having taken place "in a cer-

[a] Moab appears elsewhere in connection with a place in Judah, *Jashubi*-lehem (1 Chr. iv. 22). We might be tempted to believe the name merely another form of *Beth*-lehem, if the context — the mention of Mareshah and Chozeba, places on the extreme west of the tribe — did not forbid it.

[b] In the Greek copies of St. Matthew the name is given as B. τῆς Ἰουδαίας; but in the more ancient Syriac recension lately published by Mr. Cureton it is, as in the O. T., Bethlehem-judah.

[c] Observe that this phrase has lost the meaning which it bears in the O. T., where it specially and invariably signifies the fortress of the Jebusites, the fastness of Zion (2 Sam. v. 7, 9; 1 Chr. xi. 5, 7).

Digitized by Google

main cave very close to the village," which cave he goes on to say had been specially pointed out by Isaiah as "a sign." The passage from Isaiah to which he refers is xxxiii. 13-19, in the LXX. version of which occurs the following — "He shall dwell on high: His place of defence shall be in a lofty cave of the strong rock" (Justin. *Dial. c. Tryph.* §§ 78, 70). Such is the earliest supplement we possess to the meagre indications of the narrative of the Gospels; and while it is not possible to say with certainty that the tradition is true, there is no reason for discrediting it. There is nothing in itself improbable — as there certainly is in many cases where the traditional scenes of events are laid in caverns — in the supposition that the place in which Joseph and Mary took shelter, and where was the "manger" or "stall" (whatever the φάτνη may have been),[a] was a cave in the limestone rock of which the eminence of Bethlehem is composed. Nor is it necessary to assume that Justin's quotation from Isaiah is the ground of an inference of his own; it may equally be an authority happily adduced by him in support of the existing tradition.

But the step from the belief that the nativity may have taken place in a cavern, to the belief that the present subterraneous vault or crypt is that cavern, is a very wide one. Even in the 150 years that had passed when Justin wrote, so much had happened at Bethlehem that it is difficult to believe that the true spot could have been accurately preserved. In that interval — an interval as long as that between the landing of William III. and the battle of Waterloo — not only had the neighborhood of Jerusalem been overrun and devastated by the Romans at the destruction of the city, but the emperor Hadrian, amongst other desecrations, had actually planted a grove of Adonis at the spot (*lucus inumbrabat Adonidis*, Jerome, *Ep. Paul.*). This grove remained at Bethlehem for no less than 180 years, namely, from A. D. 135 till 315. After this the place was purged of its abominations by Constantine, who about A. D. 330 erected the present church (Euseb. *Vit. Const.* iii. 40. See Tobler, 102, *note*). Conceive the alterations in the ground implied in this statement! — a heathen sanctuary established and a grove planted on the spot — that grove and those erections demolished to make room for the Basilica of Constantine!

The modern town of *Beit-lahm* (بيت لحم) lies to the E. of the main road from Jerusalem to Hebron, 6 miles from the former. It covers "the E. and N. E. parts of the ridge of a "long gray hill" of Jura limestone, which stands nearly due E. and W., and is about a mile in length. The hill has a deep valley on the N. and another on the S. The west end shelves down gradually to the valley; but the east end is bolder, and overlooks a plain of some extent. The slopes of the ridge are in many parts covered by terraced gardens, shaded by rows of olives with figs and vines, the terraces sweeping round the contour of the hill with great regularity. On the top of the hill lies the village in a kind of irregular triangle (Stewart), at about 150 yards from the apex of which, and separated from it by a vacant space on the extreme eastern part of the ridge, spreads the noble Basilica of St. Helena, "half church, half fort," now embraced by its three convents, Greek, Latin, and Armenian.

This is not the place for a description of the "holy places" of Bethlehem. All that can be said about them has been well said by Lord Nugent (i. 13-21), and Mr. Stanley (438-442). (See also, though interspersed with much irrelevant matter, Stewart, 246, 334-5.) Of the architecture of the church very little is known; for a resumé of that little see Fergusson's *Handbook of Architecture*, 524: also Salzmann's Photographs and the *Étude* accompanying them (p. 72).[b] One fact, of great interest — probably the most genuine about the place — is associated with a portion of the crypt of this church, namely, that here, "beside what he believed to be the cradle of the Christian faith," St. Jerome lived for more than 30 years, leaving a lasting monument of his sojourn in the Vulgate translation of the Bible.

In the plain below and east of the convent, about a mile from the walls, is the traditional scene of the angels' appearance to the shepherds, a very small, poor village called *Beit-Sâhûr*, to the E. of which are the unimportant remains of a Greek church. These buildings and ruins are surrounded by olive-trees (Seetzen, ii. 41, 42). Here in Arculf's time, "by the tower of Ader," was a church dedicated to the three shepherds, and containing their monuments (Arculf, 6). But this plain is too rich ever to have been allowed to lie in pasturage, and it is more likely to have been then occupied, as it is now and as it doubtless was in the days of Ruth, by cornfields, and the sheep to have been kept on the hills.[c]

The traditional well of David (2 Sam. xxiii. 15), a group of three cisterns, is more than half a mile away from the present town on the other side of the wady on the north. A few yards from the western end of the village are two apertures, which have the appearance of wells; but they are merely openings to a cistern connected with the aqueduct below, and we have Dr. Robinson's assurance that there is now no well of living water in or near the town.

The population of *Beit-lahm* is about 3000 souls, entirely Christians. All travellers remark the good looks of the women (*Eothen*), the substantial, clean appearance of the houses, and the general air of comfort (for an eastern town) which prevails. G.

* In regard to the well at Bethlehem (1) it should be remarked that David (see 2 Sam. xxiii 15) longed not for "living water" but for that from the "reservoir" or "cistern" (as בּוֹר signifies, see Fürst; Sept. λάκκος: Vulg. *cisterna*), at the gate of Bethlehem. The writer in approaching Bethlehem from the south (April 21st, 1852) found a little stream running down the steep bank on that side, and at the top, on entering the town, drank of the refreshing water from a reservoir there, said

[a] It is as well to remember that the "stable" and its accompaniments are the creations of the imagination of poets and painters, with no support from the Gospel narrative.

[b] Mr. Stanley mentions, and recurs characteristically to the interesting fact, that the present roof is constructed from English oak given to the church by Edward IV. (*S. & P.* 141, 439.) Tobler, 104, *note*, adduces the authority of Eutychius that the present church is the work of Justinian, who destroyed that of Constantine as not sufficiently magnificent.

[c] Ἀγραυλοῦντες (Luke ii. 8; A. V. "abiding in the field") has no special reference to "field" more than hill, but means rather "passing the night out of doors;" χώρα also means a "district" or neighborhood, with no special topographical signification.

Digitized by Google

to be supplied by an aqueduct from Solomon's Pools. The same springs must have furnished Bethlehem with water of old (there is no better water in all that region now); and supposing David to have been, as he probably was, in the wilderness of Tekoa at the time, it was the water of which he would naturally think not only as so good in itself, but actually nearer to him than any other. The "traditional well," half a mile or more northeast of Bethlehem, contains water at times (Ritter, *Erdkunde*, xvi. 286; Wilson, *Lands of the Bible*, i. 399): but at that distance it would not so naturally be associated with the gate. As we have seen above, it is no objection that the so-called "well" is a cistern or reservoir. H.

2. (בֵּית לֶחֶם: Βαιθμάν, Alex. Βαιθλεεμ: *Bethlehem*), a town in the portion of Zebulun named nowhere but in Josh. xix. 15. It has been recovered by Dr. Robinson at *Beit Lahm*, about six miles west of Nazareth, and lying between that town and the main road from Akka to Gaza. Robinson characterizes it as "a very miserable village, none more so in all the country, and without a trace of antiquity except the name" (iii. 113). G.

BETH'LEHEMITE, THE (הַבֵּיתִי הַלַּחְמִי: Βηθλεεμίτης [Vat. -μει-], ὁ Βαιθλεεμίτης [Vat. -εμμει-]; Alex. Βηθλεεμιτης [and -μει-]: *Bethlehemites*). A native or inhabitant of Bethlehem. Jesse (1 Sam. xvi. 1, 18, xvii. 58) and Elhanan (2 Sam. xxi. 19) were Bethlehemites. Another Elhanan, son of Dodo of Bethlehem, was one of David's guard (2 Sam. xxiii. 24). [ELHANAN.] W. A. W.

BETHLO'MON (Βαιθλωμών; [Vat. Βαγεθλωμων; Ald. Βεθλωμών: *Sepolemon*]), 1 Esdr. v. 17. [BETHLEHEM, 1.] G.

BETH-MA'ACHAH (בֵּית מַעֲכָה, and with the article, בֵּית הַמַּעֲכָה [*house of oppression*]: Βεθμαχα, Φερμαχά; [Vat. Βαιθμαχα; Alex. Βηθμαχα:] *Bethmaacha*), a place named only in 2 Sam. xx. 14, 15, and there occurring more as a definition of the position of ABEL than for itself. In the absence of more information, we can only conclude that it is identical with MAACHAH, or ARAM-MAACHAH, one of the petty Syrian kingdoms in the north of Palestine. [ARAM.] G.

BETH-MAR'CABOTH (בֵּית הַמַּרְכָּבוֹת, *house of the chariots*, in Chron. without the article: Βαιθμαχερέβ, [Βαιθμαριμώθ, Vat. -ρει-:] Alex. Βαιθμμαρχασβωθ, Βαιθ [Μαρχαβωθ:] *Bethmarchaboth*), one of the towns of Simeon, situated to the extreme south of Judah, with Ziklag and Hormah (Josh. xix. 5; 1 Chr. iv. 31). What "chariots" can have been in use in this rough and thinly inhabited part of the country, at a time so early as that at which these lists of towns purport to have been made out, we know not. At a later period — that of Solomon — "chariot cities" are named, and a regular trade with Egypt in chariots was carried on (1 K. x. 19; 2 Chr. viii. 6; 1 K. x. 29; 2 Chr. i. 17), which would naturally require depots or stopping-places on the road "up" to Palestine (Stanley, 160). In the parallel list, Josh. xv. 30, 31, Madmannah occurs in place of Beth-marcaboth; possibly the latter was substituted for the former after the town had become the resort of chariots. Without supposing the one word to be a mere corruption of the other, the change of a name to one differing less in appearance than in meaning is quite in character with the plays on words frequent in Hebrew literature. [HAZAR-SUSIM; MADMANNAH.] G.

BETH-ME'ON (בֵּית מְעוֹן: οἶκος Μαών *Bethmaon*), Jer. xlviii. 23. A contracted form of the name elsewhere given as BETH-BAAL-MEON. G.

BETH-NIM'RAH (בֵּית נִמְרָה = *house of sweet water*, Gesen.; ἡ Ναμράμ, Βαιθναβρά: Alex. Αμβραν, [Βηθαμνα; Comp. Βηθναμράν Βηθναμρά; Ald. Αμράν, Βηθναμρά:] *Bethnemra*), one of the "fenced cities" on the east of the Jordan taken and "built" by the tribe of Gad (Num. xxxii. 36) and described as lying "in the valley" (בָּעֵמֶק) beside Beth-haran (Josh. xiii. 27). In Num. xxxii. 3 it is named simply NIMRAH. By Eusebius and Jerome (*Onom.* Bethamnaram, and Beth-nemra) the village is said to have been still standing five miles north of Libias (Beth-haran), and under Νέβρα Eusebius mentions that it was a large place, κώμη μεγίστη, in Καταναία (? Batanæa), and called Abara.

The name stills survives in the *Nahr Nimrin*, the Arab appellation of the lower end of the *Wady Shoaib*, where the waters of that valley discharge themselves into the Jordan close to one of the regular fords a few miles above Jericho. It has been seen by Seetzen (*Reisen*, 1854, ii. 318), and Robinson (i. 551), but does not appear to have been explored, and all that is known is that the vegetation is very thick, betokening an abundance of water. The *Wady Shoaib* runs back up into the Eastern mountains, as far as *es-Salt*. Its name (the modern form of Hobab?) connects it with the wanderings of the children of Israel, and a tradition still clings to the neighborhood, that it was down this valley they descended to the Jordan (Seetzen, ii. 377).

It seems to have escaped notice how fully the requirements of Bethabara are met in the circumstances of Beth-nimrah — its abundance of water and its situation close to "the region round about Jordan" (ἡ περίχωρος τοῦ Ἰορδάνου, *i. e.* the CICCAR of the O. T., the Oasis of Jericho), immediately accessible to "Jerusalem and all Judæa" (John i. 28; Matt. iii. 5; Mark i. 5) by the direct and ordinary road from the capital. Add to this, what is certainly a strong confirmation of this suggestion, that in the LXX. the name of Beth-nimrah is found almost exactly assuming the form of Bethabara — Βαιθναβρά, Βηθαβρά, Βεθαραβά (see Holmes and Parsons's LXX.).

The "Waters of Nimrim," which are named in the denunciations of Moab by Isaiah and Jeremiah, may from the context be the brook which still bears the same name at the S. E. part of the Dead Sea. [NIMRIM.] A similar name (signifying, however, in Arabic, "panther") is not uncommon on the east of the Jordan. G.

BETHO'RON (Βαιθωρών; Alex. Βεθωρω: om. in Vulg.). BETH-HORON (Jud. iv. 4).

BETH-PA'LET (בֵּית פֶּלֶט: when not in pause, פֶּלֶט, *house of flight*; Βαιφαλάθ; [Alex Βαιθφαλεθ:] *Bethphelet*), a town among those in the extreme south of Judah, named in Josh. xv 27, and Neh. xi. 26, with Moladah and Beer-sheba In the latter place it is BETH-PHELET (following the Vulgate). Its remains have not yet been discovered. G

BETH-PAZ'ZEZ (בֵּית פַּצֵּץ [*house of dispersion*]: Βηφασής; Alex. Βαιθφασης: *Bethphesez*), a town of Issachar named with En-haddan (Josh. xix. 21), and of which nothing is known. G.

BETH-PE'OR (בֵּית פְּעוֹר [*house of Peor*]: οἶκος φογώρ; in Josh. Βαιθφογώρ, [Alex. Βεθφογωρ:] *fanum Phogor, Phogor, Bethphogor*; in *Onom. Bethfogo*), a place, no doubt dedicated to the god BAAL-PEOR, on the east of Jordan, opposite (ἀπέναντι) Jericho, and six miles above Libias or Beth-haran (Euseb. *Onomasticon*). It was in the possession of the tribe of Reuben (Josh. xiii. 20). In the Pentateuch the name occurs in a formula by which one of the last halting-places of the children of Israel is designated — "the ravine (הַגַּיְא) over against (מוּל) Beth-peor" (Deut. iii. 29, iv. 46). In this ravine Moses was probably buried (xxxiv. 6).

Here, as in other cases, the Beth may be a Hebrew substitution for Baal. G.

BETH'PHAGE [3 syl.] (Βηθφαγή and Βηθφαγῆ: *Bethphage*; quasi בֵּית פַּגָּא, *house of unripe figs*), the name of a place on the mount of Olives, on the road between Jericho and Jerusalem. From the two being twice mentioned together, it was apparently close to BETHANY (Matt. xxi. 1; Mark xi. 1; Luke xix. 29), and from its being named first of the two in the narrative of a journey from east to west, it may be presumed that it lay, if anything, to the eastward of Bethany. The fact of our Lord's making Bethany his nightly lodging place (Matt. xxi. 17, &c.) is no confirmation of this (as Winer would have it); since He would doubtless take up his abode in a place where He had friends, even though it were not the first place at which He arrived on the road. No remains which could answer to this position have however been found (Rob. i. 433), and the traditional site is above Bethany, half-way between that village and the top of the mount.

By Eusebius and Jerome, and also by Origen, the place was known, though no indication of its position is given; by the former it is called κώμη, by Jerome *villula*. They describe it as a village of the priests, possibly from "Beth phace," signifying in Syriac the "house of the jaw," and the jaw in the sacrifices being the portion of the priests (Reland, 653). Lightfoot's theory, grounded on the statements of the Talmudists, is extraordinary: that Bethphage was the name of a district reaching from the foot of Olivet to the wall of Jerusalem. (But see Reland, 652; Hug. *Einl.* i. 18, 19.) Schwarz (263–4), and Barclay, in his map, appear to agree in placing Bethphage on the southern shoulder of the "Mount of Offense," above the village of Siloam, and therefore west of Bethany.

The name of Bethphage, the signification of which as given above is generally accepted, is, like those of Bethany [?], Caphenatha, Bezetha, and the Mount of Olives itself, a testimony to the ancient fruitfulness of this district (Stanley, 187). G.

BETH-PHE'LET, Neh. xi. 26. [BETH-ALET.]

BETH-RA'PHA (בֵּית רָפָא, *house of Rapha*, or *of the giant*: ὁ Βαθραλα; Alex. Βαθσεφα: *Bethrapha*), a name which occurs in the genealogy of Judah as the son of Eshton (1 Chr. iv. 12 only). There is a Rapha in the line of Benjamin and elsewhere, but no apparent connection exists between those and this, nor has the name been identified as belonging to any place. G.

BETH-RE'HOB (בֵּית רְחוֹב, *house of Rechob*, or *of room*: ὁ οἶκος Ραάβ, Alex. Τωβ, [in 2 Sam.] Ῥοώβ: *Rohob*), a place mentioned as having near it the valley in which lay the town of Laish or Dan (Judg. xviii. 28). It was one of the little kingdoms of Aram or Syria, like Zobah, Maacah, and Ish-tob (comp. the reading of the Alex. LXX. above), in company with which it was hired by the Ammonites to fight against David (2 Sam. x. 6). In ver. 8 the name occurs in the shorter form of Rehob, in which form it is doubtless again mentioned in Num. xiii. 21. Being, however, "far from Zidon" (Judg. xviii. 28), this place must not be confounded with two towns of the name of Rehob in the territory of Asher. [REHOB.] The conjecture of Robinson (iii. 371) is that this ancient place is represented by the modern *Hûnin*, a fortress commanding the plain of the *Hûleh*, in which the city of Dan (*Tell el-Kâdy*) lay.

Hadadezer the king of Zobah is said to have been the son of Rehob (2 Sam. viii. 3, 12). G.

BETHSA'IDA (Βηθσαϊδά: בֵּית צַיִד, *house of fish*: *Bethsaida*), the name of two places in Northern Palestine:—

1. "Bethsaida of Galilee" (John xii. 21), a city (πόλις), which was the native place of Andrew, Peter, and Philip (John i. 44, xii. 21) in the land of Gennesareth (τὴν γῆν Γ.) (Mark vi. 45; comp. 53), and therefore on the west side of the lake. It was evidently in near neighborhood to Capernaum and Chorazin (Matt. xi. 21; Luke x. 13; and comp. Mark vi. 45, with John vi. 16), and, if the interpretation of the name is to be trusted, close to the water's edge. By Jerome (*Comm. in Esai.* ix. 1) and Eusebius (*Onom.*) these towns and Tiberias are all mentioned together as lying on the shore of the lake. Epiphanius (*adv. Hær.* ii.) says of Bethsaida and Capernaum οὐ μακρὰν ὄντων τῷ διαστήματι. Wilibald (A. D. 722) went from Magdalum to Capernaum, thence to Bethsaida, and then to Chorazin. These ancient notices, however, though they fix its general situation, none of them contain any indication of its exact position, and as, like the other two towns just mentioned, its name and all memory of its site have perished, no positive identification can be made of it. Dr. Robinson places Bethsaida at *'Ain et-Tâbighah*, a short distance north of *Khân Minyeh*, which he identifies with Capernaum (iii. 359).

2. By comparing the narratives (of the same event) contained in Mark vi. 31–53 and Luke ix. 10–17, in the latter of which Bethsaida is named as the spot at which the miracle took place, while in the former the disciples are said to have crossed the water from the scene of the event "to Bethsaida in the land of Gennesareth" — it appears certain that the Bethsaida at which the 5000 were fed must have been a second place of the same name on the east of the lake. Such a place there was at the northeastern extremity — formerly a village (κώμη), but rebuilt and adorned by Philip the Tetrarch, and raised to the dignity of a town under the name of Julias, after the daughter of the emperor (Jos. *Ant.* xviii. 2, § 1; *B. J.* ii. 9, § 1, iii. 10, § 7). Here, in a magnificent tomb, Philip was buried (Jos. *Ant.* xviii. 4, § 6).

Digitized by Google

Of this Bethsaida we have certainly one and probably two mentions in the Gospels: 1. That named above, of the feeding of the 5000 (Luke ix. 10). The miracle took place in a τόπος ἔρημος — a vacant, lonely spot, somewhere up in the rising ground at the back of the town, covered with a profusion of green grass (John vi. 3, 10; Mark vi. 39; Matt. xiv. 19), and in the evening the disciples went down to the water and went home across the lake (εἰς τὸ πέραν) to Bethsaida (Mark vi. 45), or as St. John (vi. 17) and St. Matthew (xiv. 34) more generally express it, towards Capernaum, and to the land of Gennesareth. The coincidence of the two Bethsaidas occurring in the one narrative, and that on the occasion of the only absolutely certain mention of the eastern one, is extraordinary. In the very ancient Syriac recension (the Nitrian) just published by Mr. Cureton, the words in Luke ix. 10, "belonging to the city, called Bethsaida," are omitted.

2. The other, highly probable, mention of this place is in Mark viii. 22.[a] If Dalmanutha (viii. 10) was on the west side of the lake, then was Bethsaida on the east; because in the interval Christ had departed by ship to the other side (13). And with this well accords the mention immediately after of the villages of Cæsarea Philippi (27), and of the "high mountain" of the transfiguration (ix. 2), which, as Mr. Stanley has ingeniously suggested,[b] was, not the traditional spot, but a part of the Hermon range somewhere above the source of the Jordan (*S. & P.* 399).

Of the western Bethsaida no mention is made in Josephus, and until the discovery by Reland of the fact that there were two places of the name, one on the west, and one on the east side, the elucidation of the various occurrences of the two was one of the hardest knots of sacred geography (see Cellarius, *Notit.* ii. 536). G.

BETHSA'MOS (Βαιθασμών; [Vat. Βαιτασμων;] Alex. Βαιθασμωθ; [Ald. Βεθσαμώς:] *Cebethamus*), 1 Esdr. v. 18. [BETH-AZMAVETH.]

BETH'SAN [Βαιθσάν; Alex. in 1 Macc. xii. Βεθσα: *Bethsan*], 1 Macc. v. 52, xii. 40, 41. [BETH-SHEAN.]

BETH-SHAN' [Βαιθσάμ, -σάν; Vat. Βαιθεμ, Βαιθσαμ, Βαιθ; Alex. Βηθσαν: *Bethsam*], 1 Sam. xxxi. 10, 12; 2 Sam. xxi. 12. [BETH-SHEAN.]

BETH-SHE'AN (בֵּית שְׁאָן [*house of quiet*]), or, in Samuel, BETH-SHAN, (בֵּית שָׁן: Βαιθσάν, Βηθσάν, ὁ οἶκος Σάν, [etc.:] *Bethsan*), a city which, with its "daughter" towns, belonged to Manasseh (1 Chr. vii. 29), though within the limits of Issachar (Josh. xvii. 11), and therefore on the west of Jordan (comp. 1 Macc. v. 52) — but not mentioned in the lists of the latter tribe. The Canaanites were not driven out from the town (Judg. i. 27). In Solomon's time it seems to have given its name to a district extending from the town itself to Abel-meholah; and "all Beth-shean" was under the charge of one of his commissariat officers (1 K. iv. 12).

The corpses of Saul and his sons were fastened up to the wall of Beth shean by the Philistines (1 Sam. xxxi. 10, 12) in the open "street" or space (רְחוֹב), which — then as now — fronted the gate of an eastern town (2 Sam. xxi. 12). From this time we lose sight of Beth-shean[c] till the period of the Maccabees, in connection with whose exploits it is mentioned more than once in a cursory manner (1 Macc. v. 52; comp. 1 Macc. xii. 40, 41). The name of Scythopolis (Σκύθων πόλις) appears for the first time in 2 Macc. xii. 29. [SCYTHOPOLIS.] This name, which it received after the exile, and under the Greek dominion, has not survived to the present day; as in many other cases (comp. PTOLEMAIS) the old Semitic appellation has revived, and the place is still called *Beisân*. It lies in the Ghôr or Jordan valley, about twelve miles south of the sea of Galilee, and four miles west of the Jordan. The site of the town is on the brow of the descent by which the great plain of Esdraelon drops down to the level of the Ghôr. A few miles to the south-west are the mountains of Gilboa, and close beside the town runs the water of the *'Ain-Jalûd*, the fountain of which is by Jezreel, and is in all probability the spring by which the Israelites encamped before the battle in which Saul was killed (1 Sam. xxix. 1).[d] Three other large brooks pass through or by the town, and in the fact of the abundance of water, and the exuberant fertility[e] of the soil consequent thereon, as well as in the power of using their chariots, which the level nature of the country near the town conferred on them (Josh. xvii. 16), resides the secret of the hold which the Canaanites retained on the place.

If Jabesh-Gilead was where Dr. Robinson conjectures — at *ed-Deir* in the *Wady Yâbis* — the distance from thence to Beisan, which it took the men of Jabesh "all night" to traverse, cannot be less than twenty miles. G.

* For fuller information respecting this important site (*Beisân*) — its various ruins (Hebrew, Grecian, Roman, Christian, Saracenic), its abundant waters which gush from perennial fountains, its fertility and luxuriant vegetation, its Tell or acropolis (200 feet high and nearly perpendicular), which affords

[a] The use of the word κώμη in this place is remarkable. Mr. Stanley suggests that its old appellation had stuck to it, even after the change in its dignity (*S. & P.* App. § 85).

[b] * This suggestion is by no means a recent one. It may be found in Reland (*Palæstina*, p. 834) and Lightfoot (*Hor. Hebr.* p. 447, Rotterdam, 1686). See TABOR.

As to Bethsaida, Thomson (*Land and Book*, ii. 9, 29–32) has still another theory. Instead of two places with this name, he holds that there was only one, but this consisted of two parts, one of which was on the west and the other on the east bank of the Jordan. He speaks of the remains of buildings near the mouth of the river, so situated as to indicate a double town of this character. The references to Bethsaida in the Gospels might be harmonized by this supposition, as well as by that of two more distinct places. Julias might in that case also distinguish the part enlarged by Philip, since being in his tetrarchy it would need a different name from Bethsaida on the Galilean side. See also, for this view, Hug, *Einl.* i. § 4; J. F. Thrupp in the *Journ. of Class. and Sacr. Philol.*, ii. 302 ff., and Tregelles, *ibid.* iii. 145 ff. H.

[c] Unless the conjecture of Schwarz (148, *note*) be accepted, that the words (בֵּית חַשְּׁמֶן, *house of the tooth*; A. V. *ivory house*) in 1 K. xxii. 39, should be rendered Beth-shan.

[d] The exactness of the definition in this description is seriously impaired in the A. V. by the substitution of "a fountain" for "*the* fountain" of the original.

[e] So great was this fertility, that it was said by the Rabbis, that if Paradise was in the land of Israel, Beth-shean was the gate of it; for that its fruits were the sweetest in all the land. (See the quotations in Lightfoot, *Chor. Cent.* lx.)

Digitized by Google

the finest panorama, next to Gerizim, in all central Palestine" — the reader may see Robinson's *Later Bibl. Res.* iii. 326 ff. (who visited the place in his second journey); Thomson's *Land and Book*, i. 173–175; Tristram's *Land of Israel*, pp. 500–504; Porter's *Handb. for Syr. and Palest.* ii. 354 f.; Van de Velde's *Journey through Syr. and Palest.* ii. 360 ff.; and Sepp's *Jerusalem u. das heilige Land*, ii. 62 (though this last writer appears to have only seen the region from *Zer'in* (Jezreel)). But from *Zer'in*, which is on the brow of a steep declivity, one can easily look down into the *Ghôr* upon Beth-shean, so exactly described in 1 K. iv. 12 as "beneath Jezreel." (See also *Bibl. Res.* iii. 166, 1st ed., and Wilson's *Lands of the Bible*, ii. 87.)

H.

BETH-SHE'MESH (בֵּית שֶׁמֶשׁ, in pause בֵּית שָׁמֶשׁ, *house of the sun*: πόλις ἡλίου, Βαιθσαμύς, [etc.:] *Bethsames*), the name of several places. 1. One of the towns which marked the north boundary of Judah (Josh. xv. 10), but not named in the lists of the cities of that tribe. It was in the neighborhood of Kirjath-jearim and Timnah, and therefore in close proximity to the low-country of Philistia. The expression "went down" in Josh. xv. 10; 1 Sam. vi. 21, seems to indicate that the position of the town was lower than Kirjath-jearim; and it is in accordance with the situation that there was a valley (עֵמֶק) of cornfields attached to the place (1 Sam. vi. 13).

From Ekron to Beth-shemesh a road (הֶרֶךְ, ὁδός) existed, along which the Philistines sent back the ark after its calamitous residence in their country (1 Sam. vi. 9, 12); and it was in the field of "Joshua the Beth-shemite" (בֵּית־הַשִּׁמְשִׁי) that the "great Abel" (whatever that may have been) was, on which the ark was set down (1 Sam. vi. 18). Beth-shemesh was a "suburb city," allotted to the priests (Josh. xxi. 16; 1 Chr. vi. 59); and it is named in one of Solomon's commissariat districts under the charge of Ben-Dekar (1 K. iv. 9). It was the scene of an encounter between Jehoash, king of Israel, and Amaziah, king of Judah, in which the latter was worsted and made prisoner (2 K. xiv. 11, 13; 2 Chr. xxv. 21, 23). Later, in the days of Ahaz, it was taken and occupied by the Philistines, together with several other places in this locality (2 Chr. xxviii. 18).

By comparison of the lists in Josh. xv. 10, xix. 41, 43, and 1 K. iv. 9, it will be seen that IR-SHEMESH, "city of the sun," must have been identical with Beth-shemesh, Ir being probably the older form of the name; and again, from Judg. i. 35, it appears as if Har-heres, "mount of the sun," were a third name for the same place; suggesting an early and extensive worship of the sun in this neighborhood. [Ir-Shemesh; Heres.]

Beth-shemesh is now *'Ain-Shems*. It was visited by Dr. Robinson, who found it to be in a position exactly according with the indications of Scripture, on the northwest slopes of the mountains of Judah — "a low plateau at the junction of two fine plains" (Rob. iii. 153) — about two miles from the great Philistine plain, and seven from Ekron (ii. 324–6). The origin of the *'Ain* ("spring") in the modern name is not obvious, as no spring or well appears now to exist at the spot; but the *Shems* and the position are decisive.

2. [Βαιθσαμις; Alex. Βαιθσμας.] A city on the border of Issachar (Josh. xix. 22).

3. [Θεσσαμύς, Βαιθσαμύς; Alex. Θασμους, Βεθσαμυς.] One of the "fenced cities" of Naphtali, twice named (Josh. xix. 38; Judg. i. 33), and on both occasions with BETH-ANATH. The Canaanite inhabitants were not expelled from either place, but became tributaries to Israel. Jerome's expression (*Onom.* Bethsamis) in reference to this is perhaps worthy of notice, "in quâ *cultores* pristini manserunt;" possibly glancing at the worship from which the place derived its name.

4. By this name is once mentioned (Jer. xliii. 13) an idolatrous temple or place in Egypt, which the LXX. render by Ἡλιουπόλις ἐν Ὤν, *i. e.* the famous Heliopolis; Vulg. *domus solis*. In the middle ages Heliopolis was still called by the Arabs *'Ain Shems* (Edrisi, &c., in Rob. i. 25). [AVEN; ON.]

G.

BETH'-SHEMITE, THE (בֵּית־הַשִּׁמְשִׁי: ὁ Βαιθσαμυσίτης [Vat. -σει-]; Alex. ὁ Βεθθαμυσιτης: *Bethsamita, Bethsamitis*). Properly "the Beth-shimshite," an inhabitant of Beth-shemesh (1 Sam. vi. 14, 18). The LXX. in the former passage refer the words to the field and not to Joshua (τὸν ἐν Βαιθσαμύς). W. A. W.

BETH-SHIT'TAH (בֵּית הַשִּׁטָּה, *house of the acacia*: Βηθσελθ; Alex. η Βασεττα, [Comp. Βαιθασεττά:] *Bethsetta*), one of the spots to which the flight of the host of the Midianites extended after their discomfiture by Gideon (Judg. vii. 22). Both the narrative and the name (comp. "Abel-shittim," which was in the Jordan valley opposite Jericho) require its situation to be somewhere near the river, where also Zererath (probably Zeredatha or Zartan) and Abel-meholah doubtless lay: but no identification has yet been made of any of these spots. The *Shittah* mentioned by Robinson (ii. 356) and Wilson (Ritter, *Jordan*, p. 414) is too far to the west to suit the above requirements. Josephus's version of the locality is absolutely in favor of the place being well watered: ἐν κοίλῳ χαράδραις περιειλημμένῳ χωρίῳ (*Ant.* v. 6, § 5).

G.

BETHSU'RA (ἡ Βαιθσούρα, τὰ Βαιθσούρα; [Alex. generally Βεθσουρα: *Bethsura*, exc. 1 Macc. iv. 29, *Bethoron*]), 1 Macc. iv. 29, 61, vi. 7, 26, 31, 49, 50, ix. 52, x. 14, xi. 65, xiv. 7; 2 Macc. xi. 5, xiii. 19, 22. [BETH-ZUR.]

BETH-TAPPU'AH (בֵּית תַּפּוּחַ, *house of the apple* or *citron*: Βαιθαχού, Alex. Βεθθαφουε: *Beththaphua*), one of the towns of Judah, in the mountainous district, and near Hebron (Josh. xv. 53; comp. 1 Chr. ii. 43). Here it has actually been discovered by Robinson under the modern name of *Teffûh*, 1¼ hour, or say 5 miles, W. of Hebron, on a ridge of high table-land. The terraces of the ancient cultivation still remain in use, and though the "apples" have disappeared, yet olive-groves and vineyards with fields of grain surround the place on every side (Rob. ii. 71; Schwarz, 105).

The name of Tappuah was borne by another town of Judah which lay in the rich lowland of the *Shefeiah*. [APPLE; TAPPUAH.]

G.

BETHU'EL (בְּתוּאֵל [*man of God*]: Βαθουήλ; Joseph. Βαθούηλος: *Bathuel*), the son of Nahor by Milcah; nephew of Abraham, and father

Digitized by Google

of Rebekah (Gen. xxii. 22, 23; xxiv. 15, 24, 47; xxviii. 2). In xxv. 20, and xxviii. 5, he is called "Bethuel the Syrian" (*i. e.* Aramite, הָאֲרַמִּי). Though often referred to as above in the narrative, Bethuel only appears in person once (xxiv. 50). Upon this an ingenious conjecture is raised by Prof. Blunt (*Coincidences*, I. § iv.) that he was the subject of some imbecility or other incapacity. The Jewish tradition, as given in the Targum Ps. Jonathan on Gen. xxiv. 55 (comp. 33), is that he died on the morning after the arrival of Abram's servant, owing to his having eaten a sauce containing poison at the meal the evening before, and that on that account Laban requested that his sister's departure might be delayed for a year or ten months. Josephus was perhaps aware of this tradition, since he speaks of Bethuel as dead (*Ant.* i. 16, § 2). G.

BETHU'EL (בְּתוּאֵל [*man of God*]: Βαθουήλ; [Vat. Βαθουν;] Alex. Βαθουλ: *Bathuel*), 1 Chr. iv. 30. [BETHUL.]

BETH'UL (בְּתוּל as *above*; Arab. *Bethûr*, بَثُور: Βουλάδ; [Alex. Βαθουλ:] *Bethul*), a town of Simeon in the South, named with Eltolad and Hormah (Josh. xix. 4). In the parallel lists in Josh. xv. 30 and 1 Chr. iv. 30 the name appears under the forms of CHESIL (כְּסִיל) and BETHUEL; and probably also under that of Bethel in Josh. xii. 16; since, for the reasons urged under BETHEL, and also on account of the position of the name in this list, the northern Bethel can hardly be intended. [BETHEL.] G.

BETHU'LIA (Βετυλούα; [Vat. Jud. iv. 6 Βαιτουλουα; Alex. commonly Βαιτυλουα, and so Vat. according to Holmes; Sin. Βαιτουλουα exc. iv. 6, -λια:] *Bethulia*), the city which was the scene of the chief events of the book of Judith, in which book only does the name occur. Its position is there described with very minute detail. It was near to Dothaim (iv. 6), on a hill (ὄρος) which overlooked (ἀπέναντι) the plain of Esdraelon (vi. 11, 13, 14, vii. 7, 10, xiii. 10) and commanded the passes from that plain to the hill country of Manasseh (iv. 7, vii. 1), in a position so strong that Holofernes abandoned the idea of taking it by attack, and determined to reduce it by possessing himself of the two springs or wells (πηγαί) which were "under the city" in the valley at the foot of the eminence on which it was built, and from which the inhabitants derived their chief supply of water (vi. 11, vii. 7, 13, 21). Notwithstanding this detail, however, the identification of the site of Bethulia has hitherto defied all attempts, and is one of the greatest puzzles of sacred geography; so much so as to form an important argument against the historical truth of the book of Judith (Rob. iii. 337–8).

In the middle ages the name of Bethulia was given to "the Frank Mountain," between Bethlehem and Jerusalem (Rob. i. 479), but it is unnecessary to say that this is very much too far to the south to suit the narrative. More lately it has been assumed to be *Safed* in North Galilee (Rob. ii. 125); which again, if in other respects it would agree with the story, is too far north. Von Raumer (*Pal.* p. 135–6) suggests *Sanûr*, which is perhaps the nearest to probability. The ruins of that town are on an "isolated rocky hill," with a plain of considerable extent to the east, and, as far as situation is concerned, naturally all but impregnable (Rob. ii. 312). It is about three miles from *Dothan* and some six or seven from *Jenîn* (Enganim) which stand on the very edge of the great plain of Esdraelon. Though not absolutely commanding the pass which leads from *Jenîn* to *Sebastieh* and forms the only practicable ascent to the high country, it is yet sufficiently near to bear out the somewhat vague statement of Jud. iv. 6. Nor is it unimportant to remember that *Sanûr* actually endured a siege of two months from Djezzar Pasha without yielding, and that on a subsequent occasion it was only taken after a three or four months' investment, by a force very much out of proportion to the size of the place (Rob. ii. 313). G.

BETH-ZACHARI'AS. [BATH-ZACHARIAS.]

BETH-ZUR' (בֵּית צוּר, *house of rock*: Βηθσούρ, [Βαιθσούρ, Βαιθσουρά, etc.: *Bessur*, *Bethsur*, and in Macc.] *Bethsura*), a town in the mountains of Judah, named between Halhul and Gedor (Josh. xv. 58). As far as any interpretation can, in their present imperfect state, be put on the genealogical lists of 1 Chr. ii. 42–49, Beth-zur would appear from ver. 45 to have been founded by the people of Maon, which again had derived its origin from Hebron. However this may be, Beth-zur was "built,"— *i. e.* probably, fortified — by Rehoboam, with other towns of Judah, for the defense of his new kingdom (2 Chr. xi. 7). After the Captivity the people of Beth-zur assisted Nehemiah in the rebuilding of the wall of Jerusalem (Neh. iii. 16); the place had a "ruler" (שַׂר), and the peculiar word Pelec (פֶּלֶךְ) is employed to denote a district or circle attached to it, and to some other of the cities mentioned here. [TOPOGRAPHICAL TERMS.]

In the wars of the Maccabees, Beth-zur or Bethsura played an important part. It was fortified by Judas and his brethren "that the people might have a defense against Idumæa," and they succeeded in making it "very strong and not to be taken without great difficulty" (Jos. *Ant.* xii. § 4); so much so, that it was able to resist for a length of time the attacks of Simon Maccabæus (1 Macc. xi. 65) and of Lysias (2 Macc. xi. 5), the garrison having in the former case capitulated. Before Beth-zur took place one of the earliest victories of Judas over Lysias (1 Macc. iv. 29), and it was in an attempt to relieve it when besieged by Antiochus Eupator, that he was defeated in the passes between Beth-zur and Bath-zacharias, and his brother Eleazar killed by one of the elephants of the king's army (1 Macc. vi. 32–47; Jos. *Ant.* xii. 9, 3). The recovery of the site of Beth-zur, under the almost identical name of *Beit-sûr*, by Wolcott and Robinson (i. 216, note; iii. 277), explains its impregnability, and also the reason for the choice of its position, since it commands the road from Beer-sheba and Hebron, which has always been the main approach to Jerusalem from the south.

A short distance from the Tell, on which are strewn the remains of the town, is a spring, *'Ain edh-Dhirweh*, which in the days of Jerome, and later, was regarded as the scene of the baptism of the Eunuch by Philip. The probability of this is elsewhere examined [GAZA]; in the mean time it may be noticed that *Beit-sûr* is not near the road to Gaza (Acts viii. 26), which runs much more to the northwest. [BETHSURA.] G.

Digitized by Google

* It shows how wonderfully the oldest names of the Bible have been preserved and transmitted to us that we find Halhul, Beth-zur and Gedor grouped together in Josh. xv. 58, and the same places represented on the modern map as *Halhûl, Beit-sûr*, and *Jedûr* in the immediate vicinity of each other. (See Rob. *Bibl. Res.* iii. 277, and Wilson's *Lands of the Bible*, i. 386). Eusebius makes Beth-zur correctly 160 *stadia* or 20 Roman miles from Jerusalem; but in 2 Macc. xi. 5 it is said to be 5 *stadia*. Reland (*Palæstina*, p. 65) calls the latter a mistake, which it certainly is. Some of the codices show attempts at correction. Grimm suggests (*Exeget. Handb. zu den Apokr.* iv. 166) that the Maccabæan writer confounded Beth-zur in the mountains of Judah with another place of the same or a similar name near Jerusalem, probably the present Mohammedan village *Bêt Sâhûr*, half an hour from the city, which Tobler visited (*Denkblätter aus Jerusalem*, p. 616). The recovery of Beth-zur is due to Dr. Wolcott (*Bibl. Sacra*, 1843, p. 56), formerly a missionary in Palestine.

It is impossible to say whether Philip baptized the eunuch here, because we are left in doubt as to the road by which the eunuch travelled from Jerusalem to Gaza. That carriages could pass there, and that it was one of the ways of making the journey between these places, cannot well be questioned. See *Strassen in Palästina* in Herzog's *Real-Encykl.* xv. 161. Travellers have noticed the traces of a paved road near Beth-zur (Rob. *Later Res.* iii. 277) and the "vestiges of an ancient carriage road all along, from Jerusalem to Hebron" (Wilson, *Lands of the Bible*, i. 381). Stanley (*Notices of Localities*, p. 169) speaks of a Roman milestone there, as well as of the paved way. The veneration of early times, in the belief of this tradition (Jerome, *Onomast.* s. v.), reared a chapel on the spot, the ruins of which are still to be seen. Raumer has discussed this question at some length (*Anhang*, iv.) in his *Palästina*, p. 449, and decides for Beth-zur as the probable scene of the baptism. Robinson proposes *Wady-el-Hasy*, in the plain near *Tell-el-Hasy*, since he thinks the parties must have been near Gaza at the time (*Bibl. Res.* ii. 641). There is an interesting itinerary of a journey which Dr. Barclay (*City of the Great King*, pp. 571–578, 1st ed.) made from Jerusalem to Gaza by way of Hebron, with special reference to this investigation. He heard of a place (*Moyat es-Sid*) in the same *Wady Hasy*, which he would regard as the τὶ ὕδωρ of which he was in quest. See further under GAZA.

H.

BETO'LIUS (Βετολιω; [Alex. Βητολιω; Ald. Βητωλιω]), 1 Esdr. v. 21. [BETHEL.]

BETOMES'THAM (Βετομεσθαμ [Vat. Βαιτομασθαμ, Sin. om.]) and **BETOMAS'THEM** (Βαιτομασθαίμ; [Sin. Βαιτομασθεν:] Syr. *Bithmasthim*; [Vulg. omits]), a town "over against Esdraelon, facing the plain that is near Dothaim" (Jud. iv. 6, xv. 4), and which from the manner of its mention would seem to have been of equal importance with Bethulia itself. No attempt to identify either Betomestham or Bethulia has been hitherto successful. [BETHULIA; DOTHAIM.]

G.

BET'ONIM (בְּטֹנִים = *pistachio nuts: Botanim*; [Vat. Βοτανει; Alex. Βοτανιν:] *Betonim*), town in the inheritance of the children of Gad, apparently on their northern boundary (Josh. xiii. 26). The word, somewhat differently pointed, occurs in Gen. xliii. 11, A. V. "nuts." It is probably related to the modern Arabic word *Butm* = terebinth, *Pistacia terebinthus*.

G.

BETROTHING. [MARRIAGE.]

BEU'LAH (בְּעוּלָה = *married: οἰκουμένη inhabitata*), the name which the land of Israel is to bear, when "the land shall be married (תִּבָּעֵל)," Is. lxii. 4.

BE'ZAI (בֵּצַי [*victory*, or *conqueror*]: Βασσοῦ, Βεσσέ, Βησί, [etc.:] *Besai*), "Children of Bezai," to the number of 323, returned from captivity with Zerubbabel (Ezr. ii. 17; Neh. vii. 23). The name occurs again among those who sealed the covenant (Neh. x. 18). [BASSA.]

BEZAL'EEL (בְּצַלְאֵל [*in the shadow*, i. e. *protection, of God*]: Βεσελεήλ: *Beseleel*). 1. The artificer to whom was confided by Jehovah the design and execution of the works of art required for the tabernacle in the wilderness (Ex. xxxi. 1–6). His charge was chiefly in all works of metal, wood and stone, Aholiab being associated with him for the textile fabrics; but it is plain from the terms in which the two are mentioned (xxxvi. 1, 2, xxxviii. 22), as well as from the enumeration of the works in Bezaleel's name in xxxvii. and xxxviii., that he was the chief of the two, and master of Aholiab's department as well as his own. Bezaleel was of the tribe of Judah, the son of Uri the son of Hur (or Chur). Hur was the offspring of the marriage of Caleb (one of the chiefs of the great family of Pharez) with Ephrath (1 Chr. ii. 19, 50), and one of his sons, or descendants (comp. Ruth iv. 20) was Salma, or Salmon, who is handed down under the title of "father of Bethlehem;" and who, as the actual father of Boaz, was the direct progenitor of king David (1 Chr. ii. 51, 54; Ruth. iv. 21). [BETHLEHEM; HUR.]

2. [Vat. Alex. Βεσεληλ.] One of the sons of Pahath-moab who had taken a foreign wife, Ezr. x. 30.

BEZEK (בֶּזֶק [prob. *lightning, brightness*]: Βεζέκ: *Bezec*), the name of two apparently distinct places in Palestine.

1. The residence of ADONI-BEZEK, *i. e.* the "lord of Bezek" (Judg. i. 5); in the "lot (גּוֹרָל) of Judah" (verse 3), and inhabited by Canaanites and Perizzites (verse 4). This must have been a distinct place from —

2. [Vat. Αβιεζεκ for ἐν Βεζέκ.] Where Saul numbered the forces of Israel and Judah before going to the relief of Jabesh-Gilead (1 Sam. xi. 8). From the terms of the narrative this cannot have been more than a day's march from Jabesh; and was therefore doubtless somewhere in the centre of the country, near the Jordan valley. In accordance with this is the mention in the *Onomasticon* of two places of this name seventeen miles from Neapolis (Shechem), on the road to Beth-shean. The LXX. inserts ἐν Βαμά after the name, possibly alluding to some "high place" at which this solemn muster took place. This Josephus gives as Βαλά (*Ant.* vi. 5, § 3).

No identification of either place has been made in modern times.

G.

* With reference to the first of these places, Cassel (*Richter u. Ruth*, pp. 5–7) argues that Bezek was not a city but a tract of country or district. Among his reasons are, that a battle resulting in

Digitized by Google

the slaughter of 10,000 (Judg. i. 5) indicates a wider field than a single town; that two battles were fought in Bezek (vers. 4, 5), the second evidently after a change of position; that a city in Judah so important as this could hardly fail to be mentioned on other occasions; and that the name (finding an analogy between בזה and ברק) points to a desolate region with a chalky soil or limestone cliffs, reflecting strongly the glare of the sun-light. This desert of Bezek (with which as to the origin of the name he compares the well-known *Barka* in North Africa) he thinks lay between the west side of the Dead Sea and the region of Tekoa, which answers so well to the above description (Ritter's *Erdkunde*, xvi. 653), and, further, lay on the line of march of Judah and Simeon if they broke up their camp in this expedition from Gilgal. Some of the reasons have weight, but the more probable exegesis recognizes but one battle, and the proposed etymology, or certainly this application of it, is at least precarious. That Bezek, at all events, was not far from Jerusalem, appears from the fact that the conquerors went thither immediately after their victory in that place. H.

BE'ZER [*ore*] IN THE WILDERNESS (בֶּצֶר בַּמִּדְבָּר: Βοσόρ ἐν τῇ ἐρήμῳ: *Bosor in solitudine*), a city of the Reubenites, with "suburbs," in the *Mishor* or downs, set apart by Moses as one of the three cities of refuge on the east of the Jordan, and allotted to the Merarites (Deut. iv. 43; Josh. xx. 8, xxi. 36; 1 Chr. vi. 78). In the two last passages the exact specification, בַּמִּישׁוֹר, of the other two is omitted, but traces of its former presence in the text in Josh. xxi. 36 are furnished us by the reading of the LXX. and Vulg. — τὴν Βοσὸρ ἐν τῇ ἐρήμῳ, τὴν Μισὼ ([Vat. Μεισω,] Alex. Μισὼρ) καὶ τὰ περισπόρια: *Bosor in solitudine*, Misor *et Jaser*.

Bezer may be the Bosor of the books of Maccabees. [BOSOR.] G.

BE'ZER (בֶּצֶר [*ore, metal*]: Βασάρ; [Vat. corrupt;] Alex. Βασαρ: *Bosor*), son of Zophah, one of the heads of the house of Asher (1 Chr. vii. 37).

BE'ZETH (Βηζέθ; [Sin. Βηθζαιθ:] *Bethzecha*), a place at which Bacchides encamped after leaving Jerusalem, and where there was a "great pit" (τὸ φρέαρ τὸ μέγα; 1 Macc. vii. 19). By Josephus (*Ant.* xii. 10, § 2) the name is given as "the village Bethzetho" (κώμη Βηθζηθὼ λεγομένη), which recalls the name applied to the Mount of Olives in the early Syriac recension of the N. T. published by Mr. Cureton — Beth-Zaith [corresponding precisely with the reading of the Sinaitic MS. in 1 Macc. vii. 19]. The name may thus refer either to the main body of the Mount of Olives, or to that branch of it to the north of Jerusalem, which at a later period was called Bezetha. G.

BI'ATAS (Φαλίας; Alex. Φιαβας; [Ald. Βιάτας: *Philias*), 1 Esdr. ix. 48. [PELAIAH.]

BIBLE (Βιβλία, LXX.: *Biblia*, Vulg.). — I. The application of this word, κατ' ἐξοχήν, to the collected books of the Old and New Testament is not to be traced further back than the 5th century. The terms which the writers of the New Testament use of the Scriptures of the Old are ἡ γραφή (2 Tim. iii. 16; Acts viii. 32; Gal. iii. 22), αἱ γραφαὶ (Matt. xxi. 42; Luke xxiv. 27), τὰ ἱερὰ γράμματα (2 Tim. iii. 15). Βιβλίον is found (2 Tim. iv. 13, Rev. x. 2, v. 1), but with no distinctive meaning: nor does the use of τὰ λοιπὰ τῶν βιβλίων for the Hagiographa in the preface to Ecclesiasticus, or of αἱ ἱεραὶ βίβλοι in Josephus (*Ant.* i. 6, § 2), indicate anything as to the use of τὰ βιβλία alone as synonymous with ἡ γραφή. The words employed by early Christian writers were naturally derived from the language of the New Testament, and the old terms, with epithets like θεῖα, ἅγια, and the like continued to be used by the Greek fathers, as the equivalent "Scriptura" was by the Latin. The use of ἡ παλαιὰ διαθήκη in 2 Cor. iii. 14, for the law as read in the synagogues, and the prominence given in the Epistle to the Hebrews (vii. 22, viii. 6, ix. 15) to the contrast between the παλαιά and the καινή, led gradually to the extension of the former to include the other books of the Jewish Scriptures, and to the application of the latter, as of the former, to a book or collection of books. Of the Latin equivalents which were adopted by different writers (*Instrumentum*, *Testamentum*), the latter met with the most general acceptance, and perpetuated itself in the languages of modern Europe. One passage in Tertullian (*adv. Marc.* iv. 1) illustrates the growing popularity of the word which eventually prevailed, "instrumenti vel quod magis in usu est dicere, testamenti." The word was naturally used by Greek writers in speaking of the parts of these two collections. They enumerate (*e. g.* Athan. *Synop. Sac. Script.*) τὰ βιβλία of the Old and New Testament; and as these were contrasted with the apocryphal books circulated by heretics, there was a natural tendency to the appropriation of the word as limited by the article to the whole collection of the canonical Scriptures. In Chrysostom (*Hom.* x. *in Gen.*, *Hom.* ix. *in Col.*) it is thus applied in a way which shows this use to have already become familiar to those to whom he wrote. The liturgical use of the Scriptures, as the worship of the Church became organized, would naturally favor this application. The MSS. from which they were read would be emphatically *the* books of each church or monastery. And when this use of the word was established in the East, it was natural that it should pass gradually to the Western Church. The terminology of that Church bears witness throughout (*e. g.* Episcopus, Presbyter, Diaconus, Litania, Liturgia, Monachus, Abbas, and others) to its Greek origin, and the history of the word *Biblia* has followed the analogy of those that have been referred to. Here too there was less risk of its being used in any other than the higher meaning, because it had not, in spite of the introduction even in classical Latinity of *bibliotheca*, *bibliopola*, taken the place of *libri*, or *libelli*, in the common speech of men.

It is, however, worthy of note, as bearing on the history of the word in our own language, and on that of its reception in the Western Church, that "Bible" is not found in Anglo-Saxon literature, though Bibliothece is given (Lye, *Dict. Anglo-Sax.*) as used in the same sense as the corresponding word in mediæval Latin for the Scriptures as the great treasure-house of books (Du Cange and Adelung. *in voc.*). If we derive from our mother-tongue the singularly happy equivalent of the Greek εὐαγγελίον, we have received the word which stands on an equal eminence with Gospel as one of the later importations consequent on the Norman Conquest and fuller intercourse with the Continent

Digitized by Google

When the English which grew out of this union first appears in literature, the word is already naturalized. In R. Brunne (p. 290), Piers Ploughman (1916, 4271), and Chaucer (*Prol.* p. 437), it appears in its distinctive sense, though the latter, in at least one passage (*House of Fame*, book iii.) uses it in a way which indicates that it was not always limited to that meaning. From that time, however, the higher use prevailed to the exclusion of any lower; and the choice of it, rather than of any of its synonyms by the great translators of the Scriptures, Wycliffe, Luther, Coverdale, fixed it beyond all possibility of a change. The transformation of the word from a plural into a singular noun in all the modern languages of Europe, though originating probably in the solecisms of the Latin of the 13th century (Du Cange, *in voc. Biblia*), has made it fitter than it would otherwise have been, for its high office as the title of that which, by virtue of its unity and plan, is emphatically THE Book.

II. The history of the growth of the collections known as the Old and New Testament respectively, will be found fully under CANON. It falls within the scope of the present article to indicate in what way and by what steps the two came to be looked on as of coördinate authority, and therefore as parts of one whole — how, *i. e.* the idea of a completed Bible, even before the word came into use, presented itself to the minds of men. As regards a large portion of the writings of the New Testament, it is not too much to say that they claim an authority not lower, nay even higher than the Old. That which had not been revealed to the "prophets" of the Old dispensation is revealed to the prophets of the New (Eph. iii. 5). The Apostles write as having the Spirit of Christ (1 Cor. vii. 40), as teaching and being taught "by the revelation of Jesus Christ" (Gal. i. 12). Where they make no such direct claim their language is still that of men who teach as "having authority," and so far the old prophetic spirit is revived in them, and their teaching differs, as did that of their Master, from the traditions of the Scribes. As the revelation of God through the Son was recognized as fuller and more perfect than that which had been made πολυμερῶς καὶ πολυτρόπως to the fathers (Heb. i. 1), the records of what He had done and said, when once recognized as authentic, could not be regarded as less sacred than the Scriptures of the Jews. Indications of this are found even within the N. T. itself. Assuming the genuineness of the 2d Epistle of Peter, it shows that within the lifetime of the Apostles, the Epistles of St. Paul had come to be classed among the γραφαί of the Church (2 Pet. iii. 16). The language of the same Epistle in relation to the recorded teaching of prophets and apostles (iii. 2, cf. Eph. ii. 20, iii. 5, v. 11), shows that the πᾶσα προφητεία γραφῆς can hardly be limited to the writings of the Old Testament. The command that the letter to the Colossians was to be read in the church of Laodicea (Col. iv. 16), though it does not prove that it was regarded as of equal authority with the γραφὴ θεόπνευστος, indicates a practice which would naturally lead to its being so regarded. The writing of a man who spoke as inspired, could not fail to be regarded as participating in the inspiration. It is part of the development of the same feeling that the earliest records of the worship of the Christian Church indicate the liturgical use of some at least of the writings of the New, as well as of the Old Testament. Justin (*Apol.* i 66) places τὰ ἀπομνημονεύματα τῶν ἀποστόλων as read in close connection with, or in the place of, τὰ συγγράμματα τῶν προφητῶν, and this juxtaposition corresponds to the manner in which Ignatius had previously spoken of αἱ προφητεῖαι, νόμος Μωσέως, τὸ εὐαγγέλιον (*Ep. ad Smyrn.* c. 7). It is not meant, of course, that such phrases or such practices prove the existence of a recognized collection, but they show with what feelings individual writings were regarded. They prepare the way for the acceptance of the whole body of N. T. writings, as soon as the Canon is completed, as on a level with those of the Old. A little further on and the recognition is complete. Theophilus of Antioch (*ad Autolyc.* lib. iii.), Irenæus (*adv. Hær.* ii. 27, iii. 1), Clement of Alexandria (*Strom.* lib. iii. c. 10, v. c. 5), Tertullian (*adv. Prax.* cc. 15, 20), all speak of the New Testament writings (what writings they included under this title is of course a distinct question) as making up with the Old, μία γνῶσις (Clem. Al. *l. c.*), "totum instrumentum utriusque testamenti" (Tert. *l. c.*), "universæ scripturæ." As this was in part a consequence of the liturgical usage referred to above, it reacted on it, and influenced the transcribers and translators of the books which were needed for the instruction of the Church. The Syrian Peshito in the 3d, or at the close of the 2d century, includes (with the omission of some of the ἀντιλεγόμενα) the New Testament as well as the Old. The Alexandrian Codex, presenting in the fullest sense of the word a complete Bible, may be taken as the representative of the full maturity of the feeling which we have seen in its earlier developments.

III. The existence of a collection of sacred books recognized as authoritative leads naturally to a more or less systematic arrangement. The arrangement must rest upon some principle of classification. The names given to the several books will indicate in some instances the view taken of their contents, in others the kind of notation applied both to the greater and smaller divisions of the sacred volumes.

The existence of a classification analogous to that adopted by the later Jews and still retained in the printed Hebrew Bibles, is indicated even before the completion of the O. T. Canon (Zech. vii. 12). When the Canon was looked on as settled, in the period covered by the books of the Apocrypha, it took a more definite form. The Prologue to Ecclesiasticus mentions "the Law and the Prophets and the other Books." In the N. T. there is the same kind of recognition. "The Law and the Prophets" is the shorter (Matt. xi. 13, xxii. 40; Acts xiii. 15, &c.); "the Law, the Prophets, and the Psalms" (Luke xxiv. 44), the fuller statement of the division popularly recognized. The arrangement of the books of the Hebrew text under these three heads requires, however, a further notice.

1. The *Torah*, תּוֹרָה, νόμος, naturally continued to occupy the position which it must have held from the first as the most ancient and authoritative portion. Whatever questions may be raised as to the antiquity of the whole Pentateuch in its present form, the existence of a book bearing this title is traceable to a very early period in the history of the Israelites (Josh. i. 8, viii. 34, xxiv. 26). The name which must at first have attached to those portions of the whole book was applied to the earlier and contemporaneous history connected with the giving of the Law, and ascribed to the same writer. The marked distinctness of the five por-

Digitized by Google

tions which make up the Torah shows that they must have been designed as separate books, and when the Canon was completed, and the books in their present form made the object of study, names for each book were wanted and were found. In the Hebrew classification the titles were taken from the initial words, or prominent words in the initial verse; in that of the LXX. they were intended to be significant of the subject of each book, and so we have —

1. בְּרֵאשִׁית . . . Γένεσις.
2. שְׁמוֹת (וְאֵלֶּה) . Ἔξοδος.
3. וַיִּקְרָא Λευιτικόν.
4. בְּמִדְבַּר . . . Ἀριθμοί.
5. דְּבָרִים Δευτερονόμιον.

The Greek titles were adopted without change, except as to the 4th, in the Latin versions, and from them have descended to the Bibles of modern Christendom.

2. The next group presents a more singular combination. The arrangement stands as follows:

Nebiim. Prophetæ.
- נְבִיאִים
 - רִאשׁוֹנִים (priores)
 - Joshua.
 - Judges.
 - 1 & 2 Samuel.
 - 1 & 2 Kings.
 - אַחֲרוֹנִים (posteriores)
 - גְּדוֹלִים (majores)
 - Isaiah.
 - Jeremiah.
 - Ezekiel.
 - תְּרֵי עָשָׂר (minores)
 - The twelve minor Prophets.

— the Hebrew titles of these books corresponding to those of the English Bibles.

The grounds on which books simply historical were classed under the same name as those which contained the teaching of prophets, in the stricter sense of the word, are not at first sight obvious, but the O. T. presents some facts which may suggest an explanation. The "sons of the prophets" (1 Sam. x. 5; 2 K. v. 22, vi. 1) living together as a society, almost as a caste (Am. vii. 14), trained to a religious life, cultivating sacred minstrelsy, must have occupied a position as instructors of the people, even in the absence of the special calling which sent them as God's messengers to the people. A body of men so placed become naturally, unless intellectual activity is absorbed in asceticism, historians and annalists. The references in the historical books of the O. T. show that they actually were so. Nathan the prophet, Gad, the seer of David (1 Chr. xxix. 29), Ahijah and Iddo (2 Chr. ix. 29), Isaiah (2 Chr. xxvi. 22, xxxii. 32), are cited as chroniclers. The greater antiquity of the earlier historical books, and perhaps the traditional belief that they had originated in this way, were likely to coöperate in raising them to a high place of honor in the arrangement of the Jewish Canon, and so they were looked on as having the prophetic character which was denied to the historical books of the Hagiographa. The greater extent of the prophecies of Isaiah, Jeremiah, Ezekiel, no less than the prominent position which they occupied in the history of Israel, led naturally to their being recognized as the Prophetæ Majores. The exclusion of Daniel from this subdivision is a more remarkable fact, and one which has been differently interpreted; the Rationalistic school of later criticism (Eichhorn, De Wette, Bertholdt) seeing in it an indication of later date, and therefore of doubtful authenticity the orthodox school on the other [hand], as represented by Hengstenberg (*Dissert. on Dan.*, ch. ii. § iv. and v.), maintaining that the difference rested only on the ground that, though the utterer of predictions, he had not exercised, as the others had done, a prophet's office among the people. Whatever may have been its origin, the position of this book in the Hagiographa led the later Jews to think and speak slightingly of it, and Christians who reasoned with them out of its predictions were met by remarks disparaging to its authority (Hengstenberg, *l. c.*). The arrangement of the Prophetæ Minores does not call for special notice, except so far as they were counted, in order to bring the whole list of canonical books within a memorial number answering to that of the letters in the Hebrew alphabet, as a single volume, and described as τὸ δωδεκαπρόφητον.

3. Last in order came the group known as *Cetubim*, כְּתוּבִים (from כָּתַב to write), γραφεῖα, ἁγιόγραφα, including the remaining books of the Hebrew Canon, arranged in the following order, and with subordinate divisions:

(*a.*) Psalms, Proverbs, Job.

(*b.*) The Song of Songs, Ruth, Lamentations, Ecclesiastes, Esther.

(*c.*) Daniel, Ezra, Nehemiah, 1 and 2 Chronicles.

Of these, (*a*) was distinguished by the memorial word אֱמֶת, *truth*, formed from the initial letters of the three books; (*b*) as חֲמֵשׁ מְגִלּוֹת, *the five rolls*, as being written for use in the synagogues on special festivals on five separate rolls.

Of the Hebrew titles of these books, those which are descriptive of their contents are תְּהִלִּים, the Psalms. מִשְׁלֵי, Proverbs. אֵיכָה, Lamentations (from the opening word of wailing in i. 1). The Song of Songs (שִׁיר הַשִּׁירִים). Ecclesiastes (קֹהֶלֶת, the Preacher). 1 and 2 Chronicles (דִּבְרֵי הַיָּמִים, words of days = records).

The Septuagint translation presents the following titles, — Ψαλμοί, Παροιμίαι, Θρῆνοι, Ἆσμα ἀσμάτων, Ἐκκλησιαστής, Παραλειπόμενα (*i. e.* things omitted, as being supplementary to the Books of Kings). The Latin version imports some of the titles, and translates others, Psalmi, Proverbia, Threni, Canticum Canticorum, Ecclesiastes, Paralipomenon; and these in their *translated* form have determined the received titles of the books in our English Bibles; Ecclesiastes, in which the Greek title is retained, and Chronicles, in which the Hebrew and not the Greek title is translated, being exceptions.

The LXX. presents, however, some striking variations in point of arrangement as well as in relation to the names of books. Both in this and in the insertion of the ἀντιλεγόμενα, which we now know as the Apocrypha, among the other books, we trace the absence of that strong reverence for the Canon and its traditional order which distinguished the Jews of Palestine. The Law, it is true, stands first, but the distinction between the greater and lesser prophets, between the Prophets and the Hagiographa is no longer recognized. Daniel, with the Apocryphal additions, follows upon Ezekiel; the Apocryphal 1st or 3d Book of Ezra

Digitized by Google

son as a 2d following on the Canonical Ezra.[a] Tobit and Judith are placed after Nehemiah, Wisdom (Σοφία Σολόμωντος) and Ecclesiasticus (Σοφία Σειράχ) after Canticles, Baruch before and the Epistle of Jeremiah after Lamentations, the twelve Lesser Prophets before the four Greater, and the two [three or four] Books of Maccabees come at the close of all. The Latin version follows nearly the same order, inverting the relative position of the greater and lesser prophets. The separation of the doubtful books under the title of Apocrypha in the Protestant versions of the Scriptures, left the others in the order in which we now have them.

The history of the arrangement of the books of the New Testament presents some variations, not without interest, as indicating differences of feeling or modes of thought. The four Gospels and the Acts of the Apostles uniformly stand first. They are so far to the New what the Pentateuch was to the Old Testament. They do not present however in themselves, as the books of Moses did, any order of succession. The actual order does not depend upon the rank or function of the writers to whom they are assigned. The two not written by Apostles are preceded and followed by those which are, and it seems as if the true explanation were to be found in a traditional belief as to the dates of the several Gospels, according to which St. Matthew's, whether in its Greek or Hebrew form, was the earliest, and St. John's the latest. The arrangement once adopted would naturally confirm the belief, and so we find it assumed by [the Muratorian Canon,] Irenæus, Origen, Augustine. [On the other hand, the *Codex Bezæ* (D) and the best MSS. of the Old Latin version have the following order: Matt., John, Luke, Mark. — A.] The position of the Acts as an intermediate book, the sequel to the Gospels, the prelude to the Epistles, was obviously a natural one. After this we meet with some striking differences. The order in the Alexandrian, Vatican, and Ephraem MSS. (A B C) gives precedence to the Catholic Epistles, and as this is also recognized by the Council of Laodicea (*Can.* 60), Cyril of Jerusalem (*Catech.* iv. p. 35), and Athanasius (*Epist. Fest.* ed. Bened. i. p. 961), it would appear to have been characteristic of the Eastern Churches. Lachmann, who bases his recension of the text chiefly on this family of MSS., has reproduced the arrangement in his editions. [So has Tischendorf; and this is the arrangement found in a great majority of the manuscripts. In the *Codex Sinaiticus* and in four other MSS. the Pauline Epistles precede the *Acts* — A.] The Western Church on the other hand, as represented by Jerome, Augustine, and their successors, gave priority of position to the Pauline Epistles, and as the order in which these were given presents (1) those addressed to Churches arranged according to their relative importance, (2) those addressed to individuals, the foremost place was naturally occupied by the Epistle to the Romans. The tendency of the Western Church to recognize Rome as its centre of authority may perhaps in part account for this departure from the custom of the East. The order of the Pauline Epistles themselves, however, is generally the same, and the only conspicuously different arrangement was that of Marcion, who aimed at a chronological order. In the three MSS. above referred to [and in the *Codex Sinaiticus*] the Epistle to the Hebrews comes after 2 Thessalonians. [In the manuscript from which the Vatican (B) was copied, it stood between Galatians and Ephesians. This is shown by the numbering of the sections in the Vat. MS. — A., In those followed by Jerome, it stands, as in the English Bible and the Textus Receptus, after Philemon. We are left to conjecture the grounds of this difference. Possibly the absence of St. Paul's name, possibly the doubts which existed as to his being the *sole* author of it, possibly its approximation to the character of the Catholic Epistles may have determined the arrangement. The Apocalypse, as might be expected from the peculiar character of its contents, occupied a position by itself. Its comparatively late recognition *may* have determined the position which it has uniformly held as the last of the Sacred Books.[b]

IV. *Division into Chapters and Verses.* As soon as any break is made in the continuous writing which has characterized in nearly all countries the early stages of the art, we get the germs of a system of division. But these divisions may be used for two distinct purposes. So far as they are used to exhibit the logical relations of words, clauses and sentences to each other, they tend to a recognized punctuation. So far as they are used for greater convenience of reference, or as a help to the memory, they answer to the chapters and verses of our modern Bibles. The question now to be answered is that which asks what systems of notation of the latter kind have been employed at different times by transcribers of the Old and New Testament, and to whom we owe the system now in use.

a * The Apocryphal 1st Book of Esdras, certainly in the principal MSS. and editions of the LXX., and probably in all, *precedes* the canonical Ezra. The Vatican, Alexandrine, and Sinaitic (Frid.-Aug.) MSS. of the Septuagint, with the Aldine edition, unite the Books of Ezra and Nehemiah in one as 2d Esdras. The statements in the text in regard to the order of the books in the Septuagint require great modification; for the MSS. and editions differ widely in this respect; and the Roman edition of the LXX. (1587), deviates materially in the arrangement of the books from the Vatican manuscript, which it has been popularly supposed to represent.

In the Vat. MS. the whole series of the poetical books intervenes between Nehemiah and Esther, which is followed by Judith, Tobit, and the Lesser and Greater Prophets, including Daniel. In the Alex. MS. the twelve Minor Prophets immediately follow Chronicles; then come the Greater Prophets, ending with Daniel; then Esther, Tobit, Judith, 1 Esdras, Ezra and Nehemiah as 2d Esdras, and the four Books of Maccabees. These are followed by the poetical books. In the *Codex Sinaiticus* 1st and 4th Maccabees come after Judith; then follow the Prophets, the greater *preceding* the lesser, contrary to the order in the Vat. and Alex MSS.; and last of all come the poetical books, Psalms, Proverbs, Ecclesiastes, Song of Songs, Wisdom of Solomon, Ecclesiasticus, Job. In respect to the position of the Book of Job, the Vatican and the Alexandrine manuscripts differ both from the Sinaitic and from each other, the former placing it after Canticles, the latter after Psalms. See Tischendorf's *Prolegom.* to his 3d edition of the LXX. (1860), pp. lxxiv., xciv., xcvi.

The best MSS. of the Vulgate, it may be further remarked, differ widely in the arrangement of the books from the common editions. See art. VULGATE, § 24, note on the Alcuin MS. A.

b * On the history of the arrangement of the books of the N. T., see Tischendorf, *N. T.* ed. 7ma, *Prolegom* pp. lxxi.-lxxiv.; Scrivener, *Introd. to the Crit. of the N. T.* pp. 61, 62; Laurent's *Neutestamentliche Studien* pp. 41–49 (Gotha, 1866); and especially Volkmar's Appendix to Credner's *Gesch. des Neutest. Kanon.* pp 399-411. A.

(1.) The Hebrew of the Old Testament.

It is hardly possible to conceive of the liturgical use of the books of the Old Testament, without some kinds of recognized division. In proportion as the books were studied and commented on in the schools of the Rabbis, the division would become more technical and complete, and hence the existing notation, which is recognized in the Talmud (the Gemara ascribing it to Moses, — Hupfeld, *Stud. und Krit.* 1830, p. 827), may probably have originated in the earlier stages of the growth of the synagogue ritual. The New Testament quotations from the Old are for the most part cited without any more specific reference than to the book from which they come. The references however in Mark xii. 26 and Luke xx. 37 (*ἐπὶ τῆς βάτου*), Rom. xi. 2 (*ἐν Ἠλίᾳ*) and Acts viii. 32 (*ἡ περιοχὴ τῆς γραφῆς*), indicate a division which had become familiar, and show that some at least of the sections were known popularly by titles taken from their subjects. In like manner the existence of a cycle of lessons is indicated by Luke iv. 17; Acts xiii. 15, xv. 21; 2 Cor. iii. 14; and this, whether identical or not with the later Rabbinic cycle, must have involved an arrangement analogous to that subsequently adopted.

The Talmudic division is on the following plan. The law was in the first instance divided into fifty-four פָּרָשִׁיּוֹת, *Parshioth* = sections, so as to provide a lesson for each Sabbath in the Jewish intercalary year, provision being made for the shorter year by the combination of two of the shorter sections. Coexisting with this there was a subdivision into lesser Parshioth, which served to determine the portions of the sections taken by the several readers in the synagogues. The lesser Parshioth themselves were classed under two heads — the *Open* (פְּתוּחוֹת, *Petuchoth*), which served to indicate a change of subject analogous to that between two paragraphs in modern writing, and began accordingly a fresh line in the MSS., and the *Shut* (סְתוּמוֹת, *Setumoth*), which corresponded to minor divisions, and were marked only by a space within the line. The initial letters פ and ס served as a notation, in the margin or in the text itself, for the two kinds of sections. The threefold initial פפפ or סכם, was used when the commencement of one of the Parshioth coincided with hat of a Sabbath lesson (comp. Keil, *Einleitung in las A. T.* §§ 170, 171).

A diffirent terminology was employed for the Prophetæ Priores and Posteriores, and the division was less uniform. The tradition of the Jews :hat the Prophets were first read in the service of the synagogue, and consequently divided into sections, because the reading of the Law had been forbidden by Antiochus Epiphanes, rests upon a very slight foundation, but its existence is at any rate a proof that the Law was believed to have been systematically divided before the same process was applied to the other books. The name of the sections in this case was הַפְטָרוֹת (*Haphtaroth*, from פָּטַר, *dimittere*). If the name were applied in this way because the lessons from the Prophets came at the close of the synagogue service, and so were followed by the dismissal of the people (Vitringa *de Synag.* iii. 2, 20), its history would present a singular analogy to that of "Missa," "Mass," on the assumption that it also was derived from the "Ite, missa est," by which the congregation was informed of the conclusion of the earlier portion of the service of the Church. The peculiar use of Missa shortly after its appearance in the Latin of ecclesiastical writers in a sense equivalent to that of Haphtaroth ("sex Missas de Prophetâ Esaiâ facite," Cæsarius Arelat. and Aurelian in Bingham, *Ant.* xiii. 1) presents at least a singular coincidence. The Haphtaroth themselves were intended to correspond with the larger Parshioth of the Law, so that there might be a distinct lesson for each Sabbath in the intercalary year as before; but the traditions of the German and the Spanish Jews, both of them of great antiquity, present a considerable diversity in the length of the divisions, and show that they had never been determined by the same authority as that which had settled the Parshioth of the Law (Van der Hooght, *Præfat. in Bib.* § 35). Of the traditional divisions of the Hebrew Bible, however, that which has exercised most influence in the received arrangement of the text, was the subdivision of the larger sections into verses (פְּסוּקִים, *Pesukim*). These do not appear to have been used till the post-Talmudic recension of the text by the Masoretes of the 9th century. They were then applied, first to the prose and afterwards to the poetical books of the Hebrew Scriptures, superseding in the latter the arrangement of *στίχοι, κῶλα, κόμματα*, lines and groups of lines, which had been based upon metrical considerations. The verses of the Masoretic divisions were preserved with comparatively slight variations through the middle ages, and came to the knowledge of translators and editors when the attention of European scholars was directed to the study of Hebrew. In the Hebrew MSS. the notation had been simply marked by the *Sóph-Pásûk* (׃) at the end of each verse; and in the earlier printed Hebrew Bibles (Sabionetta's, 1557, and Plantin's, 1566) the Hebrew numerals which guide the reader in referring, are attached to every fifth verse only. The Concordance of Rabbi Nathan, 1450, however, had rested on the application of a numeral to each verse, and this was adopted by the Dominican Pagninus in his Latin version, 1528, and carried throughout the whole of the Old and New Testament, coinciding substantially, as regards the former, with the Masoretic, and therefore with the modern division, but differing materially as to the New Testament from that which was adopted by Robert Stephens (cf. *infra*) and through his widely circulated editions passed into general reception. The chief facts that remain to be stated as to the verse divisions of the Old Testament are, (1) that it was adopted by Stephens in his edition of the Vulgate, 1555, and by Frellon in that of 1556; (2) that it appeared, for the first time in an English translation, in the Geneva Bible of 1560, and was thence transferred to the Bishops' Bible of 1568, and the Authorized Version of 1611. In Coverdale's Bible we meet with the older notation, which was in familiar use for other books, and retained in some instances (*e. g.* in references to Plato), to the present times. The letters A B C D are placed at equal distances in the margin of each page, and the reference is made to the page (or, in the case of Scripture, to the chapter) and the letter accordingly.

The Septuagint translation, together with the Latin versions based upon it, have contributed little or nothing to the received division of the Bible

Digitized by Google

Made at a time when the Rabbinic subdivisions were not enforced, hardly perhaps existing, and not used in the worship of the synagogue, there was no reason for the scrupulous care which showed itself in regard to the Hebrew text. The language of Tertullian (*Scorp.* ii.) and Jerome (*in* Mic. vi. 9; Zeph. iii. 4) implies the existence of "capitula" of some sort; but the word does not appear to have been used in any more definite sense than "locus" or "passage." The liturgical use of portions of the Old Testament would lead to the employment of some notation to distinguish the ἀναγνώσματα or "lectiones," and individual students or transcribers might adopt a system of reference of their own; but we find nothing corresponding to the fully organized notation which originated with the Talmudists or Masoretes. It is possible indeed that the general use of Lectionaria — in which the portions read in the Church services were written separately — may have hindered the development of such a system. Whatever traces of it we find are accordingly scanty and fluctuating. The stichometric mode of writing (i. e. the division of the text into short lines, generally with very little regard to the sense) adopted in the 4th or 5th centuries (see *Prolegom.* to Breitinger's *Septuagint*, i. § 6), though it may have facilitated reference, or been useful as a guide to the reader in the half-chant commonly used in liturgical services, was too arbitrary (except where it corresponded to the parallel clauses of the Hebrew poetical books) and inconvenient to be generally adopted. The Alexandrian MS. presents a partial notation of κεφάλαια, but as regards the Old Testament these are found only in portions of Deuteronomy and Joshua. Traces exist (Cotelier. *Monum. Eccles. Græc.*, Breitinger, *Proleg. ut sup.*) of a like division in Numbers, Exodus, and Leviticus, and Latin MSS. present frequently a system of division into "tituli" or "capitula," but without any recognized standards. In the 13th century, however, the development of theology as a science, and the more frequent use of the Scriptures as a text-book for lectures, led to the general adoption of a more systematic division, traditionally ascribed [by some] to Stephen Langton, Archbishop of Canterbury (Trivet *Annal.* p. 182, ed. Oxon.), [by others to] Hugh de St. Cher [Hugo de S. Caro] (Gilbert Genebrard, *Chronol.* l. iv. 644), and passing through his commentary (*Postilla in Universa Biblia*, and Concordance, *circ.* 1240) into general use. No other subdivision of the chapters was united with this beyond that indicated by the marginal letters A B C D as described above.

As regards the Old Testament then, the present arrangement grows out of the union of Cardinal Hugo's capitular division and the Masoretic verses. The Apocryphal books, to which of course no Masoretic division was applicable, did not receive a versicular division till the Latin edition of Pagninus in 1528, nor the division now in use till Stephens's edition of the Vulgate in 1555.

(2.) The history of the New Testament presents some additional facts of interest. Here, as in the case of the Old, the system of notation grew out of the necessities of study. The comparison of the Gospel narratives gave rise to attempts to exhibit the harmony between them. Of these, the first of which we have any record was the *Diatessaron* of Tatian in the 2d century (Euseb. *H. E.* iv. 29). This was followed by a work of like character from Ammonius of Alexandria in the 3d (Euseb. *Epist. ad Carpianum*). The system adopted by Ammonius however, that of attaching to the Gospel of St. Matthew the parallel passages of the other three, and inserting those which were not parallel, destroyed the outward form in which the Gospel history had been recorded, [and] was practically inconvenient. Nor did their labors have any direct effect on the arrangement of the Greek text, unless we adopt the conjectures of Mill and Wetstein that it is to Ammonius or Tatian that we have to ascribe the marginal notation of κεφάλαια, marked by A B Γ Δ, which are found in the older MSS. The search after a more convenient method of exhibiting the parallelisms of the Gospels led Eusebius of Cæsarea to form the ten Canons (κάνονες, registers) which bear his name, and in which the sections of the Gospels are classed according as the fact narrated is found in one Evangelist only, or in two or more. In applying this system to the transcription of the Gospels, each of them was divided into shorter sections of variable length, and to each of these were attached two numerals, one indicating the Canon under which it would be found, and the other its place in that Canon. Luke [iii. 21, 22], for example, would represent [constituted] the 13th section belonging to the first Canon [corresponding to the 14th section in Matthew, the 5th in Mark, and the 15th in John, — the first Canon comprising the sections common to the four Gospels]. This division, however, extended only to the books that had come under the study of the Harmonists. The Epistles of St. Paul were first divided in a similar manner by the unknown Bishop to whom Euthalius assigns the credit of it (*circ.* 396), and he himself, at the instigation of Athanasius [the younger], applied the method of division to the Acts and the Catholic Epistles. Andrew, bishop of Cæsarea in Cappadocia, completed the work by dividing the Apocalypse (*circ.* 500).[a]

Of the four great uncial MSS., A [and so the Sinaitic MS., but not, according to Tischendorf, *a prima manu*] presents the Ammonian or Eusebian numerals and canons, C and D the numerals without the canons. B has neither numerals nor canons, but a notation of its own, the chief peculiarity of which is, that the Epistles of St. Paul are treated as a single book, and brought under a continuous capitulation. After passing into disuse and so into comparative oblivion, the Eusebian and Euthalian divisions have recently (since 1827) again become familiar to the English student through Bishop Lloyd's edition of the Greek Testament. [The Eusebian sections and canons also appear in the recent editions of Tischendorf, Wordsworth, and Tregelles.]

With the New Testament, however, as with the Old, the division into chapters adopted by Hugh de St. Cher superseded those that had been in use previously, appeared in the early editions of the Vulgate, was transferred to the English Bible by Coverdale, and so became universal. The notation of the verses in each chapter naturally followed on the use of the Masoretic verses for the Old Testa-

[a] Euthalius appears to have derived these divisions, at least in the Acts, from a MS. written by Pamphilus the martyr (d. A. D. 309). See Montfaucon, *Bibl. Coislin.* p. 78 ff.; Tregelles, *Text. Crit. of the N. T.* pp. 27, 32. On the Eusebian sections and canons see Scrivener, *Introd. to the Crit. of the N. T.* pp. 50-53.

ment. The superiority of such a division over the marginal notation A B C D in the Bible of Cardinal Hugh de St. Cher led men to adopt an analogous system for the New. In the Latin version of Pagninus accordingly, there is a versicular division, though differing from the one subsequently used in the greater length of its verses. The absence of an authoritative standard like that of the Masoretes, left more scope to the individual discretion of editors or printers, and the activity of the two Stephenses caused that which they adopted in their numerous editions of the Greek Testament and Vulgate to be generally received. In the Preface to the Concordance, published by Henry Stephens, 1594, he gives the following account of the origin of this division. His father, he tells us, finding the books of the New Testament already divided into chapters (*tmemata*, or sections), proceeded to a further subdivision into verses. The name *versiculi* did not commend itself to him. He would have preferred *tmematia* or *sectiunculæ*, but the preference of others for the former led him to adopt it. The whole work was accomplished "inter equitandum" or, his journey from Paris to Lyons. While it was in progress men doubted of its success. No sooner was it known than it met with universal acceptance. The edition in which this division was first adopted was published in 1551, another came from the same press in 1555. It was used for the Vulgate in the Antwerp edition of Hentenius in 1559, for the English version published in Geneva in 1560, and from that time, with slight variations in detail, has been universally recognized. The convenience of such a system for reference is obvious; but it may be questioned whether it has not been purchased by a great sacrifice of the perception by ordinary readers of the true order and connection of the books of the Bible.[a] In some cases the division of chapters separates portions which are very closely united (see *e. g.* Matt. ix. 38, and x. 1, xix. 30, and xx. 1; Mark ii. 23–28, and iii. 1–5, viii. 38, and ix. 1; Luke xx. 45–47, and xxi. 1–4; Acts vii. 60, and viii. 1; 1 Cor. x. 33, xi. 1; 2 Cor. iv. 18, v. 1, vi. 18, and vii. 1), and throughout gives the impression of a formal division altogether at variance with the continuous flow of narrative or thought which characterised the book as it came from the hand of the writer. The separation of verses in its turn has conduced largely to the habit of building doctrinal systems upon isolated texts. The advantages of the received method are united with those of an arrangement representing the original more faithfully in the structure of the Paragraph Bibles, lately published by different editors, and in the Greek Testaments of Lloyd, Lachmann, and Tischendorf. The student ought, however, to remember in using these that the paragraphs belong to the editor, not to the writer, and are therefore liable to the same casualties rising out of subjective peculiarities, dogmatic bias, and the like, as the chapters of our common Bibles. Practically the risk of such casualties has been reduced almost to a minimum by the care of editors to avoid the errors into which their predecessors have fallen, but the possibility of the evil exists, and should therefore be guarded against by the exercise of an independent judgment.

[a] * On this point see the striking remarks of Locke in the Preface to his *Paraphrase and Notes on the Epistles of St Paul*. A.

* **BIBLE, ENGLISH.** See VERSION, AUTHORIZED.

BICHRI (בִּכְרִי: Βοχορί [Vat. Alex. -ρε:] *Bochri; first-born*, Sim.; *youthful*, Gesen. Fürst but perhaps rather *son of Becher*), ancestor of Sheba (2 Sam. xx. 1 ff.). [BECHER.]

A. C. H.

BIDKAR (בִּדְקַר [*stabber*, Ges.]: Βαδεκάρ [Vat.[1] -κα]; Joseph. Βαδάκρος: *Baducer*), Jehu's "captain" (שָׁלִישׁ: Joseph. ὁ τῆς τρίτης μοίρας ἡγεμών, *Ant.* ix. 6, § 3), originally his fellow-officer (2 K. ix. 25); who completed the sentence on Jehoram son of Ahab, by casting his body into the field of Naboth after Jehu had transfixed him with an arrow.

BIER. [BURIAL.]

BIGTHA (בִּגְתָא: Βαραζή; [Vat. Βαραζῆ; Alex. corrupt; Comp. Βαγαθά:] *Bagatha*), one of the seven "chamberlains" (סָרִיסִים, *eunuchs*) of the harem of Ahasuerus (Esth. i. 10).

BIGTHAN and BIGTHANA (בִּגְתָן, Esth. ii. 21, and בִּגְתָנָא, vi. 2: *Bagathas*), a eunuch ("chamberlain," A. V.) in the court of Ahasuerus, one of those "who kept the door" (marg. "threshold," ἀρχισωματοφύλακες, LXX.), and who conspired with Teresh, one of his coadjutors, against the king's life. The conspiracy was detected by Mordecai, and the eunuchs hung. Prideaux (*Con.* i. 363) supposes that these officers had been partially superseded by the degradation of Vashti, and sought revenge by the murder of Ahasuerus. This suggestion falls in with that of the Chaldee Vs., and of the LXX. which in Esth. ii. 21 interpolates the words ἐλυπήθησαν οἱ δύο εὐνοῦχοι τοῦ βασιλέως ὅτι προήχθη Μαρδοχαῖος. The name is omitted by the LXX. on both occasions. Bigthan is probably derived from the Persian and Sanskrit *Bagadâna*, "a gift of fortune" (Gesen. *s. v.*).

F. W. F.

BIGVAI [2 syl.] (בִּגְוַי: Βαγουέ, Βαγουαί, [etc.:] *Beguai*, [*Begui*]).

1. "Children of Bigvai," 2056 (Neh. 2067) in number, returned from the Captivity with Zerubbabel (Ezr. ii. 14; Neh. vii. 19), and 72 of them at a later date with Ezra (Ezr. viii. 14). [BAGOI; BAGO.]

2. (*Beguai, Begoai.*) Apparently one of the chiefs of Zerubbabel's expedition (Ezr. ii. 2; Neh. vii. 7), and who afterwards signed the covenant (Neh. x. 16).

BIK'ATH-A'VEN, Am. i. 5, marg. [AVEN 1; CŒLESYRIA.]

BILDAD (בִּלְדַּד, *son of contention*, if Gesenius's derivation of it from יָלַד בֵּן be correct: Βαλδάδ; [Alex. Βαλδας, in Job ii. 11: xviii. 1:] *Baldad*), the second of Job's three friends. He is called "the Shuhite" (הַשּׁוּחִי), which implies both his family and nation. Shuah was the name of a son of Abraham and Keturah, and of an Arabian tribe sprung from him, when he had been sent eastward by his father. Gesenius (*s. v.*) supposes it to be "the same as the Σαυκαία of Ptolemy (v. 15) to the east of Batanea," and therefore to the east of the land of Uz [SHUAH]. The LXX strangely enough, renders it ὁ τῶν Σαυχέων τό

Digitized by Google

γεννητός, appearing to intend a distinction between him and the other friends, whom in the same verse it calls βασιλεῖς (Job. ii. 11).

Bildad takes a share in each of the three controversies with Job (viii., xviii., xxv.). He follows in the train of Eliphaz, but with more violent declamation, less argument, and keener invective. His address is abrupt and untender; and in his very first speech he cruelly attributes the death of Job's children to their own transgressions and loudly calls on Job to repent of his supposed crimes. His second speech (xviii.) merely recapitulates his former assertions of the temporal calamities of the wicked; on this occasion he implies, without expressing, Job's wickedness, and does not condescend to exhort him to repentance. In the third speech (xxv.), unable to refute the sufferer's arguments, he takes refuge in irrelevant dogmatism on God's glory and man's nothingness: in reply to which Job justly reproves him both for deficiency in argument and failure in charitable forbearance (Ewald, *das Buch Ijob*). [See JOB.] F. W. F.

BIL'EAM (בִּלְעָם [*foreigner*, Ges.; or *throat*, *gorge*, Dietr.]: Ἰεμβλδαν; [Vat. om.;] Alex. Ιβλααμ: *Bi'lam*), a town in the western half of the tribe of Manasseh, named only in 1 Chr. vi. 70, as being given (with its "suburbs") to the Kohathites. In the lists in Josh. xvii. and xxi. this name does not appear, and Ibleam and Gath-rimmon are substituted for it, the former by an easy change of letters, the latter uncertain. [GATH-RIMMON; IBLEAM.] G.

BIL'GAH (בִּלְגָה [*cheerfulness*]: ὁ Βελγάς; [Vat. Βελβας:] *Belga*). 1. A priest in the time of David; the head of the fifteenth course for the temple service (1 Chr. xxiv. 14).

2. [Vat. Alex. FA.[1] omit; Rom. in Neh. xii. 18 Βαλγάς.] A priest who returned from Babylon with Zerubbabel and Joshua (Neh. xii. 5, 18); probably the same who, under the slightly altered name BILGAI, sealed the covenant (Neh. x. 8).

BIL'GAI [2 syl.] (בִּלְגַי [*cheerfulness*]: Βελγαΐ; [Vat. Βελσεια, FA. -σια:] *Belgai*), Neh. x. 8; probably the same as BILGAH, 2.

BIL'HAH (בִּלְהָה [perh. *bashfulness*]: Βαλλά: *Bala*). 1. Handmaid of Rachel (Gen. xxix. 29), and concubine of Jacob, to whom she bore Dan and Naphtali (Gen. xxx. 3–8, xxxv. 25, xlvi. 25; 1 Chr. vii. 13). Her step-son Reuben afterwards lay with her (Gen. xxxv. 22), which entailed a curse upon Reuben (Gen. xlix. 4).

2. [Βααλά; Vat. Αβελλα.] A town of the Simeonites (1 Chr. iv. 29); also called Baalah and Balah. [BAAL, p. 208, No. 2, *b*.]

BIL'HAN (בִּלְהָן [perh. *modest*]: Βαλαάμ; [Alex. Βαλααν:] *Balaan*, the same root as Bilhah, Gen. xxx. 3, &c. The final ן is evidently a Horite termination, as in Zaavan, Akan, Dishan, Aran, Lotan, Alvan, Hemdan, Eshban, &c.; and may be compared with the Etruscan *ena*, Greek α(ν)ς, ων, &c.).

1. A Horite chief, son of Ezer, son of Seir, dwelling in Mount Seir, in the land of Edom (Gen. xxxvi. 27; 1 Chr. i. 42).

2. (Βαλαάν: *Balan*.) A Benjamite, son of Jediael (1 Chr. vii. 10). It does not appear clearly from which of the sons of Benjamin Jediael was descended, as he is not mentioned in Gen. xlvi. 21, or Num. xxvi. But as he was the father of Ehud (ver. 10), and Ehud seems, from 1 Chr. viii. 3, 6 to have been a son of Bela, Jediael, and consequently Bilhan, were probably Belaites. The occurrence of Bilhan as well as Bela in the tribe of Benjamin, names both imported from Edom, is remarkable. A. C. H.

BIL'SHAN (בִּלְשָׁן [*son of the tongue*] Βαλασάν [Vat. Βασραμ], Βαλσάν [Alex. Βασσαν, FA. Βασφαν]: *Belsan*, [*Belsam*]), one of Zerubbabel's companions on his expedition from Babylon (Ezr. ii. 2; Neh. vii. 7).

BIM'HAL (בִּמְהָל [*son of circumcision*]: Βαμαήλ; [Vat. Ιμαλαηλ:] *Chamaal*), one of the sons of Japhlet in the line of Asher (1 Chr. vii. 33).

BIN'EA (בִּנְעָא [perh. *fountain*]: Βααρά; [Vat. Βανα, 1 Chr. viii. 37; Alex. do. ix. 43:] *Banaa*), the son of Moza; one of the descendants of Saul (1 Chr. viii. 37; ix. 43).

BINNUI (בִּנּוּי [*a building*, Ges.; *kindredship*, Fürst]: Βανία; [Vat. Εβανια:] *Bennoi*). 1. A Levite, father of Noadiah, in Ezra's time (Ezr. viii. 33).

2. [Βανουί; Vat. FA. Θανουι: *Bennui*.] One of the sons of Pahath-moab, who had taken a foreign wife (Ezr. x. 30). [BALNUUS.]

3. [Βανουί: *Bennui*.] Another Israelite, of the sons of Bani, who had also taken a foreign wife (Ezr. x. 38). [Here the A.V. ed. 1611, etc. reads Bennui.]

4. [Βανουί: *Bannui*.] Altered from Bani in the corresponding list in Ezra (Neh. vii. 15).

5. [In Neh. iii. 24, Βανί, Vat. Alex. FA. Βανει; x. 9, Βανάλου; xii. 8, Βανουί: *Bennui*.] A Levite, son of Henadad, who assisted at the reparation of the wall of Jerusalem, under Nehemiah, Neh. iii. 24, x. 9. He is possibly also the Binnui in xii. 8.

BIRDS. [FOWLS.]

BIR'SHA (בִּרְשַׁע [*son of wickedness*, Ges.]: Βαρσά: *Bersa*), king of Gomorrha at the time of the invasion of Chedorlaomer (Gen. xiv. 2).

* **BIRTH.** [CHILDREN.]

BIRTHDAYS (τὰ γενέσια, Matt. xiv. 6) Properly τὰ γενέθλια is a birthday feast (and hence in the early writers the day of a martyr's commemoration), but τὰ γενέσια seems to be used in this sense by a Hellenism, for in Herod. iv. 26 it means a day in honor of the dead. It is very probable that in Matt. xiv. 6 the feast to commemorate Herod's accession is intended,[a] for we know that such feasts were common (especially in Herod's family, Joseph. *Ant.* xv. 11, § 3; Blunt's *Coincidences*, Append. vii.), and were called "the day of the king" (Hos. vii. 5). The Gemarists distinguish expressly between גנוסיא של מלכים, γενέσια regni, and the יום הלידה or birthday. (Lightfoot, *Hor. Hebr. ad Matt.* xiv. 6.)

The custom of observing birthdays is very ancient (Gen. xl. 20; Jer. xx. 15); and in Job i. 4, &c., we read that Job's sons "feasted every one his day." In Persia they were celebrated with peculiar honors and banquets, for the details of which see

[a] * Against this opinion see Meyer (*in loc.*) who says here is not a single Greek example of γενέσια with this meaning. See also Kuinoel, i. 426. There is no reason for discarding the usual sense in Matt. xiv. 6. H.

Herod. i. 136. And in Egypt "the birthdays of the kings were celebrated with great pomp. They were looked upon as holy; no business was done upon them, and all classes indulged in the festivities suitable to the occasion. Every Egyptian attached much importance to the day, and even to the hour of his birth" (Wilkinson, v. 290). Probably in consequence of the ceremonies usual in their celebration, the Jews regarded their observance as an idolatrous custom (Lightfoot, *l. c.*).

F. W. F.

BIRTHRIGHT (בְּכֹרָה: τὰ πρωτοτόκια). The advantages accruing to the eldest son were not definitely fixed in patriarchal times. The theory that he was the priest of the family rests on no scriptural statement, and the Rabbis appear divided on the question (see Hottinger's *Note on Goodwin's Moses and Aaron*, i. 1; Ugol. iii. 53). Great respect was paid to him in the household, and, as the family widened into a tribe, this grew into a sustained authority, undefined save by custom, in all matters of common interest. Thus the "princes" of the congregation had probably rights of primogeniture (Num. vii. 2, xxi. 18, xxv. 14). A "double portion" of the paternal property was allotted by the Mosaic law (Deut. xxi. 15–17), nor could the caprice of the father deprive him of it. This probably means twice as much as any other son enjoyed. Such was the inheritance of Joseph, his sons reckoning with his brethren, and becoming heads of tribes. This seems to explain the request of Elisha for a "double portion" of Elijah's spirit (2 K. ii. 9). Reuben, through his unfilial conduct, was deprived of the birthright (Gen. xlix. 4; 1 Chr. v. 1). It is likely that some remembrance of this lost preeminence stirred the Reubenite leaders of Korah's rebellion (Num. xvi. 1, 2, xxvi. 5–9). Esau's act, transferring his right to Jacob, was allowed valid (Gen. xxv. 33). The first-born of the king was his successor by law (2 Chr. xxi. 3); David, however, by divine appointment, excluded Adonijah in favor of Solomon, which deviation from rule was indicated by the anointing (Goodwin, *l. c.* 4, with Hottinger's notes). The first-born of a line is often noted by the early scriptural genealogies, *e. g.* Gen. xxii. 21, xxv. 13; Num. xxvi. 5, &c. The Jews attached a sacred import to the title (see Schöttgen, *Hor. Hebr.* i. 922) and thus "first-born" and "first-begotten" seem applied to the Messiah (Rom. viii. 29, Heb. i. 6).

H. H.

* The term "first-born" is used figuratively to denote preëminence, and is applied to one peculiarly distinguished by the favor of God, as to David, Ps. lxxxix. 27; to the Jewish nation as the chosen people, Ex. iv. 22; 2 Esdr. vi. 58; Psalt. Salom. xviii. 4 (Fabric. *Cod. pseudepigr. V. T.* i. 970); and to Ephraim, Jer. xxxi. 9. See also Col. i. 15.
